Note: Field survey work for development of the HABS narrative was conducted as part of the Historic Structure Reports/Building Preservation Plans project in 2009; however, access for HABS record photography for Gatehouse No. 2 was not provided until August 2010. At that time, the interior of the building was being temporarily retrofitted for use as a security checkpoint during construction activities in progress on the west campus. The record photographs for this building therefore reflect interior conditions and finishes related to the renovation, rather than conditions and finishes exposed at the time of the field survey work.
