SAN CARLOS PROJECT, ARIZONA

ORDER FIXING MAINTENANCE AND OPERATION CHARGES

MARCH 10, 1938.

In compliance with the provisions of the Act of June 7, 1924 (43 Stat. 475-476) and acts supplementary thereto and the repayment contract of June 8, 1931, between the United and the San Carlos Irrigation and Drainage District made pursuant to said act, the maintenance and operation charges assessable against the 50,000 acres of privately owned lands of the San Carlos project within the boundary of said San Carlos Irrigation and Drainage District for the calendar year 1938, based upon a total project area of 100,000 acres under constructed works, are hereby fixed as follows:

1. A fixed or basic charge of \$1.65 per acre which shall entitle each acre in the District to have delivered for use thereon two acre feet of water per acre or its proportionate share of the available water supply. This fixed or basic charge shall be paid whether or not the land is in cultivation and whether or not the landowner uses any water.

2. Fifty cents per acre foot or fraction thereof for the first acre foot of water delivered in excess of the two acre feet provided for by the basic charge and one dollar per acre foot or fraction thereof for water delivered in excess of three (3) acre feet per acre, except such free water as may be delivered in accordance with the provisions of the repayment contract whenever such free water is available.

Payments for excess water as herein provided for shall be made at the time of request for delivery thereof.

Payments made on account of the 50,000 acres of lands within the San Carlos Irrigation and Drainage District shall be paid to the Project Engineer of the Indian Irrigation Service, or other proper officer, by the San Carlos Irrigation and Drainage District.

The United States will make available for expenditure on account of the maintenance and operation of this project the \$1.65 per acre fixed or basic charge for the 50,000 acres of Indian land in the project, and also the charge for excess water.

The San Carlos Irrigation and Drainage District upon request of its Board of Directors may continue for the period of this order to operate the canals serving lands in private and public ownership within its boundary, and in the event said District elects to continue such operation a credit of 70 cents per acre shall be allowed from the said basic charge for the area of district lands so operated and the basic charge to be paid to the Government by the District will accordingly be reduced to \$0.95 per acre.

It should be understood that the provisions of this order requiring funds to be made available by the United States are dependent upon appropriations being made by Congress therefor; that the charges based upon the conditions defined shall apply to the calendar year 1938 only, and that nothing herein shall be construed as establishing a precedent for future years.

Should the San Carlos Irrigation and Drainage District, through its Board of Directors, request and be granted the privilege of maintaining certain of the works of the project designated in the said repayment contract as "Works of the District," the rights and obligations of the District shall

be prescribed and governed by the departmental order turning over the maintenance of such works to the District.

Pursuant to authority of law contained in existing legislation relative to the Flathead Irrigation Project, Montana, it is hereby ordered that the operation and maintenance assessment rates due April 1, 1938, for the calendar year 1938 and for subsequent years until further notice, for the various subdivisions of the Flathead Irrigation Project, Montana, which are not included in Irrigation Districts that have executed a suitable repayment contract with the United States, be fixed as follows:

Charges Applicable to All Irrigable Lands in the Flathead Irrigation Project but Which Are Not Included in the Irrigation District Organizations

Jocko Division

Charges for service.—A minimum charge of Ninety-five Cents (95¢) per acre will be made against all lands within the Jocko Division to which water can be delivered, whether water is used or not, this minimum charge to be credited to the account of water delivered at the following acre foot rates:

(a) For lands receiving water from the lower Jocko and Revais Creek Laterals, water will be delivered in amounts equal to one acre foot per acre for the entire irrigable area of the farm unit, allotment, or tract, at the rate of one dollar (\$1) per acre foot, and additional water will be delivered at the rate of fifty cents (50¢) per acre foot.

(b) For lands receiving water from Finley, East Finley, Agency, and Big Knife Creeks, water will be delivered at the rate of seventy-five cents (75¢) per acre foot at any time during the irrigation season.

(c) And for lands receiving water from Jocko River through the Jocko K Lateral system, at the rate of fifty cents (50¢) per acre foot at any time during the irrigation season.

Mission Valley and Camas Divisions

Charges for service.—A charge of Ninety-five Cents (95¢) per acre shall be levied against all the irrigable area to which water can be delivered, whether water is used or not, and there shall be no further charge for water delivered up to one and one-half acre feet of water per irrigable acre of land included in any farm unit, allotment, or tract of land which has been assessed for operation and maintenance for that season, provided that for all water delivered to any farm unit, allotment, or tract, in excess of the above amounts there shall be assessed a charge of seventy-five cents (75¢) per acre foot in addition to the minimum charge of ninety-five cents (95¢) per acre already levied.

General

For all areas covered by private water rights where the water is regulated by the Flathead Irrigation Project and delivered through the Flathead Irrigation Project systems, a charge of fifty cents (50¢) per acre shall be made for water delivered up to two (2) acre feet per acre, or to such quantity of water as was allowed under the private water right findings for each acre carrying a recognized private water right under the Secretary's private water right findings, and for any additional water furnished to private water right lands, whether through the project irrigation system or otherwise, a charge of one dollar (\$1) per acre foot shall be made.

If at any time during the irrigation season when it shall appear, in the judgment of the Project Engineer, that there

shall not be sufficient water available to deliver the amount specified under the minimum charge in this regulation to the entire irrigable area for which application for delivery of water has been made and approved, then the Project Engineer shall be authorized to reduce such amounts to the extent that there shall, in his judgment, be sufficient water available to make proportionate delivery to each farm unit, allotment, or tract, and when any farm unit, allotment, or tract shall have had delivered to it the amount so fixed, it shall not be entitled to further delivery of water except when it shall appear that there is a surplus of water available, provided that, for those tracts located in the Mission Valley and Camas Divisions of the Flathead Irrigation Project only, after an agreement has been reached between a landowner and the Project Engineer as to duty of water on individual tracts where the landowner claims excess requirements on account of porous or gravelly soils, the Project Engineer shall have authority, pending further orders, to increase the quantity of water to be delivered under the minimum charge levy to such porous or gravelly tract, provided it shall not exceed four (4) acre feet of water per acre per season for the accessible irrigable area of the tract.

In the case of lands belonging to the State of Montana, where water service is requested by lessees, delivery will be made upon payment in advance by the lessee of the same minimum charge and at the same rates, and under the same regulations, as are in force for other lands in the same general area that are not included in the Irrigation Districts.

The maximum charge for water delivered to any farm unit or allotment shall not exceed an amount equal to Two Dollars (\$2) per acre for the entire irrigable area of the farm unit or allotment, and no charge for water delivered shall be less than Five Dollars (\$5) for the season.

To all charges assessed against owners of patent in fee or white-owned lands not paid on July 1 following, there shall be added a penalty of one-half of one per cent ($\frac{1}{2}$ of 1 per cent) per month, or fraction thereof, from the due date, April 1, so long as the delinquency continues. No water shall be delivered to patent in fee or white-owned lands until such charges shall have been paid, or to trust patent lands until the Superintendent of the reservation shall have issued a statement to the Project Engineer certifying that the Indian farming such land has paid or will pay or that such Indian is financially unable to pay the charge, or in the case of such Indian trust lands as are leased, until the terms of the lease relative to the payment of water charges shall have been fulfilled.

This order supersedes the order of February 19, 1937.

1938 AGRICULTURAL CONSERVATION PROGRAM BULLETIN

SUPPLEMENT NO. 7

Pursuant to the authority vested in the Secretary of Agriculture under Sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, the 1938 Agricultural Conservation Program Bulletin, as amended February 19, 1938, is hereby amended as follows:

(1) The third of the introductory paragraphs preceding Section I is hereby amended by striking out that portion of the paragraph following the second semicolon in the first sentence thereof and inserting in lieu thereof the following:

“and the amounts of such payments and grants of aid will necessarily be within the limits finally determined by such appropriation, the apportionment of such appropriation under the provisions of the Soil Conservation and Domestic Allotment Act as amended, and the extent of national participation. Under the provisions of Section 105 of the Agricultural Adjustment Act of 1938, as amended, payments under the 1938 Agricultural Conservation Program, based on soil-depleting crops for which special acreage allotments are established, shall be made at not less than 90 percent of the rates specified in the 1938 Agricultural Conservation Program Bulletin (ACP-1938) approved October 23, 1937. The rates specified herein with respect to potatoes, fire-cured and dark air-cured tobacco, and Georgia-Florida Type 62 tobacco are 90 percent of the rates approved for these commodities on October 23, 1937 and, therefore, will not be decreased. As an adjustment for participation the rates of payment and deduction with respect to each other commodity or item of payment may be decreased, and the rates of payment and deduction with respect to any commodity or item of payment may be increased, by as much as 10 percent.

(2) The national goals with respect to cotton and Burley tobacco, set forth in item 1 of subsection A of Section I, are hereby revised to read as follows:

“Cotton, 27,000,000 to 29,000,000 acres.

“Tobacco: Burley, 440,000 to 460,000 acres.”

(3) Item 2 of subsection A of Section III is hereby amended to read as follows:

“2. *Cotton allotment.*—(a) County cotton acreage allotments shall be apportioned among the farms in the county on which cotton was planted in any one of the years 1935, 1936, and 1937, in a manner that will result in a cotton acreage allotment for each such farm which is a percentage (which shall be the same percentage for all farms in the county or administrative area) of the land in the farm in 1937 which was tilled annually or in regular rotation exclusive of the acres of such land normally devoted to the production of sugarcane for sugar, wheat, tobacco, or rice for market, or wheat or rice for feeding to livestock for market except that—

“(1) For any such farm with respect to which the highest acreage planted to cotton and diverted from the production of cotton in any one of the three years 1935, 1936, and 1937, is five acres or less, the cotton acreage allotment for the farm shall be such highest number of acres if the county cotton acreage allotment is sufficient therefor;

“(2) For any such farm with respect to which the highest number of acres planted to cotton and diverted from the production of cotton in any one of the three years 1935, 1936, and 1937, is more than five acres, the allotment for

the farm shall not be less than five acres if the county cotton acreage allotment is sufficient therefor;

“(3) Notwithstanding the foregoing provisions of this paragraph (a), a number of acres equal to not more than 3 percent of the county acreage allotment in excess of the allotments made to farms on which the highest number of acres planted to cotton plus the acres diverted from the production of cotton in any of the years 1935, 1936, and 1937, was five acres or less and the number of acres required for allotments of five acres for each other farm in the county on which cotton was planted in 1935, 1936, or 1937 may be apportioned among farms in the county on which cotton was planted in 1935, 1936, or 1937, and for which the allotment otherwise provided is five acres or more but less than 15 acres and less than the highest number of acres planted to cotton and diverted from the production of cotton in any one of the years 1935, 1936, and 1937.

In making such allotments under clause (3) in the preceding sentence consideration shall be given to the land, labor, and equipment available for the production of cotton, crop rotation practices, and the soil and other facilities affecting the production of cotton, and such increases shall not be such as to increase the allotment to any farm above 15 acres. In no event shall the allotment for any farm under this paragraph (a) exceed the highest number of acres planted to cotton and diverted from the production of cotton in any one of the three years 1935, 1936, and 1937.

“(b) In case the county allotment is insufficient to provide allotments to farms in the county, which are determined, under instructions issued by the Agricultural Adjustment Administration, to be adequate and representative in view of their past production of cotton and their tilled land, there shall be apportioned to such farms, under instructions issued by the Agricultural Adjustment Administration, such part of a State reserve equal to 4 percent of the State acreage allotment as is necessary to give such farms allotments in conformity with paragraph (a) which are as nearly adequate and representative as such 4-percent reserve will permit. Such additional allotment shall be used first to increase allotments to farms under clauses (1) and (2) of paragraph (a).

“(c) Notwithstanding the provision of paragraph (a) above the cotton acreage allotment for any farm shall be increased by such amount as may be necessary to provide an allotment of not less than 50 percent of the sum of the acreage as determined by the county committee to have been planted in cotton in 1937 and the acreage diverted from cotton production in 1937 under the agricultural conservation program provided that the cotton acreage allotment for any farm shall not be increased under this paragraph to more than 40 percent of the acreage on such farm which is tilled annually or in regular rotation.

“(d) That portion of the State acreage allotment not apportioned among the counties under Section II, subsection A, paragraph 2 (a), hereof shall be apportioned to farms in the State on which cotton will be planted in 1938 but on which cotton was not planted in any of the years 1935, 1936, and 1937, so as to result in comparable allotments to farms similar with respect to land, labor, and equipment available for the production of cotton, crop rotation practices, and the soil and other physical facilities affecting the production of cotton. The county committee shall report, through the State committee, to the Agricultural Adjustment Administration the acreage required for the allotments to such farms in the county together with much substantiating data as may be required by the Agricultural Adjustment Administration, and the Agricultural Adjustment Administration shall allot to the county the proportion of that part of the State acreage allotment reserved for this purpose which it finds reasonable on the basis of the data so reported.”

(4) Subsection A of Section IV is hereby amended to read as follows:

A. Soil-depleting acreage allotments.—

“1. *Cotton*—2.4 cents per pound of the normal yield per acre of cotton for the farm for each acre in the cotton acre-

age allotment; or, if the acreage planted to cotton is less than 80 percent of the cotton acreage allotment and the county committee finds that the failure to plant 80 percent of such cotton acreage allotment was not due to flood or drought, for 125 percent of the acreage planted to cotton. The acreage planted to cotton shall be deemed to be that acreage which is seeded to cotton.

“2. *Corn*.—10 cents per bushel of the normal yield per acre of corn for the farm for each acre in the corn acreage allotment; or, if the acreage planted to corn is less than 80 percent of the corn acreage allotment and the county committee finds that the failure to plant 80 percent of such corn acreage allotment was not due to flood or drought, for 125 percent of the acreage planted to corn. The acreage planted to corn shall be deemed to be that acreage which is seeded to corn classified as soil-depleting (excluding (1) any acreage of sweet corn contracted to be sold for canning; (2) any acreage of sweet corn sold for canning or roasting ears; and (3) any acreage of popcorn sold as popcorn).

“3. *Wheat*.—12 cents per bushel of the normal yield per acre of wheat for the farm for each acre in the wheat acreage allotment; or, if the acreage planted to wheat is less than 80 percent of the wheat acreage allotment and the county committee finds that the failure to plant 80 percent of such wheat acreage allotment was not due to flood or drought, for 125 percent of the acreage planted to wheat. The acreage planted to wheat shall be deemed to be that acreage which is seeded to wheat classified as soil-depleting under subsection B of Section XIII.

“4. *Tobacco*.—The following number of cents per pound of the normal yield per acre of tobacco for the farm for each acre in the tobacco acreage allotment for each of the following kinds of tobacco:

| | |
|--|-------------|
| (a) Burley..... | 0.5 cent. |
| (b) Flue-cured..... | 1.0 cent. |
| (c) Fire-cured and dark-air-cured..... | 1.53 cents. |
| (d) Cigar filler and binder..... | 1.0 cent. |
| (e) Georgia-Florida Type 62..... | 1.8 cents. |

Provided, That in the case of cigar filler and binder tobacco, if the acreage planted to such kind of tobacco is less than 80 percent of the acreage allotment therefor, and the county committee finds that the failure to plant 80 percent of the acreage allotment was not due to flood, drought, or plant-bed diseases, the payment shall be computed on 125 percent of the acreage planted to cigar filler and binder tobacco.

“5. *Potatoes*.—In early potato-producing areas, 5.4 cents, and in late potato-producing areas, 3.6 cents per bushel of the normal yield of potatoes for the farm for each acre of potatoes planted on the farm in 1938 not in excess of the potato acreage allotment. The acreage planted to potatoes shall be deemed to be that acreage which is seeded to potatoes.

“6. *Peanuts*.—0.2 of a cent per pound of the normal yield per acre of peanuts for the farm for each acre in the peanut acreage allotment.

“7. *Rice*.—0.125 of a cent per pound of the normal yield per acre of rice for the farm for each acre in the rice acreage allotment, or if the acreage planted to rice is less than 80 percent of the rice acreage allotment and the county committee finds that failure to plant 80 percent of such rice acreage allotment was not due to flood or drought, for 125 percent of the acreage planted to rice. The acreage planted to rice shall be deemed to be that acreage which is seeded to rice.

“8. *General soil-depleting crops on class A farms*.—\$1.25 per acre, adjusted for productivity, for each acre in the total soil-depleting acreage allotment established for the farm in excess of the sum of (1) the acreages used in computing payments with respect to the corn, wheat, potato, rice, peanut, cigar filler and binder tobacco, and Georgia-Florida Type 62 tobacco acreage allotments established for the farm; (2) 1¼ times the acreages used in computing payments with respect to the cotton, flue-cured tobacco, Burley tobacco, and fire-cured and dark air-cured tobacco

acreage allotments established for the farm; and (3) the acreage of sugar beets planted on the farm in 1938."

(5) Item 5 of subsection C of Section IV is hereby amended to read as follows:

"5. 70 cents per acre of cropland on any class B farm in excess of the sum of (1) the acreages used in computing payments with respect to the corn, wheat, potato, rice, peanut, cigar filler and binder tobacco, and Georgia-Florida Type 62 tobacco acreage allotments established for the farm; (2) 1½ times the acreages used in computing payments with respect to the cotton, flue-cured tobacco, Burley tobacco, and fire-cured and dark air-cured tobacco acreage allotments established for the farm; (3) the acreage of sugar beets and sugarcane for sugar planted on the farm in 1938; and (4) in the Western Region, the normal acreage of summer fallow for the farm, not in excess of the wheat acreage allotment established for the farm."

(6) Item 6 of subsection A of Section V is hereby amended to read as follows:

"6. *Total soil-depleting acreage allotments.*—The following applicable rate for each acre of land classified as soil-depleting in excess of the total soil-depleting acreage allotment, less the acreages for which deductions are made under items 1 to 5, inclusive, of this subsection A:

"(a) 8 times the rate of payment with respect to the wheat acreage allotment if a payment is computed for the farm under Section IV with respect to a wheat acreage allotment.

"(b) 8 times the rate of payment with respect to general soil-depleting crops if the farm is a class A farm and no payment is computed for the farm under Section IV with respect to a wheat acreage allotment.

"(c) \$6.00 per acre if the farm is a class B farm and a payment is computed for the farm under Section IV with respect to a cotton, corn, tobacco, peanut, potato or rice acreage allotment but no payment is computed for the farm under Section IV with respect to a wheat acreage allotment."

(7) Subsection A of Section VI is hereby amended to read as follows:

"A. *Payments and deductions in connection with acreage allotments and restoration land goals.*—The net payment or net deduction computed for any farm with respect to the corn, cotton, rice, wheat, tobacco, peanut, or potato acreage allotment, or general soil-depleting crops shall be divided among the landlords, tenants, and sharecroppers in the same proportion (as indicated by their acreage shares) that such persons are entitled, at the time the crop is harvested, to share in the proceeds (other than a fixed commodity payment) of the corn, cotton, rice, wheat, tobacco, peanuts, potatoes, or general crops, respectively, grown on the farm in 1938.

"The net payment or net deduction computed for any farm with respect to the restoration land goal shall be divided in the same proportion that any payment with respect to the wheat acreage allotment for such farm is divided among landlords, tenants, and sharecroppers, provided that if no payment is computed with respect to a wheat acreage allotment for such farm, the net payment or net deduction with respect to the restoration land goal shall be divided in the same proportion that any payment in connection with general soil-depleting crops for such farm is, or would be, divided among landlords, tenants, and sharecroppers. In the event that restoration land is designated for a farm which is not operated by a tenant in 1938, the net payment or net deduction, if any, with respect to such restoration land goal shall be attributed to the owner of such farm.

"In computing such net payments and net deductions with respect to acreage allotments, general crops, and restoration land goals, the deduction with respect to commercial vegetables (item 5, subsection A, Section V) shall be regarded as a prorata deduction with respect to the potato acreage allot-

ment and the cigar filler (type 41) or binder (types 51, 52, and 53) tobacco acreage allotment. The total amount of deductions computed under Section V with respect to (1) soil-depleting crops grown in excess of the total soil-depleting acreage allotment (item 6, subsection A), (2) failure to prevent wind and water erosion (subsection C), and (3) breaking out of native sod (subsection D) shall be regarded (a) as prorata deductions with respect to the payments computed under Section IV in connection with the wheat acreage allotment and general soil-depleting crops on class A farms; (b) as deductions with respect to the wheat acreage allotment on class B farms for which a payment is computed under Section IV in connection with a wheat acreage allotment; (c) as prorata deductions with respect to the payments computed under Section IV in connection with crop acreage allotments and the restoration land goal on class B farms for which no payment is computed in connection with a wheat acreage allotment; or (d) as deductions with respect to the soil-building goal on class B farms for which no payment is computed under Section IV in connection with crop acreage allotments or a restoration land goal, provided, that any net amount of such deductions computed for such farms shall be divided equally among the landlords and tenants on the farm.

"In the event that corn, cotton, rice, wheat, tobacco, peanuts, potatoes, or general crops are not harvested in 1938 on the farm the net payment or net deduction, if any, with respect to the acreage allotment for such crop, or with respect to general soil-depleting crops, shall be divided among the landlords, tenants, and sharecroppers in the same proportion that the county committee determines that such persons would have shared in the proceeds of such crop(s) had such crop(s) been harvested on the farm in 1938."

(8) Section VIII is hereby amended to read as follows:

"SECTION VIII. *Deductions Incurred on Other Farms.*—

"A. *Other farms in the same county.*—If the deductions computed under Section V with respect to any farm in a county exceed the payment for full performance on such farm computed under Section IV, a landlord's or tenant's share of the amount by which such deduction exceeds such payments shall be deducted from such landlord's or tenant's share of the payment which would otherwise be made to him with respect to any other farms in such county.

"B. *Other farms in the State.*—If the deductions computed for a landlord or tenant with respect to one or more farms in a county exceeds the payments computed for such landlord or tenant on other farms in such county, the amount of such excess deductions shall be deducted from the payments computed for such landlord or tenant with respect to any other farms in the State if the State committee finds that the crops grown and practices adopted on the farm with respect to which such deductions are computed substantially offset the contribution to the program made on such other farms."

(9) The first paragraph of subsection A of Section XI is hereby amended to read as follows:

"A. *Payment restricted to effectuation of purposes of the program.*—All or any part of any payment which otherwise would be made to any person under the 1938 Agricultural Conservation Program may be withheld (1) if he has adopted any practice which the Secretary determines tends to defeat any of the purposes of the 1938 or previous agricultural conservation programs, (2) if, by means of any corporation, partnership, estate, trust, or any other device, or in any manner whatsoever, he has offset, or has participated in offsetting, in whole or in part, the performance for which such payment is otherwise authorized, or (3) if, with respect to forest land or woodland owned or controlled by him, he adopts any practice which the regional director finds is contrary to sound conservation practices. If on any class B farm for which no wheat, cotton, corn, tobacco, peanut, potato, or rice acreage allotment is established, the acreage of soil-depleting crops in 1938 is in excess of 50 acres and in

excess of the total soil-depleting acreage allotment, the deduction provided in paragraph 6 (c) of subsection A of Section V shall be applicable to such farm if the county committee determines that the increase in soil-depleting crops was not due to the rotation of crops normally followed on the farm. No payment, other than a payment in connection with the restoration land goal, shall be computed with respect to any farm which is idle in 1938."

(10) Subsection D of Section XI is hereby amended to read as follows:

"D. *Assignments.*—Any person who may be entitled to any payment in connection with the 1938 Agricultural Conservation Program may assign his interest in such payment as security for cash loaned or advances made for the purpose of financing the making of a crop in 1938. No such assignment will be recognized unless (1) the assignment is made in writing on Form ACP-69 in accordance with instructions issued by the Agricultural Adjustment Administration, and is filed in the office of the county agricultural conservation association; (2) the farmer files with the assignment a statement that the assignment is made to pay or secure an indebtedness incurred in connection with financing the making of a crop in 1938 and not to pay or secure any preexisting indebtedness; and (3) the person to whom such assignment is made certifies that the payment is being assigned without discount for such purpose.

"Nothing contained in this Section XI shall be construed to give an assignee a right to any payment other than that to which the farmer is entitled nor shall the Secretary or any disbursing agent be subject to any suit or liability if payment is made to the farmer without regard to the existence of any such assignment."

(11) Item 3 of subsection A of Section XIII is hereby amended to read as follows:

"3. Grain sorghums (except when a good stand and a good growth of such crops is used as a green manure crop in areas in Texas designated by the Agricultural Adjustment Administration as areas affected by cotton root rot)."

(12) Items 1 and 2 of subsection A of Section XV are hereby amended to read as follows:

"1. *Cotton.*—

"(a) Where reliable records of the actual average yield of cotton per acre for the years 1933 to 1937, inclusive, are presented by the farmer or are available to the committee, the normal yield for the farm shall be the average of such yields adjusted for abnormal weather conditions in accordance with instructions issued by the Agricultural Adjustment Administration.

"(b) If for any year of such five-year period records of the actual average yield are not available or there was no actual yield because cotton was not planted on the farm in such year, the normal yield for the farm shall be the yield which, on the basis of all available facts, including the yield customarily secured on the farm, weather conditions, type of soil, drainage, production practices, and general fertility of the land, the county committee determines to be the yield which was or could reasonably have been expected on the farm for such five-year period.

"(c) The yields determined under paragraph (b) of this subdivision 1 shall be adjusted so that the average of the normal yields determined for all farms in the county or administrative area (weighted by the cotton acreage allotments established for such farms) shall conform to the county (or administrative area) average yield established by the Secretary.

"2. *Corn and wheat.*—

"(a) Where reliable records of the actual average yield per acre of corn or wheat, as the case may be, for the years 1928 to 1937, inclusive, are presented by the farmer or are available to the committee, the normal yield for the farm shall be the average of such yields adjusted for trends and abnormal weather conditions in accordance with

instructions issued by the Agricultural Adjustment Administration.

"(b) If for any year of such ten-year period reliable records of the actual average yield are not available or there was no actual yield because the commodity was not planted on the farm in such year, the normal yield for the farm shall be the yield which, on the basis of all the available facts, including the yield customarily secured on the farm, weather conditions, type of soil, drainage, production practices, and general fertility of the land, the county committee determines to be the yield which was or could reasonably have been expected on the farm for such ten-year period. Where the productivity index most recently established for the farm in connection with the agricultural conservation programs is determined by the county committee to be an accurate reflection of the foregoing factors, the yield obtained by multiplying such index by the county average yield established by the Secretary shall be used as the normal yield for the farm.

"(c) The yields determined under paragraph (b) of this subdivision 2 shall be adjusted so that the average of the normal yields for all farms in the county (weighted respectively by the corn or wheat acreage allotments established for such farms) shall conform to the county average yield established by the Secretary."

(13) Section XV is hereby amended by striking out subsection C thereof.

(14) The definition of class A farms in Section XVIII is hereby amended by revising clause 3 thereof to read as follows:

"3. All farms in Aroostook County, Maine, and in the townships of Patten, Mt. Chase, and Stacyville in Penobscot County, Maine, for which potato acreage allotments are established; and"

(15) Section XVIII is hereby amended by adding at the end thereof the following definitions:

"*Early Potato-Producing Area* means all the States in the East Central and Southern Regions, the States of Missouri and Kansas, and the counties of Kern, Los Angeles, Riverside, San Bernardino, San Diego, and Santa Barbara in the State of California.

"*Late Potato-Producing Area* means the area not included in the early potato-producing area."
