CAMP WILLIAMS

(128TH INFANTRY REGIMENT CANTONMENT AREA SUBCOMPLEX--BUILDING 205)

- Location: 205 Holden Street
Camp Williams-Volk Field National Guard Training Center
Camp Douglas, Juneau County, Wisconsin
- Significance: Building 205 was constructed in 1940-1941 as a company mess hall for the 128th Infantry Regiment Cantonment Area.
- History: Designed by Lieutenant Colonel Henry C. Hengles, Building 205 was erected between 1940 and 1941 by the Works Progress Administration as a company mess hall for 128th Infantry Regiment Cantonment Area. It replaced one of wood. The building was subsequently converted in 1958 into a barracks and used by the Wisconsin Military Academy. Thereafter, it was employed from 1995 to 2001 as part of the Wisconsin National Guard Badger Challenge Academy. From 2001 to the present, the structure has been used for storage by the 32nd Infantry Brigade.¹ A detailed history of the subcomplex is provided in the document for HABS No. WI-381-B.

Description:

- A. General Statement: This building is constructed on a slight north northeast-south southwest axis. Directions have been simplified to north-south-east-west within this section.
1. Architectural character: Building 205 is a one-story, astylistic utilitarian, front-gabled structure constructed of tan, glazed tiles with red brick accents at the gables, corners and doorways. A wall chimney, open eaves with exposed rafter tails, heavy timber purlins and lintels adorn the building. The roof is sheathed with red asphalt shingles and features at the peak four metal cupola vents.
 2. Condition of Fabric: The exterior fabric is good. Alterations are limited to the wholesale replacement of windows. The kitchen was converted in 1958 into a latrine and the dining hall into an open barracks bay. The building is now used for storage and the open barracks bay is partitioned with framed walls.

B. Exterior Description:

1. General Description: Oriented on a north-south axis, the gabled north (main) endwall has a central double door flanked by replacement, double-hung sashes. A louvered vent underlined with a thin concrete sill is set in the gable peak. The open eaves are supported by five heavy timber purlins.

Beginning at the northwest corner, the west facade is pierced by six regularly placed double-hung sash windows and two smaller double-hung sashes that were associated with the former kitchen area. A doorway that once provided access to the kitchen is in the southwest corner.

The south gabled endwall is defined by a central wall chimney flanked by a large, eight-over-eight-light, double-hung sash to the west (left) and a glass block window to the east (right).

Starting at the southeast corner, the east facade claims a window opening infilled with glazed block, a double-hung sash and a doorway that provides access to the former dining hall. The remainder of the facade has six regularly spaced, double-hung sashes that mirror those on the west.

2. Overall Dimensions: The building is 75' x 25'.
3. Foundations: The foundation is of poured concrete.
4. Walls: The walls are constructed with 12" x 5" tan glazed tile and are 8" thick. The tile is accented by red brick at the corners, around doorways, within the wall chimney and on the gables at the eaves.
5. Roof: The gabled roof is sheathed with red asphalt shingles placed on 6" wide boards and is pierced at the peak by four metal cupola vents. The eaves are open with exposed 2 x 6 rafter tails set on 24" centers. Exposed timber purlins on the north (five) and south (six) gabled endwalls are 6" x 6" and project 15½". The gables are underscored by red brick accents.
6. Openings:
 - A. Windows: Windows are regularly placed throughout the building. Each has a concrete sill and a 5½" thick timber lintel. The windows are generally fitted with replacement, vinyl-clad, double-hung sashes with six-light, snap-

in muntins.

The two windows on the north (main) facade are 37" x 59". Those on the east and west facades, closest to that on the north, are also 37" x 59". Two smaller, double-hung sashes on the west facade that coincide with the former kitchen are 37" wide x 35½" tall. The openings on the south facade that flank the wall chimney are 49" x 59½". All remaining windows are 37" x 51".

B. Doorways: All doors are original with five, wooden panels. They are set in openings crowned x 5½" thick wood lintels with red brick surrounds. The double doorway on the north (main) facade is 67" x 80½ ". The door openings on the west and east facades are 39½" x 80½".

7. Chimney: A wall chimney constructed of tan, glazed tiles with red brick accents at the corners is centered on the south gabled endwall. It is 50" wide and projects 11". Two ash cleanouts are at the bottom of the chimney and infilled with small concrete blocks. The top has a concrete cap pierced by two round tile flues.

C. Interior Description:

1. General Description: The south end of the building originally contained a kitchen, while the rest of the structure was used as an open dining hall. The kitchen was converted in 1958 into a latrine. The dining hall became an open barracks bay, which has since been converted to storage spaces by the construction of wood frame partition walls. The former dining hall area is 23' 7" x 59' 4", while the former kitchen area is 20' 10" x 23' 7".

D. Setting:

Building 205 is a component of the 128th Infantry Regiment Cantonment Area Subcomplex, which also includes Building 204 (HABS WI-381-B-1), Building 206 (HABS WI-381-B-3), Building 207 (HABS WI-381-B-4), Building 208 (HABS WI-381-B-5), Building 209 (HABS WI-381-B-6), Building 210 (HABS WI-381-B-7), Building 212 (HABS WI-381-B-8), Building 213 (HABS WI-381-B-9), Building 214 (HABS WI-381-B-10), Building 215 (HABS WI-381-B-11), Building 216 (HABS WI-381-B-12), Building 217 (HABS WI-381-B-13) and Buildings 218-219 (HABS WI-381-B-14). Additional components of the general Camp Williams complex include the 127th Infantry Regiment Cantonment Area (HABS WI-381-A) and the former Officer's Club and present day museum (HABS WI-381-C).
