December Trade Statement Makes an Unprecedented Showing.

STOCKS CAUSED TO JUMP.

Balance of $325,322,184 in Favor of This Country Never Before Reached.

HEAVY REALIZING OF PROFITS.

Sugar, Chicago Gas, Tennessee Coal and Iron and the Grangers Exhibit the Most Strength. Range of Prices

Wall Street, Friday, Jan. 15.

The train was laid and only the touch of the match was required to start the bull market into full blaze to-day. The December trade statement furnished the impetus and the outbreak of speculation found so few stocks offering in the market that prices advanced rapidly throughout the day. The trade statement completed the figures for the year, and revealed no new condition, but emphasized the remarkable situation in our international commercial relations. The balance of trade of $325,322,184 for 1896 in our favor is without precedent. The gain in the excess of exports over imports, as compared with 1895, was $302,131,395. The net gold imports of $47,777,097 compare with net gold exports of $70,571,010, a gain of $118,348,107 in our favor.

The net international movement of money as represented in gold and merchandise during 1896 improved $420,047,502, as compared with the preceding year. It may also be added to this exhibit in favor of this country that fully $50,000,000 of New York money is now being loaned abroad through foreign exchange machinery.

These facts seemed to burst upon Wall street to-day with new light. It did not matter much, however, what gave the market its impetus. Activity alone was required. Prices rose 1 to 2 per cent in the active stocks. There was much gossip relating to certain stocks, but the factors underlying particular stocks were not of much significance except to direct speculative attention for the time being to those stocks. On the advance there was heavy realizing of profits by professionals who were somewhat dazed by the sudden movement of the market. Such sales were easily absorbed, and the market went on steadily upward, closing at the highest point.

The most important feature of the market was the character of the buying. There was some covering of shorts, but operations for long account advanced prices. Commission houses generally reported an increase in outside interest, and both telegraph and telephone inquiry was unusually brisk. Such indication of public interest usually precedes an engagement of the public in the market. Sugar, Chicago Gas, Tennessee Coal & Iron and the Grangers showed the most notable strength. It might be added that the declaration of a dividend in Chicago Gas was officially confirmed to-day, and the sale of 12,000 tons for export by the Tennessee Coal & Iron Company was made known.

LIVELY IN MINING SHARES.

Prices Advance in a Few Instances and Cause Some Excitement.

A little of the old-time excitement broke out on the Mining Exchange yesterday. At the afternoon call a bunch of orders was distributed on the floor, which set things moving at a lively pace. The principal orders were in Gold Coin, Mercur ad Red Mountain. Mercur was bid up from $6 to $6.75 per share, but none could be forced out.

The Gold Coin mining stock is listed on the Boston Stock Exchange, but its principal owners are in this city. It became unusually active yesterday and was driven up from $3.50 per share to $4.75. W. L. Boyd sold it down to $4.50 at the close. D. L. Monjo was the principal buyer. Victor was offered down to $4 per share here. The last sale of the stock on the Consolidated Exchange was at $6.50 per share.

Ohio Coal Carriers Stop the War.

The Ohio bituminous coal carrying roads have agreed upon a combination of rates and prices which, it is believed, will stop the rate cutting war recently carried on there. A meeting of the Ohio Coal Traffic Association, which the new combine is called, will be held in Chicago, January 19. The association has allotted the traffic on the basis of records taken for the last three years. The percentages will be approximately as folelws: Hocking Valely, 28; Toledo & Ohio Central, 18; Wheeling & Lake Erie, 14½; Cleveland, Lorain & Wheeling, 13½; Columbus, Sandusky & Hocking, 10; Baltimore & Ohio, 8, and Walhonding Valley, 6.

Thrilling History of the XIXth Century's Most Gifted and Fiendish Criminal.

"He obtained a thin strip of metal, probably from a broken utensil that was in his cell a few minutes months ago. This bit of metal was about three inches long, almost as thin as paper, and without a point or cutting edge. He sharpened it and notched the edge with the knife furnished to him when he eats. With this saw he cut across three boards of the floor near the outer wall of the cell. The cuts in the board were so fine as to be almost invisible, and they became entirely so when rubbed with soap cleverly colored."

ORDER NOW! TO-DAY!!

WHEAT AT THE BOTTOM.

Indications That the Price Is About at Its Lowest, and an Advance May Be Expected.

On' Change, Friday, Jan. 15.

The wheat market was rather unsettled and weak to-day as compared with yesterday. Trade was almost entirely local and chiefly of the "scalping" order. The market opened quiet and ⅜ to ¾c. lower for all options save those for July, which were at unchanged figures. The decline was due to the feeble response of Liverpool to our substantial advance of yesterday. Near noon prices jumped up to last night's closing quotations on a sudden burst of strength in the St. Louis market, and a renewal of the active covering by St. Louis shorts began yesterday in Chicago. The firmness soon wore off, however, and the market turned dull and weak again. During the last hour a quantity of long wheat was thrown into the pit and prices nervously declined to close at about the lowest figures at a net loss of ⅜ to ¾c. The Chicago market lost ⅛ to ⅛c.

It is confidently believed that the bottom figures of wheat have been reached and that prices should advance at once. Circumstances warrant the latter. The extreme shortness of the world's output is proven beyond a doubt and the law of supply and demand will surely force the price up.

The corn market was quiet but fairly steady, closely following wheat in its fluctuations. Prices closed at a net loss of ⅛ to ¼c. Export sales reported were of 18,000 bushels. The oat market ruled firm most of the day, but eased off with wheat, and closed ⅛ to ¼c lower. Export sales reported were of 20,000 bushels. The trade in flour was quiet at steady prices. The hog product was active and steady in the morning, but closed weak, at a loss of 2½ to 2½ points.

The Cotton Market.

No new features appeared in the cotton market to-day. Trade continued light in volume and was still confined to local operators. Outside speculation was completely at a standstill, principally on account of the poor condition of the dry goods trade and the poor situation in the print cloth market of Fall River. Better cables from Liverpool were looked for this morning because of our firm closing of yesterday, but they did not come, and the market opened 3 to 4 points lower for the near months. Before the call was finished, however, some buying orders were received, which rallied the market slightly. Prices fluctuated nervously in a narrow range during the afternoon and closed at a net loss of 2 to 5 points. Total sales were near 90,000 bales.

Port receipts to-day were 20,531 bales, against 15,390 on the same day last week and 12,750 on the same day a year ago. Receipts so far this week are 147,147 bales, against 163,370 up to the same time last week. Prices:

The Coffee Market.

The coffee market was extremely quiet. Not a transaction was made up to 12 o'clock, a very unusual circumstance. In the afternoon trade became fairly lively, and 12,250 bags were sold by closing time. The market opened 5 points higher. Havre c
