PRICES OF STOCKS ARE IRREGULAR, BUT MANY ISSUES SHOW ADVANCES

STOCKS END STRONG IRREGULAR EARLY

Advances Made in Industrial Issues, While Gains Were Also Scored in Railroad Shares.

Sales were nearly doubled on the Stock Exchange yesterday, although traders assumed no definite position. The St. Paul dividend reduction was being digested and the conservatism of that step on the part of the directors of the system was generally commended. The market as a whole was irregular, although there were remarkable advances in certain issues.

Gains were scored in the industrial group. American Tobacco, the most shining example, advanced 26 points to 286, and other affiliated companies of the tobacco group made proportionate gains. There also were spasmodic advances in several railroad issues. Delaware, Lackawanna and Western jumped ten points, and Delaware and Hudson, New York Central and other railway stocks made a brave show of strength.

The stock movements, on the whole, were spasmodic, although they showed an undercurrent of strength. Foreign dealings in this market were estimated at only about 15,000 shares in arbitrage operations, most of them being on the selling side. According to the London despatches, the bank meetings which were being held there were not altogether optimistic, and, on the whole, the situation in the London market indicated the same spirit of uncertainty that prevailed in this city.

Local banks appeared to have gained at least $12,000,000 in cash this week, and the prospect for further gold shipments was regarded with no apprehension.

Sales at the Board amounted to 443,624 shares, against 241,040 shares on Thursday and 869,408 shares on Wednesday. Following is a summary of yesterday's market:—
