How To Find U.S. Statutes and U.S. Code Citations

[Revised Edition—1965]

This pamphlet contains typical legal references which require further citing. The official published volumes in which the citations may be found are shown alongside each reference—with suggestions as to the logical sequence to follow in using them. Additional finding aids, some especially useful in citing current legislation, also have been included. Examples are furnished at pertinent points and a list of references, with descriptions, is carried at the end.

This revised edition contains illustrations of principal finding aids and reflects the changes made in the new master table of statutes set out in the 1964 edition of the United States Code.

List of CFR Parts Affected
(Codification Guide)

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date appears at the end of each issue beginning with the second issue of the month.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1966, and specifies how they are affected.

DELEGATING CERTAIN AUTHORITY OF THE PRESIDENT TO ESTABLISH MAXIMUM PER DIEM RATES FOR GOVERNMENT CIVILIAN PERSONNEL IN TRAVEL STATUS

By virtue of the authority vested in me by Section 301 of Title 3 of the United States Code, and as President of the United States, it is ordered as follows:

SECTION 1. Executive Order No. 10621 of July 1, 1955, entitled "Delegation of Certain Functions of the President to the Secretary of Defense," is hereby amended by adding the following paragraph at the end of Section 1 thereof:

"(o) The authority vested in the President by section 3 of the Travel Expense Act of 1949, 63 Stat. 166, as amended (5 U.S.C. 836), to establish maximum rates of per diem allowances for civilian officer and employees of the Government to the extent that such authority pertains to travel status in localities in Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and possessions of the United States."

SECTION 2. There is hereby delegated to the Secretary of State the authority vested in the President by Section 3 of the Travel Expense Act of 1949, 63 Stat. 166, as amended (5 U.S.C. 836), to establish maximum rates of per diem allowances for civilian officers and employees of the Government to the extent that such authority pertains to travel status in localities in any area (including the Trust Territory of the Pacific Islands) situated outside the United States, the Commonwealth of Puerto Rico, the Canal Zone, and the possession of the United States.

SECTION 3. Executive Order No. 11230 of June 28, 1965, entitled "Delegating Certain Functions of the President to the Director of the Bureau of the Budget," as amended, is hereby further amended by substituting for paragraph (9) of Section 1 thereof the following:

"(9) The authority vested in the President by Section 3 of the Travel Expense Act of 1949, 63 Stat. 166 (5 U.S.C. 836), to establish maximum rates of per diem allowances for civilian officers and employees of the Government to the extent that such authority pertains to travel status of such officers and employees while en route to, from, or between localities situated outside the 48 contiguous states of the United States and the District of Columbia."

SECTION 4. To the extent not heretofore superseded, Executive Order No. 10970 of October 27, 1961, is hereby superseded.

LYNDON B. JOHNSON

THE WHITE HOUSE, August 4, 1966.

[FR Doc. 66-6057; Filed, Aug. 5, 1966, 2:03 p.m.]
Executive Order 11295
RULES GOVERNING THE GRANTING, ISSUING, AND VERIFYING OF UNITED STATES PASSPORTS

By virtue of the authority vested in me by Section 301 of Title 3 of the United States Code, and as President of the United States, it is ordered as follows:

SECTION 1. Delegation of authority. The Secretary of State is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority conferred upon the President by the first section of the Act of July 3, 1926 (22 U.S.C. 211a), to designate and prescribe for and on behalf of the United States rules governing the granting, issuing, and verifying of passports.

SEC. 2. Superseded orders. Subject to Section 3 of this order, the following are hereby superseded:

(1) Executive Order No. 7856 of March 31, 1938, entitled “Rules Governing the Granting and Issuing of Passports in the United States.”

(2) Executive Order No. 8820 of July 11, 1941, entitled “Amending the Foreign Service Regulations of the United States.”

SEC. 3. Saving provisions. All rules and regulations contained in the Executive order provisions revoked by Section 2 of this order, and all rules and regulations issued under the authority of those provisions, which are in force at the time of the issuance of this order shall remain in full force and effect until revoked, or except as they may be hereafter amended or modified, in pursuance of the authority conferred by this order, unless sooner terminated by operation of law.

LYNDON B. JOHNSON

THE WHITE HOUSE,
August 5, 1966.

Rules and Regulations

Title 18—CONSERVATION OF POWER AND WATER RESOURCES

Chapter I—Federal Power Commission

[Docket No. R-607; Order 325]

MISCELLANEOUS AMENDMENTS TO CHAPTER

August 2, 1966.

Accounting for fees paid pursuant to Part 159 by natural gas pipeline companies in connection with certificate and other applications; Docket No. R-307.

Following a formal rulemaking proceeding initiated by a notice of proposed rulemaking in Docket No. R-282, the Commission, on January 5, 1966, issued Order No. 317 in which it promulgated Part 159 of its regulations under the Natural Gas Act prescribing fees to be paid by natural gas pipeline companies in connection with applications for certificates and other authorizations, 35 FPC 317Q, 31 F.R. 430, 18 CFR Part 159.

Although the regulation thus promulgated prescribed, in § 159.4, the accounting treatment prescribed with other fees, the order did not amend the specific accounts in the Uniform System of Accounts which were directed to be used. Consequently, we are now incorporating the accounting treatment prescribed as a new Gas Plant Instruction in the system of accounts and revising the texts of the particular accounts involved in this matter to reflect the accounting treatment prescribed with respect to these fees.

The Commission finds:

(A) It is necessary and appropriate for the administration of the Natural Gas Act that the amendments set forth in the following new paragraph 16 be accounted for as follows:

B. All amounts paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 186, Miscellaneous Deferred Debits.

C. All other fees for applications not involving construction or acquisition of facilities shall be charged to account 928, Regulatory Commission Expenses.

D. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

E. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

F. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

G. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

H. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

I. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

J. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

K. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

L. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

M. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

N. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

O. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

P. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

Q. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

R. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

S. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

T. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

U. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

V. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

W. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

X. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

Y. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.

Z. All fees paid related to certificate applications involving the acquisition of facilities including those acquired by merger or pooling of interests shall be charged to account 928, Regulatory Commission Expenses.
Title 21—FOOD AND DRUGS  
Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare  
SUBCHAPTER B—FOOD AND FOOD PRODUCTS  
PART 121—FOOD ADDITIVES  
Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food  

Components of Paper and Paperboard in Contact With Dry Food  

The Commissioner of Food and Drugs, having evaluated the data in a petition (FAP 6B1031) filed by the American Cyanamid Co., Wayne, N.J. 07470, and other relevant material, has concluded that the food additive regulations should be amended to provide for the use of disodium N-octadecylsulfosuccinamate as a component of paper and paperboard intended for use in contact with dry food. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c) (1), 72 Stat. 1786; 21 U.S.C. 348(c) (1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 1210.21; 31 Fed. Reg. 8391), § 121.2571 (b) (2) is amended by inserting alphabetically in the list of substances a new item, as follows:  

§ 121.2571 Components of paper and paperboard in contact with dry food.  

<table>
<thead>
<tr>
<th>List of substances</th>
<th>Limitations</th>
</tr>

<tbody>
<tr>
<td>Disodium N-octadecylsulfosuccinamate</td>
<td></td>
</tr>
</tbody>
</table>

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the Federal Register file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C. 20201, written objections thereto, preferably in quintuplicate. Objections shall show to the satisfaction of the person filing that the order is not legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on the date of its publication in the Federal Register.  

(Sec. 409(c) (1), 72 Stat. 1786; 21 U.S.C. 348(c) (1))
RULES AND REGULATIONS

Chapter I—Immigration and Naturalization Service, Department of Justice

PART 214—NONIMMIGRANT CLASSES

Submission of Contractual Evidence

The following amendment to Chapter I of Title 8 of the Code of Federal Regulations is hereby prescribed:

Subdivision (i) Petition for alien of distinguished merit and ability of paragraph (h) temporary employees of section 214.2 Special requirements for admission, extension, and maintenance of status is amended by adding the following sentence between the existing third and fourth sentences: "Copies of any written contracts between the petitioner and beneficiary, or a summary of the verbal contract or agreement under which the beneficiary will be employed shall be annexed to the petition."

(Doc. 66-8663; Filed, Aug. 8, 1966; 8:46 a.m.)

PART 214—NONIMMIGRANT CLASSES

Chapter I—Bureau of Mines, Department of the Interior

PART 27—METHANE-MONITORING SYSTEMS

Procedures for Investigations, Tests, and Certification

On June 22, 1966, notice of proposed rule making regarding revision of Bureau of Mines Schedule 32 was published in the Federal Register (31 F.R. 8630-3). There being no relevant matter presented by interested persons, the revision is, as proposed, adopted, subject to the following changes:

1. In § 27.1 the words "in gassy mines and tunnels" are changed to read "in gassy mines, tunnels, or other underground workings."

2. In paragraph (g) of § 27.2 the words "by chemical analysis" are changed to read "by air analysis."

3. In § 27.2(c) the word "will" is changed to read "will" between "conformance" and "and the."

Effective date. This revision shall become effective on the date of its publication in the Federal Register.

WALTER R. HIBBARD, Jr.,
Director, Bureau of Mines.

July 26, 1966.

Part 27 of Chapter I of Title 30 is revised to read as follows:

Subpart A—General Provisions

Sec.
27.1 Purpose.
27.2 Definitions.
27.3 Consultation.
27.4 Applications.
27.5 Letter of certification.
27.6 Certification of components.
27.7 Certification plate or label.
27.8 Fees.
27.9 Date for conducting tests.
27.10 Conduct of investigations, tests, and inspections.
27.11 Extension of certification.
27.12 Withdrawal of certification.
27.13 Certification of components.

Subpart B—Construction and Design Requirements

27.20 Quality of material, workmanship, and design.
27.21 Methane-monitoring system.
27.22 Methane detector component.
27.23 Automatic warning device.
27.24 Power-shutoff component.

Subpart C—Test Requirements

27.30 Inspection.
27.31 Testing methods.
27.32 Tests to determine performance of the system.
27.33 Tests to determine explosion-proof construction.
27.34 Test for intrinsic safety.
27.35 Tests to determine life of critical components and subassemblies.
27.36 Test for adequacy of electrical insulation and clearances.
27.37 Tests to determine adequacy of safety devices for bulbs.
27.38 Tests to determine adequacy of windows and lenses.
27.39 Tests to determine resistance to vibration.
27.40 Test to determine resistance to dust.
27.41 Test to determine resistance to moisture.

Subpart A—General Provisions

§ 27.1 Purpose.

The regulations in this part set forth the requirements for methane-monitoring systems or components thereof to procure certification for their incorporation in or with permissible equipment that is used in gassy mines, tunnels, or other underground workings; procedures for applying for such certification; and fees.

§ 27.2 Definitions.

As used in this part:

(a) "Bureau" means the Bureau of Mines of the U.S. Department of the Interior.

(b) "Applicant" means an individual, partnership, company, corporation, association, or other organization that designs, manufactures, or assembles and that seeks certification or preliminary testing of a methane-monitoring system or component.

(c) "Methane-monitoring system" means a complete assembly of one or more methane detectors and all other components required for measuring and signifying the presence of methane in the atmosphere of a mine, tunnel, or other underground workings, and shall include a power-shutoff component.

(d) "Methane detector" means a component of a methane-monitoring system that functions in a gassy mine, tunnel, or other underground workings to sample the atmosphere and shall cause a control circuit to deenergize a machine, equipment, or power circuit when actuated by the methane detector.

(1) "Flammable mixture" means a mixture of a gas, such as methane, natural gas, or similar hydrocarbon gas with normal air, that can be ignited.

(2) "Gassy mine or tunnel" means a mine, tunnel, or other underground workings in which a flammable mixture has been ignited, or has been found with a permissible flame safety lamp, or has been determined by air analysis to contain 0.25 percent or more (by volume) of methane in any open workings when tested at a point not less than 12 inches from the roof, face, or rib.

(3) "Letter of certification" means a formal document issued by the Bureau stating that a methane-monitoring system or subassembly or component thereof: (1) Has met the requirements of this part; and (2) is certified for incorporation in or with permissible or approved equipment that is used in gassy mines and tunnels.

(i) "Component" means a part of a methane-monitoring system that is essential to its operation as a certified methane-monitoring system.

(j) "Explosion proof" means that a component or group of components (subassembly) is so constructed and protected by an enclosure with or without a flame arrester(s) that, if a flammable mixture of gas is ignited within the enclosure, it will withstand the resultant pressure without damage to the enclosure and/or flame arrester(s). Also the enclosure and/or flame arrester(s) shall prevent the discharge of flame from
within either the enclosure or the flame arrester, or the ignition of any flammable mixture that surrounds the enclosure and/or flame arrester.\footnote{Explosion-proof components or subassemblies shall be constructed in accordance with the requirements of Part 18 of this chapter.}

(a) "Normal operation" means that performance of each component as well as of the entire assembly of the methane-monitoring system is in conformance with the functions for which it was designed and for which it was tested by the Bureau.

(i) "Flame arrester" means a device so constructed that it will prevent propagation of flame or explosion from within the enclosure in which it is part to a surrounding flammable mixture.

(m) "Intrinsically safe equipment and circuitry" means equipment and circuitry that are incapable of releasing enough electrical or thermal energy under normal or abnormal conditions to cause ignition of a flammable mixture of the most easily ignitable composition.

(n) "Fail safe" means that the circuitry of a methane-monitoring system shall be so designed that electrical failure of a component which is critical in the Bureau's opinion will result in de-energizing the methane-monitoring system and the machine or equipment of which it is a part.

§ 27.3 Consultation.

By appointment, applicants or their representatives may visit the Bureau's Health and Safety Research and Testing Center, 4800 Forbes Avenue, Pittsburgh, Pa., 15213, to discuss with qualified Bureau personnel proposed methane-monitoring systems to be submitted in accordance with the regulations of this part. No charge is made for such consultation and no written report thereof will be made to the applicant.

§ 27.4 Applications.

(a) No investigation or testing for certification will be undertaken by the Bureau except pursuant to a written application, in duplicate, accompanied by all drawings, specifications, descriptions, and related materials and a check, bank draft, or money order, payable to the Bureau of Mines, to cover the fees. The application and all related matters and correspondence concerning it shall be addressed to the Bureau of Mines, 4800 Forbes Avenue, Pittsburgh, Pa., 15213, Attention: Electrical-Mechanical Testing.

(b) Drawings, specifications, and descriptions shall be adequate in detail to identify fully all components and subassemblies that are submitted for investigation, and shall include wiring and block diagrams of the device, title, number, and date; any revision dates and the purpose of each revision shall also be shown on the drawing.

(c) For a complete investigation leading to certification, the applicant shall furnish all necessary components and material to the Bureau. The Bureau reserves the right to require more than one of each component, subassembly, or assembly for the investigation. Spare parts and expendable components, subject to wear in normal operation, shall be supplied by the applicant to permit continuous operation during test periods. The applicant shall furnish special tools necessary to assemble or disassemble any component or subassembly for inspection or test.

(D) The applicant shall submit a plan of inspection of components at the place of manufacture or appurtenance. The applicant shall furnish to the Bureau a copy of any factory-inspection form or equivalent with the application. The form shall direct attention to the points that must be checked to make certain that all components or subassemblies of the complete assembly are in proper condition, complete in all respects, and in agreement with the drawings, specifications, and descriptions filed with the Bureau.

(e) The applicant shall furnish to the Bureau complete instructions for operating the assembly and servicing components. The instructions shall accompany the Bureau's investigation, and before certification, if any revision of the instructions is required, a revised copy thereof shall be submitted to the Bureau for inclusion with the drawings and specifications.

§ 27.5 Letter of certification.

(a) Upon completion of investigation of a methane-monitoring system, or component or subassembly thereof, the Bureau will issue to the applicant either a letter of certification or a written notice of disapproval, as the case may require.

(b) A letter of certification issued, a test data or detailed results of tests will accompany it. If a notice of disapproval is issued, it will be accompanied by details of the defects, with a view to possible correction. The Bureau will not disclose, except to the applicant or his authorized representative, any information because of which a notice of disapproval has been issued.

(b) A letter of certification will be accomplished by an appropriate cautionary statement specifying the conditions to be observed for operating and maintaining the device(a) and to preserve its certified status.

§ 27.6 Certification of components.

In accordance with § 27.4, manufacturers of components may apply to the Bureau to issue a letter of certification. To qualify for certification, electrical components shall conformance to the prescribed inspection and test requirements and the construction thereof shall be adequately covered by specifications officially recorded and filed with the Bureau. Letters of certification may be applied to future work, or applied to future work, on the same device, as directed by the applicant.

§ 27.7 Certification plate or label.

A certified methane-monitoring system or component thereof shall be identified with a certification plate or label which is attached to the system or component in a manner acceptable to the Bureau. The method of attachment shall not impair the explosion-proof characteristics of any enclosure. The plate or label shall be of serviceable material, acceptable to the Bureau, and shall contain the following inscription with spaces for appropriate identification of the system or component and an assigned certificate number:

Manufacturer's Name
Description
Model or Type Number
Certificate No.

§ 27.8 Fees.

(a) Detailed inspection—each assembled component
(b) Explosion testing—each explosion-proof enclosure
(c) Each series of tests to determine adequacy of design, materials, and/or construction
(d) Tests to determine safety operation and performance of a complete methane-monitoring system
(e) Testing and examination of drawings and specifications requisite to issuing a letter of certification
(f) Final examination and recording of drawings and specifications requisite to issuing an extension of certification, each 4 hours or fraction thereof
(g) Examining and revising drawings and specifications requisite to applying an extension of certification, each 4 hours or fraction thereof

The applicant shall furnish special tools and expendable components, subassemblies of the complete assembly are in proper condition, complete in all respects, and in agreement with the drawings, specifications, and descriptions filed with the Bureau. The Bureau reserves the right to require more than one of each component, subassembly, or assembly for the investigation. Spare parts and expendable components, subject to wear in normal operation, shall be supplied by the applicant to permit continuous operation during test periods. The applicant shall furnish special tools necessary to assemble or disassemble any component or subassembly for inspection or test.

§ 27.8 Fees.

(a) Detailed inspection—each assembled component
(b) Explosion testing—each explosion-proof enclosure
(c) Each series of tests to determine adequacy of design, materials, and/or construction
(d) Tests to determine safety operation and performance of a complete methane-monitoring system
(e) Testing and examination of drawings and specifications requisite to issuing a letter of certification
(f) Final examination and recording of drawings and specifications requisite to issuing an extension of certification, each 4 hours or fraction thereof
(g) Examining and revising drawings and specifications requisite to applying an extension of certification, each 4 hours or fraction thereof

The applicant shall furnish special tools and expendable components, subassemblies of the complete assembly are in proper condition, complete in all respects, and in agreement with the drawings, specifications, and descriptions filed with the Bureau. The Bureau reserves the right to require more than one of each component, subassembly, or assembly for the investigation. Spare parts and expendable components, subject to wear in normal operation, shall be supplied by the applicant to permit continuous operation during test periods. The applicant shall furnish special tools necessary to assemble or disassemble any component or subassembly for inspection or test.

The applicant shall furnish special tools and expendable components, subassemblies of the complete assembly are in proper condition, complete in all respects, and in agreement with the drawings, specifications, and descriptions filed with the Bureau. The Bureau reserves the right to require more than one of each component, subassembly, or assembly for the investigation. Spare parts and expendable components, subject to wear in normal operation, shall be supplied by the applicant to permit continuous operation during test periods. The applicant shall furnish special tools necessary to assemble or disassemble any component or subassembly for inspection or test.
cause of failure is corrected, testing will be resumed after completing such other test work as may be in progress.

§ 27.10 Conduct of investigations, tests, and demonstrations.

The Bureau shall hold as confidential and shall not disclose principles or patentable features, nor shall it disclose any details of drawings, specifications, or related materials. The conduct of all investigations, tests, and demonstrations shall be under the sole direction and control of the Bureau, and any other persons shall be present only as observers, except as noted in paragraph (b) of this section.

(a) Prior to the issuance of a letter of certification, only Bureau personnel, representatives of the applicant, and such other persons as are mutually agreed upon may observe the investigations or tests.

(b) When requested by the Bureau, the applicant shall provide assistance in assembling or disassembling components, subassemblies, or assemblies for testing, preparing components, subassemblies, or assemblies for testing, and operating the system during the tests.

(c) After the issuance of a letter of certification, the Bureau may conduct such public demonstrations and tests of the certified methane-monitoring system or components as it deems appropriate.

§ 27.11 Extension of certification.

If an applicant desires to change any feature of a certified system or component, he shall first obtain the Bureau's approval of the change, pursuant to the following procedure:

(a) Application shall be made as for an original certification, requesting that the existing certification be extended to cover the proposed changes. The application shall include complete drawings, specifications, and related data, showing the changes in detail.

(b) The application will be examined by the Bureau to determine whether inspection and testing of the modified system or component will be required. The Bureau will inform the applicant whether testing is required; the component or components and related material to be submitted for that purpose; and the fee for testing.

(c) If the proposed modification meets the requirements of this part, a formal extension of certification will be issued, accompanied by a list of revised drawings and specifications which the Bureau has added to those already on file.

§ 27.12 Withdrawal of certification.

The Bureau reserves the right to rescind for cause any certification issued under this part.

Subpart B—Construction and Design Requirements

§ 27.20 Quality of material, workmanship, and design.

(a) The Bureau will test only equipment that, in its opinion, is constructed of suitable materials, is of good workmanship, is based on sound engineering principles, and is safe for its intended use. Since all possible designs, arrangements, or combinations of components cannot be foreseen, the Bureau reserves the right to test the combination and design requirements of components or subassemblies and the tests to obtain the degree of protection intended by the tests described in Subpart C of this part.

(b) Unless otherwise noted, the requirements stated in this section shall apply to explosion-proof enclosures and intrinsically safe circuits.

(c) All components, subassemblies, and assemblies shall be designed and constructed in a manner that will not create an explosion or fire hazard.

(d) All assemblies or enclosures—explosion-proof or intrinsically safe—shall be so designed that the temperatures of the external surfaces, during continuous operation, do not exceed 150° C. (302° F.) in any part.

(e) Lenses or globes shall be protected against damage by guards or by location.

(f) If the Bureau determines that an explosion hazard can be created by breaking of a bulb having an incandescent filament, the bulb mounting shall be so constructed that the bulb will be ejected if the bulb glass enclosing the filament is broken.

Note: Other methods that provide equivalent protection against hazards from incandescent filaments may be considered satisfactory at the discretion of the Bureau.

§ 27.21 Methane-monitoring system.

(a) A methane-monitoring system shall be so designed that any machine or equipment, which is controlled by the system, cannot be operated unless the electrical components of the methane-monitoring system are functioning normally.

(b) A methane-monitoring system shall be rugged in construction so that its operation will not be affected by vibration or physical shock, such as normally encountered in mining operations.

(c) Trailing cables that give off flammable or explosive gases when decomposed shall not be used within enclosures where they might be subjected to destructive electrical action.

(d) An enclosure shall be equipped with a lock, seal, or acceptable equivalent when the Bureau deems such protection necessary for safety.

(e) A component or subassembly of a methane-monitoring system shall be constructed as a package unit or otherwise in a manner acceptable to the Bureau. Such components or subassemblies shall be readily replaceable or removable without creating an ignition hazard.

(f) The complete system shall "fail safe" in a manner acceptable to the Bureau.

§ 27.22 Methane detector component.

(a) A methane detector component shall be suitably constructed for incorporation in, or with, permissible and approved equipment that is operated in gassy mines and tunnels.

(b) A methane detector shall include:

(1) A method of continuous sampling of the atmosphere in which it functions.

(2) A method for actuating a warning device which shall function automatically at a methane content of the mine atmosphere between 1.0 to 1.5 volume percent. The warning device shall also function automatically at all higher concentrations of methane in the mine atmosphere.

(3) A method for actuating a power-shutoff component, which shall function automatically when the methane content of the mine atmosphere is 2.0 volume percent and at all higher concentrations of methane.

(4) A suitable filter on the sampling intake to prevent dust and moisture from entering and interfering with normal operation.

Note: This requirement for the methane detector may be satisfied if the design is such as to preclude the need of a filter.

(c) A methane detector may provide means for sampling at more than one point; provided, the methane detector shall separately detect the methane in the atmosphere at each sampling point with, in the Bureau's opinion, sufficient frequency.

§ 27.23 Automatic warning device.

(a) An automatic warning device shall be suitably constructed for incorporation in or with permissible and approved equipment that is operated in gassy mines and tunnels.

(b) An automatic warning device shall include an alarm signal (audible or colored light), which shall be made to function automatically at a methane content of the mine atmosphere between 1.0 to 1.5 volume percent and at all higher concentrations of methane.

(c) It is recommended that the automatic warning device be supplemented by a meter calibrated in volume percent of methane.

§ 27.24 Power-shutoff component.

(a) A power-shutoff component shall be suitably constructed for incorporation in or with permissible and approved equipment that is operated in gassy mines and tunnels.

(b) The power-shutoff component shall include:

(1) A means which shall be made to function automatically to deenergize the machine or equipment when actuated by the methane detector at a methane concentration of 2.0 volume percent and at all higher concentrations in the mine atmosphere.

(2) For an electric-powered machine or equipment energized by means of a trailing cable, the power-shutoff component shall, when actuated by the methane detector, cause a control circuit to shut down the electric equipment on which it is installed; or it shall cause a control circuit to deenergize both the machine or equipment and the trailing cable.

Note: It is not necessary that power be controlled both at the machine and at the outly end of the trailing cable.
(ii) For a battery-powered machine or equipment, the methane-monitor power-shutoff shall be required to function normally after being subjected to:

- The tests stated in paragraph (a) of this section, in underground workings to verify reliability and durability of a methane-monitoring system installed in connection with a piece of mining equipment.

- Tests to determine explosion-proof construction.

- Any assembly, subassembly, or component which, in the opinion of the Bureau, requires explosion-proof construction shall be tested in accordance with the procedures stated in Part 15 of this subchapter.

- Tests to determine intrinsic safety.

- Assemblies, subassemblies, or components that are designed for intrinsic safety shall be tested by introducing into the circuit(s) thereof a circuit-interrupting device which produces an electric spark from the current in the circuit. The circuit-interrupting device shall be placed in a gallery containing various flammable natural-gas-air mixtures. To meet the requirements of this test, the spark shall not ignite the flammable mixture. For this test the circuit-interrupting device shall be operated not less than 100 times at 120 percent of the normal operating voltage of the particular circuit.

- Tests to determine life of critical components and subassemblies.

- Replaceable components may be subjected to appropriate life tests at the discretion of the Bureau.

- Test for adequacy of electrical insulation and clearances.

- The Bureau shall examine, and test in a manner it deems suitable, electrical insulation and clearances between electrical conductors to determine adequacy for the intended service.

- Tests to determine adequacy of safety devices for bulbs.

- The glass envelope of bulbs with the filament incandescent at normal operating voltage shall be broken in flammable methane-air or natural-gas-air mixtures in a gallery to determine that the safety device will prevent ignition of the flammable mixtures.

- Tests to determine adequacy of windows and lenses.

- Impact tests. A 4-pound cylindrical weight with one-inch diameter hemispherical striking surface will be dropped (free fall) to strike the window or lens in its mounting or the equivalent thereof at or near the center. At least three out of four samples shall withstand the impact according to the following table:

<table>
<thead>
<tr>
<th>Overall lens diameter (inches)</th>
<th>Height of fall (inches)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 4</td>
<td>6</td>
</tr>
<tr>
<td>4 to 5</td>
<td>9</td>
</tr>
<tr>
<td>6 to 15</td>
<td>15</td>
</tr>
<tr>
<td>Greater than 15</td>
<td>24</td>
</tr>
</tbody>
</table>

Lenses or windows of smaller diameter than 1 inch may be tested by alternate methods at the discretion of the Bureau.

§ 27.39 Tests to determine resistance to vibration.

(a) Laboratory tests for reliability and durability. Components, subassemblies, or assemblies that are to be mounted on permissible and approved equipment shall be subjected to two separate vibration tests, each of one-hour duration. The first test shall be conducted at a frequency of 30 cycles per second with a total movement per cycle of \( \frac{1}{10} \) inch. The second test shall be conducted at a frequency of 15 cycles per second with a total movement per cycle of \( \frac{1}{6} \) inch. Components, subassemblies, and assemblies shall be secured to the vibration testing equipment in their normal operating positions (with shock mounts, if regularly provided with shock mounts). Each component, subassembly and assembly shall function normally during and after each vibration test.

Note: The vibrating equipment is designed to impart a circular motion in a plane inclined 45° to the vertical or horizontal.

(b) Field tests. The Bureau reserves the right to conduct tests to determine resistance to vibration in underground workings to verify the reliability and durability of a methane-monitoring system or component(s) thereof where installed in connection with a piece of mining equipment.

§ 27.40 Test to determine resistance to dust.

Components, subassemblies, or assemblies, the normal functioning of which might be affected by dust, such as coal or rock dust, shall be tested in an atmosphere containing an average concentration (50 million minus 40 micron particles per cubic foot) of such dust(s) for a continuous period of 4 hours. The component, subassembly, or assembly shall function normally after being subjected to this test.

Note: Dust measurements, when necessary, shall be made by impinger sampling and light-field counting technique.

§ 27.41 Test to determine resistance to moisture.

Components, subassemblies, or assemblies, the normal functioning of which might be affected by moisture, shall be tested in atmospheres of high relative humidity (80 percent or more at 65°-75° F.) for continuous operating and idle periods of 4 hours each. The component or subassembly or assembly shall function normally after being subjected to those tests.
Title 7—AGRICULTURE
Chapter IX—Consumer and Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

PART 923—SWEET CHERRIES GROWN IN DESIGNATED COUNTIES IN WASHINGTON

Expenses and Rate of Assessment

On July 23, 1966, notice of rule making was published in the Federal Register (31 F.R. 10038) regarding proposed expenses and the related rate of assessment, for the period beginning April 1, 1966, and ending March 31, 1967, pursuant to the marketing agreement as amended, and Order No. 923 as amended (7 CFR Part 923), regulating the handling of sweet cherries grown in designated counties in Washington. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). After consideration of all relevant matters presented including the proposals set forth in such notice which were submitted by the Washington Cherry Marketing Committee (established pursuant to said marketing agreement and order) it is hereby found and determined that:

§ 923.206 Expenses and rate of assessment.

(a) Expenses. Expenses that are reasonable and likely to be incurred by the Washington Cherry Marketing Committee during the period April 1, 1966, through March 31, 1967, will amount to $13,020.

(b) Rate of assessment. The rate of assessment for said period, payable by each handler in accordance with § 923.41, is fixed at $1 per ton of sweet cherries.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the Federal Register (5 U.S.C. 1001–1011) in that (1) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all such cherries beginning with such date, and (2) such period began on April 1, 1966, and said rate of assessment will automatically apply to all such cherries beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

PAUL A. NICHOLSON,
Director, Fruit and Vegetable Division, Consumer and Marketing Service.

[F.R. Doc. 66–8666; Filed, Aug. 8, 1966; 8:46 a.m.]

PART 987—DOMESTIC DATES PRODUCED OR PACKED IN A DESIGNATED AREA OF CALIFORNIA

Free and Restricted Percentages and Withholding Factors for 1966–67 Crop Year

Notice was published in the July 12, 1966, issue of the Federal Register (31 F.R. 9461) regarding a proposal to establish free and restricted percentages and withholding factors applicable to particular varieties of domestic dates for the 1966–67 crop year beginning August 1, 1966. The percentages are based on recommendations of the Date Administrative Committee and other available information, in accordance with the applicable provisions of the marketing agreement, as amended, and Order No. 987, as amended (7 CFR Part 987), regulating the handling of domestic dates produced or packed in a designated area of California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The notice afforded interested persons opportunity to submit written data, views, or arguments with respect to the proposal.

After consideration of all relevant matter presented, including that in the notice, the information and recommendations submitted by the Committee, the written comments submitted pursuant to the notice, and other available information, it is found that to establish free percentages, restricted percentages, and withholding factors as hereinafter set forth will tend to effectuate the declared policy of the act.

Therefore, the free percentages, restricted percentages, and withholding factors for the 1966–67 crop year for marketable dates are as, pursuant to §§ 987.44 and 987.45, established as follows:

§ 987.214 Free and restricted percentages, and withholding factors.

The various free percentages, restricted percentages, and withholding factors applicable to marketable dates of each variety shall be, for the crop year beginning August 1, 1966, and ending July 31, 1967, as follows: (a) Deglet Noor variety dates: Free percentage, 63.0 percent; restricted percentage, 37.0 percent; and withholding factor, 58.7 percent; (b) Zahidi variety dates: Free percentage, 75.0 percent; restricted percentage, 25.0 percent; and withholding factor, 35.3 percent; (c) Haliway variety dates: Free percentage, 100 percent; restricted percentage, 0 percent; and withholding factor, 0 percent.

The Date Administrative Committee included no countries other than the United States and Canada in its determination of trade demand.

It is further found that good cause exists for not postponing the effective time of this action until 30 days after publication in the Federal Register (5 U.S.C. 1003(c)) in that: (1) The relevant provisions of said marketing agreement and this part require that (a) free and restricted percentages and withholding factors established for a particular crop year shall be applicable during the entire crop year to all marketable dates, and (b) the withholding obligations based on the continued regulation from the preceding crop year shall be adjusted to the newly established percentages upon their establishment; and (c) the percentages and withholding factors established herein for the crop year beginning August 1, 1966, will apply, and adjustment thereto of handlers' withholding obligations are required, automatically with respect to all such dates.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division.

[F.R. Doc. 66–8661; Filed, Aug. 8, 1966; 8:46 a.m.]

PART 992—DRIED PRUNES PRODUCED IN CALIFORNIA

Determination Relative to Estimated Season Average Price to Producers

Under the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the more restrictive grade regulation (7 CFR 993.601) and pack specifications as to size (7 CFR 993.501–993.518) are effective, as applicable, whenever the estimated season average price to producers for prunes does not exceed or is below the parity level specified in section 21(a) of the aforesaid act.

The present parity level is in excess of any prior season average price to producers. Based on this, the information submitted by the Prune Administrative Committee, and other available supply and demand information, it is determined that the estimated season average price for producers for the 1966–67 crop year beginning August 1, 1966, and for succeeding crop years, will not be at or in excess of the estimated average parity price for prunes for such crop years, and this determination shall continue in effect unless and until superseded by any subsequent determination.

PAUL A. NICHOLSON,
Director, Fruit and Vegetable Division.

[F.R. Doc. 66–8669; Filed, Aug. 8, 1966; 8:47 a.m.]
PART 993—DRIED PRUNES PRODUCED IN CALIFORNIA

Salable and Reserve Percentages for 1966-67 Crop Year

Pursuant to the marketing agreement, as amended, and Order No. 983, as amended (7 CFR Part 983), regulating the handling of dried prunes produced in California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), the Prune Administrative Committee has unanimously recommended salable and reserve percentages for California dried prunes of 100 percent and zero percent, respectively. These percentages would be applicable to all prunes received by handlers from producers and dehydrators during the 1966-67 crop year (beginning Aug. 1, 1966).

The Committee’s recommendation is based on its estimate of 1966 California dried prune production at 135,000 tons, natural condition weight, and carry-in of 38,642 tons, natural condition weight. To this would result in an estimated supply, processed weight equivalent, of 178,680 tons. The Committee also estimated 1966-67 domestic demand at 120,000 tons (processed weight) and foreign trade demand at 40,000 tons (processed weight), leaving a carryout on July 31, 1967, of 13,680 tons. A carryout of 13,680 tons is deemed desirable.

After consideration of the Committee’s recommendation and supporting information, and other available information, it is found that to establish the salable and reserve percentages hereinafter set forth will tend to effectuate the declared policy of the act.

Therefore, the salable and reserve percentages for prunes for the 1966-67 crop year are established as follows:

\[
\text{§ 993.202 Salable and reserve percentages for the 1966-67 crop year.}
\]

The salable and reserve percentages for the 1966-67 crop year shall be 100 percent salable and 0 percent reserve.

It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in public rulemaking procedures prior to the issuance of regulations implementing the provisions hereof effective upon publication in the Federal Register and not postponing the effective time until 30 days after such publication (5 U.S.C. 1003 (a) and (c)) in that: (1) The salable and reserve percentages of 100 percent and 0 percent, respectively, made effective for the 1965-66 crop year (30 F.R. 12383) apply (§ 993.55) to prunes received by handlers in the current crop year (1966-67) until salable and reserve percentages are established for that crop year; (2) after such establishment, the adjustments required (§ 993.55) will have to be made in the reserve obligations that have accrued up to the time of such establishment; (3) this action fixes the reserve percentage at zero for the 1966-67 crop year and thereby eliminates any reserve obligations that may have accrued prior thereto, with respect to the 1966 crop; and (4) this action relieves restrictions on handlers.

The salable and reserve percentages of the 1966-67 crop year are established as follows:

\[
\text{§ 993.202 Salable and reserve percentages for the 1966-67 crop year.}
\]

It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in public rulemaking procedures prior to the issuance of regulations implementing the provisions hereof effective upon publication in the Federal Register and not postponing the effective time until 30 days after such publication (5 U.S.C. 1003 (a) and (c)) in that: (1) The salable and reserve percentages of 100 percent and 0 percent, respectively, made effective for the 1965-66 crop year (30 F.R. 12383) apply (§ 993.55) to prunes received by handlers in the current crop year (1966-67) until salable and reserve percentages are established for that crop year; (2) after such establishment, the adjustments required (§ 993.55) will have to be made in the reserve obligations that have accrued up to the time of such establishment; (3) this action fixes the reserve percentage at zero for the 1966-67 crop year and thereby eliminates any reserve obligations that may have accrued prior thereto, with respect to the 1966 crop; and (4) this action relieves restrictions on handlers.

Dated: August 4, 1966, to become effective upon publication in the Federal Register.

PART A. NICHOLSON, Deputy Director, Fruit and Vegetable Division.

Title 33—NAVIGATION AND NAVIGABLE WATERS

Chapter I—Coast Guard, Department of the Treasury

SUBCHAPTER N—ARTIFICIAL ISLANDS AND FIXED STRUCTURES ON THE OUTER CONTINENTAL SHELF

CGEP 66-44

PART 144—LIFESAVING APPLIANCES

Subpart 144.01—Manned Platforms

Painters Provided for Lifeboats

Pursuant to the notice of proposed rule making published in the Federal Register on February 10, 1966 (31 F.R. 2602-2614), and the Merchant Marine Council Public Hearing Agenda dated March 21, 1966 (CG-269), the Merchant Marine Council held a public hearing on March 21, 1966, for the purpose of receiving comments, views and data. The proposals considered were identified as Items I to XXI inclusive.

This document is the fifth of a series regarding the regulations and actions considered at the 1966 public hearing and annual session of the Merchant Marine Council. This document contains the actions taken with respect to Item VII, regarding painters provided for lifeboats on manned platforms (CG-269, p. 106, 31 F.R. 2809). The proposal, as revised, is approved and set forth in this document. The actions of the Merchant Marine Council with respect to comments received are approved.

By virtue of the authority vested in me as Commandant, U.S. Coast Guard, by section 632 of Title 14, U.S. Code, and Treasury Department Order 120 dated July 31, 1950 (15 F.R. 6321), and other specifically listed with the regulation below, the following amendment to § 144.01-10(a) is prescribed and shall be effective on October 1, 1966: Provided, That the requirements in this document may be complied with prior to the effective date specified in lieu of existing requirements:

§ 144.01-10 Equipment for lifeboats.

(a) Each lifeboat shall be provided with a painter. This painter shall be a manila rope not less than 3/4 inch in natural condition weight and of a length not less than three times the distance from the deck where the lifeboat is stored to the low water line. Alternatively, the painter may be of other material provided it has equal strength to the size of manila rope specified and is not less than 3/4 inch in diameter.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Agency

[Docket No. 7058; Amts. 121-21, 127-6, 145-7]

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

PART 127—CERTIFICATION AND OPERATIONS OF SCHEDULED AIR CARRIERS WITH HELICOPTERS

PART 145—REPAIR STATIONS

Repair Stations Performing Work on Air Carrier and Commercial Operators’ Aircraft

The purpose of this amendment to Parts 121, 127, and 145 of the Federal Aviation Regulations is to clarify the requirements for repair stations performing maintenance, preventive maintenance, alterations, and required inspections on aircraft of air carriers and commercial operators. Primarily, the amendment adds a new section to Part 145 that requires repair stations to perform work on air carrier and commercial operators’ aircraft in accordance with applicable sections of Parts 121 and 127 and the air carriers’ or commercial operators’ manuals. Moreover, the performance standards for repair stations have been amended to accommodate the foregoing changes, and Parts 121 and 127 have been amended to take into consideration the performance of maintenance, preventive maintenance, alterations and required inspections by certified foreign repair stations.

This action was published as a notice of proposed rule making (30 F.R. 15296, Dec. 10, 1965) and circulated as notice 65-37 dated December 6, 1965. A basic objection to the entire proposal was voiced by one commentator to the effect that the new § 145.5 appeared to be a means of delegating basic FAA responsibility for repair station surveillance to the air carrier. The commentator, alleged that the scheme would be disadvantageous to the air carrier and even more so for a
carrier with a repair station certificate who would then be burdened with dual regulation.

The commentator does not explain how the proposed amendment would shift the basic FAA responsibility for repair station surveillance from the carriers, as set forth in §§ 121.363, cited by the commentator in support of its conclusion, makes the certificate holder (air carrier or commercial operator) primarily responsible for the airworthiness of its own aircraft and for the performance of maintenance on those aircraft even where arrangements have been made with another person for the performance of such work. The new § 145.2 merely requires that repair stations comply with the appropriate maintenance, preventive maintenance, and alteration subparts of Part 121 when performing work for air carriers or commercial operators. It does not relieve the air carriers or commercial operators of the responsibility which they have always had as set forth in §§ 121.363 and 127.131 nor does it extend that responsibility.

As proposed, § 145.2(a) listed by number the sections of Subpart L, Part 121 and Subpart L, Part 145 which would be required of repair station performing maintenance, preventive maintenance, alterations, or required inspections for an air carrier or commercial operator having a continuous airworthiness program, need not comply. Omitted from the list were §§ 121.379 and 127.140 relating to the authority of certificate holders to perform these functions for itself, to perform them for other carriers, and to approve for return to service. Since it is clear that §§ 121.379 and 127.140 have no application to repair stations performing work for air carriers and commercial operators, § 145.2 has been changed to include these sections in the list of those for which compliance is not required.

Interpreting the proposed § 145.2(b) as requiring that a repair station performing maintenance, preventive maintenance, or alterations for air carriers or commercial operators have the same recordkeeping system as the air carriers or operators, one commentator recommended a change which, in effect, would allow the carrier or operator to accept the repair station system. In this connection, since the regulations applicable to an air carrier or commercial operator allow them to utilize any suitable system of recording maintenance, provided it includes certain information, this alternative is already available under the existing regulation, and the recommended change is unnecessary. However, under Part 145 a repair station may retain a copy of the log or other record provided by the air carrier or commercial operator in meeting its reporting and recordkeeping requirements. Therefore, the proposed new § 145.2(b) is unnecessary and has been deleted along with the related change proposed to § 145.79(b).

A comment was also received which appeared to object to the proposed clarifying amendments to Parts 121 and 127 excepting from the airman certificate requirements, persons performing maintenance, alterations and required inspections in certificated foreign repair stations. However, this exception is based on the provisions of Part 145 governing foreign repair stations which state that station supervisors and inspectors do not need airmen certificates, and, along with personnel performing the work of the station, are not considered to be airmen within the meaning of section 101(7) of the Federal Aviation Act of 1958. Under this exception, it has been the practice of the Agency to permit U.S. air carriers to utilize the services of foreign repair stations notwithstanding the fact that such stations need not employ holders of U.S. mechanic certificates. Thus, the amendments as proposed were merely designed to clarify the provisions of Parts 121 and 127 so as to make them consistent with the manner in which they are being administered. Insofar as the comment may have been directed toward requiring airman certificates for personnel of all repair stations, domestic and foreign, it goes beyond the scope of this notice of proposed rule making.

One commentator, referring to "certificated foreign repair stations" as used for the proposed amendments to Parts 121 and 127, stated that the wording should further specify whether these are FAA certificated foreign repair stations. To avoid any misunderstanding as to what foreign repair stations are intended, §§ 121.378(a), 121.709(b), 127.139(a), and 127.319(b) have been further amended to identify the excepted repair stations as those certificated under the provisions of Subpart C of Part 145.

On March 25, 1966, the Agency amended Part 145 by adding Subpart D—Limited Ratings for Manufacturers. Notice 65–37, on which the present rulemaking action is based, was issued earlier, December 6, 1965, and, therefore, did not speak directly to manufacturers with limited repair station ratings performing maintenance or preventive maintenance on, and approving for return to service, aircraft of air carriers and commercial operators. As proposed, however, new § 145.2, is applicable to all repair stations performing such work. Since manufacturers with limited repair station ratings may perform the work specified in § 145.2, and, in addition, qualify as certificated repair stations for which the performance standards of Part 43 are applicable, the performance standards of Part 145 are applicable to such manufacturers are amended to provide the same exception with respect to § 145.2 as contained in § 145.57 for other repair stations. Other minor changes of an editorial or clarifying nature have been made. They are not substantive and do not impose any additional burden on regulated persons.

 Interested persons have been afforded the opportunity to participate in the making of this amendment. All relevant material submitted has been fully considered.

In consideration of the foregoing, Parts 121, 127, and 145 of the Federal Aviation Regulations are amended as follows, effective September 8, 1966.

1. Part 121 is amended—
   a. By amending § 121.378(a) to read as follows:

§ 121.378 Certificate requirements.

(a) Except for maintenance, preventive maintenance, alterations, and required inspections performed by repair stations certificated under the provisions of Subpart C of Part 145, each person who is directly in charge of maintenance, preventive maintenance, or alterations, and each person performing required inspections must hold an appropriate airmen certificate.

b. By adding a final sentence to § 121.709(b) to read as follows:

§ 121.709 Airworthiness release or aircraft log entry.

   * * * * *

(b) * * * * *

Notwithstanding subparagraph (3) of this paragraph, after maintenance, preventive maintenance, alterations performed by a repair station certificated under the provisions of Subpart C of Part 145, the airworthiness release or log entry required by paragraph (a) of this section may be signed by a person authorized by that repair station.

   * * * * *

2. Part 127 is amended—
   a. By amending § 127.139(a) to read as follows:

§ 127.139 Certificate requirements.

(a) Except for maintenance, preventive maintenance, alterations, and required inspections performed by repair stations certificated under the provisions of Subpart C of Part 145, each person who is directly in charge of maintenance, preventive maintenance, or alteration, and each person performing required inspections must hold an appropriate airmen certificate.

b. By adding a final sentence to § 127.319(b) to read as follows:

§ 127.319 Airworthiness release or helicopter log entries.

   * * * * *

(b) * * * * *

Notwithstanding subparagraph (3) of this paragraph, after maintenance or alterations performed by a repair station certificated under the provisions of Subpart C of Part 145, the airworthiness release or log entry required by paragraph (a) of this section may be signed by a person authorized by that repair station.

   * * * * *

3. Part 145 is amended—
   a. By adding the following new section after § 145.1:

   * * * * *
§ 145.2 Performance of maintenance, preventive maintenance, alterations and required inspections for an air carrier or commercial operator under the continuous airworthiness requirements of Parts 121 and 127.

Each repair station that performs any maintenance, preventive maintenance, alterations, or required inspections for an air carrier or commercial operator having a continuous airworthiness program under Part 121 or Part 127 of this chapter shall comply with Subpart L of Part 121 (except §§ 121.363, 121.369, 121.373, and 121.379) or Subpart I of Part 127 (except §§ 127.131, 127.134, 127.136, and 127.140) of this chapter, as applicable. In addition, such repair station shall perform that work in accordance with the air carrier's or commercial operator's manual.

b. By amending the first sentence of § 145.57(a) to read as follows:

§ 145.57 Performance standards.
(a) Except as provided in § 145.2, each certificated domestic repair station shall perform its maintenance and alteration operations in accordance with the standards in Part 43 of this chapter.

§ 145.105 Performance standards.

b. By amending the first sentence of § 145.57(a) to read as follows:

§ 145.57 Performance standards.
(a) Except as provided in § 145.2, each certificated domestic repair station shall perform its maintenance and alteration operations in accordance with the standards in Part 43 of this chapter.

(c) By amending § 145.105 to read as follows:
Proposed Rule Making

DEPARTMENT OF THE TREASURY
Internal Revenue Service
[26 CFR Part 48]
MANUFACTURERS AND RETAILERS EXCISE TAXES

Exemption Certificates in Tax-Free Sale of Oil Seldom Used as Lubricant; Hearing

The proposed amendment to the regulations under section 4091 of the Code, to provide for the use of exemption certificates in the tax-free sale of oil seldom used as a lubricant, was published in the Federal Register for July 1, 1966.

A public hearing on the provisions of this proposed amendment to the regulations will be held on Thursday, August 18, 1966, at 10 a.m., e.d.s.t., Room 3313, Internal Revenue Building, 12th and Constitution Avenue NW., Washington, D.C.

Lester R. Uretz,
Chief Counsel.

By: James P. Dring,
Director, Legislation and Regulations Division.

DEPARTMENT OF AGRICULTURE
Consumer and Marketing Service
[7 CFR Part 1068]
MILK IN MINNEAPOLIS-ST. PAUL, MINN., MARKETING AREA

Notice of Proposed Suspension or Termination

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), the suspension or termination of a certain provision of the order regulating the handling of milk in the Minneapolis-St. Paul, Minn., marketing area is being considered.

The provision proposed to be suspended or terminated is in §1068.11(b) as follows: "Provided, That any such person whose milk is received from the farm at a pool plant during any portion of the period July through October, inclusive, but subsequently in such 4-month period is received at a nonpool plant (except as provided above in this paragraph), shall not regain status as a producer prior to the next July 1."

This action has been requested by Twin City Milk Producers Association, with the support of four other cooperative associations representing over 83 percent of the producers delivering milk to the market. Because of the additional supplies of milk recently added to the market, the cooperative expressed the fear that at times it may be necessary that some producer milk be delivered to nonpool plants during the next few months. The provision in question would cause the producer whose milk was received at the nonpool plant to lose his producer status until July 1, 1967, even though his milk were again received at a pool plant.

Petitioner stated that the provision has lost its original purpose under the order since it was an adjunct to the now-terminated base and excess plan. The petitioner considers this action is necessary pending a hearing to review the questions of producer status and of pool plant qualification.

All persons who desire to submit written data, views, or arguments in connection with the proposed suspension or termination should file the same with the Hearing Clerk, Room 112-A, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250, not later than 3 days from the date of publication of this notice in the Federal Register. All documents filed should be in quadruplicate.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Clarence H. Gerhard,
Deputy Administrator, Regulatory Programs.
NOTICES

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. G-371]

EARL L. LANDRY

Notice of Loan Application

Earl L. Landry, Post Office Box 842, G. Caillou, Houma, La. 70360, has applied for a loan from the Fisheries Loan Fund to aid in financing the purchase of a used 35.1-foot registered length wood vessel to engage in the fishery for shrimp, oysters, sea trout, drum, sheephead, and flounders.

Notice is hereby given pursuant to the provisions of Public Law 89-85 and Fisheries Loan Fund Procedures (50 CFR Part 250, as revised Aug. 11, 1965) that the above-mentioned application is being considered by the Bureau of Commercial Fisheries, Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20246. Any person desiring to submit evidence in writing to the Director, Bureau of Commercial Fisheries, within 30 days from the date of publication of this notice. If such evidence is received it will be evaluated along with such other evidence as may be available before making a determination that the contemplated operation of the vessel will or will not cause such economic hardship or injury.

DONALD L. MCKERNAN,
Director,
Bureau of Commercial Fisheries.
August 4, 1966.

Office of the Secretary

SUPERINTENDENT, WIND RIVER INDIAN AGENCY

Delegation of Authority

Delegation of authority to authorize the Superintendent of the Wind River Indian Agency to execute contracts for the cancellation of past indebtedness and the assumption of obligations for repayment of future expenditures.

1. The Superintendent, Wind River Indian Agency, Bureau of Indian Affairs, is authorized to perform the functions and exercise the authority vested in the Secretary of the Interior by section (b) of the Act of March 6, 1966 (P.L. 89-364, 80 Stat. 21), to sign contracts with land-owners and water users on the Wind River Indian Irrigation Project for the cancellation of past indebtedness and the assumption of obligations for repayment of future expenditures.

2. The authority granted in 1 above may not be redelegated.

JOHN A. CARVER, JR.,
Under Secretary of the Interior.
August 1, 1966.

DOW CHEMICAL CO.

Notice of Filing of Petition for Food Additives

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b) (5), 72 Stat. 1786; 21 U.S.C. 348 (b) (5)), notice is given that a petition has been filed by the Dow Chemical Co., Post Office Box 512, Midland, Mich. 48641, proposing the issuance of a regulation to provide for the safe use of metilopinol (3,5-dichloro-2,6-dimethyl-4-pyridinol) as an aid in the prevention of coccidiosis in growing chickens.

J. K. KIRK,
Acting Commissioner of Food and Drugs.

[FR Doc. 66-8665; Filed, Aug. 8, 1966; 8:47 a.m.]

SCHERING CORP.

Notice of Filing of Petition for Food Additives Dienstrol Diacetate, Zoalene, and Procaine Penicillin

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b) (5), 72 Stat. 1786; 21 U.S.C. 348 (b) (5)), notice is given that a petition has been filed by Schering Corp., Bloomfield, N.J. 07003, proposing amendments to § 121.207 Zoalene and § 121.266 Dienstrol diacetate to provide for the safe use of a combination drug containing dienstrol diacetate, zoalene, and procaine penicillin for use in chicken feed to improve carcass quality of market chickens by promoting fat distribution for tenderness and bloom, to prevent and control coccidiosis, and to aid in stimulating growth and improving feed efficiency.

J. K. KIRK,
Acting Commissioner of Food and Drugs.

[FR Doc. 66-8666; Filed, Aug. 8, 1966; 8:47 a.m.]

UNION OIL CO. OF CALIFORNIA

Notice of Filing of Petition Regarding Pesticide

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b) (5), 72 Stat. 1786; 21 U.S.C. 348a (d) (1)), notice is given that a petition (PP 7706515) has been filed by Union Oil Co. of California, Post Office Box 76, Brea, Calif. 92621, proposing the establishment of exemptions from the requirement of tolerances for residues of the desiccants and defoliants ammonium nitrate formulated with ammonium chloride or ammonium thiosulfate in or on the raw agricultural commodities grain sorghum, peppers, potatoes, sweet potatoes, and tomatoes. The petition also requests exemption from the requirement of a tolerance for the residues of ammonium nitrate formulated with ammonium chloride and ammonium thiosulfate on the aforementioned crops and for ammonium nitrate alone on grain sorghum.

The analytical methods proposed in the petition for determining residues of these pesticide chemicals are: For nitrate, the method of Ullrich and Johnson, Analytical Chemistry, vol. 22 (1950), p. 1528; for chloride, a method involving potentiometric titration with silver nitrate; and for thiosulfate, the method described in Textbook of Quantitative Inorganic Analysis by Kolthoff and Sandell (1947).

J. K. KIRK,
Acting Commissioner of Food and Drugs.

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
FEDERAL POWER COMMISSION

[DOCKET NO. G-2699, ET AL.]

ATLANTIC RICHFIELD CO., ET AL.

Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates

JULY 29, 1966.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service heretofore authorized as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.10) on or before August 22, 1966.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 16 of the Natural Gas Act and the Commission’s rules of practice and procedure, a hearing will be held without further notice before the Commission on all applications in which no protest or petition to intervene is filed within the time required herein if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given: Provided, however, That pursuant to § 2.56, Part 2, Statement of General Policy and Interpretation, Chapter 1 of Title 18 of the Code of Federal Regulations, as amended, all permanent or intermediate orders of public convenience and necessity granting applications filed after April 15, 1965, without further notice, will contain a condition precluding any filing of an increase in rates at a price in excess of that designated for the particular area of production for the period prescribed therein unless at the time of filing such certificate application, or within the time fixed herein for the filing of protests or petitions to intervene the Applicant indicates in writing that it is unwilling to accept such a condition. In the event the Applicant is unwilling to accept such condition the application will be set for formal hearing.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

JOSEPH H. OZURINE, Secretary.

1 This notice does not provide for consolidation for hearing of the several matters covered herein, nor should it be so construed.

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
NOTICES

GULF RESOURCES, INC., AND NATURAL GAS GATHERING CO., INC.  
Notice of Petition To Amend  
AUGUST 2, 1966.  
Take notice that on July 26, 1966, Gulf Resources, Inc. (Gulf), and Natural Gas Gathering Co., Inc. (Natural), c/o Tennessee Gas Pipeline Co., Post Office Box 2511, Houston, Tex. 77001, collectively referred to as Petitioners, filed in Docket No. C161-282 a joint petition to amend the order of the Commission issued in said docket on May 10, 1966, for authorization for the liquidation and dissolution of Natural, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

The original certificate issued in the instant docket on May 10, 1966, authorized the construction and operation of certain facilities and the transportation of natural gas produced in various fields in Starr and Zapata Counties, Tex. Petitioners state that Natural is a wholly owned subsidiary of Gulf and is the owner of an undivided one-half interest in all of the facilities, contracts, rights and obligations which are the subject of the order issued May 10, 1966, and which are involved in the proceeding in Docket No. C161-282, Gulf owning the remaining undivided one-half interest.

Petitioners propose that Natural be liquidated and dissolved in accordance with the law and that in the course of dissolution of Natural all of its assets, properties, contracts and rights, subject to its obligations and liabilities, be distributed and transferred to Gulf, the sole owner of all the capital stock of Natural, in return for the surrender and cancellation of such stock.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C. 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (157.10) on or before August 29, 1966.

[FR Doc. 66-8636; Filed, Aug. 8, 1966; 8:45 a.m.]

JOSEPH H. GUTRIE,  
Secretary.

[DOCKET NO. C161-282]

ATOMIC ENERGY COMMISSION  
[DOCKET NO. PRM-30-24]

AMERICAN ATOMICS CORP.  
Notice of Filing of Petition for Rule Making  

The amendment proposed by the petitioner would amend Part 30 so as to exempt from the licensing requirements of section 81 of the Atomic Energy Act of 1954, as amended, and of Part 30, self-luminous light sources, each containing not more than 1 millicurie of krypton 85, when installed in:

(a) Safety markers, signs and signals; and
(b) Commercial and industrial switching equipment and control panels.

A copy of the petition for rule making is available for public inspection in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

Dated at Washington, D.C., this 2d day of August 1966.

For the Atomic Energy Commission.

W. B. McCool,  
Secretary.

[FR Doc. 66-8630; Filed, Aug. 8, 1966; 8:45 a.m.]

DEPARTMENT OF THE ARMY  
Notice of Amendment of Byproduct, Source and Special Nuclear Material License  
Please take notice that the Atomic Energy Commission has issued Amendment No. 1 to License No. 50-10023-1, held by the Department of the Army, Headquarters, U.S. Army, Alaska, which provides for renewal of the license for a period of 2 years.

The license provides for receipt and possession in Alaska of waste byproduct, source, and special nuclear material and packaging and storage of such waste material at a facility located at Fort Richardson, Alaska.

The license amendment provides only for the continuation of activities previously authorized. The Commission has determined that prior public notice of proposed issuance of this amendment is not required since the amendment does not involve hazard considerations different from those previously evaluated.

Within fifteen (15) days from the date of publication of this notice in the Federal Register, any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petitions to intervene shall be filed in accordance with the Commission's regulations, (10 CFR Part 2). If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in this notice, the Commission will issue a notice of hearing or an appropriate order. Petitions to intervene or requests for public hearing may be filed with the Secretary, U.S. Atomic Energy Commission, Washington, D.C. 20545.

For further details with respect to this amendment see the application dated February 14, 1966, which is available for public inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

The text of the amendment is set forth below.

Dated at Bethesda, Md., August 1, 1966.

For the Atomic Energy Commission.

J. A. McBane,  
Director,  
Division of Materials Licensing.

[License No. 50-10023-1; Amdt. 1]

The Atomic Energy Commission having found that:
A. The licensee's equipment, facilities, and procedures are adequate to protect health and minimize danger to life or property.
B. The licensee is qualified by training and experience to use the material for the purpose requested in accordance with the regulations in Title 10, Code of Federal Regulations, and in such manner as to protect health and minimize danger to life or property.
C. The application dated February 14, 1966, complies with the requirements of the Atomic Energy Act of 1954, as amended, and is for a purpose authorized by that Act.
D. Issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public.

Byproduct, Source, and Special Nuclear Material License No. 50-10023-1 is amended in its entirety to read as follows:

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
possess waste byproduct, source, and special nuclear material in the State of Alaska, and to package and store byproduct, source, and special nuclear material at the USARAL Radioactive Material Disposal Facility, USARAL Support Command, Fort Richardson, Alaska.

This license shall be deemed to contain the conditions specified in section 106 of the Atomic Energy Act of 1954, as amended, and is subject to the provisions of 10 CFR Part 20, "Standards for Protection Against Radiation", all other applicable rules, regulations, orders of the Atomic Energy Commission now or hereafter in effect, and to the following conditions.

1. The licensee shall possess, at any one time, not more than:
   A. 100 curies of byproduct material;
   B. 6,000 pounds of source material;
   C. 300 grams of special nuclear material.

2. Except as specifically provided otherwise by this license, the licensee shall receive, possess, package and store byproduct, source, and special nuclear material in accordance with the radiological safety procedures and limitations contained in the application for license dated April 15, 1966, and amendment thereto submitted February 26, 1966, by the Army's Office of the Deputy Chief of Staff for Logistics, and the application for license amendment dated February 14, 1966.

3. Operations shall be conducted under the supervision of individuals designated as Chief, Radiochemical Laboratory, Fort Richardson, Alaska, or Radiation Protection Officer, U.S. Army, Alaska.

4. The licensee shall store and package waste radioactive material only at Fort Richardson, Alaska.

5. The transportation of AEC-licensed material shall be subject to all applicable regulations of the Interstate Commerce Commission, U.S. Coast Guard, Federal Aviation Agency, and other agencies of the United States having jurisdiction.

When Interstate Commerce Commission regulations are not applicable to shipments by land of AEC-licensed material by reason of the fact that the transportation does not occur in interstate or foreign commerce, (1) the transportation shall be in accordance with the requirements relating to packaging of radioactive material, marking, and labeling of the package, placarding of the transportation vehicle, and accident reporting set forth in the regulations of the Interstate Commerce Commission in §§ 75.591-75.595, 49 CFR Part 73, "Regulations Applying to Shippers", and §§ 77.823, 77.860 (c) and (d), 49 CFR Part 77, "Regulations Applying to Shipments Made By Way Of Common Contract, Or Private Carriers By Public Highways"; and (2) any necessary modifications or exceptions to those requirements, any requests for special approvals referred to in those requirements, and any notifications referred to in those requirements shall be filed with, or made to, the Atomic Energy Commission.

This amendment shall be effective on the month in which this amendment is issued.

Date of Issuance: August 1, 1966.

For the Atomic Energy Commission.

J. A. McBride
Director, Division of Materials Licensing.

CIVIL AERONAUTICS BOARD

UNITED-PACIFIC TRANSFER CASE
Notice of Further Prehearing Conference

The Board by Order No. E-24023, dated July 28, 1966, reopened the above indicated proceeding to consider the issue of whether public convenience and necessity require and the Board should direct the amendment of Pacific Air Lines' certificate so as to suspend or terminate its authority to serve Stockton, Fresno, and Bakersfield, California.

Pursuant to the above order of the Board, a prehearing conference on the reopened issue will be held August 23, 1966, at 10 a.m., e.d.t., in Room 726, Universal Building, 1825 Connecticut Avenue, Washington, D.C. 20428.

[FR. Doc. 66-6655; Filed, Aug. 8, 1966; 8:47 a.m.]

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
NOTICES

FEDERAL COMMUNICATIONS COMMISSION

Docket No. 16440

INTERNATIONAL TELECOMMUNICATIONS UNION

Order Extending Time for Filing Comments and Reply Comments Regarding World Administrative Conference

In the matter of preparation for a World Administrative Conference of the International Telecommunications Union to consider amendment of the international radio regulations presently applicable to the maritime mobile radio service and to consolidate the radio regulations presently applicable to the oceanographic service.

ORDER

1. The Commission has under consideration its Second Notice of Inquiry in Docket No. 16440, which requests comments from the international community on the oceanographic requirements of the service of Oceanography, Docket No. 16440.

2. The Commission has decided to extend the time for filing comments in response to the Second Notice of Inquiry in Docket No. 16440, and the time for filing reply comments to August 29, 1966, for the above entitled proceeding, and it appears that additional time will be necessary if interested parties are to have an opportunity to prepare meaningful and useful comments.

ORDER

3. Accordingly, it is ordered that the time for filing comments in response to the Second Notice of Inquiry is extended from August 15, 1966, to August 29, 1966, and the time for filing reply comments is extended from August 25, 1966, to September 14, 1966.

[Docket No. 16794, 16795]

LYNN MOUNTAIN BROADCASTING AND WBEJ, INC.

Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Roy C. Nelson, Fred F. Davis, William E. Hale, and C. M. Taylor doing business as Lynn Mountain Broadcasting, Elizabeth, Tenn., Docket No. 16794, File No. 5260, Requests: 93.5 Mc, No. 257; 3 kW; 116 feet; for construction permits.

1. The Commission, by the Chief, Broadcast Bureau, under delegated authority considered the above captioned and described applications for construction permits on

2. These applications are mutually exclusive in that operation by the applicants as proposed would cause mutually destructive interference.

3. Each of the applicants is qualified to construct and operate as proposed. However, because of their mutual exclusivity the Commission deems it advisable to make the statutory finding that a grant of the subject applications would serve the public interest, convenience, and necessity, and is of the opinion that they must be designated for hearing in a consolidated proceeding on the issues set forth below.

It is ordered, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine which of the proposals would better serve the public interest.

2. To determine, in the light of the evidence adduced pursuant to the foregoing, whether the Commission is warranted in granting such construction permits for construction permit should be granted.

It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants pursuant to § 1.594(c) of the Commission rules, in person or by attorney, shall, within 20 days of the mailing of this order, file with the Commission a duplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this order.

It is further ordered, That the applicants herein shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible, and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(e) of the rules.

FEDERAL COMMUNICATIONS COMMISSION

FEDERAL MARITIME COMMISSION

No. 66-45

AMERICAN MAIL LINE, LTD., ET AL.

Order of Investigation and Hearing Regarding Agreement for Consolidation or Merger

On May 25, 1966, American Mail Line, Ltd., American President Line, Ltd., and the Pacific Far East Line, Inc., filed an agreement for the Commission's approval under section 15 of the Shipping Act, 1916 (46 U.S.C. 814). This agreement, FMC No. 9551, essentially seeks to accomplish two things: (1) to expedite the machinery through which the lines may proceed toward an eventual merger or consolidation, and (2) between the time of the Commission's approval and the time of the eventual merger to permit the three lines to coordinate their sailings and to solicit traffic jointly.

Protests to Agreement No. 9551 were lodged by the States Steamship Co. and Matson Navigation Co. States questions the Commission's jurisdiction to approve the prospective merger or consolidation under section 15 of the Shipping Act, 1916. States also maintains that Agreement No. 9551 is an "agreement to agree" and that as such the Commission is "left to speculate as to the consequences that may follow approval." Mason contends that Agreement No. 9551 should be disapproved as detrimental to the commerce of the United States, contrary to the public interest, and otherwise in violation of the Shipping Act, 1916.

Therefore, the Commission, pursuant to section 15 and section 22 of the Shipping Act, 1916 (46 U.S.C. 814, 821) hereby institutes an investigation to determine whether the Commission has jurisdiction over Agreement No. 9551, or any part thereof, and over the ultimate agreement to merge or consolidate which is contemplated by Agreement No. 9551. Furthermore, the Commission is of the opinion that a question has been raised whether Agreement No. 9551, to the extent it is subject to section 15, should be approved, disapproved, or modified.

Therefore, it is ordered, That the Commission, pursuant to section 15 and section 22 of the Shipping Act, 1916 (46 U.S.C. 814, 821) hereby institutes an investigation to determine whether the Commission has jurisdiction over Agreement No. 9551, or any part thereof, and over the ultimate agreement to merge or consolidate which is contemplated by Agreement No. 9551. Furthermore, the Commission is of the opinion that a question has been raised whether Agreement No. 9551, to the extent it is subject to section 15, should be approved, disapproved, or modified.

Therefore, it is ordered, That the Commission, pursuant to section 15 and section 22 of the Shipping Act, 1916 (46 U.S.C. 814, 821) hereby institutes an investigation to determine whether the Commission has jurisdiction over Agreement No. 9551, or any part thereof, and over the ultimate agreement to merge or consolidate which is contemplated by Agreement No. 9551. Furthermore, the Commission is of the opinion that a question has been raised whether Agreement No. 9551, to the extent it is subject to section 15, should be approved, disapproved, or modified.

It is further ordered, That the carriers identified in Sections 46 and 50 of the Shipping Act, 1916, be named as petitioners in accordance with the Commission's rules of practice and procedure.

It is further ordered, That this proceeding be assigned for public hearing before an examiner of the Commission's Office of Hearing Examiners and that the hearing be held at a date and place to be determined and announced by the presiding examiner; and

It is further ordered, That this order be published in the Federal Register and a copy of such order be served upon each respondent;

Persons who desire to become a party to this proceeding shall file a petition for leave to intervene in accordance with Rule 5(1) (46 CFR 602.72) of the Commission's rules of practice and procedure no later than the close of business on August 16, 1966, with copy to all parties;

[Delegation of Authority No. 1-A]

ASSISTANT ADMINISTRATOR FOR ADMINISTRATION

Delegation of Authority

Pursuant to the authority vested in me as Administrator of the Small Business Administration by the Small Business Act (72 Stat. 324), as amended, the Small Business Investment Act of 1958 (72 Stat. 889), as amended, Title IV of the Economic Opportunity Act of 1964 (78 Stat. 526), and Delegation of Authority from the Director of the Office of Economic Opportunity (29 F.R. 14764), authority is hereby delegated to the Assistant Administrator for Administration to perform any and all acts which I, as Administrator, am authorized to perform, including but not limited to authority to issue, modify, or revoke delegations of authority and to serve as alter ego to the Administrator and to continue to so serve in the event of the absence, resignation or incapacity of the Administrator, with respect to the activities of the Small Business Administration, except exercising authority under sections 7(a)(6), 9(d) and 11 of the Small Business Act, as amended.

This delegation is not in derogation of any authority residing in either the Executive Administrator or in the Deputy Administrators relating to the operations of their respective programs, nor does it affect the validity of any other delegations currently in force and effect.

Effective date. 5 p.m., August 5, 1966.

BERNARD L. BOTTEM, Administrator.

[F.R. Doc. 65-8871; Filed, Aug. 8, 1966; 8:45 a.m.]

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
The following learner certificates were issued in Puerto Rico and the Virgin Islands to the companies hereinafter named. The effective and expiration dates, learner rates, occupations, learning periods and the number of learners for normal labor turnover purposes are not available. Any person desiring to file a petition seeking reconsideration of the special minimum rates is necessary in order to prevent curtailment of opportunities for employment, for a learning period of 480 hours at the rates of 15 cents an hour, in the occupation of watch assembling, for a learning period of 240 hours at the rates of 15 cents an hour, and for the remaining 480 hours (assembling of watch movements).

Each learner certificate has been issued upon the representations of the employer which, among other things, were that employment of learners at special minimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. Any person aggrieved by the issuance of any of these certificates may seek to review or reconsideration thereof within 15 days after publication of this notice in the Federal Register pursuant to the provisions of 29 CFR 522.3. The certificates may be annulled or withdrawn, as indicated therein, in the manner provided in 29 CFR Part 528.

Signed at Washington, D.C., this 29th day of July 1966.

ROBERT G. GORDON,
Authorized Representative
of the Administrator.

INTERSTATE COMMERCE COMMISSION

MOTOR CARRIER TRANSFER PROCEEDINGS

August 4, 1966.

Synopses of orders entered pursuant to section 1213(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below.

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-68931. By order of July 29, 1966, the Transfer Board approved the transfer to Elton Dost, doing business as D & R Truck Service, Wakefield, Nebr., Nebr., of the operating rights of Elton Dost and Marvin Richter, a partnership, doing business as D & R Truck Service, Shawnee-town, Mo., in certificate No. MC-F-68931, issued October 26, 1965, authorizing the transportation, over irregular routes, of general commodities, excluding household goods, commodities in bulk, and other specified commodities from National Stock Yards, Ill., to Shawnee-town, Mo., Joseph R. Nacy, 117 West Eliza St., Post Office Box 282, Jefferson City, Mo., 65101, attorney for applicants.

No. MC-FC-68935. By order of July 29, 1966, the Transfer Board approved the transfer to Elton Dost, doing business as D & R Truck Service, Wakefield, Nebr., Nebr., of the operating rights of Elton Dost and Marvin Richter, a partnership, doing business as D & R Truck Service, Shawnee-town, Mo., in certificate No. MC-F-68935, issued October 26, 1965, authorizing the transportation, over irregular routes, of household goods, commodities in bulk, and other specified commodities from National Stock Yards, Ill., to Shawnee-town, Mo., Joseph R. Nacy, 117 West Eliza St., Post Office Box 282, Jefferson City, Mo., 65101, attorney for applicants.

No. MC-FC-68956. By order of July 29, 1966, the Transfer Board approved the transfer to Mary Evelyn Kuprevich, doing business as Clune Transfer, Wilkes-Barre, Pa., in certificate No. MC-F-68956, issued May 1, 1959, authorizing the transportation, over irregular routes, of household goods, as defined by the Commission, between Wilkes-Barre, Pa., and points in 5 miles of Wilkes-Barre, as the other, points in Pennsylvania, New York, New Jersey, and Connecticut. Elizabeth F. Mench, Rural Delivery No. 3, Dallas, Pa., 18612, attorney for applicants.

No. MC-FC-68965. By order of July 29, 1966, the Transfer Board approved the transfer to Eugene C. Rose, doing business as E. C. Rose, Inc., Toledo, Ohio, of the operating rights of Eugene C. Rose, doing business as E. C. Rose, Inc., Toledo, Ohio, in certificate No. MC-F-68965, issued May 20, 1955, authorizing the transportation of: Wrecked or disabled motor vehicles, in truckaway service, between points in Lucas County, Ohio, on the one hand, and, on the other, points in Steuben County, Ind., and in Monroe, Lenawee, and Wayne Counties, Mich.; and wrecked, disabled, and replacement motor vehicles, by use of wrecker, between points in Lucas, Fulton, Williams, and Wood Counties, Ohio, on the one hand, and, on the other, points in Indiana, the Lower Peninsula of Michigan and specified territories in Pennsylvania and New York. Arthur R. Cline, 420 Security Building, Toledo, Ohio 43604, attorney for applicants.

No. MC-FC-68975. By order of July 29, 1966, the Transfer Board approved the transfer to Espanola, Inc., Lorain, Ohio, of the operating rights of Ernest Homer Watkins, Chippewa Lake, Ohio, in certificate No. MC-F-68975, issued October 15, 1958, authorizing the transportation of olives, jellies, jams, and syrups, in containers, from Vermillion, Ohio, to points in Michigan, Illinois, Indiana, Pennsylvania, New York, New Jersey, Maryland, Delaware, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Florida, and the District of Columbia, with empty containers and packing material used in transporting the same commodities from the above-specified destination points to Vermillion, Ohio. William A. Davis, 6720 Mora Ave., Lorain, Ohio, attorney for applicants.

No. MC-FC-68975. By order of July 29, 1966, the Transfer Board approved the transfer to Espanola, Inc., Lorain, Ohio, of the operating rights of Ernest Homer Watkins, Chippewa Lake, Ohio, in certificate No. MC-F-68975, issued October 15, 1958, authorizing the transportation of olives, jellies, jams, and syrups, in containers, from Vermillion, Ohio, to points in Michigan, Illinois, Indiana, Pennsylvania, New York, New Jersey, Maryland, Delaware, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Alabama, Florida, and the District of Columbia, with empty containers and packing material used in transporting the same commodities from the above-specified destination points to Vermillion, Ohio. William A. Davis, 6720 Mora Ave., Lorain, Ohio, attorney for applicants.

[Notice 228]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

August 4, 1966.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules in Ex Parte No. MC 67 (49 CFR Part 240) published in the Federal Register, issue of April 27, 1965, effective July 1, 1966. These rules provide that protests to the granting of an application must be filed with the field official named in the Federal Register publication, within 15 calendar days after the date of notice of the filing of the application is published in the Federal Register. One copy of each such protest must be served on the applicant, or its authorized representative. The Commission must certify that such service has been made. The protest must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

FEDERAL REGISTER, VOL. 31, NO. 153—TUESDAY, AUGUST 9, 1966
A copy of the application is on file, and can be examined, at the Office of the
Secretary, Interstate Commerce Commission, Washington, D.C., and also in
the field office to which protests are to be transmitted.

Motor Carriers of Property
