Wendover Air Force Base,
Airmen's Dormitory
(Building No. 2505) BA
HABS No. UT-125-~~2505~~
Page 1

The airmen's dormitory was constructed in 1944. The construction was of a temporary design with a wood foundation, wood floor, and wood walls. The roof is of asphalt roll construction. The heating source was originally an individual coal fired space heater. It is a 2,020-square-foot-building of 20-foot-by-101-foot dimensions. The building has a covered, enclosed porch.

This building was originally identical in use, plan, and appearance as 2511, 2512, 2513, 2514, 2504 and others. Since its original construction, the building has been converted into a medical supply and emergency room. The building's entrance is a covered porch with a ramp. From the entrance there is a hall along one side of the building leading to three separate wards. Prior to reaching the wards from the entrance, there is first a 15-foot-by-20-foot medical supply room; then a 15-foot-by-20-foot emergency room with a sink and Rheem Rheemglas hot water heater. The first two wards are 15 feet by 15 feet and 15 feet by 20 feet respectively. The third and last ward is 30 feet by 20 feet. Before reaching the back exit there is an undesignated room of 11-foot-by-20-foot dimensions. The original construction cost was \$3,200. The building appears to be structurally sound.
