

HISTORIC AMERICAN ENGINEERING RECORD

INDEX TO PHOTOGRAPHS

LOWE MILL
8th Ave., SW
Huntsville
Madison County
Alabama

HAER No. AL-142

Jet Lowe, HAER Photographer, August 1997

- AL-142-1 View of north elevation of Lowe Mill (north section of building). Note south section and boiler stack in right background. (The south section of Lowe Mill was built c.1901, the north section c. 1905, and connected shortly thereafter).
- AL-142-2 View northwest of south section of Lowe Mill. The north section of the mill is at the left of the photograph.
- AL-142-3 View of west elevation of south section of Lowe Mill.
- AL-142-4 View looking northeast of south section of mill. Note base of boiler stack and dust collectors.
- AL-142-5 North/northwest elevations of boiler stack and boiler room. Note tires on roof to reduce impact of brick work falling from stack.
- AL-142-6 Southeast elevation of north section of mill.
- AL-142-7 View of east elevation of south section of Lowe Mill.
- AL-142-8 View - from left to right - of warehouses, water tower, and southeast corner of north section of mill.
- AL-142-9 View of east elevation of north section of mill. Note wellhouse that forms a part of the municipal water supply.
- AL-142-10 Detail view of southwest elevation of boiler stack.
- AL-142-11 Detail view of window bays on south elevation of south section of mill.
- AL-142-12 Interior view of second floor of north section of mill, looking north showing structural system.

INDEX TO PHOTOGRAPHS
(Page 2)

- AL-142-13 Interior view of second floor of connector building between north and south sections of mill.
- AL-142-14 Detail view of columns, capitals and beams at south end of north section of mill. Note the transition from deep pocket to shallow pocket column capitals.
- AL-142-15 Interior view of first floor of north section of mill. Note detail of column from the second floor passing through the floor to rest directly on beam above first floor column. Also note chamfered edges on column.
- AL-142-16 General view of structural system on third floor of south section of mill. The rounded columns are made of wood.
- AL-142-17 Detail view of ceiling and beams on third floor of south section of mill. Note the broom attached to the ceiling, which was used to sweep the leather belts used for power transmission, and the bearing pads bolted to the ceiling as well.
- AL-142-18 Detail view showing cross section of floor on third floor of south section of mill. Note grooved planks and splines.
- AL-142-19 Interior of boiler room at Lowe Mill. Builder's plates on the boiler read "The Lowe Manufacturing Co. Made by Hedges-Walsh-Weidner, Chattanooga, Tenn. USA" and (at top) "The Casey-Hedges Co. Chattanooga, Tenn. USA - Builders. The tank at left may be an expansion or circulating tank. Its plate reads, "Patent 1785983 - The Worthington Company."

- AL-142-13 Interior view of second floor of connector building between north and south sections of mill.
