

HISTORIC AMERICAN BUILDINGS SURVEY

INDEX TO PHOTOGRAPHS

HABS  
PA,  
51-PHILA,  
6-

Independence Hall  
Chestnut Street between  
Fifth and Sixth Streets  
Philadelphia  
Philadelphia County  
Pennsylvania

HABS No. PA-1430

Jack Boucher, Photographer, February 1959

Photos 1 through 108 reveal the interior woodwork when it had been stripped of paint during the 1959 restoration. Photos 43, 86, and 98 detail some of the restoration work. 9 photos were transmitted to the Library of Congress in 1939.

CENTRAL HALL (Photos 1 through 37)

- PA-1430-1/0 FIRST FLOOR CENTRAL HALL, NORTH WALL, DOOR TO CHESTNUT STREET

SI-PHILA,

6-

The following photographs are photogrammetric documentation consisting of glass plate stereopairs. Only the left (or odd numbered) image of each pair was printed. The prints are 8" x 10" enlargements of the 2 1/2" x 3 1/2" glass plate negatives.

Photographs HABS PA-1430-1 through HABS PA-1430-138 were previously transmitted to the Library of Congress.

## SURVEY BENCH MARKS

Survey bench marks were established for Independence Hall before both the exterior and interior recording of the building. These allowed for the placement of targets on level lines at known heights above the reference marks to enable the accurate referencing of one facade or wall with the others. The interior bench marks were temporary, necessary only while the photography of the rooms was being done; the exterior benches (N & S) remained the same throughout the project. The location of the benches can be found by examining the following illustrations, A-D.

### List of Bench Marks and their locations:

- N - Center of metal "strap" at NW side of top step at North Entrance  
See illustration A
- S - Center of metal "strap" at SE side of top step at South Entrance  
See illustration B
- CH - Temporary mark set on the floor of Central Hall near the center of the arch to the Supreme Court; See illustration C
- B-1 - Temporary mark set on the floor of the Long Gallery at the West end of the room north of the Governor's Council North doors  
See illustration D
- B-2 - Temporary mark set on the floor of the Long Gallery at the East end of the room north of the Committee of Assembly North doors  
See illustration D
- B-3 - Temporary mark set on the floor roughly centered under the arch between the 2nd Floor Lobby and the Tower Stairhall 2nd floor landing; See illustration D

### Relationship Between N & S Bench Marks:

While the exterior photography was being completed in June 1985, the Survey Instrument was set up in the center of the arch between the Central Hall and the Tower Stairhall and elevation readings were taken from that position of the benches at the North and South steps -

Reading at the North Entry Step bench mark (N): 1.647M  
Reading at the South Entry Step bench mark (S): 1.695M

LEVEL LINE TARGETS

In order to establish a true horizontal reference for all the facades, a series of targets were set on a surveyed level line with the lower level stereopairs for both the exterior and interior photogrammetry.

EXTERIOR

North

LL targets set 0.280M above bench at North Entry Step (Bench N)

East

LL targets set 0.989M above bench at South Entry Step (Bench S)

South

LL targets for the East portion of the Main Block and the East 1/2 of the Tower set 0.989M above bench at South Entry Step (Bench S)

LL targets for the West portion of the Main Block and the West 1/2 of the Tower set 0.998M above bench at South Entry Step (Bench S)

West

LL targets set 0.998M above bench at South Entry Step (Bench S)

INTERIOR

Central Hall

LL targets set 1.558M above arbitrary bench in Central Hall (near center arch to Supreme Court) - (Bench CH)

Same LL reads 1.709M above South Entry Step (bench S) and  
1.632M above North Entry Step (bench N)

Instrument set up near the center of room

Assembly Room

LL targets set 1.658M above arbitrary bench in Central Hall (near center arch to Supreme Court)

Instrument set up near center of room

Supreme Court Chamber

LL targets set but were not related to any bench

Instrument set up near center of room high enough to clear jury boxes

Tower Stairhall

LL targets set and related to both the North Entry Step bench (N) and the South Entry Step bench (S)

North Entry Step (Bench N) Reading: 1.561M above bench

South Entry Step (Bench S) Reading: 1.642M above bench

2 sets of LL bullseye targets appear on the arch between the Tower Stairhall and Central Hall (Stereopair TS-E-1). The upper (or higher) set of bullseyes are set 1.558M above Bench CH. The lower bullseye targets are set 1.642M above Bench S and 1.561M above Bench N

Instrument set up near center of first floor of room

2nd Floor Lobby

LL targets set 1.678M above arbitrary bench B-3 (Center of Arch between  
2nd floor Lobby and Tower Stairhall at 2nd floor landing)  
Instrument set up near center of room

Long Gallery

LL targets set related to all three 2nd floor Benches -  
B-1: 1.608M  
B-2: 1.608M  
B-3: 1.688M  
Instrument set up near center of room

Committee of Assembly Chamber

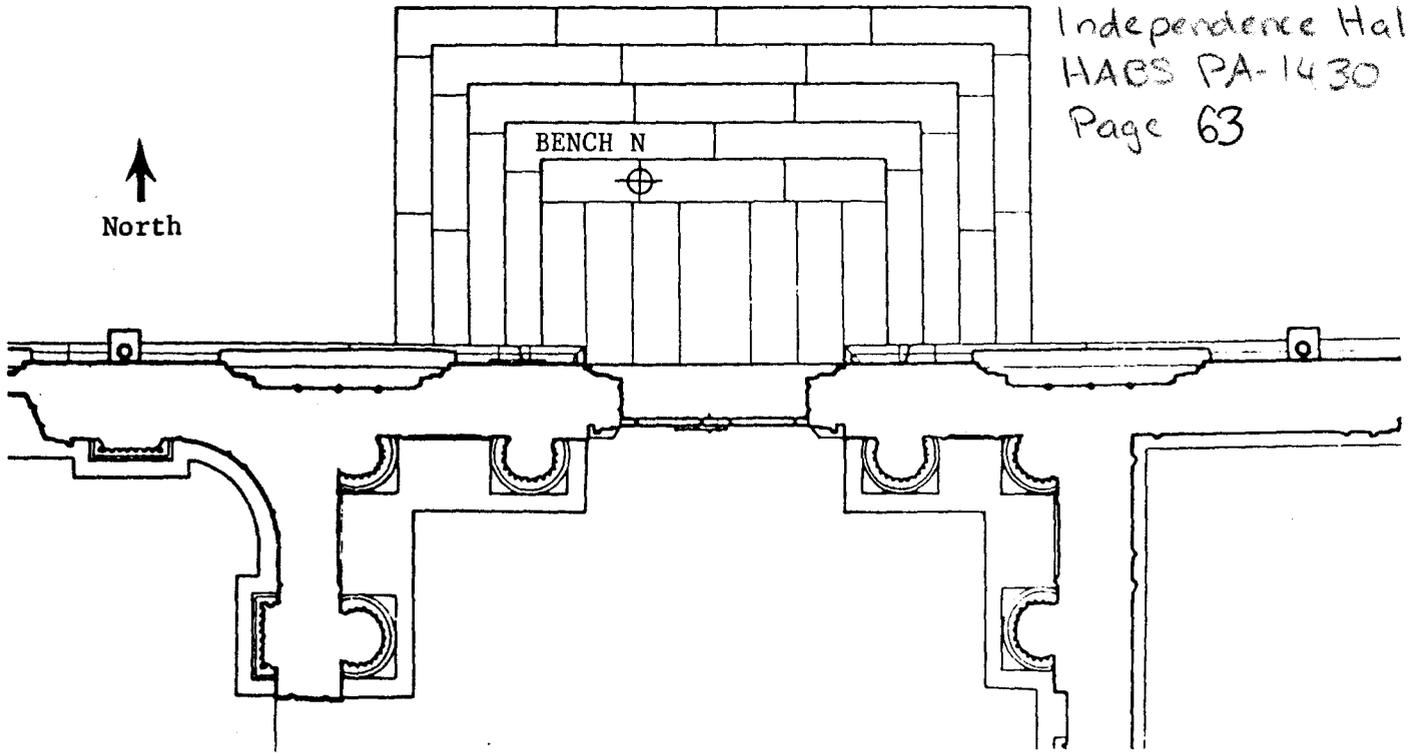

LL targets set 1.556M above Bench B-2 (arbitrary Bench at east end of  
Long Gallery north of Comm. of Assembly north wall doors)  
Instrument set up near center of room

Governor's Council Chamber

LL targets set 1.557M/1.558M above Bench B-3 (arbitrary Bench at west  
end of Long Gallery north of Gov. Council north wall doors)  
Instrument set up near center of room
