WHEREAS section 1 of the act of Congress entitled "An Act to authorize the acquisition by the United States of title to or the use of domestic or foreign merchant vessels for urgent needs of commerce and national defense, and for other purposes", approved June 6, 1941, provides, in part:

* * * during the existence of the national emergency declared by the President on September 8, 1939, to exist, but not after June 30, 1942, the President is authorized and empowered, through such agency or officer as he shall designate, to purchase, requisition, for any period during such emergency charter or requisition the use of, or take over the title to, or the possession of, for such use or disposition as he shall direct, any foreign merchant vessel which is lying idle in waters within the jurisdiction of the United States, including the Philippine Islands and the Canal Zone, and which is necessary to the national defense:

AND WHEREAS I find that the foreign merchant vessels now lying idle in waters within the jurisdiction of the United States, including the Philippine Islands and the Canal Zone, are necessary to the national defense:

NOW, THEREFORE, by virtue of the authority vested in me by the aforesaid act, it is hereby ordered as follows:

1. The United States Maritime Commission (hereinafter called the "Commission") is hereby authorized and empowered, at such time or times and upon such terms and conditions as the Commission shall deem desirable and conducive to the national defense, to purchase, requisition, charter, requisition the use of, or take over the title to, or the possession of, any or all foreign merchant vessels which are lying idle in waters within the jurisdiction of the United States, including the Philippine Islands and the Canal Zone, including all tackle, apparel, furniture, spare parts and equipment, and all stores, including fuel, aboard such vessels or appertaining thereto, for the use and disposition hereinafter directed.

2. Without limiting the authority of the Commission under the provisions of sections 3, 4, and 5 of the said act of Congress or under any other provision of law, the Commission is authorized and directed, to such extent and upon such terms and conditions as the Commission shall deem desirable and conducive to the national defense:

(a) To operate any or all of such vessels, either directly or by agent, in any service of the United States, or in any commerce, foreign or coastwise.

(b) To charter or lease any or all of such vessels to any persons for operation in any service of the United States, or in any commerce, foreign or coastwise: Provided, that no vessel shall be transferred, chartered, or leased to any belligerent government without the approval of the President.

(c) To document any or all of such vessels under the laws of the United States or any neutral country of the Western Hemisphere.

(d) To make such other use or disposition of any or all of such vessels as the President may hereafter direct.

(e) To repair, equip, and man such vessels and to do whatever may be necessary to accomplish the purposes of the said act or this order.

3. The Commission is directed to determine and make to the owner or owners of any vessel taken in accordance with the provisions hereof, just compensation for such vessel, or the use thereof, in accordance with the provisions of the aforesaid act.

DESIGNATION OF PETROLEUM COORDINATOR FOR NATIONAL DEFENSE

The Honorable, The Secretary of the Interior,

My Dear Mr. Secretary: Recent significant developments indicate the need of coordinating existing Federal authority over oil and gas and insuring that the supply of petroleum and its products will be accommodated to the needs of the Nation and the national defense program. Government functions relating to petroleum problems are now divided among numerous officers and agencies of the Federal Government and the principal oil-producing States. The various phases of operation in the petroleum industry itself are numerous and complex. One of the essential requirements of the national defense program, which must be made the basis of our petroleum defense policy in the unlimited national emergency declared on May 27, 1941, is the development of adequate supplies of petroleum with maximum efficiency of our petroleum resources and our facilities, present and future, for making petroleum and petroleum products available, adequately and continuously, in the proper forms, at the proper places, and at reasonable prices to meet military and civilian needs.

Some of the problems with which we are now confronted and which require immediate action are: The proper development, production, utilization of those reserves of crude oils and natural gas that are of the greatest importance both in quality and location; elimination or reduction of cross hauling of petroleum and its products and the development of transportation facilities and of methods by which more efficient use can be made of existing transportation and storage facilities; balancing refining operations to secure the maximum yields of specific products with full consideration for requirements, the most economical use of the raw materials, and efficiency of production and distribution; and the elimination of the drilling of unnecessary wells in proven fields and of other unnecessary activities and equipment.

In order to provide the desired coordination, I hereby designate you as Petroleum Coordinator for National Defense. In that capacity it will be your function and responsibility to make specific recommendations to the several officers and agencies having functions related to the petroleum problem, take over responsibility for the efficient use of the raw materials, and efficiency of production and distribution; and the elimination of the drilling of unnecessary wells in proven fields and of other unnecessary activities and equipment.

1. To obtain currently from the States and their agencies, from the petroleum and allied industries, from the officers and agencies of your Department, and from other appropriate Federal departments and agencies information as to (a) the military and civilian needs for petroleum and petroleum products, (b) the factors affecting the continuous, ready availability of petroleum and petroleum products for those needs, and (c) any action proposed which may affect such availability of petroleum and petroleum products.

2. To make specific recommendations to any appropriate department, officer, corporation or other agency of the Federal Government, particularly the Office of Production Management and the Office of Price Administration and Civilian Supply, to the appropriate agency representing any State or any combination of States, and to any appropriate industry or part thereof, as to action which is necessary or desirable, on the basis of your determinations, to insure the maintenance of a ready and adequate supply of petroleum and petroleum products.

In carrying out these responsibilities, it is expected that you will consult with the several officers and agencies of the Federal Government, and with the States acting severally or in any joint capacity, to the end that all governmental participation shall consistently further the purposes above outlined. It is also expected that you will consult with the petroleum industry and those industries which affect its functioning, to aid them in shaping their policies and operations in the discovery, development, production, processing, transportation, storage, distribution, marketing, consumption, and import and export of petroleum and petroleum products.

In order to facilitate your work and efforts, I am requesting that the several departments and agencies having functions related to the petroleum problem give you antecedent advice of any action proposed which may affect the continuous, ready availability of petroleum or petroleum products for military and civilian needs, so that you may have opportunity to make special and in depth consideration concerning such action. I am also requesting that you notify me of all meetings and conferences dealing with these problems, so that your representatives may be in attendance when you deem it advisable.

It is suggested that from time to time you call together all or any of the heads of such departments and agencies, or their representatives, as a committee to discuss such problems as may arise and to develop manners and means of effectuating the highest degree of coordination of Federal functions for the furtherance of the policy herein outlined. The heads of the departments and agencies concerned are being informed of this suggestion and of the contents of this letter, and I am sure you will find them ready to cooperate fully in rendering the assistance requested herein or otherwise needed to assure success of the program.

Within the limits of available funds as may be made available to you, you may employ necessary personnel, including a Deputy Coordinator whose appointment shall be approved by me and to whom you may make any necessary delegations of functions, and make provisions for necessary support, facilities and services for and actual and necessary transportation, subsistence, and other expenses incidental to the performance of their duties. You will, of course, make use of such statistical, informational, fiscal, personnel, and other general services and facilities as you now have available or as may be made available to you through the Office for Emergency Management or other agencies of the Government.

Yours sincerely,

FRANKLIN D. ROOSEVELT

TITLE 21—FOOD AND DRUGS

CHAPTER I—FOOD AND DRUG ADMINISTRATION

[Docket No. FDA 25]

PART 45—OXALOMARINE; DEFINITION AND STANDARD OF IDENTITY

IN THE MATTER OF THE PUBLIC HEARING FOR THE PURPOSE OF RECEIVING EVIDENCE UPON THE BASIS OF WHICH REGULATIONS MAY BE PROPOSED, FIXING AND ESTABLISHING A DEFINITION AND STANDARD OF IDENTITY FOR OXALOMARINE

hydrogenated.

1. Oleomargarine is a food, plastic in form, which commonly consists principally of one or more of the following fats: (a) rendered fat obtained from cattle, sheep, swine, or goats, or from two or more of such types of animals, (b) vegetable food fat or oil or both, (c) stearin or oil derived from any such fat or oil. Such ingredients are sometimes hydrogenated.

2. Oleomargarine sometimes contains a combination of two or more of the vegetable and animal fats named in paragraph 1, and the relative quantities of vegetable and animal fats used affect the properties of the product. Where such a combination is used, the product will retain some of the properties contributed by both the animal and vegetable fats if such fats are present in equal quantities by weight, or if the weight of neither fat exceeds the weight of the other by a ratio greater than 9 to 1. Such a combination in a ratio up to but not greater than 9 to 1 represents a common practice of the oleomargarine industry.

3. Oleomargarine is made by intimately mixing one of the five following articles with the fat ingredients or ingredients, after such article has been pasteurized and subjected to the action of harmless bacterial starters: (i) cream, (ii) milk, (iii) skim milk, (iv) any combination of dried skim milk and water in which the weight of the dried skim milk is not less than 10 percent of the weight of the water, or (v) any mixture of two or more of these. Congealing is effected, either with or without contact with water, and the congealed mixture is sometimes worked without water. This is referred to as "milk" as here used means cows' milk.

4. The artificial flavoring diacetyl is sometimes used in oleomargarine to enhance its butter-like flavor. The diacetyl is added as such, or as starter dilute, or is produced during the preparation of the product as a result of the addition of citric acid or harmless citrates. The artificial flavoring augments, and is not in substitution for, the diacetyl which is obtained by the use of bacterial starters in the milk ingredient described in paragraph 3 above.

5. Butter, salt, and artificial coloring are sometimes used in the preparation of oleomargarine.

6. The following sometimes also are added and are suitable ingredients of the product in the quantities hereinafter stated:

(a) (1) Lecithin, in an amount not exceeding 0.5 percent of the weight of the finished oleomargarine, for the purpose of aiding emulsification and improving the pan-frying quality of the product, or (ii) monoglycerides or diglycerides of fat-forming fatty acids, or both, in an amount not exceeding 0.5 percent of the weight of the finished oleomargarine, for the purpose of aiding emulsification, reducing leakage of moisture from the product, and improving its texture, or (iii) such monoglycerides and diglycerides in combination with the sodium sulfonate or similar substances, in a total amount not exceeding 0.5 percent of the weight of the finished oleomargarine, for the purpose of aiding emulsification, reducing leakage of moisture from the product, and improving its texture and pan-frying quality, or (iv) a combination of (i) and (ii) in which the amount of neither exceeds that above stated, or (v) a combination of (i) and (iii) in a total amount not exceeding 0.5 percent of the weight of the finished product. (The weight of glycerides in each of the ingredients (ii), (iii), (iv) and (v) is calculated at one-half actual weight.)

(b) Vitamin A, added as a fish liver oil or as a concentrate of Vitamin A from fish liver oil (with any accompanying Vitamin D and with or without added Vitamin D concentrate), in such quantity that the finished oleomargarine contains not less than 9,000 United States Pharmacopeia Units per pound, in order that the oleomargarine, a product used by some consumers for the same purposes as butter, will have a Vitamin A content comparable to that of butter, which is, on the average, approximately 9,000 United States Pharmacopeia Units per pound.

7. Present conditions of retail distribution of oleomargarine do not afford adequate refrigeration for the product. Sodium benzoate, or benzolic acid, or a combination of these, in a quantity not exceeding 0.1 percent of the weight of the finished product, is therefore sometimes added as a chemical preservative to aid in retarding deterioration of the oleomargarine.

8. The fat content of oleomargarine, including any milk fat used, commonly constitutes not less than 80 percent of the finished product, and a minimum fat content of 80 percent is recognized in the industry as proper and desirable.

10. Consumers are interested in knowing whether the fat used in oleomargarine is animal or vegetable fat or both. Some consumers prefer oleomargarine which is made with vegetable fat or oil, and it is the practice in the industry, where the fat ingredient is wholly vegetable, to so indicate on the label. Oleomargarine made from animal fat or oil, if subject to Federal inspection, bears the inspection label of the Bureau of Animal Industry of the United States Department of Agriculture. If a combination of animal and vegetable fats or oils is used, and both are declared on the label, consumers assume that the ingredient named first is present in the larger quantity.

11. Vitamin A, when added to oleomargarine, imparts nutritive properties to the product which are not otherwise present to an appreciable extent. It is not a universal practice to add Vitamin A and consumers are interested in knowing when Vitamin A is contained in the product.

12. The evidence does not establish (a) that the aliphatic amino acids glycine, glutamic acid, and aspartic acid, or any of them, are common or usual ingredients of oleomargarine, or that the preparation of the product would be suitable, or (b) that monoglycerides or diglycerides of fat-forming fatty acids, or the two in combination, are common or usual ingredients of the product in quantities greater than 0.5 percent of the weight of the finished product (calculating the weight of diglycerides as one-half actual weight), or that their use in larger quantities would be suitable.

Conclusion and Regulation

The evidence adduced at the hearing, and the findings of fact above set forth, do not provide an adequate basis for a determination that the recognition in the definition and standard of identity for oleomargarine of the use of any glycine, glutamic acid, or aspartic acid, or of the use of any monoglycerides or diglycerides of fat-forming fatty acids in quantities larger than 0.5 percent of the weight of the finished product, would promote honesty and fair dealing in the interest of consumers.

On the basis of the foregoing findings of fact, it is concluded that the following regulation fixing and establishing a definition and standard of identity for oleomargarine will promote honesty and fair dealing in the interest of consumers, and such regulation is therefore hereby promulgated:

§ 45.000 Oleomargarine; identity; label statement of optional ingredients. (a) Oleomargarine is the plastic food prepared with one or more of the optional fat ingredients named under one of the following subparagraphs (1), (2), (3), or (4):

(1) The rendered fat, or oil, or stearin derived therefrom (any or all of which may be hydrogenated), of cattle, sheep,
(2) Any vegetable food fat or oil, oil or oil or olein derived therefrom (any or all of which may be hydrogenated), or any combination of two or more of such articles.

(3) Any combination of ingredients named under subparagraphs (1) and (2) in such proportion that the weight of the ingredients named under (1) either equals the weight of the ingredients named under (2), or exceeds such weight by a ratio not greater than 9 to 1.

One of the five following articles is intimately mixed with the fat ingredient or ingredients, after such article has been pasteurized and subjected to the action of harmless bacterial starters: (i) cream, (ii) milk, (iii) skim milk, (iv) any combination of dried skim milk and water in which the weight of the dried skim milk is not less than 10 percent of the weight of the water, or (v) any mixture of two or more of these. The term "milk" as used herein means cow's milk. Congealing is effected, either with or without contact with water, and the congealed mixture may be worked. In the preparation of oleomargarine one or more of the following optional ingredients may also be used.

(5) Artificial coloring.

(6) Sodium benzoate, or benzoic acid, or a combination of these, in a quantity not to exceed 0.1 percent of the weight of the finished product.

(7) Vitamin A, added as fish liver oil or as a concentrate of Vitamin A from fish liver oil, or citric acid or harmless citrates.

(8) Artificial flavoring diacetyl or its sulfo-acetate derivatives thereof in a total amount not exceeding 0.5 percent of the weight of the finished oleomargarine, or (iv) a combination of (i) and (ii) in which the amount of neither exceeds that above stated, or (v) a combination of (i) and (ii) in a total amount not exceeding 0.5 percent of the weight of the finished oleomargarine. The weight of diglycerides in each of ingredients (ii), (iii), (iv), and (v) is calculated at one-half actual weight.

(10) Butter.

(11) Salt.

(b) When any ingredient named under one of the following prescribed subparagraphs of paragraph (a) is used, the label shall, except as hereinafter provided, bear the statement set forth below after the number of such subparagraph:

Subparagraph (1): "Prepared from Animal Fat", or "Made from Animal Fat".

Subparagraph (2): "Vegetable", or "Prepared from Vegetable Fat", or "Made from Vegetable Fat".

Subparagraph (3): "Prepared from Animal and Vegetable Fats", or "Made from Animal and Vegetable Fats".

Subparagraph (4): "Sodium Benzoate (or, as the case may be, 'Benzoic Acid' or 'Sodium Benzoate and Benzoic Acid') as a Preservative", or "With Added Artificial Coloring".

Subparagraph (5): "Artificially Colored", or "Artificial Coloring Added", or "With Artificial Coloring Added".

Subparagraph (6): "Vegetable" in any such statement, the term "vegetable" may be substituted for "fat" in the label statement.

Where oil is used, the word "oil" may be substituted for "fat" in the label statement. In lieu of the word "animal" or "vegetable" in any such statement, the common or usual name of the fat ingredient may be used. If two or more of the optional ingredients named in subparagraphs (6), (7), (8), and (9) are used, the words "added" or "with added" need appear only once, either at the beginning or end of the list of such ingredients declared. The declaration of Vitamin A may include the number of United States Pharmacopeia Units which have been added.

Whenever the name "oleomargarine" appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the words and statements herein prescribed showing ingredients used shall immediately and conspicuously precede or follow, or in part precede and in part follow, such name, without intervening written, printed, or other graphic matter.

This section shall become effective on the ninetieth day after the date of its publication in the Federal Register.

Washington, D. C., June 5, 1941.

Acting Administrator.

Division of Public Contracts.

IN THE MATTER OF THE RENEWAL OF A REQUEST FOR AN EXEMPTION FROM THE HOUR AND OVERTIME PROVISIONS OF THE PUBLIC CONTRACTS ACT FOR CANNED SEASONAL OR PERISHABLE FRUITS OR VEGETABLES.

NOTICE OF HEARING

The Secretary of War having made written findings that the inclusion in contracts let by the War Department for the purchase of canned fruits and vegetables of the varieties named in the attached list of the representations and stipulations of section 1 of the Walsh-Healey Public Contracts Act (49 Stat. 3067), hereinafter called the Act, will seriously impair the conduct of Government business, and

The Secretary of War having renewed the request heretofore made by him that an exemption be granted under section 6 of the Act permitting the award of contracts for the purchase of canned fruits and vegetables of the varieties named in the attached list for a period of one year without the inclusion in the invitations to bid and in the contracts of any of the representations and stipulations of section 1 of the Act, and

The request of the War Department heretofore made having been denied without prejudice in my decision of January 30, 1941, solely because of the inability at that time of the War Department to make the findings required by section 6 of the Act that the inclusion of the representations and stipulations of section 1 of the Act would seriously impair the conduct of Government business,

A hearing will be held on June 9, 1941, before me in Room B, Departmental Auditorium, Fourteenth Street and Constitution Avenue, Washington, D.C., to determine whether justice or the public interest will be served by the exempting of such contracts from all the provisions of section 1 of the Act.

Interested parties may be heard either in person or by authorized representatives. Briefs or telegraphic communications may be filed and will be considered if they are received on or before the hearing date. No form for the briefs is prescribed, but an original and four copies must be submitted. Notice of intention to appear should be filed not later than June 8, 1941.

Dated: June 2, 1941.
