## INDEX TO BLACK AND WHITE PHOTOGRAPHS

Todd A Croteau, photographer, 2006

- |          |   |
|----------|---|
| HI-76-1  | Elevation of new rain shed, Building No. 241.   |
| HI-76-2  | New rain shed (Building No. 241) and steel water tanks with pipeline.   |
| HI-76-3  | Detail of new rain shed (Building No. 241). Note pipeline connection from collection trough.  |
| HI-76-4  | View of pipeline carried on a trestle from new rain shed (Building No. 241). Redwood tanks in background. Steel tanks behind trestle. |
| HI-76-5  | Redwood tanks with pipeline on trestle passing behind. Old rain shed (Building No. 43) can be seen at right behind the trestle.       |
| HI-76-6  | Redwood tanks, pipeline on trestle and old rain shed (Building No. 43).   |
| HI-76-7  | Detail of pipeline on trestle and redwood tanks in background.  |
| HI-76-8  | Redwood tanks in foreground with old rain shed (Building No. 43) and steel tanks in background.                                       |
| HI-76-9  | Detail of redwood tank on lava rock platform. Trestle and steel tanks can be see in right background.                                 |
| HI-76-10 | Redwood tanks with distribution pipeline running between them.  |

- HI-76-11 Detail of distribution pipeline and valves.
- HI-76-12 Rooftop view of tanks and old rain shed (Building No. 43).
- HI-76-13 Rooftop view of tanks and new rain shed (Building No. 241).
- Todd A Croteau, photographer, 2008
- HI-76-14 Rooftop view of tanks and new rain shed (Building No. 241) in background.
- HI-76-15 Rooftop view of tanks and old rain shed (Building No. 43).
- HI-76-16 Rooftop view of old rain shed (Building No. 43), pipeline on trestle, and water tanks.
- HI-76-17 Rooftop view of new rain shed (Building No. 241) showing collection gutter and overhead pipeline.
- HI-76-18 Rooftop detail of new rain shed (Building No. 241) with flume and overhead pipeline.
- HI-76-19 Detail of new rain shed (Building No. 241) showing underside of flume.
- HI-76-20 New rain shed (Building No. 241), overhead pipeline and raw water tank T4. Distribution pump house can be seen at the center of building.
- HI-76-21 New rain shed (Building No. 241) interior showing posts, braces, and roof structure.
- HI-76-22 New rain shed (Building No. 241) interior detail of building structure.
- HI-76-23 New rain shed (Building No. 241) on right with Tanks T5, T4 and T2 on left from front to back.
- HI-76-24 Raw water tank T5 with new rain shed (Building No. 241) in background.
- HI-76-25 Steel tanks T5 and T4 with overhead pipeline between. Redwood tanks seen in background
- HI-76-26 Redwood tanks, old rain shed (Building No. 43), pipeline on trestle, and tank T3.

Page 3

- HI-76-27 Detail of pipeline on trestle with redwood tank and old rain shed (Building No. 43) on either side.
- HI-76-28 Pipeline on trestle with old rain shed (Building No. 43) in background.
- HI-76-29 3/4 view of old rain shed (Building No. 43) showing northwest corner with corrugated siding.
- HI-76-30 Elevation of northwest end wall of old rain shed (Building No. 43).
- HI-76-31 3/4 view of old rain shed (Building No. 43) showing southwest corner with open bays.
- HI-76-32 Elevation of old rain shed (Building No. 43) showing southeast end and trusses.
- HI-76-33 Detail of old rain shed (Building No. 43) showing northeast wall and gutter boxes. Two 750,000 gallon steel tanks at right (T19 in foreground with T18 behind).
- HI-76-34 Detail of old rain shed (Building No. 43) with gutter box on northwest side. Maintenance staff in foreground.
- HI-76-35 Detail of old rain shed (Building No. 43) with collection downspouts from gutter to reservoir.
- HI-76-36 Interior view of old rain shed (Building No. 43) showing truss type A in foreground and truss type B behind that.
- HI-76-37 Interior view of old rain shed (Building No. 43) showing redwood dry storage building located inside.
- HI-76-38 Detail of old rain shed (Building No. 43) showing truss type B at vertical post.
- HI-76-39 Detail of old rain shed (Building No. 43) showing truss type B at wall post. New aluminum roofing seen in comparison with older galvanized steel siding.
- HI-76-40 Detail of old rain shed (Building No. 43) showing truss type A at wall post.

Page 4

- HI-76-41 Detail of old rain shed (Building No. 43) showing vertical posts on concrete footing with diagonal timber bracing and wire bracing.
- HI-76-42 Detail of old rain shed (Building No. 43) showing vertical posts. Note rock foundations of wood tanks once located under the rain shed on the ground at center of photograph.
- HI-76-43 Overall view of tanks, old rain shed (Building No. 43), and pipeline on trestle.
- HI-76-44 Closer view of previous shot.
- HI-76-45 View along road at "tank farm." From left to right: T18, T10, T8, T5, with new rain shed (Building No. 241) in background.
- HI-76-46 View of tanks showing concrete base of dismantled tank T12.
- HI-76-47 View of tanks T18 and T19 with redwood tanks to right. Old rain shed (Building No. 43) can be seen behind the tanks. Ground catchment can be seen at left in background.
- HI-76-48 View of ground catchment 1 with tank T19 at right.
- HI-76-49 View of slow sand filters with pump house/chlorinator in foreground. Clear well tank located behind pump house and trees.
