KRYSTALAK

Dry, Flaky, Milk Crystals

Milk for cooking whenever you need it, in just the quantity needed. Simply dissolve 4 level tablespoons of KRYSTALAK in one cup of water. KRYSTALAK will solve your milk problems and also reduce your milk bill. Keep a package on hand if only to save time when the milk runs out or sours, or when the milkman fails you.

KRYSTALAK is nothing more or less than pure separated milk from which the water has been evaporated—contains all the nourishment except the fat, and keeps for weeks in a dry place. No refrigeration required. A pound package at 50c will make five quarts of milk for cooking. That's 10c a quart—and you know what bottled milk costs you now.

La-May Face Powder Is Pure!

—No White Lead—No Rice Powder—
It Really Stays On Unusually Well.

Up to the present time it has been almost impossible to get a face powder to stay on longer than it takes to put it on. You powder your nose nicely and the first gust of wind or the first puff of your handkerchief and away goes the powder, leaving your nose red, shiny and conspicuous, probably just at the very moment when you would give anything to appear at your best. A specialist has at last perfected a pure powder that women say stays on wonderfully well. It does not contain white lead or starchy rice powder (Poudre de Riz) to make it stay on. White lead poisons the skin and rice powder turns into a gluey paste that encourages enlarged pores and unsightly complexions. This improved formula contains a medicinal powder doctors use to heal the skin. In fact, this new powder helps to prevent and reduce enlarged pores and irritations. It is called La-may (French, Poudre L'Ame). Because it is pure and because it stays on so well, it is already sold everywhere. The large size is only fifty cents and the trial size is twenty-five cents. When you use this delightful La-may and see how wonderfully it beautifies your complexion, you will understand why it is now used by over a million American women.
