

HISTORIC AMERICAN ENGINEERING RECORD

INDEX TO PHOTOGRAPHS

VANDENBURG AIR FORCE BASE, SPACE LAUNCH
COMPLEX 10, EAST LAUNCH PAD
(Facility No. 1651)
North End of Aero Road
Lompoc
Santa Barbara County
California

HAER CA-296-F

A full description of the East Launch Pad is in HAER CA-296

INDEX TO BLACK AND WHITE PHOTOGRAPHS

Martin Stupich, photographer, 2001

- | | |
|------------|---|
| CA-296-F-1 | General overview of East Pad showing shelter and blast walls, note West Launch Pad at distant left; view to northwest |
| CA-296-F-2 | General view of shelter and north blast wall; view to south |
| CA-296-F-3 | North side of shelter with blast wall and electrical equipment; view to south |
| CA-296-F-4 | General view of south side with south blast wall, note typical fire hydrant front left with crash posts; view to northeast |
| CA-296-F-5 | West and south sides of shelter and equipment stored behind blast wall; view to northeast |
| CA-296-F-6 | West and south sides of shelter with concrete pad and rails for rolling west end shelter wall, view to northeast |
| CA-296-F-7 | Detail of access door in wall panel of shelter and armature for rolling west end shelter wall at left; view to north |
| CA-296-F-8 | Oblique view of north side of shelter with armature for rolling west end shelter wall, typical wall panel sections, theodolite alignment window (horizontal at center), and relationship of shelter to north blast wall; view to east |

INDEX TO PHOTOGRAPHS

Page 2

- CA-296-F-9 Detail of armature for rolling west end shelter wall and grounding cable fastened to concrete at northwest corner of shelter; view to south
- CA-296-F-10 General view of tow pad with rail and cables leading from anchors to missile shelter; view to east
- CA-296-F-11 Detail view (foreground to background): capped terminus of cable trench, cable connections, spring shock absorbers, switch trip tab, and brake lock; view to south
- CA-296-F-12 View of overflow basin at northeast corner; view to southwest
- CA-296-F-13 View of opened shelter doors showing hardware for securing heavy doors in open position, note electrical cable penetrating lower panel wall - connects to interior cable retraction mechanism, and power and signal components (see HAER CA-296-F-14); view to southeast
- CA-296-F-14 Interior view of missile shelter with stored rockets, note ridge beam connection between roof and wall panels; view to west
- CA-296-F-15 Interior view of missile shelter; view to east
- CA-296-F-16 Detail of north wall of missile shelter, note rolling sill member, bent-column ribs and wall panels, and work platform in stowed position; view to north
- CA-296-F-17 Detail of cable retraction mechanism and power and signal components; view to northeast
- CA-296-F-18 Electrical breaker panel with high voltage feeds; view to southeast
- CA-296-F-19 Ladders on north blast wall and missile shelter, with double access door on north wall; view to southeast
- CA-296-F-20 North blast wall sheltering electrical equipment; view to south
- CA-296-F-21 Overview of RP-1 fuel storage area with skid-mounted fuel transfer equipment behind blast wall, note missile shelter in rear; view to north
- CA-296-F-22 Detail view of skid-mounted fuel transfer equipment, blast wall in rear; view to north
