CAMP WILLIAMS

(127TH INFANTRY REGIMENT CANTONMENT AREA SUBCOMPLEX–BUILDING 122)

- Location: 122 Peoria Street
Camp Williams-Volk Field National Guard Training Center
Camp Douglas, Juneau County, Wisconsin
- Significance: Building 122 was constructed in 1940-1941 as a company mess hall for the 127th Infantry Regiment Cantonment Area.
- History: Building 122 was designed by Lieutenant Colonel Henry C. Hengles and erected between 1940 and 1941 by the Works Progress Administration. It was a company mess hall for 127th Infantry Regiment Cantonment Area and replaced a wood-frame mess hall. The building currently functions as a private-room barracks.¹ A detailed history of the subcomplex is provided in the document for HABS No. WI-381-A.
- Description:
- A. General Statement: This building is constructed on a slight west northwest-east southeast axis. Directions have been simplified to north-south-east-west within this section.
1. Architectural character: Building 122 is a one-story, astylistic utilitarian, front-gabled structure constructed of tan, glazed tiles with red brick accents at the gables, corners and original doorways. A wall chimney and heavy timber purlins and lintels adorn the building. Asphalt shingles sheath the roof.
 2. Condition of Fabric: The exterior fabric is good. Alterations are limited to the wholesale replacement of windows and doors, as well as the encasing with aluminum of the sidewall eaves. The top portion of the wall chimney has been replaced with red brick. The building has been converted into private-room barracks. Thus the interior is completely renovated
- B. Exterior Description:
1. General Description: Oriented on an east-west axis, the gabled west (main)

facade is pierced by a central double doorway that is outfitted with a metal door and wood infill. It is flanked by replacement double-hung sashes. A louvered vent underlined with a thin concrete sill is set in the gable peak. The open eaves are supported by five heavy timber purlins.

Beginning at the southwest corner, the west facade is pierced by six regularly placed double-hung sash windows. The wall continues with an open expanse before reaching two additional window openings – the first of which has been converted into a doorway.

The east gabled endwall is defined by a central wall chimney flanked by large, one-over-one, double-hung sashes. Five timber purlins underline the open gable.

Starting at the northeast corner, the north facade is pierced by a doorway that once led to the kitchen, two smaller windows and a second original doorway that has been infilled with matching tile. The remainder of the facade claims six regularly spaced, double-hung sashes that mirror those on the west facade – the third of which has been infilled with matching tile.

2. Overall Dimensions: The building is 75' x 25'.
3. Foundations: The foundation is of poured concrete.
4. Walls: The walls are constructed with 12" x 5" tan glazed tile and are 8" thick. The tile is accented by red brick at the corners, around original doorways, within the wall chimney and on the gables at the eaves.
5. Roof: The gabled roof is sheathed with red asphalt shingles placed on 6" wide boards. The sidewall eaves are encased with aluminum and the gabled endwall eaves are open. Five exposed timber purlins underline the west gable and six support the east. Each measures 6" x 6" and project 15½". The gables are underscored by red brick accents. A metal chimney painted in a red brick pattern is located near the original wall chimney.
6. Openings:
 - A. Windows: Windows are regularly placed throughout the building. Each has a concrete sill and a 5½" thick timber lintel. Generally, the windows are fitted with replacement, metal, one-over-one, double-hung sashes.

The two windows on the north (main) facade are 37" x 60". Two smaller double-hung sashes on the north facade that coincide with the former kitchen are 37" wide x 35" tall, while the openings on the east facade that flank the wall chimney are 49" x 59½". All remaining windows are 37" x 51".

B. Doorways: All doors are metal-and-glass replacements. Those in the original openings are topped with 5½" thick wood lintels and feature red brick surrounds. The double doorway on the west (main) facade is 67" x 80½" and infilled with a 40½" x 82" metal door and wood. The original door opening on the north facade is 40" x 81". The doorway cut from a window opening on the south facade measures 40" x 78".

7. Chimney: A wall chimney constructed of tan, glazed tile with red brick accents at the corners is centered on the east gabled endwall. It is 50" wide and projects 11". Two metal ash cleanout doors (10½" square) are at the bottom. The chimney's top portion has been replaced with red brick and is crowned by a concrete cap pierced by two square tile flues

C. Interior Description:

- A. General Description: The east end of the building originally contained a kitchen. The rest was occupied by an open dining hall. The mess hall has been converted into a private-room barracks. No original fabric remains.

D. Setting:

Building 122 is a component of the 127th Infantry Regiment Cantonment Area Subcomplex, which also includes Building 117 (HABS WI-381-A-1), Building 118 (HABS WI-381-A-2), Building 119 (HABS WI-381-A-3), Building 120 (HABS WI-381-A-4), Building 121 (HABS WI-381-A-5), Building 123 (HABS WI-381-A-7), Building 124 (HABS WI-381-A-8), Building 125 (HABS WI-381-A-9), Building 126 (HABS WI-381-A-10), Building 127 (HABS WI-381-A-11), Building 128 (HABS WI-381-A-12), Building 129 (HABS WI-381-A-13), Building 130 (HABS WI-381-A-14), Building 131 (HABS WI-381-A-15) and Building 132 (HABS WI-381-A-16). Additional components of the general Camp Williams complex include the 128th Infantry Regiment Cantonment Area (HABS WI-381-B) and the former Officer's Club and present day museum (HABS WI-381-C).
