CAMP WILLIAMS

(128TH INFANTRY REGIMENT CANTONMENT AREA SUBCOMPLEX--BUILDING 216)

- Location: 216 Holden Street
Camp Williams-Volk Field National Guard Training Center
Camp Douglas, Juneau County, Wisconsin
- Significance: Building 216 was constructed in 1940-1941 as a company mess hall for the 128th Infantry Regiment Cantonment Area.
- History: Designed by Lieutenant Colonel Henry C. Hengles, Building 216 was erected between 1940-1941 by the Works Progress Administration as a company mess hall for 128th Infantry Regiment Cantonment Area. It replaced a wood-frame facility. The building was converted in 1958 into a barracks and used by the Wisconsin Military Academy. It subsequently became from 1995 to 2001 part of the Wisconsin National Guard Badger Challenge Academy. The structure has been used since 2001 as a medical examination site for deploying soldiers of the Wisconsin National Guard.¹ A detailed history of the subcomplex is provided in the document for HABS No. WI-381-B.

Description:

- A. General Statement: This building is constructed on a slight north northeast-south southwest axis. Directions have been simplified to north-south-east-west within this section.
1. Architectural character: Building 216 is a one-story, astylistic utilitarian, front-gabled structure constructed of tan, glazed tiles with red brick accents at the gables, corners and doorways. A wall chimney, open eaves with exposed rafter tails, heavy timber purlins and lintels adorn the building. The roof is sheathed with red asphalt shingles and features at the peak four metal cupola vents.
 2. Condition of Fabric: The exterior fabric is very good. Alterations are limited to the wholesale replacement of windows and doors. The kitchen was converted in 1958 into a latrine and the dining hall into an open barracks bay. The building since has been renovated into a medical examination facility.

B. Exterior Description:

1. General Description: Oriented on a north-south axis, the gabled north (main) facade has a central double doorway with a single metal door surrounded by red brick. It is flanked by replacement, double-hung windows. A louvered vent underlined with a thin concrete sill is set in the gable peak. The open eaves are supported by five heavy timber purlins.

Beginning at the northwest corner, the west facade has six regularly placed, double-hung windows. Two smaller, double-hung sashes that coincide with the former kitchen area, and a doorway that provides access to the one-time kitchen, exist at the south end of the facade.

The south gabled endwall is defined by a central wall chimney flanked by a large, eight-over-eight-light, double-hung window to the west (left) and a glass block window to the east (right).

Starting at the southeast corner, the east facade claims a window opening infilled with glazed block, a double-hung sash and a door that provides access to the former dining hall. The remainder of the facade has six regularly placed, double-hung windows that mirror those on the west facade.

2. Overall Dimensions: The building is 75' x 25'.
3. Foundations: The foundation is of poured concrete.
4. Walls: The walls are constructed with 12" x 5" tan glazed tile and are 8" thick. The tile is accented by red brick at the corners, around original doorways, within the wall chimney and on the gables at the eaves.
5. Roof: The gabled roof is sheathed with red asphalt shingles over 6" wide boards. It is pierced at the peak by four metal cupola vents. The eaves are open with exposed 2 x 6 rafter tails set on 24" centers. Exposed timber purlins on the north (five) and south (six) gabled endwalls are 6" x 6" and project 15½". The gables are underscored by red brick accents.
6. Openings:

A. Windows: Windows are regularly placed throughout the building. Each has a concrete sill and a 5½" thick timber lintel. The windows are generally

Page 3

fitted with replacement, vinyl-clad, double-hung sashes with six-light, snap-in muntins.

The two windows on the north (main) facade are 37" x 59". Two smaller, double-hung sashes on the west facade that coincide with the former kitchen are 37" wide x 35½" tall, while the openings on the south facade that flank the wall chimney are 49" wide x 59½" tall. All remaining windows are 37" x 51".

B. Doorways: All doors are metal replacements. Each is topped with a 5½" thick wood lintel and features red brick surrounds. The double doorway on the north (main) facade is 67" x 80½" and fitted with a 40½" x 82" metal door surrounded by red brick infill. The doors on the west and east facades are 39½" x 80½".

7. Chimney: A wall chimney constructed of glazed tile with red brick accents at the corners is centered on the south gabled endwall. It is 50" wide and projects 11". Two ash cleanouts at the bottom are infilled with small concrete blocks. The top carries a concrete cap pierced by two round tile flues.

C. Interior Description:

1. General Description: The south end of the building originally contained a kitchen with the rest of the structure occupied by an open dining hall. The kitchen was converted in 1958 into a latrine. The dining hall then became an open barracks bay. The entire building has since been renovated into a medical examination facility.

D. Setting:

Building 216 is a component of the 128th Infantry Regiment Cantonment Area Subcomplex, which also includes Building 204 (HABS WI-381-B-1), Building 205 (HABS WI-381-B-2), Building 206 (HABS WI-381-B-3), Building 207 (HABS WI-381-B-4), Building 208 (HABS WI-381-B-5), Building 209 (HABS WI-381-B-6), Building 210 (HABS WI-381-B-7), Building 212 (HABS WI-381-B-8), Building 213 (HABS WI-381-B-9), Building 214 (HABS WI-381-B-10), Building 215 (HABS WI-381-B-11), Building 217 (HABS WI-381-B-13) and Buildings 218-219 (HABS WI-381-B-14). Additional components of the general Camp Williams complex include the 127th Infantry Regiment Cantonment Area (HABS WI-381-A) and the former Officer's Club and present day museum (HABS WI-381-C).
