NATURAL GAS POLICY ACT OF 1978
DOE/FERC issues interim implementation rules; effective 12-1-78; comments by 1-31-79 (Part VIII of this issue) 56448

CERTAIN EMPLOYMENT TAXES
Treasury/IRS provides final rule relating to requirements for deposit 56223

AGE DISCRIMINATION REGULATIONS
HEW/Secy proposes general government-wide guidelines; comments by 2-28-79 (Part VII of this issue) 56428

PASSENGER, COMMUTER AND FREIGHT TRAINS
DOT/FRA establishes requirements for installation of rear end marking devices; effective 12-15-78 56236

MOTOR VEHICLE INDUSTRY-TAX BASE FOR EXCISE TAX
Treasury/IRS solicits price comparison for trucks and tractors at retail sales versus other than retail sales; comments by 12-15-78 56310

PURCHASED GAS COST ADJUSTMENT CLAUSE
DOE/FERC promulgates modification and denies rehearing of previous amendment (order No. 13) to regulation; effective 1-1-79 56220

CIVIL SERVICE REFORM ACT OF 1978
CSC publishes regulations subject to review from 1-1-79 through 6-30-79 (Part V of this issue) 56418

DEBT SECURITIES
SEC extends comment period to 1-15-79 on proposal to require securities dealers to disclose the mark-up or mark-down received in a "risk-less" principal transaction 56247

SUNSCREEN DRUGS
HEW/FDA extends comment period to 12-15-78 on proposed conditions of safety, effectiveness, and labeling of over-the-counter products 56249

HUMAN DRUGS
HEW/FDA classifies chlorpropamide tablets as effective 56277

ANIMAL WELFARE ACT
USDA/APHIS amends transportation standards governing certain live warmblooded animals; effective 1-2-79 56213

NEW ANIMAL DRUGS
HEW/FDA withdraws approval of application for nonsterile dihydrostreptomycin sulfate; effective 12-1-78 56280
HEW/FDA publishes notice of opportunity for a hearing on pig ration ban—250; hearing requests by 1-2-79; data and analysis supporting hearing request by 1-15-79 55278
HEW/FDA withdraws approval of application for iron hydrogennated dextran injectables for baby pigs; effective 12-1-78 56277

### List of CFR Parts Affected in this Issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A cumulative list of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
### Table of Effective Dates and Time Periods—December 1978

This table is for use in computing dates certain in connection with documents which are published in the Federal Register subject to advance notice requirements or which impose time limits on public response. Federal Agencies using this table in calculating time requirements for submissions must allow sufficient extra time for Federal Register scheduling procedures.

In computing dates certain, the day after publication counts as one. All succeeding days are counted except that where a date certain falls on a weekend or holiday, it is moved forward to the next Federal business day. (See 1 CFR 18.17)

A new table will be published monthly in the first issue of each month. All January, February, and March dates are in 1979.

### CFR CHECKLIST

1977/1978 Issuances

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1977 and 1978. New units issued during the month are announced on the back cover of the daily Federal Register as they become available.

For a checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription service to all revised volumes is $400 domestic, $100 additional for foreign mailing. Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

program responsibilities are excepted under Schedule A because it is imprac-
ticable to examine for them. With estab-
lishment of this more general au-
thority, Schedule A authority under § 213.3199(r)(1), which covered only posi-
tions on the staff of the Council, is
simultaneously revoked.

FOR FURTHER INFORMATION CONTACT:
William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3102(kk) is
added and § 213.3199(r) is revoked as
set out below:

§ 213.3199 Temporary Boards and Com-
misions.

(kk) Until September 30, 1979, posi-
tions at grades GS-15 and below on
the staff of the Council on Wage and
Price Stability, and positions in agen-
cies which are members of the Coun-
cil, when such positions are needed to
carry out the agencies' responsibilities
under the anti-inflation program.

§ 213.3199 Temporary Boards and Com-
misions.

PART 213—EXCEPTED SERVICE

National Foundation on the Arts and
the Humanities

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The positions of Deputy
Director, Division of Research Grants
and Humanist Administrator, Summer
Seminars/Summer Stipends Program,
Division of Fellowships are no longer
excepted under Schedule A because it
is practicable to examine for them;
however, the positions are excepted
under Schedule B because it is not
practicable to hold a competitive ex-
amination for them.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE
SECRETARY OF AGRICULTURE

PART 2—DELEGATIONS OF AUTHORITY
BY THE SECRETARY OF AGRICULTURE
AND GENERAL OFFICERS OF THE
DEPARTMENT

Delegation of Authority for Remote
Sensing Activities

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: Authority is delegated to the
Director of Economics, Policy
Analysis and Budget and to the Chair-
man, World Food and Agricultural
Outlook and Situation Board to pro-
vide technical assistance, coordination,
and guidance in matters relating to
satellite remote sensing activities. This
action will result in centralized coordi-
nation of remote sensing activities in
USDA. The Chairman will also serve
as or designate someone to serve as
Executive Secretary of the USDA
Remote Sensing Coordinating Com-
mitee.

EFFECTIVE DATE: December 1,
1978.

FOR FURTHER INFORMATION
CONTACT:

James L. Fulton, Office of the
Deputy Administrator for Manage-
ment, Economics, Statistics, and
Cooperatives Service, U.S. Depart-
ment of Agriculture, Washington,
D.C. 20250, Telephone: 439-7392.

Part 2, Subtitle A, Title 7, Code of
Federal Regulations is amended as
follows:

Subpart C—Delegations of Authority
by the Deputy Secretary, Assistant
Secretaries, the Director of Econom-
ics, Policy Analysis and Budget,
and the Director, Office of Govern-
mental and Public Affairs

1. Section 2.27 is amended by revis-
ing paragraph (e) to read as follows:

§ 2.27 Delegations of Authority to the Di-
rector of Economics, Policy Analysis and
Budget.

(e) Related to remote sensing. (1) Pro-
vide technical assistance, coordina-
tion, and guidance to Department
agencies in planning, developing, and
carrying out satellite remote sensing
activities to assure full consideration
and evaluation of advanced technol-
gy.

(2) Coordinate administrative, man-
agement, and budget information re-
Iating to the Department's remote
sensing activities including:

(i) Inter- and Intra-agency meetings,
correspondence, and records;

(ii) Budget and management track-
ing systems; and

(iii) Inter-agency contacts and tech-
nology transfer.

(3) Designate the Executive Secre-
tary for the Remote Sensing Coordin-
ating Committee.

Subpart K—Delegations of Authority
by the Director of Economics, Policy
Analysis and Budget

2. Section 2.86 is amended by adding
a new paragraph (a)(4) to read as
follows:
§ 2.86 Chairman, World Food and Agricultural Outlook and Situation Board.

(a) * * *

(4) Related to remote sensing. (i) Provide technical assistance, coordination, and guidance to Department agencies in planning, developing, and carrying out satellite remote sensing activities to assure full consideration and evaluation of advanced technology.

(ii) Coordinate administrative, management, and budget information relating to the Department’s remote sensing activities including:

(a) Inter- and intra-agency meetings, correspondence, and records;

(b) Budget and management tracking systems; and

(c) Inter-agency contacts and technology transfer.

(iii) Serve as or designate the Executive Secretary for the Remote Sensing Coordinating Committee.

*) * * *

(5 U.S.C. 201 and Reorganization Plan No. 2 of 1953)

For Subpart C:

Dated: November 18, 1978.

BOB BERGLAND,
Secretary of Agriculture.

For Subpart K:

Dated: November 18, 1978.

HOWARD W. HJORT,
Director of Economics, Policy Analysis and Budget.

[3410-10-M]

PART 16—LIMITATION ON IMPORTS OF MEAT

Section 204 Import Regulations; Restrictions on the Importation of Meat From New Zealand

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Final rule.

SUMMARY: The regulations set forth in this Subpart are amended to limit imports of certain meats from New Zealand to no more than 314.8 million pounds, during calendar year 1978. Such action is necessary to carry out the 1978 restraint program including the agreement entered into by the United States with New Zealand pursuant to section 204 of the Agricultural Act of 1986 limiting the export from New Zealand and the importation into the United States of certain meats.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The Secretary of State and the Special Representative for Trade Negotiations concur in the issuance of this regulation.

This regulation establishes quantitative restrictions applicable to meat imported from New Zealand which may be entered or withdrawn from warehouse for consumption in the United States, whether shipped directly or indirectly, at the level of 314.8 million pounds during calendar year 1978.

The action taken herewith has been determined to involve foreign affairs functions of the United States. Therefore, these regulations fall within the foreign affairs exception to the notice and effective date provisions of 5 U.S.C. 553 and E.O. 12044.

EFFECTIVE DATE:

Meat released under the provisions of Section 448(b) of the Tariff Act of 1930 (19 U.S.C. 1448(b) (Immediate delivery)) prior to December 1, 1978, shall not be denied entry.

Subpart A, Section 204 Import Regulations, of Part 16, Limitation on Imports of Meat, of Title 7 of the Code of Federal Regulations is amended to add paragraph (c) to § 16.5, “Quantitative Restrictions” which reads as follows:

§ 16.5 Quantitative restrictions.

(c) Imports from New Zealand. During calendar year 1978, no more than 314.8 million pounds of meat, exported from New Zealand in the form in which it would fall within the definition of meat in TSUS 106.10 or 106.20, may be entered or withdrawn from warehouse for consumption in the United States, whether such meat was shipped directly or indirectly, from New Zealand to the United States.

(Sec. 204, Pub. L. 94-140, 84th Cong., 70 Stat. 200, as amended (7 U.S.C. 1554) and Executive Order 11539 (52 FR 10724).)

Issued at Washington, D.C., this 28th day November 1978.

BOB BERGLAND,
Secretary.

[FR Doc. 78-33741 Filed 11-30-78; 8:45 am]

[3410-08-M]

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

PART 403—PEACH CROP INSURANCE

Subpart—Regulations for the 1979 and Succeeding Crop Years

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This rule prescribes the procedure for insuring peaches under revised regulations, effective with the 1979 and succeeding crop years, which are designed to more nearly reflect the intent of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), as it relates to the cost of production protection provided by the insurance. Under the revised regulations, the production costs are reflected in the dollar amount of insurance based on both the expected production and the actual amount of fruit at harvest time. The fruit is valued based upon market price and the intent of these revised regulations is to relate the amount of insurance directly to the cost or production, and to relate the value of production directly to the dollar amount of insurance. These revised regulations are designed to more accurately cover the costs of production and reflect the true value of the production.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The current peach crop insurance program, now offered by the Federal Crop Insurance Corporation in certain counties in Alabama, Arkansas, Georgia, and South Carolina is operating unsatisfactorily from the standpoint of grower participation and insurance experience. In 1971, there were 304 peach crop insurance contracts. In 1976, there are 161 such contracts. In the 5 years from 1971 through 1976, loss ratios on peach crop losses exceeded 1.00 in 6 of the 8 years, indicating a need for review and possible changes in order to assure a continuation of the peach crop insurance program.

There are currently 17 contracts in Arkansas, 14 in Georgia, and 130 in South Carolina, with 111 of this number located in Spartanburg County. Due to the relatively small

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
number of peach crop insureds, it was possible for the Corporation to review the necessary changes in the regulations, appearing below, with a large number of growers in these States. Considerable time was spent with producers researching the revised peach crop insurance policy and evaluating the previous insuring experience under the old regulations. In the discussions, two proposed policies were reviewed. Selected was a policy which most adequately serves the needs of producers. Such policy is contained in the peach crop insurance regulations outlined below. The current peach crop insurance regulations were printed in the Federal Register on September 30, 1975 (40 FR 44823), and became effective for the 1976 crop year. These current regulations do not consider the value of the remaining production, dealing only with a percent of loss basis for adjustment purposes. It is possible for a crop with a high percentage of loss to still return to the grower substantial returns if the value of the fruit is high.

The value of the remaining production is taken into consideration under the revised regulations which more nearly reflect the intent of the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.). Under the revised regulations, production costs are reflected in the dollar amount of insurance based on both the expected production and the actual amount of fruit at the time of harvest. The fruit is valued based upon the market price and the intent is that the amount of insurance relates directly to the cost of production and the value of production is related directly to the dollar amount of insurance. It is felt that the revised regulations more adequately cover the production costs and reflect the true value of production.

Under the provisions of the peach crop insurance policy, the cancellation date, that date by which a policyholder must notify the Corporation of his desire to cancel his crop insurance coverage for a particular crop year, has been established as November 30. Any regulations that are promulgated herein, or any amendments thereto, must be placed on file in the Corporation's office for the county 15 days prior to such cancellation date, or November 15, in order to be effective for that crop year. The Board of Directors of the Federal Crop Insurance Corporation has found and determined that there would not be enough time to follow the procedure for notice and public participation as it relates to the insuring of peaches; the Corporation will accept written comments; views, and data to such regulations. The public consideration for use in future amendments to such regulations. The public is requested to forward any written comments, views, or data to James D. Deal, Manager, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, by not later than January 30, 1979, in order to be sure of consideration. Such comments, views, and data that are received in response to this invitation will be available for public inspection in the Office of the Manager during regular business hours, 8:15 a.m. to 4:45 p.m., Monday through Friday (7 CFR 1.27(b)).

Adopted by the Board of Directors on October 20, 1978.

**Final Rule**

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), 7 CFR Part 403, the Peach Crop Insurance Regulations for the 1976 and Succeeding Crop Years, as amended, shall remain in full force and effect for the 1978 crop year, are hereby amended effective for the 1978 and succeeding crop years to read as set forth below.

The provisions of this subpart shall apply, until amended or superseded to all continuous peach crop insurance contracts as they relate to the 1979 and succeeding crop years.

Subpart—Regulations for the 1979 and Succeeding Crop Years

Sec. 403.40 Availability of peach crop insurance.
date for the filing of applications. To extend the closing date for acceptance of applications in any county, by publishing a notice in the Federal Register, upon his determination that no adverse selectivity will result during the period of such extension: Provided, however, That if adverse conditions should develop during such period the Corporation will immediately discontinue the acceptance of applications.

(c) Application for initial insurance shall be made on the following form:

U.S. DEPARTMENT OF AGRICULTURE, FEDERAL CROP INSURANCE CORPORATION

APPLICATION FOR FEDERAL CROP INSURANCE FOR 19— AND SUCCEEDING CROP YEARS

Name and address: ____________________________

ZIP code: ______ Contract No.: ______

County: ______ State: ______

Identification No.: ____________________________

A. The undersigned applicant, subject to the provisions of the regulations of the Federal Crop Insurance Corporation (hereinafter called the “Corporation”), hereby applies to the Corporation for insurance on his share of any crop produced by a partnership or other legal entity. The applicant is a ______ (type of entity).

All natural persons in whose behalf this application is made are over 18 years of age ______ (yes or no).

B. Applicable only to cotton, peanut and tobacco: If the applicant intends to insure only the shares of his share-croppers or share tenants who have no insurance on the crop with the Corporation “SC-Int.” shall be entered following the name of the crop. If the applicant intends to insure both his sharecroppers and the shares of his share-croppers or share tenants “Comb. Int.” shall be entered following the name of the crop. Insurance for sharecroppers and share tenants shall be provided in accordance with the crop available actuarial table. The insured promises to pay to the order of the Corporation the annual premiums. It is agreed that any amount due the Corporation by the insured may be deducted from any indemnity payable to the insured and when not prohibited by law, from any loan or payment otherwise due the insured under any program administered by the United States Department of Agriculture.

C. Upon acceptance of this application by the Corporation, the contract shall be in effect for the first crop year specified above, except on any crop on which the time for filing has passed at the time this application is filed, and shall continue for each succeeding crop year until cancelled or terminated as provided in the contract. This application, the insurance policy, endorsements, and the county actuarial tables shall constitute the contract. Any changes in the contract shall be on file in the Corporation's office for the county at least 15 days prior to the applicable cancelation date.

D. This application, when executed by a person as an individual, shall not cover his share in a crop produced by a partnership or other legal entity.

§ 403.46 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the peach crop which is provided in and covered by the policy when insurance is accepted on the peach crop by the Corporation pursuant to a duly submitted application. Any changes made in the contract shall not affect the continuity from year to year.

§ 403.47 The policy.

The provisions of the Peach Insurance Policy for the 1979 and succeeding crop years are as follows:

U.S. DEPARTMENT OF AGRICULTURE

PEACH INSURANCE POLICY

This is a continuous contract. Refer to Section 18.

FEDERAL CROP INSURANCE CORPORATION

Subject to the regulations of the Federal Crop Insurance Corporation therein called “Corporation” and in accordance with the terms and conditions set forth in this policy, the Corporation upon acceptance of a person’s application does insure such person’s peach crop against unavoidable loss of production due to causes of loss insured against that are specified in this policy. No term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. Meaning of terms. For the purposes of insurance on peaches the terms:

(a) “Actuarial table” means the forms and related material approved by the Corporation which are on file for public inspection in the office of the county, and which show the applicable amounts of insurance, premium rates, insurable acreage, and related information regarding peach crop insurance in the county.

(b) “Contract” means the accepted application of this policy, and the actuarial table.

(c) “County” means the county shown on the application and any additional insurable land listed in a local program bordering on the county, as shown on the actuarial table.

(d) “Crop year” means the period within which the peach crop is normally grown and involving not more than $5,000 finds (a) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (b) that said insured person relied thereon in good faith, and (c) that to deny said insured's claim for indemnity would not be fair and equitable, such insured person shall be entitled to such indemnity the same as if otherwise entitled thereto.

§ 403.45 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the insurance contract whenever an insured person under any contract of crop insurance entered into under these regulations has suffered a loss to a crop which is not insured, or for which the insured is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured believed to be insured, or believed the terms of the insurance contract to have been complied with or waived, because of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation and the Board of Directors of the Corporation or the Manager in cases involving not more than $5,000 finds (a) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (b) that said insured person relied thereon in good faith, and (c) that to deny said insured's claim for indemnity would not be fair and equitable, such insured person shall be entitled to such indemnity the same as if otherwise entitled thereto.

§ 403.45 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the peach crop which is provided in and covered by the policy when insurance is accepted on the peach crop by the Corporation pursuant to a duly submitted application. Any changes made in the contract shall not affect the continuity from year to year.

§ 403.47 The policy.

The provisions of the Peach Insurance Policy for the 1979 and succeeding crop years are as follows:

U.S. DEPARTMENT OF AGRICULTURE

PEACH INSURANCE POLICY

This is a continuous contract. Refer to Section 18.

FEDERAL CROP INSURANCE CORPORATION

Subject to the regulations of the Federal Crop Insurance Corporation therein called “Corporation” and in accordance with the terms and conditions set forth in this policy, the Corporation upon acceptance of a person’s application does insure such person’s peach crop against unavoidable loss of production due to causes of loss insured against that are specified in this policy. No term or condition of the contract shall be waived or changed on behalf of the Corporation except in writing by a duly authorized representative of the Corporation.

TERMS AND CONDITIONS

1. Meaning of terms. For the purposes of insurance on peaches the terms:

(a) “Actuarial table” means the forms and related material approved by the Corporation which are on file for public inspection in the office of the county, and which show the applicable amounts of insurance, premium rates, insurable acreage, and related information regarding peach crop insurance in the county.

(b) “Contract” means the accepted application of this policy, and the actuarial table.

(c) “County” means the county shown on the application and any additional insurable land listed in a local program bordering on the county, as shown on the actuarial table.

(d) “Crop year” means the period within which the peach crop is normally grown and involving not more than $5,000 finds (a) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (b) that said insured person relied thereon in good faith, and (c) that to deny said insured's claim for indemnity would not be fair and equitable, such insured person shall be entitled to such indemnity the same as if otherwise entitled thereto.

§ 403.45 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the peach crop which is provided in and covered by the policy when insurance is accepted on the peach crop by the Corporation pursuant to a duly submitted application. Any changes made in the contract shall not affect the continuity from year to year.

§ 403.47 The policy.

The provisions of the Peach Insurance Policy for the 1979 and succeeding crop years are as follows:

U.S. DEPARTMENT OF AGRICULTURE

PEACH INSURANCE POLICY

This is a continuous contract. Refer to Section 18.
shall be designated by the calendar year in which the peach crop is normally harvested.

(e) "Harvest" means picking of peaches from the tree or from the ground either by hand or machine for the purpose of marketing.

(f) "Loss ratio" means the ratio of indemnity(ies) paid to premium(s) earned.

(g) "Office for the county" means the Corporation's office serving the county shown on the application for insurance or such office as may be designated by the Corporation.

(h) "Person" or "Insured" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

(i) "Share" means the share of the insured as landlord, owner-operator, or tenant in the insured peach crop at the time insurance attaches as reported by the insured or as determined by the Corporation, which ever the Corporation shall elect, and no other share shall be deemed to be insured.

(j) "Tenant" means a person who rents land from another person for a share of the peach crop or proceeds therefrom.

(k) "Unit" means all insurable acreage of peaches in the county on the date insurance attaches for the crop year (1) in which the insured has a 100 percent share, (2) which is owned by one person and operated by the insured as a tenant, or (3) which is owned by the insured and rented to one tenant. Land rented for cash, a fixed commodity payment, or any consideration other than a share in the peach crop on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in the office for the county, or by written agreement between the Corporation and the insured.

(l) All acreage of peaches (including a designation of any acreage to which insurance does not attach) in which the insured has a share, (2) the insured's share therein, and (3) the expected production per acre from such acreage, if the insured does not have a share in any acreage of peaches for any year, he shall submit a report so indicating. Any acreage report submitted by the insured shall be binding upon the insured and shall not be subject to change by the insured.

(m) If the insured does not submit an acreage report on or before January 10, the Corporation may elect to determine by unit, the insured acreage, share, expected production per acre or declare the insured acreage on any unit(ies) to be "zero."

(n) Amount of insurance per acre and prices for computing indemnities. (a) At the time application for insurance is made, the applicant shall select either a High, Medium, or Low dollar level of insurance from those shown on the actuarial table. If the insured has not elected a level or the level elected is not shown on the actuarial table for the crop year, the applicable level under the contract, and which the insured shall be deemed to have elected, shall be the level provided on the actuarial table for such purpose.

(o) Provided, That the level of insurance for peaches intended for processing as determined by the Corporation shall not exceed the Medium level. The insured may, with the consent of the Corporation, change the level elected for any crop year on or before the closing date for submitting applications for that crop year.

(p) The dollar amount of insurance per acre for each crop year shall be determined as shown in the following Amount of Insurance Table.

(q) For the purpose of computing premium, the dollar amount of insurance per acre shall be the amount corresponding with the expected production (as reported by the insured or as determined by the Corporation, whichever the Corporation shall elect), and the applicable level of insurance as shown in Columns A and B. (2) For the purpose of determining any indemnity, where the amount of fruit remaining on the trees at the time of harvest is less than the expected production, the dollar amount of insurance shall be the amount shown in Columns C through H opposite the applicable level of insurance shown in Column B.

(c) The price per bushel for computing indemnities shall be determined by the Corporation as follows: (1) The price for fresh fruit shall be based upon the applicable average FOB shipping point price per ½ bushel carton of U.S. Extra #1 two-inch peaches (if not available, the next larger size for which a price is available) as reported by the Market News Service of the Department of Agriculture for the seven consecutive market days commencing with the day harvest starts for the variety as determined by the Corporation: Provided, that such price shall never be less than $4.00 per ½ bushel carton. (2) The price for peaches which are intended for processing as determined by the Corporation, shall be the price per bushel received by the insured: Provided, that such price shall never be less than $2.00 per bushel.

6. Annual premium. (a) The annual premium is earned and payable at the time insurance attaches and shall be determined by multiplying the insured acreage times the amount of insurance per acre (based on the expected production when the insurance attaches) times the applicable premium rate, times the insured's share at the time insurance attaches, and applying the premium adjustment herein provided.

(b) For premium adjustment purposes, only the years during which premiums were earned subsequent to the 1978 crop year shall be considered.

(c) The premium shall be adjusted as shown in the following table:

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

If there is no break in the continuity of participation, any premium adjustment applicable under subsection (c) of this section shall be (1) the difference between the insurance on the total acreage of the insured's estate or surviving spouse in case of death of the insured, (2) the contract of insurance shall be in force and in effect, (3) the insured pays the premium, and (4) the insured is not in default in the payment of any premium. If the insurance is not paid within 30 days after the due date of the premium, the insurance shall terminate as of the date of the notice of cancellation. The insured shall keep or cause to be kept for two years, or for such additional time as may be required for such crop year, the records of the insured's estate or surviving spouse in case of death of the insured, and of all such records as may be required by the Corporation.

Insurance period. Insurance on insured acreage shall attach on January 10 and shall cease in the same calendar year upon the earlier of (1) harvest or (2) September 30.

Notice of damage or loss. Any notice of damage or loss shall be given in writing by the insured at the office of the Corporation for the county. The Corporation shall reject any claim for indemnity if any of the requirements of this section are not met.

Notice of each payment for each damage to the peaches from an insured cause of loss within seven days after such damage becomes apparent, giving the date, cause, and estimated extent of such damage: Provided, That if an indemnity is to be claimed, the insured shall notify the office for the county immediately if the damage occurs within the seven-day period before harvest commences or during harvest. The Corporation reserves the right to provide additional time if it deems that circumstances beyond the control of the insured prevent compliance with the provisions of this subsection.

Any insured acreage which is not to be harvested shall be left intact until the Corporation makes an inspection.

There shall be no abandonment to the Corporation of cropland of the peach crop.

Claim for indemnity. (a) Any claim for indemnity on any unit shall be submitted to the Corporation on a form prescribed by the Corporation. It shall be a condition precedent to the payment of any indemnity that the insured (1) establish that any loss has been directly caused by one or more of the causes insured against during the insurance period for which the indemnity is claimed and (2) furnish any other information regarding the loss as may be required by the Corporation.

(b) The amount of indemnity for any unit shall be the dollar value of production from the dollar amount of insured acres: Provided, That if the premium computed on the acreage as determined by the Corporation and share, is more than the production computed and share, the amount of indemnity shall be computed on the total production and share and then reduced proportionately.

(c) The unit area for which indemnity is paid shall be determined by the Corporation and subject to adjustment for wind and hail damage to fruit, shall include all harvested production of peaches made by the Corporation for unharvested production, poor farming practices, uninsured causes of loss, or for acreage abandoned or destroyed by the insured. Any notice of damage to be counted shall not be less than the expected production per acre at the time insurance was taken for any area. The amount of indemnity may be deducted from any indemnity payable to the insured.

10. Payment of indemnity. (a) Any indemnity will be payable within 90 days after the claim for indemnity is approved by the Corporation. However, in no event shall the Corporation be liable for interest or damage in connection with any claim for indemnity whether such claim be approved or disapproved by the Corporation.

(b) If the insured is an individual who dies, disappears, or is judicially declared incompetent, or the insured is other than an individual and such entity is dissolved after competent, or the insured is other than an individual and such entity is dissolved after the appeal to the Secretary of Agriculture, the Corporation determines to be beneficially entitled thereto.

Misrepresentation and fraud. The Corporation may void the contract without affecting the insured's liability for premiums or waiving any right, including the right to collect any unpaid premiums if, at any time, the Corporation determines to be material fact or committed any fraud relating to the contract, and such fraud shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

12. Collateral assignment. Upon approval of a form prescribed by the Corporation, the insured may assign to another party the right to an indemnity for the crop year and such assignee shall have the right to submit the loss notices and forms as required by the contract.

13. Transfer of insured share. If the insured transfers all or any part of the insured share, the transfer is to be approved by the Corporation, protection will continue to be provided according to the provisions of the contract to the transferee for such portion of the insured share, and the transferee shall have the same rights and responsibilities under the contract as the transferor for the current crop year. Any transfer shall be made on a form prescribed by the Corporation.

Subrogation. The insured (including any assignee or transferee) assigns to the Corporation all rights of recovery against any person for loss or damage to the extent that payment hereunder is made and shall execute all papers required and take appropriate action to secure such rights.

Records and access to farm. The insured shall keep or cause to be kept for two years after the time of loss, records of the harvesting, storage, shipments, sale or other disposition of all peaches produced on each unit in which the insured has a share, including separate records showing the same information for production from any uninsured acreage. Any persons designated by the Corporation may have access to such records and the farm for purposes related to the contract.

Forms. Copies of forms referred to in the contract are available at the office for the county.

17. Contract changes. The Corporation reserves the right to change any terms and provisions of the contract from year to year. Any changes shall be mailed to the insured or placed on file and made available for public inspection in the office of the county at least 15 days prior to the cancellation date, and such mailing or filing shall constitute notice to the insured. Acceptance or non-acceptance of any changes will be conclusively presumed in the absence of any notice from the insured to cancel the contract as provided in section 16.
for any crop year, the contract shall continue in force through such crop year and terminate at the end thereof. Death of a partner in a partnership shall dissolve the partnership, unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity. (f) In the absence of a notice from the insurer to cancel, and subject to the provisions of subsections (b), (c), (d), and (e) of this section, the contract shall continue in force for each succeeding crop year.

Note.—The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942, and OMB Circular No. 840.

Dated: November 9, 1978.

Peter F. Cole, Secretary, Federal Crop Insurance Corporation.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

Lemon Regulation 175; Lemon Regulation 176, Amdt. 11

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

SUMMARY: This action establishes the effective time.

ACTION: Final rule.

Pursuant to the marketing situation confronting the lemon industry, as hereafter provided, will tend to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 910.475 Lemon Regulation 175.

Order. (a) The quantity of lemons grown in California and Arizona which may be handled during the period December 3, 1978, through December 9, 1978, is expressed at 240,000 cartons.

(b) As used in this section, "cartons" mean the same as defined in the marketing order.

§ 910.474 [Amended]

Paragraph (a) of § 910.474 Lemon Regulation 174 (43 FR 54934) is amended to read as follows: "The quantity of lemons grown in California and Arizona which may be handled during the period November 20, 1978, through December 2, 1978, is established at 240,000 cartons."

(See 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated:

Charles R. Braden, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2859—INSPECTION OF EGGS AND EGG PRODUCTS

Fees and Charges

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.
SUMMARY: The hourly rates for overtime or holiday work incurred under the mandatory egg products inspection service are changed to reflect salary increases for inspectors.

FOR FURTHER INFORMATION CONTACT:
Ashley R. Gulich, Food Safety and Quality Service, United States Department of Agriculture, Room 3944 South Building, Washington, D.C. 20250, Phone: (202) 447-3506.

SUPPLEMENTARY INFORMATION:
Under the mandatory egg products inspection program the first 40 hours of an inspector’s charges are paid by the Federal Government. Users of the Service are charged only for work performed in overtime, on holidays, or on certain appeal inspections. The Egg Products Inspection Act (21 U.S.C. 1031 et seq.) requires that the costs of inspection for such services as overtime and holiday work be recovered from the users. Fees for these services have not been adjusted since November 1976. Since that time, there have been two general salary increases for Federal employees and some State employees, as well as increases in other costs to provide services. To recover costs for service, the hourly rates for overtime and holiday inspection work are increased from $10.60 to $12.00 per hour.

Therefore, pursuant to the authority in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to these amendments are impracticable and contrary to the public interest and good cause is found for making these amendments effective before January 2, 1979.

SYDNEY J. BUTLER, Acting Administrator, Food Safety and Quality Service.

[FR Doc. 78-33680 Filed 11-30-78; 8:45 am]

RULES AND REGULATIONS

It has been determined that in order to cover these increased costs of the services, the hourly fees charged in connection with the performance of the services must be increased as soon as practicable as provided herein. The need for the increase and the amount thereof are dependent upon facts within the knowledge of the Food Safety and Quality Service.

The Egg Products Inspection Act requires that fees recovered from users of the mandatory egg products inspection program for overtime and holiday work cover the costs for such services. Increased revenues are urgently needed to meet the costs of these services as presently being performed. Therefore, Sydney J. Butler has determined that this document represents an emergency situation requiring immediate program action without a notice and comment period. Further, these amendments have not been classified “significant” and an impact analysis is not required since the amendments are mandated by statute.

Accordingly, pursuant to the authority in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to these amendments are impracticable and contrary to the public interest and good cause is found for making these amendments effective before January 2, 1979.

[3410-34-M]
Title 9—Animal and Animal Products
CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE
SUBCHAPTER A—ANIMAL WELFARE
PART 3—STANDARDS

Revision of Standards for the Transportation and the Handling, Care, and Treatment in Connection Therewith of Dogs, Cats, Rabbits, Hamsters, Guinea Pigs, Nonhuman Primates, and Certain Other Warmblooded Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the transportation standards governing certain live warmblooded animals under the Animal Welfare Act published in the Federal Register on June 21, 1977 (42 FR 31355-31371) and on May 16, 1978 (43 FR 21160-21167). The amendments contained herein concern changes in the allowable minimum and maximum air temperatures surrounding dogs, cats, guinea pigs, hamsters, rabbits, nonhuman primates and certain other warmblooded animals when transported in commerce. They also contain a new procedure for measuring the air temperature surrounding live animals being transported in commerce which replaces the “and certain other warmblooded animals when transported in commerce” which were received by the Department and which made new facts and evidence available that appeared to warrant such action.

FOR FURTHER INFORMATION CONTACT:
Dr. Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782 (301) 436-8271.

SUPPLEMENTARY INFORMATION:
On October 17, 1978, the Department published a notice of proposed rulemaking containing changes and additions to Part 3 of Subchapter A, Chapter 1, Title 9 of the Code of Federal Regulations (42 F.R. 47964-47968) which provided for (1) a change in the minimum allowable air temperature from 7.2°C. (45°F.) to 1.7°C. (35°F.) for dogs, cats, hamsters, rabbits, and certain other warmblooded animals when transported in commerce, (2) a change in the maximum allowable air temperature from 35°C. (95°F.) to 29.5°C. (85°F.) for all warmblooded animals under the Animal Welfare Act when transported in commerce, and (3) a new procedure for measuring the air temperature surrounding live animals transported in commerce wherein the air temperature is measured and read outside the animal shipping container at a distance not to exceed .91 meters (3 feet) from the external walls of such container.

A total of 639 comments were received representing many interest groups, i.e., air carriers, pet shop
OWNERS AND OPERATORS, HUMANE GROUPS, PET ANIMAL DEALERS, VETERINARIANS, HOBBY BREEDERS, INDIVIDUAL PET OWNERS AND CONCERNED CITIZENS. MANY OF THE COMMENTS RAISED QUESTIONS OR PROVIDED INFORMATION WHICH WARRANTED SOME CHANGES IN THE PROPOSED AMENDMENTS TO THE STANDARDS. CERTAIN EDITORIAL CHANGES WERE ALSO MADE FOR CLARIFICATION.

DISCUSSION OF MAJOR PROPOSED ITEMS AND COMMENTS

METHOD FOR MEASURING THE AIR TEMPERATURE SURROUNDING LIVE ANIMALS TRANSPORTED IN COMMERCE

CARRIERS AND OTHER PERSONS COMMENTING ON THE PROPOSED METHOD FOR MEASURING AIR TEMPERATURE INDICATED THEIR AGREEMENT WITH THE PROPOSAL AS BEING PRACTICAL AND EASY FOR CARRIER PERSONNEL TO ACCOMPLISH, AS WELL AS BEING SAFE FOR THE CONTAINED ANIMALS. ON THE OTHER HAND, TWO COMMENTATORS CRITICIZED THE PROPOSED METHOD AS FAR TOO SUBJECTIVE AND LESS ACCURATE IN REFLECTING THE ACTUAL TEMPERATURE IMPACTING THE COHABITING ANIMALS. IT WAS INDICATED THAT THE PROPOSED METHOD DID NOT TAKE INTO CONSIDERATION FACTORS SUCH AS DIRECT SUNLIGHT, CONSTRUCTION OF THE SHIPPING CONTAINER, ETC., WHICH COULD AFFECT THE TEMPERATURE WITHIN A SHIPPING CONTAINER. HOWEVER, THE EFFECT OF OTHER INTERRELATED FACTORS HAS YET TO BE SUFICIENTLY EVALUATED RELATIVE TO A WARMBLOODED ANIMAL'S PHYSIOLOGICAL RESPONSE TO TEMPERATURE EXTREMES. IN ADDITION, INEXPENSIVE TEMPERATURE MEASURING DEVICES WHICH WOULD NOT REQUIRE THREATENING SOME PART OF SUCH DEVICES INTO THE ANIMAL'S SHIPPING CONTAINER ARE NOT READILY AVAILABLE AND THERE IS A RESISTANCE ON THE PART OF CARRIER OR INTERMEDIATE HANDLER EMPLOYEES TO GET TOO NEAR AN ANIMAL WHOSE DISPOSITION TOWARD STRANGERS IS UNKNOWN. THE DEPARTMENT IS THEREFORE AMENDING §§3.18, 3.40, 3.65, 3.90, AND 3.118 TO REFLECT THE NEW METHOD OF MEASURING AND READING THE AIR TEMPERATURE OUTSIDE THE ENCLOSURE (SHIPPING CONTAINERS) CONTAINING LIVE ANIMALS.

ALLOWABLE MAXIMUM AIR TEMPERATURE

ALLOWABLE MINIMUM AIR TEMPERATURE

THE PRESENT TRANSPORTATION STANDARDS PROVIDE THAT THE AMBIENT AIR TEMPERATURE AND THE TEMPERATURE SURROUNDING LIVE WARMBLOODED ANIMALS TRANSPORTED IN COMMERCE SHALL NOT BE ALLOWED TO FALL BELOW 1.2°C. (45°F.). AN EXEMPTION IS PROVIDED FOR USDA LICENSEES OR REGISTRANTS AND U.S. GOVERNMENT AGENCIES OR REPRESENTATIVES OF THE U.S. GOVERNMENT AGENCIES, FELT THAT THEIR DOGS AND CATS AND CERTAIN OTHER WARMBLOODED ANIMALS WERE NOT ADVERSELY AFFECTED BY AIR TEMPERATURES DOWN TO 35°F. BASED ON EMPirical INFORMATION, AS WELL AS ON CERTAIN AMOUNTS OF SCIENTIFIC DATA, THE DEPARTMENT PROPOSED TO PROVIDE FOR A MINIMUM ALLOWABLE AIR TEMPERATURE OF 35°C. (95°F.) SURROUNDING DOGS, CATS, RABBITS, AND CERTAIN OTHER WARMBLOODED ANIMALS, WITH THE EXCEPTION OF GUINEA PIGS AND NONHUMAN PRIMATES, WHEN TRANSPORTED IN COMMERCE. A MAJORITY OF INDIVIDUALS WHO SUBMITTED COMMENTS, MANY OF WHO ARE PET OWNERS, VEHEMENTLY OBJECTED TO THE LOWERING OF THE ALLOWABLE MINIMUM AIR TEMPERATURE SURROUNDING WARMBLOODED ANIMALS, MOSTLY BASED

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
their objections on an anthropomorphic response, i.e., a human would be uncomfortable and eventually freeze under the same conditions. Other comments disagreed with the proposal because it lacked certain animal protection measures. In a 35°F environment, therefore, animals will also be uncomfortable and eventually freeze under the same conditions. Other comments disagreed with the proposal because it lacked certain animal protection measures. In a 35°F environment, therefore, animals will also be uncomfortable and eventually freeze under the same conditions.

The Department's proposed amendments to the standards for allowable air temperatures apply to all dogs (Canis lupus familiaris), all cats (Felis catus), and other warm-blooded animals affected by the Act and do not give consideration to breed differences or age differences. There is no available scientific data which evaluates the individual physical and physiological characteristics of various breeds of dogs, cats, and other animals and the effect of temperature extremes utilized on these species. Consideration for these animal breeds and age differences is emphasized in the commentary. (Amended)

The Department feels that additional scientific evaluation of the effects of cold temperatures on those warm-blooded animals covered by the Animal Welfare Act must be made and has already initiated action to derive this needed information. In the meantime, the proposed change of the allowable minimum air temperature from 72°F. (22°C.) to 7°C. (25°F.) shall not be implemented in this rulemaking.

The Department acknowledges the validity of the complaints from hobby breeders and individual pet owners who are concerned and have asked for an opportunity to present to carriers a certificate of acclimation to lower temperatures when shipping an animal which is known to be so acclimated. The Department is considering providing such an option to all pet owners through a certificate of acclimation to lower temperatures executed by an "accredited" veterinarian in the future rulemaking. An "accredited" veterinarian is a licensed veterinarian who has been officially authorized by the Deputy administrator of the Department's Veterinary Services to perform certain functions in connection with programs and laws administered by the Department.

Accordingly, the standards (9 CFR 3.1 et seq.) are amended in the following respects:

1. The Table of Contents cited in Part 3-CERTIFICATES is amended by deleting §§3.18, 3.42, 3.67, 3.92, and 3.118.

§3.11 [Amended]

2. Section 3.11(c)(9) of the standards (9 CFR 3.11(c)(9)) is amended by deleting the sentence number 3.18 in the phrase, "** prescribing in §§3.16 and 3.18." and inserting the sentence number "3.17" in its place.

3. Section 3.11(c)(9) of the standards (9 CFR 3.11(c)(9)) is revised to read as follows:

§3.16 Terminal facilities.

Carriers and intermediate handlers shall not commingle live animal shipments with inanimate cargo. All animal holding areas of a terminal facility of any carrier or intermediate handler wherein live animal shipments are maintained shall be cleaned and sanitized in a manner prescribed in §3.11(c). The temperature within such animal holding area shall not exceed 7°C. (50°F.) and such live dogs or cats shall not be subjected to surrounding air temperatures which exceed 29.5°C. (85°F.), and which shall be measured and recorded in the manner prescribed in §3.16 of this Part, for a period of more than 45 minutes.

5. Section 3.11(a)(3) of the standards (9 CFR 3.11(a)(3)) is amended to read as follows:

(a) ** (3) Shelter from cold weather. Transporting devices shall be covered to provide protection for live dogs and cats when the outdoor air temperature falls below 10°C. (50°F.), and such live dogs or cats shall not be subjected to surrounding air temperatures which fall below 5°C. (41°F.), and which shall be measured and recorded in the manner prescribed in §3.16 of this Part, for a period of more than 45 minutes unless such dogs or cats are accompanied by a certificate of acclimation to lower temperatures as prescribed in §3.11(c).

§3.18 [Deleted]

6. Section 3.18 of the standards (9 CFR 3.18) is deleted.

§3.35 [Amended]

7. Section 3.35(c)(9) of the standards (9 CFR 3.35(c)(9)) is amended by deleting the section number "3.42" in the phrase, "** prescribing in §§3.40 and 3.42." and inserting the section number "3.41." in its place.

8. Section 3.40 of the standards (9 CFR 3.40) is revised to read as follows:

§3.40 Terminal facilities.

Carriers and intermediate handlers shall not commingle live animal shipments with inanimate cargo. All animal holding areas of a terminal facility of any carrier or intermediate
handler wherein live animal shipments are maintained shall be cleaned and sanitized in a manner prescribed in § 3.56 of the standards often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live guinea pigs or hamsters shall be provided with fresh air by means of windows, doors, vents, or air conditioning and may be ventilated or air circulated by means of fans, blowers, or an air conditioning system so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal holding area containing live rabbits when the outdoor air temperature falls below 10°C. (50°F.), and such live rabbits shall not be subjected to surrounding air temperatures which exceed 29.5°C. (85°F.), and which shall be measured and read in the manner prescribed in § 3.40 of this part, for a period of more than 45 minutes.

§ 3.42 [Deleted]

11. Section 3.42 of the standards (9 CFR 3.42) is deleted.

§ 3.60 [Amended]

12. Section 3.60(c) of the standards (9 CFR 3.60(c)) is amended by deleting the section number “3.67” in the phrase “* * * * prescribed in §§ 3.65 and 3.67” and inserting the section number “3.66” in its place.

13. Section 3.65 of the standards (9 CFR 3.65) is revised to read as follows:

§ 3.55 Terminal facilities.

Carriers and intermediate handlers shall not commingle live animal shipments with inanimate cargo. All animal holding areas of a terminal facility of any carrier or intermediate handler wherein live animal shipments are maintained shall be cleaned and sanitized in a manner prescribed in § 3.56 of the standards often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live rabbits shall be provided with fresh air by means of windows, doors, vents, or air conditioning and may be ventilated or air circulated by means of fans, blowers, or an air conditioning system so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal holding area containing live rabbits when the outdoor air temperature falls below 10°C. (50°F.), and such live rabbits shall not be subjected to surrounding air temperatures which exceed 29.5°C. (85°F.), and which shall be measured and read in the manner prescribed in § 3.65 of this part, for a period of more than 45 minutes.

§ 3.67 [Deleted]

16. Section 3.67 of the standards (9 CFR 3.67) is deleted.

§ 3.85 [Amended]

17. Section 3.85(c) of the standards (9 CFR 3.85(c)) is amended by deleting the section number “3.92” in the phrase “* * * * prescribed in §§ 3.90 and 3.92” and inserting the section number “3.91.” in its place.

18. Section 3.90 of the standards (9 CFR 3.90) is revised to read as follows:

§ 3.90 Terminal facilities.

Carriers and intermediate handlers shall not commingle live animal shipments with inanimate cargo. All animal holding areas of a terminal facility of any carrier or intermediate handler wherein live animal shipments are maintained shall be cleaned and sanitized in a manner prescribed in § 3.81 of the standards often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live nonhuman primates shall be provided with fresh air by means of windows, doors, vents, or air conditioning and may be ventilated or air circu-
lately by means of fans, blowers, or an air conditioning system so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal holding area containing live nonhuman primates when the air temperature within such animal holding area is 23.9°C. (75°F.) or higher. The air temperature around any live nonhuman primate in any animal holding area shall not be allowed to fall below 7.2°C. (45°F.) nor be allowed to exceed 29.5°C. (85°F.) at any time: Provided, however, that no live nonhuman primate shall be subjected to surrounding air temperatures which exceed 29.5°C. (85°F.) for more than 4 hours at any time. To ascertain compliance with the provisions of this paragraph, the air temperature around any live nonhuman primate shall be measured and read outside the primary enclosure which contains such nonhuman primate at a distance not to exceed .91 meters (3 feet) from any one of the external walls of the primary enclosure and on a level parallel to the bottom of such primary enclosure. The air temperature which approximates half the distance between the top and bottom of such primary enclosure shall be measured and read in the manner prescribed in §3.116 of the standards, often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live animals shall be provided with fresh air by means of windows, doors vents, or air conditioning system so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal holding area containing live animals when the air temperature within such animal holding area is 23.9°C. (75°F.) or higher. The air temperature around any live animal in any animal holding area shall not be allowed to fall below 7.2°C. (45°F.) nor be allowed to exceed 29.5°C. (85°F.) at any time: Provided, however, That no live animal shall be subjected to surrounding air temperatures which exceed 23.9°C. (75°F.) for more than 4 hours at any time. To ascertain compliance with the provisions of this paragraph, the air temperature which approximates half the distance between the top and bottom of such primary enclosure shall be measured and read in the manner prescribed in §3.116 of the standards, often enough to prevent an accumulation of debris or excreta, to minimize vermin infestation and to prevent a disease hazard. An effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained for all animal holding areas. Any animal holding area containing live animals shall be provided with fresh air by means of windows, doors vents, or air conditioning system so as to minimize drafts, odors, and moisture condensation. Auxiliary ventilation, such as exhaust fans and vents or fans or blowers or air conditioning shall be used for any animal holding area containing live animals when the air temperature within such animal holding area is 23.9°C. (75°F.) or higher. The air temperature around any live nonhuman primate at a distance in feet) from any one of the external walls of the primary enclosure which contains such animal at a point which approximates half the distance between the top and bottom of such primary enclosure shall be measured and read in the manner prescribed in §3.116 (a)(3) of the standards. Any live nonhuman primate shall be subjected to surrounding air temperatures which exceed 29.5°C. (85°F.), and which shall be measured and read in the manner prescribed in §3.116 of this Part, for a period of more than 45 minutes. 

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon such good cause that further notice and other public participation with respect to the revision is impracticable and unnecessary.

Done at Washington, D.C., this 29th day of November, 1978.

E. A. Schily,
Acting Deputy Administrator,
Veterinary Services.

[FR Doc. 78-33789 Filed 11-30-78; 8:45 am]
Brucellosis Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final Rule.

SUMMARY: The Animal and Plant Health Inspection Service is amending its Brucellosis Regulations. These amendments update the Brucellosis Regulations by providing the current status of various counties and States which have been designated Brucellosis-Free Areas, Modified Certified Brucellosis Areas, or Noncertified Areas for purposes of interstate movement of cattle and bison from such areas. This action is required because of the change in the Brucellosis status of the areas affected.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:
Dr. A. D. Robb, U.S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services, Hyattsville, Maryland, Room 805, (301) 438-8713.

SUPPLEMENTARY INFORMATION: The amendments delete the following areas from the list of Modified Certified Brucellosis Areas in §78.21 and add such areas to the list designated as Modified Certified Brucellosis Areas, or Noncertified Areas as Modified Certified Brucellosis Areas, because they have been determined that they no longer come within the definition of a Modified Certified Brucellosis Area in §78.1(m): Highlands County in Florida.

The amendments delete the following areas from the list of Certified Brucellosis-Free Areas in §78.20 and add such areas to the list designated as Certified Brucellosis-Free Areas in §78.21 because it has been determined that they now come within the definition of a Certified Brucellosis-Free Area in §78.20.

In Colorado: Calhoun County in Florida; Miami County in Kansas; and Quay County in New Mexico.

Accordingly, §§78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are amended to read as follows:

§78.20 Certified Brucellosis-Free Areas.

The following States, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) Entire States.

(b) Specific Counties Within States.

Delaware. New Castle.
Mississippi. Alcorn, Hancock, Harrison, Jackson, Stone, Tishomingo, Yalobusha.
Missouri. Audrain, Cape Girardeau, Gasconade, Hickory, Lewis, Moniteau, Montgomery, Perry, Platte, Pulaski, St. Louis, Schuyler, Shelby.
Nebraska. Banner, Box Butte, Chouteau, Dakota, Deuel, Dodge, Douglas, Garfield, Thurston.
New Mexico. Catron, Cibola, Cibola, Colfax, Dona Ana, Grant, Guadalupe, Harding, Hidalgo, Lincoln, Los Alamos, Luna, McKinley, Otero, Quay, Rio Arriba, San Miguel, San Juan, Santa Fe, Socorro, Taos, Torrance, Union.
South Dakota. Aurora, Beadle, Bennett, Bon Homme, Brookings, Brown, Brule, Buffalo, Butte, Campbell, Charles Mix, Clark, Clay, Codington, Corson, Custer, Davison, Day, Deuel, Dewey, Douglas, Edmunds, Fall River, Faulk, Grant, Gregory, Hamlin, Huron, Hughes, Kingsbury, Lake, Lawrence, Lincoln, Lyman, McPherson, Meade, Minnehaha, Moody, Pennington, Jerauld, Kings, Knox, Lawrence, Lee, Leslie, Letcher, Lewis, Magoffin, Martin, McCreary, Menifee, Marshall, Owsley, Perry, Pike, Robertson, Trigg, Shelby, Whitley, Wolfe.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL ENERGY REGULATORY COMMISSION, DEPARTMENT OF ENERGY

PART 154—RATE SCHEDULES AND TARIFFS

Modification of Purchased Gas Cost Adjustment Clause Regulations

AGENCY: Federal Energy Regulatory Commission, DOE.

SUMMARY: Order amending Order No. 13 which amended the Federal Energy Regulatory Commission's purchased gas cost adjustment clause regulations to limit the number of purchased gas cost adjustments to two a year.

No. 13 and makes some clarifying modifications to that order.

FOR FURTHER INFORMATION CONTACT:

On October 18, 1978, as amended by Errata Notice issued October 20, 1978, the Commission issued Order No. 13 which amended the purchased gas adjustment (PGA) clause regulations contained in §154.38(d)(4) of the regulations to limit the number of PGA filings made by natural gas pipeline companies and to permit the collection of carrying charges accrued on balances carried in Account 191, Unrecovered Purchased Gas Costs. On November 3, 1978, the Public Service Commission of the State of New York (New York) filed an application for rehearing and clarification of Order No. 13. On November 17, 1978, Midwestern Gas Transmission Company (Midwestern) and Western Gas Interstate Company (Western) each filed an application for rehearing of Order No. 13. For the reasons stated below, the Commission shall grant in part and deny in part the applications for rehearing of Order No. 13. In addition, the Commission shall make some clarifying modifications to Order No. 13.

New York argues that Order No. 13 continues to treat the flow-through of pipeline supplier rate increases on a discriminatory basis from the flow-through of pipeline supplier refunds. Specifically, New York alleges that while carrying charges are permitted on positive balances in the deferred account, which result when the pipeline has underrun automated its purchased gas costs, there are no similar interest provisions which negative balances occur, which result when the pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions when negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provisions which negative balances result when a pipeline has overcollected its purchased gas costs. New York is particularly concerned about the alleged lack of interest provision
current rate of interest on pipeline refunds prescribed by the Commission. Thus it will not be necessary to delete the first paragraph of the old clause (iv), New York is correct and this error shall be corrected.

Finally, New York urges that the Commission substantially modify Order No. 13 to provide that pipeline supplier refunds received by a pipeline be flowed through within 30 days of the date they are received if they exceed $10,000,000 or 1% of the purchasing pipeline's jurisdictional revenues for the last calendar year, whichever is lower, in a manner consistent with the pattern of payment of the excess charges. New York argues that the distributor and direct industrial customers of a pipeline supplier making refunds from its general section 4 rate increase filing receive refunds sooner than the customers of that pipeline supplier's pipeline purchasers because the refunds are credited to the pipeline purchasers' Accounts 191. In addition, New York is concerned that the customers of the pipeline purchasers who receive the effect of these refunds may not receive them in proportion to the amount of excess charges they actually paid, subject to refund.

The Commission shall not adopt New York's suggested modification to Order No. 13. The alleged discrimination between the direct industrial and distributor customers versus the pipeline purchaser customers of a pipeline supplier is taken into account by the carrying charge and interest provisions governing balances in the pipeline purchaser's Account 191. Thus, the customers of the pipeline supplier will be adequately compensated for the time value of the refunds received by the pipeline purchaser from the pipeline supplier and placed in the pipeline purchaser's Account 191 in any event. New York's proposal to require all pipeline supplier refunds above a certain level to be flowed through on a lump sum, as-billed basis is beyond the scope of the Notice of Rulemaking in this docket. However, the Commission shall continue to monitor this issue and to determine whether future amendments to the PGA clause regulations are necessary.

Midwestern argues for a special exemption for its Northern Division to permit the simultaneous flow-through of major increases in its Canadian supplier rates. Midwestern indicates that it is willing to agree to a once a year adjustment date (January 1).

New York also alleges that in promulgating the new §154.38(d)(4)(iv), the Commission erroneously did not delete the first paragraph of the old clause (iv), New York is correct and this error shall be corrected. The new clause (iv) was intended as a replacement for all of the language in the old clause (iv).

for Canadian supplier increases accrued in its Account 191 resulting from the fact that monthly adjustments are made to its Canadian supplier in Canadian, rather than U.S. dollars and the fact that volumes are purchased on a Btu, rather than an Mcf basis. However, the Commission is concerned about the financial impact which may result from its having to carry a large increase in purchased gas costs in its Account 191 for any length of time.

Midwestern's request shall not be granted. Midwestern, like other pipeline suppliers, will be permitted to accrue and collect carrying charges on amounts carried in its Account 191. To the extent carrying charges do not adequately protect Midwestern, it may file a general section 4 rate increase case to reflect, among other things, changes in purchased gas costs if it can demonstrate the need for waiver, as described in more detail in Order No. 16 issued this day in Docket No. RM79-1.

Western requests that its adjustment dates be changed from February 1 and August 1 to May 1 and November 1 so that it may better track changes in purchased gas costs flowed through by its major suppliers, El Paso Natural Gas Company (El Paso) and Colorado Interstate Gas Company (CIG) which have adjustment dates of April 1 and October 1, respectively. For good cause shown, Western's request shall be granted.

For purposes of clarification, the Commission notes that filings made during the effectiveness of a pipeline's old PGA clause shall be governed by the filing dates in their old PGA clause even if the proposed effective date occurs after the pipeline's old PGA clause has expired. Similarly, filings made on or after the date the new PGA clause becomes effective shall be made in accordance with the procedures (including adjustment dates) prescribed by the new PGA clause.

Section 154.38(d)(iv) erroneously required that all pipelines must utilize Account 731.1 in conjunction with Account 191. The Uniform System of Accounts provides that only Class C and B pipelines use Account 731.1 and that Class A and B pipelines should use Account 805.1 in conjunction with Account 191. Section 154.38(d)(4)(iv)(b) will be amended to correct this error.

Order No. 13 also erroneously eliminated the requirement contained in the old §154.38(d)(4)(iv)(b) of the PGA regulations which prescribed instructions for calculation of the surcharge to recover amounts accumulated in the pipeline company's Account 191. Accordingly, the revised §154.38(d)(4)(iv)(b) promulgated in Order No. 13 shall be amended in this order to reinstate those instructions.

For purposes of clarification, we shall republish the amendments to §154.38(d)(4) as promulgated in Order No. 13 and the Extra Notice, as amended in the instant order.

In consideration of the foregoing, Part 154, Chapter I of Title 18, The Code of Federal Regulations is amended as set forth below, to become effective January 1, 1979.

By the Commission.

Lois D. Cashell, Acting Secretary.

1 Section 154 is amended in subparagraph (4) paragraph (d) by revising subdivision (iv) and by adding a new subdivision (viii) to read as follows:

§154.38 Composition of rate schedule.

(1) Statement of rate.

(d) * * * * * * * * * * * *

(4) * * * * * * * * * *

(iv)(c) Rate changes which reflect both the current cost of purchased gas and a revised surcharge to clear the amounts accrued in the deferred account for both producer and pipeline suppliers shall be computed and filed not more frequently than semi-annually. The PGA clause shall specify dates of adjustment as follows:

January 1, and July 1

Alabama-Tennessee Natural Gas Company
East Tennessee Natural Gas Company
Consolidated Gas Supply Corporation
Midwest Gas Transmission Corporation
Paso Natural Gas Company (El Paso) and Colorado Interstate Gas Company (CIG)

DECEMBER 31

Northern Natural Gas Company

To assure recovery of all purchased gas costs, the Commission has prescribed deferred purchased gas cost accounts. For Class A and B natural gas companies, the deferred account is "Account 191, Unrecovered purchased gas costs," 18 CFR Part 201, Balance Sheet Accounts, 191 and is used in conjunction with "Account 305.1, Purchased gas cost adjustments," 18 CFR Part 201, Balance Sheet Accounts, 305.1. For Class C and D natural gas companies, the deferred account is "Account 191, Unrecovered purchased gas costs," 18 CFR Part 201, Balance Sheet Accounts, 191 and is used in conjunction with "Account 731.1, Purchased gas cost Adjustments," 18 CFR Part 201, Balance Sheet Accounts, 731.1. Pipelines using deferred accounting procedures shall be subject to the provisions of these accounts. In order to qualify for carrying charges, the company is required to adopt the principles of interperiod income tax allocation in connection with the balances recorded in the unrecovered purchased gas cost account.

(c) Carrying charges shall be computed based on the ending balances in Account 191, exclusive of accumulated interest each month. Interest will not be compounded. The rate for computation of carrying charges shall be the current rate of interest on pipeline refund established by the Commission. Carrying charges shall be debited to Account 191 if the ending balance in Account 191 for the month is positive and shall be credited to Account 191 if the ending balance is negative. The carrying charges shall be computed monthly on the net balances in Account No. 191 and the related amounts in Account Nos. 283 or 180, as appropriate, as of the end of the immediately preceding month.

(d) After the initial 6-month period following the effectiveness of the PGA clause and after the company has chosen to maintain an unrecovered purchase gas cost account (Account No. 191) the company shall adjust its rate(s), either positively or negatively, to include a surcharge to recover or return the balance which has accumulated in the unrecovered purchase gas cost account (Account No. 191) in the preceding 6-month period. This procedure will be followed in each succeeding 6-month period.

(viii) Pipelines must file tariff sheets pursuant to this part to conform their existing PGA clauses on or before December 1, 1978, which shall become effective as of January 1, 1979. After January 1, 1979, a pipeline shall not be permitted to track changes in purchased gas costs under a PGA clause unless the PGA clause in effect at that time conforms to the rule promulgated in Order No. 13, as modified by Order No. 13-A140(FR Doc. 78-33675 Filed 11-30-78; 8:45 am)

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 559—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Monensin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The regulations are amended to reflect approval of a supplemental new animal drug application (NADA) filed by Eliancos Products Co., providing for the use of monensin in a liquid feed supplement.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

William D. Price, Bureau of Veterinary Medicine (HAV-123), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3442.

SUPPLEMENTARY INFORMATION: Elianco Products Co., a Division of Eli Lilly and Co., P.O. Box 1750, Indianapolis, IN 46206, filed a supplemental NADA (95-735V) providing for the use of monensin in a liquid feed supplement. The liquid supplement must be thoroughly mixed with grain and/or roughage before feeding to cattle being fed in confinement for slaughter.

Concentrate feeds containing 1 to 30 grams of monensin per ton, when manufactured from dry supplements containing not more than 1.260 g of monensin per ton are not required to comply with the ministerial requirements of section 512(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(m)). Because the drug level in the liquid supplement is the same as in the dry supplement, and the drug is used for manufacturing and identical complete feed, the waiver of the requirements of section 512(m) of the act applies to liquid as well as dry feed supplements. The basis of the waiver of the requirements of section 512(m) of the act for dry supplements was published in the Federal Register of December 16, 1975 (40 FR 58689).

Approval of this supplement does not constitute reaffirmation of the safety of residues resulting from use of this drug.

In accordance with the freedom of information regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
data and information submitted to support this approval is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFA-308), Room 4-46, 5500 Constitution Avenue, N.W., Washington, D.C. 20224. The summary is also available for public examination at the office of the Chief Counsel, Internal Revenue Service, Washington, D.C. 20822, and for public examination at the office of the Director, Bureau of Veterinary Medicine, Rockville, Md. 20857, from 9 a.m. to 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 350b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.83), §558.355 is amended by adding paragraph (c)(3), revising paragraph (d)(3), adding paragraph (d)(15), and revising paragraph (f)(3)(ii)(b) to read as follows:

§ 558.355 Monensin

(c) * * *

(3) Liquid feed supplements contain 90 to 120 percent of the labeled amount of monensin activity. (d) * * *

(3) Complete cattle feeds manufactured from dry or liquid feed supplements that contain not more than 1,200 grams of monensin per ton and that comply with the provisions of paragraph (c)(3) of this section are not required to comply with the requirements of section 512(m) of the Federal Food, Drug, and Cosmetic Act. (f) * * *

(3) * * *

(1) * * *

(b) Limitations. Feed only to cattle being fed in confinement for slaughter. Feed continuously in complete feed at a rate of 50 to 360 milligrams of monensin per head per day; as monensin sodium. Complete feeds may be manufactured from monensin liquid feed supplements. The liquid supplements contain a minimum of 20 percent molasses in combination with any of the following feed ingredients or their equivalents: condensed fermentation solubles, whey, ammonium polyphosphate, sodium hydroxide, phosphoric acid, fat, sulfuric acid, attapulgite clay, water, urea, vitamins, and/or minerals; a pH of 4.3 to 6; agitate the supplement until homogenous prior to use; mix thoroughly with grain and/or roughage prior to feeding. Do not allow horses or other equines access to feed containing monensin. Ingestion of monensin by horses has been fatal.

* * * * *

Effective date. This regulation shall be effective December 1, 1978. (Sec. 512(i), 82 Stat. 347 (21 U.S.C. 350b(i))).

Teresa Harvey,
Acting Director, Bureau of Veterinary Medicine.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER C—EMPLOYMENT TAXES

PART 31—EMPLOYMENT TAXES; APPLICABLE ON AND AFTER JANUARY 1, 1955

Modification of requirements for depositing certain employment taxes

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the requirements for the deposit of certain employment taxes. These regulations affect certain employers who, because of noncompliance with employment tax procedures, are required to file employment tax returns monthly.

EFFECTIVE DATE: The regulations are effective with respect to aggregate amounts of taxes (as defined in paragraph (a)(1)(iii) of §31.6302(c)-1) that are undeposited on or after January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

Background

On June 27, 1975, the Federal Register published proposed amendments to the Employment Tax Regulations (26 CFR Part 31) under section 6302 of the Internal Revenue Code of 1954 (40 FR 27240). A public hearing was held on October 22, 1975. After consideration of all comments regarding the proposed amendments, a portion of those amendments is adopted by this Treasury decision.

EXPLANATION OF PROVISION ADOPTED

Under previous regulations, an employer who, because of noncompliance with employment tax procedures, was required to file monthly rather than quarterly employment tax returns was excepted from the general deposit requirement. Unless notified by the district director to make deposits pursuant to a special two-banking-day rule, such an employer needed only to pay the tax by the date on which the monthly return was due—a distinct advantage for a taxpayer who would otherwise fall within the more stringent two-banking-day requirements.

EXPLANATION OF PROVISIONS NOT ADOPTED

The notice of proposed rulemaking contained an amendment to the employment tax deposit requirements which was designed to ease the administrative burden on small businessmen resulting from the existing requirements relating to depositing those taxes. A substantial number of comments were received in response to those proposed new rules, and a public hearing was held at which a number of issues were raised. For example, an organization of accountants opposed the proposed elimination of the requirement that employers having undeposited taxes of $200 or more at the end of a month deposit those taxes during the following month. The accountants felt that many small businessmen would use these funds for other business purposes and be unable to pay them over when due. Others suggested that the change from the present system of monthly deposits for small businesses to a system where less frequent deposits are required, with the deposit requirement determined by reference to the dollar liability that accumulates and not by reference to a fixed calendar date, would actually make compliance more difficult for these small businesses. Accordingly, it has been concluded that the existing regulations should be retained. It should be noted, however, that alternative solutions to the problem are currently under active consideration.

Under the amendment as proposed, the quarter-monthly employment tax deposit requirements to which larger
employers are subject were revised to eliminate the 90-percent exception. In view of the fact that many larger employers do not have the data to make timely quarter-monthly deposits with 100-percent accuracy, this Treasury decision does not remove the 90-percent “safe-haven” provision.

**DRAFTING INFORMATION**

The principal author of this regulation was John M. Coulter, Jr., of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

**ADOPTION OF AMENDMENT TO THE REGULATIONS**

Accordingly, the amendments proposed to paragraph (a)(1)(i) and (ii) of § 31.6302 (c)-1 of the Employment Tax Regulations (26 CFR Part 31) are withdrawn. Paragraph (b)(1) of such section is amended to read as follows:

§ 31.6302 (c)-1 Use of Government depositaries in connection with taxes under Federal Insurance Contributions Act and income tax withheld.

* * * * *

(b) Exceptions—(1) Monthly returns. The provisions of this section are not applicable with respect to taxes for the month in which the employer receives notice from the district director that returns are required under § 31.6011 (a)-5 (or for any subsequent month for which such a return is required), if those taxes are also required to be deposited under the separate accounting procedures provided in § 301.7512-1 of this chapter (Regulations on Procedure and Administration) (which procedures are applicable if notification is given by the district director of failure to comply with certain employment tax requirements).

In cases in which a monthly return is required under § 31.6011 (a)-5 but the taxes are not required to be deposited under the separate accounting procedures provided in § 301.7512-1, the provisions of this section shall apply except that paragraph (a)(1)(iv) shall not authorize the deferral of any deposit to a date after the date on which the return is required to be filed.

**Title 39—Postal Service**

**CHAPTER I—UNITED STATES POSTAL SERVICE**

**PART 111—GENERAL INFORMATION ON POSTAL SERVICE**

**MAILING OF BOOKS BY PUBLISHERS AND DISTRIBUTORS AT THE LIBRARY RATE**

**AGENCY:** Postal Service.

**ACTION:** Final rule.

**SUMMARY:** This rule clarifies and adds certain definitions and conditions to section 135.26(c) of the Postal Service Manual concerning the mailing of books by publishers and distributors to schools, colleges, universities and libraries at the fourth-class library rate of postage. The rule clarifies that books may not be returned to publishers and distributors at the library rate and that the mailing of books to libraries under the rule is limited to books sent to public libraries. The rule also defines the term distributor, specifies that books mailed pursuant to the rule must be addressed to the qualifying institution, and sets forth the circumstances in which books sent to certain bookstores are considered to be sent to schools, colleges, or universities within the meaning of the rule.

**EFFECTIVE DATE:** December 30, 1978.

**FOR FURTHER INFORMATION CONTACT:**

Grayson M. Posts, 202-245-4602.

**SUPPLEMENTARY INFORMATION:**

On February 17, 1978, the Postal Service published for comment in the Federal Register proposed amendments to § 135.26(c) of the Postal Service Manual as described above (43 FR 6972). Interested persons were invited to submit written comments concerning the proposed amendments by March 20, 1978.

The Postal Service received 8 written and 2 telephonic comments in response to its February 17 notice. Seven commenters objected to 135.26(c)(4), which would not permit the return of books to publishers or distributors at the library rate. However, we find no intent on the part of Congress to extend the fourth-class library rate to include books returned to publishers or distributors by schools, colleges, universities or libraries. The clear language of Pub. L. 94-421 provides the library rate only for books mailed from a publisher or distributor to a school, college, university, or library. Several commenters expressed the opinion that books were presently being returned to publishers at the library rate and that adoption of § 135.26(c)(4) would result in an unwarranted rate increase for these materials. Books have never been mailable to publishers or distributors at the library rate. Persons who have made such mailings have done so improperly. The rule we are adopting does not affect the level of postage rates in any way; it only clarifies and defines the scope of materials eligible to be mailed at the library rate.

Three commenters objected to the limitation of the mailing of books by publishers and distributors to public libraries. They favored the inclusion of business, commercial, industrial and private libraries as eligible recipients of books mailed at the library rate. There is no evidence, however, to indicate that Congress intended by the enactment of Pub. L. 94-421 to expand eligibility for the library rate to libraries other than public libraries. Accordingly, we have retained the limitation on eligible mailings to those sent to public libraries. One commenter requested that the Postal Service define the term “public library” as it is used in the library rate regulations. We believe that this proposal has merit and are considering the publication in the near future of a proposed definition of “public library.”

In view of the considerations discussed above, the Postal Service hereby adopts the proposed amendments of 135.26(c) of the Postal Service Manual without change.

**PART 135—FOURTH CLASS**

In 135.2 revise .26c to read as follows: 135.2 Classification

.26 Fourth-Class Library Rate.

* * * * *

c. Books, including books to supplement other books, consisting wholly of reading matter or scholarly bibliography or reading matter with incidental blank spaces for notations, and containing no advertising matter other than incidental announcements of books, when mailed from a publisher to a school, college, university, or public library, may be mailed at the library rate. For purposes of this subsection—

(1) A distributor is an agent, business firm or similar organization whose business is the...
FOR FURTHER violation(s) of the SIP regulations contained in the federally-approved Kansas State Implementation Plan (SIP), Empire District Electric Company’s compliance with the Order will preclude suits under the provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the Order during the period the Order is in effect.

DATES: This rule takes effect on December 1, 1978.

FOR FURTHER INFORMATION CONTACT: Henry F. Rompage, Environmental Protection Agency, Region VII, 1735 Baltimore, Kansas City, Missouri 64108, 816/374-5576.

ADDRESSEES: The Delayed Compliance Order, supporting material, and any comments received in response to this proposal notice setting out the provisions of a proposed delayed compliance order for Empire District Electric Company, Riverton, Kansas. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. One comment and request for a public hearing was received by the Regional Administrator of EPA’s Region VII Office published in the Federal Register, April 13, 1978, a notice setting out the provisions of a proposed delayed compliance order for Empire District Electric Company, Riverton, Kansas. The Order requires the company to bring air emissions from its electric power generating plant at Riverton, Kansas into compliance with certain provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the Order during the period the Order is in effect.

DATES: This rule takes effect on December 1, 1978.

FOR FURTHER INFORMATION CONTACT: Henry F. Rompage, Environmental Protection Agency, Region VII, 1735 Baltimore, Kansas City, Missouri 64108, 816/374-5576.
Riverton into compliance as expeditiously as practicable with Kansas Air Pollution Emission Control Regulation 28-19-31C, a part of the federally-approved Kansas State Implementation Plan. The Order also imposes interim requirements which meet Sections 112(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit Empire District Electric Company to delay compliance with the SIP regulations covered by the Order until June 30, 1979. The company is unable to immediately comply with these regulations.

EPA has determined that the Order shall be effective upon publication of this notice because of the need to immediately place Empire District Electric Company on a schedule for compliance with the applicable requirements of the Kansas State Implementation Plan.

U.S. ENVIRONMENTAL PROTECTION AGENCY

REGION VII

1735 Baltimore

Kansas City, Missouri 64108

(Docket No. VII-78-DCO-6)

In the matter of The Empire District Electric Company, Riverton, Kansas.

Proceeding under section 113(d)(1) of the Clean Air Act, as amended.

ORDER

The following ORDER is issued this date pursuant to section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq. (hereinafter the Act). This ORDER contains a schedule of compliance, interim requirements, and monitoring and reporting requirements. Public notice, opportunity for a public hearing and thirty (30) days' notice to the State of Kansas has been provided pursuant to section 113(d)(1) of the Act.

FINDINGS

On December 16, 1975, The Empire District Electric Company (prior to the issuance by the Environmental Protection Agency of the hereinafter mentioned section 113 Order of December 23, 1975) acknowledged its Units Nos. 7 and 8 were exceeding the levels specified in Kansas Air Pollution Control Regulations 28-19-31A (Particulates) and 28-19-31C (Sulfur). Indirect Testing Equipment—Emissions—Emission Limitations, a part of the applicable Kansas Implementation Plan. The company also then waived the opportunity to confer under 42 U.S.C. 1857c-8(a)(4) (now 42 U.S.C. 7413(a)(4)) and the Environmental Protection Agency duly issued its Order on December 23, 1975, under section 113(a)(1), 42 U.S.C. section 1857c-8(a)(1), specifying compliance schedules as to sulfur and as to particulates.

Pursuant to such 1975 section 113 Order, the company's particulate emissions were reduced below the level specified in Regulation 28-19-31A for Units Nos. 7 and 8 in July, 1977, and the company is not in violation of the schedule of such 113 Order as to sulfur. Units Nos. 7 and 8 continue to emit sulfur in excess of the level specified in Regulation 28-19-31C when burning coal. This determination is based on calculations using fuel data submitted by the company on April 26, 1978.

ORDER

After a thorough investigation of all relevant facts, including public comment, it is determined that the schedule set forth in this ORDER is expeditious as practicable, and that the terms of this ORDER comply with section 113(d) of the Act. Therefore, it is ordered:

1. That The Empire District Electric Company shall comply with the Kansas Implementation Plan Regulation 28-19-31C in accordance with the following schedule on or before the dates specified therein:
   - A. Units Nos. 7 and 8.
     - December 31, 1978—Completion of coal availability and supply study.
     - January 31, 1979—Acquisition of tentatively selected coal for test burns.

2. The results of each weekly air quality analysis shall be submitted to Environmental Protection Agency, Region VII (EPA), Director of Enforcement, no later than fifteen (15) days after the end of each month.

3. That The Empire District Electric Company shall comply with the following interim requirements which are determined to be a reasonable and practicable interim system of emission reduction (taking into account the requirement for which compliance is ordered in section 1, above), and will avoid any imminent and substantial endangerment to the health of persons and is required to comply with Regulation 28-19-31C insofar as Empire District is able to so comply during the period the ORDER is in effect:
   - A. Average monthly sulfur emissions shall not exceed 3.15 pounds per million BTU at any time.
   - B. Sulfur emissions shall be reduced 3.15 pounds per million BTU by June 30, 1979.

4. That The Empire District Electric Company shall comply with the following interim requirements which are determined to be a reasonable and practicable interim system of emission reduction (taking into account the requirement for which compliance is ordered in section 1, above), and will avoid any imminent and substantial endangerment to the health of persons and is required to comply with Regulation 28-19-31C as modified insofar as Empire District is able to so comply during the period the ORDER is in effect:
   - A. Average monthly sulfur emissions shall not exceed 3.15 pounds per million BTU at any time.
   - B. Sulfur emissions shall be reduced 3.15 pounds per million BTU by June 30, 1979.

5. That The Empire District Electric Company shall comply with the following interim requirements which are determined to be a reasonable and practicable interim system of emission reduction (taking into account the requirement for which compliance is ordered in section 1, above), and will avoid any imminent and substantial endangerment to the health of persons and is required to comply with Regulation 28-19-31C insofar as Empire District is able to so comply during the period the ORDER is in effect:
   - A. Average monthly sulfur emissions shall not exceed 3.15 pounds per million BTU at any time.
   - B. Sulfur emissions shall be reduced 3.15 pounds per million BTU by June 30, 1979.

6. That The Empire District Electric Company shall comply with the following interim requirements which are determined to be a reasonable and practicable interim system of emission reduction (taking into account the requirement for which compliance is ordered in section 1, above), and will avoid any imminent and substantial endangerment to the health of persons and is required to comply with Regulation 28-19-31C insofar as Empire District is able to so comply during the period the ORDER is in effect:
   - A. Average monthly sulfur emissions shall not exceed 3.15 pounds per million BTU at any time.
   - B. Sulfur emissions shall be reduced 3.15 pounds per million BTU by June 30, 1979.
reduce the sulfur emissions to or below the level specified in Kansas Regulation 28-19-31C no longer exists.

VII. Violation of any requirement of this ORDER shall result in one or more of the following actions:

A. Enforcement of such requirement pursuant to section 113 (a), (b), or (c) of the Act, including possible judicial action for an injunction and/or penalties and in appropriate cases, criminal prosecution.

B. Revocation of this ORDER, after notice and opportunity for a public hearing, and subsequent enforcement of Kansas Regulation 28-19-31C in accordance with the preceding paragraph.

C. If such violation occurs on or after July 1, 1979, notice of noncompliance and subsequent action pursuant to section 120 of the Act.

VIII. This ORDER is effective immediately.

DOUGLAS M. COSTLE, Administrator, U.S. Environmental Protection Agency.

CONSENT

The Empire District Electric Company agrees that the foregoing is a reasonable interpretation of Kansas Regulation 28-19-31C and consents to and agrees to abide by all the terms of the Order (paragraphs I thru VIII, both inclusive) when issued, but the Company does not in any way hereby admit to any legal violation of such Regulation (or any other Regulation or statute, State or Federal).

Dated: November 18, 1978.

The Empire District Electric Company:

A. R. PUTTHIBARGER, Senior Vice President, Promotion.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

(FFC Docket No. 78-218; FCC 78-714)

PART 63—EXTENSION OF LINES AND DISCONTINUANCE OF SERVICE BY CARRIERS

Spanish International Network; Request for Authorized User Status Under the Communications Satellite Act of 1962

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: This action requires the international common carriers to end the rotational arrangements under which international television transmission service is currently provided. It also changes Commission policy to permit the Communications Satellite Corporation to provide television transmission service to the public directly. These actions are designed to permit more flexibility and customer choice in obtaining international television transmission service.

DATES: Communications Satellite Corporation shall file an application under Section 214 of the Communications Act of 1934 (47 U.S.C. 214) for authority to provide direct television service on or before March 16, 1979. American Telephone and Telegraph Co., Western Union International, Inc., ITT World Communications, Inc., and RCA Global Communications, Inc. shall file applications under Section 214 for authority to remove conditions on their certificates authorizing and requiring rotational arrangements for television service.

REPORT AND ORDER

In the matter of Spanish International Network, request for authorized user status under the Communications Satellite Act of 1962, CC Docket No. 78-218.

1. In this Report and Order we consider changes in our policy and changes in the certificates of various carriers in order to permit more efficient international television program transmission services. This rulemaking grew out of a petition filed by Spanish International Network which questioned whether the current arrangement for providing television service meet public needs. Spanish International sought status as an authorized user under the Communications Satellite Act of 1962 so that it could obtain satellite transmission services directly from Communications Satellite Corporation (Comsat). Interested parties were given an opportunity to file comments and reply comments on this petition. Based on these comments, the Commission adopted Memorandum Opinion and Order, Proposed Rulemaking, FCC 78-516, released July 31, 1978 which reviewed the current arrangements for international television program transmission and proposed changes in our policy to permit Comsat to serve television transmission customers directly.

2. Public Notice of this proceeding was given in the Federal Register on August 2, 1978. Interested parties were given until September 1, 1978 to file comments and until September 11, 1978 to file reply comments. The pleadings filed with respect to the Spanish International petition were to be incorporated into this proceeding.

3. Comments were filed in support of the proposed policy change by Public Broadcasting Service; National Public Radio; the Department of Justice; the Department of Defense; the Department of State; the Department of Commerce; the Department of Labor; the Department of Health,Education and Welfare; the National Science Foundation; the National Aeronautics and Space Administration; and the National Communications System. The pleadings filed with respect to the Spanish International petition were to be incorporated into this proceeding.

4. Comments in opposition to our proposals were filed by Western Union International, Inc. (WUI), RCA Global Communications, Inc. (RCA Globocom) and ITT World Communications

The Commission cannot find that television comes within the "unique or exceptional" standard as it was intended to be applied in the Authorized User Decision. (5 F.C.C. 2d 593 (1967)). However, it is broad enough to be considered as a request for waiver for the policy as it is applied to other similarly situated television customers. Therefore, we will consider Spanish International's petition and grant its request for rulemaking.

The Authorized User Decision, 4 F.C.C. 2d 421 (1967) and the Memorandum Opinion and Order, Proposed Rulemaking, FCC 78-516 discussed above are referred to is discussed more fully in the following paragraphs of this Report and Order.

Therefore ITT Worldcom is denied permission to file the unauthorized pleading alleging that Comsat's provision of television service directly to users would violate the anti-trust laws. ITT Worldcom alleged that the additional pleading was required because it did not have time to adequately brief the issues raised in this proceeding. ITT Worldcom has had four opportunities to address the issues in this proceeding and it had more than four weeks to develop its initial comments on the Commission's proposals. Therefore ITT Worldcom is denied permission to file the unauthorized pleading. We believe, however, that this order does address the concerns the pleading would raise.

separately obtained by the customer which reach the customer's network pick-up point. If one of the other carriers is the carrier-of-the-week, the signal is switched from that carrier's operating center over local loops to the other carrier's operating center and then over other local loops back to the AT&T operating center. At this point, it is interconnected to facilities obtained by the customer which reach the customer's network pick-up point. Comsat charges $1,500 per hour for the satellite circuit. The carriers charge the customer $2,540 per hour for their service.

7. The parties filing in support of our proposed change in policy believe that giving users the option to purchase service directly from Comsat will permit higher quality service, more flexibility in arranging the domestic service, and (2) the facilities which bring the signal to the customer's location. The satellite channel, and all of the required earth station facilities are provided by Comsat. The international carriers purchase Comsat's service and resell it to the public, together with entrance channel facilities located between the earth station and AT&T's operating center in New York. In addition to providing the facilities, the international carriers also monitor signal quality and arrange the foreign end of the service. The domestic entrance channel facilities are owned by AT&T but they are the joined television carriers. If AT&T is the carrier-of-the-week, the signal is connected at AT&T's operating center to facilities that reach the customer which reach the customer's network pick-up point. If one of the other carriers is the carrier-of-the-week, the signal is switched from that carrier's operating center over local loops to the other carrier's operating center and then over other local loops back to the AT&T operating center. At this point, it is interconnected to facilities obtained by the customer which reach the customer's network pick-up point. Comsat charges $1,500 per hour for the satellite circuit. The carriers charge the customer $2,540 per hour for their service.

TENTATIVE CONCLUSIONS IN THE NOTICE

In our Memorandum Opinion and Order and Notice of Proposed Rulemaking we tentatively concluded that direct television service would serve the public interest and would promote the purposes and policies of the Satellite Act. We believed that the public might benefit because of the added flexibility and lower costs that television users would obtain. We further felt that competition in the provision of this service would lead to improved service and would serve as a regulatory tool to encourage cost-based pricing.

9. The evidence before us indicated that the purchase of satellite channels should provide flexibility for television service users with complete flexibility in arranging the domestic portion of the service. Some television users stated that they would establish direct provision of service by Comsat. The international carriers are likely to encourage the carriers to provide more efficient service and to pass on any efficiency savings.

On September 27, 1978, ITT Worldcom requested that the Commission accept an unauthorized pleading alleging that Comsat's provision of television service directly to users would violate the anti-trust laws. ITT Worldcom alleged that the additional pleading was required because it did not have time to adequately brief the issues raised in this proceeding. ITT Worldcom has had four opportunities to address the issues in this proceeding and it had more than four weeks to develop its initial comments on the Commission's proposals. Therefore ITT Worldcom is denied permission to file the unauthorized pleading. We believe, however, that this order does address the concerns the pleading would raise.

10. In addition to the flexibility that would be afforded users by Comsat's entry we also postulated in the Notice that additional competition could encourage carriers to provide service more efficiently and economically, and could serve as a regulatory tool to ensure that the international carriers provide satellite channels at or near their cost.
cieny savings in terms of lower rates. The competitive environment should stimulate the carriers to make available service options attractive to the television users. It is likely to create flexibility in the availability of entrance channels or in the choice of ancillary features such as quality control functions and the arrangements of the foreign end of the service. More flexibility in service arrangements or the benefits of lower rates resulting from competition between the carriers can inure to the public in the form of increased international television programming.

13. The circumstances which justified our original authorization of the carrier-of-the-week arrangements no longer apply. These arrangements were instituted when the Commission first authorized AT&T et al., 38 FCC at 1319-1320. The Commission authorized Comsat to provide service to the major television networks directly, Order and Authorization, 38 FCC 1315 (1965). Each of the international carriers sought authority to provide television program services individually. However, ITT Worldcom challenged the application of AT&T, claiming that television should be considered a record service and that television services should be considered in a substantially degree other forms of record services provided by the international carriers. Id. at 1319. ITT Worldcom's assertion was considered significant because under the TAT-4 Decision, 31 FCC 1151, 1159-61 (1964), AT&T was generally prohibited from providing record services to overseas points. The Commission stated that it wanted to subject these issues to further study, and, therefore, withheld action on these applications. AT&T et al., 38 FCC at 1319-1320. Instead, the Commission authorized Comsat to provide service to the major television networks directly, Order and Authorization, 38 FCC 1315 (1965). In deferring action on the applications the Commission stated that it would seek comment from the carriers upon a plan submitted by WUI proposing a joint service offering. After the international carriers sought reconsideration of the order authorizing Comsat's direct service, the, the Commission adopted, on a temporary basis the joint-service plan which authorized the carrier-of-the-week arrangements, STA For TV Service Via Satellite, supra, 1 FCC 2d at 89-90. This arrangement permitted the Commission to study further the concerns raised by ITT Worldcom and television service. Furthermore, it alleviated a concern expressed by RCA Globcom that AT&T would obtain a competitive advantage because of its virtual monopoly of domestic television transmission facilities. Four years later the Commission formally authorized the carrier-of-the-week authorizations. AT&T et al., 18 FCC 2d 402 (1969).

14. Later, in Public Broadcasting System et al., 63 FCC 2d 701, 721 (1977), the Commission held that "the provision of television service has never been considered to be, nor treated as, a record communications service." ITT Worldcom's prediction that television service would replace existing channel services has not materialized. Circumstances have also changed with regard to AT&T's status as a domestic television carrier. Carriers other than AT&T now provide television service pursuant to competitive policies established in Specialized Common Carrier Decision, 29 FCC 2d 870 (1971), aff'd Sub. nom. Washington Utilities and Transportation Commission v. FCC, 513 F.2d 1142 (9th Cir. 1975), cert. denied 423 U.S. 836 (1975); Domestic Satellite Operating, 22 FCC 2d 86 (1970), aff'd sub. nom. Network Project v. FCC, 511 F.2d 788 (DC Cir. 1975); and Resale and Shared Use, 60 FCC 2d 877, 880 (1977), aff'd in part and rev'd in part 62 FCC 2d 558 (1977), aff'd American Telephone and Telegraph Co. v. FCC, 572 F.2d 17 (2nd Cir. 1978).

*The certificates authorizing the carriers to provide service in accordance with these arrangements are limited in term and can be terminated after notification by the Commission. AT&T et al., supra, 18 FCC 2d at 404, 406-407.

ITT Worldcom has protested the proposed new rule arguing that television transmission service should be considered a record service and subject to the gateway provisions of Section 222 of the Communications Act of 1934, 47 U.S.C. 222. These provisions restrict the domestic record services of carriers defined as international telegraph carriers to a limited number of gateway cities. 47 U.S.C. 222. These provisions means that an international telegraph carrier such as ITT Worldcom cannot provide an international telegraph operation, such as television service, to its gateway city. If the message is destined for the hinterland, ITT Worldcom must interconnect with a domestic carrier authorized to serve that location. See International Scope of Service, 43 FCC 2d 250 (1976). However, the Commission has held that the gateway limitations as international telegraph service. Consequently, no carrier defined as an international telegraph carrier can ever provide television service. ITT Worldcom argues that Comsat should be permitted, these carriers seek to relitigate the issue of whether the Commission has the statutory authority to authorize Comsat to provide television service. See In that proceeding the Commission considered what it specifically recognized to be two separate questions: (1) "the extent to which, as a matter of law, entities in the United States other than Comsat and Comsat can be authorized under the Communications Satellite Act of 1962 to obtain telecommunications services directly from Comsat" and (2) "the extent to which, as a matter of policy, such entities should be authorized to obtain services" 4 FCC 2d at 421. The Commission concluded that, as a matter of law, the Satellite Act empowers the Commission to authorize Comsat to provide service to entities other than common carriers. 4 FCC 2d at 427. The Commission's findings, based on the comprehensive and detailed legal briefs and comments submitted in the Authorized User proceeding and the Commission's own investigation into all relevant sections of the Act, including consideration of the legislative history of these sections, has been the foundation of Commission decision-making for over twelve years. Now, when the Commission proposes to change its policy as to when direct service should be permitted, these carriers seek to relitigate the issue of whether the Commission has the statutory authority to authorize Comsat to provide the direct service.

17. The plain language of the Satellite Act, 47 U.S.C. 735 (a) and (b),

(a) In order to achieve the objectives and to carry out the purposes of this Act, the corporation is authorized to—

(b) Furnish, for hire, channels of communication to United States communications common carriers and to other authorized entities, foreign and domestic,

(b) Included in the activities authorized to the corporation for the purposes indicated in subsection (a) of this section, are, among others not specifically named—

(4) To contract with authorized users, including the United States Government, for the services of the communications satellite system...
clearly authorizes Comsat to furnish channels to "authorized entities" other than common carriers and to contract with authorized users for satellite services. The Act itself does not explicitly define "authorized user" nor does it in any other way limit the Commission's discretion in deciding who may be an authorized user. Basic rules of statutory construction require that full effect is to be given, every clause and word of a statute so that that no clause, sentence, or word will be rendered superfluous, void or of no significance. United States v. Monarch S. & Monarch S. 348 U.S. 528, 538-539 (1955); Petro v. United States 204 F. 2d 446, 449 (8th Cir. 1953), cert. denied, 348 U.S. 832. It is clear from the language of the Act and the application of these principles of statutory construction that direct access to Comsat's service is not limited to common carriers. Moreover, as the Authorized User Decision makes clear, the legislative history of the Act fully supported Commission authority to authorize Comsat to provide direct service to noncarrier entities. On February 7, 1962 President Kennedy submitted a proposal to Congress, calling for establishment of a corporation requiring singular measures not now under a regulatory scheme devised for such purposes. Unlike those carriers, the Corporation requires singular measures not now under a regulatory scheme devised for such purposes.

18. Mr. Newton M. Minow, then Chairman of the Federal Communications Commission, had specifically pointed out to both Senate and House committees that the Act did not authorize user-provisions in the President's bill—in precisely the same language as in the version that was ultimately enacted. The President's bill would permit Comsat to provide direct service only to authorized United States communications common carriers and foreign entities, removing entirely any eligibility for other "authorized users" as now appears in Section 305(b)(4) of the Satellite Act. The Committees that the authorized user version described by Chairman Minow. However, the Committees chose to make no changes in the legislation's authorized user language. Mr. Minow also stated that since, in his view, the proposed legislation did not contemplate a satellite corporation which would be a common carrier serving the public directly, it should not be subject to the requirements of the Communications Act of 1934 applicable to common carriers generally:

Since the Corporation will not function as a conventional common carrier, we believe that it would be impractical to place it under a regulatory scheme devised for such purposes. Unlike those carriers, the Corporation will not furnish service to the general public. Its undertaking rather, will be to furnish channels of communications to relatively few users; namely, common carriers and their foreign counterparts, who do serve the general public. For these and other reasons, certain sections of the Communications Act relating to common carriers may not be germane to the Corporation, while at the same time the unique status of the Corporation requires singular measures not now present in the act. (Hearings on H.R. 10115 before the House Committee on Interstate and Foreign Commerce, 87th Cong., 2nd Sess. at 407 (1962).)

However, Congress could not have agreed with Mr. Minow's view of Comsat as exclusively a carrier's carrier because it later adopted a provision which subjected Comsat to all of the common carrier provisions of the Communications Act of 1934, except where those provisions were inconsistent with the Satellite Act.

19. In the Authorized User proceeding the international carriers contended that the Satellite Act contained no standards pursuant to which the Commission might authorize access by a non-carrier entity. The Commission disagreed, finding that the Satellite Act and the Communications Act of 1934, 47 U.S.C. 151, et seq., which is expressly incorporated into the Satellite Act, does provide guidelines for making determinations of this kind. 47 U.S.C. 721(c)(11); 4 FCC 3d at 4292. The determination which subjected Comsat to all of the common carrier provisions of the Communications Act of 1934, except where those provisions were inconsistent with the Satellite Act.

Mr. Minow reiterated his restrictive view of the provisions of the Satellite Act throughout the course of the hearings. See e.g., Hearings on S. 2814 before the Senate Commerce Committee, 87th Cong., 2nd Sess. at page 936, 1977, overall revenues: $168,187,973, Statistics of Common Carriers, to be published December 1979).

*Hearings on S. 2814 before the Senate Committee on Commerce, 87th Cong., 2nd Sess. at page 116 (1962). See also, Hearings on H.R. 10115 before the House Committee on Interstate and Foreign Commerce, 87th Cong., 2nd Sess. at page 408 (1962). (Although Congress rejected Minow's amendment to limit the definition of authorized user, it did adopt his amendment granting the Commission broad authority to develop rules and regulations to address changing circumstances. 7 U.S.C. 307(a)(4)).
tion within any class" (47 U.S.C. 303(b)); study new uses for radio and generally encourage the larger and more effective use of radio in the public interest (47 U.S.C. 303(b)); and make such rules and regulations and prescribe such restrictions and conditions, not inconsistent with laws, as may be necessary to carry out the provisions of the act (47 U.S.C. 303(c)). The Self-regulation rulemaking, and "it is the interest of Congress that all authorized users shall have nondiscriminatory access to the system" and "that the corporation created under this act be so organized and operated as to reasonably assure that access to the telecommunication services in the provision of communications services to the public" 47 U.S.C. 701(c). The Commission is directed to "make rules and regulations to carry out the provisions of this act" (47 U.S.C. 721 (O(1)).

20. Congress was well aware that satellite telecommunications was in its infancy, and it provided broad standards to be followed by the Commission in guiding it. Rather than to set down specific or detailed criteria for regulation. Therefore, we have determined that our judgment in this area must be based upon an evaluation of the often changing situation and the Congressional concern with the public interest. That concern is reflected in: (1) Encouraging wider and more effective use of radio techniques; (2) assuring that competition is maintained and strengthened in the provision of communication services to the public; (3) assuring that the telecommunications system shall be available to all authorized users on a nondiscriminatory and equitable basis; and (4) assuring that the benefits of new technology shall be reflected in service made available to the public through both improvements in the quality of service and the realization of all possible economies. The standards established by the Communications Act for authorizing carriers to provide service to the public are applicable to satellite services as well as other telecommunications services. 4 FCC 2d at 426-427. Under these guidelines it is clear that the Commission can "authorize Comsat to afford access to the satellite system by non-carrier entities upon a proper finding that such access would serve the public interest and comport with the purposes and policies of the Satellite Act." 4 FCC 2d at 426.

21. Having concluded that, as a matter of law, the Commission has the authority and obligation to exercise its discretion to determine whether to permit direct service, the Commission then considered applying the facts before it, what policy it should develop in determining whether direct service proposals are in the public interest. We concluded that, as a matter of policy, Comsat would be authorized to deal directly with users "in only those instances where the requirement for satellite service is of such an exceptional or unique nature that the services are needed on account of the peculiar needs of the customer and, therefore, cannot be provided within the terms and conditions of a general public tariff offering." 4 FCC 2d at 431. The rationale for the rule concluded that in the Commission's concern that if Comsat provided the licensed channel services which were sought by a number of the petitioners in the Authoritative User proceeding, there was the potential that it would siphon off this business from the carriers. The Commission was concerned that this would force rate increases by the carriers for basic telephone and telex services in order to meet their revenue requirements. Since the direct service would benefit only a few large users to the potential detriment of the vast majority of users, it was believed that, unless the clause allowing competition for leased channel service between Comsat and the international carriers would be derogation of the Satellite Act's objective to make the benefits of lower satellite communications rates available to all users. 4 FCC 2d at 433. Thus the Commission decided to limit Comsat's direct service to exceptional or unique circumstances.

22. The international carriers now claim that the Commission can never change this policy or waive its requirements. It is, however, proper for the Commission to modify or even reverse a prior decision. See e.g., FCC v. WOKO, 329 U.S. 223, 227-228 (1946); Aspen Institute F.C.C. 55 F.C.C. 2d 697 (1975) aff'd sub nom. Chisholm v. F.C.C., 533 F. 2d 349 (D.C. Cir. 1976) cert. denied 429 U.S. 890 (1976). The International carriers further argue that the Satellite Act itself requires that the Commission be guided by the broad standards contained in the Act's regulatory scheme, rather than rigid and detailed criteria. The application of these broad standards and the conclusion that the Commission must use its informed discretion in applying them is fully supported by the legislative history of the Act.

Mr. KATZENBACH. While we are off on another subject I have been alarmed about the idea that we are talking only about voice communication. That is what A.T.&T. is engaged in largely.

Suppose we want to use this system for direct television, navigation, weather, meteorological, or if they wanted to send data, or somebody else wants to send data over this system, or to use it from plane to plane. What right is the Government going to have to dictate that it has to be used on some reasonable terms for these other purposes?

Mr. KATZENBACH. Well, sir, there are provisions in the bill, in the administration proposal, which guarantee— the provisions themselves don't guarantee, but which tell the Federal Communications Commission to guarantee equitable access to all authorized users. Now as Dr. Welsh said—

Mr. KATZENBACH. Who are the authorized users?

Mr. KATZENBACH. People licensed by the FCC.

"In the Aspen Institute case, the Commission reversed a statutory interpretation that had existed for more than ten years, and exempted from the equal time requirements of the Communications of 1934 (47 U.S.C. 315(f) candidates' party and debates between political candidates. The Court of Appeals in Chisholm affirmed the Commission's reversal of its policy. In Chisholm the court stated that when an agency changed an established policy it should indicate that a policy is being changed and it should follow the rule of law." (538 F. 2d 364.) In a related case where the Court of Appeals also confirmed that the FCC acted properly in reversing its equal time policy, the court stated that to change policy the Commission must "provide a reasoned basis for its action, fully explaining the course it has taken in light of legal and policy issues." (United Church of Christ v. F.C.C. No. 76-1878 (Sipalese p. 37)) (D.C. Cir., decided Nov. 11, 1978.) The Court further stated that the Commission must meet the requirements of "a reasoned opinion explaining its action, and (allow) * * * interested parties who may be adversely affected by the proceeding * * * an opportunity to comment on the matter before the agency." (Id. at 15.) (See also, e.g., Greater Boston Televisi-
23. Moreover, the legislative history supports the conclusion that the Commission's discretion to permit direct service is not limited to situations where Comsat would not compete with the carriers. When Congress was considering the various proposals for privately-owned satellite systems, there was considerable discussion of whether the earth stations to be owned by the common carriers or by Comsat. See e.g. S. Rep. No. 1584, 87th Cong., 2nd Sess. (1962). The issues of earth station ownership, and the direct service are inextricably related because if Comsat did not obtain an ownership interest, direct service to non-carrier entities would be effectively prohibited since users would still have to obtain access to the satellite system through the international carriers. H.R. 11040, when reported out of the House Committee on Interstate and Foreign Commerce, left the question of who should own the earth stations to the Commission's discretion. However, the bill contained language expressing a preference for common carrier ownership of the stations. H.R. 11040, section 201(c)(7), 87th Cong., 2nd Sess. (1962). The Committee report explained these provisions as follows:

"It is not the intent of the committee that these provisions limit in any way the Commission in determining what meets the public interest, convenience, and necessity. It is, however, the intent of the committee that in exercising its licensing functions in this respect and in determining who is to be licensed, the Commission shall give consideration to all relevant factors, including such things as the amount and nature of the communications services which are being rendered and which are to be rendered by individual communications common carriers..."

As adopted, the preference for common carrier ownership was removed and the Commission was given complete discretion in developing earth station ownership policies to consider such factors as the need for effective competition among the corporation and the carriers in providing telecommunications services. 47 U.S.C. 721(c)(7).

B. PUBLIC INTEREST ANALYSIS

24. Given this description, we shall now determine whether provision of direct television service by Comsat would serve the public interest. In the provision of the satellite channel the international carriers provide nothing which the international channel service is not to be supplied by Comsat. While many users may require the end-to-end service provided by the international carriers, there is no operational reason why a consumer of such service should have an international carrier to obtain only the satellite channel. In fact, requiring the user to go through this extra layer only creates a greater potential for service mix-ups than if the service was ordered directly from the entity which actually provided it. This is a particular concern in international television transmission where news and special events programming requires immediate availability and quick and efficient processing of service orders and changes. The television users argue that in the past there have been service mix-ups and delays. While the international carriers may argue that the facts of the particular instances described, the extra service layer clearly creates the potential for service errors. Given the fact that the international carriers do not provide any direct service in addition to the service provided by Comsat, there is no operational necessity for the user to be required to be subjected to this potential. Therefore, if the user does not desire end-to-end service or desires to be served directly through a special purpose earth station, it makes operational sense to give him the option to purchase the satellite service directly from Comsat.

Comsat's entry would have additional benefits in the sense that it would provide a useful regulatory benchmark. Comsat would provide to direct users only the transparent satellite channel terminating at the U.S. earth station rather than end-to-end service. To the extent that Comsat's costs of providing service to the carriers is the same as the service it provides to television users directly, it will enable the Commission to charge similarly to the carriers and direct users. If the international carriers are to remain competitive with Comsat in providing this channel, their charges will have to reflect its true cost. If, on the other hand, Comsat's costs of providing direct service are higher than its costs of providing this channel to the carrier, the direct users rates will at least serve as a benchmark for the prices charged by the carriers."

26. We believe that authorizing Comsat to provide direct service to television users is consistent with the rationale of the Authorized User Decision. Since we originally expressed this belief in the Notice, The carriers have not provided any evidence which would lead us to change our tentative conclusion. As indicated in paragraph 21, supra, in the Authorized User Decision the Commission found that permitting Comsat to provide direct service could divert leased channel revenue from the licensed international carriers to Comsat, necessitating rate increases for the other public services of the carriers such as message telephone service or telex. This was determined to be a "detriment to the vast majority of the users who are the so-called few large users."

As set forth by the U.S. Supreme Court in F.C.C. v. RCA Communications, Inc., 346 U.S. 65, 96-97 (1953), the criteria for authorizing additional competition are two-fold: (a) There must be grounds for reasonable expectation that competition may have some beneficial effect; and (b) competition must be reasonably feasible. The earlier sections of this order demonstrate that there are reasonable grounds to conclude that the additional competition provided by eliminating the rotational arrangements and the
provision of direct service by Comsat may be reasonably expected to have some beneficial effect. We shall now consider whether competition is reasonably feasible.

29. There is a range of opinion among the carriers pleading in this proceeding as to the degree of competition reasonably feasible. The provision of international television transmission service. WUI assumes that competition among the four international carriers is reasonably feasible and has requested authority to withdraw from the rotational arrangement. AT&T, ITT Worldcom and RCA Globcom, to varying degrees, suggest that the Commission may wish to explore this possibility. Thus, none of these four carriers assert affirmatively that competition among themselves is not feasible, but all question the feasibility of the added competition which would be provided by Comsat.

30. As pointed out by ITT Worldcom in its comments, the Commission established its basic formula for determining the feasibility of additional competition in Mackay Radio Telegraph Co., Inc. 28 FCC 231 (1969). The Commission there stated:

"It appears to us that feasibility of competition depends on whether there is sufficient traffic to support the addition of another competing direct circuit and upon the effect of the opening of such circuit upon the applicant as well as all other carriers providing service to the public." (28 FCC at 239)

We would note at the outset that there is a significant difference between the factual situations present in both the Mackay and RCA cases and the instant situation. In both of the former cases, the Commission was being asked to approve the establishment of entirely new direct high frequency radio circuits to points where other carriers already had established such circuits. The applicant carrier was asking whether the new circuits, or the existing circuits, would be fully utilized was an efficient allocation of the scarce high frequency radio spectrum. (See e.g. Mackay, 28 FCC at 232, para 44).

31. Neither the abolition of the rotational arrangement nor Comsat's direct provision of television service from the existing earth stations involves the construction of duplicate satellites or earth stations or the use of additional frequencies or capacity in the existing satellites. This will not require substantial new capital investments or put substantial existing capital at risk. The basic difference is that the operational plan is abolished and Comsat is permitted to provide direct service from the existing earth stations.

32. As indicated in paragraph 6, supra, all of the carriers lease the satellite and terrestrial facilities for the period the customer desires service. These facilities can be leased for periods as small as ten minutes. In the case of AT&T, it owns the terrestrial circuits it leases to the customer. If the rotational arrangement is abolished, exactly the same facilities will be used in the same manner. The sole difference will be that the carrier providing service to the customer will be determined by the customer rather than the calendal. Comsat will still lease the same satellite capacity from INTELSAT and, in turn, lease it and the same earth station capacity to the customer-chosen carrier and then lease the same terrestrial circuits and operating office equipment will be used in the same manner. Since competition will determine which carrier is selected, the amount of time that the satellite and terrestrial circuits will be leased by AT&T to an IRC rather than to the ultimate customer will change. Likewise, the use made of, and the revenue generated by, each carrier's investment in equipment associated with television service at its operating office could shift among the carriers.

33. If Comsat is permitted to provide direct service from the existing earth stations, the same earth station and satellite facilities will be used. Comsat would either lease this capacity to one of the international carriers or directly to the customer. The impact of Comsat's provision of television service on the international carriers would be the same as if AT&T were to obtain the customer; they would not derive revenues on their investment in the equipment in their operating offices used for the provision of television service from the customer. The effect on AT&T could be to further alter the amount of time it leases the terrestrial circuits to another carrier rather than the ultimate customer.

34. Another potential effect that would occur on AT&T if a customer or a carrier should seek to establish additional transmission facilities to the earth stations is that AT&T's terrestrial facilities between the earth station and a carrier's operating office will not be utilized. However, construction of any such facilities would require Commission authorization and would not be certified if found to be detrimental to the public interest. Thus, none of these four carriers asserts that construction of additional facilities would be feasible.

35. It is clear from the foregoing that elimination of the rotational arrangement and permission for Comsat to provide television transmission and reception service directly to customers from the existing earth stations will not require duplication of facilities or substantial additional capital investment, or put substantial existing capital investments at risk. The only facilities put at the risk of reduced use is the equipment at the customer's location. We would expect that the amount of equipment involved is relatively small, namely, an investment in signal quality control equipment and a limited switching ability. AT&T may also run this risk. However, since it has already committed itself to the construction of WUI, ITT Worldcom and RCA Globcom dedicated to television service, AT&T will have to incur the costs of constructing the additional facilities that will compete with Comsat.

36. RCA asserts that the carriers will not be able to effectively compete with Comsat because Comsat would be supplier of the satellite circuit to the transmitting office, AT&T, RCA, and ITT would have to be certified to provide television service. This conclusion is based on the Commission's statement in the Notice that, "presumably, Comsat would charge its customers—whether television users or international carriers—the same rate for satellite service." (Notice, p. 7) This statement assumed that Comsat's costs of serving the carriers are the same as its costs of serving television users directly. However, as discussed in the next section, the carriers allege that Comsat's costs in serving users directly should exceed its costs of serving carriers. On further consideration of our original presumption, we find it questionable whether Comsat could, in
37. Even if the carriers obtain the satellite circuit at the same rate as direct users and must bear overhead costs of obtaining that circuit in the rate at which they resell it, they would have countervailing competitive advantages over Comsat which are likely to mitigate the effect of this price differential. More importantly, Comsat would be authorized to provide only the transparent channel rather than end-to-end service. The international carriers, on the other hand, can provide service directly at a price. For users desiring the option of contracting with only one carrier to fully arrange all aspects of the service, this complete service is likely to prove quite attractive.

38. The international carriers have further advantages over Comsat. The carriers have been in the international television service market for years. Presumably they have developed working relationships with their customers which may be sustained despite Comsat's entry.

39. In the event that Comsat can justify the same rate for both carriers and television users and the carriers have to include the overhead costs in the resale price, we believe that the customer should be able to decide for itself whether any premium paid to obtain service from the international carriers is worth the price. As we have stated, the overhead costs are extra costs associated only with the reselling of Comsat's satellite circuit and are not necessary to the provision of service. It is not in the public interest to burden users with these costs if the user does not believe that the costs are balanced by the countervailing benefits. We believe that compelling the customers to deal with the carriers rather than providing them with the option of obtaining service in the way that best meets their needs would not be protecting competition but, rather, would be protecting competitors.

**PRICE DISCRIMINATION AND CROSS-SUBSIDIZATION**

40. Several of the international carriers assert that the Commission needs more information to make a well-reasoned evaluation of whether Comsat should be permitted to offer international television service directly to users. Specifically, these carriers argue that Comsat should file with the Commission its proposed rules and regulations for television services as well as its costs of providing service and resultant proposed charges to users. The carriers' claim that the Commission needs this information for several reasons. First, it is asserted by ITT that if Comsat serves users as well as carriers, it will have an incentive to predatory and unfairly charge high rates to the latter and lower rates to the former. Furthermore, both ITT and WUI argue that if Comsat were to provide service directly to the user, it would be an entirely different service than Comsat provides to the carriers, thus mandating a different rate. WUI claims that while Comsat only provides the carriers with a basic satellite channel, direct service to users would force Comsat to also provide coordination of the alignment of foreign and domestic facilities, scheduling of programs, quality control and conditioning of the television signal, maintenance and testing of all circuits, technical coordination of all segments of the transmission path and billing, accounting and customer relations. ITT adds that extra costs to be borne by Comsat would include the cost of marketing to direct users and the cost of uncollectables. ITT further states that if Comsat were to provide service to users at the same rate it charges the carriers, it would have to cover all its costs. These are by illegal subsidization from other services. ITT believes that this concern increases the need for Comsat to file an informal tariff.

41. While the carriers argue extensively about possible predatory pricing by Comsat, their arguments are simply speculative. The concerns of the carriers that Comsat would more appropriately raise after Comsat has filed its tariff for direct use. It is then that any attempts at predatory or unfair pricing will surface and be disposed of. Furthermore, at this juncture, we are only considering Comsat's provision of satellite service. In light of this, we believe that it would be very difficult for Comsat to engage in predatory pricing without detection by the Commission.

42. Other than the need to prevent illegal pricing, which will be handled within the context of specific authorizations, we have not raised, and we do not see any other reasons, to require Comsat to file an informational tariff. Comsat's costs to provide service and the resulting prices it charges have little or no relationship to whether Comsat should be permitted to enter the market. If, as ITT and WUI assert, Comsat's costs and charges are higher to users than to carriers, the carriers should be able to offer a cheaper rate to users than Comsat itself can. If this is the case, the user will have to decide whether obtaining service directly from Comsat is worth the premium it must pay to do so. We emphasize, however, that this is precisely why we believe it is in the public interest to permit Comsat's entry into the market; the customer will be afforded more flexibility of choice.18

18. In addition to requesting that Comsat submit this tariff information WUI requests that the Commission hold an evidentiary hearing and oral argument to consider the issues raised. However, as we have stated, the question as to whether Comsat's rates involve predatory pricing is more appropriately addressed in an evidentiary proceeding after the tariff actually is filed. An investigation into whether Comsat could engage in predatory pricing and the effect of such pricing would involve speculation. The other issues in this proceeding involve policy considerations, the determination of which would not be furthered by cross-examination in an evidentiary hearing. The two sets of both comments and replies in this proceeding have provided adequate opportunity to define and address all the issues raised. We, therefore, see no need either for an evidentiary hearing or oral argument and WUI's request is denied.

43. The international carrier pleadings in this proceeding contain a variety of assertions that if Comsat is permitted to provide television service directly to the public, the carriers should be permitted to do so as well. With INTELSAT, lease television capacity in the satellite and earth stations on a cost basis, or acquire a capital investment in the space segment. We believe that carrier ownership of INTELSAT space segment and direct carrier-INTELSAT arrangements are prohibited by the Communications Act Satellite Act of 1962. However, we do not believe that capital investment, other than ownership, is permitible in the nature of an indefeasible right of user is prohibited by law. Further, there may be public benefits which flow from permitting carrier capital acquisition of satellite circuit. One potential benefit could be an increase in price competition in the provision of the basic satellite channel.

44. We emphasize, however, that even without the right of capital acquisition, the carriers are not thereby any competitive disadvantage vis-a-vis Comsat. They will be able to purchase the satellite channel at or below the rate Comsat charges to direct users. While the carriers may not then be able to incorporate a profit into their price to the users of the satellite channel, under the Commission's rate base regulation carriers are not entitled to earn a profit on leased facilities. Communications Satellite Corporation, 56 FCC 2d 1101, 1119 (1975). See also Earth Station Ownership 5 FCC 2d 812 (1966). Thus, the situation would not change.

45. Given the complexity of determining available capacity in a satellite system which varies with the manner in which the satellite is configured, the concomitant complexity of making that determination in earth stations that the Commission hold an evidentiary hearing and oral argument to consider the issues raised. However, as we have stated, the question as to whether Comsat's rates involve predatory pricing is more appropriately addressed in an evidentiary proceeding after the tariff actually is filed. An investigation into whether Comsat could engage in predatory pricing and the effect of such pricing would involve speculation. The other issues in this proceeding involve policy considerations, the determination of which would not be furthered by cross-examination in an evidentiary hearing. The two sets of both comments and replies in this proceeding have provided adequate opportunity to define and address all the issues raised. We, therefore, see no need either for an evidentiary hearing or oral argument and WUI's request is denied.

"See Sections 102(c) and 305(a)(1) of the Satellite Act. Indefeasible right is a capital investment interest in which the owner does not obtain rights in management or control of the facility."

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
and the fact that the carriers already have an ownership interest in the earth stations, consideration of such a capital investment policy will inherently reflect that reality. This is particularly true in the case of the television transmission capacity which is shared on a varying time basis. Given the fact that the carriers have provided no detailed proposals on how such capital acquisition might be effectuated and the extreme complexity of such a consideration, we believe that this matter is better addressed in a more comprehensive proceeding. As indicated in the Notice, the Commission will soon issue a Notice of Inquiry which will re-evaluate the entire Authorized User Decision in terms of actual operating experience since the decision’s adoption. In this inquiry the Commission will also examine the carriers’ capital investment proposals in addition to earth station ownership policies and policies concerning special purpose earth stations.

ASSURANCE OF EQUITABLE ACCESS

46. As is alluded to in the carrier pleadings in this proceeding, there is a potential that Comsat, as both the operator of the satellite television transmission facilities and a competitor for the provision of those facilities to the public, could place itself in a favored position. The Satellite Act requires that the Commission shall:

"...insure that all present and future authorized carriers shall have non-discriminatory use of, and equitable access to, the communications satellite system and satellite terminal stations under just and reasonable charges, classifications, practices, regulations, and other terms and conditions and regulate the manner in which available facilities of the system and stations are allocated among such users thereof; (47 U.S.C. 721(c)(2))."

The Commission has taken particular care in past decisions to assure that this responsibility has been carried out. For example, we note that the first authorization granted to AT&T to lease satellite circuits was conditioned on the premise that AT&T make its facilities between New York and the then sole earth station at Anadove, Maine "...available to all international carriers and other authorized users of the satellite system on fair and non-discriminatory terms and conditions and assuring equitable access thereto." AT&T et al., 35 FCC at 1318. We shall condition the authorization granted to Comsat to provide direct television service on its provision of fair and non-discriminatory terms and equitable access to the satellite system television capacity for all authorized carriers and users. Because of the fact that television service is, and will continue, to be, provided on commonly used, time-shared, satellite facilities and the fact that the demand for international television is often created by fast breaking newsworthy events of international importance, we shall further require that Comsat describe fully in its application for authority to provide direct television service, the procedures by which it will effectuate this condition. Such procedures, at a minimum, must assure that all requests for television service whether by carriers or customers be handled on a chronological basis. Carriers and customers alike must have equal access to contact Comsat to place orders. Comsat must maintain an up-to-date index of all requests for television service showing the carriers or customer, name of the person making the request, the time and date the request was made, the time during which service was requested and, the specific service requested. Finally, Comsat must retain such logs for one year in order to allow Commission inspection should a controversy arise.

47. In view of the above, we find the public interest will be served by permitting competition among the carriers and Comsat in the provisions of international television program transmission service. We therefore grant Spanish International’s request for a waiver of our “unique and exceptional” policy in the Authorized User decision (4 FCC 2d at 431, 435-36) as it applies to its reception of international television programming from Comsat, and we grant Spanish International’s petition to change this policy as it applies to other similarly situated television customers. Thus, the “unique and exceptional” policy is not applicable to television customers, and they are authorized users under our Authorized User decision and may receive direct service from Comsat. In other respects, the Authorized User decision and our “unique and exceptional” policy are not modified by this decision.

48. Accordingly, it is hereby ordered,

That the Communications Satellite Corporation shall within 120 days of the release of this order make application under Sections 214 and 305 of the Communications Act to provide satellite television services directly to user at U.S. earth stations.

49. It is further ordered, That the American Telephone and Telegraph Company, Western Union International, Inc., ITT World Communications, Inc., and RCA Global Communications, Inc. shall 60 days thereafter make application under Section 214 of the Communications Act to remove conditions authorizing and requiring rotational arrangements for television service.

50. Authority for this action is contained in Section 411, 4(j), 201(b), 303, 307 and 403 of the Communications Act of 1934, as amended, and Sections 102(c), 201(c)(2), 305(a), 305(b) and 401 of the Communications Satellite Act of 1962.

51. It is further ordered, That this proceeding is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM THRICARCO, 
Secretary.

[BC Docket No. 78-73; RM-2949]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in Prescott, Ariz.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and Order.

SUMMARY: Action taken herein assigns a second Class A FM channel to Prescott, Arizona in response to a petition filed by Southwest Broadcasting Company. The channel provides an opportunity to bring a needed additional aural broadcast service to the community.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Released: November 22, 1978.

In the matter of amendment of §73.202(b), Table of Assignments, FM Broadcast Stations. (Prescott, Arizona), BC Docket No. 78-73, RM-2949.

1. The Commission has before it the Notice of Proposed Rule Making, 43 FR 8815, proposing the assignment of Channel 280A to Prescott, Arizona, as its second FM assignment. Petitioner, Southwest Broadcasting Company, has filed supporting comments reaffirming its intention to file for the channel, if assigned.

2. Prescott (pop. 13,039), 1 seat of Yavapai County (pop. 36,733) is located

1Population figures are taken from the 1970 U.S. Census unless otherwise indicated.
in west central Arizona, approximately 113 kilometers (70 miles) northwest of Phoenix. It presently receives service from full-time AM Station KYCA, licensed to petitioner, AM Station KNOT (full-time) and Station KNOT-FM (Channel 280A).

3. Petitioner states that, according to the 1976 Arizona Statistical Review, Prescott's population is currently estimated at 17,000, which represents an increase of almost 25% over the 1970 U.S. Census data. We are told that tourism, manufacturing, ranching and mining comprise the major industries. Petitioner asserts that the population and economic trends for Prescott and Yavapai County indicate a rapid and continuing growth in both population and economy.

4. Preclusion would occur affecting four Arizona communities with populations greater than 1,000. Of the four communities, Kingman has an AM and FM station and Wickenburg has an AM station and an FM assignment. Williams and Bagdad have no FM assignments, but petitioner states that alternate FM channels are available for assignment to those communities, if the need should arise. Since other channels are available, the preclusion is not an impediment to the proposed assignment.

5. In a Roanoke Rapids/Annamora study, petitioner shows that 8,529 persons in a 1,303 square kilometer (503 square miles) area would receive a second FM service and a second nighttime aural service from a station operating on the requested channel.

6. Upon careful consideration of the proposal, we believe that Channel 280A should be assigned to Prescott, Arizona. The channel would provide for an FM station which could render a second service as well as a second nighttime service to a significant area. It would also provide the community with an opportunity to develop a needed second local FM broadcast service.

7. Mexican concurrence in this assignment has been obtained.

8. Accordingly, pursuant to authority contained in Sections 4(d), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules, it is ordered, That effective January 4, 1978, the FM Table of Assignments (§ 73.202(b) of the rules) is amended with respect to the community listed below:

<table>
<thead>
<tr>
<th>Community</th>
<th>Frequency (MHz)</th>
<th>Days of Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prescott</td>
<td>100.9</td>
<td>24</td>
</tr>
</tbody>
</table>

9. It is further ordered, That this proceeding is terminated.

(Sees. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303.)

Federal Communications Commission,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Editorial Amendments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The frequency 123.1 MHz is improperly designated in one section of our rules as a maritime distress frequency when it is not. Another section of our rules is entitled "Frequencies for use in distress," when it also contains provisions relating to search and rescue operations. We are amending our rules to clarify these inconsistencies. This action will accomplish this amendment.

FOR FURTHER INFORMATION CONTACT:
KEMP J. BEATY, Safety and Special Radio Services Bureau, 202-554-7197.

SUPPLEMENTARY INFORMATION:

Order. In the matter of editorial Amendment of § 83.233 and 83.352 of the Commission's rules.

1. Section 83.233 (Frequencies for use in distress.) designates the frequency 123.1 MHz as a distress frequency in the band 118 to 136 MHz. Actually 123.1 MHz is a frequency for Search and Rescue (SAR) activities that are available for assignment to ship stations for scene of action SAR operations between ships and aircraft.

2. The title of § 83.352 is amended to read as follows:

§ 83.352 Frequencies for use in distress and search and rescue operations.

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. RSRM-1, Notice No. 61]

PART 221—REAR END MARKING DEVICES—PASSENGER, COMMERTER, AND FREIGHT TRAINS

Schedule of Penalties

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Amendment to final rule.
SUMMARY: Part 221 establishes requirements for the installation of rear end marking devices on passenger, commuter, and freight trains. The purpose of the proposed addendum Part 221 by the addition of a new appendix which sets forth the schedule of civil penalties that are applicable to any violation of this Part.

DATES: This amendment is effective December 15, 1978.

FOR FURTHER INFORMATION CONTACT:

PRINCIPAL AUTHORS

SUPPLEMENTARY INFORMATION:

Section 5(b) of the Federal Railroad Safety Authorization Act of 1976 (Pub. L. 94-348) required the Secretary of Transportation ("Secretary") to issue such rules as may be necessary to require that "the rear car of all passenger and commuter trains shall have one or more highly visible markers which are lighted during periods of darkness or whenever weather conditions restrict clear visibility" and "the rear car of all freight trains shall have highly visible markers during periods of darkness or whenever weather conditions restrict clear visibility." On January 11, 1977, FRA published a final rule prescribing the requirements for the installation of a rear end marking device for use on passenger, commuter, and freight trains (42 FR 32321). The rule establishes performance standards for marking devices and requires that the Federal Railroad Administrator ("Administrator") approve devices that are to be installed.

On December 8, 1977, FRA amended Part 221 by the addition of Appendix A which set forth the specific procedures by which railroad subjects to this Part are to obtain approval of the marking devices to be used on passenger, commuter, and freight trains (42 FR 62002). This amendment also postoned, from January 1, 1978 to July 1, 1978, the date by which trains that are subject to Part 221 must be equipped with approved marking devices.

The FRA is now adding Appendix C to Part 221, a penalty schedule applicable to violations of the Part, in accordance with the requirements of section 209 of the Federal Railroad Safety Act of 1970 ("Safety Act"), 45 U.S.C. 438. Section 209(b) provides, in pertinent part, that if the Secretary shall * * * make applicable to any railroad safety rule, regulation, order, or standard issued under this title a civil penalty for violation thereof * * * in such amount, not less than $250 nor more than $2,500 as he deems reasonable." The Secretary has delegated his responsibilities under the Safety Act to the Administrator (49 CFR 1.49(n)).

The penalty schedule in Appendix C is based on the seriousness of the violation. The basic penalty ranges from $500 to $1,000 depending on the section of Part 221 being violated. The penalty for Intentional violations (a violation caused by the knowing and willful failure of the car) or agents to comply with the provisions of Part 221) ranges between $1,000 and $5,000 depending on the section violated. As provided for in section 221.7 (49 CFR 221.7), the Administrator specifically reserves the authority to set maximum penalties of $5,000 as well as the authority to assess the minimum penalty of $250 for any specific violation.

In no case will a claim be compromised for less than $250; each day the violation continues constitutes a separate offense, pursuant to the provisions of section 209 of the Safety Act.

The addition of Appendix C constitutes a statement of policy by the FRA. In accordance with the provisions of section 533 of the Administrative Procedure Act (5 U.S.C. 533), notice and public procedure are not required and this amendment may be made effective in less than 30 days after publication. Furthermore, FRA has evaluated the addition of this Appendix in accordance with the Department of Transportation's existing and proposed policies for the evaluation of regulatory impacts, discussed in the Federal Register on June 1, 1978 (43 FR 39292), and has concluded that this Appendix will have no measurable regulatory impact.

In light of the foregoing, Title 49 CFR, Chapter II, Part 221 is amended, effective December 15, 1978, as follows:

1. 49 CFR Part 221 is amended by adding a new Appendix C as follows:

RULES AND REGULATIONS

APPENDIX C—Schedule of Civil Penalties

| Violation Intentional violation | 
|-----------------------------|---|
| Section 211.1:              |   |
| (a) Marking device (train   |   |
| not lit)                    | 500 1,000 |
| (b) Marking device (failure |   |
| to display)                 | 1,000 2,500 |
| (c) Marking device (improper |   |
| location)                   | 750 1,500 |

1For the purpose of this schedule, an intentional violation is the knowing and willful failure of a carrier or its officers or agents to comply with the provisions of this Part. The Administrator reserves the authority to assess the maximum penalty of $2,500 for a violation of any section or subsection contained in part 221.

SEC. 209, 84 Stat. 975 (45 U.S.C. 438; Sec. 1.49(n) of the Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).)

FRA State Rail Docket No. 1; Notice No. 21

PART 270—RAIL BANKING UNDER SECTION 810 OF THE RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

Repeal of Part

AGENCY: Federal Railroad Administration ("FRA"), Department of Transportation ("DOT").

ACTION: Repeal of final rule.

SUMMARY: FRA is repealing 49 CFR Part 270 which sets forth the interim procedures to be utilized by the Federal Railroad Administrator ("Administrator") in acquiring interests in rail properties to be included in the rail bank established under section 810 of the Railroad Revitalization and Regulatory Reform Act of 1976 ("Act").

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Larry A. Friedman, 426-7377.

SUPPLEMENTARY INFORMATION:

Section 810 required the Secretary to establish a rail bank consisting of interests in certain lines of railroad in order to preserve them for future use. Interim regulations were issued on April 6, 1976 (43 FR 14472) and public comment invited. The President re-
I. HISTORY OF THE AMENDMENTS

On August 28, 1978, the North Pacific Fishery Management Council (the Council) adopted an amendment to the Fishery Management Plan for Groundfish of the Gulf of Alaska. This amendment increased the amount of pollock held in reserve to 13,900 metric tons, an increase in the reserves of species taken incidental to fishing for pollock. The purpose of the amendment was to assure that an adequate supply of fish was available for potential harvest by U.S. vessels in joint venture operations involving sale of U.S.-caught fish to foreign processing vessels at sea. The amendment superseded the specifications of Total Allowable Level of Foreign Fishing (TALFF), domestic harvest capacity and reserves established by the FMP, as amended, but retained a fishing year ending October 31, 1979. The amendment was approved by the Assistant Administrator on September 22, 1978, and the amendment and proposed implementing regulations were published for public comment on October 6, 1978 (43 FR 46349).

On June 29, 1978, the Council submitted an amendment to the FMP which would allow foreign longline vessels to harvest the Pacific cod TALFF and apportioned reserves of the entire Chirikof fishing area in the directed longline fishery west of 157° W longitude. This amendment superseded a provision of the original FMP that restricted the Pacific cod harvest in the Chirikof fishing area west of 157° W longitude to 40% of the TALFF. This amendment was approved by the Assistant Administrator for fisheries on September 8, 1978, and the amendment and proposed implementing regulations were published for public comment on October 13, 1978 (43 FR 47222).

For a more complete explanation of the relation of these amendments to the FMP, see 43 FR 55799, November 14, 1978, (Groundfish of the Gulf of Alaska—Final Regulations).

II. MANAGEMENT MEASURES ESTABLISHED

The regulations implementing the amendment relating to reserves state the amounts of fish set aside as reserve, and establish a procedure for apportioning amounts of fish from this reserve to the TALFF during the fishing year. In order to assure that any portion of the reserve that will not be harvested by U.S. fishermen is made available to foreign fisheries in an expeditious manner, the proposed regulations provide that 25 percent of the initial reserve will be allocated to the TALFF every 2 months (bimonthly), beginning January 2, 1979, unless it is determined by the NMFS Regional Director that United States fishing vessels will harvest all of the remaining reserve during the remainder of the plan year. If such a determination is made, the Regional Director will withhold from apportionment to the TALFF's all or part of the scheduled apportionment of the reserve.

A determination that the remaining reserves will be harvested by United States fishing vessels would be based on consideration of: (1) reported U.S. catches and effort by species and area; (2) projected U.S. catch and effort by species and area; and (3) projected and utilized processing capacity of United States fish processors. Interested persons are afforded an opportunity to submit comments up to 15 days prior to the time of making each determination. If, on the basis of such a determination, the Regional Director withholds all or a portion of the scheduled bimonthly apportionment to the TALFF's, and the subsequent performance of United States fishing vessels fails to achieve the anticipated harvest levels, then the amount of fish previously withheld is to be made available for apportionment to TALFF's on the next bimonthly date.

Although there is reference in the plan amendment to a "Special Joint Venture reserve", previously established reserve amounts and the "Special Joint Venture" reserves are considered one reserve and are treated as one reserve in the regulation.

This amendment is a response to the problem of accurately predicting U.S. harvesting capacity when new fishing arrangements such as joint ventures are being initiated. By establishing reserve amounts of fish which will subsequently be available for harvest by U.S. fishermen, one portion of the entire amount specified as "Joint/Venture" reserves are considered one reserve and are treated as one reserve in the regulation.

Alternative solutions to the uncertainty in estimating U.S. harvesting capacity in this situation would involve establishing either: (1) a high initial U.S. capacity estimate with lower TALFF's; or (2) a low U.S. capacity with higher TALFF's. If the first alternative were employed, and in-season data subsequently indicated that U.S. vessels would not harvest the entire amount specified as U.S. harvesting capacity, the specifications of U.S. capacity and the TALFF's could be changed only by the time consuming process of amending the FMP and the interest of achieving optimum yield would not be fulfilled. If the second alternative-establishing U.S. harvesting capacity at a low level and TALFF commensurately high—were used, then high U.S. harvests would
either result in overfishing or disruption of foreign fishing depending on whether or not foreign fishing were abruptly curtailed. Either result appears to be contrary to the purposes and policy of the Act which state that where practicable, plans should be implemented to avoid disruption of fishing.

The chosen course of action, by allowing flexibility depending on anticipated and reported harvest by U.S. vessels, is consistent with National Standard One of the Fishery Conservation and Management Act of 1976 ("the Act") that overfishing be prevented and National Standard 6 of the Act, that "... conservation and management measures shall take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches" (Section 1851(a) (1) and (6) of the Act).

The amendment relating to the Chirikoff fishing area was designed to achieve full utilization of the fishing resources yet allow domestic fishermen priority access to the resources. It is possible that initial joint venture operations, especially in the winter months, may experience lower catch rates than would operations under more favorable conditions. Factors such as weather, hours of daylight, seasonal catch rates, learning experience, alternative summer fisheries, and other factors may be considered by the Regional Director in making the determination whether or not, and to what extent, reserves should be released to TALFF. The total reserve level was estimated in the PMP. The procedures for release allow the North Pacific Council and members of the general public an opportunity to comment before decisions are made concerning the amount of reserve to be released. The Council has indicated its intention to provide recommendations to the Regional Director on these determinations. Moreover, in an October 3, 1978, letter from the Assistant Administrator for Fisheries, NOAA, to the Chairman of the Council, the Assistant Administrator "... anticipated active Council (and public) involvement in making the ... determinations ... " and "... hoped that the Council would make a particular effort to ensure that any Council meeting at which such recommendations will be discussed receives extensive notice." Concerned parties are encouraged to provide the Council, as well as the Regional Directors, with data and views relating to the determinations.

The FCMA does encourage development of underutilized fisheries and this amendment is designed to give priority access to the resources by vessels of the United States.

However, the amounts of established reserves represent optimistic estimates of the amount of fish which joint venture operations will harvest during the fishing year. It is therefore considered reasonable, in view of the competing interest of optimum utilization of available resources and the demonstrated ability of foreign vessels to harvest these resources, to periodically reassess the ability of joint venture operations to harvest and fully utilize the resource.

It is noted that the January 2 release date provides more than "one month lead time". Permits for joint venture operations were issued on June 8, 1978, and operations could have begun on that date. Thus, the "lead time" has been almost seven months.

B. RESERVE LEVELS AND OTHER MATTERS RELATING TO SABLEFISH

Several interested parties stated that the reserve for sablefish was excessively high based on historical incidental catch experience of foreign fishing fleets and expressed concern that the reserves should be released in an expeditive manner. One comment indicated that the reserves are designed to achieve full utilization of the fishing resources yet allow domestic fishermen priority access to the resources. It is possible that initial joint venture operations, especially in the winter months, may experience lower catch rates than would operations under more favorable conditions. Factors such as weather, hours of daylight, seasonal catch rates, learning experience, alternative summer fisheries, and other factors may be considered by the Regional Director in making the determination whether or not, and to what extent, reserves should be released to TALFF.

The total reserve level was estimated in the PMP. The procedures for release allow the North Pacific Council and members of the general public an opportunity to comment before decisions are made concerning the amount of reserve to be released. The Council has indicated its intention to provide recommendations to the Regional Director on these determinations. Moreover, in an October 3, 1978, letter from the Assistant Administrator for Fisheries, NOAA, to the Chairman of the Council, the Assistant Administrator "... anticipated active Council (and public) involvement in making the ... determinations ... " and "... hoped that the Council would make a particular effort to ensure that any Council meeting at which such recommendations will be discussed receives extensive notice." Concerned parties are encouraged to provide the Council, as well as the Regional Directors, with data and views relating to the determinations.

The FCMA does encourage development of underutilized fisheries and this amendment is designed to give priority access to the resources by vessels of the United States.

However, the amounts of established reserves represent optimistic estimates of the amount of fish which joint venture operations will harvest during the fishing year. It is therefore considered reasonable, in view of the competing interest of optimum utilization of available resources and the demonstrated ability of foreign vessels to harvest these resources, to periodically reassess the ability of joint venture operations to harvest and fully utilize the resource.

It is noted that the January 2 release date provides more than "one month lead time". Permits for joint venture operations were issued on June 8, 1978, and operations could have begun on that date. Thus, the "lead time" has been almost seven months.

B. RESERVE LEVELS AND OTHER MATTERS RELATING TO SABLEFISH

Several interested parties stated that the reserve for sablefish was excessively high based on historical incidental catch experience of foreign fishing fleets and expressed concern that the reserves should be released in an expeditive manner. One comment indicated that the reserves are designed to achieve full utilization of the fishing resources yet allow domestic fishermen priority access to the resources. It is possible that initial joint venture operations, especially in the winter months, may experience lower catch rates than would operations under more favorable conditions. Factors such as weather, hours of daylight, seasonal catch rates, learning experience, alternative summer fisheries, and other factors may be considered by the Regional Director in making the determination whether or not, and to what extent, reserves should be released to TALFF.

The total reserve level was estimated in the PMP. The procedures for release allow the North Pacific Council and members of the general public an opportunity to comment before decisions are made concerning the amount of reserve to be released. The Council has indicated its intention to provide recommendations to the Regional Director on these determinations. Moreover, in an October 3, 1978, letter from the Assistant Administrator for Fisheries, NOAA, to the Chairman of the Council, the Assistant Administrator "... anticipated active Council (and public) involvement in making the ... determinations ... The FCMA does encourage development of underutilized fisheries and this amendment is designed to give priority access to the resources by vessels of the United States.

However, the amounts of established reserves represent optimistic estimates of the amount of fish which joint venture operations will harvest during the fishing year. It is therefore considered reasonable, in view of the competing interest of optimum utilization of available resources and the demonstrated ability of foreign vessels to harvest these resources, to periodically reassess the ability of joint venture operations to harvest and fully utilize the resource.

It is noted that the January 2 release date provides more than "one month lead time". Permits for joint venture operations were issued on June 8, 1978, and operations could have begun on that date. Thus, the "lead time" has been almost seven months.

B. RESERVE LEVELS AND OTHER MATTERS RELATING TO SABLEFISH

Several interested parties stated that the reserve for sablefish was excessively high based on historical incidental catch experience of foreign fishing fleets and expressed concern that the reserves should be released in an expeditive manner. One comment indicated that the reserves are designed to achieve full utilization of the fishing resources yet allow domestic fishermen priority access to the resources. It is possible that initial joint venture operations, especially in the winter months, may experience lower catch rates than would operations under more favorable conditions. Factors such as weather, hours of daylight, seasonal catch rates, learning experience, alternative summer fisheries, and other factors may be considered by the Regional Director in making the determination whether or not, and to what extent, reserves should be released to TALFF.

The total reserve level was estimated in the PMP. The procedures for release allow the North Pacific Council and members of the general public an opportunity to comment before decisions are made concerning the amount of reserve to be released. The Council has indicated its intention to provide recommendations to the Regional Director on these determinations. Moreover, in an October 3, 1978, letter from the Assistant Administrator for Fisheries, NOAA, to the Chairman of the Council, the Assistant Administrator "... anticipated active Council (and public) involvement in making the ... determinations ... " and "... hoped that the Council would make a particular effort to ensure that any Council meeting at which such recommendations will be discussed receives extensive notice." Concerned parties are encouraged to provide the Council, as well as the Regional Directors, with data and views relating to the determinations.

The FCMA does encourage development of underutilized fisheries and this amendment is designed to give priority access to the resources by vessels of the United States.

However, the amounts of established reserves represent optimistic estimates of the amount of fish which joint venture operations will harvest during the fishing year. It is therefore considered reasonable, in view of the competing interest of optimum utilization of available resources and the demonstrated ability of foreign vessels to harvest these resources, to periodically reassess the ability of joint venture operations to harvest and fully utilize the resource.

It is noted that the January 2 release date provides more than "one month lead time". Permits for joint venture operations were issued on June 8, 1978, and operations could have begun on that date. Thus, the "lead time" has been almost seven months.
season—thus giving the Council an opportunity to examine new data and take appropriate action—the reserve mechanism is primarily designed to assure that the resources are available for harvest, up to the limits of OY, are apportioned between U.S. and foreign vessels in a manner consistent with the Act. Establishing reserves to account for incidental harvest of sablefish by foreign vessels does not increase the OY for sablefish, nor do the reserve provisions authorize any harvest in excess of OY amounts. TALFF’s have been lowered to the extent that reserves are increased. The OY remains the same.

This amendment does not change the specification of domestic capacity. If the Council determines that domestic capacity has increased, the TALFF’s would be lowered proportionately. If U.S. processors have, and will utilize, the capacity to process all United States harvested fish from the Alaska groundfish fishery, then the Secretary must deny an application from a foreign vessel to receive a harvested fish (see Section 204(b)(6)(B)(1) of the Act, as amended by Pub. L. 95-354—August 23, 1978).

Because reserve amounts are taken from the TALFF’s, the incidental catches allowed for joint venture operations do not impinge upon the prerogatives of U.S. vessels not engaged in joint venture operations.

With regard to the contention that the DAH is too high, several responses are relevant: (1) during part of 1978 foreign fishing was permitted in areas where U.S. vessels could fish, but have not, because of fear of gear conflict with foreign vessels (these regulations were not modified until July, 1978). Thus, some increase in U.S. catch can be anticipated as a result of this change; (2) 1978 was an excellent year for salmon and some effort that would be expected to add to sablefish was directed towards salmon; (3) U.S. fishing for sablefish in the Gulf of Alaska has been growing steadily; (4) there are some recent indications of a decline in availability of sablefish and the high DAH may coincidentally provide some interim protection until the OY can be reexamined and changed appropriately; (5) the DAH level is not the subject of this amendment, although commentators are encouraged to point out to the Secretary and the Council possible problem areas in an FMP.

In response to indications that the OY for sablefish is too high we note, as did some commentators, that the Council is addressing this subject.

The amounts of the incidental catches allowed in joint ventures, which are reflected in increased reserves, are of interest to foreign nations. Because in this amendment these amounts are taken from the TALFF’s. There is no prohibition on trawling for sablefish in the Gulf of Alaska. However, to the extent that the reserves are set higher than required by U.S. vessels engaged in joint venture operations, available resources may go unutilized.

While the reserve mechanism itself is designed to avoid this result, the incidental catch rates in joint ventures also reflect an attempt to assess the amounts of incidental catch reasonably required to allow harvest of the pollock resource by U.S. vessels. The rate permitted both in permits and reserve specifications was based on incidental catch rates of foreign trawl vessels fishing for pollock. Because of inexperience in using new gear, different vessel size and the necessity of learning new fishing techniques, it was considered that U.S. incidental catch rates would probably exceed the highest rates reported by foreign vessels, and the base rate was adjusted accordingly.

Until experienced Joint venture operations are available, the incidental catch of participating U.S. vessels is a matter of conjecture. The number arrived at was a good faith effort to balance the uncertainties of a new fishing effort against possible underutilization. The reserve mechanism, and selective release of unutilized reserve amounts, help assure that balance.

C. COMMENTS ON PACIFIC COD RESERVES AND DAH

Comments on the Pacific cod reserves stated that the reserve level may be overestimated based on historical incidental catch levels. Commenters also stated that the new fishing techniques, based on indications that the level of harvest by U.S. vessels during 1978 is about 5 percent of 1978 specification of DAH, and U.S. harvest may therefore be about 15,000 metric tons less than anticipated. Commenters state that, in this situation, there is no need for a reserve, and that DAH should be lowered.

Response: These comments warrant thorough analysis and further consideration. It may be that the justification for the Pacific cod reserve levels and the DAH should be reviewed in light of recent catch statistics. If these specifications are overestimated, the alternatives available to the Secretary appear to be: (1) to hold hearings; (2) to withdraw the regulations and reject the amendment or the plan (thus reverting to the TALFF and reserve levels in the original FMP); or revert to the Preliminary Management Plan (FMP) if the plan is rejected; or (3) to promulgate final regulations knowing that the amendment might contain an inadequate specification for Pacific cod in the light of new information.

The time required to give notice for, conduct and analyze the results of hearings would mean further delay and confusion. Delay in implementing this amendment may also result in a compromise of foreign fishing because of the risk that the FMP could not be revised and effective in time to allow fishing by January 1. The potential costs of these delays are considered to be high. Rejecting the amendment and implementing the original FMP is not acceptable because the Pacific cod DAH in the original FMP. An extension of the FMP management regime would not allow for high reserve to foster U.S. groundfish development. Thus, it is considered to be in the national interest to implement the reserves and DAH for Pacific cod as specified. The reserve release provisions at least assure that any unutilized Pacific cod will be available for harvest by foreign nations.

The Council is being notified of these comments received on Pacific cod and is being requested to analyze these comments and other available information and take appropriate action. If the Council finds it appropriate to make adjustments in the reserve level or DAH, these adjustments can be implemented so that foreign fleets will have an opportunity to harvest any increases in 1979.

D. OTHER COMMENTS

Miscellaneous comments were received as follows:

(1) The reporting requirements for joint venture operations are too restrictive.

Response: The reporting requirements are not the subject of these regulations.

(2) If the reserves are released, the allocation should go to the Republic of Korea.

Response: Allocations are the responsibility of the Department of State. It is noted that the comment was transmitted to the Department of State.

(3) High levels of incidental catch by trawl fishermen will harm halibut stocks.

Response: The FMP imposes stringent limitations on incidental catch of halibut by U.S. vessels during those periods when the likelihood of incidental halibut catch is the greatest. These restrictions apply to U.S. vessels fishing in joint venture operations.

(4) The estimate of U.S. catch per vessel day of up to 50 tons per boat is overestimated.

Response: This factor will be reexamined by the Regional Director during the season and reserves will be released if it is determined that the reserves will not be harvested by U.S. vessels.
(5) The OY for pollock can be increased.
Response: No new data was presented to indicate the need for a reassessment.

In addition to the comments received during the comment period on the proposed regulation, several comments were received on the reserves originally established by the FMP prior to amendment (see 43 FR 52709). These comments are listed and responded to below:

A. The reserve is contrary to the applicable governing international fishery agreement (GIFA) which requires TALFF to be determined at the start of the year.
Response: Initial TALFF's are determined at the start of the year. The reserve is designed to avoid lowering TALFF in mid-season and consequent disruption of foreign fishing.

B. Adequate provision for expansion of domestic fishing has been made in the apportionment of domestic annual harvest (DAH) capacity.
Response: The possibility of joint ventures is not considered in the specification of DAH.

C. Reserves should be apportioned at the earliest possible date. If domestic catch is less than DAH, the remaining amount of fish must be allocated to foreign nations.
Response: The reserve release mechanism is designed to provide early release. To change DAH requires a plan amendment.

D. Procedures must be developed for apportionment of the reserve. The uncertainty of the operation of the reserve provision could act to inhibit domestic fishermen.
Response: This amendment provides such procedures.

E. The 20% reserve should not be applied to all species.
Response: The Regional Director can selectively release reserves as appropriate.

F. Foreign countries will have difficulty in adjusting to mid-year reallocation of reserve, thus leaving some portion of stocks unharvested.

Response: By allowing for possible early release of specified amounts at specific times, it is hoped that foreign nations will be more able to adjust.

G. DAH should be reviewed in mid-year for appropriate reallocation to the TALFF's.
Response: The Council can and should review DAH, whenever appropriate.

V. MODIFICATION FROM PROPOSED REGULATIONS

Several modifications were made to the proposed regulations in order to clarify the language and the procedures by which reserves would be apportioned.

The word “allocation” was changed to “apportionment” throughout the text to assure that there would be no confusion with the reserve of the Department of State to divide the TALFF into national “allocations.”

A new sub-section was added which requires publication in the FEDERAL Register of amounts of apportioned reserves and response to comments received.

Sub-sections were renumbered and headings added to conform to organization of Part 672 and § 611.92 (see 43 FR 52709).

In addition, several technical errors in the specifications of reserve, DAH and TALFF amounts were discovered. The level of the sablefish reserve in the Southeast fishing area was incorrectly calculated, as were the TALFF's for sablefish in the fishing areas. The net impact of the corrections is to raise the sablefish TALFF in each fishing area in order to conform to the specification of total TALFF, to reduce the reserve in the Southeast fishing area and to raise the sablefish reserve in the other fishing areas. The reserve for squid was raised by 100 metric tons to conform to the plan amendment. Column totals and row totals in Table 1 of 672.20 and 611.92 were changed to reflect these corrections.

VI. OTHER MATTERS

As previously stated in the preamble to the Gulf of Alaska groundfish FMP regulations (43 FR 52709, November 16, 1978), the 30-day “cooling off period” required by 5 U.S.C. section 553 for the amendment that establishes new reserves and TALFF's is being reduced to avoid the uncertainty and disruption that would result from changing the specifications of TALFF and reserve after the first month of the fishing year.

The regulations will not be reprinted in total in the FEDERAL Register at this time. The North Pacific Fishery Management Council has indicated its intention to reprint regulations applicable to U.S. vessels and copies of 50 CFR 672 therefore will be available from the Council. 50 CFR 611.92 will be reprinted in conjunction with the rest of 50 CFR 611 on or about January 1, 1979.

The Assistant Administrator for Fisheries, NOAA, under delegation of authority from the Secretary of Commerce, has determined that these regulations and amendment to the FMP for Groundfish of the Gulf of Alaska are consistent with the National Standards, the other provisions of the Act, and other applicable law and do not require a Regulatory Analysis under Executive Order 12044. Negative declarations of an environmental impact for these amendments have been filed with the Environmental Protection Agency.

(16 U.S.C. section 1601 et seq.)

Signed at Washington, D.C. this 27th day of November 1978.

Winfred H. Myers, Acting Executive Director, National Marine Fisheries Service.

(A) Title 50, Part 672 is revised as follows:

(b) 50 CFR 672.20 is amended by revising Table I of paragraph (a) and by adding a new paragraph (c) as follows:

§ 672.20 General limitations.

* Includes all stocks of finfish except (1) those listed above and (2) salmon, steelhead trout, and Pacific halibut.

(c) Reserves.—(1) Apportionment of reserve amounts. As soon as practicable after each of the following dates, the Regional Director shall apportion to Total Allowable Level of Foreign Fishing (TALFF) twenty-five (25) percent of the reserve amount, set out in Table I of this section, for each species in each fishing area: January 2, March 2, May 2, and July 2.

(2) Determination.—(1) General. Before making the apportionment described in paragraph (c)(1) of this section, the Regional Director shall determine whether or not to apportion to the TALFF all or part of the amounts described in paragraph (c)(1) of this section. The Regional Director may withhold all or part of the 25 percent reserve amounts if he determines that the amount concerned, when added to unapportioned reserve amounts, will be harvested by vessels of the United States during the remainder of the fishing year.

(ii) Factors. The determination whether or not to withhold all or part of the reserve amounts described in paragraph (c)(2) of this section shall be based upon consideration of the following factors:

(A) Reported U.S. catch and effort by species and area compared to previously projected U.S. harvesting capacity;

(B) Projected U.S. catch and effort by species and areas for the remainder of the fishing year;

(C) Amounts of fish already purchased or processed by U.S. processors during the fishing year, compared to previously projected processing capacity of U.S. processors; and

(D) Projected processing capacity, and utilization of capacity, by U.S. processors for the remainder of the fishing year.

(ii) Public comment. (A) Comments may be submitted to the Regional Director concerning whether or not, and the extent to which, vessels of the United States will harvest reserve amounts during the remainder of the fishing year. (Address: NMFS, P.O. Box 1688, Juneau, Alaska 99802).

(ii) Comments must be submitted no later than 15 days prior to the dates specified in paragraph (c)(1) of this section.

(C) The Regional Director shall consider any timely comments filed in accordance with this subsection, in making the determination specified in paragraph (c)(2)(i) of this section.

(D) The Regional Director shall compile, in aggregate form, the most recent available reports on (1) level of catch and effort by vessels of the United States fishing subject to this Part; and (2) amounts of fish processed by U.S. fish processors. This data shall be available for public inspection during business hours at the National Marine Fisheries Service, Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802, during the last 15 days of each comment period.

(iv) Procedure. As soon as practicable after each of the dates stated in paragraph (c)(1) of this section, the Regional Director shall publish in the Federal Register: (A) the final amounts of reserves to be apportioned to the TALFFs; (B) the reasons for the determination that vessels of the United States will, or will not, harvest the amounts available for apportionment to the TALFFs; and (C) responses to any comments received.

(v) Add-ons. If vessels of the United States fail to harvest any part of a 25 percent apportionment which has been withheld by the Regional Director pursuant to paragraph (c)(2) of this section, the unharvested amount shall be added to the amount of reserves available for apportionment to the TALFF’s on the next apportionment date.

(B) Title 50, Part 611 is revised as follows:

§ 611.20 [Amended]

(1) 50 CFR 611.20(c). Table I is amended in the “Gulf of Alaska” portion only as follows:

(1) Change the lines beginning “006”, “002”, “003”, “008”, “001”, “005”, “012”, “007”, “001”, “099”, to read as follows:

</table>

1. The TALFF's specified in this table may be modified during the year if reserves are apportioned to TALFF.
2. Of the total Pacific cod TALFF, only 3,720 metric tons may be caught west of 150° W. longitude.
3. The category "other rockfish" includes all rockfishes other than Pacific Ocean perch.

(i) **Reserves.** (A) Apportionment of Reserve Amounts. As soon as practicable after each of the following dates, the Regional Director shall apportion to the TALFF's twenty-five (25) percent of the reserve amount set out in Table I of this section for each species in each fishing area: January 2, March 25, May 2, and July 2.

(B) Determination.—(1) General. Before making the apportionment described in paragraph (b)(1)(ii)(A) of this section, the Regional Director shall determine whether or not to apportion to the TALFF's all or part of the amounts described in paragraph (b)(1)(ii)(A) of this section. The Regional Director may withhold all or part of the 25 percent reserve amount if he determines that the amount concerned, when added to unapportioned reserved amounts, will be harvested by vessels of the United States during the remainder of the fishing year.

(2) Factors. The determination whether or not to withhold all or part of the reserve amounts shall be based upon the following factors:

(i) Reported U.S. catch and effort by species and area, compared to previously projected U.S. harvesting capacity;

(ii) Projected U.S. catch and effort by species and area for the remainder of the fishing year;

(iii) Amounts of fish already purchased or processed by U.S. processors during the fishing year, compared to previously projected processing capacity of U.S. processors; and

(iv) Projected processing capacity and utilization of capacity by U.S. processors for the remainder of the fishing year.

(C) Public Comment. (1) Comments may be submitted to the Regional Director concerning whether or not, and the extent to which, vessels of the United States will harvest reserve amounts during the remainder of the fishing year. (Address: NMFS, P.O. Box 1628, Juneau, Alaska 99802.)

(2) Comments must be submitted no later than 15 days prior to the dates specified in paragraphs (b)(1)(ii)(A) of this section.

(D) Regional Director shall consider any timely comments filed in accordance with this section, in making the determination specified in paragraph (b)(1)(ii)(A) of this section.

(E) The Regional Director shall compile, in aggregate form, the most recent available reports on: (a) Level of catch and effort by vessels of the United States fishing in the Alaska groundfish fishery; and (b) Amounts of fish processed by U.S. fish processors. This data shall be available for public inspection during business hours at the National Marine Fishery Service, Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802, during the last 15 days of each comment period.

(F) Procedure. As soon as practicable after each of the dates specified in paragraph (b)(1)(ii)(A) of this section, the Regional Director shall publish in the Federal Register: (i) the final amounts of reserves to be apportioned to the TALFF's; (ii) the reasons for the determination that vessels of the United States will, or will not, harvest the amounts available for apportionment to the TALFF's; and (iii) responses to comments received.

(G) Add-on. If vessels of the United States fail to harvest any part of a 25 percent apportionment which has been withheld by the Regional Director pursuant to paragraph (b)(1)(ii)(B) of this section, the unharvested amount shall be added to the amount of reserves available for apportionment to the TALFF's on the next apportionment date.

§ 611.92 [Amended]

(3) Section 611.92(b)(2)(ii)(D) is amended as follows: delete "Reserved metric tons of Pacific cod * * *" and substitute "The amount of Pacific cod stationed in footnote three of Table I (§ 611.92(b)(1))".

Proposed Revisions

DEPARTMENT OF AGRICULTURE
Rural Electrification Administration
[7 CFR Part 1701]
RURAL TELEPHONE PROGRAM

ADDRESS: Rural Electrification Administration, USDA.

ACTION: Proposed Rule.

SUMMARY: REA proposes to issue a File With for REA Bulletin 345-13 to announce an addendum to REA Specification PE-22 for Aerial and Underground Telephone Cable, a File With for REA Bulletin 345-14 to announce an addendum to REA Specification PE-33 for Direct Burial Telephone Cable (Air Core), a File With for REA Bulletin 345-67 to announce an addendum to REA Specification PE-39 for Filled Telephone Cable and a File With for REA Bulletin 345-70 to announce an addendum to REA Specification PE-54 for Filled Buried Wire. These addenda are needed to include electrical attenuation requirements which have not been covered in the existing specifications. The effect of this action will provide telephone operators and Standards Division during regular business hours.

FOR FURTHER INFORMATION CONTACT:
Mr. Walter T. Smith, Chief, Outside Plant Branch, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-3827.

SUPPLEMENTARY INFORMATION:
Notice is hereby given that pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to issue File Withs for REA Bulletins 345-13, 345-14, 345-67, and 345-70. Copies of the proposed addenda to REA Specifications PE-22, PE-23, PE-39, and PE-54 may be secured in person or by written request from the Director, Telephone Operations and Standards Division.

Copies of the addenda will be furnished by REA upon request. Questions concerning the addenda may be referred to the Chief, Outside Plant Branch, Telephone Operations and Standards Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202-447-3827.

C. R. Ballard, Assistant Administrator, Telephone.

Food Safety and Quality Service
[7 CFR Part 2852]

FROZEN GREEN BEANS AND FROZEN WAX BEANS

Proposed United States Standards for Grades; Extension of Comment Period

AGENCY: Food Safety and Quality Service, USDA.

SUMMARY: This notice extends the period for comments to the proposed rule, published October 17, 1978 (43 FR 47755), to revise the United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans.

DATE: Comments must be received on or before February 1, 1979.

ADDRESS: Comments in duplicate should be sent to: Executive Secretary, FSQS, Room 3107-South, U.S. Department of Agriculture, Washington, D.C. 20250, Attention: Ann Langlois. Comments will be available for public inspection at the same address during regular business hours (7 CFR 1.27 (b)).

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:
The original intention was to give interested parties at least 60 days in which to make comments regarding the proposed rule to revise the United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans. The proposal was not published in time to allow this full comment period. Therefore, the comment period is extended another 60 days from the publication of this notice.

Adjusted AQL's for the critical defects of the whole and sliced lengthwise styles are also included for comment during the extension. The AQL for Grade A is adjusted from 0.10 to 0.25; the AQL for Grade B is adjusted from 0.25 to 0.65; the AQL for Grade C is adjusted from 1.0 to 2.5. These adjustments will bring the quality of the whole and sliced lengthwise styles in line with the cut, short cut and mixed styles.

Done at Washington, D.C., on November 27, 1978.

Sydney J. Butler, Acting Administrator, Food Safety and Quality Service.

PROPOSED RULES

[3410-03-M]

Science and Education Administration

[9 CFR Parts 445 and 447]

NATIONAL POULTRY IMPROVEMENT PLAN AND AUXILIARY PROVISIONS

AGENCY: Science and Education Administration, USDA.

ACTION: Proposed rule.

SUMMARY: Notice is hereby given, under the administrative procedure provisions of 5 U.S.C. 553, that the Department of Agriculture has under consideration proposed amendments to the National Poultry Improvement Plan and Auxiliary Provisions which were recommended by the 1978 Conference of representatives of the poultry industry and State Agencies which cooperate in the administration of the Plan. Included in these proposed amendments is a new program to recognize States which have attained a certain level in their efforts to control and eliminate Mycoplasma gallisepticum in turkey breeding flocks. Also, amendments are proposed which reduce the amount of blood testing necessary to monitor chicken breeding flocks for Mycoplasma gallisepticum and Mycoplasma synoviae under the official control program for the diseases caused by these two organisms. Another amendment is proposed which requires all poultry, baby poultry, or hatching eggs shipped through the United States Postal Service to have a label showing that the product meets the requirements of the U.S. Pullorum-Typhoid Clean classification or an equivalent State program. This amendment is proposed as one step in the Department's effort to locate and stop the dispersion of poultry which may be infected with Salmonella pullorum or Salmonella gallinarum (typhoid). The General Conference Committee of the National Poultry Improvement Plan would also be expanded to include a member-at-large who is an industry person, appointed by all voting State delegates to the Plan Conference.

DATE: Comments must be received on or before January 2, 1979, effective date would be date published in Federal Register as a final rule, except as noted.

ADDRESS: Send comments to Dr. James W. Smith, Animal Physiology and Genetics Institute, building 173, BARC-East, Beltsville, Maryland 20705. All written submissions made pursuant to this notice will be made available for public inspection at the above office during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Raymond D. Schar at 301-344-2227.

SUPPLEMENTARY INFORMATION:
The National Poultry Improvement Plan is a cooperative State-Federal program through which new technology can be effectively applied to the improvement of poultry breeding stock and hatchery products through the control of hatchery-disseminated diseases. The provisions of the program are changed from time to time to conform with the development of the industry and to utilize new information as it becomes available. These provisions are changed based on recommendations initiated at the biennial National Plan Conference by the official delegates representing participating flock owners, breeders, and hatcherymen from all cooperating States.

Pursuant to section 101(b) of the Department of Agriculture Organic Act of 1944, as amended (7 U.S.C. 426), it is proposed to amend Parts 445 and 447 of Title 9, Chapter IV, Subchapter A, Code of Federal Regulations, to incorporate such recommended amendments and to make incidental changes for clarity and consistency.

PART 445—NATIONAL POULTRY IMPROVEMENT PLAN

1. Section 445.2 would be revised by adding a new paragraph to read as follows:

§ 445.2 Administration.

(e) The cooperating Official State Agency shall concur with the Service in its request to the U.S. Postal Service that no mail shipments of poultry, exhibition poultry, baby poultry, game birds, or hatching eggs, shall be made into or within the State unless the product qualifies as U.S. Pullorum-Typhoid clean or as equivalent to this classification under a State supervised program. The status of the product shall be stated on each carton, box, or bundle of boxes by a unique label or marking which has been approved by the Official State Agency and the Service.

2. Section 445.4 would be revised by adding a new paragraph to read as follows:

§ 445.4 General provisions for all participants.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
(e) Each shipment of products from primary breeding flocks intended for subsequent use in breeding flocks within the United States, shall be identified by a properly executed and distributed NPPI Form 15, Report of Sales of Hatching Eggs, Chicks, and Poults.

3. Section 445.10 would be revised by adding a new paragraph to read as follows:

§ 445.10 Terminology and classification; flocks, products, and States.

(i) U.S. Mycoplasma Gallisepticum Clean State, Turkeys. (See § 445.44(c).)

4. Section 445.14(b) would be amended by adding a new subparagraph to read as follows:

§ 445.14 Blood testing.

(b) Any drug, for which there is scientific evidence of masking the test reaction or hindering the bacteriological recovery of Mycoplasma organisms, shall not be fed or administered to poultry within three weeks prior to a test or bacteriological examination upon which a Mycoplasma classification is based.

5. Section 445.23 would be amended by revising introductory paragraph (c)(1)(ii) and (d)(1)(a) and by revising (e)(1)(ii) to read as follows:

§ 445.23 Terminology and classification; flocks, products, and States.

(c) • • •

(d) • • •

(e) • • •

6. Section 445.33 would be amended by revising introductory paragraph (c)(1)(iii) and (d)(1)(a) and by revising (e)(1)(ii) to read as follows:

§ 445.33 Terminology and classification; flocks and products.

(c) • • •

(d) • • •

(e) • • •

7. Section 445.44 would be amended by adding a new paragraph to read as follows:

(FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978)
(v) All persons performing poultry disease diagnostic services within the State are required to report to the Official State Agency within 48 hours the source of all turkey specimens that have been identified as being infected with M. gallisepticum;
(vi) All reports of M. gallisepticum infection in turkeys are promptly followed by an investigation by the Official State Agency to determine the origin of the infection;
(vii) All turkey flocks found to be infected with M. gallisepticum are quarantined until marketed under supervision of the Official State Agency.

(2) Discontinuance of any of the conditions described in paragraph (c)(1) of this section, or if repeated outbreaks of M. gallisepticum occur in turkey breeding flocks described in paragraph (c)(1)(i) of this section, or if an infection spreads from the originating premises, the Service shall have grounds to revoke its determination that the State is entitled to this classification. Such action shall not be taken until a thorough investigation has been made by the Service and the Official State Agency has been given an opportunity for a hearing.

8. Section 445.52 would be amended by adding a new paragraph to read as follows:

§ 445.52 Participation.

(b) Hatching eggs produced by primary breeding flocks shall be fumigated according to the procedures described in §447.25(a) of this chapter. Provided, That alternative sanitizing procedures may be used with the approval of the Official State Agency in each specific instance and with the general concurrence by the Service in the policy adopted by the Official State Agency.

PART 447—AUXILIARY PROVISIONS ON NATIONAL POULTRY IMPROVEMENT PLAN

9. Section 447.43(a) would be amended and paragraphs (b) and (c) would be revised to read as follows:

§ 447.43 General Conference Committee.

(a) The General Conference Committee shall consist of the Assistant Secretary of Agriculture for Conservation, Research, and Education, or his designee, one member-at-large who is a participant in the National Poultry Improvement Plan and who shall be designated as vice chairman and one member to be elected, as provided in paragraph (b) of this section, from each of the following regions:

(b) The regional Committee members and their alternates will be elected by the official delegates of the respective regions and the member-at-large will be elected by all official delegates. There shall be at least two nominees for each position, and the voting shall be by secret ballot.

(c) Three regional members shall be elected at each Plan Conference. All members shall serve for a period of four years, subject to the continuation of the Committee by the Secretary of Agriculture, and may not succeed themselves. When there is a vacancy for the member-at-large position, the General Conference Committee shall make an interim appointment and the appointee shall serve until the next Plan Conference at which time an election will be held.

§ 447.46 [Amended]

10. Section 447.46 would be amended by deleting the third sentence.

Done at Washington, D.C., this 24th day of November 1978.

RALPH J. MCCRACKEN, Acting Director, Science and Education.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 240]

(RELEASE No. 34-15355; File No. 67-564)

SECURITIES CONFIRMATIONS

AGENCY: Securities and Exchange Commission.

ACTION: Extension of comment period.

SUMMARY: The Commission is extending the time for comment on proposed rulemaking to require securities dealers to disclose on customer confirmations the mark-up or mark-down or similar remuneration received in a "riskless" principal transaction in debt securities other than municipal securities. Proposed Rule 15c2-12 would require brokers and dealers trading with customers as principal to disclose the amount of any mark-up or mark-down or similar remuneration received in a "riskless" principal transaction in debt securities other than municipal securities. Proposed Rule 15c2-12 would establish an analogous confirmation disclosure requirement for transactions in municipal securities.

The Commission has received a number of requests to extend the comment period. In view of the complexity and possible impacts of the rulemaking proposal, the Commission has determined to extend the comment period until January 15, 1979.

By the Commission.

SHIRLEY E. HOLLIS, Assistant Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Food and Drug Administration

[21 CFR Parts 175 and 189]

(Docket No. TEN-0113)

2-NITROPROPANE

Proposed Removal Form Food Additive Use

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the food additive regulations by deleting provisions for use of 2-nitropropane as a component of adhe-
PROPOSED RULES

Copies of the HEW/NIOSH report and the "Current Intelligence Bulletin: 2-nitropropane" have been placed on public display at the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, and may be seen Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Having evaluated the available data, the Commissioner concludes that the HEW/NIOSH report demonstrates that 2-nitropropane is a carcinogen in test animals. He recognizes that the test was done by inhalation, but the data show that only small amounts of 2-nitropropane remain in food-packaging adhesives from its regulated use. Furthermore, only a small amount of 2-nitropropane could migrate into food from food-packaging adhesives. Therefore, the Commissioner expects to issue the final regulation prohibiting the use of 2-nitropropane as a food additive no later than March 1, 1979, which shall be effective upon publication under section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(e)).

The Commissioner is not aware of any data showing that 2-nitropropane used as a food additive is a human carcinogen. He advises that only small amounts of 2-nitropropane remain in food-packaging adhesives from its regulated use. Furthermore, only a small amount of 2-nitropropane could migrate into food from food-packaging adhesives. Therefore, the Commissioner concludes that the potential risk to the public health is not sufficient to require removal from the market of food-contact articles containing 2-nitropropane or the issuance of a public warning against the use of these products. Consequently, the Commissioner is of the opinion that the public health would be adequately served by permitting the use of existing stocks of products containing 2-nitropropane that were manufactured prior to the effective date of the final regulation but prohibiting any future use of 2-nitropropane as a food additive.

Accordingly, the FDA is proposing to amend §175.105 Additives (21 CFR 175.105), by deleting the use of 2-nitropropane currently permitted in this section, and to amend Part 189, Substances prohibited from use in human food (21 CFR Part 189), by adding a new section covering 2-nitropropane.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(a), 402, 409, 701, 52 Stat. 1046-1047 as amended, 1055-1056 as amended, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(a), 342, 348, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 175 and 189 of Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

§175.105 [Amended]

1. In Part 175, §175.105 Additives is amended by deleting the item "2-nitropropane" from the substances listed in paragraph (c)(5).

2. In Part 189, Subpart D is amended by adding a new section to read as follows:

§189.310 2-Nitropropane.

(a) 2-Nitropropane is the chemical C,H_2NO_3 [Chemical Abstracts Registry Service No. 79-48-9]. It is a synthetic chemical, classified as a flammable liquid, and it is not found in natural products at levels detectable by the official methodology. It has been used in the solvent systems for adhesives.

(b) Food containing any added levels of 2-nitropropane is deemed to be adulterated in violation of the act, based upon an order published in the Federal Register of (insert date of publication of final order in the Federal Register).

Interested persons may, on or before January 2, 1979, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this proposal will not have a major economic impact as defined by Executive Order 11949 (amended by Executive Order 11591) and OMB Circular A-107. A copy of the economic impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

WILLIAM P. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

(Docket No. 78N-0038)

SUNSCREEN DRUG PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

Proposed Rulemaking; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of Comment Period.

SUMMARY: This document extends to December 15, 1978, the comment period on the proposal to establish conditions for the safety, effectiveness, and labeling of over-the-counter (OTC) sunscreen drug products. The action is being taken to allow more time for the collection and assessment of data to provide for more meaningful comments on the issue.

ADDRESS: Written comments to the Hearing Clerk, (HFA-305), Food and Drug Administration, Room 4-45, 5600 Fisher Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

William E. Gilbertson, Bureau of Drugs, (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4980.

SUPPLEMENTARY INFORMATION:

In the Federal Register of August 25, 1978 (43 FR 36206), the Commissioner of Food and Drugs issued a proposal to establish conditions for the safety, effectiveness, and labeling of sunscreen drug products for over-the-counter (OTC) human use. The proposed rule, based on the recommendations of the Panel on Review of Topical Analgesics including antihistamine, otc, burn, and sunburn treatment and prevention drugs is part of the Food and Drug Administration’s ongoing review of OTC drug products. Interested persons were given until November 24, 1978 to comment on the proposal.

In response to the proposal, the Cosmetic, Tonsley and Fragrance Association, Inc., on behalf of its members, requested an extension of the comment period. The association requested a 21-day extension so as to be able to develop a response to the proposal at an association meeting that could not be scheduled before November 24, 1978. The Commissioner has considered the request and finds that an extension of the comment period is in order. Accordingly, the comment period is extended to December 15, 1978. Comments may be seen in the office of the Hearing Clerk, Food and Drug Administration, at the address noted above, between 9 a.m. and 4 p.m., Monday through Friday.

WILLIAM P. RANDOLPH
Acting Associate Commissioner for Regulatory Affairs.

TETRACYCLINE

Revised Standard Response Line Concentrations; Correction

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule; Correction.

SUMMARY: In FR Doc. 78-26951 appearing at page 44864 in the Federal Register for Friday, September 29, 1978, the following corrections are made on page 44865 in §436.106(a):

1. The fourth column of the table is corrected by listing "Distilled water" for the items "Methacycline" and "Rolitetracycline."

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

John Richards, Federal Register Writer (HFC-11), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2904.

MARY A. McENTIRE
Assistant Director for Regulatory Affairs, Bureau of Drugs.

[FR Doc. 78-33413 Filed 11-30-78; 8:45 am]

The primary author of this document is Mary F. Asbell, Education Specialist, Office of Indian Education Programs, Bureau of Indian Affairs, Washington, D.C., 202-343-7387.

It is proposed to add a new Part 32a to Subchapter E, Chapter 1 of Title 25 of the Code of Federal Regulations to read as follows:

PART 32a—ADULT EDUCATION

Sec.

32a.1 Purpose and scope.

32a.2 Definitions.

32a.3 Annual program planning.

32a.4 Contracting Adult Education Program funds.

32a.5 Annual program reports.

§ 32a.1 Purpose and Scope.

This Part governs the expenditure of funds appropriated for the Adult Education programs of the Bureau of Indian Affairs. It gives guidance to educational opportunities and learning experiences for adult Indians which are designed to improve their ability to function as individuals and members of communities.

This Part applies to all Bureau Adult Education programs whether operated under contract or otherwise; except as otherwise provided for by law or regulation.

§ 32a.2 Definitions.

As used in this Part:

(a) "Assistant Secretary" means the Assistant Secretary—Indian Affairs, Department of the Interior or his authorized representative.

(b) "Adult Education" means programs that will enable adults to: (1) become functionally literate; (2) pass the General Equivalency Diploma test or otherwise raise their levels of educational achievement; (3) obtain employment or to improve their employment status through education and training; and (4) enable them to meet other individual educational and/or training needs or interests.

(c) "Adult Student" is a person who is 16 years of age or older and is not already enrolled in a formal education program.

(d) "Indian Tribe" means any Indian Tribe, Band, Nation, Rancheria, Pueblo, Colony or Community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) which is federally recognized as eligible by the United States Government through the Secretary for the special programs and services provided by the Secretary to Indians because of their status as Indians.

PROPOSED RULES.

(e) "Indian" means a person who is a member of an Indian tribe.

§ 32a.3 Annual program planning.

For each Fiscal Year, the Area, Agency or Tribal contractor responsible for establishing classes or programs for adult Indians will develop a written plan which will encompass the following:

(a) An annual needs assessment which will be conducted within the community or communities where Bureau Adult Education programs are to be funded. This annual assessment will determine the types of programs needed by community members, the number of students wishing to enroll, and the time and or day most desired for programs to be held.

(b) Establish priorities for types of programs;

(c) Program objectives to be met;

(d) Resources to be used (staff, materials, facilities and funds);

(e) Activities to meet program objectives; and

(f) Scheduled evaluation of activities.

This annual plan shall be on file in the originating office and in the bureau of Indian Affairs Area Director's office. For contracting purposes, the annual plan shall become a part of the negotiated contract.

§ 32a.4 Contracting Adult Education Program funds.

§ 32a.5 Annual program reports.

All Adult Education programs funded under this Part will make an annual report to the Director, Office of Indian Education Programs, BIA. Reporting forms and instructions will be available in each Bureau Area and Agency office.

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821. The Assistant Secretary—Indian Affairs has determined that the provisions of Executive Order 11821 do not apply.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 50]

REVIEW OF THE CARBON MONOXIDE AIR QUALITY STANDARD

Advance Notice of Proposed Rulemaking

AGENCY: Environmental Protection Agency.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: On April 30, 1971, the Environmental Protection Agency as published in the Federal Register (FR) 8186) a National Ambient Air Quality Standard for carbon monoxide. That standard was republished on November 25, 1971 and transferred to Part 50 of Title 40 of the Code of Federal Regulations (36 FR 22384, 40 CFR § 50.8). Both the primary (health-based) and secondary (welfare-based) standards were set at 40 milligrams per cubic meter (35 ppm) one hour and 10 milligrams per cubic meter (0 ppm) maximum 8-hour, concentrations not to be exceeded more than once per year. The scientific, technical, and medical basis for these standards are contained in the current air quality criteria document for carbon monoxide. This document (AP-62) was published by the U.S. Department of Health, Education, and Welfare in March 1970.

Pursuant to the provisions of Sections 108 and 108(d) of the Clean Air Act, as amended, EPA is now reviewing, updating, and revising the AP-62 criteria document for carbon monoxide. Upon completion of this process, a draft of the revised document will be available for review. Interested members of the public and will be submitted to EPA's Science Advisory Board for review. A Federal Register notice will announce its availability, which is anticipated by late November.

In addition, as EPA develops issue papers relating to the standard review, the public will be given notice through the Federal Register of the status and availability of these papers. The public will be provided opportunity to comment through public forums and/or written comments.

FOR FURTHER INFORMATION CONTACT:

Joseph Padgett at Environmental Protection Agency, Strategies and Air Standards Division (MD-12), Research Triangle Park, North Carolina 27711; telephone (919) 541-5204.

1 Not published in the Federal Register.

Copies are available at the EPA Library (MD35), Research Triangle Park, N.C. 27711.
The Further Notice of Inquiry In the above entitled matter, (FCC 78-736, released October 20, 1978), is modified by the following corrections:

(a) Adding “(RM-2749)” directly underneath “Docket No. 21049” in the heading;

(b) Amending the caption to read “Commercial Television Network Practices and Ability of Station Licensees to Serve the Public Interest.”

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TACARICO,
Secretary.

[FR Doc. 78-33695 Filed 11-30-78; 8:45 am]

[6712-01-M]

PROPOSED RULES

ADDRESS: Federal Communications Commission.

ACTION: Ordaining Time to File Comments.

SUMMARY: The FCC is permitting into the administration of its telegraph examinations to handicapped persons who apply for amateur radio licenses. The comment period ends November 30, 1978. Mr. Norman Kaplan has petitioned to extend the comment period. The comment period is being extended to encourage as wide a participation in the proceeding as possible.

DATES: The comment period is extended to March 30, 1979. The reply comment period is extended to April 30, 1979.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
DEPARTMENT OF AGRICULTURE

Office of the Secretary

1978 WHEAT AND BARLEY CROPS

Determinations Regarding the Proclamation of National Program Acreages

AGENCY: Agricultural Stabilization and Conservation Service.

SUMMARY: This notice is to proclaim a revised national program acreage, for the 1978 crops of wheat and barley in order to determine the program allocation factor for these commodities. This action is taken in accordance with applicable provisions of the Agricultural Act of 1949, as amended by the Food and Agriculture Act of 1977. The provisions of the 1949 Act, as amended, authorize the Secretary of Agriculture, based on latest information, to revise the national program acreage which he initially proclaims by August 15 (for wheat) and November 15 (for barley) of each calendar year for the crop harvested in the next succeeding calendar year.

DATE: December 1, 1978.

ADDRESSES: Production Adjustment Division, ASCS-USDA, 3630 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Bruce R. Weber (ASCS), 202-447-7878.

SUPPLEMENTARY INFORMATION: The need for this notice is to revise the 1978-crop barley and wheat national program acreages first proclaimed for the purpose of determining the national allocation factor for such commodities as authorized in Sections 105A(d)(1) and 107A(d)(1) of the Agricultural Act of 1949, as amended by the Food and Agriculture Act of 1977 (hereinafter referred to as the "Act"). These provisions authorize the Secretary to revise the national program acreage which he initially proclaimed for any crop year for the commodity for the purpose of determining the allocation factor if he determines that such revision is necessary based upon the most recent available information. The Secretary has determined that the 1978-crop wheat and barley national program acreages shall be revised based upon the most recent available information. Therefore, it is essential that this decision be made as soon as possible since the proclamation of the revised national program acreages is required as soon as such decision is made. This decision directly affects other decisions to be made by the Secretary on November 30, 1978; therefore, it is impracticable and contrary to the public interest to comply with the 30-day effective date requirement of 5 U.S.C. 553 and the 60-day carryover wheat stocks adjustment requirement of Executive Order 12044. Therefore, this notice of determination shall become effective upon date published in the Federal Register.

NOTICE OF DETERMINATION

1. Revised National Program Acreage for 1978-Crop Wheat. It is hereby proclaimed that the final national program acreage for the 1978 crop of wheat shall be 58.6 million acres. The revised national program acreage is based upon the following data:

(a) Estimated domestic consumption, 1978-79 (million bushels)................................. 770
(b) Plus estimated exports, 1978-79 (million bushels)........................................ 1,150
(c) Less estimated imports, 1978-79 (million bushels)........................................ 2
(d) Less estimated adjustment to decrease stocks to desired level (million bushels)........... 78
(e) Divided by national weighted average farm program yield (bushels/acre).................... 31.3
(f) Equals: 1978 national program acreage (million acres)........................................ 58.8

2. Revised National Program Acreage for 1978-Crop Barley. It is hereby proclaimed that the final national program acreage for the 1978 crop of barley shall be 7.5 million acres. The revised national program acreage is based upon the following data:

(a) Estimated domestic consumption, 1978-79 (million bushels)................................. 347
(b) Plus estimated exports, 1978-79 (million bushels)........................................ 40
(c) Less estimated imports, 1978-79 (million bushels)........................................ 10
(d) Less estimated adjustment to decrease stocks to desired level (million bushels)........... 21
(e) Divided by national weighted average farm program yield (bushels/acre).................... 47.6

DRAFT ENVIRONMENTAL IMPACT STATEMENT

Rural Electrification Administration

NOTICE is hereby given that the Rural Electrification Administration (REA) intends to prepare a draft environmental impact statement in accordance with Section 102(2)(C) of the National Environmental Policy Act of 1969 in connection with a request from Alabama Electric Cooperative (AEC), P.O. Box 550, Andalusia, Alabama, 36420, (AC 205-222-2571) to use REA guaranteed loan funds which would provide financing for AEC's obtaining a leasehold interest in properties in Alabama containing coal reserves presently being mined. AEC proposes to have the existing mining company continue to mine for AEC's account under proposed contractual arrangements subject to REA approval. The properties involved are located in Winston, Marion and Franklin Counties. It is anticipated that the...
coal will be transported by barge on the Black Warrior and Tombigbee Rivers and/or by railroad to power plants owned by AEC.

AEC as part of its ongoing search for sources of coal for its power plants has explored viable alternatives for obtaining coal supply and their environmental impacts to determine the most effective, economical and environmentally acceptable arrangements for obtaining reliable sources of coal to meet its needs.

REA will consider the need for the supply of coal and the environmental effects resulting from the proposed contractual arrangements described above, as well as the environmental effects of other alternatives.

Interested persons are invited to submit comments, questions and/or recommendations which may be helpful in preparing the draft environmental impact statement. Comments should be forwarded to Mr. Richard F. Richter, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C., 20250. Additional information may be obtained from AEC at the address shown above.

Any loan or loan guarantee which may be made pursuant to AEC’s application to REA will be subject to, and release of funds contingent upon AEC’s reaching satisfactory conclusions with respect to, environmental effects. Final action will be taken only after compliance with environmental statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 27th day of November, 1978.

ROBERT W. FERGUSON
Administrator, Rural Electrification Administration.

[FR Doc. 78-33606 Filed 11-30-78; 8:45 am]

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The current qualification requirements were published in 1970 before the present level of consistency in registration requirements among the Boards of Registration in the States, Territories, and the District of Columbia was reached. Consistency in requiring subject matter intensive written examinations has now been achieved which allows the substitution of successful completion of the examinations for the currently required credit hours.

LAND SURVEYING SERIES, GS-1373

BASIC REQUIREMENTS FOR ALL POSITIONS GS-5 THROUGH GS-15

Add alternative C.

C. Alternatives as described in paragraphs A or B, except that the requirement of up to 30 semester hours, including the 6 semester hours of surveying, may be satisfied by a current registration as a land surveyor in a State, Territory, or the District of Columbia, obtained by written examination. Such registration must have been obtained under conditions outlined in the National Council of Engineering Examiners Unified Model Law for Registration of Surveyors. Candidates wishing to be considered under this alternative must show evidence of registration based on successful completion of the written examinations. Registrations granted prior to adoption of the Uniform Law by the State, Territory, or District of Columbia are not acceptable under this option.

JAMES C. SYKES
Executive Assistant to the Commissioners.

IMPROVING COMMISSION REGULATIONS

Report on Implementation of Executive Order 12044

AGENCY: United States Civil Service Commission.

SUMMARY: The Civil Service Commission published its draft report on implementation of Executive Order 12044, "Improving Government Regulations" for public comment on May 25, 1978 (43 FR 22137). The Commission received only two responses to its draft report. This response was favorable and raised no major issues. Accordingly, the Commission has adopted its draft report as its final report on implementation of Executive Order 12044. This report outlines:

(1) A description of the process for developing regulations;
(2) The changes made to comply with Executive Order 12044;
(3) Proposed criteria for defining significant regulations;
(4) Reasons for not establishing criteria for determining which regulations require regulatory analyses;
(5) Proposed criteria for selecting existing regulations for review.

FOR FURTHER INFORMATION CONTACT:

The Civil Service Commission’s regulatory process is described in the appendix. The following changes have been made to comply with the Executive order. The Commission:

(1) Developed a procedure to provide an opportunity for early participation by interested parties;
(2) Developed proposed criteria for identifying significant regulations;
(3) Established a requirement that proposed significant regulations are to be published in the Federal Register for public comment in addition to its current practice of obtaining comments from Federal agencies, labor organizations, and other interested parties directly;
(4) Developed a procedure for publishing a semiannual agenda of regulations in the Federal Register;
(5) Developed proposed criteria for selecting existing regulations for review.

These changes are described in the appendix.

REGULATORY ANALYSIS

Section 3(a) of the Executive order requires that each agency establish criteria for determining which regulations require regulatory analysis. The Commission is the central personnel agency of the executive branch of the Government. The Commission, as directed or authorized by statute or by order of the President, serves as the personnel management agency of the President. In this capacity, the Commission develops and issues regulations for personnel management operations in executive agencies. The Commission does not believe it likely that a statute, Executive order or civil...
service rule would make it necessary for the Commission to issue regulations that would so affect the general economy as to make a regulatory analysis appropriate. However, the Commission may, at its discretion, prepare a regulatory analysis on any proposed regulation. Consequently specific criteria for determining which regulations require regulatory analysis are not established.

**Review of Existing Regulations**

The Commission has established criteria for review of existing regulations. Those criteria are described in section 4 of the appendix. The Commission will publish a list of existing regulations for review in the Federal Register on December 1, 1978.

**NOTICES**

1. PURPOSE. The purposes of this chapter are to establish policy and objectives for simplifying and improving the existing regulations; prescribe procedures for issuing new regulations and for reviewing existing regulations; and to assign responsibility for ensuring that the objectives of Executive Order 12044 are achieved. The requirements of this chapter do not apply to regulations that are issued in response to an emergency or which are governed by short-term statutory or judicial deadlines. In these cases, the initiating office shall include, for publication in the Federal Register, a statement of the reasons why it is impractical or contrary to the public interest for that office to follow the requirements of this chapter. Such a statement shall include the name of the official responsible for this determination.

2. POLICY. It is the policy of the Commission that regulations shall be as clear and simple as possible and shall be developed through a process which ensures that:
   a. The need for and purposes of the regulations are clearly established;
   b. The regulations are clear, precise, and understandable;
   c. The regulations have been coordinated with all offices which have a program interest in them;
   d. An opportunity exists for early participation and comment by Federal agencies and other interested parties;
   e. Relevant issues are considered and analyzed;
   f. Compliance costs, paperwork and other burdens on those who may be affected are minimized; and
   g. Comments are considered and an adequate response is prepared.

3. RESPONSIBILITIES OF THE INITIATING OFFICES. a. "Initiating office" means an organization which has responsibility for developing regulations for issuance by the Commission.
   b. The head of each initiating office has primary responsibility for:
      1. Preparing a brief summary, early in the regulatory process, for the Commission on the issues and alternatives involved in the matter requiring regulation;
      2. Developing proposed regulations in accordance with the policy stated in this chapter;
      3. Ensuring that the public has an early and meaningful opportunity to participate in the development of regulations through a variety of ways;
      4. Ensuring that the public is given at least 60 days to comment on significant regulations unless circumstances require a shorter review period;
      5. Providing a brief statement of the reasons for the proposed or final regulations when it is not possible to give the public at least 60 days to comment on significant regulations;
      6. Establishing and carrying out a systematic procedure for reviewing and revoking or revising existing regulations; and
      7. Informing the Commission on proposed or final regulations of the:
         a. Reason and legal authority for the regulation;
         b. Objectives(s) of the regulation;
         c. Relevant issues involved and the alternatives explored for achieving the objectives of the regulation;
         d. Probable reporting requirements; and
         e. Opportunities for interested parties to participate in the regulatory process.

4. REVIEWING EXISTING REGULATIONS. Each initiating office shall establish procedures for periodically reviewing all existing regulations and revoking or revising those regulations which it determines are not achieving their intended purpose.

5. SIGNIFICANT REGULATIONS. Each initiating office shall use the following criteria in identifying which regulations are significant regulations.
   a. A significant regulation is a regulation in which:
      1. A statute, Executive order or civil service rule to be implemented provides substantial discretion to the Commission over the practices, procedures or standards for achieving what is required;
      2. The coverage of State or local governments or individuals is on a national basis; or
      3. There is a substantial or recurring reporting requirement.
   b. Editorial changes to significant regulations such as a change in an office address, references cited, or changes made to simplify or clarify the language are not themselves significant regulations. However, an amendment which changes a practice, procedure, or standard of significant regulations may itself be a significant regulation.
   c. When a regulation does not meet the criteria for a significant regulation, the initiating office shall include a statement to that effect at the time the regulations are proposed.

6. SEMIANNUAL AGENDA OF SIGNIFICANT REGULATIONS. Each initiating office shall submit to

---

*NOTICES*

---

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
the Issuance System Manager an agenda of significant regulations under development or review by May 1 and November 1 of each year.

b. The agenda shall describe the regulations being considered; the reason and legal basis for the action being taken, and the status of regulations previously listed on the agenda.

c. Each item on the agenda shall include the name and telephone number of a knowledgeable official.

d. The agenda also shall include existing regulations scheduled for review.

e. The Issuance System Manager shall prepare the regulatory agenda and submit it to the Commission for consideration and approval.

f. The Executive Assistant to the Commissioners shall publish the regulatory agenda in the Federal Register by June 1 and December 1 of each year.

7. PROCESS FOR DEVELOPING SIGNIFICANT REGULATIONS. The following is a brief description of the process for developing and issuing significant regulations. The items listed are the minimum steps necessary for compliance with Executive Order 12044.

a. Prior to developing draft regulations the initiating office prepares a brief summary early in the regulatory process to the Commission on the issues and alternatives involved in the matter requiring regulation.

b. The initiating office discusses the problems, statute, civil service rule, or Executive order with appropriate IAC Committees, labor organizations, or other interested parties for suggestions and recommendations.

c. The initiating office prepares draft regulations and circulates them among Commission offices and appropriate IAC Committees who have a program interest for comments and suggestions.

d. The initiating office forwards the draft regulations to the Commission for consideration and approval to publish in the Federal Register for public comment and additional consultation with Federal agencies, State and local governments as appropriate, labor organizations, or other interested parties.

e. The initiating office forwards the final version of the regulations with its response to the major issues raised in the public comments to the Commission for approval and publication in the Federal Register as final regulations.

DEPARTMENT OF COMMERCE

National Bureau of Standards

SIMPONIFIED PRACTICE RECOMMENDATION

Intent to Withdraw

In accordance with §10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the intent to withdraw Simplified Practice Recommendation R-3-60, "Metal Lath (Expanded and Sheet) and Metal Finishing Accessories."

It has been tentatively determined that this standard is technically inadequate and that revision would serve no useful purpose because the subject matter of R 3-60 is adequately covered by the American Society for Testing and Materials' standard ASTM C 847-77, "Standard Specification for Metal Lath," and the American National Standards Institute's standard ANSI A42.4-1967, "Specifications for Interior Lathing and Furring."

Any comments or objections concerning this intended withdrawal of this standard should be made in writing to Standards Development Services, National Bureau of Standards, Washington, D.C. 20234, on or before January 2, 1979. The effective date of withdrawal will not be less than 60 days after the final notice of withdrawal. Withdrawal action terminates the authority to refer to a published standard as a voluntary standard developed under the Department of Commerce procedures from the effective date of withdrawal.

ERNEST AMBLER,
Director.

[3510-12-M]

National Oceanic and Atmospheric Administration

ENVIRONMENTAL IMPACT STATEMENT PREPARED ON PROPOSED WASHINGTON COASTAL MANAGEMENT PROGRAM AMENDMENT NO. 1

The hearing schedule is:

DECEMBER 19, 1978
Peninsula College, Little Theatre, 1502 East Laurel Street, Port Angeles, Washington. This hearing will begin promptly at 7:00 p.m.

DECEMBER 20, 1978
Federal Building, South Auditorium, 4th Floor, 915 2nd Avenue, Seattle, Washington. This hearing will be held in two sessions, from 1:30 p.m. until 4:00 p.m. and from 7:00 p.m. until 10:00 p.m.

The views of interested persons and organizations on the adequacy of the impact statement and/or the Amendment to the Washington Coastal Management Program are solicited, and may be expressed orally or in written statements. Persons or organizations wishing to be heard on this matter should contact the Office of Coastal Zone Management (OCCZM), National Oceanic and Atmospheric Administration, 3301 Whitehaven Street, N.W., Washington, D.C. 20235 (phone: 202-632-5231), so that an appearance schedule may be prepared. In addition, requests for presentations will be accepted immediately prior to the hearing. Presentations are scheduled on a
first-come, first-served basis, and should be limited to ten minutes in order to assure that all views can be heard. Office of Coastal Zone Management staff may wish to question speakers following the conclusion of his/her statement. If time permits, additional statements (and general discussion) may be scheduled at the conclusion of presentations. No verbatim transcript of the hearing will be maintained; but staff present will record the general thrust of the remarks.

As part of his review of the Amendment to the Washington Coastal Management Program, the Assistant Administrator for Coastal Zone Management will consider fully all comments received at these hearings, as well as written statements submitted to, and received by OCZM on or before January 31, 1979. As part of the procedures leading toward approval of this amendment, a Final Environmental Impact Statement will be prepared pursuant to the National Environmental Policy Act of 1969 and its implementing guidelines which reflect his consideration of these comments. All written comments received by OCZM prior to the deadline will be included in the FEIS.

R. L. Carnahan, Acting Assistant Administrator for Administration.

Maritime Administration

RECONSTRUCTION OF FOUR MA DESIGN C5-S-75A CARGO VESSELS TO MA DESIGN C8-S-75C FULL CONTAINERSHIP VESSELS

Computation of Foreign Cost

Notice is hereby given of the intent of the Maritime Subsidy Board, pursuant to the provisions of Section 501 (a) of the Merchant Marine Act, 1936, as amended, to compute the estimated foreign cost of the reconstruction of four MA Design C5-S-75A cargo vessels to MA Design C8-S-75C full containership vessels.

Any person, firm or corporation having any interest (within the meaning of Section 501(a)) in such computations may file written statements by the close of business on December 12, 1978, with the Secretary, Maritime Subsidy Board, Maritime Administration, Room 310, Department of Commerce Building, 14th & E Streets, N.W., Washington, D.C. 20230.

By order of the Maritime Subsidy Board, Maritime Administration.
JAMES S. DAWSON, JR.,
Secretary.

[6355-01-M]

CONSUMER PRODUCT SAFETY COMMISSION

UPHOLSTERED FURNITURE FLAMMABILITY

Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of meeting.

SUMMARY: The Commission has recommended that the Commission publish a proposed safety standard to address the possible hazards of ignition of upholstered furniture by cigarettes. Before deciding whether to propose a flammability standard, the Commission will hold a meeting to hear the views of representatives of the upholstered furniture industry, as well as of any other interested persons on the staff briefing package.

DATES AND ADDRESSES: The meeting will be on December 20, 1978 beginning at 9:30 a.m., at Room 2006 of the New Executive Office Building, 17th and G Streets, NW., Washington, D.C. Any persons wishing to make presentations should contact Richard A. Danen, Office of the Secretary, Third Floor, 1111 19th Street, NW., Washington, D.C., 202-634-7700 by December 13, 1978.

Copies of the staff briefing package are available at the Office of the Secretary.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: On September 15, 1977, the Commission found, preliminarily, that a mandatory standard is necessary to protect the public from the unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage, associated with the cigarette ignition of upholstered furniture. Prior to reaching this decision, the Commission had reviewed (1) a draft proposed mandatory standard which was developed by the National Bureau of Standards and submitted by Commission staff, (2) voluntary action proposals submitted by industry associations, and (3) a petition from the state of California (FP 77-2) that the Commission adopt the California upholstered furniture flammability standards as the national standard. At that time, FP 77-2 had not yet been evaluated by the staff as the California standard was still undergoing revision.

Upon making its preliminary finding, the Commission directed the staff to revise the draft standard in order to reduce the number and frequency of tests called for in the standard and to reduce the testing costs. The staff was directed to present briefing materials for such a revised standard, to evaluate voluntary action proposals by industry, and to evaluate petition FP 77-2.

The staff has recently completed these tasks and has submitted a briefing package to the Commission on upholstered furniture flammability. The staff recommends that the Commission publish the draft standard in the briefing package.

During the development of the briefing package, various industry groups have requested meetings to discuss issues regarding regulation of upholstered furniture flammability. Pursuant to these requests, the Commission has decided to hold a public meeting to hear the views of industry before deciding what action to take regarding cigarette ignition of upholstered furniture. The Commission is also interested in hearing the views of any other
persons who may have an interest in the issue.

Under the Flammable Fabrics Act and the Administrative Procedure Act which govern the issuance of regulations concerning flammable fabrics, the Commission is not required to provide an opportunity for oral presentations of views before a standard is proposed. However, the Commission believes it would be beneficial to hold a public meeting for the purpose of hearing the views of industry members and any other interested persons, including small businesses and consumers or representatives of consumer groups, before deciding on whether to publish the revised standard submitted by its staff, as a proposed standard.

Therefore, the Commission will hold a public meeting on December 20, 1978, from 9:30 a.m. to 5:00 p.m. in Room 2008, New Executive Office Building, 17th and G Streets, NW., Washington, D.C. for the purpose of hearing views on a possible upholstered furniture flammability standard. Those who wish to speak on the contents of the briefing package should advise Richard A. Danca, Office of the Secretary, Consumer Product Safety Commission, 1111-18th Street, NW., Washington, D.C. 20207 202-634-7700 before December 13, 1978 of the amount of time needed.

Time will be allotted by the Office of the Secretary depending on the number of requests received. The Commission requests that comments at the meeting focus on the contents of the staff briefing package, which is available at the Office of the Secretary.

SADIE E. DUNN, Secretary, Consumer Product Safety Commission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

JOHN P. BOOTH & ASSOCIATES ET AL.

Order Granting Petition for Special Relief

The petitions were filed pursuant to Section 2.76 of the Commission's General Policy and Interpretations. All petitions requested a rate of 56c/Mcf for gas sold to Northern Natural Gas Company (Northern) from the following wells: Black No. 1, E. McMinnly No. 1, McMinnly No. 1, Swazy No. 1. The subject wells are located in Clark County, Kansas.

Booth, a small producer and operator of the property, owns a 40.6% net working interest. Sun, a large producer, owns a 13.6% net working interest in the property. Atlantic Richfield Company, a large producer, owns the remaining 26.8% net working interest in the property.

Booth's sale of gas is being made under a contract dated June 14, 1961, pursuant to a small producer certificate issued in Docket No. CS72-0371. Sun's sale of gas is made under a separate contract dated September 14, 1961, on file as Sun's FERC Gas Rate Schedule No. 395. Atlantic's sale is covered by two contracts dated August 10, 1961, and June 12, 1961, on file as Atlantic's FERC Gas Rate Schedule No. 462 and No. 234, respectively. The requested rate is contractually authorized under all contracts. Booth is currently collecting 56c/Mcf while Sun and Atlantic are collecting 29.5c/Mcf.

The petitioners propose to install a rental compressor at an estimated cost of $22,622.1 Installation of compression will increase the production of the estimated 438,520 Mcf of gas remaining to be recovered over the next five years.

Booth filed data in support of the petition on the following dates: August 29, 1977, September 30, 1977, December 12, 1977, February 27, 1978, which has been clarified and refined through recent telephone conversations between staff and the working interest owners in regard to the project costs and proposed investment.

Staff has reviewed the detailed files in support of the proposed investment of $22,622, and, based thereon, finds the estimate to be acceptable. Staff has reviewed the applicants' annual estimated expenditures of $31,176, and finds them to be reasonable. A 5% annual inflation factor was applied in projecting total estimated production expenses of $177,908 for the remaining productive life.

Staff has used the above costs along with the 365,445 Mcf of reserves, attributable to 100% of the net working interest in a traditional cost study.2 The results of this analysis indicate that 58c/Mcf plus ad valorem tax will be required to allow the working interest owners to recover all costs associated with this project over its 5 year life including a 15% rate of return. Thus, the requested rate is cost supported.

We conclude, after studying the data submitted and the Staff's analysis thereof, that it is in the public interest to grant special relief to petitioners.

The Commission orders:

(A) The petitions of John P. Booth & Associates, Atlantic Richfield Company and Sun Oil Company, as amended are granted;

(B) John P. Booth & Associates, Sun Oil Company, and Atlantic Richfield Company be authorized to collect a total rate of 58c/Mcf at 14.40 psia, including adjustments, plus applicable ad valorem taxes for the sale of the subject gas effective upon the date of the Commission order herein or date of completion of the proposed work, whichever is later, subject to the conditions set forth in paragraphs (C) and (D) below;

(C) Booth must file a statement signed by Northern Natural Gas Company that work has been completed to its satisfaction within 30 days of the effective date specified in paragraph (B) above;

(D) Booth, Sun, and Atlantic shall separately file a Notice of Independent Producer Rate Change in Docket No. CS72-0371, FERC Gas Rate Schedule No. 395, and FERC Gas Rate Schedules No. 462 and 234 respectively, within 30 days of the date of the order herein.

By the Commission.

KENNETH F. PLUMES, Secretary.

| The Commission's order of November 23, 1977, authorized the construction, at a cost not to exceed $300,000, of certain natural gas facilities for miscellaneous rearrangements in the calendar year of 1978. It is stated in the instant petition that, due to three highway projects being completed in calendar year 1978, the necessary expenditures for miscellaneous rearrangements will be approximately $1,000,000. Consequently, Petitioner seeks a waiver of the total cost limitations for budget-type certificates for miscellaneous rearrangements pursuant to Section 157.7(c) of the Commission's Regulations to permit an increase in those limitations from $300,000 to $1,000,000. Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before December 14, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 187.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plum, Secretary.

[FEDERAL REGISTER, Vol. 43, No. 223—FRIDAY, DECEMBER 1, 1978]
Seaboard method employed by the company in this filing.

The United formula gives weight to the annual volumes of gas a pipeline has available for sale than the physical capacity of a pipeline. Use of the United method more closely relates a customer's cost responsibility to his use of the pipeline's facilities when there is significant underutilization of a pipeline's capacity. In Opinion 24, the Commission found significant curtailment on an annual basis, and a heavy reliance on storage withdrawals to meet peak demand on Cities' system. Even where lines downstream of Cities storage facilities continue to be filled at near full capacity, this results in significant underutilization of capacity, particularly upstream of Cities storage facilities.

Cities' filing reflects continuing curtailment on an annual basis, and dependence on large storage withdrawals to meet peak demand. All the factors which prompted the Commission to apply the Seaboard formula in Opinion No. 24 continue to prevail in this filing. No significant difference of material fact or changed circumstances have been shown to set this filing apart from Cities prior filing. No useful purpose would be served by relitigating this issue in this filing. It is appropriate, therefore, to summarily dispose of this issue on the merits without proceeding to an evidentiary hearing. Cities is directed to file revised tariff sheets, reflecting the United method of cost classification and cost allocation.

As it is Commission policy to allow into rate base only the costs of facilities which are used and useful to the ratepayers, Cities cannot include the costs of its recently certificated plant additions if they are not in service by the time the proposed rates go into effect. Consequently, acceptance of the present tariff sheets reflecting the cost of these facilities is specifically conditioned upon Cities' filing of revised tariff sheets to reflect a change in service cost to rates associated with any facilities not in service on or before April 30, 1979.

Cities has indicated that it will file revised tariff sheets to reflect a change in service costs to rates associated with any facilities not in service on or before April 30, 1979. These revised tariff sheets should also reflect the actual balance of advance payments as of April 30, 1979.

The Commission orders:

(A) Subject to the conditions of Ordering Paragraph (B), Cities, Service proposed Fourth Revised Sheet No. 6 to Volume No. 1 to First Revised Sheet No. 91 to Original Volume No. 2 of Cities FERC Gas Tariff are accepted for filing, and suspended for five months until April 28, 1979, at which time they may become effective subject to refund.

(B) Cities shall file revised tariff sheets to reflect: (1) the United method of cost classification, allocation, and cost allocation for any facilities, not in service, on or before April 30, 1979; (2) the current cost of purchased gas reflected in Cities' most recent FCA filing prior to the effective date of the proposed rates; (3) the actual balance of advance payments as of April 30, 1979; and (4) the effective GRI Funding Unit on the effective date of the increased rates and any resulting reduction in R&D costs as per Opinion No. 30.

(C) Staff shall serve top sheets on or before February 26, 1979.

(D) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for the purpose of this proceeding shall convene a settlement conference in this proceeding to be held within 10 days after the service of Staff's top sheets in a hearing room of the Federal Energy Regulatory Commission, 2106 North Capitol Street, N.W., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary to rule upon all motions (except motions to sever, consolidate or dismiss) as provided for in the rules of practice and procedure.

The petitioners to intervene listed in Appendix A to this order shall be permitted to intervene in this proceeding subject to the Commission's rules and regulations; Provided, however, that the participation of the intervenors shall be limited to matters affecting asserted rights and interests specifically set forth in the petitions to intervene; and Provided, further, that the admission of such intervenors shall not be construed as recognition that they might be aggrieved by any order entered in this proceeding.

The proceeds from the sale of the New Common Stock will be used to reduce outstanding short-term debt incurred for construction purposes. The short-term debt is expected to aggregate approximately $56 million at the time of sale and prior to the application of the proceeds. For the purpose of financing its construction program through 1981, the Company estimates that approximately $320 million, in addition to the proceeds from the sale of the New Common Stock, will be required from outside sources.

By the Commission.

KENNETH F. PLCUS, Secretary.

GAS RESEARCH INSTITUTE
Order Granting Rehearing

November 22, 1978.

On October 23, 1978, Tennessee Gas Pipeline Company, a division of Tenneco, Inc. (Tennessee) petitioned for rehearing or, in the alternative, clarification of Opinion No. 30, 1 issued September 21, 1978. In Opinion No. 30, the Commission approved the Gas Research Institute's (GRI) research and development program and stated that its members of GRI are currently collecting not noted a unit of the Gas Research Institute (GRI) would be permitted to collect a general funding unit of 3.5 mills per Mcf of "funding service" volumes in 1978.

In its Opinion, the Commission noted 2 that certain interstate pipeline members of GRI are currently collecting through their underlying rates amounts associated with the American Gas Association (AGA) Utility Research and Coal Gasification Programs. GRI will assume responsibility for funding these coal gasification programs in 1978. 3 Since GRI is funded through a surcharge to pipeline company rates, it appeared that a double recovery of funding for the transferred projects would occur if pipelines were permitted to collect the GRI surcharge, without revising underlying pipeline rates.

To eliminate this duplication of funding, the Commission's staff had recommended that those pipeline companies that are currently funding the AGA projects be required to file revised tariff sheets to reduce base tariff rates to reflect the lowered expense of contributing to AGA. California supported staff's recommendation. No other party commented on this point.

In response to staff's recommendation, the Commission stated: 4 The Commission hereby puts jurisdictional pipeline companies on notice that they will be permitted to collect the 3.5 mills per Mcf GRI funding unit in 1979 only upon the condition that the costs of funding the transferred AGA projects are eliminated from their base tariff rates by the filing of revised tariff sheets.

Tennessee submits that this condition would appear to disallow the flow-through of funding for the AGA coal gasification projects through December 31, 1978. Tennessee explains that AGA operates its R&D programs on a fiscal year basis from July through June, and it bills its members after December to recover program costs. Payments to AGA are, therefore, made during the last six months of the AGA fiscal year. For the fiscal year July, 1977 through June, 1978, AGA's billing to Tennessee and Tennessee's payment to AGA were made in March, 1978. Since GRI will assume administration of AGA's R&D projects as of January 1, 1978, in 1978 AGA will, according to Tennessee, bill its members only for coal gasification project costs incurred during the period July, 1978 through December, 1978.

Tennessee explains further that every six months, revised tariff sheets tracking R&D costs. Due to the delay in recovery under each tracking filing, Tennessee says it will not fully recover amounts already paid to AGA until June 30, 1979. The 1978 payment to AGA, if made before March 30, 1979, will be recovered over the fiscal year beginning July 1, 1979. Thus, Tennessee's R&D tracking filings would not reflect a downward adjustment for the elimination of payments to AGA for transferred, coal gasification projects until July 1, 1980. Yet, no double recovery of funding for the transferred coal gasification projects would occur.

Accordingly, Tennessee asks that the Commission grant rehearing of Opinion No. 30 or, alternatively, to clarify the Opinion to provide that while jurisdictional pipeline companies may collect the 1979 GRI funding unit only if the costs of funding the transferred AGA projects are eliminated from base tariff rates, such condition shall not apply to payments made to AGA on or after January 1, 1979 for coal gasification project costs incurred prior to January 1, 1979. The Commission finds that Tennessee has shown good cause to grant rehearing and to modify Opinion No. 30 as requested.

The Commission orders:

(A) Tennessee's October 23, 1978 petition for rehearing of Opinion No. 30 shall be granted.

(B) Opinion No. 30 shall be modified to provide that a jurisdictional pipeline may collect the 1979 GRI funding unit of 3.5 mills per Mcf only upon the condition that the costs of funding transferred AGA coal gasification projects are eliminated from the pipeline's base tariff rates. Provided, however, that such condition shall not apply so as to require elimination of payments actually made to AGA on or after January 1, 1979 for coal gasification project costs incurred by AGA prior to January 1, 1979 until such payments are recovered through jurisdictional rates.

(C) The Secretary shall cause prompt publication of this order in the Federal Register.

By the Commission.

KENNETH P. PLUMB,  
Secretary.

GAS RESEARCH INSTITUTE
Gas Research Institute Adjustment to Rates and Charges

Take notice that on November 16, 1978, Natural Gas Pipeline Company of Texas (Natural) submitted as part of its FERC Gas Tariff, Third Revised Volume No. 1, Thirty-Sixth Revised Sheet No. 5, to be effective January 1, 1979.

Natural states that the revised tariff sheet reflects the GRI adjustment related to the Gas Research Institute's 1978 Research and Development Program as approved by Commission Opinion No. 30 (RP78-76) issued September 21, 1978.

Copies of this filing have been mailed to Natural's jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 225 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before December 7, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH P. PLUMB,  
Secretary.

(Docket Nos. ER78-469 and ER78-508)
IDAHO POWER CO.
Compliance Filing

Take notice that Idaho Power Company (Company) tendered, on November 8, 1978, a filing in purported compliance with Commission Opinion Nos. 809 and 809-A.

The Company states that all parties of record have been served with copies of this filing.

Any person desiring to be heard or to protest said application should file a petition to intervene, protest or comment with the Federal Energy Regulatory Commission, 825 North Capitol, N.E., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions, protests or comments should be filed on or before December 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this submittal are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB, Secretary.

[6740-02-M]
(Docket No. CP78-621)
LONE STAR GAS CO., A DIVISION OF ENSERCH CORP.
Application

Take notice that on November 7, 1978, Lone Star Gas Company, a Division of ENSERCH Corporation (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP78-621 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the construction, during the calendar year 1979, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any material change in the service presently rendered by Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $300,000, which cost Applicant would finance from cash on hand.

Any person desiring to be heard on or to make any protest with reference to said application should on or before December 14, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, a petition to intervene in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file with the Commission and is available for public inspection.

(Docket No. EST9-14)
IOWA SOUTHERN UTILITIES CO.
Application

Take notice that on November 8, 1978, Iowa Southern Utilities Company (Applicant) filed an application with the Commission pursuant to Section 204 of the Federal Power Act and Part 34 of the Commission's regulations, for authorization to negotiate for the private placement of up to $15,000,000 of short-term First Mortgage Bonds or Debentures. Applicant is incorporated under the laws of the State of Delaware with its principal business office at Centerville, Iowa, and is engaged in the electric utility business in 24 counties in Iowa.

The proceeds from the sale of Bonds will be used as part of the external capital requirements for 1979 to finance Company's construction program.

Any person desiring to be heard or to make any protest with reference to the application should on or before December 7, 1978, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions, protests or comments should be filed on or before December 12, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this submittal are on file with the Commission and are available for public inspection.

(Docket No. ER78-58)
METROPOLITAN EDISON CO.
Proposed Tariff Change

Take notice that Metropolitan Edison Company (Met-Ed), on November 13, 1978, tendered for filing increased rates for all-requirements service to Hershey Electric Company and the Borough of Kutztown, Pennsylvania, served at transmission, voltage under rate "RT", and to the Boroughs of Goldsboro, Lewisberry, and Royalton, Pennsylvania, served at distribution voltage under rate "RE". Met-Ed states that also tendered for filing are increased rates for partial requirements and wheeling service to Allegheny Electric Cooperative, Inc. Met-Ed further states that, based on the calendar year 1979 test period, the proposed rates would produce $3,037,945 in additional revenues from all-requirements customers and $1,134,552 in additional revenues from Allegheny, Met-Ed requests an effective date of January 12, 1979, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon Met-Ed's affected jurisdictional customers and the Pennsylvania Public Utility Commission, according to Met-Ed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest or comment with the Federal Energy Regulatory Commission, 825 North Capitol, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of

(Docket No. ER78-441)

NEW ENGLAND POWER CO.

Order Accepting Compliance Filing

November 22, 1978.

On September 19, 1978, the New England Power Company (NEPCO) filed an unexecuted Power Contract for System Power Unreserved with the Town of Hudson (Hudson) in compliance with Ordering Paragraph (A) of the Initial Decision in this docket, issued July 13, 1978. This filing modifies an unexecuted Power Contract between NEPCO and Hudson filed with this Commission on November 3, 1977 which purported to effectuate the terms of a Letter Agreement between the parties dated January 13, 1977. The Letter Agreement, inter alia, summarized the charges, terms and conditions under which NEPCO would supply System-Power Unreserved to NEPCO and included the following provision:

"It is understood that the price for the capacity set forth above, including transmission (emphasis added), is firm at $53.00 per kilowatt hour through October 31, 1978. Thereafter, the company reserves the right to adjust the price for said capacity on a cost of service basis. The price for energy will be at the Company's actual monthly system average production cost (fuel only)."

The final paragraph of the Letter Agreement provided that the parties would proceed to develop, based on such letter agreement, a formal agreement for the supply of System Power Unreserved, "including appropriate additional detailed provisions". The charges specified for System Power Unreserved under the Power Contract of November 3, 1977 were the sum of the following:

(1) A demand charge of $47.00 per kW-year.

(2) A Pool Transmission Facilities transmission charge of $6.00 per kW-year.

(3) A subtransmission charge as provided in NEPCO's FPC Electric Tariff, Original Volume No. 1, or in any superseding subtransmission tariff (at the time of filing equal to $1.20 per kW-year).

(4) An energy charge equal to the fuel cost allocable to energy delivered under the Power Contract.

NEPCO reserved the right to file unilaterally for an increase in charges on a "cost of service basis" after October 31, 1978.

The July 13, 1977 Initial Decision found the Letter Agreement to be a final decision made final by the Commission's Notice of Final Decision issued September 5, 1978.

FEDERAL REGISTER, VOL. 43, NO. 262—FRIDAY, DECEMBER 1, 1978

NOTICES

A gally binding contract between the parties. In addition, the judge ruled that the Power Contract “to the extent that it provides for a transmission (connector) charge ($T-1$ rate) is unjust and unreasonable. It appears that NEPCO's filing conforms with the Commission's decision in this matter in that the transmission charge has been eliminated from the Revised Power Contract. Accordingly, Hudson's motion to reject the compliance filing is hereby denied.

The Commission orders:

(A) The Petition to reject the Compliance Filing filed by the Town of Hudson is hereby denied.

(B) The Revised Power Contract for System Power-Unreserved between NEPCO and the Town of Hudson filed September 19, 1978 is accepted for filing as of May 2, 1977. This acceptance for filing does not constitute approval of any service, rate, charge classification, or any rule, regulation, contract, or practice affecting such rate or service; and such acceptance is deemed as recognition of any claimed contractual right, obligor affecting or relating to such service or rate; and such acceptance is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted against NEPCO.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB, Secretary.

[FR Doc. 78-33640 Filed 11-30-78; 6:45 am]

[6740-02-M]

NORTHERN INDIANA PUBLIC SERVICE Commodity

Order Accepting for Filing and Suspending Proposed Increase, Granting Interventions, Denying Motions To Reject, Instituting Procedures

November 22, 1978.

On July 27, 1978, Northern Indiana Public Service Company (NIPSCO) tendered for filing the Revised Volume No. 1 of its FERC electric service tariff (Third Revised Volume No. 1). The proposed changes would increase revenues for jurisdictional sales and service by $1,380,952 to basic customers (Town) and its 12 cooperative customers (Cooperatives). The

1NIPSCO's submittal of additional data in response to two Secretary's deficiency letters (dated August 17, 1978 and October 8, 1978, respectively) completed its filing on October 23, 1978.

The municipal customers (Town) are the Town of Bremen, Winamac, Walkerton, Argo, Brookston, Kimesport Heights, Etna Green, and Chalmers, Indiana.

The cooperative customers (Cooperatives) are Wabash Valley Power Association, Inc. ("Wabash"), Carroll County Rural Electric Membership Corporation, Fulton County Rural Electric Membership Corporation, Jasper County Rural Electric Membership Corporation, Kankakee Valley Rural Electric Membership Corporation, Kosciusko County Rural Electric Membership Corporation, Marshall County Rural Electric Membership Corporation, Newton

Footnotes continued on next page
proposed increases are based on the projected twelve (12) month period ending December 31, 1978. 4

Public notice of NIPSCO’s filing was issued on August 11, 1978 with responses due on or before August 11, 1978.

On August 11, 1978, the Towns filed a document entitled “Petition of the Towns of Bremen, Indiana, et al, For Leave To Intervene, Motion To Reject Rate Filing And, In The Alternative, Complaint And Request For Suspension Of Rate Schedule And Hearing.” In addition to their request for intervenor status and the petition to invalidate NIPSCO’s filing, the Towns raise a number of objections to NIPSCO’s filing in support of their Motion to reject or, in the alternative, request for a 5 month suspension. The objections are summarized as follows:

(1) NIPSCO’s failure to supply certain support data (such as comparative billing data, supporting calculations and work papers) is in violation of Section 35.12(c)(1) and Section 35.13 (4)(ii) of the Commission’s Regulations.

(2) The existence of a price discrimination between NIPSCO’s proposed VA-1 Wholesale Rates and its Retail Rate 624 (approved by the Public Service Commission of Indiana on September 28, 1977) adversely affects Bremen’s ability to serve its (Bremen’s) present retail customers and attract new customers located in the service area common to NIPSCO and Bremen (see Appendix A).

(3) NIPSCO’s use of a beginning and end of year method instead of the 13-month average plant balances method in computing its rate base is inconsistent with Commission precedent.

(4) NIPSCO has not supplied adequate support data for use of a new 3.36% depreciation expense rate.

(5) NIPSCO’s use of the Average and Excess Demand Method for demand allocation purposes is improper.

(6) NIPSCO’s method of allocating general plant is inconsistent with Commission precedent.

The Cooperatives, on August 11, 1978, filed a document entitled “Motion to Reject, and Petition to Intervene.” In that document, the Cooperatives request intervenor status and raise certain issues in addition to those issues propounded by the Towns.

Footnotes continued from last page

*See, Appendix A for a description of the present and proposed rates.

(1) Projected O&M Expenses.
(2) Preparation of Period II data.
(3) Excessive overall rate of return of 9.29% and excessive rate of return on common equity of 12.50%.
(4) Inclusion of certain environmental facilities in the rate base.
(5) Purchase power expenses.
(6) Mismatch of fuel revenues and expenses.
(7) Load held for future use.

The City of Rensselaer (Rensselaer) on August 11, 1978, filed a protest and petition to intervene. In support of its pleading, Rensselaer states that, because it has previously proposed to receive service under Rates VA-1 and VA-5, it will be directly affected by NIPSCO’s proposed rate increases.

To VA-5 Rate 1 for 2974, inpts customers who desire service but are not located on the Company’s electrical supply lines which are suitable and adequate for supplying such service. NIPSCO does not currently provide any service under Rate VA-5. At present, Rensselaer is the only municipal system within NIPSCO’s service area which serves the area. Rate VA-1 and VA-5 are virtually identical. However, VA-5 differs from VA-1 in that VA-5 provides for an additional surcharge which it is contended by the Cooperatives increases excess demand method costs.

Although Rensselaer is not presently served by NIPSCO, Rensselaer requested service under the VA-1 and VA-5 Rates in the ER78-238 proceeding. See, Northern Indiana Public Service Company, Docket No. ER78-238, (Order Issued April 6, 1978).

The VA-5 Rate 1 for 2974 is being served by NIPSCO. See, Northern Indiana Public Service Company, Docket No. ER78-238, (Order Issued April 6, 1978).

The VA-5 Rate 1 for 2974 is being served by NIPSCO. See, Northern Indiana Public Service Company, Docket No. ER78-238, (Order Issued April 6, 1978).

The Towns have informed the Director of the Office of Electric Power Regulation of their opposition to NIPSCO’s proposed VA-1 Wholesale Rate and VA-5 Retail Rate. Specifically, the Towns state that the proposed rates

We note that NIPSCO has not explained how it has functionalized its general plant. In Minnesota Power & Light Company, Opinion No. 20, issued August 3, 1978 In Docket Nos. E-9499, et al, we held that general plant should be allocated on the basis of labor ratios. Further, we held that labor ratios should be used in allocating general plant in succeeding cases. In subsequent orders, we indicated that the use of labor ratios in functionalizing general plant was a “general rule” and held that the burden on the applicant was “to show that the labor ratios are unreasonable as applied to the company, not merely that its alternative method might be reasonable.” NIPSCO bears this same burden in the instant case.

We also note that the present VA-11 Rate (and all of the proposed Rates) contain a future gross revenue tax adjustment clause. NIPSCO will be

NOTICES

The language of the VA-11 availability clause reads: Available only non-profit rural electric membership corporations, organized under the "Rural Electric Membership Corporation Act" of Indiana, for purchases of electric energy to be used solely for retail sale to ultimate users.

The language of the VA-5 availability clause in pertinent part reads: Available to municipalities (Towns) ** ** for their own use and for distribution and retail sales to ultimate users supplied service direct by the municipal system.

The reasonableness of the surcharge provision applicable to the VA-5 rate shall depend upon the outcome of the ER78-236 proceeding. Also, we shall direct the Presiding Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing Towns' request for data necessary to present their prima facie showing on the price squeeze issue.

Our review indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential or otherwise unlawful. The Commission shall deny the Cooperatives' and Towns' motions to reject, and shall accept the submission for filing and suspend the proposed November 23, 1978, effective date after which the rates and services will go into effect on January 23, 1979, subject to refund.

Rensselaer, Cooperatives and Towns shall be entitled to intervene in this docket and may raise at hearing all of the issues alleged in their petitions to intervene, including additional cost of service data, which shall have reserved the right to raise after a more thorough review of NIPSCO's filing. The Commission finds:

It is necessary and proper in the public interest and to aid in the enforcement of the Federal Power Act that the Commission enter upon a hearing concerning the lawfulness of the proposed rate increase submitted for filing by NIPSCO, and to establish procedures for that hearing, and that the proposed rate increase be accepted for filing, suspended, and the use thereof deferred, all as hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Section 402(a) of the Department of Energy Act and by the Federal Power Act, particularly Sections 205, 206, 301, 308, and 309 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act (18 CFR Chapter 1), a public hearing shall be held concerning the justness and reasonableness of the rate increase proposed by NIPSCO.

(B) Pending the hearing and decision thereon, the proposed increased rates and charges by NIPSCO originally submitted on July 27, 1978, are hereby accepted for filing, suspended for two months, and the use thereof deferred until January 23, 1979, when they shall become effective, subject to refund.

(C) Rensselaer, Cooperatives and Towns are hereby permitted to intervene in this proceeding subject to the rules and Regulations of the Commission.

(D) The Federal Energy Regulatory Commission Staff shall serve top sheets in this proceeding on or before March 22, 1978.

(E) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose shall preside at a prehearing conference in this proceeding to be held within 10 days of the issuance of top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The Judge is authorized to establish procedural dates and to rule upon all motions (except motions to consolidate and sever, and motions to dismiss) as provided for in the Commission's Rules of Practice and Procedure.

(F) The Presiding Judge shall convene a prehearing conference within 15 days of the date of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, for the purpose of hearing petitioners' request for data required to present their case, including a prima facie showing, on the price squeeze issue. NIPSCO shall be required to respond to the discovery requests authorized by the Administrative Law Judge within 30 days, and the Cooperatives shall file their case-in-chief of the price squeeze issue within 30 days after the Commission's order, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(G) The Towns' and Cooperatives' motions to reject, and in the alternative, suspend for 30 days are hereby denied.

(H) The future gross tax adjustment clause in NIPSCO's filing shall remain inoperative pending the filing of supporting data as specified in § 35.13 of the Regulations.

(I) Within 90 days of the date of issuance of this order, NIPSCO shall file a revised rate schedule excluding the restrictive language contained in the availability clause for the VA-5 and VA-11 Rate. This order is without prejudice to NIPSCO to file within 90 days after the Commission's order appropriate tariff provisions in accordance with the discussion in the body of this order. Such filing shall be subject to Commission review and approval.

(J) The reasonableness of the surcharge provision applicable to the VA-5 rate shall depend upon the resolut—

NORTHWEST PIPELINE CORP.
PETITION TO AMEND

Take notice that on November 9, 1978 Northern States Power Company (Petitioner), 315 East Second Street South, Salt Lake City, Utah 84111, filed in Docket No. CP77-263 a petition to amend the Commission's order issued December 6, 1977, in the instant docket pursuant to Section 6(h) of the Natural Gas Act so as to authorize the transportation and exchange of natural gas with RMNG Gathering Company (RMNG) from additional acreages in Garfield County, Colorado and in Grand County, Utah, and to authorize the delivery of the natural gas to RMNG at additional delivery points, pursuant to an agreement dated February 20, 1978, between the parties, as amended, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

It is indicated that pursuant to the order of December 6, 1977, Petitioner was authorized to sell to and exchange natural gas with RMNG pursuant to the Exchange Agreement. It is further indicated that Petitioner filed its first petition to amend the Commission's order on May 25, 1978, and its second petition to amend the order on August 7, 1978, in conjunction with exchange agreement amendments dated September 6, 1977, February 20, 1978, June 21, 1978, and July 18. Petitioner's first two amendments, which requested authority for the transportation of natural gas from additional acreages and delivery points, are both pending further action by the Commission.

By the instant petition to amend the Commission's order, Petitioner requests authority to exchange natural gas with RMNG pursuant to four additional amendments to the exchange agreement as amended, dated October 3, 4, 5, and 6, 1978.

The petition stated that the October 3, 1978 amendment adds three new delivery points in Garfield County, Colorado; that the October 4, 1978 amendment adds additional acreages in Garfield County, Colorado, and Grand County, Utah, that would be subject to the Exchange Agreement; that the October 5, 1978, amendment adds to new delivery points in Garfield County, Colorado and one new delivery point in Grand County, Utah; and that the October 6, 1978 amendment adds one new delivery point in Garfield County, Colorado.

It is stated that Petitioner has arranged with Colorado Interstate Gas Company for the transportation or purchase of natural gas from the wells mentioned in the October 3, 1978 amendment, pursuant to a gas gathering and transportation agreement of March 16, 1978, as amended October 12, 1978; that Petitioner has agreed with the Southwest Gas Corporation (Southwest) for the transportation of the volumes of natural gas which Southwest has available from the wells mentioned in the October 5, 1978 amendment, pursuant to a gas purchase, gathering and transportation agreement dated September 12, 1978; and that Petitioner is presently negotiating with Walter S. Fees, a small producer, for the purchase of natural gas from the wells mentioned in the October 6, 1978 amendment.

It is stated that the additional volumes of natural gas delivered by Petitioner to RMNG for transportation and exchange pursuant to the above described October amendments would be redelivered to Petitioner at the existing RMNG exchange points located on Petitioner's main line. RMNG would not have the right to purchase any of this natural gas, it is asserted.

It is stated that the additional volume of natural gas from these wells would be 1,200 Mcf per day. It is stated that a transportation rate of 8.0 cents per Mcf would be charged for these volumes. It is further stated that Petitioner would construct any necessary jurisdictional facilities to connect these additional wells to delivery points on RMNG's gathering system pursuant to the gas-purchase budget-type authorization issued Petitioner on September 30, 1977 in Docket No. CP77-507.

Any person desiring to be heard or to make any protest with reference to said petition to amend shall file a protest with the Secretary in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of all objections filed are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978]
NOTICES

[6740-02-M] [Docket No. CP78-348]

NORTHWEST PIPELINE CORP.

Amendment

November 22, 1978.

Take notice that on November 9, 1978, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP78-348 an amendment to its application filed pursuant to Section 7(c) of the Natural Gas Act in the instant docket to provide for the transportation for Colorado Interstate Gas Company (CIG) of natural gas from three additional wellheads and for blanket authority, to add further wellhead delivery points from CIG to Applicant as a party in any hearing, or to make the protestants parties to the proceeding. Any person desiring to be heard or to participate as a party in any hearing therein must file a petition to intervene or a protest in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb, Secretary.

[FR Doc. 78-33845 Filed 11-30-78; 8:45 am]

[6740-02-M] [Docket No. EP79-65]

OHIO POWER CO.

Filing

AEP states that Section 1 of Supplement No. 6 provides for an increase in the Demand Charge for Short Term Power from $0.30 to $0.70 per kilowatt per week. AEP further states that Section 2 of Supplement No. 6 provides for an increase in the transmission charge for third party Short Term Power Transactions from $0.15 per kilowatt per week to $0.175 per kilowatt per week. AEP indicates that since the use of Short Term Power cannot be accurately estimated for the twelve months period succeeding the date of filing, it is impossible to estimate the increase in revenues resulting from this supplement for such period. AEP further indicates that Exhibit I which was included with the filing of this Supplement, demonstrates that the increase in revenues which would have resulted had the Supplement been in effect during the twelve month period ending August 1978, would have been $684,154.72 (i.e., from $247,682.77 to $20,801,937.59) for sale.

AEP proposes an effective date of October 23, 1978, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon Ohio Edison Company and the Public Utilities Commission of Ohio, according to AEP.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before December 14, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

[6740-02-M] [Docket No. CP77-619]

PANHANDLE EASTERN PIPE LINE CO.

Petition To Amend

November 22, 1978.

Take notice that on November 14, 1978, Panhandle Eastern Pipe Line Company (Petitioner), 3000 Bissoret, Houston, Texas 77001, filed a petition in Docket No. CP77-619 pursuant to Section 7(c) of the Natural Gas Act to amend the order of the Commission issued May 2, 1978, in said docket, to authorize Petitioner to utilize presently owned compressor facilities and thereby avoid purchasing new compressor facilities, all as is more fully set forth in the petition which is on file with the Commission and open for public inspection.

It is stated that the order of May 2, 1978, authorized Petitioner to construct a 150.4 mile pipeline, and install 15,600 compressor horsepower facilities. Petitioner states that it can save $425,000 in facilities costs if the Order is amended to authorize Petitioner to (1) relocate 1,270 compressor horsepower presently located at the Donlin II Compressor Station to the Poling Compressor Station, Carson County, Texas; (2) relocate 600 compressor horsepower presently located at the Masterson Compressor Station to the Griffith Compressor Station, Moore County, Texas; (3) relocate 1,600 compressor horsepower presently located at the Masterson Compressor Station to the Richardson Compressor Station to the Hans Compressor Station, Cimmarron County, Oklahoma; and (4) install 1800 compressor horsepower of new facilities at the Masterson Compressor Station, Moore County, Texas. It is stated that these modifications in the Order would result in an additional 70 compressor horsepower for the pipeline.

Any person desiring to be heard or to make any protest with reference to said petition to amend should file a petition to intervene or protest with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas.
Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

POTOMAC EDISON CO.

Order Accepting for Filing and Suspending Proposed Rate Increases, Denying Motions, Granting Intervention, Providing for Hearing, and Establishing Price Squeeze Procedures

November 22, 1978.

On June 26, 1978, pursuant to Section 205 of the Federal Power Act, the Potomac Edison Company (Potomac) submitted for filing its proposed rate increase applicable to six wholesale customers. The proposed rates represent an increase to these wholesale customers of approximately $985,507 for the twelve month period succeeding the proposed effective date of July 25, 1978. Additionally, the filed tariff would eliminate any reference to certain former customers of Potomac located in Pennsylvania whose service requirements were transferred to West Penn Power Company on January 1, 1977. In support of its filing, Potomac relied on increases in the cost of capital, labor, materials and supplies since it last increased its rate to these wholesale customers.3

On July 11, 1978, Potomac submitted for filing under Section 206 of the Act the same rate representing an increase of $624,346 based on the same test period applied to the Town of Front Royal, Virginia. Potomac did not request an effective date for the proposed filing, which was designated Docket No. ER78-483.

With these separate filings, Potomac would have bifurcated what is essentially one rate case, involving a request for $1,253,853 in increased wholesale revenues for the twelve months ending December 31, 1977. Potomac's action was significant in light of our Regulations in that each portion of its bifurcated submission represented an increase of less than one million dollars, for which our Regulations require only Period I test data, whereas, considered as a whole, the increase exceeds that dollar threshold and require Period II data as well. Potomac did not submit a complete request for an increased rate until July 11, 1978, the date of its Front Royal submission.

On August 14, 1978, Potomac filed a Motion for Rehearing and Reconsideration of the Commission's July 31, 1978 letter order.4 Potomac asserts, increased revenues of approximately $299,464, or 13.4%, for that period.

1 Notice of the filing was issued on July 6, 1978, with protests or petitions to intervene due on or before July 14, 1978. On July 10 and July 14, respectively, Potomac's cooperative and municipal customers filed petitions to intervene. The Issues raised in these petitions will be discussed infra.

2 On August 14, 1978, the Honorable Charles McC. Mathias, Jr., United States Senator, submitted comments on behalf of Cities. These comments will be treated as a protest and considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestant a party to these proceedings. 18 CFR 1.1(b).

3 Notice of the filing was issued on July 10, 1978, with protests or petitions to intervene due on or before July 26, 1978. On July 26, 1978, the Town of Front Royal, Virginia, filed a petition to intervene and raised issues which will be discussed infra.

4 By notice dated November 9, 1978, the Secretary indicated that, pursuant to Section 1.34(c) of the Commission's Rules and Footnotes continued on next page

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
such data in its October letter dated October noti

ble requirements, not already compiled by the Commission "to waive any applica-

Commission's order herein. In the cited opinion does not quantify a particular return that must be used in all cases. This issue is properly the subject of a full evidentiary hearing which we shall herein order.

Cooperatives also object to (a) an adjustment to test year expenses to normalize the effect of a recent increase in the West Virginia Business and Occupation Tax which is currently subject to judicial challenge by Potomac and other utilities; (b) a cost of service adjustment for annualized wage and salary increases during the 1977 test year, allegedly without corresponding revenue and productivity data; (c) an asserted failure to adhere to the “rolled-in” transmission allocation method; and (d) a cost of service adjustment for losses as reflected in the development of demand and energy allocation factors. These issues can only be determined after an evidentiary hearing.

Further, Cooperatives protest the Company's request that the Commission waive its notice requirements to permit an effective date of June 21, 1978. The Cooperatives contend that retroactive effectiveness for the Period II and other data filed September 28 would place an unreasonable burden upon the Cooperatives. In particular, Cooperatives in Virginia are regulated by the Virginia Corporation Commission and it would be impossible for them to recover any retroactive wholesale increase from their retail customers. They would impose upon them an unjust and unreasonable fi-

Notice of the consolidated filing was issued on October 5, 1978 with comments, protests or petitions to intervene due on or before October 16, 1978.

On October 12, 1978, Old Dominion Electric Cooperative, Inc., Shenandoah Valley Electric Cooperative, Inc., and BARC Electric Cooperative, Inc. jointly filed a protest, petition to intervene, and request for a five month suspension and hearing.

Footnotes continued from last page

11On July 14, 1978, Cities filed a protest, Petition to Intervene, motion to Reject and Motion for Maximum Suspension Period In Docket No. ER78-460. In support of their motion to reject, Cities argued that the Commission should consider the filings in Docket Nos. ER76-469 and ER77-992, and require Potomac to submit Period II data as required by Section 35.13. The Commission's July 31, 1978 consolidation letter requiring Period II data has effectively granted this motion. Many of the arguments raised by Cities in favor of the maximum suspension period are included in their supplemental Petition and will be discussed in connection with that pleading. In addition, Cities take issue with Potomac's inclusion of Accumulated Job Development Tax Credit (AJDTC) in the Company's capital structure as a component of Common Equity. Potomac removed AJDTC from its capital structure in its September 28, 1978 submittal of Period II data.

26On October 16, 1978, supplemental protest, Petition to Intervene and Request For Five Month Suspension was filed by the Cities of Hagerstown, Thurmont and Williamsport, Maryland (“Cities”), which are wholesale customers subject to Potomac's proposed rate increase. In support of their request for a five month suspension, Cities maintained that the same issues raised by Cooperatives. In addition, Cities question the propriety of a transfer of property between Potomac and its affiliate, West Penn Power. Cities further maintain that the proposed wholesale rates, being substantially in excess of Potomac Edison's comparable retail rates, give rise to a "price squeeze." Conway Corp. v. F.P.C., 510 F.2d 1264 (1975), 420 U.S. 271 (1976). Pursuant to the policy set forth in Order no. 563, and in Section 2.17 of our Regulations, we shall herein provide for the initiation of price squeeze procedures. Finally, Cities protest the company's request for a retroactive effective date.

10On July 10, 1978, Cooperatives had filed a protest and Petition to Intervene and Re- quest For Five Month Suspension and Hear- ing in the Company's capital structure and required Potomac to submit Period II data as required by Section 35.13. The Commission's July 31, 1978 consolidation letter requiring Period II data has effectively granted this motion. Many of the arguments raised by Cities in favor of the maximum suspension period are included in their supplemental Petition and will be discussed in connection with that pleading. In addi- tion, Cities take issue with Potomac's inclusion of a tax adjustment in its proposed rate adjustment clause as well as certain tariff provisions pertaining to minimum load and power factor requirements. Again, these matters are appropriately left to resolution in the hearing process.

8Cities filed a Protest and Motion to Reject the Company's request on November 13, 1978. In it, they again protest a retroactive effective date and argue in favor of rejecting the entire filing based on defective period I data.

FEDERAL REGISTER, VOL. 43, NO. 222—FRIDAY, DECEMBER 1, 1978
On October 16, 1978, Front Royal filed a Protest, Petition to Intervene, and Motion. 10 Front Royal contends that the Period II data submitted by Potomac are deficient in that "the Company has failed to provide a "full explanation of the basis of each of the proposed figures." Section 205(d) required under Section 35.13. We would simply note that by letter dated October 16, 1978 we require the Company to file additional data in support of its Period II figures. Upon receipt of that data on October 24, 1978, we determined that the filing was complete.

In addition, Front Royal questions the method by which the AFUDC rate was determined and the appropriateness of the 45-day working cash allowance in this case. Front Royal also raises questions as to the effect of the Allegheny Power System reorganization on the proposed rate increase. Again, these issues are properly the subject of an evidentiary hearing. Finally, Front Royal reserves the right to allege price squeeze after comparing Potomac's wholesale and retail rates.

On November 6, 1978, Potomac filed its response to its wholesale customers' interventions. Potomac noted that while all of the cost-of-service issues may require investigation, there is no basis for a five-month suspension.

We find that participation by the Petitioners, Cities, Cooperatives and Front Royal in this proceeding may be in the public interest. Accordingly, the Commission will grant the Petitioners' interventions pursuant to Section 18(d) of our Regulations.

With respect to those rates to the six wholesale customers subject to Section 205, our review of the filing indicates that the proposed rates have not been shown to be just and reasonable. We therefore will suspend the proposed rates and charges for one day and permit them to become effective subject to refund on November 26, 1978.

In connection with the assignment of an effective date, we note that the Commission did not issue an order within the thirty day period prescribed by Section 205(d) of the Act. We maintain, however, that this does not limit our power to suspend the proposed rates under the following analysis. Potomac filed its proposed rates for six of its wholesale customers under Section 205 on June 26, 1978. Two weeks later and before the passage of the thirty days, Potomac submitted a Section 205 filing for Front Royal, a seventh wholesale customer taking a service identical to one of the services involved in the Section 205 filing and under identical rates. Because the Commission made the determination that the July 11, 1978 filing was essentially a part of the June 26, 1978 filing, the thirty day period can be deemed to have commenced when the entire submittal was tendered; viz., on July 11, 1978. We repeat that the Company's proposed rates under the following six of its wholesale customers were involved in the July 11, 1978 filing, and, as such, an additional data was issued within the thirty day period.

Even if we considered the two filings as wholly independent of one another, there is an additional legal basis for the exercise of the Commission's suspension power in this case. The letter consolidating the two docketings and criticizing deficiencies in the filings was prepared and approved by the Commission at its public meeting on July 20, 1978. Aside from minor editorial revisions, the letter was to be issued as approved by the Commission at its July 26th meeting. No member of the Commission requested that the letter be returned for revision before issuance. The letter was then delivered to the Office of the Secretary with instructions that it be issued by July 27, 1978, i.e., within the thirty day period. The letter, however, was issued on July 28, 1978. Thus, it could not be reissued within thirty days of the thirty day period.

The thirty day period resulted from a mere clerical error and did not result from a change in policy decision by members of the Commission. It is well established that an administrative agency has an inherent power to correct mistakes resulting from oversight or inadvertence. American Trucking Associations v. Frisco Transportation Co., 205 F. Supp. 138 (W.D. Tex. 1962). In Frisco, the Supreme Court held that the Interstate Commerce Commission had the power to correct a certificate which originally contained certain limitations but, as a result of an inadvertent clerical error, was issued within such limitations. The Court emphasized, however, that this power extends only to reopening prior proceedings to correct a mistake and not to modify a certificate to execute a policy change or newly developed policies. Chief Justice Warren, speaking for the Court, pointed out that the Commission's enabling act provides that "The Commission shall conduct its proceedings under any provision of law in such manner as will best conduce to the proper dispatch of business and to the ends of justice." This broad enabling statute, in our opinion, authorized the correction of inadvertent ministerial errors. To hold otherwise would be to say that once an error has occurred the Commission is powerless to take remedial steps. This would tend to frustrate the broad enabling statute, In our opinion.

In suspending the proposed rate increase subject to the Section 205 filing and under identical rates, we believe that the public interest is best served in the manner described above. Clearly, the public interest is best served in this case by preventing the customers from being the innocent victims of a clerical mistake, permitting the rates to become effective after one day suspension, subject to refund, and allowing the parties to litigate the issue of the reasonableness of the proposed rates. We do not mean to suggest that the general public interest standard can be invoked to override the more specific policy mandates of Section 205. We are simply saying that, where the Commission has made a clear decision to exercise its discretionary power, this power cannot be vitiated through a mere clerical error.

With respect to those rates filed for the Town of Front Royal, the Commission has determined that an investigation and suspension shall be incorporated as an Inadvertence or Inadvertence of the Commission. The proposed rate is accepted for filing, then, to become effective for Front Royal as modified on the date of a final order.

The Commission orders:

10On July 23, 1978, Front Royal filed a protest and petition to intervene in Docket No. ER78-483. The arguments raised in that petition were incorporated into the October 16, 1978 petition.
NOTICES

By the Commission.

KENNETH F. PLUMB, Secretary.

[FR Doc. 78-33649 Filed 11-30-78; 8:45 am]

[SABINE RIVER AUTHORITY OF TEXAS AND SABINE RIVER AUTHORITY, STATE OF LOUISIANA

Application for Approval of Revised Recreation Plan

Take notice that an application was filed May 24, 1978, by the Sabine River Authority, State of Louisiana (correspondence to: Mr. R. D. Morgan, Chief Engineer, Sabine River Authority of the State of Louisiana, P.O. Box 44155 Capitol Station, Baton Rouge, Louisiana 70894) under the Federal Power Act, 16 U.S.C. §§ 791a-825r, for approval of revised plans for recreational development now vested with it to the Louisiana State Parks and Recreation Commission (La SPARC). The present recreation plan for the Texas portion of the project. A separate notice will be issued for that plan when the filing is completed.

The received plan of the Sabine River Authority, State of Louisiana called for establishment of responsibility for recreational development now vested with it to the Louisiana State Parks and Recreation Commission (La SPARC). The present recreation plan for the project approved some 16 recreational areas on the Louisiana shore. La SPARC would trade land in these areas to acquire land to develop two major state parks to be known as North and South Toledo Bend Parks, under two consecutive five year programs. It is anticipated that the North Toledo Bend State Park would be constructed during the first five year period, would consist of approximately 1,000 to 1,200 acres, and would be located on the northern half of the Louisiana side of the reservoir. The park would include water-related recreational opportunities such as swimming, boating, skiing, and fishing, as well as facilities for activities usually available in large state parks including camping grounds, hiking trails, playgrounds and cabins. The South Toledo Bend State Park, which would be constructed during the second five year period, would be a 1,200-acre facility near the project dam. Striped bass fishing is already established. Other recreational opportunities would be similar to those described for the North Toledo Bend Park. The estimated cost for both parks is 9.7 million dollars.

Anyone desiring to be heard or to make any protest about this application shall file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.6 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before January 3, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB, Secretary.

[FR Doc. 78-33650 Filed 11-30-78; 8:45 am]

[SHELL OIL CO.

Limited-Term Certificate Application

Take notice that on November 3, 1978, Shell Oil Company (Shel) (P.O. Box 2699, Houston, Texas 77001), filed in Docket No. C179-115 an application for a limited-term certificate of public convenience and necessity with pre-granted abandonment authority requesting that Applicant be authorized to sell in interstate commerce, for resale, natural gas produced by Applicant from Mississippi Canyon Block 311 Field, Offshore Louisiana to Florida Gas Transmission Company, pursuant to the provisions of Section 7 of the Natural Gas Act, as amended, and Section 2.70 of the Commission's Rules of Practice and Procedure.

Applicant states that it is seeking a limited-term certificate of public convenience and necessity for a term from the date of initial delivery of gas to Florida at Southern's facilities in West Delta Block 133 until such time as both Shell and Florida are authorized to deliver and receive the subject gas at the Mississippi Canyon Block 311 Platform "A" facility, or until such time as Shell no longer has the capacity...
gather gas to West Delta Block 133 through its crude oil pipeline, whichever is earlier.

Any person desiring to be heard or to make any protest with reference to said application, on or before December 13, 1978, should file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene in the proceeding or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein. If the Commission on its own review of the matter finds that a grant of the certificate is required, an admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

KENNETH P. PLUMB, Secretary.

[6740-02-M]

SIDWELL OIL & GAS, INC.

TENNESSEE GAS PIPELINE CO., A DIVISION OF TENNECO INC.

Application to Amend

November 22, 1978.

Take notice that on June 14, 1978, Tennessee Gas Pipeline Company, a Division of Tenncio Inc. (Applicant), P. O. Box 2611, Houston, Texas 77001, filed in Docket No. CP75-376 an application to amend the Commission's order of December 2, 1975, issued pursuant to Section 7(c) of the Natural Gas Act in said docket so as to authorize the rendition of natural gas service to Manchester Gas Company (Manchester) under a new Gas Sales Contract providing for a revised Daily Volume Limit (DVL) for a Manchester delivery point, all as more fully set forth in the application which is on file with the Commission and open to public inspection.1

1This proceeding was commenced before the FPC. By joint regulation of October 1, 1975, the FPC and the Commission took concurrent jurisdiction over this proceeding.

1. The remaining 25% of the working interest is owned by Texaco and is not covered by this petition.

2. Sidwell's share of these reserves is approximately 80,476 Mcf.

3. The application to intervene was filed October 2, 1978 by Panhandle.

4. Panhandle Eastern Pipe Line Company (Panhandle) is permitted to intervene in the above-entitled proceeding, subject to the Rules and Regulations of the Commission; provided, that its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene and provided, further, that the admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

KENNETH P. PLUMB, Secretary.

[6740-02-M]

SIDWELL OIL & GAS, INC.

Special Relief Order Granting Petition for Special Relief and Permitting Intervention

November 22, 1978.

On July 28, 1978, Sidwell Oil and Gas, Inc. (Sidwell) filed a petition for special relief in Docket No. R178-83 pursuant to Section 2.76 of the Commission's General Policy and Interpretations, Sidwell, a small producer,1 requested a rate of 69.44¢ per Mcf at 14.65 p.s.i.a. for the sale of gas from the L.O. Brooks #1 Well, Section 224, Block 2, GH & H Survey, Farwell Creek (Morrow Lower) Field, Hansford County, Texas. The gas is sold to Panhandle Eastern Pipe Line Company (Panhandle).

PROCEEDING

Notice of Sidwell's petition for special relief was issued September 15, 1978 (43 Fed. Reg. 43365). A timely petition to intervene was filed October 2, 1978 by Panhandle.

PROPOSAL

Under the terms of its March 15, 1978 gas purchase contract with Panhandle, Sidwell currently collects a rate of 40.05¢ per Mcf at 14.65 p.s.i.a. Panhandle has agreed by contract amendment dated May 19, 1978 to pay Sidwell the rate authorized by the Commission.

Sidwell proposes to purchase and install a pumping unit at the well in order to remove Lower Morrow formation water. Water encroachment is causing a decline in natural gas production from the well. The total installation cost is $31,777, of which $23,833 is assigned to Sidwell's 75% working interest. It is estimated that such new investment will result in the production of an additional 114,455 Mcf of reserves over the remaining production life of 3.75 years.

COST ANALYSIS

Staff's analysis indicates that Sidwell's remaining net book investment, based on its 75% working interest, is $11,591. Operating expenses over the remaining 3.75 years of productive life are estimated at $19,859. Operating expense is based on a first-year expense of $4,865 for the 75% working interest, escalated at an annual rate of 5% over the remaining life of the project. Sidwell's share of estimated reserves is $8,476 Mcf.

Using the above data and traditional methodology, Staff prepared a cost study to determine what rate would provide both recovery of costs and a 15% rate of return. The results show that the requested rate is cost-supported.

The Commission has reviewed Staff's analysis and concluded that the requested rate is cost-supported and that it is in the public interest to grant Sidwell's petition for special relief.

The Commission orders:

(A) The petition for special relief by Sidwell Oil and Gas, Inc. in Docket No. R178-83 is hereby granted.

(B) Sidwell is authorized to collect a total rate of 69.44¢ per Mcf at 14.65 p.s.i.a. for the sale of gas from the L.O. Brooks #1 Well, Section 224, Block 2, GH & H Survey, Farwell Creek (Morrow Lower) Field, Hansford County, Texas to Panhandle Eastern Pipe Line Company (Panhandle), effective on the date of this order or the date the proposed work is completed, whichever is later, subject to the condition set forth in paragraph (C) below.

(C) Within 30 days of the effective date of this order, as defined in ordering paragraph (B), Sidwell must file a statement signed by Panhandle Eastern Pipe Line Company that the proposed pumping unit has been installed to its satisfaction.

(D) Panhandle Eastern Pipe Line Company (Panhandle) is permitted to intervene in the above-entitled proceeding, subject to the Rules and Regulations of the Commission; provided, that its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene and provided, further, that the admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

KENNETH P. PLUMB, Secretary.

[FR Doc. 78-33552 Filed 11-30-78; 8:45 am]
Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before December 14, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the Commission’s Rules of Practice and Procedure (18 CFR 1.10 and 1.11) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

KENNETH F. PLUM, Secretary.

[FEDERAL REGISTER, VOL 43, NO. 232—FRIDAY, DECEMBER 1, 1978]

NOTICES

Applicant states it was granted certificate authority by the Federal Power Commission’s Order, issued December 2, 1975, among other things, to serve Manchester under Applicant’s Rate Schedule CD-6 in lieu of Applicant’s Rate Schedules G-6 and to render such service with revised DVLs by delivery points. Accordingly, Applicant states it is now serving Manchester under its Rate Schedule CD-6 and the terms and conditions of an associated Gas Sales Contract (Contract) between the parties dated July 24, 1975, which provides for the sale and delivery by Applicant of a contracted demand of 7,570 Mcf of natural gas per day.

Applicant asserts that pursuant to the December 2, 1975 order Applicant and Manchester executed such Contract which provides for the following DVLs by delivery points:

1. Manchester Delivery Point, 7,248 Mcf.
2. Hooksett Delivery Point, 322 Mcf.

Applicant asserts that by letter dated April 19, 1978, Manchester requested that Applicant change the DVL for the Manchester delivery point from 7,248 Mcf per day to 7,570 Mcf per day. Manchester asserted that gas was available during the 1977-78 winter at the Hooksett delivery point, which because of the DVL restriction at the Manchester delivery point, could not be made available instead at the Manchester delivery point where it was needed. If Manchester had been able to utilize at the Manchester delivery point gas available to the Hooksett delivery point, Manchester could have reduced its use of propane-air for peak shaving requirements by 16,906 Mcf, which corresponds to 43,956 gallons of propane at a savings of $44,580.92 to its customers, it is said.

Applicant states that the increase in the DVL for the Manchester delivery point would provide Manchester with operational flexibility between its two delivery points, and further states that although the total of the proposed DVL’s would exceed Manchester’s contracted demand of 7,570 Mcf per day, Manchester would not be entitled to take on any day a total of more than 7,570 Mcf at its two delivery points.

Applicant states it is agreeable to such a change in service for Manchester and, accordingly, Manchester and Applicant have entered into a Precedent Agreement dated June 5, 1978 which would provide, among other things, for the execution, upon receipt of Commission authorization, of a new Gas Sales Contract providing for a revised DVL for the Manchester delivery point.

Applicant states it is agreeable to a demand charge to be determined by multiplying $1.17 by the maximum daily quantity, less any demand charge credit provided therein, if applicable; and (2) a volume charge equal to 14.22 cents per Mcf multiplied by (a) the total of the daily volumes delivered during such month or (b) the number of days in said month multiplied by 66.67 percent of the maximum daily quantity, whichever is greater, less any demand charge credit provided therein, if applicable; and (3) a fixed monthly subscription charge of $0.09 per Mcf to recover costs of system operations.

The amendment states that Bush would pay Applicant each month for volumes of gas received at both receipt points and transported hereunder: (1) a demand charge to be determined by multiplying $1.17 by the maximum daily quantity, less any demand charge credit provided therein, if applicable; and (2) a volume charge equal to 14.22 cents per Mcf multiplied by (a) the total of the daily volumes delivered during such month or (b) the number of days in said month multiplied by 66.67 percent of the maximum daily quantity, whichever is greater, less any demand charge credit provided therein, if applicable; and (3) a fixed monthly subscription charge of $0.09 per Mcf to recover costs of system operations.

Footnotes continued from last page 1977 (10 CFR 1000.1), it was transferred to the FERC.
NOTICES

56275

It is stated that initially Bush would pay Raine a price of $1.89 per Mcf for the subject gas. It is further stated that the gas is produced from onshore wells and that the present arrangements, Raine would sell the gas to the interstate market. Consequently, approval of the transportation arrangement proposed would make additional gas available to the interstate market, which Raine states would not otherwise be sold in the interstate market, it is stated.

Any person desiring to be heard or to make any protest with reference to said amendment should file a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. § 1.0). All such petitions or protests should be filed on or before December 4, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB
Secretary.

[F.R. Doc. 78-33655 Filed 11-30-78; 8:45 a.m]

[6740-02-H]

(Docket No. RP77-25)

WOODS EXPLORATION & PRODUCING CO. ET AL.

Special Relief; Order Granting Special Relief and Permitting Intervention

November 22, 1978.

BACKGROUND

On January 10, 1977, Woods Exploration and Producing Company, et al. (Woods), a small producer, filed a petition for special relief, as amended, in Docket No. RP77-25 pursuant to Section 2.76 of the Commission's General Policy and Interpretations. Woods initially requested authorization to charge and collect a total rate of 70.72¢/Mcf for the sale of gas produced from six wells located in the East Bernard Field, Wharton County, Texas. The subject gas is being sold to Tennessee Gas Pipeline Company, a Division of Tenneco, Inc. (Tennessee) under a sales contract dated April 18, 1960, pursuant to a small producer certificate issued in Docket No. CST1-270. Woods amended its petition in the subject docket on July 25, 1978, requesting a rate of 79.82¢/Mcf.

Woods proposed to install plunger lift's and stopcocks on each of the six wells, perform workovers on four of the wells, and add a third stage of compression. Petitioner and staff were in disagreement with regard to both cost and reserve estimates. During the period of time in which staff and Woods were attempting to resolve their differences, it became necessary to perform the proposed work in order to avoid losing the productive capability of the wells. Staff believes the performance of the proposed work before Commission approval of the petition for special relief was warranted because if the work had not been performed production from the majority of the wells would have been lost and attempts to restore production, if successful, would have been costly.

DISCUSSION

Based on the data and invoices supplied by Woods, staff has determined that there is no remaining book investment and that total new capital investment amounted to $43,564. It is anticipated that this expenditure will enable the recovery of the remaining estimated 1,631,314 Mcf of salable reserves over the estimated thirteen year productive life. Staff has examined the current operating expenses and historical operating expenses, and estimates future expenses will total $94,179 over the estimated remaining productive life.

Staff employed the above costs and expenses in a traditional cost study which provides for recoupment of all costs including a 15% rate of return. The results of this study, indicate that the rate is justified.

The Commission finds: (1) The requested rate is cost supported and special relief would, therefore, be in the public interest.

(2) The participation of Tennessee Gas Pipeline Company in this proceeding may be in the public interest.

The Commission orders: (A) The petition for special relief, as amended, filed by Woods Exploration and Producing Company, et al., is hereby granted;

(B) Woods Exploration and Producing Company is authorized to charge and collect a total rate of 79.82 cents per Mcf at 14.65 psia for sales of natural gas produced from the Matusik Well No. 1, the A. T. Leveridge Well No. 2, the Roberts Well No. 1, the A. M. Wallace Well No. 1, the J. A. Wallace Well No. 1, and the H. M. Leveridge Well No. 1 to Tennessee Gas Pipeline Company effective as of the date

FEDERAL REGISTER, VOL. 43, NO. 223—FRIDAY, DECEMBER 1, 1978
of this order, subject to the condition set forth in paragraph (C) below:

(C) Within 30 days of the date of this order, Woods must file an amended contract signed by Woods Exploration and Producing Company and Tennessee Gas Pipeline Company providing for the payment of the rate approved.

(D) Tennessee Gas Pipeline Company is permitted to intervene in theabove-entitled proceeding, subject to the Rules and Regulations of the Commission; Provided, however, that its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene; and Provided, further, that the admission of Tennessee in the manner provided shall not be construed as recognition by the Commission that Tennessee might be aggrieved because of any order or orders entered in this proceeding, and that Tennessee agrees to accept the record as it now stands.

By the Commission.

KENNETH F. PLUMER,
Secretary.

RHODE ISLAND DRINKING WATER

Determination of Primary Enforcement Responsibility

This public notice is issued under section 1413 of the Safe Drinking Water Act as amended and 40 CFR 142, National Interim Primary Drinking Water Regulations Implementation.

A submission, dated October 19, 1977, has been received from the Director of the Rhode Island Department of Health requesting a determination that that agency qualifies for primary enforcement responsibility for public water systems in the State of Rhode Island, in accordance with the provisions of the Act.

On February 15, 1978, I determined that the Rhode Island Department of Health met all conditions of the Act and subsequent regulations for the assumption of primary enforcement responsibility for public water systems in the State of Rhode Island.

My preliminary determination was published at 43 FR 18611 on May 1, 1978, and opportunity was given to request a public hearing or to submit written comments on the State's application. Such a request was subsequently received and a public hearing was convened on July 19, 1978 in Providence, Rhode Island.

Comments received from 10 individuals at the public hearing centered around four principal concerns:

a) Lack of coordination between the Health Department and other State programs having responsibility for or impact on water supply quality (e.g., highway construction, land use planning, and waste disposal);

b) Inadequate monitoring and protection of existing and potential water supply sources, particularly in the areas of toxic chemicals and sanitary landfill leachates;

c) The reluctance or inability of the Health Department to take timely, forceful action to bring about necessary improvements in local water supply operations. A key issue here was the adequacy and availability of necessary surveillance and legal personnel; and

d) The Health Department's generally unresponsive attitude toward meaningful public involvement in agency decisionmaking.

For the following reasons, I believe the Health Department has adequately responded to these comments:

a) A detailed written reply to each of the concerns raised by the two principal organizations appearing at the July 19 hearing has been submitted to the Regional Administrator;

b) A public participation consultant has been hired to advise the Department, and particularly the water supply program, on ways to better inform the public of agency findings and actions and involve them in regulatory policy-making;

c) A full-time public participation coordinator is being employed on the staff of the Water Supply Division;

d) Two additional sanitary engineers are being hired in the Water Supply Division to provide increased surveillance and technical assistance to local water supply operations;

e) The Health Department maintains a legal counsel and assistant which are available to assist the Water Supply Division in developing and interpreting regulations and carrying out enforcement actions;

f) Additional laboratory equipment has been purchased to support the Department's ongoing survey of organic chemicals (particularly the trihalomethanes) in public water systems throughout the State and to permit more efficient storage and retrieval of all water supply testing results;

g) A contract is being negotiated to develop capability within the Health Department to determine the carcinogenic potential of raw and finished drinking waters across the State; and

h) A contract is being negotiated to evaluate the Department's interactions with other State and Regional agencies having water supply responsibilities and to recommend ways to improve communications and increase coordination with such agencies.

Therefore, I am affirming my determination that the Rhode Island Department of Health has met all conditions of the Safe Drinking Water Act and subsequent regulations for the assumption of primary enforcement responsibility for public water systems in the State of Rhode Island.

WILLIAM R. ADAMS, JR.,
Regional Administrator.
given that a meeting of the Federal Prevailing Rate Advisory Committee will be held on:

THURSDAY, DECEMBER 21, 1978

The meeting will convene at 10 a.m., and will be held in Room 5A06A, Civil Service Commission Building, 1800 E Street, NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5947.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Civil Service Commission thereon.

The scheduled meeting will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptably degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Chairman of the Civil Service Commission under the provisions of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. section 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Civil Service Commission, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning the meeting may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committee, Room 1340.

NOTICES

TERENCE HARVEY,
Acting Director,
Bureau of Veterinary Medicine.

[FR Doc. 78-33715 Filed 11-30-78; 8:45 am]

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Director of the Bureau of Veterinary Medicine withdraws approval of a new animal drug application (NADA) providing for an iron hydrogenated dextran injectable used in baby pigs for iron deficiency anemia. The sponsor, Bio-Neering International, Inc., requested this action.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

David N. Scarr, Bureau of Veterinary Medicine (HFV-214), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3183.

SUPPLEMENTARY INFORMATION: Bio-Neering International, Inc., 930 Thompson Drive, Florissant, MO 63031, is sponsor of NADA 35-775V, which provides for the intramuscular use of iron hydrogenated dextran for baby pigs for the prevention and treatment of iron deficiency anemia. The application was originally approved March 17, 1978. On May 16, 1978, the agency requested submission of additional information concerning the application. In response by letter of June 23, 1978, the firm indicated that it is no longer in business and requested that the NADA be withdrawn. Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 516(e)), under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with §514.115 Withdrawal of approval of applications (21 CFR 514.115), notice is given that approval of NADA 35-775V and all supplements thereto for Bio-Neering International Bio-Dex 100 is hereby withdrawn, effective December 1, 1978.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

56277
that became effective prior to October 10, 1962, was requested to submit to the Food and Drug Administration (FDA) reports containing the best data available in support of the effectiveness of each such product for the claimed indications. That information was needed to facilitate a determination by FDA with the assistance of the National Academy of Sciences-National Research Council (NAS-NRC), whether each claim in the labeling is supported by substantial evidence of effectiveness, as required by the Drug Amendments of 1962. Because the holder of the new drug application described below did not submit the information requested by the July 9, 1966 notice, the drug was not reviewed by NAS-NRC.

NDA 11-641; Diabinese Tablets containing 100 milligrams or 250 milligrams chlorpropamide per tablet; Pfizer Laboratories, Division of Pfizer, Inc., 288 East 42nd St., New York, NY 10017.

After again being invited to submit data, the firm did so on September 11, 1970. The data and all available information were reviewed by FDA and found to provide substantial evidence of the drug's effectiveness as an oral hypoglycemic agent.

Labeling for oral, hypoglycemic drugs is presently undergoing revision. Proposed labeling was published in the Federal Register of July 7, 1975 (40 FR 28587), and when this labeling is finalized, the indications stated below may have to be revised.

As stated in the Federal Register of August 23, 1977 (42 FR 42511), the provision of 21 CFR 320.22(c) waiving bioavailability data for certain drugs does not necessarily apply to drug products first announced as effective in DESI notices published after January 7, 1977 providing, in the final instance, announcing that chlorpropamide is effective, chlorpropamide tablets have also been reviewed for actual or potential bioequivalence problems. It has been determined that new drug applications of new tablets should be added to the list of drugs for which bioavailability data are not waived.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the products specifically named above, this notice applies to any drug product that is not the subject of an approved new drug application and is identical to a product named above. It may also be applicable, under 21 CFR 310.6, to a similar or related drug product that is not the subject of an approved new drug application. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product that the person manufactures or distributes. Such person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above).

A. Effectiveness classification. The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indication set forth in the labeling conditions below.

B. Conditions for approval and marketing. The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. Form of drug. The drug is in tablet form suitable for oral administration.

2. Labeling conditions. a. The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The indications are as follows:

- (Name of drug) is indicated in uncomplicated diabetes mellitus of the stable, mild or moderately severe, non-ketotic, maturity-onset type that cannot be completely controlled by diet alone.

3. Marketing status. a. Marketing of such drug products that are the subject of a new drug application approved prior to October 30, 1962, may be continued provided that, on or before January 30, 1979, the holder of the application has submitted (1) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (2) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)).

In addition, to permit full approval of such application on the basis of effectiveness, as well as safety, the holder of the application is required to supplement its - application on or before May 30, 1979. To provide evidence to demonstrate the bioavailability of the drug, Guidelines on conducting bioavailability studies are available from the Division of Bioequivalencies.
facturer of animal feeds and is registered under section 510 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360) for manufacturing medicated feed. Banminth Premix-48 (pyrantel tartrate 48 grams per pound); Aureo SP-250 (chlortetracycline 20 grams per pound; sulfamethazine 4.4 percent; procaine penicillin 10 grams per pound).

In a letter dated July 15, 1978, the application was rejected, the firm applicant in accordance with §558.4(o)(2) (21 CFR 558.4(o)(2)) on the grounds that no regulation has been promulgated under section 512(i) of the act upon which the approval must rely under section 512(m)(1)(B) of the act, the firm contends that the data provide an adequate basis for approval of such combinations. The Director does not agree that the statute contemplates the submission of data under section 512(m) regarding the safety and effectiveness of new animal drug premixes. The application must be filed with the information under section 512(b) of the act and for an approval granted for an application filed under section 512(b) to result in publication of a regulation under section 512(d) of the act. No application has been filed under section 512(b) of the act for the requested combination of new animal drugs and consequently no regulation has been published under section 512(d) as a basis for approval of the requested combination through an application filed under section 512(m) of the act.

In enacting the Animal Drug Amendments of 1978, Congress introduced the following provisions which provide as follows:

(1) Any person may file with the Secretary an application for manufacturing an animal feed containing, or containing a new animal drug. Before a new animal drug can be approved for use in manufacturing a medicated feed, an application must be filed containing a new animal drug. Such person shall submit to the Secretary as part of the application:

(a) A full statement of the composition of such drug;
(b) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of such drug;
(c) The materials used in the manufacture of such drug or the articles used as components thereof, of any animal feed for use in or on which such drug is intended, and of the edible portions or products (before or after slaughter) of animals to which such drug (directly in or on animal feed) is intended to be administered, as the Secretary may require;
(d) Specimens of the labeling proposed to be used for such drug, or in case such drug is intended for use in animal feed, proposed labeling appropriate for such use, and specimens of the labeling for the drug to be manufactured, packaged, or distributed by the applicant;
(e) A description of practicable methods for determining the quantity, if any, of such drug in or on food, and any substance formed in or on food, because of its use; and
(f) The proposed tolerance or withdrawal period or other use restrictions for such drug. If any tolerance or withdrawal period or other use restrictions are required in order to assure that the proposed use of such drug will be safe.

Upon approval of any animal drug application, a regulation is published under section 512(i) of the act, which provides as follows:

(1) When a new animal drug application filed pursuant to subsection (b) is approved, the Secretary shall, in the Federal Register, the name and address of the applicant and the conditions and indications of use of the new animal drug covered by such application, including special labeling requirements applicable to any animal feed for use in which such drug is approved, and such other information upon the basis of which such application was approved, as the Secretary deems necessary to assure the safe and effective use of such drug.

Before an animal feed containing a new animal drug can be approved, an application must be filed with the Bureau of Veterinary Medicine under section 512(m)(1) of the act, which provides as follows:

(a) Any person may file with the Secretary an application with respect to any intended use or uses of an animal feed bearing or containing a new animal drug. Such person shall submit to the Secretary as part of the application:

(1) A full report of investigations which have been made to show whether or not such drug is safe and effective for use;
(2) A full list of the articles used as components of such drug;
(3) A full statement of the composition of such drug;
(4) A full description of the methods used in, and the facilities and controls used for, the manufacture, processing, and packing of such drug;
(5) Such samples of the medicated feed and of the articles used as components thereof, of any animal feed for use in or on which such drug is intended, and of the edible portions or products (before or after slaughter) of animals to which such drug (directly in or on animal feed) is intended to be administered, as the Secretary may require;
(6) Specimens of the labeling proposed to be used for such drug, or in case such drug is intended for use in animal feed, proposed labeling appropriate for such use, and specimens of the labeling for the drug to be manufactured, packaged, or distributed by the applicant;
(f) The proposed tolerance or withdrawal period or other use restrictions for such drug. If any tolerance or withdrawal period or other use restrictions are required in order to assure that the proposed use of such drug will be safe.

Upon approval of any animal drug application, a regulation is published under section 512(i) of the act, which provides as follows:

(1) When a new animal drug application filed pursuant to subsection (b) is approved, the Secretary shall, in the Federal Register, the name and address of the applicant and the conditions and indications of use of the new animal drug covered by such application, including special labeling requirements applicable to any animal feed for use in which such drug is approved, and such other information upon the basis of which such application was approved, as the Secretary deems necessary to assure the safe and effective use of such drug.
NOTICES

Four copies of all submissions under this notice must be filed with the Hearing Clerk, Food and Drug Administration. Except for data and information prohibited from public disclosure under 21 U.S.C. 331(i) or 18 U.S.C. 1905, responses to this notice may be seen in the office of the Hearing Clerk (FFA-305), Food and Drug Administration, between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 512(m)), as amended by Pub. L. 92-167, 85 Stat. 828, and is published under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Director of the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with §514.115 Withdrawal of approval of applications (21 CFR 514.115), notice is hereby given that approval of NADA 65-145V and all supplements thereto is hereby withdrawn, effective December 1, 1978.

TERENCE HARVEY,
Acting Director, Bureau of Veterinary Medicine.

REPORT ON BIOASSAY OF C. I. VAT YELLOW 4 FOR POSSIBLE CARCINOGENICITY

Availability

C. I. vat yellow, 4, (CAS 123-66-5) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of C. I. vat yellow 4, a commercial formulation containing dibenzo(b,def)chrysen-7,14-dione, for possible carcinogenicity was conducted by administering the test chemical in feed to Fischer 344 rats and B6C3F1 mice. Applications of C. I. vat yellow 4 include use as a dyestuff in wool, silk and synthetic fibers, as a paper pigment, and as a military smoke screen and signaling agent.

It is concluded that under the conditions of this bioassay, the formulated product containing C. I. vat yellow 4 was not carcinogenic for male or female Fisher 344 rats or for female B6C3F1 mice, but was carcinogenic for male B6C3F1 mice, causing an increased incidence of lymphomas.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research)

Dated: November 1, 1978.

REPORT ON BIOASSAY OF PIPERONYL SULFOXIDE FOR POSSIBLE CARCINOGENICITY

Availability

Piperonyl sulfoxide (CAS 129-62-7) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of technical-grade piperonyl sulfoxide for possible carcinogenicity was conducted by administering the test chemical in feed to Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an insecticide enhancer.

It is concluded that under the conditions of this bioassay, sulfoxazole was not carcinogenic for either Fischer 344 rats or B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20014.

(Catalogue of Federal Domestic Assistance Program Number 13.393, Cancer Cause and Prevention Research)

It is concluded that under the conditions of this bioassay, sulfoxazole was not carcinogenic for either Fischer 344 rats or B6C3F1 mice.

REPORT ON BIOASSAY OF SULFISOXAZOLE FOR POSSIBLE CARCINOGENICITY

Availability

Sulfoxazole (CAS 127-69-5) has been tested for cancer-causing activity with rats and mice in the Bioassay Program, Division of Cancer Cause and Prevention, National Cancer Institute. A report is available to the public.

Summary: A bioassay of sulfoxazole for possible carcinogenicity was conducted by administering the chemical by gavage to Fischer 344 rats and B6C3F1 mice. Applications of the chemical include use as an antimicrobial drug.

It is concluded that under the conditions of this bioassay, sulfoxazole was not carcinogenic for either Fischer 344 rats or B6C3F1 mice.

Single copies of the report are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21, National Institutes of Health, Bethesda, Maryland 20014.

BUREAU OF LAND MANAGEMENT

ALASKA NATIVE CLAIMS SELECTION

The Tatitlkek Corporation, for the Native village of Tatitlek, filed selection applications AA-6703-A and AA-6703-B, respectively, under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 888, 701; 43 U.S.C. 1601, 1611 (Supp. V, 1975)); and

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 868, 703; 43 U.S.C. 1610, 1613(f) (Supp. V, 1975)); and

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 868, 703; 43 U.S.C. 1610, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps in case file AA-6703-E, are reserved to the United States and subject to further regulation thereby:

a. (EIN 8a D9 G) An easement one hundred (100) feet in width for a proposed road from log transfer dock and public use easement EIN 6b G on the south shore of Fish Bay northeasterly to public lands. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

b. (EIN 6b G) A log transfer dock and public use easement upland of the mean high tide line in Sec. 11, T. 13 S., R. 7 W., Copper River Meridian, on the south shore of Fish Bay. The easement is ten (10) acres in size and is used for camping, vehicle use, staging and as a log transfer dock.

c. (EIN 8 D9) A continuous linear easement twenty-five (25) feet in width upland of and parallel to the mean high tide line, in order to provide access to and along the marine coastline and use of such shore for purposes such as beaching of watercraft or aircraft, travel along the shore, recreation and other similar uses. Deviations from the waterline are permitted when specific conditions so require, e.g., impassable topography. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

d. (EIN 14a G) An easement one hundred (100) feet in width for a proposed road from log transfer dock and public use easement EIN 14b G on the south shore of Galena Bay southeasterly to public lands. This road roughly follows Millard Creek and includes a southerly branch roughly following Copper Creek. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

e. (EIN 14b G) A log transfer dock and public use easement upland of the mean high tide line in Sec. 11, T. 13 S., R. 8 W., Copper River Meridian, on the south shore of Galena Bay near the mouth of Millard Creek. The easement is ten (10) acres in size and is used for camping, vehicle use, staging and as a log transfer dock.

f. (EIN 19a) An easement one hundred (100) feet in width for a proposed road from log transfer dock and public use easement EIN 19b G on the east shore of Irish Cove southeasterly to public lands. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

g. (EIN 19b G) A log transfer dock and public use easement upland of the mean high tide line in Sec. 3, T. 13 S., R. 7 W., Copper River Meridian, located just south of the north section line on the east shore of Irish Cove. The easement is ten (10) acres in size and is used for camping, staging and vehicle use.

h. (EIN 20a G) An easement one hundred (100) feet in width for a proposed road from log transfer dock and public use easement EIN 20b G on the east shore of Two Moon Bay southeasterly, to where it branches in Sec. 26, T. 13 S., R. 7 W., Copper River Meridian, on the south and east. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

i. (EIN 20b G) A log transfer dock and public use easement upland of the mean high tide line in Sec. 17, T. 13 S., R. 7 W., Copper River Meridian, on the east shore of
Two Moon Bay. The easement is ten (10) acres in size and is used for camping, vehicle use, staging and as a log transfer dock.

1. Rights of the United States to enter upon the lands hereinafter granted for cadastral, geodetic or other survey purposes is reserved, together with the right to do all things necessary in connection therewith.

These reservations have not been conformed to the Departmental easement policy announced March 3, 1978. Conformance is contingent upon resolution of the litigation Catseta, et al v. Andrus and implementation of the Secretary's new easement policy.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinafter granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;
2. Validation of such rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 356, 341; 43 U.S.C. 1601, 1621(k) (Supp. V, 1975)), that, as to the portion of the above-described lands located within the boundaries of a national forest (a) until December 18, 1977, the sale of any timber from such lands is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture and (b) until December 18, 1983, shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;
3. Requirements of Sec. 22(k) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 715; 43 U.S.C. 1601, 1621(k) (Supp. V, 1975)), that, as to the portion of the above-described lands located within the boundaries of a national forest (a) until December 18, 1976, the sale of any timber from such lands is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture and (b) until December 18, 1983, shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;
4. Requirements of Sec. 14(e) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (Supp. V, 1975)), that, as to the portion of the above-described lands located within the boundaries of a national forest (a) until December 18, 1976, the sale of any timber from such lands is subject to the same restrictions relating to the export of timber from the United States as are applicable to national forest lands in Alaska under rules and regulations of the Secretary of Agriculture and (b) until December 18, 1983, shall be managed under the principles of sustained yield and under management practices for protection and enhancement of environmental quality no less stringent than such management practices on adjacent national forest lands;
5. The terms and conditions of the agreement dated January 18, 1977, between the Secretary of the Interior, Chugach Natives, Inc., The Tatitlek Corporation and other Chugach village corporations. A copy of the agreement shall be attached to and become a part of the conveyance document and shall be recorded therewith. A copy of the agreement is located in the Bureau of Land Management easement case file for The Tatitlek Corporation, serialized AA-6649-A, and any person wishing to examine this agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99510.

The Tatitlek Corporation is entitled to conveyance of 115,200 acres of land selected pursuant to Sec. 12(a) of the Alaska Native Claims Settlement Act. To date, approximately 64,277 acres of this entitlement have been approved for conveyance; the remaining entitlement of approximately 50,923 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of the Alaska Native Claims Settlement Act, conveyance of the lands described above will be granted to Chugach Natives, Inc. when conveyance is granted to The Tatitlek Corporation for the surface estate, and shall be subject to the same conditions as the surface conveyance.

There are no inland water bodies considered to be navigable within the lands described.

In accordance with Departmental regulations 43 CFR 2850.7(e), notice of this decision is being published once in the FEDERAL REGISTER and once a week for four (4) consecutive weeks in both the ANCHORAGE TIMES and THE CORDOVA TIMES. Any party claiming a property interest which is adversely affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510, with a copy served upon the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Pouch 7-512, Anchorage, Alaska 99510, and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99510.

If an appeal is to be taken, the adverse parties to be served are:
The Tatitlek Corporation, P.O. Box 758, Cordova, Alaska 99574.
Chugach Natives, Inc., 912 East 15th Avenue, Anchorage, Alaska 99501.

SUZ A. WOLF, Chief, Branch of Adjudication.

[4310-84-M]

[AA-6649-A through AA-6649-D]

ALASKA NATIVE CLAIMS SELECTION

As to the lands described below, the applications, as amended, are properly filed and meet the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with Federal laws leading to acquisition of title.

This decision approves approximately 66,165.04 acres of national wildlife refuge lands for conveyance to the Atxam Corporation, for a cumulative total of approximately 66,165.04 acres.
This does not exceed the 69,120 acres permitted under section 12(a)(1).

In view of the foregoing, the surface estate of the following described lands, selected pursuant to section 12(a), aggregating approximately 89,165.04 acres, is considered proper for acquisition by the Axta Corporation, and is hereby approved for conveyance pursuant to section 14(a) of the Alaska Native Claims Settlement Act:

**Lands Within the Aleutian Islands National Wildlife Refuge (EO 1733)**

**Seward Meridian, Alaska (Unsurveyed)**

T.93 S., R. 175 W.

Sec. 2, all; Secs. 3 to 10 (fractional), inclusive, all; Secs. 11 to 15 (fractional), inclusive, all; Sec. 16, all; Containing approximately 2,980 acres.

T.93 S., R. 176 W.

Secs. 1 to 10 (fractional), inclusive, all; Secs. 11 to 15 (fractional), inclusive, all; Sec. 16, all; Containing approximately 2,930 acres.

T.93 S., R. 177 W.

Secs. 1 to 10 (fractional), inclusive, all; Sec. 11, all; Containing approximately 2,920 acres.

Secs. 15 to 21 (fractional), inclusive, all; Sec. 20 (fractional), all; Containing approximately 7,716 acres.

T. 93 S., R. 178 W.

Secs. 13 and 14, all; Secs. 15, 16, and 17 (fractional), all; Sec. 18, all; Secs. 19 to 23 (fractional), inclusive, all; Sec. 24, all; Secs. 25, 26, and 27 (fractional), all; Containing approximately 5,374 acres.

T. 93 S., R. 179 W.

Secs. 21 to 27 (fractional), inclusive, all; Sec. 28 (fractional), all; Secs. 29 and 30, all; Secs. 31, 32, and 33, all; Secs. 34 and 35, all; Containing approximately 5,305 acres.

T. 94 S., R. 179 W.

Secs. 1 and 2 (fractional), all; Sec. 3, all; Secs. 4, 5, and 7 (fractional), all; Sec. 9, 10, and 11 (fractional), all; Secs. 14 to 20 (fractional), inclusive, all; Sec. 25 (fractional), all; Containing approximately 3,385 acres.

Aggregating approximately 66,165.04 acres within the Aleutian Islands National Wildlife Refuge (EO 1733).

**Lands Outside the Aleutian Islands National Wildlife Refuge (EO 1733)**

**Seward Meridian, Alaska (Unsurveyed)**

T. 52 S., R. 73 W.

Secs. 15 to 21 (fractional), inclusive, all; Secs. 22 to 25 (fractional), inclusive, all; Secs. 26 and 27 (fractional), all; Containing approximately 7,638 acres.

T. 54 S., R. 78 W.

Secs. 1 and 2 (fractional), all; Secs. 7 to 10 (fractional), inclusive, all; Secs. 11 to 12 (fractional), all; Sec. 13 to 17, inclusive, all; Containing approximately 8,473 acres.

T. 53 S., R. 79 W.

Secs. 22 and 23 (fractional), all; Secs. 24 and 25 (fractional), all; Containing approximately 4,100 acres.

T. 78 S., R. 124 W.

Portions of land on Unalaska Island, excluding any offshore islands, rocks and pinnacle within the following described description:

Sec. 1, all; Secs. 2, 3, and 4 (fractional), all; Secs. 5 and 6 (fractional), all; Sec. 7 to 10 (fractional), inclusive, all; Secs. 11 to 15 (fractional), inclusive, all; Secs. 18 to 20 (fractional), inclusive, all; Secs. 21 and 22 (fractional), all; Secs. 23 to 26 (fractional), all; Secs. 27 and 28 (fractional), all; Secs. 29 and 30 (fractional), all; Containing approximately 2,980 acres.

Secs. 1 and 2 (fractional), all; Secs. 3 to 6 (fractional), inclusive, all; Sec. 7 to 10 (fractional), all; Sec. 11, all; Sec. 12 (fractional), all; Containing approximately 5,716 acres.

**Conveyance**

In view of the foregoing, the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (65 Stat. 688, 704; 43 U.S.C. 1601, 1613(f) (Supp. V, 1975)); and

2. Pursuant to section 17(b) of the Native Claims Settlement Act of December 18, 1971 (65 Stat. 688, 704; 43 U.S.C. 1601, 1616(b) (Supp. V, 1975)), the following public easements, referenced by easement identification number (EIN) on the easement maps in case file AA-6640-CF are reserved to the United States and subject to further regulation thereby:

a. (EIN 2 D9) An easement for an existing access trail fifty (50) feet in width from the village of Axta northwesterly to Korovin Bay. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

b. (EIN 4 C0) A continuous linear easement twenty-five (25) feet in width upland of and parallel to the mean high tide line in order to provide access to and along the marine coastline and use of such shore for purposes such as beaching of watercraft or aircraft, travel along the shore, recreation and other similar uses. Deviations from the upland line are permitted conditions so require, e.g., impassable topography or waterfront obstruction. This easement is subject to use by the owner of the servient estate to build upon such easement a facility for public or private purposes, such right to be exercised reasonably and without undue or unnecessary interference with or obstruction of such easement. When access along the marine coastline easement is to be obstructed, the owner of the servient estate will be obligated to convey to the United States an acceptable alternate access route, at no cost to the United States, prior to the creation of such obstruction.

c. (EIN 5 C) The right of the United States to enter upon the lands herein granted for cadastral, geodetic or other survey purposes is reserved, together with the right to do all things necessary in connection therewith.

d. (EIN 7a D9) A fishery management and public use easement of the mean high tide line in Sec. 3, T. 54 S., R. 78 W., Seward Meridian, on the south shore of Canoe Bay. The maximum size is 500 feet in width and three thousand (3,000) feet in length and is used for camping, vehicular use and for fishery management purposes.

e. (EIN 7c D9) A bush airstrip easement two hundred and fifty (250) feet in width and three thousand (3,000) feet in width, located in Sec. 5, T. 54 S., R. 78 W., Seward Meridian. This size is minimum for public safety.

f. (EIN 7d D9) An easement for an existing access trail twenty-five (25) feet in width from airstrip easement EIN 7c D9 northeasterly to the shore of Canoe Bay. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

g. (EIN 8 E) An easement for an existing access trail twenty-five (25) feet in width from easement EIN 2 D9 northeasterly along the north shore of Nazan Bay. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

h. (EIN 9 E) An easement for a proposed access trail twenty-five (25) feet in width from the northeast end of Vasilife Bay in T.
the Alaska Native Claims Settlement Act of March 4,
Alaska Offshore Marine Services, Inc.
granted to him; the rights, privileges and benefits thereby
Statehood Act of July
Andrus
resolution of the litigation
ment policy announced March
T. 54 S., R. 78 W., Seward Meridian southerly
to public lands. The usage of roads and trails will be
controlled by applicable State or Federal law or regulation.

1. (EIN 10 E) An easement for a proposed access
trail twenty-five (25) feet in width
from easement EIN 14 E (EIN 7 C4, Sand Point) at the
head of Canoe Bay
northeasterly along the left bank of Four
Bear Creek to public lands. The usage of
roads and trails will be controlled by applicable
State or Federal law or regulation.

2. Valid existing rights therein, if
applicable State or Federal law or regulation.

3. (EIN 13 E) An easement for a proposed access
trail twenty-five (25) feet in width
from site easement EIN 14 E (EIN 7 C4, Sand Point)
northeasternly toward Canoe Bay
southeasterly to public lands. The usage of
roads and trails will be controlled by applicable
State or Federal law or regulation.

m. (EIN 14 E) A one (1) acre site easement
upland of the mean high tide line/in Sec. 12,
T. 54 S., R. 78 W., Seward Meridian on the
eastern shore of Canoe Bay and the left
bank of Four Bear Creek at its junction with
Canoe Bay River. The site is for camp-
ing, staging and vehicle use.

These requirements have not been
conformed to the Departmental easement
Conformance is contingent upon resolu-
tion of the litigation Calista, et al v.
Andrus and implementation of the
Secretary's new easement policy.

The grant of lands shall be subject to:
1. Issuance of a patent confirming the
boundary description of lands heretabefore granted after approval
and filing by the Bureau of Land Man-
agement of the official plat of survey
covering such lands;
2. Valid existing rights therein, if
any, including but not limited to those
created by any lease including a lease
issued under section 6(g) of the Alaska
339, 341; 48 U.S.C. Ch. 2, Sec. 6(g)
(1970)), contract, permit, right-of-way
or easement and the right of the
lessee, contractor, permittee or grant-
ee to the complete enjoyment of all
rights, privileges and benefits thereby
granted to him.
3. Grant of lease A-060872 to The
Alaska Offshore Marine Services, Inc.
on Unalaska Island within T. 78 S., R.
124 W., Seward Meridian, under the
act of March 4, 1927 (44 Stat. 1452; 48
U.S.C. 471, 471a and 471c);
4. The naval airspace reservation
of Executive Order 6880 dated February
14, 1941;
5. Requirements of section 22(g) of
the Alaska Native Claims Settlement
Act of December 18, 1971 (85 Stat. 688,
714; 43 U.S.C. 1601, 1621(g) (Supp. V.
1975)), that (a) the above-described lands
which were within the bound-
daries of the Aleutian Islands National
Wildlife Refuge on December 18, 1971,
remain subject to the laws and regula-
tions governing use and development
of such refuge, and that (b) the right of
first refusal, if said land or any part
thereof is ever sold by the above-
mentioned corporation, is reserved to
the United States;
6. Requirements of section 14(c) of
the Alaska Native Claims Settlement
Act of December 18, 1971 (85 Stat. 688,
703; 43 U.S.C. 1631c(Supp. V.
1975)), that the grantee hereunder
convey those portions, if any, of
the lands hereinabove granted, as are
prescribed in said section; and
7. The terms and conditions of the
agreement between the
Secretary of the Interior, The
Aleut Corporation, the Atxam Corporation and other Aleut
village corporations. A copy of the agreement
shall be attached to and become a part
of the conveyance document and shall
be recorded therewith. A copy of
the agreement is located in the Bureau
of Land Management easement case
file for Atxam Corporation, serialnumbers A-
6549-EE. Any person wishing to exam-
ine this agreement may do so at the
Bureau of Land Management, Alaska
State Office, 555 Cordova Street,
Anchorage, Alaska 99501.

The Atxam Corporation is entitled to
conveyance of an acre site easement
covering such lands. A copy
of the agreement is located in the Bureau
of Land Management easement case
file for Atxam Corporation, serialnumber A-
6549-EE. Any person wishing to exam-
ine this agreement may do so at the
Bureau of Land Management, Alaska
State Office, 555 Cordova Street,
Anchorage, Alaska 99501.

The Atxam Corporation is entitled to
conveyance of an acre site easement
covering such lands. A copy
of the agreement is located in the Bureau
of Land Management easement case
file for Atxam Corporation, serialnumbers A-
6549-EE. Any person wishing to exam-
ine this agreement may do so at the
Bureau of Land Management, Alaska
State Office, 555 Cordova Street,
Anchorage, Alaska 99501.

Any person wishing to exam-
ine the agreement
for Atxam Corporation,serialnumber A-
6549-EE. Any person wishing to exam-
ine this agreement may do so at the
Bureau of Land Management, Alaska
State Office, 555 Cordova Street,
Anchorage, Alaska 99501.

Any person wishing to exam-
in the agreement
for Atxam Corporation,serialnumber A-
6549-EE. Any person wishing to exam-
ine this agreement may do so at the
Bureau of Land Management, Alaska
State Office, 555 Cordova Street,
Anchorage, Alaska 99501.
Commission hearing scheduled. The Commission will hold a hearing beginning at 10 a.m., e.s.t., on Tuesday, February 6, 1979, in the Commission's Hearing Room (Room 331), 701 E Street N.W., Washington, D.C. 20436. The purpose of the hearing will be for the Commission to receive oral presentations concerning appropriate relief, bonding, and the public interest in the event that the Commission determines that there is a violation of section 337. This hearing will be held on one day only in order to facilitate the completion of this investigation within time limits under law and to minimize the burden of this hearing upon the parties to the investigation. The procedure for the hearing follows.

Oral presentations on relief, bonding, and the public interest. A party to the investigation, an interested agency, a public-interest group, or any interested member of the public may make an oral presentation on relief, bonding, and the public interest.

1. Relief. In the event that the Commission finds a violation of section 337, it can issue (1) an order which could result in cancellation of the sale of the parcel, and the deposit shall be forfeited and disposed of as other receipts of sale.

2. Bonding. In the event that the Commission finds a violation of section 337 and orders some form of relief, the highest bidder will be required to pay the full bid price immediately at the sale. The remainder of the full bid price shall be paid within 30 days of the sale. Failure to pay the full bid price within 30 days shall result in cancellation of the sale of the parcel, and the deposit shall be forfeited and disposed of as other receipts of sale.

3. The public interest. In the event that the Commission finds a violation of section 337 and orders some form of relief, the Commission must consider the effect of that relief upon the public interest. Accordingly, the Commission is interested in the effect of any exclusion order, cease and desist order, granted either alternatively or together, upon (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the production of like or directly competitive articles in the United States and (4) U.S. consumers.

A party to the Commission's investigation, an interested agency, a public-interest group, or any interested person wishing to make an oral presentation concerning relief, bonding, and the public interest will be limited to no more than 30 minutes. Participants will be permitted an additional 5 minutes each for summation after all presentations have been made. All participants with similar interests may be required to share time. The order of oral presentations will be as follows: complainant, respondents, interested agencies, public-interest groups, other interested members of the public, and Commission investigative staff. Summations will follow the same order.

How to participate in the hearing. If you wish to appear at the Commission's hearing, you must file a written request to appear with the Secretary to the Commission, 701 E Street NW., Washington, D.C. 20436, no later than the close of business on Wednesday, January 10, 1979. Your written request must indicate whether your oral presentation will concern relief, bonding, the public interest, or a combination of these.

Written submissions to the Commission. The Commission requests that written submissions be filed prior to the hearing in order to focus the issues and facilitate the orderly conduct of the hearing.

1. Written comments and information concerning relief, bonding, and the public interest. Parties to the Commission's investigation, interested agencies, public-interest groups, and any other interested members of the public are encouraged to file written comments and information concerning relief, bonding, and the public interest. These written submissions will be very useful to the Commission in the event that it determines that there is a violation of section 337 and that relief should be granted.

Written comments and information concerning relief, bonding, and the public interest shall be submitted as follows. First, complainant shall file a detailed proposed Commission action, including a proposed determination of bonding, a proposed order granting relief, a discussion of how this order will be enforced, and a discussion of the effect of its proposals on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers, with the Secretary to

NEVADA

Amendment of Notice of Realty Action—Sale

On November 9, 1978, a NOTICE was published in the Federal Register, Thursday, November 9, 1978, at pages 52292-52293, stating that certain public lands in Nevada would be sold at public auction on December 13, 1978. Included in the sale procedure was a provision that for each parcel, the highest bidder will be required to pay full bid price immediately at the sale.

A protest has been received suggesting that, because of the high values of lands involved, many parties would not be able to arrange for financing prior to the sale. Therefore, the NOTICE is amended as follows:

1. The requirement that the highest bidder be required to pay the full bid price immediately at the sale is deleted.

2. The highest bidder will be required to submit a nonrefundable deposit of one-fifth of the full bid price immediately at the sale. The remainder of the full bid price shall be paid within 30 days of the sale. Failure to pay the full bid price within 30 days shall result in cancellation of the sale of the parcel, and the deposit shall be forfeited and disposed of as other receipts of sale.

ARNOLD E. PETTY,
Acting Associate Director

(FR Doc 78-33661 Filed 11-30-78; 8:45 am)
the Commission no later than the close of business on Tuesday, December 26, 1978, Second, to other parties, interested agencies, public-interest groups, and other interested members of the public shall file written comments and information concerning the action which complainant has proposed, and available alternatives, and the advisability of any Commission action in light of the public-interest considerations listed above no later than the close of business on Monday, January 22, 1979.

2. Written report on the public-interest factors to be submitted by the Commission investigative staff. The Commission's investigative staff will file and serve upon all parties a formal report on the public-interest factors to be considered by the Commission together with the staff's recommendations and conclusions no later than January 22, 1979.

Additional information. The original and 19 true copies of all written submissions must be filed with the Secretary to the Commission. If you wish to submit a document (or a portion thereof) to the Commission in confidence, you must request in camera treatment. Your request should be directed to the Chairman of the Commission and must include a full statement of the reasons the Commission should grant such treatment. The Commission will either accept the submission in confidence or return the submission to you. All nonconfidential written submissions will be open to public inspection at the Secretary's Office.

Notice of the Commission's investigation was published in the FEDERAL REGISTER of May 2, 1978 (38 FR 10837), and the Notice of Reactivation was published in the FEDERAL REGISTER of February 21, 1978 (43 FR 7273). Issued: November 27, 1978.

By order of the Commission.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE
Office of the Attorney General
LAAG/A Order No. 19-78

PRIVACY ACT OF 1974
Amended System of Records

On Thursday, April 27, 1978, notice of the existence of a system of records maintained by the Drug Enforcement Administration entitled "Investigative Reporting and Filing System" JUSTICE/DEA-008 was published in the FEDERAL REGISTER pursuant to 5 U.S.C. 552a(e)(4).

Notice is hereby given that pursuant to the Privacy Act of 1974, 5 U.S.C. 552a, the Drug Enforcement Administration, Department of Justice, proposes to further refine this system. The new system (Investigative Reporting and Filing System) will provide for the automated retrieval of certain demographic and administrative data relating to confidential sources of information. This capability will provide management with the ability to meet internal requirements for review of confidential sources of information and better enable management to assess the effectiveness of the use of confidential sources of information.

The amended system notice is reprinted below. Changes have been italicized.

Appropriate reports have been filed with Congress and the Office of Management and Budget.

KEVIN D. ROONEY,
Assistant Attorney General for Administration.

JUSTICE/DEA-008
System name:
Investigative Reporting and Filing System.

System location:
Drug Enforcement Administration;
1405 I Street, N.W.; Washington, D.C. 20537. Also, field offices. See Appendix I for list of addresses.

Categories of individuals covered by the system:
A. Drug offenders
B. Alleged drug offenders
C. Persons suspected of drug offenses
D. Confidential Informants
E. Defendants
F. Witnesses
G. Non-implicated persons with pertinent knowledge of some circumstance or aspect of a case or suspect.

These are pertinent references of fact developed by personal interview or third party interview and are recorded as a matter for which a probable need for recall will exist. In the regulatory portion of the system, records are maintained on the following categories of individuals: (a) Individuals registered with DEA under the Comprehensive Drug Abuse Prevention and Control Act of 1970; (b) Responsible officials of business firms registered with DEA; (c) Employees of DEA registrants who handle controlled substances or occupy positions of trust related to the handling of controlled substances; (d) Applicants for DEA registration and their responsible employees.

Categories of records in the system:
The investigative Reporting and Filing System includes, among other things, a system of records maintained by the Drug Enforcement Administration under the Privacy Act of 1974. Individual records, i.e., items of information on an individual, may be decentralized in separate investigative file folders. Such records, as well as certain other records on persons and subjects covered by the Act, are made retrievable and are retrieved by reference to the following subsystems.

A. The Narcotics and Dangerous Drugs Information System (NADDIS) is a subsystem designed to provide appropriate reports of the type cited in and extracted from investigative files and confidential information regarding drug trafficking, or perform other lawful services; and (b) persons who furnish information to DEA on an occasional basis.

The information contained in this subsystem is extracted directly from investigative files and confidential informant files contained in the system.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
This subsystem contains no names. The subsystem consists of alphanumeric identifiers coupled with demographic and administrative data concerning the confidential source. The subsystem serves primarily as an administrative tool to enable DEA management to perform periodic review of confidential sources required by DEA guidelines and regulations, to enable DEA to maintain more effective management controls over the expenditure of funds to confidential sources and to enable DEA to more systematically assess the performance of particular confidential sources. In addition, the system will generate statistical reports which will assist DEA management in evaluating the overall effectiveness of the utilization of confidential sources of information.

The system is accessed by designated ADP terminals on the strictest need to know basis.

C. Manual name indices covering regional and district investigative activities are maintained by DEA field offices. A residual card index is retained by DEA headquarters that predates the automated central index. The items of information on the manual index records are extracted only from investigative reports and point to the more comprehensive information in pertinent investigative file folders. The records in the field office indices are subsets of the central automated and manual indices. Records are retrievable by name only by this manual technique. Four basic categories of files are maintained within the Investigative Reporting and Filing System. DEA does not maintain a dossier type file in the traditional sense on an individual. Instead, the files are compiled on separate investigations, topics and on a functional basis for oversight and investigative support. (a) Criminal Investigative Case Files; (b) General Investigative Files, Criminal and Regulatory; (c) Regulatory Audit and Investigative Files; (d) Confidential Informant Files.

The basic document contained in these files is a multipurpose report of investigation (DEA-6) in which investigative activities and findings are rigorously documented. The reports pertain to the full range of DEA criminal drug enforcement and regulatory investigative functions that emanate from the Comprehensive Drug Prevention and Control Act of 1970. Within the categories of files listed above, the general file category includes preliminary investigations of a criminal nature, certain topical or functional aggregations and reports of preregistrant inspections investigations. The case files cover targeted conspiracies, trafficking situations and formal regulatory audits and investigations. Frequently the criminal drug cases are the logical extension of one or more preliminary investigations. The distinction between the case file and general file categories, therefore, is based on internal administrative policy and should not be construed as a differentiation of investigation techniques or practices. These files, except for Confidential Informant Files, contain also adopted reports received from other agencies to include items that comprise, when indexed, individual records within the meaning of the Act. The central files maintained at DEA Headquarters include, in general, copies of investigative reports and most of the supporting documents that are generated or adopted by DEA Headquarters and field offices.

Authority for maintenance of the system:

This system is established and maintained to enable DEA to carry out its functions as defined law enforcement and regulatory functions under the Comprehensive Drug Abuse Prevention and Control Act of 1970 (Pub. L. 91-513), Reorganization Plan No. 2 of 1973, and to fulfill United States obligations under the Single Convention on Narcotic Drugs.

Routine uses of records maintained in the system, including categories of users and the purpose and use of disclosure:

This system may be used as a data source or reference facility for numerous summary, management and statistical reports produced by the Drug Enforcement Administration. Only on rare occasions do such reports contain identifiable individual records. Information contained in this system is provided to the following categories of users as a matter of routine use for law enforcement and regulatory purposes: (a) Other federal law enforcement and regulatory agencies; (b) State and local law enforcement and regulatory agencies; (c) Foreign law enforcement agencies with whom DEA maintains liaison; (d) The Department of Defense and Military Departments; (e) The Department of State; (f) U.S. intelligence agencies concerned with drug enforcement; (g) The United Nations; (h) Interpol; (i) To individuals and organizations in the course of investigations to eliciting information.

In addition, disclosures are routinely made to the following categories for the purposes stated: (a) To federal agencies for national security clearance purposes and to federal and state regulatory agencies responsible for the licensing or certification of individuals in the fields of pharmacy and medicine; (b) To the Office of Management and Budget upon request in order to justify the allocation of resources; (c) To State and local prosecutors for assistance in preparing cases concerning criminal and regulatory matters; (d) To the news media for public information purposes; and (e) To respondents and their attorneys for purposes of discovery, formal and informal in the course of an adjudicatory, rulemaking, or other hearing held pursuant to the Controlled Substances Act of 1970.

The release of information to the news media: Information permitted to be released to the news media and the public pursuant to 5 U.S.C. 552 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Congress:

A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspection conducted under the authority of 44 U.S.C. 2904 and 2906.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Administration regulations include detailed instructions for the preparation, adoption, handling, dissemination, indexing of individual records, storage, safeguarding of investigative reports and the accounting of disclosure of individual records.

Storage:

1. The Headquarters central files and the field office subsets of the Investigative Reporting and Filing System are maintained in standard file folders. Standard formats are employed. Manual indices are maintained using standard index record formats.

2. The Narcotics and Dangerous Drugs information subset is stored electronically on the Department of Justice computer center separate from DEA Headquarters.

Retrieval:

Access to individual records is gained by reference to either the automated or manual indices. Retrieval is a function of the presence of items in the index and the matching of names in the index with search argument names identifying numbers in the case of the automated system. Files

FEDERAL REGISTER, VOL 43, NO. 232—FRIDAY, DECEMBER 1, 1978

Proposed Consent Judgment and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Section 16 (b)-(t), that a proposed consent judgment and competitive impact statement as set out below have been filed with the United States District Court for the Northern District of California in United States v. Golden Gate Sportfisher, Inc., Civil No. 78-1608 WWS. The complaint in this case alleges that the defendant, an association of charter sportfishing boat owners, combined with co-conspirators to fix, maintain and stabilize the prices which the members of the association charge to carry passengers in California in violation of Section 1 of the Sherman Act.

The proposed judgment prohibits defendant from entering into any agreement to fix the prices charged by sportfishing boats for carrying passengers and from recommending that its members or any other person use or adhere to any price. It also forbids defendant to attempt to influence its members or any other person regarding prices or to put into effect any procedure the effect of which is to fix, maintain or stabilize the price to be charged for passage on sportfishing boats.

Public comment is invited within the statutory 60 day comment period. Such comments and responses thereto will be published in the Federal Register and filed with the Court. Comments should be directed to Anthony E. Desmond, Chief, San Francisco Office, Antitrust Division, U.S. Department of Justice, 450 Golden Gate Avenue, San Francisco, California 94102.

Charles F. B. McAleen, Special Assistant for Judgment Negotiations.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

Civil No. C78-1608 WWS.

Filed: October 26, 1978.

STIPULATION

It is stipulated by and between the undersigned parties, plaintiff United States of America, and defendant, Golden Gate Sportfishers, Inc., by their respective attorneys, that:

1. The parties consent that a final judgment in the form hereto attached may be filed and entered by the Court upon the motion of either party or upon the Court’s own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16) and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent which it may do at any time before the entry of the proposed final judgment by serving notice thereof on defendant and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to plaintiff and defendant in this or any other proceeding.

For the Plaintiff: John H. Sherwood, Assistant Attorney General; Robert B. Rich, William E. Swope; Charles F. B. McAleen; Anthony E. Desmond, Attorneys, Department of Justice.

For the Defendant: John Connell, Attorney for Defendant.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

Civil No. C78-1608 WWS.

Filed: October 26, 1978.

FINAL JUDGMENT

Plaintiff, United States of America, having filed its complaint herein on July 19, 1978, and defendant, Golden Gate Sportfishers, Inc., having appeared by its counsel,
and both parties by their respective attorneys having consented to the making and entry of this Final Judgment without admission by any party in respect to any issue; Now, therefore, before any testimony has been taken herein, without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed, as follows:

I

This Court has jurisdiction over the subject matter of this action and of the parties hereto. The complaint states claims upon which relief may be granted against the defendant under Section I of the Sherman Act, [15 U.S.C. §1].

II

As used in this Final Judgment:

(A) “Defendant” means defendant Golden Gate Sportfishers, Inc.

(B) “Person” means any individual, partnership, corporation, association, firm, or any other business or legal entity;

III

The provisions of this Final Judgment shall apply to the defendant and to each of its officers, directors, agents, employees, chapters, successors and assigns, and to all other persons, including members of the defendant, in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise.

IV

Defendant is enjoined and restrained from directly or indirectly:

(A) Entering into or adhering to, maintaining, or furthering any contract, agreement, understanding, plan or program, to fix, establish, or maintain prices charged by sportfishing boats;

(B) Advocating, suggesting, urging, inducing, compelling, or in any other manner influencing or attempting to influence members of the defendant and/or any other person to use or adhere to any price to be charged for passage on sportfishing boats;

(C) Policing, urging, coercing, influencing, or attempting to influence in any manner any member or any other person, or devising or putting into effect any procedure (including, but not limited to picking) the effect of which is to fix, maintain, or stabilize prices to be charged by members or any other persons for passage on sportfishing boats.

V

Defendant is ordered and directed:

(A) Within 60 days after entry of this Final Judgment to serve a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, upon each of those persons who are or have been officers or members of defendant at any time since January 1, 1977.

(B) To serve a copy of this Final Judgment together with a letter identical in text to that attached to this Final Judgment as Appendix A, upon all of its future members at such time as they become members;

(C) To file with this Court and serve upon the plaintiff within sixty (60) days after the date of entry of this Final Judgment an affidavit as to the fact and manner of compliance with subsection A of this Section V.

VI

(A) For the purpose of determining or securing compliance with this Final Judgment, any duly authorized representative of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General, upon compliance with the Antitrust Division, and on reasonable notice to defendant made to its principal office, be permitted, subject to any legally recognized privilege:

(1) Access during the office hours of defendant to all books, ledgers, accounts, correspondence, memoranda, and other records and documents, in the possession or under the control of defendant, relating to any matters contained in this Final Judgment;

(2) Subject to the reasonable convenience of defendant and without restraint or interference from it, to interview officers, directors, agents, partners, members, or employees of defendant, who may have counsel present, regarding any such matters.

(B) Defendant, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such reports in writing with respect to any of the matters contained in this Final Judgment as may from time to time be requested.

No information obtained by the means prescribed in this Section VI shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(C) If at the time information or documents are furnished by a defendant to plaintiff, the defendant represents and identifies in writing the material in any such information or documents which is of a type described in Rule 56(c)(7) of the Federal Rules of Civil Procedure, and the defendant marks each pertinent page of such material.

Subject to the Claim of Protection under the Federal Rules of Civil Procedure, ten (10) days notice shall be given by plaintiff to the defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which the defendant is not a party.

VII

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders and directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance therewith, and for the punishment of violations thereof.

VIII

Entry of this Final Judgment is in the public interest.

Dated:________

United States District Judge.

APPENDIX A

Re: Final Judgment in United States v. Golden Gate Sport Fishers, Inc., Civil No. C78-1608 WWS

Dear Sir: Enclosed herewith is a copy of a Final Judgment entered ________, 1978, in United States v. Golden Gate Sport Fishers, Inc., Civil No. C78-1608 WWS. The terms of the Final Judgment require that a copy of said Judgment as well as this letter be served upon you. You should read the terms of the Final Judgment carefully and note that you as a member of the association are bound by its provisions. The purpose of this letter is to help you better understand those provisions.

The essence and intent of the Final Judgment is that you make your own pricing and profit decisions without consulting with any other sportfishing boats or organization of such boats. This includes not only the price of passage, but also any discounts, or concessions in the charges for rental fishing equipment, tackle, or ball. Prices should not be a subject of agreement. Nor should you attempt to influence the prices charged by others, whether such influence be in the form of persuasion or coercion.

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF CALIFORNIA

Civil No. C78-1608 WWS.

October 26, 1978.

COMPETITIVE IMPACT, STATEMENT

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act [15 U.S.C. §§ 16(b)(h), P.L. 93-528 (December 21, 1974)], the United States of America hereby files this Competitive Impact Statement relating to the proposed consent judgment submitted for entry in this civil antitrust proceeding.

I

NATURE AND PURPOSE OF THE PROCEEDING

On July 19, 1978, the United States filed a civil complaint under Section 4 of the Sherman Act [15 U.S.C. §4] alleging that defendant Golden Gate Sportfishers, Inc., violated Section 1 of the Sherman Act [15 U.S.C. §1]. The complaint alleges a combination and conspiracy in unreasonable restraint of interstate commerce, the substantial terms of which were that the defendant and various coconspirators agreed to raise and fix the prices which members of the defendant charge to carry passengers.

II

PRACTICES AND EVENTS GIVING RISE TO THE ALLEGED VIOLATION OF THE ANTITRUST LAWS

The defendant Golden Gate Sportfishers, Inc., is an association of licensed captains and boat owners engaged in carrying sportfishing on fishing trips. The association's 130 members are located in California from Crescent City near the Oregon border to Morro Bay in Southern California. Most of the members are located in the San Francisco Bay area. Many customers are from States other than California and they receive passage using interstate telephone calls and letters. Out of state passengers who pay with credit cards and checks cause paperwork and funds to be transferred in-
terstate. Many of the fishing trips result in passengers being carried outside the jurisdictional waters of California.

The Government contends that beginning sometime prior to February 1977, the defendant and its members combined and conspired in the charge of other existing plants or facilities operated by the applicant.

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate, or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.
2. Employment trends in the same industry in the local area.
3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.
4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).
5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D Street NW, Washington, D.C. 20213.

Signed at Washington, D.C., this 28th day of November 1978.

Mine Safety and Health Administration

(Docket No. M-78-80-C)

EASTERN ASSOCIATED COAL

Petition for Modification of Application of Mandatory Safety Standard

Eastern Associated Coal Corporation, 1728 Koppers Building, Pittsburgh, Pennsylvania 15219, has filed a petition to modify application of 30 CFR 78.305 (weekly examinations of return airways) to its Federal No. 1 Mine in Marion County, W.Va. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petition is as follows:

(1) The petition pertains to certain return airways projecting through extensive abandoned areas of the mine.
(2) The slate roof of these areas has so deteriorated as to cause massive roof fall which renders safe travel virtually impossible.
(3) The return airways, although fallen and unsafe for travel, allow sufficient flow of air to effectively ventilate the affected area of the mine.
(4) It is exceedingly hazardous to conduct weekly ventilation and methane tests in the entries of the return airways.
(5) As an alternative, the petitioner outlines a proposed use of an air quality monitoring system using eleven check points.
(6) The petitioner states that this alternative will provide no less protection than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before January 2, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available at that address.

ROBERT B. LAGATHER, Assistant Secretary for Mine Safety and Health.

(Docket No. M-78-84-M)

PORTLAND-MONSON SLATE CO.

Petition for Modification of Application of Mandatory Safety Standard

The Portland-Monson Slate Co., Monson, Maine, 04464, has filed a petition to modify application of 30 CFR 57.11-50 (escapeways) to its No. 5 Mine in Piscataquis County, Maine.

The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petition is as follows:

(1) The mine exists in very competent rock which requires no support.
(2) Because the mine is extremely wet and there are no combustibles in the shaft or tunnels, the potential for fire is minimal.
(3) In lieu of a second shaft opening to the surface, the petitioner proposes to construct a refuge chamber as outlined in 30 CFR 57.11-52.
(4) The petitioner states that this alternative will achieve no less protection than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before January 2, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available at that address.

ROBERT B. LAGATHER, Assistant Secretary for Mine Safety and Health.

[FR Doc. 78-33716 Filed 11-30-78; 8:45 am]
and children's shirts, sweaters, jackets, blouses, skirts, slacks and shorts.

The Notice was published in the Federal Register on April 11, 1978 (43 FR 15205-15206). No public hearing was requested and none was held.

The investigation revealed that employment of production workers at the Culpeper, the New Market, and the Monterey, Virginia Sewing Plants increased in 1977 compared to 1976 and in the first seven months of 1978 compared to the same period in 1977. At each of these plants, average quarterly employment increased in every quarter compared to the same quarter of the previous year beginning with the first quarter in 1977 and continuing through the second quarter of 1978.

With respect to workers at the Abilene, Texas, Textile Plant, the Strasburg, Virginia Sewing Plant; the Brookneal, Virginia Sewing Plant; the Edinburg, Virginia Textile Plant; the Flint Hill, Virginia Sewing Plant; the Flint Hill, Virginia Cutting Plant; the Victoria, Virginia Sewing Plant; the Woodstock, Virginia Cutting Plant; the Woodstock, Virginia Warpknit Plant; and the Woodstock, Virginia Shipping Facility all of the group eligibility requirements of Section 222 of the Act have been met.

U.S. imports of women's, misses' and children's coats and jackets increased on an absolute basis and relative to domestic production from 1975 to 1976 and from 1976 to 1977.

U.S. imports of women's, misses' and children's sports wear increased in each year from 1975 through 1977.

U.S. imports of women's, misses' and children's sportswear who became totally or partially separated from other employees producing floor coverings, cork, linoleum and plastic products in the wood flooring industry are eligible to apply for adjustment assistance as prescribed in Section 222 of the Act.

I further determine that all workers at the Culpeper, Virginia Sewing Plant, the New Market, Virginia Sewing Plant and the Monterey, Virginia Sewing Plant are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FR Doc. 78-33716 Filed 11-30-78; 8:45 am]

[4510-28-M]

AMERICAN BILTRITE, INC., TRENTON, N.J.

Certification Regarding Eligibility To Apply For Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of the investigation, finds that increases of imports of articles like or directly competitive with women's, misses' and children's sportswear produced at Aileen, Incorporated contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the following facilities of Aileen, Incorporated engaged in employment related to the production of women's, misses' and children's sportswear who became totally or partially separated from other employees producing floor coverings, cork, linoleum and plastic products in the wood flooring industry on behalf of workers and former workers producing floor tile at the Trenton, New Jersey plant of American Biltrite, Inc.

The Notice of Investigation was published in the Federal Register on June 27, 1978 (43 FR 27925). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of American Biltrite, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.
Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of floor tile increased absolutely in value from $86.86 million in 1976 to $94.34 million in 1977, and increased from $4.44 million in the first half of 1977 to $7.01 million in the first half of 1978. The ratio of imports to domestic production increased from 0.95 percent in 1976 to 1.25 percent in 1977, and increased from 1.19 percent in the first half of 1977 to 1.57 percent in the first half of 1978.

Imports of smooth surface tile (which includes ceramic, mosaic and cork) increased in value from $57.82 million in 1976 to $66.65 million in 1977, and increased from $42.35 million in the first half of 1977 to $68.51 million in the first half of 1978.

The Trenton, New Jersey plant of American Biltrite, Inc., ceased production and laid off all but a few workers in February 1978.

American Biltrite began purchasing imported vinyl floor tile from Taiwan and Canada in March 1978. These imports are like the lower-priced vinyl tile formerly produced at the subject plant in Trenton, New Jersey. In addition, the company began importing "luxury" vinyl from the English licensees of American Biltrite in June 1978.

Several major purchasers of vinyl floor tile from American Biltrite who were surveyed purchased imported flooring products. Some of these customers reduced purchases of vinyl floor tile from the company while increasing purchases of imported flooring products in 1977 compared to 1976 and in the first quarter of 1978 as compared to the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with vinyl floor tile produced at the Trenton plant of American Biltrite, Inc., who became totally or partially separated from employment on or after June 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

NOTICES

Signed at Washington, D.C. this 22nd day of November 1978.

AMERICAN GIRL COAT CO., INC., NEW BRUNSWICK, N.J.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3672: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 8, 1978 in response to a worker petition received on April 28, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing ladies' coats and children's coats at American Girl Coat Company, Incorporated, New Brunswick, New Jersey.

The Notice of Investigation was published in the Federal Register on May 26, 1978 (43 FR 22793). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of American Girl, its customers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses', and children's coats and jackets increased from 2252 thousand dozen in 1976 to 2723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 49.3 percent in 1976 to 54.9 percent in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the ladies' coats and children's coats produced at American Girl Coat Company, Incorporated, New Brunswick, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of American Girl Coat Company, Incorporated, New Brunswick, New Jersey who became totally or partially separated from employment on or after April 25, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of November 1978.

HARRY J. GILMAN,
Acting Director, Office of Foreign Economic Research.

ARONICA SPORTSWEAR INC., NEW YORK, N.Y.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3814: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on June 7, 1978 in response to a worker petition received on May 26, 1978 which was filed by the International Garment Workers Union on behalf of workers and former workers of Aronica Sportswear Incorporated, New York, New York, formerly producing ladies' coats, blazers, dresses, and some skirts. The investigation revealed that the plant primarily produced women's skirts.

The Notice of Investigation was published in the Federal Register on June 20, 1978 (43 FR 29499). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Aronica Sportswear Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's misses', and children's coats and jackets increased from 2252 thousand dozen in 1976 to 2723 thousand dozen in 1977. Imports declined from 590 thousand dozen in the first quarter of 1977 to 572 thousand dozen in the first quarter of 1978. The ratio of imports to domestic production increased from 49.3 percent in 1976 to 54.9 percent in 1977.

requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, to the absolute decline in sales or production.

After careful review, I determine that all workers of Aronica Sportswear Incorporated, New York, New York are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' sportswear, jackets and raincoats produced at Bordentown Industries, Incorporated, Bordentown, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Bordentown Industries, Incorporated, Bordentown, New Jersey who become totally or partially separated from employment on or after July 2, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

Harold A. Bratt, Acting Director, Office of Trade Adjustment Assistance.
NOTICES

[4510-28-M]

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on October 30, 1976 in response to a worker petition received on October 27, 1978 which was filed on behalf of workers and former workers producing moldings for small automobiles (upper and lower inside windows) at the Farwell, Michigan plant of Farwell Manufacturing, Incorporated.

Notice of Investigation was published in the FEDERAL REGISTER on November 7, 1978 (43 FR 51866). No public hearing was requested and none was held.

The petitioners requested withdrawal of the petition. On the basis of the withdrawal, continuing the investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 27th day of November 1978.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[FR Doc. 78-33706 Filed 11-30-78; 8:45 am]

FEDERAL REGISTER 43, NO. 232-FRIDAY, DECEMBER 1, 1978
L. N. Gross Company is an apparel manufacturer that designs and supervises the production by contractors of ladies' and men's worker knitted sportswear, such as T-shirts, slacks, jackets, skirts, and dresses. A Departmental survey of the customers of L. N. Gross Company revealed that several increased their purchases of imported ladies' sweaters, blouses and sportswear and decreased purchases from L. N. Gross from 1976 to 1977 and during the first six months of 1978 compared to the first six months of 1977.

L. N. Gross Company increased its company imports of ladies' sweaters and ladies' knitted sportswear on an absolute basis and as a proportion of total sales in the first seven months of 1978 as compared to the same period in 1977. Workers in the New York sales office are not involved in the design and supervision of the imported products.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' sweaters, dresses, skirts, blouses, jackets and slacks sold at the New York, New York sales office of L. N. Gross Company contributed importantly to the decline in sales and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the New York, New York facility of L. N. Gross Company who became totally or partially separated from employment on or after July 24, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 21st day of November 1978.

HARRY J. GILMAN, Acting Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-4028]

MIDWEST FOOTWEAR CO., INC., SULLIVAN, MO.
Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4028: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on August 2, 1978 in response to a worker petition received on July 31, 1978 which was filed on behalf of workers and former workers producing women's dress and casual shoes at Midwest Footwear Company, Incorporated, Sullivan, Missouri.

The Notice of Investigation was published in the FEDERAL REGISTER on August 11, 1978 (43 FR 35759-60). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Midwest Footwear Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of "Women's and Misses' Nonrubber Footwear, Except Athletic" declined from 218.9 million pairs in 1976 to 204.4 million pairs in 1977, and increased from 187.9 million pairs in the first six months of 1977 to 111.4 million pairs in the first six months of 1978. The ratio of imports to domestic production of Women's and Misses' Nonrubber Footwear, Except Athletic increased from 127.8 percent in 1976 to 134.6 percent in 1977, and declined from 137.9 percent in the first six months of 1977 to 135.9 percent in the first six months of 1978.

A customer survey conducted by the Department revealed that customers reduced purchases from Midwest Footwear and increased purchases of imported women's shoes in the first eight months of 1978.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's dress and casual shoes produced at Midwest Footwear Company, Incorporated, Sullivan, Missouri contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Midwest Footwear Company, Sullivan, Missouri who became totally or partially separated from employment on or after July 7, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 22nd day of November 1978.

HARRY J. GILMAN, Acting Director, Office of Foreign Economic Research.

[4510-28-M]

[TA-W-4051]

PHELPS DODGE CORP., SAFFORD, ARIZ.
Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4051: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on August 8, 1978 in response to a worker petition received on August 7, 1978 which was filed on behalf of workers and former workers developing a copper mine at the Safford, Arizona branch of Phelps Dodge Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on August 29, 1978 (43 FR 38634-38635). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Phelps Dodge Corporation, American Metal Market, the American Bureau of Metal Statistics, the U.S. Department of the Interior, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that the workers at Safford are developing a mine for the eventual production of copper. Mine development is integrated into the company's production of copper, as it does, after copper exploration and before copper production.

The mine development program at Safford, Arizona is part of the Western Operations of Phelps Dodge Corporation. Workers at four facilities of the Western Operations have been certified as eligible to apply for trade adjustment assistance: The Morenci, Arizona Branch (TA-W-2421), the New Cornelia Branch, Ajo, Arizona (TA-W-2421), the Douglas Reduction Works, Douglas, Arizona (TA-W-2420) and the Western General Offices, Douglas, Arizona (TA-W-3160). Production of copper at the mining of these certified facilities comprised the pre-
pittance of total copper production by the Western Operations in 1976, 1977 and the first eight months of 1978.

U.S. imports of refined copper increased from 147 thousand short tons in 1975 to 384 thousand short tons in 1976 and to 391 thousand short tons in 1977. Imports increased from 164 thousand short tons in the first six months of 1977 to 327 thousand short tons in the first six months of 1978.

The ratio of imported refined copper to domestic production increased from 8.6 percent in 1975 to 21.0 percent in 1976 and to 22.2 percent in 1977. The ratio increased from 15.0 percent in the first six months of 1977 to 35.9 percent in the first six months of 1978.

The level of imports of copper is affected by the differential between the domestic producers price for copper and the price established by the LME (London Metal Exchange). When the LME price drops more than the estimated transportation cost of 5 cents per pound below the domestic producers price, the demand for imported copper increases. During the last nine months of 1977 and the first six months of 1978, the average LME price had fallen almost 8 cents per pound below the average domestic producers price.

The major factor contributing to depressed prices has been an oversupply of imported and domestic copper, as evidenced by U.S. inventory levels for refined copper. U.S. inventories of refined copper were higher in every month of 1977, except December, when compared to the same month in 1976. Inventories in December 1977 were less than one percent below December 1976 levels. In the first six months of 1978, inventories surpassed levels in the same months of 1977, with the exception of March which was only marginally below the same month in the previous year. The abundant supply of copper stocks in the foreseeable future provides no reason for domestic consumers of copper to maintain ties with domestic producers for purposes of a guarantee against copper shortages. Consequently, in 1977 and in the first half of 1978, when many domestic copper producers curtailed production because of the depressed market price for copper, imports of refined copper increased in 1977 compared to 1976 and doubled in the first half of 1978 compared to the same period in 1977.

Price pressure from imported copper has reduced the ability of domestic producers to profitably mine domestic ore and convert it to copper concentrate and refined copper. Estimated costs of production at Phelps Dodge's major producing facilities are equal to or above the domestic producers' price for copper, causing the company to lose money or at best, break even. The depressed market price for copper caused by increased imports has reduced Phelps Dodge Corporation's profit level. Consequently, the corporation has instituted budget cuts, including cutbacks in the mine development program at Safford.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with refined copper produced by Phelps Dodge Corporation contributed importantly to the decline in sales or production of bobbin blanks and wooden loom part blanks at the Tupper Lake, New York plant and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Phelps Dodge Corporation, Safford Branch, Safford, Arizona who became totally or partially separated from employment on or after July 31, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

JAMES F. TAYLOR, Director, Office of Management, Administration, and Planning.

(FR Doc. 78-33708 Filed 11-30-78; 8:45 am)

[4510-28-M]

ROCKWELL INTERNATIONAL, ROCKWELL-DRAPER DIVISION, TUPPER LAKE, N.Y.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3993: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on July 25, 1978 in response to a worker petition received on July 18, 1978 which was filed on behalf of workers and former workers producing bobbin blanks, loom skids, boxing material, and semi-finished loom parts at the Tupper Lake, New York plant of Rockwell International in the Rockwell-Draper Division. The investigation revealed that labor was a secondary product at the plant.

The Notice of Investigation was published in the Federal Register on August 1, 1978 (43 FR 33840-41). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Rockwell International, the U.S. Department of Commerce, the U.S. International Trade Commission, the American Textile Machinery Association, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 223 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of all power looms increased relative to domestic production from 183.4 percent in 1976 to 206.2 percent in 1977. The ratio of imports to domestic production increased from 168.4 percent in the first half of 1977 to 385.0 percent in the first half of 1978.

Production of bobbin blanks and other wooden loom component blanks at Tupper Lake was part of the integrated production of weaving looms at Rockwell's Hopedale, Massachusetts plant. Retail customers decreased their purchases of weaving looms from Rockwell during the past two years, while increasing their import purchases of that product (TA-W-2197).

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with weaving looms produced by Rockwell contributed importantly to the decline in sales or production of bobbin blanks and wooden loom part blanks at the Tupper Lake, New York plant and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Tupper Lake, New York plant of Rockwell International's Draper Division who became totally or partially separated from employment on or after February 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

JAMES F. TAYLOR, Director, Office of Management, Administration, and Planning.

[4510-28-M]

WARNER GEAR DIVISION OF BORG-WARNER CORP., MUNCIE, IND.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-3244: Investigation regarding certification of eligibility to apply for
worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 23, 1978 in response to a worker petition received on February 10, 1978 which was filed by the United Automobile Workers of America on behalf of workers and former workers producing transmissions at the Muncie, Indiana plant of the Warner Gear Division of Borg-Warner Corporation.

The Notice of Investigation was published in the Federal Register on March 14, 1978 (43 FR 10550). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of the Warner Gear Division, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met.

With respect to workers producing transmissions for light trucks, marine and industrial vehicles, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutey.

Warner Gear produces transmissions on order, therefore sales are equal to production. Sales of transmissions for light trucks, marine and industrial vehicles increased from 1976 to 1977 and increased in the first quarter of 1978 compared to the first quarter of 1977.

With respect to workers producing passenger car manual transmissions, without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the sales, or threat thereof, and to the absolute decline in sales or production.

CONCLUSION

After careful review, I conclude that all workers of the Muncie, Indiana plant of the Warner Gear Division of Borg-Warner Corporation are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of November 1978.

HARRY J. Gilman,
Acting Director, Office of
Foreign Economic Research.

NATIONAL SCIENCE FOUNDATION

AD HOC SUBCOMMITTEE FOR THE REVIEW OF THE CONTROLLED ECOSYSTEM POPULATIONS EXPERIMENT (CEPEX) OF THE ADVISORY COMMITTEE FOR OCEAN SCIENCES

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 82-463, the National Science Foundation announces the following meeting:

NAME: Ad Hoc Subcommittee for the Review of the Controlled Ecosystem Populations Experiment (CEPEX) of the Advisory Committee for Ocean Sciences.

DATE AND TIME: 19 December 1978; 9:00 A.M. to 5:30 P.M.

TYPE OF MEETING: Closed.

CONTACT PERSON:
Dr. Bruce Malfait, Acting Head, International Decade of Ocean Exploration Section, Room 606, National Science Foundation, Washington, D.C. 20550, telephone (202)332-7358.

PURPOSE OF SUBCOMMITTEE: To provide advice and recommendations concerning support for research on CEPEX.

AGENDA: To review and evaluate proposed research for the CEPEX project during 1979 and 1980 as part of the recommendation process for awards.

REASON FOR CLOSING: The review process includes information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b)(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING:
This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. Rebecca Wiener,
Committee Management Coordinator.

[Docket No. 50-261]

SOUTHERN CALIFORNIA EDISON CO. & SAN DIEGO GAS & ELECTRIC CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit No. 1 (SO-1), the facility, located in San Diego County, California. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications to: (1) reduce the maximum allowable rate for pressurizer heatup from 195°F/hour to 100°F/hour, (2) increase the maximum allowable rate for pressurizer cooldown from 100°F/hour to 200°F/hour, and (3) delete the provisions of the Regulatory Protection Program (Section 6.12).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated December 30, 1977 (Proposed Change No. 68), (2) Amendment No. 38 to License No. DPR-13 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 717 H Street, N.W., Washington, D.C. and at the Mission Viejo Branch Library, 24651 Chrisanta Drive, Mission Viejo, California. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 17th day of November, 1978.

THOMAS V. WAMBACH, 
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 15350; SR-DTC-78-5]

THE DEPOSITORY TRUST CO.

Order Approving Proposed Rule Change

November 22, 1978.

On March 24, 1978, and by Amendment No. 1 submitted April 5, 1978, The Depository Trust Company ("DTC"), 55 Water Street, New York, New York 10041, filed with the Commission, pursuant to Section 19b(1) of the Securities Exchange Act of

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
1934, 15 U.S.C. 78(s)(b)(1) (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change which would authorize the European Options Clearing Corporation ("EOCC") to become a pledgee in DTC. The proposed rule change would enable an EOCC clearing member who has sold an option on a United States security on the European Options Exchange to satisfy its margin obligations to EOCC by directing a DTC participant bank (with whom the EOCC clearing member has a correspondent relationship) to effect a book-entry movement of underlying securities from the participant's account to the EOCC pledge account. In addition, an EOCC clearing member could satisfy an exercise notice by directing its DTC participant correspondent bank to move securities by book-entry to the account of another DTC participant bank acting for the exercising EOCC clearing member. EOCC would be able to release securities from their pledgee status by book-entry to DTC.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 34-14656, April 12, 1978) and by publication in the Federal Register (43 FR 16579, April 19, 1978). All written statements with respect to the proposed rule change which were filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person were considered and with the exception of those statements or communications which may be withheld from the public in accordance with the provisions of 5 U.S.C. §552) were made available to the public at the Commission's Public Reference Room.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies and in particular, the requirements of Section 17A and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-DTC-78-5 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis, Assistant Secretary.

SMALL BUSINESS ADMINISTRATION
(License No. 03/04-0081)

CAPITAL INVESTMENT CO. OF WASHINGTON

Approval of Application for Transfer of Control of Licensed Small Business Investment Company

On September 29, 1978, a notice was published in the Federal Register that an application had been filed with the Small Business Administration pursuant to (13 CFR 107.701(1978)) for transfer of control of the Capital Investment Company of Washington (CICW), a District of Columbia corporation, and a Federal Licensee under the Small Business Investment Act of 1958, as amended, with its office to be located at 1010 Wisconsin Avenue, NW, Washington, D.C. 20007, to Iona Corporation, a Delaware corporation.

Interested parties were given until the close of business on October 5, 1978, to submit written comments on the application to the SBA and no written comments were received.

SBA has been informed that the conditions imposed by the SBA relative to the proposed transfer of control (which were set forth in the notice published in the Federal Register on September 29, 1978, mentioned above) have been met. Accordingly, notice is hereby given that having considered the application and all pertinent information, the SBA approves the transfer of control of CICW effective November 15, 1978.

(Application No. 06/05-5207)

CAPITAL-MANAGEMENT SERVICES, INC.

Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 et seq.) has been filed by Capital-Management Services, Inc. (applicant) with the Small Business Administration pursuant to 13 CFR 107.102 (1978).

The officers and directors are as follows:

Louise Lingo, 1919 Broken Bow, No. Little Rock, Arkansas 72116, President and Director.

Maheen Kapadia, 813 Koehler, Sherwood, Arkansas 72216, Vice President and Director.

George S. Ivory, Jr., 17 Lakeside Drive, Little Rock, Arkansas 72204, Secretary and Director.

C. W. Tracey, Rt. 1, Box 648, Benton, Arkansas 72015, Treasurer and Director.

David L. Hale, 2823 North Pierce, Little Rock, Arkansas 72207, General Manager and Director.

Robert Byrns, P. O. Box 608, Cabot, Arkansas 72023, Director.

C. C. Jones, 1715 W. 35th Street, North Little Rock, Arkansas 72116, Director.

The applicant will maintain its principal place of business at 4801 North Hills Boulevard, North Little Rock, Arkansas 72116. It will begin operations with $152,500 of private capital derived from the sale of 305 shares of stock to the officers and directors listed above.

The applicant will conduct its operations principally in the State of Arkansas.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA rules and regulations.

Notice is hereby given that any person may, not later than December 18, 1978, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW, Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in North Little Rock, Arkansas.

[Application No. 05/05-5134]

CONTROL DATA COMMUNITY VENTURES FUND, INC.

Application for a License To Operate as a
Small Business Investment Company

An application for a license to operate as a small business investment company under Section 301(d) of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. 691 et. seq.), has been filed by Control Data Community Ventures Fund, Inc. (applicant) with the Small Business Administration (SBA) pursuant to 15 CFR 107.102 (1978).

The officers, directors, and stockholders are as follows:

Philip J. Bifulk, 2108 Timmy Street, St. Paul, Minnesota 55120, President and Director.
Eugene L. Baker, 5409 Malibu Drive, Edina, Minnesota 55436, Vice President and Director.
Edward A. Strickland, 5935 Christmas Lake Road, Excelsior, Minnesota 55331, Secretary, Treasurer, and Director.
David M. Moer, 1200 Wine Spring Land, Baltimore, Maryland 21204, Director.
George F. Fray, 105 Belmore Road, Louisville, Maryland 21093, Director.
Commercial Credit Company, 100% Stockholder.

The applicant, a Delaware corporation, will maintain an office at 8100 34th Avenue South, Bloomington, Minnesota 55420, and will begin operations with $502,500 of paid-in capital and paid-in surplus derived from the sale of 10,000 shares of common stock to the Commercial Credit Company.

The applicant will operate within the investment policies § 107.101(c) of the regulations. The applicant anticipates being both equity and loan oriented in its investment decisions and policy. Applicant will establish a broad, flexible financing policy intended to meet the various and diverse requirements of prospective applicants across the full range of such small business concerns.

Applicant anticipates achieving a major portion of its return through growth in its equity investments, and to the extent practicable will emphasize equity investments in qualifying small business concerns with attractive growth potentials.

Applicant intends to offer management consulting services to its clients and other small business concerns. Consulting services will be performed by applicant's officers, directors, and employees, and will include general business and accounting systems analysis. The consulting services will be offered independently of applicant's financing program.

Commercial Credit Company, applicant's parent corporation, is also the parent corporation, of Control Data Capital Corporation, another licensee.

The applicant has no present plans of operations which relate to applicant's affiliated companies. Applicant does not anticipate participation financings by applicant and affiliated companies, and does not anticipate management services provided by applicant's affiliated companies in conjunction with financing by applicant. However, it is possible that small concerns financed by applicant may be associated with one or more of applicant's affiliated companies as suppliers or customers or otherwise. In any such event, should it occur, applicant's financing would be independent of any such association.

Some of applicant's affiliated companies provide consulting services to businesses. It is possible that customers of such affiliated companies may also receive financial assistance from applicant. In any such event, applicant's financing would be independent of any consulting services provided, and to the extent such consulting services were deemed by the SBA to be "management services" under § 107.601 of the applicable SBA Regulations, compliance with such regulations would be provided.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management and the probability of successful operations of the applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and SBA Rules and Regulations.

Any person may, not later than December 18, 1978, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, 1441 L Street, NW, Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Bloomington, Minnesota.

LICENSE No. 05/05-0130
FEDERATED CAPITAL CORP.

Issuance of a Small Business Investment Company License

On July 28, 1978, a notice was published in the FEDERAL REGISTER (43 FR 32908) stating that an application had been filed by Federated Capital Corporation, 20000 West Twelve Mile Road, Southfield, Michigan 48076, with the Small Business Administration (SBA), pursuant to §107.102 of the regulations governing small business investment companies (13 CFR 107.102 (1978)) for a license as a small business investment company.

Interested parties were given until close of business August 21, 1978, to submit their comments to SBA. No comments were received.

Notice is hereby given, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information, SBA issued License No. 05/05-0130 on September 12, 1978, to F.

R. Peterson Venture Capital Corporation to operate as a small business investment company.

LICENSE No. 06/06-0205
RICE COUNTRY CAPITAL, INC.

Filing of Application for Approval of a Conflict of Interest Transaction Between Associates

Notice is hereby given, pursuant to Section 107.1004(c) of the Regulations governing small business investment companies (13 CFR 107.1004 (1978)), of a request for approval of a conflict of interest transaction between Rice Country Capital, Inc. (Licensee), P.O. Box 215, Eagle Lake, Texas 77434, and an Associate.

Licensee was licensed by SBA on November 1, 1978. It has two classes of stock authorized: (1) Class A Voting common which is owned 100 percent by The First National Bank (the Bank), 100 Commerce, Eagle Lake, Texas 77434; and (2) Class B Non-Voting common of which the Bank owns approximately 20 percent. None of the other Class B shareholders owns as much as 10 percent.

It is proposed that Licensee provide financial assistance to Mr. Steve K. Balas to purchase a tractor. Mr. Balas is the son-in-law of Mr. J. R. Thomas, a director and Class B shareholder of the Licensee. As such, Mr. Balas is considered to be an Associate of the Licensee as defined by §107.3(c) of SBA’s rules and regulations.

The proposed financing falls within the purview of §107.1004(c) of the Regulations and requires a written exemption from SBA. SBA is considering a request for such exemption.

Notice is further given that any person may, not later than December 18, 1978, submit to SBA in writing, comments on the proposed transaction. Any such communication should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Eagle Lake, Texas.

LICENSE No. 06/06-0178
TAX INVESTMENTS CONCEPTS, INC.

Notice is hereby given, pursuant to Section 107.1004(e) of the Regulations governing small business investment companies (13 CFR 107.1004 (1978)), of a request for approval of a conflict of interest transaction between Tax Investments Concepts, Inc. (Licensee), 2200 Classen Boulevard, Oklahoma City, Oklahoma 73106, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act) (15 U.S.C. et seq.), and an Associate.

Licensee was licensed on September 10, 1975. It is owned by approximately 12 shareholders, with William Daniel, Sr., president of Licensee, owning 100 percent of the Class A Voting Stock. Mr. Daniel also owns approximately 51 percent of Jones, Penn & Company, which provides bookkeeping services to the portfolio concerns of Licensee. Pursuant to the provisions of §107.3(c) of the Regulations, this bookkeeping concern is deemed to be an Associate of Licensee.

It is proposed that Licensee provide financial assistance to Forrest W. Olson, Jr., to form his own accounting firm under the name of Olson & Company. Mr. Olson is the president of Jones, Penn & Company. As such, pursuant to the provisions of §107.3(c) of the Regulations, Mr. Olson is also deemed to be an Associate of Licensee.

Therefore, the proposed financing falls within the purview of §107.1004(b)(1) of the Regulations and

FEDERAL REGISTER, VOL. 43, NO. 222—FRIDAY, DECEMBER 1, 1978
NOTICES

requires a written exemption from SBA. SBA is considering a request for exemption.

Notice is further given that any person may, not later than December 18, 1978, submit to SBA in writing, comments on the proposed transaction. Any such communication should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the regulations governing small business investment companies (15 U.S.C. seq.) by West Coast Venture Capital, a limited partnership, 20700 Valley Green Drive, Cupertino, California 95014, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (Act) (15 U.S.C. et seq).

The PROPOSED GENERAL PARTNER and LIMITED PARTNER OWNING 10 OR MORE PERCENT OF THE PARTNERSHIP CAPITAL

GENERAL PARTNER
West Coast Venture Capital, Inc., 20700 Valley Green Drive, Cupertino, California 95014.
Gary W. Kalbach, President and General Manager, 11701 Putter Way, Los Altos, California 94022 (100 percent).
Carl Berg, Secretary and Director, 37 Barry Lane, Atherton, California 94025.
Ralph Rodriguez, Vice President and Director, 14578 Carmelitan Glen Court, Saratoga, California 95050.
Roger L. Mosher, Assistant Secretary and Director, 6 Bergesen Court, Atherton, California 94022.

LIMITED PARTNERS
Carl Berg, 37 Barry Lane, Atherton, California 94025 (33.8 percent).
Ralph Rodriguez, 14578 Carmelitan Glen Court, Saratoga, California 95050 (11.8 percent).
John A. Sobrato, 94 Isabelita Avenue, Atherton, California 94025 (11.8 percent).

The Applicant will begin operations with an initial private capital of $850,000. The Limited Partners will make a subsequent contribution of $425,000, on or before two years from date of approval of the application. The Applicant will establish a broad financing policy in order to meet the diverse requirements of small business concerns in need of financing. The Applicant recognizes the need for both equity investments and loans, but will emphasize equity investments, with particular interest toward start-up situations. In addition to investments, the Applicant intends to render management services to clients, if necessary.

Matters involved in SBA's consideration of the application include: (1) the general business reputation and character of the proposed owners and management, (2) the reasonable prospects for successful operation of the new SBIC under such management (including adequate profitability and financial soundness, in accordance with the Act and regulations), and (3) whether the proposed licensing would be in the furtherance of the purpose of the Act.

Notice is hereby given that any person may not later than December 18, 1978 submit written comments to the Deputy Associate Administrator, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Cupertino, California.

CALIFORNIA COASTAL EQUITIES, INC.
Application for License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. et seq.), has been filed by California Coastal Equities, Inc. (applicant), with the Small Business Administration (SBA), pursuant to 13 CFR 107.102(1978).

The officers, directors and stockholders of the applicant are as follows:

Kewmara Tabatabay, President, Director, 420 Fuso Del Mar, Pala Verde Estates, California 90274.
Harold V. Sullivan II, Secretary, Treasurer, Director, 1704 Dalton Road, Palos Verdes Estates, California 90274.
K.A.R. Investments, 100 percent Stockholder, 2780 Lomita Boulevard, Torrance, California 90610.
Mr. Tabatabay owns 66% percent of K.A.R. Investments and Mr. Sullivan owns the remaining 33 1/3 percent.

The applicant, a California Corporation, with its principal place of business at 2780 Lomita Boulevard, Torrance, California 90610, will begin operations with $500,000 of paid-in capital and paid-in surplus derived from the sale of 500,000 shares of common stock.

The applicant will conduct its activities principally in the State of California, and in other areas within the United States of America.

Applicant intends to provide assistance to all qualified socially or economically disadvantaged small business concerns as the opportunity to profitably assist such concerns is presented.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and SBA Rules and Regulations.

Any person may, if not later than January 18, 1979, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Torrance, California.

Notice is hereby given that a meeting will be held jointly in Room 4426 of the Main Treasury Building and Room 3313 of the Internal Revenue Service Building. The Committee as a whole will reconvene in room 4121 of the Main Treasury Building on Wednesday, December 13 at 9:30 A.M. and will meet until approximately 12:30 P.M.

The Committee was formed to provide a means of communication between the small business community and Treasury officials on numerous economic issues, including capital formation, tax policy, tax administration, and governmental regulations. The Capital Formation Subcommittee will address issues relating to general problems encountered by small businesses in seeking equity capital, specific institutional investor problems in investing in small businesses, and proposed ERISA changes to encourage pension funds to invest in small businesses; the Tax Policy Subcommittee will focus on topics including accumulated earnings tax, carryover basis and additional death tax, simplified LIFO, and estimated tax; and the Tax Administration Subcommittee agenda will include an update on IRS small business workshops, appeal procedures, and the negotiation of withholding of the Revenue Act of 1978 and their impact on small businesses. The Tax Policy Subcommittee and Tax Administration Subcommittee will jointly consider certain recommendations on ERISA.

The meeting will be open to the public. A limited number of seats will be available on a first-come, first-serve basis. In order to facilitate attendance, persons interested in attending are asked to call 586-3887 so that confirmation of space and access procedures can be provided.

Interested persons may file a written statement with the Committee before, during or after the meeting. The Chairman will, as time permits, enter oral comments from members of the public. The meeting will be open to the public. A limited number of seats will be available on a first-come, first-serve basis. In order to facilitate attendance, persons interested in attending are asked to call 586-3887 so that confirmation of space and access procedures can be provided.

DEPARTMENT OF THE TREASURY
Internal Revenue Service

DEPARTMENT OF LABOR
Pension and Welfare Benefit Programs

Employee Benefit Plans

Exemption From the Prohibitions Respecting a Transaction Involving the Allen and O'Hara Employees' Profit-Sharing Trust

AGENCIES: Department of the Treasury/Internal Revenue Service; Department of Labor.

ACTION: Grant of individual exemption.

SUMMARY: This exemption enables Allen and O'Hara, Inc. (the Employer) to purchase an office building owned by North Little Rock Professional Building, Inc. (the Corporation), a corporation which is wholly-owned by the Allen and O'Hara Employees' Profit Sharing Trust (the Trust).

FOR FURTHER INFORMATION CONTACT:

Timothy Smith, Prohibited Transactions and Projects Section Employee Plans Technical Branch, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attn: EERPT1, 202-566-6761. (This is not a toll free number.)

SUPPLEMENTARY INFORMATION:

On October 5, 1978, notice was published in the Federal Register (43 FR 45664) of the pendency before the Internal Revenue Service and the Department of Labor (the Agencies) of an exemption from the taxes imposed by section 4975 (a) (1) and (c) of the Internal Revenue Code of 1954 (the Code) by reason of section 4975(c)(1)(A) through (E) of the Code and from the provisions of section 406(a), 406(b)(1), and 406(b)(2) of the Employee Retirement Income Security Act of 1974 (the Act) for a transaction described in the application submitted by the Employer. The notice set forth a summary of facts and representations contained in the application for exemption and referred interested persons to the application for a complete statement of the facts and representations. The application has been available for public inspection at the Agencies in Washington, D.C. The notice also invited interested persons to submit comments on the requested exemption to the Internal Revenue Service (the Service). In addition, the notice stated that any interested person might submit a written request that a hearing be held relating to this exemption. No public comments and
no requests for a hearing were received by the Service.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

1. The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code and section 406(a) of the Act does not relieve a fiduciary or party in interest or disqualified person with respect to a plan to which the exemption is applicable from certain other provisions of the Code and the Act. These provisions include any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with subsection (a)(1)(F) of the Act, nor does the fact that the transaction is the subject of an exemption affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

2. This exemption does not extend to transactions prohibited under section 4975(c)(1)(F) of the Code and section 406(b)(3) of the Act.

3. This exemption is supplemental to, and not in derogation of, any other provisions of the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is, in fact, a prohibited transaction.

4. This document does not meet the criteria for significant regulations set forth in paragraph 6 of the proposed Treasury directive appearing in a Federal Register for Wednesday, May 24, 1978, (43 FR 22319).

EXEMPTION

In accordance with section 4975(c)(2) of the Code and section 406(a) of the Act and the procedures set forth in Rev. Proc. 76-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Agencies make the following determinations:

(a) The exemption is administratively feasible;

(b) It is in the interests of the plan and of the participants and beneficiaries; and

(c) It is protective of the rights of the participants and beneficiaries of the plan.

Accordingly, the following exemption is hereby granted under the authority of section 4975(c)(2) of the Code and section 406(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-28 and ERISA Procedure 75-1.

The taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1)(A) through (E) of the Code and the restrictions of section 406(a) and section 406(b)(1) and 406(b)(2) of the Act shall not apply to the transaction involving the sale of the North Little Rock Professional Building from the Corporation to the Employer for $375,000, in cash, provided that the sale price is not less than the fair market value of the property.

The availability of this exemption is subject to the express conditions that the material facts and representations contained in the application are true and complete and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 22nd day of November, 1978.

FRED J. OCHS,
Director, Employee Plans Division, Internal Revenue Service.

IAN D. LANGOF, Administrator, Pension and Welfare Benefit-Programs, Labor Management Services Administration, U.S. Department of Labor.

MAJEFFIC PAINT CENTERS, INC. EMPLOYEES' RETIREMENT TRUST AND THE YENKIN MAJESTIC EMPLOYEES' RETIREMENT PLAN

Proposal to Grant an Exemption for Transactions

AGENCIES: Department of the Treasury/Internal Revenue Service; Department of Labor.

ACTION: Proposal for an exemption.

SUMMARY: This notice contains a proposal for an exemption from certain prohibited transactions provisions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). This exemption, if granted, would permit the Yenkin Majestic Employees' Retirement Plan and the Majestic Paint Centers, Inc. Employees' Retirement Trust (the Plans) to make a loan to the Yenkin Majestic Paint Corporation and the Majestic Paint Centers, Inc. (Yenkin/Majestic).

DATES: Written comments and requests for a public hearing (probably six copies) should be addressed to the Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C., on or before January 2, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles Scala of the Prohibited Transactions Staff of the Employee Plans Division, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: EEP:PT:2) (202-656-3045). This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Yenkin/Majestic and the Plans have requested an exemption from the restrictions of sections 406(a) and 406(b) (1) and (2) of the Act and from the taxes imposed by section 4975(a) and (b) of the Code. These applications were filed pursuant to section 4202 of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-28, 1975-1 C.B. 722.

SUMMARY OF REPRESENTATIONS

The applications contain representations with regard to the pending exemption which are summarized below. Interested persons are referred to the applications and supporting documents on file with the Service and the Department of Labor (the Department) for a complete statement of the representations of the Applicants.

1. Yenkin/Majestic are Ohio corporations engaged in the manufacture of paints and paint by-products. Yenkin/Majestic maintain the Plans which have approximately 89 participants. Among the trustees of the Plans are Merom Brachman and Bernard K. Yenkin who are officers and shareholders of Yenkin/Majestic.

2. Yenkin/Majestic and the Plans have requested an exemption for certain equipment loan transactions in the amount of $160,000 between the Plans and Yenkin/Majestic (the trucking loans) and also for an additional $60,000 loan for the purchase of latex emulsion equipment.

3. Prior to July 1, 1974, it had been an established practice for the Plans to enter into equipment loan agreements with Yenkin/Majestic.
4. The collateral securing these loans generally consisted of the following: Chattel mortgages or equivalent security interest in trucking equipment including tractors, trailers, and tank wagons.

5. As a result of these transactions the Plans have never experienced any defaults or losses.

6. The loans generally have provided greater returns to the Plans than the return that has been available from alternative investment opportunities.

7. The proposed loans will bear an interest rate of not less than one-half percent above interest rates charged by area banks for transactions involving loans on similar equipment. These loans will be for a term of thirty-six (36) months vs. forty-eight (48) months allowed by area banks.

8. Each loan will be represented by a cognizant promissory note and will be secured by the equipment financed. The trucking loans will be secured by the following types of equipment: Diesel-powered over-the-road three-axle tractors such as used by the national commercial cross-country trucking lines, with such tractor/trailer units capable of pulling loaded trailer or tank wagons of a total weight range of eighty thousand pounds; b) Liquid transport two-axle stainless steel tank-wagons for all-weather interstate movement of perishables. Security agreements which will provide for payment to the Plans in the event the loan is repaid. The insurance policy which will provide for payment to the Plans in the event the loan is more than 30 days in arrears or Yenkin/Majestic fails to comply with any terms or conditions of the loan.

9. The Plans contained total assets of $1,080,000.00 as of March 1977. The amounts of the loans will represent less than 21 percent of each of the Plans' total assets.

10. As noted above, the applications represent that the proposed loans will provide higher yields and greater security than is otherwise available to the Plans through alternative investments.

NOTIFICATION OF INTERESTED PERSONS

Upon publication by the Internal Revenue Service of the proposal for an exemption sought herein, notice of the pending exemption will be disseminated to all active and retired participants and their beneficiaries within ten (10) days of the publication of it in the Federal Register.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or any disinterested person with respect to any plan to which the exemption is applicable from certain other provisions of the Act and the Code to which the exemption does not apply, including any prohibited transaction provisions to which the exemption does not apply, and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interests of participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption contained herein does not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department and the Service must find that the exemption is administratively feasible, in the interest of the Plans and its participants and beneficiaries, and protective of the rights of the participants and beneficiaries of the Plans;

(4) The pending exemption, if granted, is supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is the subject of an exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(5) This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury directive appearing in the Federal Register for Wednesday, May 24, 1978 (43 FR 22318).

WRITTEN COMMENTS AND HEARING REQUEST

Pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, the Department and the Service are required to offer an opportunity for a public hearing where a pending exemption relates to section 406(b) of the Act and section 4975(c)(1)(E) or (F) of the Code. Any interested person may submit a written request that a hearing be held relating to the pending exemption. Such written request must be received by the Service on or before January 2, 1979 and should state the reasons for such person's request for a hearing and the nature of such person's interest in the pending exemption.

All interested persons are also invited to submit written comments on the pending exemption contained herein. In order to receive consideration such comments must be received by the Service on or before January 2, 1979.
NOTES

FEDERAL REGISTER, VOL 43, NO. 232—FRIDAY, DECEMBER 1, 1978

[4510-29-M]

SMITH BARNEY REAL ESTATE FUND

Proposed Exemption for Certain Transactions

AGENCIES: Department of the Treasury/Internal Revenue Service Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of pendency before the Department of Labor and the Internal Revenue Service (the Agencies) of a proposed exemption from the prohibited transaction restrictions imposed by the Employee Retirement Income Security Act of 1974 (the Act) and from certain excise taxes imposed by the Internal Revenue Code of 1954 (the Code).

The proposed exemption would exempt loan to the Smith Barney Real Estate Fund (the Fund) from lenders who are fiduciaries or other service providers with respect to the qualified plans participating in the Fund.

The proposed exemption, if granted, would affect the Fund, participants and beneficiaries of the individual plans participating in the Fund, and certain other fiduciaries or other service providers with respect to those participating plans.

DATE: Written comments must be received by the Internal Revenue Service by before December 29, 1978.

ADDRESS: All written comments (at least six copies) should be addressed to the Internal Revenue Service, 111 Constitution Avenue, N.W., Washington, D.C. 20234, and at the Public Documents Room of Pension and Welfare Benefit Programs, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

PROPOSED EXEMPTION

Based upon the applications referred to above, the Service and the Department have undertook the consideration of the proposed exemption, under authority of section 4975(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Proceedings 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-1 C.B. 722, whereby the restrictions of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1) of the Code, shall not apply to the equipment loans described above provided that the loan is no less favorable to the Plans than a transaction with an unrelated party.

The pending exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C. this 22nd day of November, 1978.

FRED J. OCHS
Director, Employee Plans Division, Internal Revenue Service.

IAN D. LANOFF
Administrator of Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 78-33494 Filed 11-27-78; 12:13 pm]
assess of the Fund. Participating plans acquire interests in the Fund that may not be assigned, transferred, pledged or otherwise encumbered by the plans. A plan's interest in the Fund may be liquidated if the plan notifies the trustees of the Fund and tenders the interest. In usual circumstances, the Fund invests only in income-producing properties. It is anticipated that the Fund's investments will be primarily in multifamily residential properties, shopping centers, and commercial properties. The Fund intends to diversify its investments geographically and will consider areas throughout the continental United States.

In order to enable the Fund to diversify its investments and to increase its potential return on investments, the Fund is empowered to borrow part or all of the purchase price of acquired property subject to existing mortgages. Loans negotiated by the Fund will be on a competitive basis from as large a number of potential lenders as possible. With respect to assumed loans, the Fund must accept the mortgages as previously established, and may not influence or negotiate the terms of the loans. The Fund may rely on mortgage financing and other loans in connection with its real estate acquisition in order to most effectively serve the interests of the plans. Financing enables the Fund to maintain liquidity and thus remain in a position both to avail itself of new real estate investment opportunities and to facilitate the redemption of interests of participating plans. Financing of acquisitions by the Fund will be used to diversify its investments, to protect against large losses due to adverse conditions in a particular segment of the country or of the economy. The Fund also anticipates the acquisition of assumed loans when the mortgages bear economically favorable rates of interest. In addition, the Fund may wish to purchase attractive properties with reasonable mortgages that do not permit prepayment or that contain prepayment penalty provisions.

The applicant suggested that the condition of the maintenance of a prohibition against self-dealing on the part of the lender, and, even if the Agencies chose to apply an objective percentage test, the focus of the test would be on the aggregate percentage of ownership of all plans trusted by the lender and not on the percentage of ownership of any one plan. The applicant also suggested that in the case of a loan negotiated by the Fund, the exemption contain the condition that the outstanding principal amount of all loans to the Fund from any one lender may not exceed 30% of the outstanding principal amount of all loans to the Fund from all lenders immediately after the loan. The Agencies chose not to incorporate this limitation because of its uncertain benefits and because the interests of the plans and their participants and beneficiaries are adequately protected by the prohibition against a lender's exercise of any influence with respect to any plan assets invested in the Fund.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

1. The proposed exemption is the subject of an exemption under section 4975(c)(2) of the Code and section 408(a) of the Act does not relieve a fiduciary or other disqualified person or party in interest from certain other provisions of the Code and the Act, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with the standard of conduct set forth in section 404(a) of the Code and the Act; nor does it affect the requirements of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

2. The proposed exemption, if granted, will not extend to transactions prohibited under section 4975(c)(1)(E) or (F) of the Code, and section 408(b) of the Act.

3. Before an exemption may be granted under section 4975(c)(2) of the Code and section 408(a) of the Act, the Agencies must find that the exemption is administratively feasible, in the interests of the plans and their participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan.

4. The proposed exemption, if granted, will be supplemental to and not in derogation of, any other provisions of the Code and the Act, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(5) This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury directive appearing in the Federal Register for Wednesday, May 24, 1978 (43 F.R. 22319).

PROPOSED EXEMPTION

Based on the facts and representations set forth in the application, the Agencies are considering granting the requested exemption under the authority of section 4975(c)(2) of the code and section 408(a) of the Act and in accordance with procedures set forth in ERISA Procedure 75-1 and Rev. Proc. 75-20.

SECTION I—Definitions. For purposes of this exemption:

(a) A lender is an insurance company qualified to do business in a State or a bank or similar financial institution supervised by the Federal Reserve System.

(b) An affiliate of a lender is—

(1) Any person directly or indirectly controlling, controlled by or under common control with the lender ("control") means the power to exercise a controlling influence over the management or policies of a person other than an individual;

(2) Any officer, director, partner or employee of the lender or any relative of such persons (the term "relative" means a relative of the lender or any relative of such persons) means a relative of such persons (the term "relative" means a relative of the lender or any relative of such persons); or

(3) Any corporation or partnership of which any person described in subparagraph (b)(1) is an officer, director, or partner unless that person described in that paragraph exercises no control to cause a plan maintained by the corporation or partnership to participate in the Fund.

SECTION II—Effective upon granting this exemption, the taxes imposed by section 4975(a) and (g) of the Code by reason of section 4975(c)(1)(A), (B), (C), and (D) of the Code and the restrictions of section 406(a) of the Act shall not apply to loans to the Fund from lenders who are disqualified persons or parties in interest solely because of their position as a fiduciary or other service provider to qualified plans participating in the Fund, or because of a relationship to the fiduciary or other service provider de-

ART ADVISORY PANEL OF THE COMMISSIONER OF INTERNAL REVENUE

Availability of Report on Closed Meeting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of Availability of Report on Closed Meetings of the Art Advisory Panel.

SUMMARY: The Report is now available.

A copy of this report has been filed with the Assistant Secretary of Treasury for Administration and is now available for public inspection at: Internal Revenue Service, Freedom of Information Reading Room, Room 1565, 1111 Constitution Avenue, NW., Washington, D.C. 20224.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury Directive appearing in the Federal Register for Wednesday, May 24, 1978 (43 FR 22319).

FOR FURTHER INFORMATION CONTACT:

Thomas Hartnett, T.C.E.A, 1111 Constitution Avenue, NW., Room 5240, Washington, D.C. 20224, telephone 202-666-4068 (not a toll-free telephone number).

WILLIAM E. WILLIAMS, Acting Commissioner.

For further information, written comments should be mailed or delivered to Chief, Wage and Salary Branch (T1:WEA), Internal Revenue Service, room 5203, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Baer, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, telephone 202-666-4068 (not a toll-free telephone number).

SUPPLEMENTARY INFORMATION:

Effective January 1, 1979, under Pub. L. 95-458, the established retail price and the cost floor limitation currently used for retail sales of trucks, tractors, trailers and semi-trailers will no longer be factors in arriving at the tax base. Instead the constructive sale price for excise tax purposes will be a percentage of the actual sales price. In general, the percentage will be based on the highest price manufacturers and producers ordinarily sell such items at wholesale.

Separate sales of automotive parts or accessories are not affected by this provision.

Because of the change in the law, the Internal Revenue Service would appreciate information concerning the proper percentage to be established for segments of the motor vehicle industry. In particular, information is wanted comparing prices at which trucks and tractors are sold at retail with the prices of such vehicles sold at other than retail.

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the proposed Treasury Directive appearing in the Federal Register for Wednesday, May 24, 1978.

JOHN L. WITHERS, Assistant Commissioner, Technical.

For further information, written comments should be mailed or delivered to Chief, Wage, Excise, and Administrative Provisions Branch (T1:WEA), Internal Revenue Service, room 5203, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

INTERSTATE COMMERCE COMMISSION
FOURTH SECTION APPLICATIONS FOR RELIEF

This application for long-and-short haul relief has been filed with the ICC.

Protests are due at the ICC on or before December 18, 1978. FSA No. 43633. Trans-Continental Freight Bureau, Agent's No. 529, requests authority for reduced rates on wheat from Colorado, Kansas, Nebraska and Wyoming points on the Union Pacific to Pacific Coast Ports for export. The rates are in Supp. 60 to its Tariff 29-P, ICC 1958, to become effective December 16, 1978. Grounds for relief—Motor/Rail and market competition.

By the Commission
H. G. Homme, Jr., Secretary.

Assignment of Hearings

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

No. MC 35582 (Sub-No. 397F), Interstate Motor Freight System, now assigned January 9, 1979, at Birmingham, Alabama, has been cancelled and transferred to Modified Procedures.

No. MC 116110 (Sub-No. 10), P.C. White Truck Line, Inc., now being assigned for continued hearing on November 27, 1978, (1 week), at Birmingham, Alabama, at Kahler Plaza Hotel, 600 20th Street South.

No. MC 99610 (Sub-No. 27), Resc Nelly Express, Inc., now being assigned for continued hearing on December 7, 1978, (2 days), at Birmingham, Alabama, Room 430, Federal Building, 1800 8th Avenue North.

No. MC 77973 (Sub-No. 30), Merchants Truck Line, Inc, No. MC 97310 (Sub-No. 25), Sharron Motor Lines, Inc., No. MC 99610 (Sub-No. 27), Resc Nelly Express, Inc., No. MC 116110 (Sub-No. 10), P.C. White Truck Line, Inc., now being assigned for continued hearing on February 5, 1979, (1 week), at Atlanta, Georgia at Room 305, 1252 West Peachtree Street N.W.

No. MC 109173 (Sub-No. 4F), Delta Bus Company, now assigned for hearing on January 18, 1979, at Farmington, Michigan is cancelled and application dismissed.

H. G. Homme, Jr., Secretary.

FEDERAL REGISTER, VOL 43, NO. 232—FRIDAY, DECEMBER 1, 1978

[Notice No. 227]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of the application may be filed with the field official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protest must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the “MC” docket and “Sub” number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the protest. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.
Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate a common carrier over irregular routes except as otherwise noted.

**Motor Carriers of Property**

**MC 1977 (Sub-30TA), filed October 26, 1978.** Applicant: BIGGE MOTOR TRANSPORT SERVICE, INC., 5231 Monroe Street, Denver, CO 80216. Representative: Leslie R. By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-34688 Filed 11-30-78; 8:45 am]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

The following are notices of filing of applications for temporary authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1153. These rules provide that an original and six (6) copies of protests to an application may be filed with the file official named in the Federal Register publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the Federal Register. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" designation, and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

MOTOR CARRIERS OF PROPERTY

[Notice No. 136]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include a motor carrier, water carrier, broker, and freight forwarder, and their pertinent applications, filed, under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act:

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before January 2, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served on all applicants that there is reason to believe that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the scope of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

MC-FC-77861, filed September 22, 1978. Transferee: Gordon McFadden Limited, Muktuk, Ontario, Canada N18 1P6. Transferee: McFadden Trucking Limited, Box 56, Rodney, Ontario, Canada N0L 2 CO. Representative: John W. Estor, 100 West Long Lake Road, Suite 102, Bloomfield Hills, MI 48014. Authority sought for purchase by transferee of the operating rights set forth in Certificate No. MC-142116 issued April 10, 1978: Fertilizer and fertilizer ingredients (except anhydrous ammonia), in bulk (except in tank vehicles) and bags, between the ports of entry on the United States-Canada boundary line located on the St. Clair and Detroit Rivers, on the one hand, and, on the other points, in Indiana, Michigan, and Ohio. Transferee holds no Commission authority and does not seek Section 210(a) temporary authority.

MC-FC-77886, filed October 6, 1978. Transferee: Norma Bjornson, Bjornson Truck Service, R.F.D. No. 2, Ellsworth, WI 54011. Transferor: Arthur B. Bjornson, Bjornson Truck Service, R.F.D. No. 2, Ellsworth, WI 54011. Representative: John G. Nestingen, Attorney at Law, Baldwin, WI 54002. By order of November 1978, the Motor Carrier Board approved the transfer to transferee of the operating rights in Certificate No. MC-5019, issued July 18, 1978, to transferor authorizing the transportation of malt beverages, over regular routes, from Duluth, MN to Ellsworth, WI, serving no intermediate points, and empty containers on return; agricultural commodities and feed, between points in the villages of Elmwood, Springfield, and Ellsworth, WI, on the one hand, and, on the other, Minnepolis, St. Paul, South St. Paul, and Red Wing, MN; livestock, agricultural commodities, farm machinery, lumber, logs, firewood, feed, seed, and groceries, between points in the town of El Paso, Gilman, Rock Elm, and Spring Valley, Pierce County, WI, not including the villages specified above, on the one hand, and, on the other, Minneapolis, St. Paul, and Red Wing, MN; and livestock, from South St. Paul, MN to Whitehall, WI. Petitions for reconsideration may be filed by any interested person within 20 days. SEND PETITIONS FOR RECONSIDERATION TO: The Secretary, Interstate Commerce Commission, Washington, DC 20423.
NOTICES

sentative: G. Timothy Armstrong, Esquire, 6161 North May Avenue, Oklahoma City, OK 73112. Authority sought for purchase by transferee of that portion of the Oklahoma-Kansas State Line, serving the intermediate points of Ponca City, Newkirk, Pawhuska, and Burbank, OK. Transferee presently holds no authority from this Commission. Application for temporary authority under Section 210a(b) has not been filed.

MC-FC-77915, filed October 27, 1978. Transferee: PAUL F. MANNING, d/b/a M. J. Manning, 189 Spring Street, Springfield, MA, 01101. Transferor: Paul F. Manning and Katherine V. Manning (James C. Kronholm-Executor), a partnership; d/b/a M. J. Manning, same address as transferee. Representative: David M. Marshall, Esq., Marshall and Marshall, 101 State Street, Suite 304, Springfield, MA, 01101. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-68455 issued February 24, 1941, as follows: general commodity with certain exceptions, between Springfield, MA, on the one hand, and, on the other, points in Massachusetts within 15 miles of Springfield; Electrical supplies between Springfield MA, and points within ten miles of Springfield, on the one hand, and, on the other, points in Hartford and Tolland Counties, CT. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

MC-FC-77917, filed October 31, 1978. Transferee: BROWN’S DAY & NIGHT WRECKER SERVICE, INCORPORATED, 2817 N.W. 38th, Oklahoma City, OK 73112. Transferor: Jackie R. Smithson, Sr., Dba Jack’s Wrecker Service, 509 South Broadway, Oklahoma City, OK 73108. Representative: William P. Parker, Esq., 280 National Foundation Life Bldg., 3355 N.W. 38th Street, Oklahoma City, OK 73106. Authority sought for purchase by transferee of the operating rights of transferor set forth in Certificate No. MC-134390 Sub 1, issued September 13, 1978, as follows: Wrecked or disabled motor vehicles (except trailers designed to be drawn by passenger automobiles) from points AR, CO, KS, LA, MO, NE, NM, and TX. Transferee presently holds no authority from this Commission. Application for temporary authority under Section 210a(b) has not been filed.

MC-FC-77927 filed November 6, 1978. Transferee: TROWMAR TRANSPORT, INC., 14 Beech Street, Cortland, NY 13045. Transferor: Ashline Trucking, Inc., same address as transferee. Transferee’s Representative: Bertrand F. Gould, 6 Elek Street, Albany, NY 12207. Transferor’s Representative: W. Norman Charles, P.O. Box 724, Glenn Falls, NY 12801. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate Nos. MC-119407 and MC-119407 (Sub-No. 6), issued May 13, 1960, and April 15, 1974, respectively, as follows: lumber, from Poland, NY, and points in Essex, Hamilton, and Warren Counties, NY, to points in CT, MA, NH, NJ, NY, PA, and VT and from South Colton, NY, and points in Fulton and Saratoga Counties, NY, to points in CT, MA, NH, NJ, NY, PA, and VT. Transferee holds no authority from this Commission but is affiliated with W. M. Girvan, Inc., an authorized motor contract carrier holding authority under Permit No. MC-14107. Application has been filed for temporary authority under Section 210a(b).

[No. 368071]

DENVER & RIO GRANDE WESTERN RAILROAD CO.

Abandonment Between Farmington, NM, and Alamosa and Antonito, Colo.

Decided November 17, 1978.

In a petition filed December 27, 1977, the Denver and Rio Grande Western Railroad Company (D&RGW) requested permission to cancel certain rates on gypsum wallboard, plaster, and related products published as items 520-Series and 650-Series in D&RGW Freight Tariff 7286-G, I.C.C. 1221. These rates affect shipments from Sigurd, UT, and Waba, Co., to Chama, Reserve, Monro, Amargo, Lumberton, Dulce, Navajo, Cedar Hill, Inca, Astec, Flora Vista and Farmington, NM, and Juanita, Gato, Arboles, Ignacia, Oxford, Floral, Falsa, Durango, Posta and Bondad, CO. All of the above are points served by Rio Grande Motor Way, Incorporated, which is a wholly owned subsidiary of D&RGW. The petition was originally filed under Finance Docket No. 24745, which the Commission permitted D&RGW to abandon its rail service between Alamosa and Farmington. This petition was separated and renumbered.

D&RGW alleges that since January 1, 1978, it has not moved any shipments of gypsum wallboard and related articles between the aforementioned points. It requests that the rates for the movement of these items be considered obsolete and that permission to cancel be granted. The parties to Finance Docket No. 24745 and the general public will be given an opportunity to show cause why these rates should not be cancelled.

This decision does not significantly affect the quality of the human environment and is not a major action under the Energy Policy and Conservation Act or 1975. It is ordered:

A copy of this decision shall be served on the parties to Finance Docket No. 24745 and the Director, Office of the Federal Register, for publication.

Any interested persons who oppose the petitioner’s request for permission to cancel the rates in issue are ordered to show cause why such permission to cancel should not be granted by filing within 30 days after publication of this decision in the Federal Register, statements in opposition, in Docket No. 36807, addressed to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

By the Commission, Division 1, Commissioners Brown, Gresham, and Clapp.

H. G. Homme, Jr.,
Secretary.

[7035-01-M]

[Ex Parte No. 357]

INCREASED FREIGHT RATES AND CHARGES NATIONWIDE—8 PERCENT

Oral Argument

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Oral Argument.

SUMMARY: The ICC has decided to hold oral argument on the rail general rate increase proposed in Ex Parte No. 357.

TIME AND PLACE: The oral argument will be held at 9:00 a.m., Wednesday, December 6, 1978, in Hearing Room B, Interstate Commerce Commission Building, 12th Street and Constitution Avenue, N.W., Washington, D.C. Parties who plan to participate should inform the ICC by letter in advance.

ROOM 5342, WASHINGTON, D.C. 20423)
as soon as possible, but no later than December 4, 1978.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

By petition and verified statements filed November 1, 1978, United States railroads sought to increase freight rates and charges generally by 8 percent within and between Eastern, Southern, and Western Territories. Exceptions from the general level of 8 percent were proposed on a number of commodities, with the intended result of a revenue yield of 8.3 percent above present levels. The ICC granted the requested authority to file a master tariff in a decision served November 6, 1978.

In the oral argument, one hour will be allocated for the carriers' presentation, any portion of which may be reserved for rebuttal. Protestants and other interested parties will be allocated a total of two hours. Matters already of record in the pleadings shall not be repeated. To the extent possible, the parties are requested to consolidate their positions and fairly apportion the time between various interests. If agreement cannot be reached, the ICC will make such apportionment.

Parties are invited to address all relevant issues in Ex Parte No. 357.

H. G. Home Jr.,
Secretary.

MATTERS TO BE CONSIDERED:

SUMMARY AGENDA

Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board requests that an item be moved to the discussion agenda.

2. Proposed interpretation of Regulation Q (Interest on Deposits) regarding the withdrawal of interest earned on time deposit funds.
3. Any agenda items carried forward from a previously announced meeting.

NOTE.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board’s Freedom of Information Office, and copies may be ordered for $5 per cassette by calling 202-452-3054 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION:
Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of December 4, 1978, in Room 825, 500 North Capitol Street, Washington, D.C.

Open meetings will be held on Tuesday, December 5 at 3:30 p.m. and on Wednesday, December 6, 1978 at 10 a.m. A closed meeting will be held on Wednesday, December 6 immediately following the open meeting at 10 a.m. The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552(b)(4), (8), (9)(a), and (10) and 17 CFR 200.402(a) (8), (9)(I), and (10).

Chairman Williams and Commissioners Loomis, Evans and Karmel determined to hold the aforesaid meeting in closed session.

The subject matter of the open meeting scheduled for Tuesday, December 5, 1978, at 3:30 p.m. will be:

Meeting with officials of the Bank Administration Institute to discuss their current activities. For further information, please contact George A. Fitzsimmons at 202-755-1160.

The subject matter of the open meeting scheduled for Wednesday, December 6, 1978, at 10 a.m. will be:

Consideration of a request for approval of the application of Daniel J. Clardy allowing him to become associated with Rooney, Pace Inc., a registered broker-dealer, in a nonsupervisory capacity with adequate supervision. For further information, please contact David P. Tennant at 202-376-2036.

The subject matter of the closed meeting scheduled for Wednesday, December 6, 1978, immediately following the open meeting at 10 a.m. will be:

FOR FURTHER INFORMATION, PLEASE CONTACT:

**November 27, 1978.**

14

**TENNESSEE VALLEY AUTHORITY.**

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10:30 a.m. (e.s.t.), Thursday, November 30, 1978.

**PREVIOUSLY ANNOUNCED PLACE OF MEETING:** Auditorium, TVA's National Fertilizer Development Center, Muscle Shoals, Ala.

**STATUS:** Open.

CHANGES IN MATTERS TO BE CONSIDERED: The following item is added to the previously announced agenda:

**C—PURCHASE AWARDS**

7. Rejection of bids received in response to Invitation No. 72-833875 for gas ducts and hoppers for electrostatic precipitators for the Cumberland Steam Plant. Recommends rejection of all bids received and negotiation on an emergency basis of the requirement.

**CONTACT PERSON FOR MORE INFORMATION:**

John Van Mol, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call 615-632-3227, Knoxville, Tenn. Information is also available at TVA's Washington Office, 202-566-1401.

**SUPPLEMENTARY INFORMATION:**

**TVA BOARD ACTION**

The TVA Board of Directors has found, the public interest not requiring otherwise, that TVA business requires the subject matter of this meeting be changed to include the additional item shown above and that no earlier announcement of this change was possible.
SUNSHINE ACT MEETINGS

The members of the TVA Board voted to approve the above findings and their approvals are recorded below.

Approved:

S. DAVID FREEMAN.
RICHARD M. FREEMAN.

FEDERAL HOME LOAN MORTGAGE CORPORATION

PRESIDENTIAL COMMISSION ON WORLD HUNGER

PRIVACY ACT OF 1974

Systems of Records; Annual Publication
NOTICES

FEDERAL HOME LOAN MORTGAGE CORPORATION

(PRIVACY ACT OF 1974)

Systems of Records, Annual Publication

AGENCY: Federal Home Loan Mortgage Corporation.

ACTION: System of records—republication.

SUMMARY: This notice complies with the Privacy Act of 1974 (5 U.S.C. sec. 552a).

EFFECTIVE DATE: Effective upon publication.

FOR FURTHER INFORMATION CONTACT: Diana G. Brown, Assistant General Counsel, Federal Home Loan Mortgage Corporation, 1700 G Street, NW, Washington, DC 20552 (202/769-4732).

SUPPLEMENTARY INFORMATION:

The Federal Home Loan Mortgage Corporation is required under Section 552a(e)(4) of the Privacy Act of 1974 to republish annually its systems of records. The notice of the Corporation's record system was published for effect at 42 Federal Register, p. 64931, et seq. (December 29, 1977).

Two record systems, FHLMC-I and FHLMC-III, containing information on Corporation employees and potential candidates for employment, respectively, have been amended to indicate that such systems are maintained in the Corporation's Regional Offices and Underwriting Offices as in the Washington Office. FHLMC-II has been amended to indicate that the routine use of employee salary cards includes the calculation of employee pensions and the furnishing of information to the Corporation's insurance carriers and to the Internal Revenue Service. A new record system, FHLMC-VI, containing information on garnishments of employees' salaries, has been added. Addresses on all record systems have been changed as a result of the move of the Corporation's principal office.

FHLMC—I

System name: Corporate Employee Files.

System location: Office of Personnel, Federal Home Loan Mortgage Corporation, 1700 G Street, NW, Washington, D.C. 20552; Office of Regional Vice President-Administration, Northeast Regional Office, 2001 Jefferson Davis Highway, Arlington, Virginia 22202; Office of Regional Vice President-Administration, Atlanta Regional Office, Peachtree Center-Cain Tower Building, 229 Peachtree St, NE, Suite 2600, Atlanta, Georgia 30303; Office of Regional Vice President-Administration, Chicago Regional Office, 111 East Wacker Drive, Suite 1515, Chicago, Illinois 60601; Dallas Regional Office, 12700 Park Central Place, Suite 1800, Dallas, Texas 75251; Los Angeles Regional Office, 3543 Wilshire Boulevard, Suite 1000, Los Angeles, California 90010; Office of Underwriting Office Manager, Denver Underwriting Office, 8301 East Prentice, Englewood, Colorado 80110; Office of Underwriting Office Manager, Seattle Underwriting Office, 600 Stewart Street, Suite 2000, Seattle, Washington 98101; Office of Underwriting Office Manager, San Francisco Underwriting Office, 600 California Street, San Francisco, California 94108; Office of Underwriting Office Manager, Newport Beach Underwriting Office, 1400 North Bristol Street, Suite 260, Newport Beach, California 92660.

Categories of individuals covered by the system: All present and former employees.

Categories of records in the system: Employment applications and/or resumes, forms recording personnel actions, employee evaluations, memos for the record and other routine personnel information on identified individuals.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to provide data in determining current employment status of employee, history of personnel action, evaluation of performance and to assist in determining what, when and whether future personnel actions should be taken. Users are the Office of Personnel, the Office of the Regional Vice President-Administration (in the case of Regional Office employees), the Office of the Underwriting Office Manager (in the case of Underwriting Office employees), supervisory personnel at levels above the employee on whom the record is maintained and the employee himself. These records also may be reviewed by the Legal Department in connection with certain personnel actions, and by the Internal Auditor and his staff.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy records.

Retrievability: By employee name.

Safeguards: Records are stored in locked cabinets and can only be viewed upon request to the Director of Personnel or the Personnel Administrator in the Washington Office, to the Regional Vice President—Administration in the appropriate Regional Office, and to the Underwriting Office Manager in the appropriate Underwriting Office.

Retention and disposal: Records are retained indefinitely.

System manager(s) and address: Director of Personnel, Federal Home Loan Mortgage Corporation, 1700 G Street, NW, Washington, D.C. 20552; Office of the Regional Vice President—Administration in each FHLMC Regional Office (see addresses above); Office of the Underwriting Office Manager, in each FHLMC Underwriting Office (see addresses above).

Record source categories: The individual on whom file is maintained, the Director of Personnel, the Regional Vice President—Administration (in the case of Regional Office employees), and the Underwriting Office Manager (in the case of Underwriting Office employees).

FHLMC—II

System name: Corporate Employee Current Salary Cards.

System location: Finance Department, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552.

Categories of individuals covered by the system: All present employees.

Categories of records in the system: Current salary, dependent status, number of tax exemptions, age and date of hire, and information regarding various types of deductions from salaries.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to make salary payments to employees, to calculate employee pensions, to make reports to the Internal Revenue Service and to provide information to the Corporation's insurance carriers in connection with the provision of insurance benefits to employees. Used by the Corporate Treasurer, the Supervisor of Accounts Payable, the Payroll Clerk, the Director of Personnel and the Legal Department. These records also may be reviewed by the Internal Auditor and his staff.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy records.

Retrievability: By employee name.

Safeguards: Records are stored in locked card file and can be obtained through Accounts Payable Supervisor.

Retention and disposal: Cards are destroyed as they become out of date or upon termination of employment.

System manager(s) and address: Supervisor of Accounts Payable, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552.

Record source categories: Employee files.

FHLMC—III

System name: Potential Candidates for Employment.

System location: Office of Personnel, Federal Home Loan Mortgage Corporation, 1700 G Street, NW, Washington, D.C. 20552; Office of Regional Vice President—Administration in each FHLMC Regional Office (see addresses above); Office of Underwriting Office Manager in each FHLMC Underwriting Office (see addresses above).

Categories of individuals covered by the system: Potential candidates for employment.

Categories of records in the system: Employment applications, resumes, referral letters and memos.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to evaluate qualifications of potential candidates by the Director of Personnel, the Regional Vice President—Administration (in the case of candidates in a Regional Office), the Underwriting Office Manager (in the case of candidates in an Underwriting Office) and supervisors. These records also may be reviewed by the Internal Auditor and his staff.
Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Hard copy records are stored in file folders.

Retrievability: By candidate name.

Safeguards: Access is gained through a request to the Director of Personnel or the Personnel Administrator, to the Regional Vice President—Administration in the appropriate Regional Office or to the Underwriting Officer Manager in the appropriate Underwriting Office.

Retention and disposal: Files are retained one year and destroyed unless candidate is hired. If candidate is hired, file becomes part of employee records.

System manager(s) and address: Director of Personnel, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552; Office of Regional Vice President—Administration in each FHLMC Regional Office (see addresses above); Office of Underwriting Officer Manager in each FHLMC Underwriting Office (see addresses above).

Record source categories: These records are normally submitted by the individual seeking employment. Some records could come from individuals or employment agencies sponsoring the application.

FHLMC—IV

System name: Corporate Employee Conflict of Interest Files.

Categories of individuals covered by the system: All present and former employees.

Categories of records in the system: Annual conflict of interest statements submitted by employees, and memoranda concerning such annual statements.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to provide data to the Corporation, internal memoranda indicating the manner in which the deductions from salary are to be made; and the records of deductions which have been made.

Safeguards: Only members of the Loan Accounting and Accounts Payable Departments and those members of the Marketing Department who work in processing have access to the investor list and monthly payment records. Access to remittance checks records may be obtained through a request to the Director of the Systems Department.

Retention and disposal: Records are retained indefinitely.

System manager(s) and address: Director of Processing, Director of Sales Accounting and Supervisor of Accounts Payable, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552; Director of Systems Development, Federal Home Loan Mortgage Corporation, 311 First Street, N.W., Washington, D.C. 20001.

Record source categories: The individual on whom the information is maintained.

FHLMC—V

System name: Net Yield Debt Side.

System location: Department of Marketing and Department of Accounting, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552; Department of Systems, Federal Home Loan Mortgage Corporation, 311 First Street, N.W., Washington, D.C. 20001.

Categories of individuals covered by the system: All present and former holders of FHLMC Participation Certificates.

Categories of records in the system: The list of registered holders of Participation Certificates, the monthly payment record, and copies of remittance checks.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: Used to make monthly remittances to investors, to make reports to the Internal Revenue Service, and to derive a Registered Holder Profile which is used for statistical purposes by the Marketing Department and has in the past been provided to the Federal Reserve. (While the list of holders is used to derive the Registered Holder Profile, the profile itself identifies holders by category only, and not by name, and therefore does not constitute a part of a record system.) A copy of the list of holders is provided each month to Loan Accounting, which is responsible for determining the dollar amounts of the checks to the holders, and to Accounts Payable, which is responsible for mailing the checks. Users are the Marketing, Accounting, and Systems Departments. These records may also be reviewed by the Internal Auditor and his staff.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Investor lists and monthly payment records are hard copy. Copies of remittance checks are on microfilm.

Retrievability: By investor name.

Safeguards: Only members of the Loan Accounting and Accounts Payable Departments and those members of the Marketing Department who work in processing have access to the investor list and monthly payment records. Access to remittance checks records may be obtained through a request to the Director of the Systems Department.

Retention and disposal: Records are retained indefinitely.

System manager(s) and address: Director of Processing, Director of Sales Accounting and Supervisor of Accounts Payable, Federal Home Loan Mortgage Corporation, 1700 G Street, N.W., Washington, D.C. 20552; Director of Systems Development, Federal Home Loan Mortgage Corporation, 311 First Street, N.W., Washington, D.C. 20001.

Record source categories: The individual on whom the information is maintained.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

J. J. Finn,
Secretary.

NOTICES

[5820-97-M]

PRESIDENTIAL COMMISSION ON
WORLD HUNGER
Privacy Act of 1974
Systems of Records

Pursuant to the provisions of the Privacy Act of 1974, Public Law 93-479, 4 U.S.C. 552a, the Presidential Commission on World Hunger, hereafter known as the Commission, hereby publishes for comment those systems of records subject to the Privacy Act of 1974 which are maintained by the Commission. Any person interested in commenting on the routine use of the system notices may do so by submitting comments in writing to the Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006. Comments should be submitted on or before January 1, 1979. The Commission's procedures for access to records in the systems are contained in 1 CFR Part 475.

Daniel E. Shaughnessy,
Deputy Executive Director.

PCWH-1
System name: Payroll Records—Presidential Commission on World Hunger.

System location: General Services Administration, Region 3 Office; copies held by the Commission. (GSA holds records for the Presidential Commission on World Hunger under contract.)

Categories of individuals covered by the system: Employees and Members of the Commission.

Categories of records in the system: Varied payroll records, including, among other documents, time and attendance cards; payment vouchers; comprehensive listing of employees; health records; requests for deductions; tax forms; W-2 forms; overtime requests; leave data; retirement records. Records are used by Commission and GSA employees to maintain adequate payroll information for Commission employees, and otherwise by Commission and GSA employees who have a need for the record in the performance of their duties.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are released to GAO for audits; to the IRS for investigation; and to private attorneys, pursuant to a power of attorney.

A copy of an employee's Department of the Treasury Form W-2, Wage and Tax Statement, also is disclosed to the State, city, or other local jurisdiction which authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the State, city, or local jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 4416, 5517, or 5520, or, in the absence thereof, in response to a written request from an appropriate official of the taxing jurisdiction to the Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006. The request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and should indicate whether the authority of the jurisdiction to tax the employee is based on place of residence, place of employment, or both.

Pursuant to a withholding agreement between a city and the Department of the Treasury (5 U.S.C. 5520), copies of executed city tax withholding certificates shall be furnished the city in response to written request from an appropriate city official to the Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and microfilm.

Retrievability: Social Security Number.

Safeguards: Stored in guarded building; released only to authorized personnel, including among others, GSA liaison staff and Finance personnel; and Commission administrative staff.

Retention and disposal: Disposal of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAS P 1820.2).

System manager(s) and address: Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006.

Notification procedure: Refer to Commission access regulations contained in 1 CFR Part 475.

Record access procedures: Refer to Commission access regulations contained in 1 CFR Part 475.

Record source categories: The subject individual; the Commission.

PCWH-2

System location: General Services Administration, Central Office; copies held by the Commission. (GSA holds records for the Presidential Commission on World Hunger under contract.)

Categories of individuals covered by the system: Employees and members of the Commission.

Categories of records in the system: SF-1038, Application and account for advance of funds; Vendor register and vendor payment tape. Information is used by accounting technicians to maintain accurate financial information and by other officers and employees of GSA and the Commission who have a need for the record in the performance of their duties.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: See Appendix. Records also are released to GAO for audits; to the IRS for investigation; and to private attorneys, pursuant to a power of attorney.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper and tape.

Retrievability: Manual and automated by name.

Safeguards: Stored in guarded building; released only to authorized personnel, including among others, GSA liaison staff and Finance personnel; and Commission administrative staff.

Retention and disposal: Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition.

System manager(s) and address: Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006.

Notification procedure: Refer to Presidential Commission on World Hunger access regulations contained in 1 CFR Part 475.

Record access procedures: Refer to Presidential Commission on World Hunger in 1 CFR Part 475.

Contesting record procedures: Refer to Presidential Commission on World Hunger access regulations contained in 1 CFR Part 475.

Record source categories: The subject individual; the Commission.

PCWH-3
System name: General Informal Personnel Files—Presidential Commission on World Hunger.

Categories of individuals covered by the system: Commission members and consultants, past and present.

Categories of records in the system: Copies of: Personal qualifications statements, personnel action requests and notifications, oaths of office, consultant and/or expert certifications, delegations of authority, background information for security clearances (non-sensitive and critical-sensitive), statements of employment and financial interests, training materials and correspondence with members of the Commission.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Paper.

Safeguards: Stored in lockable file cabinets; released only to authorized personnel, including among others, GSA liaison staff and Commission administrative staff.

Retention and disposal: Retained until no longer needed, then discarded.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
System manager(s) and address: Director of Administrative and Fiscal Services, 734 Jackson Place, N.W., Washington, D.C. 20006.

Notification procedure: Refer to Presidential Commission on World Hunger access regulations contained in 1 CFR Part 475.

Contesting record procedures: Refer to Presidential Commission on World Hunger access regulations contained in 1 CFR Part 475.

Record source categories: The subject individual; the Commission.

Appendix—Presidential Commission On World Hunger

In the event that a system of records maintained by this Commission to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, or local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

A record from this system of records may be disclosed as a "routine use" to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

A record from this system of records may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator or other duly authorized official engaged in investigation or settlement or a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Civil Service Commission in accordance with the agency's responsibility for evaluation and oversight of federal personnel management.

A record from this system of records may be disclosed to officers and employees of a federal agency for purposes of audit.

The information contained in this system of records will be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

A record from this system of records may be disclosed as a routine use to a Member of Congress or to a Congressional staff member in response to an inquiry of the Congressional office made at the request of the individual about whom the record is maintained.

A record from this system of records may be disclosed to officers and employees of the General Services Administration in connection with administrative services provided to this agency under agreement with GSA.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
DEPARTMENT OF LABOR
Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION
General Wage Determination Decisions
NOTICES

DEPARTMENT OF LABOR
Employment Standards Administration
MINIMUM WAGES FOR FEDERAL AND FEDERAIIY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determination in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (40 St. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1.1, as amended (40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1.1. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as required by applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (40 St. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1.1. including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determinations of prevailing wage rates and fringe benefit payments since the decisions were issued.

The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

New General Wage Determination Decision

CANCELLATION OF GENERAL WAGE DETERMINATION DECISIONS

NONE

Signed at Washington, D.C., this 24th day of November 1978.

DOROTHY P. COME,
Assistant Administrator,
Wage and Hour Division.

[FR Doc. 78-33425 Filed 11-30-78; 8:45 am]
### NEW DECISION

**STATE:** New Hampshire  
**COUNTIES:** Statewide

**DESCRIPTION OF WORK:** Highway construction (and airport runway and taxiway construction, but does not include bridges over navigable water; tunnels; buildings in highway rest areas; and railroad construction).

#### Belknap County, New Hampshire

**Highway Construction**

### PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

### FOOTNOTES:
- a. 7 paid holidays: A through F, and Good Friday
- b. 1 paid holiday: Good Friday. Employee must work 3 days during the work week in which the holiday falls, if scheduled, and if scheduled, the working day before and the working day after the holiday.
- c. 4 paid holidays: B, C, D, and Good Friday. Employee must be employed 14 consecutive days immediately prior to the holiday.
- d. 3 paid holidays: C, D, and E
- e. $50 per worker per year.
- f. 3 paid holidays: B, C, and D
- g. The last 4 regular working hours prior to Christmas Day shall be paid half day.
- h. 6 paid holidays: A through P.
- i. 3 paid holidays: A through F, Washington's Birthday, Good Friday, and Columbus Day.
- j. 1 paid holiday: A through F, Washington's Birthday, Good Friday, and Columbus Day.
- k. The last 4 hours on Christmas Eve is a paid half day if employee has worked 5 consecutive days prior to Christmas Eve.
- l. 5 paid holidays: A through F, Washington's Birthday, Good Friday and Xmas Eve provided the employee has worked 45 full days for the employer during the 120 days prior to the holidays and works the scheduled work days immediately preceding and following the holidays.
- m. 9 paid holidays: A through F, Washington's Birthday, Good Friday and a floating holiday per year provided the employee has been employed for a period of 5 working days prior to the holidays and works the scheduled work days immediately preceding and following the holidays.
- n. 2 paid holidays: C and D providing the employee works the day before and the day after the holiday.
- o. 4 paid holidays: C, D, E, and F providing the employee works the day before and the day after the holiday.
- p. 2 paid holidays: D and the Friday after Thanksgiving in a paid half day, and December 24, provided it falls on a working day, in a paid half day.
- q. 34 paid holidays: C, D, E, and the half day Friday after Thanksgiving.
- r. 5 paid holidays: D
- s. 2 paid holidays: B, D & half day paid holiday the Friday after Thanksgiving and the last working day before Christmas, & Good Friday paid half day.

**Class 13**: Crane with 150' boom = $.25 extra; Crane with 200' boom = $.50 extra

### Power Equipment Operators Classifications

- **Class 1**: Erecting and handling structural steel; front end loader (7 cy. or over)
- **Class 2**: Pilothouse; 8000 lbs. crane; dragging; grading; grading; trenching; lighter derrick; paving (concrete); derrick (stiff leg and guy); steel pile driving; hoisting loader (shovel); master mechanic
- **Class 3**: Drill (30,000 foot weight champion or equivalent); 800 lbs. loader (pail); hoisting (1500); trucking (heavy); pump; rock and earth boring machine; post hole digger; well digger; hammer (vibratory); central mix combination (over 4 yd)
- **Class 4**: Asphalt
- **Class 5**: Front end loader (3 yrs. or over); grader; power stone spreader; combination hoe and loader
- **Class 6**: Asphalt roller; bulldozer; carryall; maintenance engineer; concrete mixer; 8 logs and over; roller
- **Class 7**: Front end loader (under 3 yrs.); roller; power chipper; fork lift; finishing machine; asphalt plant; power pavement breaker; dinky machine
- **Class 8**: Compactor; pump
- **Class 9**: Fireman (high pressure)
- **Class 10**: 1500 lbs. crane; carryall; bulldozer; carryall
- **Class 11**: 3000 lbs. crane; carryall; bulldozer; carryall
- **Class 12**: Oilwell rig
- **Class 13**: Batch plant; bulk cement plant

---

### Notices

**Supersedes Decision**

**State**: Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania and Rhode Island

**Decision Number**: HV78-3097

**Date of Publication**: October 14, 1977, in 42 FR 55410

**Description of Work**: All dredging on the Atlantic Coast from the Canadian Border to the southern boundary of the State of Maryland and tributary waters emptying into the Atlantic Ocean, the Chesapeake and Delaware Canal, Baltimore, City and Baltimore County, Maryland.

CLASSIFICATION: TRUCK DRIVERS

CLASS 1: Two axle trucks; helpers
CLASS 2: Three axle trucks; two axle ready mix
CLASS 3: Four axle trucks; heavy duty trailer-up to 40 tons
CLASS 4: Three axle ready-mix
CLASS 5: Four axle ready-mix; specialised earth moving equipment other than conventional type on-the-road trucks and mini-trailer (including Euclid) 
CLASS 6: Heavy duty trailer-40 tons and over

PAID HOLIDAYS:
A- New Year’s Day; B-Memorial Day; C-Independence Day; D-Labor Day; E- Thanksgiving Day & F- Christmas Day

FOOTNOTES:

a. 7 paid holidays: A through F and Good Friday

DECISION NO. NY78-3097

FOOTNOTES:

b. Holidays: A through F, plus Washington’s Birthday and Veterans’ Day; 60 days of vacation with pay for 84 days of service, one additional day of vacation with pay for each additional 21 2/3 days of service, all in one calendar year. Employees not qualifying for vacation as set forth above will receive one day’s vacation with pay for each full 20 days of service in one calendar year.

PAID HOLIDAYS:
A- New Year’s Day; B-Memorial Day; C-Independence Day; D-Labor Day; E- Thanksgiving Day and F- Christmas Day.

**NOTES**

- Class 1: Apsco or equal spreading machine; Backhoe; Backfiller; Boom or which cat; Bituminous mastic machine; Backalp; Bituminous surfacing machine; Bulldozer; Crane; Dozer; Dragline; Truck crane; Pile driver; Concrete finishing machine or spreader machine; Concrete breaker; Concrete or pumper concrete pumps; Binkys; or standard locomotive; Drill well; Elevator grader; Forklifts; Rubber-tired; Flex-plan; Gradall; Hi-lift; Handline; power; Hoists, tugger type; Hoist, 2 drums or over; Guy-derick; Hyster mechanics; Motor patrol; Mixers 20 cu. ft. or over; Push cat; Pulls and scrapers; Pump; 2 well points; Pulveriser or pulverizer equal to pugmill; Rubber-tired farm type tractor with bulldozer or hi-lift (over 1/2 yd.); Rubber-tired tractor w/jugger; Skimmer; scows; Seaman tiller; Spreader, Jorsey; Tract-air used w/drag or Hi-lift; Trenching machine, or ditching machine; Wood chipper with tractor; Self-propelled roller w/10 ft. blade; Concrete pumps; Equipment grader
- Class 2: Roller, self-propelled; Power subgrader; Elevator operator
- Class 3: Rubber-tired farm type tractor w/bull dozer or hi-lift (1/2 yd. or less)
POWER EQUIPMENT OPERATORS (Cont'd)

Class 4: Pump; on well point; All track type tractors, pulling any type roller or disc.

Class 5: Oilier; All wheel type tractors, Oilier on 30 Hp. ditches and over; Oilier, Hydra-crane with 15 ton lifting capacity or more and cranes similar to Hydra-crane w/15 ton capacity and more

Class 6: Air compressor w/valve driving piling air compressors, two (220 cu. ft. capacity or over); Air track drills, air track drill w/compressor; Automatic bins scales w/compressor or generator; Pipeline boring machine; Bulk cement plant w/separate compressor bulk float power operators; Concrete saws, (two); Hydra-lift (single motor); Straw balcher blower w/spout

Class 7: Backend man on bituminous surfacing machine; Boom or winch truck; Cat wagon w/o without dump; Conveyors, two; Chip spreader, self-propelled concrete saw, on self-propelled; Form grader; Heaters, (motor driven); Hoist, 1 drum; Truck crane oiler; Vibrator, self-propelled.

Class 8: Air track drill (one); Belt drag machine, Power boom, Mechanical; Planter, applicator; Tact-air

Class 9: Air compressor (220 cu. ft. capacity or over), one; Air compressor, under (220 cu. ft.) two; Automatic bins, bulk cement plant w/builtin compressor, running of same motor or electric motor; Firemen or watchmen; Form tampers, self-propelled; Light plants (two); Welding machine (two); Pumps (two); or combination of 2 pumps; Light plants, welding machines, air compressor (under 200 cu. ft.); Hud jacks or wood chippers; Mixers, less than 22 cu. ft.; Motor mixer w/spread or pump; Pipeline truck jack

Class 10: Air compressor, under 220 cu. ft. capacity (one); Conveyor (one); Conveyor operator on self-propelled chip spreader; Heater (one); Motor driven; Light plant (one) pump (one); Welding machine (one) lineman or equal spreader

RIVER WORK and LEVEE WORK on MISSISSIPPI and OHIO RIVERS

Class 11: Crane, shovel, dragline 4 yards or more, scraper, 18 yards, track or over, dredge, Derrick and pile driver, push boat operator, mechanic or 4 yards machine or over, Engine man on dredge, Levee man on dredge

Class 12: Oilier on crane, dragline, shovel, 4 yard machine or over; Oilier on dredge

**Group 1:** Air Compressors in Manifold with throttle valve; Asphalt Plant Engineer; Auto Grade or Similar type machine; Auto Patrol; Backhoe on Farm type Tractor, 45 H.P. and over; Ballast Regulator (R. H.); Bituminous Mixer; Bituminous Plant Engineer; Bull Dozer; Caisson Drilling Machine; Cherry Picker - 15 ton or over; Chip Spreader; Concrete Mixer 21 cu. ft. or over; Core Drilling Machine; Crane or Derrick with any attachment including clamshell, dragline, shovel, backhoe, etc.; Dredge Engineer; Dredge Operator; Drilling Machine on which the drill is an integral part; Earth Mover - rubber tired - (30 cu. ft. wheel, 619, 631, 75-24 or similar type); Earth Mover, rubber tire - tandem (30 tons per hour additional for each bowl); Elevating Grader; Fork Lift (10 ton or over); F.C.C. Pneumatic Paver; Gradall; Gravel Processing Plant (Portable); Operator of Guard Rail Post Driver; High Lift Shovel - 1-1/2 cu. yd. or over; Holst (2 drums and over); Helicopter - Crew; Hydraulic Boom Truck; Keystone (Skimmer Scoop); Loader - self-propelled (belt-chain wheel); Locomotive Operator; Nailing Machine; Panel Board Concrete Plant (Central Mix type); Power-Harvester; Pile Driver - Skid or Crawler; Road Paving Mixer; Rock Breaking Plant; Rock Crushing Plant (portable); Roller - Asphalt, Waterbound Hacmac, Bituminous Hacmac, Brick Surface; Roller with Dozer Blade; Root Rake, Tractor Mounted; Self-propelled Widener; Stump Remover, Tractor Mounted; Surface Paver and Finishing Tractor Paving Machine; Tractor - Boom, Winch or Hoe Head; Tractor - Paving Machine Mounted Spreader; Tree Mower; Trench Machine (over 20'); Turf Seed Roller; Well Drilling Machine; Winch Truck with A-Frame; Tractor with scoop

**Group 2:** Air Compressor with throttle valve or Cleaver Brooks type combination; Backfiller; Back hoe on Farm type Tractor, under 45 H.P; Bull Float; Cherry Picker under 10 ton; Chip Spreader (self-propelled); Concrete Pump; Concrete Pumper, independently operated; Concrete Spreader - power driven; End Loader under 1-1/2 cu. yd.; Excavator - portable; Finishing Machine and Bull Float; Gunite Machine; Head Graser; Mechanical; Mixer or Steel Placer; Multiple Tonguing Machine (R. H.); P.C.C. Concrete Belt Placer; Pull Grader - power control; Refrigerating Machine for freezing operation; Roos Carrier; Sheepsfoot Roller (self-propelled); Tamper - Multiple Vibrating - Asphalt, Hacmac, Bituminous Hacmac, Brick Surface; Trench Machine 24" and under; Tube Float; Welder

---

**Federal Register, Vol. 43, No. 232—Friday, December 1, 1978**
POWER EQUIPMENT OPERATORS (Cont'd) 3 of 3

Group 3: Assistant Plant Engineer; Base Paver (Jersey or similar type machine); Concrete Finishing Machine; Concrete Mixer - less than 21 cu. ft.; Curb Machine; Farm Tractor - including farm tractor with all attachments except backhoe and including high lift and loaders of 1 cu. yd. capacity or less; Fireman (on boiler); Hoist (one drum); Operator, 5 pieces of minor equipment; Paving Breaker; Power Broom, self-propelled; Roller (Earth and Sub-base material); Slurry Seal Machine; Spike Machine (R.R.); Tamper - Multiple Vibrating - Earth and Sub-base material); Throttle Valve; Throttle Valve and Fireman combination on horizontal or upright boiler; Tractor with Drill Tractor - 50 H.P. or over; Wall Point System; Widener (Apex or similar type)

Group 4: Air Compressor; Assistant to Engineer - Oilers; Automatic Dry Batch Plants; Bituminous Distributor; Bituminous Patching Tamper; Belt Spreader; Boom and Bolt Machine; Chair Cart (self-propelled); Coleman Type Screed; Conveyor (portable); Deck Hand; Digger Post Hole (power-driven); Fork Lift - under 10 ton; Form Grader; Form Tamper (motor driven); Generator; Greaser Helper; Hetherington Driver; Hetherington Helper; Hydra Sander; Mechanics Helper; Mechanical Hauler; Operator 1 thru 6 pcs. of minor equipment; Outboard or Inboard Hauler Boat; Power Curing Spraying Machine; Power Saw - Concrete (power driven); Pig Mill; Pull Boom (power type); Seam Tiller; Straw Blower or Brush Holcher; Stripping Machine, Paint (motor driven); Sub-grader; Tractor Tractor (below 50 H.P.); Truck Crane Oiler - Driver; Spreader; Water Pump; Welding Machine - 2 of 300 amps or over
DECISION NO. 1988-2169
Page 11

LABORERS

GROUP 1: Chairmen; Construction laborers; Continuous steel rod or mat installers; Fence erectors; Grade checkers; Guard rail erectors; Joint man (mason, mastic & all other types); Lighting installers (permanent & temporary); Lineman for automatic grade maker or paving machine; Manhole erectors; Mortar man; Multi-plate erector; Rip-rap laborer, incl. all materials; Road marking & delineation laborer; Rodmen; Sandblaster man; Setting & placing of all pre-stressed & prestress concrete products; Splaying of spay, curing compound or like materials; Survey crew helpers; Temporary waterline installers; Top laborers; Wire mesh layer

GROUP 2: Air tool, power tool, & power equipment operators; Asphalt lute man; Asphalt roller man; Batch truck driver; Cement handler (bulk or bag cement); Chain saw man; Concrete conveyor assembly man; Concrete payhuller; Concrete rubber; Concrete saw operator - non riding type; Core drill operator; Hand blade operator; Hydro seeder man; Hoe truck driller; Georgia buggy operator; Power driven compactors or tampers operator; Power saw operator; Pumicecrete assembly man; Sealer applicator for asphalt, tar; Side rail setter - for sidewalks, side ditches, radii & pavements; Sign installation, including supporting structures; Sprayer box tender; Straw blower man; Subsurface drain & culvert pipe layer; Transverse & longitudinal hand bull float man

GROUP 3: Horizontal boring & jacking man; Jackman & sheetman; Pipe grade man; Nenche & windlass operator

GROUP 4: Conduit installer; Cutting torch burner; Laser beam aligner; Manual operated welder; Sewer pipe layer; Water line installer

GROUP 5: Air track & wagon drillman; Concrete finisher; Dynamite & powder man

GROUP 6:
A. Bitman man; Concrete man
B. Concrete headman
C. Miner or header m'd
D. Hatcher & Tunnel laborer

CLASSIFICATIONS

GROUP 1: Air compressor (pressurizing shafts, tunnels & divers); Air tugger; Auto patrol; Back filler; Backhoe; Boom cart; Boring machine; Bull dozer; Gravely grading machine; Cherry picker; Concrete mixer (concrete drum); Concrete plants; Concrete pump; Crane; Crane - electric overhead; Derrick; Dual purpose truck (plow type); Ditching machine (80' and over); Bridge; Elevators (when hoisting material or tools); Fork lift; Formless power; Generator; Generator (for power or compressors); Grader; Helicopter; Hickey truck operator; High lift - front end loader; Hoist; Locomotive and/or derrick engine; Mechanic on job site; Machine operator; Panel board - concrete plant; Pile driver; Press cart; Scoop & tractor; Scrapper - rubber tired; Spreader - tractor mowed; Straddle carrier; Pile type; Sub base finish machine (G.H.I. or similar); Tower crane; Tractor with backhoe (under 1/2 yard & over); Trench box - power driven; Tunnel shield; Welder (crane)

GROUP II:
- A frame truck; Batch truck (automated dry batch); Banding machine
- Power driven; Bituminous mixer; Bituminous paver; Bituminous plant engineer; Boatsman; Bull float; Compactor or tamper - self-propelled; Concrete mixer (21 cu. ft. or over); Concrete spreader - power driven; Ditching machine (less than 18'); Drum truck; Finishing machine & bull float; Finishing machine; Fireman; Fire truck; Driving & bolters; Concrete mixer; Head grader; Mechanics - shop; Mesh depressor - mesh placer; F.G.C. concrete belt placer; Roller - asphalt; Stone & sub base; Rotary drill; Sheepsfoot roller - self-propelled; Shop male; Spreader or base power-self-propelled; Sub grade - Throttle valve with air compressor or boiler; Tractor with backhoe (under 1/2 yard); Tractor - high lift - farm type; Tractor - industrial type; Tractor with winch; Well point; Winch truck

GROUP III:
- Air compressor (210 cu. ft. & over); Batch plants; Forming distributor; Chair cart; Concrete curing machine; Concrete saws; Dope pot - power agitator; Flat plate; Flat plate; Flood gates; Hydrostatic; Jacks - hydraulic - power driven; Elevator equipment operators; Roller, 2, 3, 4, or 5 bearing joint; Post hole digger; Roller - earth; Throttle valve; Truck jack - power driven; Tractor - Type; Truck crane driver

GROUP IV:
- Air compressor (less than 210 cu. ft.); Concrete mixer (under 21 cu. ft.); Conveyor; Generator; Mechanical heater; Oilers; Power broom; Suction pump; Welding machine; Welder; Helper
NOTICES

GROUP IV Mixers 145 cubic capacity or less; Trench Machine cutting 24" and under; Farm Tractor with less than half yard bucket and other Attachments except Back Hoe; Truck Crane Oilier; Power Subgrades; Bull Float; Form Smoothers; Finishing Machine; Pavement Breaker; Rock Crushers; One Drum Machine; One Air Compressor; Concrete Pump; Gunite Machine; Air Compressors; Truck Crane Drivers; House Elevators when used for hoisting Material; Two to Four Generators or Welding Machines; Mechanized Haulers irrespective of Motor Power when used for temporary heat; Small Rollers on Earth; Engine Tenders; Firemen; Wagon Drill; Floors; Conveyors; Two to Four Water Pumps; Stethoscopes; 300 lb. Switches on Paint Pots; Fireman on Asphalt Plants; Distributor Operator on Trucks; Temporary Power Board; Pole Hole Digger; Self-propelled Concrete Saw; Striping Machine (Motor Driven); Form Tamper; Seaman Tiller; Bulk Cement Plant Equipment; Grader; Track Jack; Hed Jack; Operator to do Winter Repair Work in Shop between November 1st and March 1st; Concrete Buggies at or above Oiliers; Barrel Type Mixer; One Welding Machine or One Water Pump; Air Valve or Steam Valve from Plant; Concrete Mixers without Skip; Curing Machine; Concrete & Blacktop Cure Machine; Brick Hands

Crane with boom from 145 ft. to 199 ft. including job receive additional $.75 per hour
Crane with boom over 199 ft. including job receive additional $1.25 per hour.

Groundmen 10.09 .70 33% 60% .5%
### LABORERS’ CLASSIFICATIONS DEFINITIONS

**GROUP 1** - Asphalt plant laborers, concrete laborers, asphalt laborers, steam & sanitary sewer laborers, carpenter tenders, cement sewer tenders, moh handlers & planters, landscaping and seeding, planters & tree-planters, sign guard rail & fence installers, grade checkers, aging & curing of concrete, truck spotter & dumpers, batch truck dumpers, flagmen, zip-zap & cutters, dredging laborers, night of way laborers, roadwork & demolition laborers, drill helpers, & all hand digging and hand back filling.

**GROUP 2** - Wagon drillers, jack hammerers, paving breakers, chain saw, concrete saw, paving joint cutters, vibrodrill operators, power driven Georgia buzzy or wheel barrow, sand blaster & concrete chippers, green concrete cutting, brickmason tenders & mortar mixers, pipe layers, joint makers, bottle board men (sanitary & steam sewer), dry cement handlers, concrete vibrators, walk-behind tampers machines, walk-behind trenching machines, surface grinders, hand operated grinders & grinder machines, operator & doorknob new man, burner & welder.

**GROUP 3** - Packermen and blasters, blade roller operators - including rail paved ditch job laborers (free air), gunite operators & mixer men, gunite nozzlemen, asphalt blower & x-rayman, air test drillers (all types), & great pump operators.

**GROUP 4** - Tunnel blasters, tunnel workers (free air), miners & drillers (free air) Saloon workers (free air).

**NOTE:** Railroad and highway bridges across commercially navigable rivers; i.e. navigable to loaded barge tow, (including setting of super structure steel on bridges) shall receive the basic rate of pay.

**CLASS A** - Auto patrol, batcher plant, bituminous paver, cableway, central compressor plant operator, clamshell, concrete mixer (21 cu. ft. or over), concrete pump, crane, crusher plant, derrick, derrick boat, dredging and trenching machine, dragnet, dredge engine, elevator (used for hoisting any building material), elevating grade and all types of loaders, hoe-type machine, hoisting engine, locomotive, locomotive or carry-all scoop, bulldozer, mechanize, mechanic welder, orange peel bucket, pile driver, power blade, roller (bituminous), screener, shovel, tractor shovel, truck crane, winch truck, push dozer, high lift, fork lift (regardless of lift height), all types of boom cats, core drill, tow or push boat, A-frame winch truck, concrete paver, grade all, hoist (two or more drums), hoist, pump, grader, side boom, tower crane, tower crane (French, German and other types), hydrocrane, bookfiller, gusseter, subgrade.

**CLASS B** - All air compressors (over 500 cu. ft. per min. or greater capacity), bituminous mixer, concrete mixer (under 2 cu. ft.), welding machine, form grader, roller (rock), tugger, tractor (50 H.P. and over), ball float, finish machine, outboard motor boat, well points, flexiplane, fireman, boom type trenching machine, truck crane, operator, operator on grease facilities servicing heavy equipment, swivelax or boomax, joint trenching machine, mechanic helper, Whieley oiler, track-air and roadway-trencher, grout pump, electric vibratory compactor/self-propelled compactor, shovel, track crane, operator, (over 250 HP), truck crane, (under 25 HP), throttle valve man, tugger, well points, flexiplane, fireman, and hoist (one drum).

**CLASS C** - Operators on grease facilities servicing heavy equipment.

**CLASS D** - Operators on cranes with booms one hundred fifty feet (150') and over (including 30').

**LABORERS' CLASSIFICATIONS DEFINITIONS**

**GROUP 1** - Asphalt plant laborers, concrete laborers, asphalt laborers, storm & sanitary sewer laborers, carpenter tenders, cement mason tenders, mesh handlers & placers, landscaping and seeding, planters & tree-trimmers, sign guard rail & fence installers, grade checkers, aging & curing of concrete, truck spotter & dumpers, batch truck dumpers, flagmen, zip-rap & grouters, dredging laborers, right of way laborers, wrecking & demolition laborers, drill helpers, & all hand digging and hand back fillings.

**GROUP 2** - Vagon drills, jack hammer, paving breakers, chain saw, concrete saw, paving joint machine, vibrator operator, power driven Georgia buggy or wheel barrow, sand blaster & concrete chippers, green concrete cutting, bricklayers tenders & mortar mixers, pipe layers, joint maker, battey board man (sanitary & storm sewers), dry cement handlers, concrete rubber, walk-behind tamper machine, walk-behind trenching machine, surface grinder, hand operated grout & grinder machines, operator & deckhand snow man, bunker & welder.

**GROUP 3** - Powderman and blasters, side rail setters - including rail paved ditches, tunnel laborers (free air), gunnite operators & mixer man, gunnite nozzleman, asphalt layer & rookman, air-tact drillers (all types), concrete pump operators.

**GROUP 4** - Tunnel blasters, tunnel masons (free air), miners & drillers (free air).

**Chiseling workers (free air).**

**NOTES:** Railroad and highway bridges across commercially navigable rivers; i.e. navigable to loaded barge tow, (including setting of super structure steel on bridges) shall receive the HEAVY rate of pay.

**CLASS A** - Auto patrol, batcher plant, bituminous paver, coldmix, central compressor plant operator, clamshell, concrete mixer (21 cu. ft. or over), concrete pump, crane, cranes plant, deereck, deereck boat, ditching and trenching machine, dragline, dredge engines, elevator (used for hoisting building materials), elevating grader and all types of loaders, hoe-type machine, hoisting engine, locomotive, LeTourneau or carry-all scoop, bulldozers, mechanice, mechanic welder, Orangepeel bucket, pile driver, power blade, roller (bituminous), scarifier, shovel, hoist, shovel, truck crane, winch truck, push dozer, high lift, fork lift (regardless of fork height), all types of boom cranes, club drill, tow or push boat, 4-crawl winch truck, concrete paver, grade all, hoist (two or more drums), hydrot, pumper, hose carrier, side boom, tail boom, Rotary drill, mucking machine, rock spreader attached to equipment, scoopmobile, TeCal loader, tower cranes (French, German & other types), hydrocrane, backfiller, crawler, subgreader.

**CLASS B** - All air compressors (over 500 cu. ft. per min. or greater capacity), bituminous mixer, concrete mixer (under 21 cu. ft.), welding machine, forklift, roller (cock), tugger, tractor (50 H.P. and over), bull float, finish machine, outboard motor boat, well point, flexplane, fumer, boom type tamping machine, truck crane ollor, grumer on grume facilities servicing heavy equipment, switchman or blockman, joint sealing machine, mechanical helper, Whitney oiler, traction-air and road-widening tender, great pump, electric vibrator compressor/self-propelled compactor, thistle valve, elevator (one drum or back hoist), power sweeper (riding type), core drill and caisson drill helper (truck mounted).

**CLASS C** - Bituminous distributor, cement pun conveyor, mud jack, paving joint machine, punt, roller (earth), tamping machine, tractors (under 50 H.P.), vibrators, oilers, concrete saw, burlap and curving machine, hydro-nozzler, power form handling equipment, deckhund, siecman, hydraulic post driver, core drill and caisson drill helper (truck or skid mounted).

**CLASS D** - Operators on cranes with booms one hundred fifty feet (150') and over (including 315).

**Group 1** - Laborers (construction), plant laborers or yardmen, right-of-way laborers, landscape laborers, utility men or handymen, joint setter, flagmen, carpenter helpers, waterproofing laborers, luxury seal, seal coating, surface treatment or road mix laborers, riprap laborers or grinders, asphalt laborers, deep men (batch trucks), guardrail and fence installers, rough laborer, and plows, concrete curing applicator, scaffold erector.

**Group 2** - Asphalt men, concrete puffers, kettenmen (pipeline), all machine driven tools (gas, electric, air), cement tender, mortar mixer, batching, and shoring men, surface grinder men, power buggy and wheellbarrow power.

**Group 3** - Form setter, bottom man, welder helper (pipeline), concrete crew men, cutting with burning torch, pipe layer, hand splicer (railroad), carpenter (without air), grade laborer (without air), excavation (below 25 ft. deep), air track and wagon drill.

**Group 4** - Blaster and power man, muckers, wrenchers (mechanical joint and utility pipeline), yamor, top loader.

**Group 5** - Curb setter, and cutter, minor (without air), concrete crew in tunnels, utility pipeline tapper, gunnite noseman, waterline caulker.

---

**Federal Register, Vol. 43, No. 232—Friday, December 1, 1978**
TRUCK DRIVERS:

- Truck helper & warehousemen, & mobile batch truck helper
- Driver - 3 tons and under
- Crane, tire changer, & mechanic helper
- Driver - over 3 tons, crane-trailer or pole trailer (when used to pull building materials & equipment), dump truck tandem axle, truck & mechanism, & distributor
- Driver - mixer trucks (all types)
- Driver - all other heavy moving equipment & low boy, winch truck & A-frame truck (when used to transport building materials), fork lift truck (when used to transport building materials), & paver-plant breakers.

FEES:

a. Employer contribution of $35.00 per week per employee who has been employed a minimum of 20 work days within any 50 consecutive day period for that employee.

b. Employer contribution of $25.00 per week per employee who has been employed a minimum of 20 work days within any 50 consecutive day period for that employee.
### Notice of Public Hearing

**Description of Work:** Building construction, (excluding single family homes and garden type apartments up to and including 4 stories), heavy and highway construction.

PAID HOLIDAYS:

- A-New Year's Day; B-Memorial Day;
- C-Independence Day; D-Labor Day;
- E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:

a. Paid Holidays: A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

Class A

Laborers, drill helpers, flagmen, outboard and hand boats.

Class B

Ball float, chain saw, concrete aggregate, bin, concrete batcher, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tampers, drill doctor, mill or screw op. on asphalt paver, water pump op. (15" and single diaphragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tools, operators, wrecking laborers.

Class C

All rock or drill machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

Class D

Blasters, form setter, stone or gunnite curb cutters.

DECISION NO. NY78-3925

POWERT EQUIPMENT OPERATORS: HEAVY & HIGHWAY CONSTRUCTION

GROUP I
- A-frame truck, compressors (4 not to exceed 2000 C.F.H. combined capacity or a) not to exceed 1200 C.F.H.), compressors (any size but subject to other provisions for compressors), dust collectors, generators, pumps, welding machines, (4 of any type of combination), concrete pavement spreaders and finishers, conveyors, drill-coring, drill-ream, electric pumps used in conjunction with well point system, form tractors, with accessories, fine grade machine, fork lift (under 15 ft.), gin pole machines, hammer, (hydraulic-self-propelled), post hole digger and post driver, power sweeper, roller, (grade and fill), submersible electric pump (when used in lieu of well point system), tractor with toed accessories, vibratory compactor, vibro- tamp, wall point.

GROUP IV - Aggregate plant, boiler (used in conjunction with production), cement and bin operator, compressors (3 or less not to exceed 1200 C.F.H., combined capacity), compressor (any size, but subject to other provisions for compressors), dust collectors, generator pumps, welding machines (3 or less of any type or combination), concrete power or mixer (163 and under), concrete saw (self-propelled), fireman, form tamper, hydraulic pump (jacking system), lighting plant, mixing machine, oiler, parapet (concrete or pavement grinder), power broom (towed), power heateman, revivulus widener, shell winder, steam cleaner, tractor.

POWERT EQUIPMENT OPERATORS: HEAVY AND HIGHWAY CONSTRUCTION

GROUP I - Automatic concrete spreader (CH), Automatic lime spreader, backhoe (except tractor mounted, rubber tired), barge placer (CH type), blacktop plant (automated), cab-over, casing auger, central mix concrete plant (automated), cherry picker (over 5 tons capacity), concrete pump (8" or over), crane, cranes & derricks (steel erection), dragline, dragger, dual drum paver, excavator (all purpose hydraulically operated, (gradall or similar), fork lift (factor rated 15 ft. and over), front end loader 4 c.y., and over), head tower (auxiliary or equal) hoist (2 or 3 drum), mine hoist, mucking machine or mule, over head crane (panty or straddle type), piler, power grader, quarter master (or equivalent), scraper, shovel, sidemouth, slip form paver (if second man is needed, he shall be an oiler), tractor, drum belt type loader, truck crane, tunnel shovel.

GROUP II - Backhoe (tractor mounted, rubber tired), bituminous spreader and mixer, blacktop plant (non-automated), blast or rotary drill truck, or tractor mounted), boring machine, cage-hoist, central mix plant (non-automated and all concrete batching plants), cherry picker (5 tons capacity and under), compressors (4 or less), exceeding 2000 C.F.H., combined capacity concrete paver (over 163), concrete pump (under 8"), crusher, diesel power units, drill rig (tractor mounted), front end loader (under 2 c.y.), hi-pressure - boiler (15 lbs. and over), hoist (one drum) Koman plant, loader and smaller type loaders (if another man is required to clean screen or to maintain the equipment, he shall be an oiler), locomotive maintenance/engineer/engr/engr/engr, welder, mixer (for stabilized base self-propelled), mobile mix, mobile machines, plant engineer, pump crete, ready mix concrete plant, refrigeration equipment (for soil stabilization), road winder, roller (all above subgrade), tractor with dozer and/or pusher, trencher, tugger-hoist, winch, winch cat.
### NOTICE

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

#### POWER EQUIPMENT OPERATORS

**Building Construction**

**Class 2:** "A" crane truck; Blacktop plant (non-automatic); Boring machine; Bulldozer; Cage hoist; Carry-all scrapper; Central mix plant (non-automatic); Cherry picker five (5) tons and under; Compressor (30 c.f. and under); Concrete paver (single drum over 160); Concrete pump; Core boring machine; Drill rig-tractor mounted; Elevator — as a material hoist; Fork lift (factory rating less than 15 ft.); Front end loader (under 4 cu. yd.); Gunite machine; High pressure boiler (15 lbs. and over); Hoist (single drum); Hydraulic breaking hammer (drop hammer); Kolman plant loader (oscillating grapple); Maintenance grease many Mixers; for stabilized base — self-propelled (cement mixer); Motor mixer; Pumps concrete or pavement grinder; post hole digger (truck or tractor mounted); Power auger (Hayward or similar); Pump 4" and over; Pump-cement or squeeze-cement; Road widener (front end of under or self-propelled); Shell loader (motorized); Snorkel (overhead arms); Roller; Trenching machine (digging capacity of 4 ft. or less); Tugger hoist; Vibrating drum; Wall drill; Well point system (submersible pumps when used in lieu of well-point system); Winch (motor driven); Winch cat; Winch truck

**Class 3:** Compressor (under 30% cu. ft.); Concrete paver or mixer (under 100); Concrete pavement spreaders and finishers (not automated); Conveyor (over 12 ft.); Electric submersible pump (4" and over); Form tractor with or without accessories; Flint grad machine (not automated); Fireman; Form tapper; Generator (2,500 watts and over); Hydraulic pump; Mechanical hoisters — more than two (2) mechanical hoister or any mechanical hoister or hoist whose combined output exceeds 500,000 BTU per hour (manufacturer's rating); Motorizing machine; Oilier; Power driving machine — 300 amp. and over (other than all electrical); One welding machine under 200 amp. will not require an engineer unless in a battery; Power hoistman (hay driller) Pump (under 4"); Bovine widener (road widener); Steam cleaner; or Scoby; Tractor with or without trowel accessories; post driver (truck or tractor mounted)

**Class 4:** Motor Mechanic

**Class 5:** Tower Crane

**Class 6:** Crane or Derrick with a boom length over 300 ft. including jib

**Class 7:** Crane or Derrick with a boom length over 150 ft. including jib, and on a pick-up driver with loads or boom length of over 100 ft.

**Class 8:** Quad 9 bulldozer or multibowl scraper

---

**Paid Holidays:**
- New Year's Day
- Memorial Day
- Independence Day
- Labor Day
- Thanksgiving Day
- Christmas Day

**Footnote:**
- Paid Holidays: A through F, provided the employee has worked the working day before and after the holiday.

### Truck Drivers: Heavy and Highway Construction:

- **Class 1**
  - Warehousemen, yardmen, truck helpers, pickups, panel trucks, flatbed material trucks, single axle dump trucks, dumpsters, material checkers and receivers, graders, truck tires, mechanic helpers and parts chaser.

- **Class 2**
  - Tandems, batch trucks, mechanics and dispatcher.

- **Class 3**
  - Semi-trailers, low-boy trucks, asphalt distributors, trucks, agitator, mixer trucks and dumpers, type vehicles, truck mechanic.

- **Class 4**
  - Specialized earth moving equipment - either type or similar off-highway equipment, where not self loaded, and straddle (ross) carrier.

- **Class 5**
  - Off-highway tandem back-dump, twin engine equipment and double hitched equipment where not self loaded.

NOTICES

DEPARTMENT OF STATE
Office of the Secretary
(Public Notice 641)

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976
Applications for Permits to Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) as amended (the “Act”) provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that a notice of receipt of all applications for such permits, a summary of the contents of such applications, and the names of the Regional Fishery Management Councils that receive copies of these applications, be published in the Federal Register.

Applications have been received from the Governments of Mexico, Korea and the Polish People’s Republic for fishing during 1979 and are reproduced herewith. Individual vessel applications for fishing during 1978 and 1979 have been received from foreign nations and are summarized herein.

If additional information regarding any application is desired, it may be obtained from: Permits and Regulations Division (F37), National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, (Telephone: 202-634-7265).

JAMES A. STOREL, Director, Office of Fisheries Affairs.

FEDERAL REGISTER VOL 43, NO. 222—FRIDAY, DECEMBER 1, 1978
CIVIL SERVICE COMMISSION

REGULATIONS SCHEDULED FOR REVIEW OR DEVELOPMENT, JANUARY 1, 1979 THROUGH JUNE 30, 1979
NOTICES

CIVIL SERVICE COMMISSION

CIVIL SERVICE COMMISSION REGULATIONS

Scheduled for Review or Development,
January 1, 1979, Through June 30, 1979

The following Civil Service Commission regulations are scheduled for review or development during the six month period from January 1, 1979, through June 30, 1979. The majority of the changes will result from enactment of the Civil Service Reform Act of 1978 (CSRA). Revisions which involve only the adoption of conforming language, e.g., the title Civil Service Commission to Merit System Protection Board or Office of Personnel Management, are not listed.

Comments or inquiries on this schedule should be referred to Beverly M. Jones, Issuance System Manager, Bureau of Policies and Standards, 202-632-6593.

JAMES C. SPRY,
Executive Assistant to the Commissioners.
Coverage and Definitions; Appointment through the Competitive System, Noncompetitive Appointment of Status, Prohibited Practices, Regulations, Investigation, and Enforcement, Exceptions from the Competitive System, General Prohibitions, Appointments to Overseas Positions, Executive Assignment System for Positions in Grades CS-16, 17, 18, of the General Schedule. Will be revised to reflect CSRA.

Under CSRA, some of the political activity functions will be transferred to the Special Counsel of NPSA. The corresponding regulations will be transferred and incorporated into new Special Counsel regulations being drafted. In view of time constraints resulting from prescribed activation date for Reform legislation as January 13, 1979, it appears that a 30-day notice and comment period will be followed (C.G. 12041 section 6(b)(6)).

General provisions and identification of positions in Schedules A, B, and C. Will be revised to conform with new requirements in CSRA.

Extensive revisions to implement internal reorganization (establishment of NPSA, OPRA) and CSRA.

Will be revised to reflect current judicial interpretations of the provisions of the Freedom of Information Act (5 U.S.C. 55).

Extensive revisions to implement internal reorganization, the CSRA, and changes necessitated by two years experience with the Privacy Act.

Employment practices. Sometimes approval in filling positions in GS-16 and above, eligibility, time-in-grade restrictions. Will be revised to conform to new requirements in CSRA.

Certification of the non-applicability of the technical validation standards of the Uniform Guidelines on Employee Selection Procedures in appeals that are not discrimination cases.

Eligibility standards processing applications, and selection in accepted service. To be revised to conform with new requirements in CSRA.

Requirements for overall career and career-conditional appointment, transfer, and conversion system, and probationary period. To be revised to conform with CSRA requirements.

Will be revised to include regulations on the conversion of Presidential Management Interns into the career service.

Purpose, authorizes for TAPPR temporary and term (one to four years) employment. Retention and separation of employees. To be revised to conform with CSRA requirements.

Recruitment, Selection and Placement (General) Employment priority lists, displaced employee program, positions restricted in preference eligibles, restrictions to protect competitive principles, prohibited practices. To be revised to conform with CSRA requirements.

General provisions, period of competition and eligibility, consideration for appointment. Will be revised to conform to CSRA. Specific changes not yet identified.

These mobility regulations were revised for other reasons and published in the Federal Register on November 14, 1978. We plan to incorporate the content that we receive from the November 14 publication of the mobility regulations along with the changes necessitated by Section 601 of the CSRA. Regulations will be published early in 1979. These regulations will probably be made effective upon publication pending comment.

</tr>
<tr>
<td>5 CFR 410.503</td>
<td>General restrictions, training through non-Government facilities</td>
<td>Pursuant to an explicit directive in the Government employees training law (5 U.S.C. 4118(b)), this regulation prohibits the use of non-Government training for promotion if there exists an already qualified person. We would provide an exemption from this prohibition if the employee is being trained in a program covered by 5 U.S.C. 5364. The law section 5364 of the code provides for remedial actions for employees who have suffered a no-fault loss of grade. One of the actions is to allow priority placement. Removing the restriction on the use of non-Government facilities for promotion for this group of employees will facilitate priority placement. The Office of Personnel Management has the authority to exempt a class of employees from a prohibition of the training law if it is in the public interest.</td>

### Additional New Regulations

- **P.L. 95-454, Civil Service Reform Act, Title IV**
  - New regulations to implement Title IV of the Reform Act, which establishes the Senior Executive Service. A variety of sections in 5 CFR will be amended to include appropriate references to the Senior Executive Service (SES). The new regulations will (a) cover the full range of operations under the SES, and (b) affect the conversion of positions and incumbents to SES. Specific areas which will be regulated: position management, appointment and placement systems, pay systems, performance evaluation, executive development, removal from SES for other than disciplinary reasons, leave accrual, and discontinued service retirement. | Sally Greenberg Jack Vincent 202/632-4648 |
- **P.L. 95-454 (CSRA), Section 310**
  - Minority Recruitment Program
  - New regulations. (To be developed after consultations with EEOC.) | Jim Scott 202/632-6899 |

[Fed. Reg. 78-33721 Filed 11-30-78; 8:45 am]
SUPPLEMENTAL MINE MAP REQUIRED FOR SMALL OPERATORS

Proposed Rulemaking
SUMMARY: The Office of Surface Mining Reclamation and Enforcement is seeking comments on the following proposed rule amending 30 CFR 715.11(c) to require additional information in mine maps submitted by small operators. The proposed amendment requires small operators to submit mine maps showing the furthest extent of areas mined as of the termination date of small operator exemptions, which will occur on or before January 1, 1979. This regulation is necessary both to protect the small operators and to enforce the Act. The added mine map feature is necessary to avoid penalizing small operators for noncompliance with the comprehensive interim regulatory program on those areas mined during the period of the exemption. Secondly, effective enforcement of the Act requires the regulatory authority to know exactly the areas covered by the small operator’s exemption for their clearance before it becomes final.

GAO REVIEW

As this regulation imposes reporting requirements, it must be submitted to GAO for their clearance before it becomes final.

§ 715.11 General obligations.

(c) Mine maps.

(2) In addition to the requirements of paragraph (c)(1) of this section, any person conducting surface coal mining and reclamation operations pursuant to a small operator’s exemption shall submit before March 1, 1979 or within two months after the expiration of the exemption, whichever is earlier, two copies of an accurate map of each mine showing the permit area at a scale of 1:6000 or larger. The map shall show, as of January 1, 1979 or the expiration date of the exemption, whichever is earlier, the lands from which coal has not yet been removed, the lands and structures which have been used or disturbed to facilitate mining, and the lands which have not been disturbed; these areas may be shown in a revision of the mine map submitted under paragraph (c)(1) of this section. One copy shall be submitted to the State Regulatory Authority and one copy to the appropriate Regional Director, OSM.

(Dated: November 28, 1978.

JOAN M. DAVENPORT,
Assistant Secretary,
Energy and Minerals.)

Federal Register, Vol. 43, No. 232—Friday, December 1, 1978
DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Office of the Secretary

AGE DISCRIMINATION
Regulations, Public Hearings
PROPOSED RULES

AGE DISCRIMINATION REGULATIONS

AGENCY: Office of the Secretary, HEW.

ACTION: Proposed rules.

SUMMARY: The Department of Health, Education, and Welfare proposes general regulations to carry out the provisions of the Age Discrimination Act of 1975, as amended (Act). After the Secretary issues final general regulations, each federal agency which provides federal financial assistance must publish proposed and then final specific regulations. Therefore, the general regulations are designed to guide the development of specific regulations by each appropriate agency.

The Age Discrimination Act of 1975 applies to persons of all ages and to all programs and activities receiving federal funds, not just to the elderly or solely to HEW programs. While the Act prohibits discrimination on the basis of age in programs or activities receiving federal funds, it permits some distinctions based on age.

DATES: Comments must be received on or before February 28, 1979. (For list of public hearings on this proposed rule, see FR Doc. 78-33743 in this part of this federal Register.)

FOR FURTHER INFORMATION CONTACT:

Ms. Bayla White (202) 245-6284.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In November 1975 Congress enacted the Age Discrimination Act (42 U.S.C. 6101 et seq.) as part of the Amendments to the Older Americans Act (Pub. L. 95-191). At that time, the express purpose of the Act was to prohibit unreasonable discrimination based on age in programs and activities receiving federal financial assistance, including revenue sharing funds under the State and Local Fiscal Assistance Act of 1972. However, the Act was also designed to permit federally assisted programs and activities, and recipients of federal funds, to continue to use: (1) some age distinctions, and (2) "reasonable factors other than age." The Act applies to persons of all ages.

Prior to the enactment of any regulations, the Act required the Commission on Civil Rights to conduct a study of age discrimination in federally funded programs and activities. The Commission transmitted its study to the President and the Congress on January 10, 1978. (Copies of the study are available from the Commission.) The Act also required the Secretary of HEW to permit each affected federal agency to respond to the Commission's findings or recommendations. (The response of each agency is available directly from that federal agency.)

After the receipt of the report of the Commission on Civil Rights and the federal agency responses to that report, the Congress considered amendments to the Age Discrimination Act of 1975. In October 1978, Congress amended the Act (Pub. L. 95-478). Among other things, Congress struck the word "unreasonable" from the statement of purpose clause. Therefore, the purpose of the Act now is to prohibit discrimination based on age in programs and activities receiving federal financial assistance, not unreasonable age discrimination. However, the Congress retained the exceptions to the prohibition against age discrimination. Thus, the Act still permits the use of: (1) some age distinctions, and (2) "reasonable factors other than age." The Act continues to apply to persons of all ages.

Under the 1975 version of the Act, no regulations could become effective before January 1, 1979. Moreover, the Secretary of HEW was required to publish proposed and then final general regulations, and thereafter the head of each agency which provides federal financial assistance was required to publish proposed and then final specific regulations. While the 1978 amendments changed the effective date of regulations from January 1, 1979 to July 1, 1979, they retained the provision for the publication of general regulations by HEW, and specific regulations by each agency which provides federal financial assistance, including HEW.

As the first step of its obligation to issue general regulations, on March 2, 1978, the Department published a Notice of Intent to Issue Age Discrimination Regulations (43 FR 9756). As the second step, the Department is issuing this notice of proposed rulemaking.

ORGANIZATION OF THE PROPOSED GOVERNMENT-WIDE REGULATIONS

These proposed regulations are divided into five subparts. Subpart A contains general provisions. Subpart B covers the basic question of what is age discrimination under the Act, and sets forth the prohibitions against age discrimination and the exceptions to those prohibitions. Subpart C describes the responsibilities of the federal agencies. Subpart D describes the responsibilities of recipient agencies, and contains the minimum standards for the establishment of compliance, investigation, conciliation and enforcement procedures by federal agencies. Subpart E provides for a comprehensive review of the general regulations and the specific regulations issued under the Act. The results of these reviews will be published in the Federal Register 30 months after the effective date of the regulations.

DISCUSSION OF MAJOR ISSUE

DISCRIMINATION ON THE BASIS OF AGE

In enacting the Age Discrimination Act, Congress expressed concern that some programs and activities receiving federal financial assistance may be discriminating against persons because of their age. Thus, the Act prohibits discrimination on the basis of age. For example, denying reimbursement for dental services to persons over a certain age, or restricting access to training opportunities solely because of age may constitute age discrimination. Moreover, some age distinctions may be based on nothing more than stereotypes and misconceptions about the abilities and needs of persons of different ages.

On the other hand, Congress did not prohibit the use of all age distinctions. Undoubtedly, this is a recognition of the fact that many age distinctions are rational and necessary in our society. For example, age based State compulsory school attendance requirements, or requiring that children under the age of 6 be accompanied by adults when entering a museum, or special housing arrangements for the elderly, or reduced bus fare for school children or the elderly, all may be permissible age distinctions which reflect efforts to meet the needs of particular age groups.

The passage of the Age Discrimination Act provides an opportunity to re-examine the use of age distinctions in federal programs and to eliminate those which result in discrimination against particular age groups. Because age distinctions in federally assisted programs are numerous and reflect many policy considerations, the task of prescribing general regulations on age discrimination is a difficult one. Moreover, other than the specific statutory exceptions to the prohibition against age discrimination, the Act and its legislative history provide little guidance concerning congressional intent regarding which age distinctions are permissible.

Despite the complexity and difficulty of the issues involved, and the lack of clear congressional guidance, the Department has proceeded, as re-
proposed regulations. However, in publishing these regulations, we are asking everyone with an interest in the matter to let us know which age distinctions seem rational and necessary and which are based on nothing more than stereotypes and misconceptions about the abilities and needs of persons of different ages. The Department specifically requests the public to identify uses of age which might not be prohibited by these regulations, but should be prohibited. The public is also requested to identify practices which may be prohibited by these regulations, but should not be prohibited.

SECTION ANALYSIS

Each section of the proposed rules is set out below, followed in some instances by a brief discussion and specific questions to which the public is encouraged to respond. The public is requested to specify the number of the section in the proposed regulations to which their comments refer. It should be noted that the examples used in the section analysis do not reflect the final legal opinions of the Department, but should be used to obtain public comment on the Department's proposed interpretations of the Age Discrimination Act.

Subpart A—General

§90.1 What is the purpose of the Age Discrimination Act of 1975? Text of the proposed rule: The Age Discrimination Act of 1975, as amended, is designed to prohibit discrimination on the basis of age in programs or activities receiving federal financial assistance. The Act is also designed to permit federally assisted programs and activities, and recipients of federal funds, to continue to use age distinctions and factors other than age which are reasonable in light of the purposes of the Act.

This paragraph states the purpose of the Age Discrimination Act. The Act applies to persons of all ages. It is designed to prohibit discrimination and to permit the use of: (1) some age distinctions, and (2) "reasonable factors other than age." In this regard, it is unlike Title VI of the Civil Rights Act of 1964 which contains no qualifications on its prohibition against discrimination on the basis of race, color, or national origin.

§90.2 What is the purpose of these regulations? Text of the proposed rule: (a) The purpose of these regulations is to state general, government-wide rules for the implementation of the Age Discrimination Act of 1975, as amended, and to guide each agency in the preparation of agency-specific age discrimination regulations.

(b) These regulations apply to each federal agency which provides federal financial assistance to any program or activity.

These rules are general regulations designed to implement the Age Discrimination Act of 1975, as amended. They will guide the preparation of specific regulations by each agency which provides federal financial assistance to programs or activities receiving federal financial assistance, including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221 et seq.).

§90.3 What programs and activities does the Age Discrimination Act of 1975 cover? Text of the proposed rule: (a) The Age Discrimination Act of 1975 applies to any program or activity receiving federal financial assistance, including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221 et seq.). (b) The Age Discrimination Act of 1975 does not apply to: (1) An age distinction contained in that part of a Option #1 Federal statute, State statute, local ordinance, or local regulation which: or Option #2 Federal statute, State statute, local ordinance, or local regulation which: or Option #3 Federal statute or State statute-which: or Option #4 Federal statute-which: (i) Provides any benefits or assistance to persons based on age; or (ii) Establishes criteria for participation in age-related terms; or (iii) Describes intended beneficiaries or target groups in age-related terms; or (iv) Any program or activity receiving federal financial assistance, including programs or activities receiving funds under the Comprehensive Employment and Training Act of 1974 (CETAF), as amended. (c) The Age Discrimination Act of 1975, as amended, covers some programs but excludes others from its coverage. For example, the Act covers any program or activity receiving federal financial assistance, including the State and Local Fiscal Assistance Act of 1972, the so-called Revenue Sharing Act. However, the Act does not cover programs or activities "established under authority of any law" which provide benefits on the basis of age or in age-related terms. Nor does it generally cover employment practices or labor-management joint apprenticeship training programs. (d) The Act does not cover programs or activities "established under authority of any law" which provide benefits on the basis of age or in age-related terms. Thus, age distinctions which are "established under authority of any law" are not prohibited by the Act.

The Department is faced with the difficult task of interpreting the phrase "established under authority of any law." Congress did not provide guidance on the meaning of this phrase; neither the reports of the House and Senate committees nor the record of floor debate contain any discussion of this statutory language.

Under the rules of statutory construction, it is possible to interpret the phrase "established under authority of any law" in many ways. Four alternative interpretations are included for comment in this proposed rule. There are two overriding issues in the interpretation of this phrase: (a) whether to include age distinctions contained in regulations; and (b) whether to include age distinctions contained by State and local legislative bodies.

Before we discuss the four alternative interpretations of the phrase "established under authority of any law," we should mention some examples of age distinctions contained in statutes and regulations. Examples include:

(1) Federal laws establishing age criteria for eligibility for services in various programs such as section 706(a) of the Older Americans Act which authorized nutrition projects for individuals 60 or older.

(2) State laws imposing age limitations regarding who may qualify for a driver's license.

(3) Local ordinances which allow the State, in the administration of its criminal justice system, to provide for different treatment of juveniles in terms of procedures, confinement, and other punishments.

(4) City or county ordinances which grant favorable property tax or utility rate treatment to the elderly.

(5) A local transit authority regulation which provides reduced bus fares for school children.

The way in which we interpret the phrase "established under authority of any law" will determine which of these examples will be covered by the Act. The options concerning the interpretation of the phrase present progressively narrower interpretations. An age distinction which falls within any one of the options discussed below will not be prohibited by the Act.

Under the first option, "established under authority of any law" is interpreted in a very broad manner to include Federal, State, and local statutes and ordinances and Federal, State, and local regulations. Although the line between local statutes and ordinances on the one hand and local regulations on the other is often difficult to draw, this first option is intended to afford equal deference to all officially-established age distinctions. Under
which must guide the interpretation of the phrase “established under authority of any law.” With respect to the inclusion of regulations within the phrase, some argue that federal, State, or local administrators of federally funded programs may be permitted to impose age distinctions which are not authorized by a legislative body. Yet, we know very little about age distinctions imposed by regulations. Some may be very reasonable and beneficial. The public is asked to comment on specific examples of age distinctions imposed by regulations and not authorized by statute or ordinance which should be protected in the interpretation of “any law,” and thus exempted from coverage under the Act.

With respect to State and local statutes or ordinances, some argue that limitations on the use of federal funds which are based on age only should be authorized by Congress. They contend that federal administrators and local and State governments should not deny access to federally aided services on the basis of age unless Congress has authorized the limitation or restriction. But, we know only a little about age distinctions used in federally supported programs which are imposed by State or local statutes, and many of these appear to be reasonable. These include compulsory school attendance requirements, driver’s license limitations, juvenile court systems, etc. Should federal funds to education, driver safety programs, or State law enforcement be put in doubt until a decision is made whether these age distinctions fall within one of the statutory exceptions in § 90.14?

The Department has also considered other options in addition to the four set forth in the text of the proposed rule—for example, exempting federal, State, and local statutes, and federal regulations. The Department is leaning toward Option #3 which would interpret the phrase “established under authority of any law” to mean federal statutes or State statutes. Comments are invited not only on the various interpretations described above, but also on other reasonable interpretations. Which interpretation would be the most effective in preventing age discrimination, but still preserve some flexibility for State and local government units, consistent with the intent and purpose of the Act?

EMPLOYMENT DISCRIMINATION

Generally, the Age Discrimination Act of 1975 does not cover employment discrimination age issues. The Age Discrimination in Employment Act of 1967, which is administered by the Department of Labor, will continue to be the principal tool for addressing age discrimination in employment practices for persons between the ages of 40 and 70. Included under the coverage of the Age Discrimination Act, however, are public service employment programs funded under the Comprehensive Employment and Training Act.

The Department wishes to avoid overlapping jurisdiction between the Age Discrimination Act of 1975 and the Age Discrimination in Employment Act of 1967. However, we also want to make certain that all employment-related programs and activities receiving federal financial assistance are covered by either the Age Discrimination Act or the Age Discrimination in Employment Act. We therefore propose that these regulations cover any program or activity, such as the College Work Study Program (42 U.S.C. 2751, et seq.) and the Work Incentive Program (42 U.S.C. 630, et seq.) which could be characterized as either the provision of federal financial assistance or an employment practice, unless that practice is clearly covered by the Age Discrimination in Employment Act. For example, the employment of staff such as doctors, nurses, administrators, by a large private hospital is clearly covered by the Age Discrimination in Employment Act and would not be covered by the Age Discrimination Act.

We solicit comments identifying specific areas of overlap and also specific problems, if any, which might be created by our interpretation of this exemption.

§ 90.4 How are the terms in these regulations defined?

Text of the proposed rule:

As used in these regulations, the term:

“Act” means the Age Discrimination Act of 1975, as amended, (Title III of Public Law 94-135).

“Action” means any act, activity, policy, rule, standard, or method of administration, including any agency policy, rule, standard, or method of administration.

“Age” means how old a person is, or the number of elapsed years from the date of a person’s birth.

“Age distinction” means any action using an age or age-related term.

“Age-related term” means a word or words which necessarily imply a particular age or range of ages (for example, “children,” “adult,” “older persons.”)

“Agency” means a federal department or agency that is empowered to extend financial assistance.

“Federal financial assistance” means any grant, entitlement, loan, contract (other than a procurement contract or a contract of insurance or guaranty), or any other arrangement by which the agency provides or otherwise makes available assistance in the form of:

FEDERAL REGISTER, VOL 43, NO. 232-FRIDAY, DECEMBER 1, 1978
(a) funds;
(b) services of federal personnel; or
(c) real and personal property or any interest in or use of property, including:
(1) transfers or leases of property for less than fair market value or for
reduced consideration; and
(2) proceedings from a subsequent
transfer or lease of property if the fed-
eral share of its fair market value is not
returned to the Federal Government.

"Recipient" means any State or its political subdivision, any instrumental-
ity of a State or its political sub-divi-
dion, any public or private agency, in-
stitution, organization, or other entity,
or any person to which federal finan-
cial assistance is extended, directly or
through another recipient. Recipient
includes any successor, assignee, or
transferee but excludes the ultimate
beneficiary of the assistance.

"Secretary" means the Secretary of
Health, Education, and Welfare.

The above definition section war-
rants no discussion here. However, pub-
lic comments or suggested addi-
tions to the list are welcome and will
be considered.

Subpart B—What Is Age Discrimina-
tion?

§ 90.11 Purpose of this subpart.

Text of the proposed rule:
The purpose of this subpart is to set
forth the prohibitions against age dis-
crimination and the exceptions to
those prohibitions.

No discussion is necessary on this
section, but public comments are wel-
come and will be considered.

§ 90.12 Rules against age discrimina-
tion.

Text of the proposed rule:
The rules stated in this section are
limited by the exceptions contained in
sections 90.13, 90.14, and 90.15 of these
regulations.

(a) General rule.
No person in the United States shall,
on the basis of age, be excluded from
participation in, be denied the benefits
of, or be subjected to discrimination
under, any program or activity receiv-
ing federal financial assistance.

(b) Specific rule.
A recipient may not, in any program
or activity receiving federal financial
assistance, directly or through con-
tractual, licensing, or other arrange-
ments use age distinctions or take any
other actions which have the effect,
on the basis of age, of:
(1) Excluding individuals from, deny-
ing them the benefits of, or subjecting
them to discrimination under, a pro-
gram of activity receiving federal fi-
nancial assistance, or
(2) Denying or limiting individuals in
their opportunity to participate in any
program or activity receiving federal
financial assistance.

(c) Reservation.
The specific forms of age discrimina-
tion listed in paragraph (b) of this sec-
tion do not necessarily constitute a
complete list.

The Age Discrimination Act of 1975,
as amended, contains a prohibition
against age discrimination. However,
this prohibition is limited by the ex-
ceptions discussed below in §§ 90.13,
90.14, and 90.15. It should be remem-
bered that this prohibition is also lim-
lited in another way. That is, age dis-

tinctions which are "established under
authority of any law" are not covered

by the Act and hence do not fall
within the prohibition against age dis-
crimination. [See discussion of § 90.31] 

Section 90.12 sets forth the prohibi-
tion against age discrimination. The
general rule containing the prohibition
on age discrimination is based directly
on section 303 of the Age Discrimina-
tion Act. The specific rule which inter-
pret the prohibition depart from the list
of express prohibitions of discrimina-
tion found in regulations for Title
VI of the Civil Rights Act of 1964 (45
CFR Part 80) in that they do not in-
clude an absolute prohibition on sepa-
rate or different treatment on the
basis of age. As a general rule, sepa-
rate or different treatment which

denies or limits services from, or par-
ticipation in, a program receiving fed-
eral financial assistance would be pro-
hibited by these regulations. On the
other hand, if a program or activity
qualifies for an exception, this fact
that it limits service through separate
do not necessarily constitute a
basis of age would not invalidate it. Similarly,
separate or different treatment de-
signated to meet the special needs of
persons in a particular age group may
qualify for an exception under these
regulations.

§ 90.13 Definition of "normal op-
eration" and "statutory objective.

Text of the proposed rule:
The terms "normal operation" and
"statutory objective" are important to
an understanding of the statutory ex-
ceptions to the prohibition against age
discrimination. Therefore, for pur-
poses of §§ 90.14 and 90.15, the terms
"normal operation" and "statutory ob-
jective" shall have the following
meaning:
(a) "Normal operation" means the
operation of a program or activity
without significant changes that
would impair its ability to meet its ob-
jectives.
(b) "Statutory objective" means any
purpose of a program or activity
expressly stated in a statute for reason-
ably inferred from its provisions or
legislative history.

These definitions are intended to
further define the meaning of some of
the key terms in §§ 90.14 and 90.15.

"Normal operation" is defined in a
way that does not require a program
to make significant changes in its op-
eration that would impair achieve-
ment of its objectives. At the same
time, a change that merely disturbs
administrative routine or convenience
would be required.

We have set forth alternative inter-
pretations of "statutory objective." In
one alternative, "statutory objective" is
defined to include any purpose either
expressly stated in the statute or
reasonably inferred from its provi-
sions or legislative history. This is the
Department's preferred interpreta-
tion. The other alternative definition
limits "statutory objective" to any
purpose expressly stated in the statu-
tute. The mere fact that an administra-
tive action has a worthy program pur-
pose would not by itself bring it within
either definition.

§ 90.14 Exceptions to the rules against
age discrimination. Normal oper-
ation or statutory objective of any
program or activity.

Text of the proposed rule:
A recipient is permitted to take an
action, otherwise prohibited by §90.12,
if the action reasonably takes into ac-
count age as a factor necessary to the
normal operation or the achievement
of any statutory objective of a pro-
gram or activity. An action reasonably
takes into account age as a factor nec-

esary to the normal operation or the
achievement of any statutory objec-
tive of a program or activity, if:
(a) Age is used as a measure or ap-
proximation of one or more other char-
acteristics (e.g., maturity);
(b) The other characteristic(s) must
be measured or approximated in or-
der for the normal operation of the pro-
gram or activity to continue, or to
achieve any statutory objective of the
program or activity;
(c) The other characteristic(s) can
be reasonably measured or approxi-
mated by the use of age; and
(d) The other characteristic(s) are
difficult, costly, or otherwise impracti-
cal to measure directly.

Section 90.14 implements two statu-
tory exceptions to the general prohibi-
tion on age discrimination contained in
§ 90.12 of the regulations. According
to § 364(b)(1)(A) of the Act, use of an
age distinction is permitted if it is nec-

esary to the normal operation of a
program or activity, or if it is nec-

essary to achieve any statutory objective
of a program or activity. Paragraphs
(a) through (d) of § 90.14 set forth rules
for determining whether the use of an
age distinction is necessary to the

normal operation or the achievement

any statutory objective of a program or activity.

To qualify for an exception within this section: (a) an age distinction must be used as a proxy for, or as a measure of, some other (non-age) characteristic (such as physical maturity or susceptibility to certain kinds of diseases); (b) the other characteristic must be necessary for "normal operation" or for the achievement of a "statutory objective;" (c) the other characteristic can be reasonably approximated by age; and (d) it is impractical to use the other characteristic directly (because, for example, it would be too difficult to determine physical maturity on an individual basis).

The Department has had difficulty identifying any age distinction which is not being used as an approximation for or a measure of some other characteristic. The Department requests the public to identify instances where age is not used as a proxy, directly or indirectly, for another characteristic.

In determining whether an age distinction qualifies for one of the exceptions, it may be relevant that as a matter of policy, the age distinction may not rigidly be applied but permits a person, upon a proper showing of the necessary characteristic to participate in the activity or program even though he or she would otherwise be barred by the age distinction. Thus, other things being equal, an age distinction is more likely to qualify under one of the statutory exceptions if it provides for flexibility rather than automatically barring all those who do not meet the age requirement.

The following examples illustrate how the exceptions contained in § 90.14 of the regulations might be applied.

**AGE AS A FACTOR NECESSARY TO THE NORMAL OPERATION OF A PROGRAM OR ACTIVITY**

(1) The Head Start Program, 42 U.S.C. 2938, provides comprehensive health, nutritional, educational, social and other services for children who have not reached compulsory school age, but does not specify a lower age limit for participation. The nature of this preparation requires that children who participate have attained a certain level of physical, emotional, and mental maturity. While it is difficult and expensive to measure emotional, intellectual and physical maturity, age 3 appears to be reasonably related to this level of maturity. Therefore, the policy of generally limiting Head Start participation to children who have attained age 3 would appear to be allowed under this exception. By limiting participation in Head Start to those children who have reached age 3, a recipient of federal funds may be reasonably taking age into account as a factor necessary to the normal operation of the Head Start program.

(2) Many recreation programs use age distinctions in establishing different sports leagues. For example, football and soccer leagues often involve three or more groupings for children of different ages. The purpose of these distinctions is to equalize competition (and sometimes to promote safety) by grouping children of like coordination, size, strength, and experience. Age is an indicator of physical maturation of children. By placing a child or adult in his or her appropriate age group in a sports league, a recipient can account as a factor necessary to the normal operation of a sports league. Unless significant program changes are made, admission of a 10 year old child into a football league or 14 year old teenagers may impair a recipient's ability to meet its objectives of equalizing competition and promoting safety. The Department invites comments on this issue.

**AGE AS A FACTOR NECESSARY TO ACHIEVE A STATUTORY OBJECTIVE OF A PROGRAM OR ACTIVITY**

(1) Title XIX of the Social Security Act authorizes an Early and Periodic Screening, Diagnosis and Treatment program (EPSDT) for the detection and prevention of disease in children. The use of a "periodicity" schedule under this program which provides for higher frequency of examinations for younger than five year olds would be permissible if it could be shown that the schedule served to achieve the statutory objectives of detecting and preventing disease and of serving the best medical interests of Title XIX beneficiaries.

(2) A breast cancer screening program funded under section 409 of the Public Health Service Act could limit its services by age to women over 50 years old. This would appear to be permissible because age is a proven indicator of the risk of breast cancer, and the objective of the program is the prevention, diagnosis and treatment of cancer.

(3) Section 222(d)(1) of the Social Security Act requires that payment from the Trust Fund for the cost of vocational rehabilitation services for disabled individuals receiving benefits from the Disability (Start Fund) be "based upon the effect that the provision of such services would have upon the Trust Fund." Disabled individuals are by law taken off the Disability Insurance, Disability (Start Fund) rolls at age 65. To achieve the statutory objective of savings to the Trust Fund, individuals who are selected should have the potential to work long enough after the completion of their rehabilitation to return to the Trust Fund. It is difficult to predict this potential on an individual basis and there is evidence that age is related to this potential. The Department solicits comments on whether a policy of granting an exception as defined in section 90.14 for most types of vocational rehabilitation services to individuals who have not yet reached a certain age (e.g. 62) would appear to be allowed under this exception.

One last question needs to be addressed with respect to the exceptions contained in § 90.14. Under what circumstances can organizations which are designed to serve particular age groups and which are often recipients or used by recipients to administer or conduct some federally assisted programs, continue to use age distinctions? Some of the organizations, for example, Junior Chambers of Commerce, or senior citizen's clubs may restrict membership or service by age. Under these proposed regulations, if these organizations receive federal financial assistance, they can continue to impose age restrictions if they are able to qualify for an exception as defined in section 90.14. The Department invites comments on whether the regulations should contain additional clarification or alternative tests for this type of organization.

§ 90.15 Exceptions to the rules against age discrimination. Reasonable factors other than age.

A recipient is permitted to take an action otherwise prohibited by § 90.12 which is based on a factor other than age, even though that action may have a disproportionate effect on persons of different ages. However, the factor must bear a [rational/direct/substantial] relationship to the normal operation of the program or activity or to the achievement of a statutory objective.

This exception refers to a situation in which a distinction is based on some factor other than age (such as poverty, physical strength or health status) and produces participation rates or other effects which differ among particular age groups. Under this exception, differential age effects standing alone do not constitute discrimination.

Even in the complete absence of age discrimination, colleges, day care centers, parks, and virtually all institutions may exhibit wide variations in the proportions served of each age. However, variations in the proportions...
of persons served of each age, standing alone, do not constitute age discrimination.

The Department has set forth alternative interpretations of this exception. However, we believe that Congress intended this exception to be a less rigorous one, particularly because the statute does not require that factors other than age be "necessary" to anything, but only that they be "reasonable." Therefore, the Department's preferred interpretation is: "bears a rational relationship" to statutory objectives or normal program operations. This interpretation would allow using a test similar to the "rational relationship" test applied by the courts to categorical classifications challenged under the Equal Protection Clause of the Fourteenth Amendment to the United States Constitution.

Use of the word "direct" or "substantial" or "necessary" would result in a stricter reading of this exception. Hence, many "factors other than age" having a differential impact on persons of particular ages might not be permitted to continue under a stricter interpretation of the exception.

The Department requests comment on whether the interpretation of this exception should be adopted.

The following examples illustrate this exception:

(1) Some training programs may use standard physical fitness tests as a factor in interpreting job qualifications to determine eligibility for admission and to the extent, their use may not be strictly "necessary" to the selection of qualified students. On the other hand, use of test scores may favor younger applicants over older applicants because, on the average, younger people are more used to being tested. However, since test scores may predict academic success, test scores may bear a "rational," "substantial," or "direct" relationship to the selection of qualified students.

THE EXCEPTIONS AND COST-BENEFIT CONSIDERATIONS

One of the critical questions which must be addressed with respect to the interpretation of the statutory exceptions to the general prohibition against age discrimination is whether cost-benefit considerations can justify age distinctions or "reasonable factors other than age." A cost-benefit consideration is one which reflects a balancing of the costs associated with any particular action and the benefits which may reasonably be expected from the action. In its study of age discrimination in federally funded programs and activities, the Civil Rights Commission reported that some program administrators justify imposing age restrictions, stating that limited programs are better than none, and that not all eligible persons can be served. For example, a program administrator might contend that it is appropriate to use the limited funds available in an adult literacy program for persons under 25 years of age because they will live longer and thus will be better able to repay society for the cost of the literacy program.

A cost-benefit consideration would not be justified if the age distinction did not reflect a statutory objective or normal program operations and objectives, and would not be allowed or disallowed simply because it reflects cost-benefit considerations.

Several examples will illustrate these principles. The use of a periodic medical examination schedule in the EPSDT program (see example under "age as a factor necessary to achieve a statutory objective of a program or activity") reflects an age-sensitive cost-benefit consideration, but would appear to be justified because it can be shown that such a schedule enhances the attainment of the statutory objective of prevention of disease.

A more difficult example is that of a medical school which does not accept applicants over a certain age because of the high cost of medical education and the more limited period of active medical service that can be expected from an older medical school graduate. This age limitation, however, would appear to violate the Act, since the age distinction is probably not necessary to the school's normal operation or to a statutory objective. Denial of research awards to persons over age 70 would likewise appear to be prohibited, since it is not necessary to the normal operation of a research program. If the desired aim of the program is to prevent project disruption through retirement, that aim can be achieved without resort to an age limitation by simply requiring the investigator to remain for the duration of the project as a condition of the award.

While cost-benefit considerations may be reflected in "reasonable factors other than age" (§90.15), those factors would not be allowed or disallowed simply because they reflect cost-benefit considerations. For example, the Vocational Rehabilitation program might take into account the likelihood of physical therapy succeeding with stroke victims in determining the future employment potential of applicants for services. However, the program probably could not deny services on the grounds that employers are likely to discriminate. Similarly, a decision to limit a new vaccine in short supply to those most physically vulnerable and hence most likely to develop the disease would probably be justified even though it tends to favor aged persons and infants over teenagers and adults.

The Department invites comments on these principles and the specific situations to which they might apply, including the examples cited above and other examples. It particularly seeks any alternative formulations which might better specify the appropriate role of cost-benefit considerations in justifying age distinctions or actions based upon reasonable factors other than age.

SERVICES RENDERED UNDER AGE-TARGETED PROGRAMS

Federal funds sometimes support similar programs for the general population and for a specific age group. One of the more difficult questions posed by the presence of age-specific programs is how or whether the presence of the age-specific program affects the obligation of the general program to seek out and serve those eligible for the special program. For example, if an elderly public school in rural Kentucky has a nutrition program under Title VI of The Older Americans Act (i.e. those over 60)? Does a general hospital receiving federal funds curtail its services to children on the grounds that a federally-funded pediatric program exists at a nearby neighborhood health center? Or, if there is a nutrition program under Title VI of The Older Americans Act in an area, what is the obligation of a nutrition program under Title XX of the Social Security Act which serves the same area? Can the program refuse to serve those eligible for the Title VII program (i.e. those over 60)? Does a general program fulfill its obligations by referring applicants to the age-specific program? Can the general program launch outreach efforts targeted on those not eligible for the age-specific program? As the regulations are currently drafted, these practices are sanctioned only if, and to the extent, they meet one of the exceptions in

FEDERAL REGISTER, VOL. 43, NO. 223—FRIDAY, DECEMBER 1, 1978
§ 90.14 Public comments are solicited on this issue.
§ 90.16 Burden of proof.

Text of proposed rule:
The burden of proving that an age distinction or other action falls within the exceptions outlined in §§ 90.14 and 90.15 is on the recipient of federal financial assistance.

This rule is proposed in the belief that the recipient (rather than the complainant) is the party most knowledgeable about its program or activity, the normal operation of the program or activity, and any statutory objective by which it might be governed. The recipient is best able to demonstrate that an age distinction or factor other than age is entitled to an exception under §§ 90.14 or 90.15.

Subpart C—What Are the Responsibilities of the Federal Agencies?

§ 90.31 Issuance of regulations.

Text of the proposed rule:
(a) The head of each agency which extends Federal financial assistance to any program or activity shall publish proposed and final age discrimination regulations in the Federal Register to:
(1) Carry out the provisions of Section 303 of the Age Discrimination Act of 1975; and
(2) Provide for appropriate investigative, conciliation, and enforcement procedures.
(b) Each agency shall publish its proposed age discrimination regulations no later than 90 days after the publication date of the final general, government-wide age discrimination regulations. The final specific regulations shall be consistent with these general, government-wide age discrimination regulations and shall not become effective until they meet all requirements of the Act.
(c) Each agency shall publish final agency regulations no later than 120 days after publication of proposed agency age discrimination regulations.
(d) Age discrimination regulations shall be updated at least once every 2 years, and each agency is required to submit a report in the Federal Register describing the reasons for any such update.
(e) Each agency shall include in its regulations a provision governing the operation of an alternate funds disbursement procedure as described in § 90.47 of these regulations.
(f) Each agency shall publish an appendix to its final age discrimination regulations containing a list of each age distinction provided in a federal statute or regulation which affects the agency's programs of federal financial assistance.

Subpart C describes the responsibilities of federal agencies. Section 90.31 concerns responsibilities for the issuance of agency-specific age discrimination regulations. Among other provisions, these agency regulations must contain appropriate investigative, conciliation and enforcement procedures. They must also include a provision allowing for the distribution of federal agency funds to another entity in the event that a recipient is found to have violated the Act. According to the 1978 amendments to the Act, the head of each agency has discretion to award funds to another organization after an administrative law judge or a hearing examiner or a court has found a recipient to be in violation of the Act.

Moreover, in order that recipients of federal financial assistance and the public might learn which age distinctions are authorized by federal statutes or regulations, each agency is required to append to its final age discrimination regulations a list of all age distinctions contained in statutes or regulations which govern the agency's programs of federal financial assistance. These time frames are established under § 90.15 of the Age Discrimination Act. The results of the review conducted under paragraph (a) of this section:
(1) A list of the age distinctions contained in regulations which are to be continued;
(2) A list of the age distinctions contained in regulations which are to be eliminated;
(3) A list of the age distinctions not contained in regulations but which will be adopted by regulation in order to remain in use;
(4) The justification for each age distinction to be continued; and
(5) A list of the age distinctions to be eliminated.

(c) An agency may not continue an existing age distinction, nor impose a new age distinction, 12 months after the publication of its age discrimination regulations, unless the age distinction is adopted by regulation under the Administrative Procedure Act.

This section of the proposed regulations requires each agency to review its regulations, policies, and administrative practices which govern the programs to which it provides assistance. Each agency shall identify age or age-related terms used in its programs which are permissible under the Act and under the agency's own age discrimination regulations. The results of the review must be reported in the Federal Register for public comment no later than 12 months from the date the agency publishes its final regulations. However, the agencies are encouraged to complete this report as soon as possible after the issuance of their final regulations. The report must contain the results of the review, and a list of the age distinctions to be continued and those to be eliminated. All age distinctions to be continued...
thereafter must be imposed by regulation and must be authorized either by a federal statute or by one of the exceptions in § 90.14. This means that if an agency intends to continue to use an age distinction previously imposed by act or regulations, each policy manual, it must include that age distinction as part of a regulation published in the Federal Register. This review, required by section 90.32, is designed to have each agency examine closely its own practices. The question to be asked is not simply what is the agency doing, but whether the age distinctions are permissible at all.

The Department is requiring this review of agency regulations, policies, and administrative practices so that recipients and subrecipients of federal financial assistance will know which age distinctions may be used in their own programs or activities. Moreover, this review will enable recipients to complete the self-evaluations required under § 90.49(c) of these regulations.

§ 90.33 Interagency cooperation.

Text of the proposed rule:

Where two or more agencies provide federal financial assistance to a recipient or class of recipients, their regulations shall provide for a single compliance and enforcement procedure. Their regulations shall also designate one of the agencies as the sole agency for all compliance and enforcement purposes with respect to those recipients, except the ordering of termination of funds and notification of the appropriate committees of Congress.

The purpose of this proposed rule is to stimulate public comment with respect to eliminating the possibility that recipients will receive conflicting instructions and directives from different federal agencies on matters of compliance and enforcement. It is proposed that federal agencies which administer programs to a recipient or class of recipients for similar or related purposes designate one of the agencies as the "lead agency." The lead agency would have responsibility for all compliance and enforcement activities with respect to a particular class of recipients (e.g., educational institutions; neighborhood health centers), except for the actual termination of funds and the notification to Congress of that termination. Under the Act, only the agency administering funds may terminate them. Therefore, the termination of funds and notification to Congress would remain the responsibility of each federal agency. The use of a lead agency procedure means that a recipient would deal only with one agency for enforcement. However, it also means that the primary enforcement agency would have to be familiar with the operation of other agencies' programs in order to enforce the Age Discrimination Act.

The Department solicits comments on the wisdom and feasibility of this proposed rule. Should this proposed rule be retained in the final general, government-wide age discrimination regulations? Is there a need for coordination of compliance and enforcement activities under the Act? Will the lead agency approach provide the needed coordination? What specific classes of recipients should be grouped for assignment to a lead agency? Which agency should be designated the lead agency for specific classes of recipients? Will the lead agency concept be too difficult and confusing to implement?

§ 90.34 Agency reports.

Text of the proposed rule:

Each agency shall submit to the Secretary not later than December 31 of each year, beginning in 1979, a report which:

(a) Describes in detail the steps taken during the preceding fiscal year to carry out the Act.

(b) Contains data on the frequency, type, validity, and resolution of complaints and on compliance reviews sufficient to analyze the agency's progress in reducing age discrimination in its programs.

(c) Contains data directly relevant to the extent of any pattern or practice of age discrimination which the agency has identified in any of its programs, and to progress toward eliminating it; and

(d) Contains evaluative or interpretative information which the agency determines is useful in analyzing agency progress in reducing age discrimination in its programs.

The Community Health Centers program, which provides ambulatory health care for persons without financial or physical access to private medical care, illustrates both the complexity of the problem and the potential for expensive data collection. Each center's utilization is affected by many factors, including its location in relation to housing and transportation, its location in relation to other health providers, the varying need for health care among different age groups, and the availability of financing for private health care for certain age groups provided by programs such as Medicare and Medicaid.

Which age groups use a health center will also be influenced by services it offers and which services are available from other sources. For example, if a State has especially large
and active Maternal and Child Health and Early and Periodic Screening, Diagnosis and Treatment programs, then the proportion of children served in its community health centers may be lower than a comparable group of children served in centers in another State. Similarly, if a local hospital has a glaucoma testing program, then a nearby center might decide to refer patients to this service rather than offer it directly. This practice may lead to a reduction in the number of older persons served.

There are many different indicators to describe the utilization of a health center: total number of persons served; number of persons who use the center regularly; number who use each service; amount spent per client; and, "success" rates. An analysis of these indicators could show different patterns of participation, by age, since different age groups have different needs for health services. The cost of collecting all the relevant data by age could easily reach $20,000 (or more) per year per center. There are about 570 such centers; the total cost for this one program could therefore reach several million dollars annually. Even with these data, it is doubtful that any firm conclusions about age discrimination could be reached, since many other factors could account for variations in the use of services within and among the centers.

In view of these problems, the Department is proposing a targeted approach to data collection and analysis, both to maximize the opportunity to measure and analyze actual progress in complying with the Act and to minimize unnecessary data collection. That approach consists of five elements.

First, each agency must describe the steps taken to implement the Act. This report is to be prepared annually. Second, the Department proposes to require that complaint data be extensively analyzed. Complaint data, particularly when supplemented by other sources of compliance information, can serve to identify systematic patterns of discrimination, as well as isolated cases of discrimination. For example, even though only a fraction of those eligible to participate in a particular program file complaints follow-up on even one complaint could expose a pattern or practice of discrimination of a particular type which a comprehensive reporting system would never detect. Not only can the analysis of complaint data (supplemented by compliance reviews and in-depth investigations, as appropriate) be more effective than massive reporting systems, it would involve minimal cost, since the complaint process is a necessary enforcement step which would already exist.

Third, the Department proposes that each agency collect, where necessary, data on particular recipients linked to particular patterns or practices of discrimination revealed by complaints, compliance reviews, or in-depth investigations. For example, if it were found that health centers in a particular program repeatedly refuse to hire women or discriminate in pay, the Department could identify the problem, take steps to correct it, and monitor the progress of the program in changing its policies.

Fourth, the proposed approach gives the Department authority to collect additional information which the agency believes is useful in reporting its progress in reducing age discrimination. This could include, depending on the circumstances, sample surveys, one day data collections, special evaluation studies, data gathered as part of in-depth compliance reviews, and analysis of data already collected under existing reporting and evaluation systems. Finally, under the proposed rule, the Secretary may specify additional data requirements whenever the situation warrants.

The Department solicits public comment not only on the proposed approach to data collection, but also on other alternatives such as the following:

(a) Would a requirement for submission of self-evaluation of recipients employing 15 or more employees under section 90.43(c), and the review by the agency of the recipient’s self-evaluation report and of age distinctions be useful in meeting the new reporting requirement?

(b) Would age-specific data generated by federal monitoring under section 90.48, and by additional evaluation studies which HEW or other agencies may determine are necessary, meet the new reporting requirement?

(c) If it were deemed necessary to institute in-depth, program-wide data collection requirements covering not only overall national participation by recipie...
The proposed rules require each recipient to identify and justify those allegations of age discrimination. However, the Department expects each recipient to consult the review of agency policies, rules, and administrative practices required under §90.32 of these regulations before completing its written self-evaluation. Each recipient must make certain that it is not using any age distinction unless that distinction is "established under authority of any law," or authorized by the regulations of the federal agency providing the federal assistance, or unless that distinction falls within one of the exceptions contained in §90.14. The Department proposes an 18-month period for the self-evaluation. Each agency must outline not only the requirements, procedures, and rights under the Act and under agency regulations. Each recipient has the responsibility to inform its subrecipients about compliance with the Act. The educational materials described in §90.45(b)(3) must outline not only the rights and obligations of recipients, but also of beneficiaries. They should also inform beneficiaries about the regulations and indicate how to file an age discrimination complaint.

Text of the proposed rule:

(c) Self-evaluation. (1) Each agency extending federal financial assistance to recipients employing 15 or more persons shall require each recipient to complete a written self-evaluation of its compliance with the Act within 18 months of the effective date of the regulations. (2) Each recipient's self-evaluation shall identify and justify those age distinctions imposed by the recipient. (3) Each recipient shall take corrective and remedial action whenever a self-evaluation indicates a violation of the Act. (4) Each recipient shall make the self-evaluation available on request to the agency and to the public for a period of 3 years following its completion. Self-evaluation imposes upon recipients a primary responsibility for ensuring compliance with the Act. It is envisioned that these evaluations will be simple and straightforward. Detailed legal analysis or empirical research will rarely, if ever, be necessary. Any single age distinction can normally be analyzed in a page or less. Where no age distinctions are proposed, the self-evaluation need merely state this fact. The Department also believes that the requirement to complete the self-evaluation should be uniform across federal agencies in order to avoid imposing conflicting and multiple requirements upon recipients.

Mediation of complaints. Each agency shall promptly refer all complaints alleging age discrimination to the Department, except as required by law. The Department invites comments with respect to the appropriateness of this filing procedure.

The introduction of mediation as the first step in the resolution of age discrimination complaints is an attempt to apply established informal dispute resolution to a federal administrative enforcement process. The purpose of this innovation is to provide faster and more creative resolution of complaints through informal methods of dispute resolution. This, in turn, will mean less delay in resolving
Both complainants and recipients can achieve resolution of their complaint. The proposed mediation process is an effort to achieve compliance with the Act while avoiding the harmful effects of bureaucracy, paperwork, excessive formality, and reliance on the adversary process. These factors have led to a large backlog of cases under other civil rights statutes and thus denied swift and fair resolution of charges of discrimination. There are several major elements of the process. First, the process will be supervised by a trained mediator. We are proposing that the mediator have the authority to terminate the mediation if the process appears to have broken down. The mediation will last either for 60 or 90 days. (See §§ 90.43(b) and (d).) The process is intended to provide a forum for the exchange of views, for the facts to be examined, and for the parties to reach a settlement. The alternative would be to have each federal agency design and staff its own mediation service. The alternative might lead to a large backlog of cases under the Age Discrimination Act.

Use of the Federal Mediation and Conciliation Service to manage the mediation process for all agencies would introduce several major elements of the process. It would also promote a more acceptable method for handling this type of complaint. It would also be valueable to have the benefit of any experiences which might indicate the incidence of age discrimination complaints being coupled with discrimination complaints under other civil rights authorities.

After 30 months, the Department would evaluate the government-wide experience under the mediation process in accordance with section 90.61 of these regulations. At that time we would examine a number of questions, including: How many complaints were referred to mediation? How many complaints were resolved during the mediation process? How much time did it take to resolve a complaint through mediation? Were the complainant and the recipient satisfied with the solution? Are complaints resolved faster through the use of mediation? Did the solutions accepted by both parties meet the requirements of law with respect to the prohibition against age discrimination?

The Department solicits comments on the following major questions raised by its proposed informal resolution procedure:

- How effective is the mediation process likely to be and how can it be made more effective? Should it be tried on an experimental basis for 30 months? The Department specifically requests suggestions on alternative means of effectively settling disputes.
- What are the problems associated with obtaining suitable mediators and how can they be solved? Should the mediation step be mandatory?
- Is it reasonable to expect complainants and recipients to pay their own expenses in connection with the mediation process?
- What existing sources of funds or volunteer assistance are available from State and local governments and private organizations to reduce any cost burden for individual complainants and recipients?
- Should one agency manage the mediation process, or should some or all agencies develop their own mediation capacities?
- Is the Federal Mediation and Conciliation Service using specially trained staff and community mediators, an appropriate and acceptable agency to manage the mediation process for all Federal agencies?

To further the goal of efficient resolution of complaints, the Department and the Office of Management and Budget are considering assigning the administration of the mediation process for all federal agencies to the Federal Mediation and Conciliation Service. The Service would recruit and train mediators either from among its own staff or from the community. The Service would also examine a number of questions, including: How many complaints were referred to mediation? How many complaints were resolved during the mediation process? How much time did it take to resolve a complaint through mediation? Were the complainant and the recipient satisfied with the solution? Are complaints resolved faster through the use of mediation? Did the solutions accepted by both parties meet the requirements of law with respect to the prohibition against age discrimination?
tigation. It is anticipated that this step will not be excessively time consuming and that a federal enforcement presence (in cases where no mediation has not been successful) will improve the prospects for complaint resolution.

The investigation of the complaint will begin, during the initial investigation step, to establish the basis for a finding of compliance or noncompliance. However, in keeping with the statutory requirement that the agency seek voluntary compliance, and consistent with the regulations' objective of avoiding excessive paperwork and bureaucratic procedure, the agency should encourage informal settlement through voluntary compliance by a recipient or voluntary withdrawal of the complaint. When informal settlement is not possible or appropriate, the agency will proceed to formal investigation.

Text of the proposed rule:

(5) Formal investigation, conciliation, and hearing. If the agency cannot resolve the complaint during the early stages of the investigation, it shall:

(i) Complete the investigation of the complaint.

(ii) Attempt to achieve voluntary compliance satisfactory to the agency, if the investigation indicates a violation.

(iii) Arrange for enforcement as described in §90.46, if necessary.

If the investigation is not resolved during the initial investigation the agency must formally investigate the complaint. If a full-scale investigation indicates that the complaint is valid, the agency must still attempt to persuade the recipient to comply voluntarily with the Act. If voluntary compliance cannot be obtained, enforcement, as provided for by §90.46, must begin. The Department invites comments on whether there should be a specified time period for initial investigation, such as 60 or 120 days, after which formal investigation, conciliation and enforcement would be mandatory.

§90.44 Compliance reviews.

Text of the proposed rule:

(a) Each agency may provide in its regulations for the conduct of compliance reviews, pre-award reviews, and other similar procedures which permit the agency to investigate, and correct, violations of the Act without regard to its procedures for handling complaints.

(b) If a compliance review or pre-award review indicates a violation of the Act, the agency shall attempt to achieve voluntary compliance with the Act. If voluntary compliance cannot be achieved, the agency shall arrange for enforcement as described in §90.46.

The compliance process is not the only method by which an agency may enforce the Act. The agency may also use compliance reviews, pre-award reviews, and other similar methods. Depending on a variety of factors, including the requirements of the methods adopted, complaints may represent either a larger or smaller element of the overall agency enforcement process. Should these compliance methods prove to be mandatory or should they remain optional with each agency as now proposed?

§90.45 Information requirements and prohibition against intimidation or retaliation.

Text of the proposed rule:

An agency shall provide in its regulations a requirement that the recipient:

(a) Provide to the agency information necessary to compliance and enforcement; the recipient is in compliance with the Act.

(b) Permit reasonable access by the agency to the books, records, accounts, and other recipient facilities and records, and all other information necessary to determine whether a recipient is in compliance with the Act.

(c) May not engage in acts of intimidation or retaliation against any person who:

(1) Attempts to assert a right protected by the Act; or

(2) Cooperates in any investigation, hearing, or other part of the agency's investigation, conciliation, and enforcement process.

Traditionally, there has been much dissatisfaction with the paperwork burden imposed on recipients. The Department desires to avoid placing unnecessary burdens on recipients with the enactment of these regulations. Accordingly, there is no requirement in these proposed regulations that each recipient of federal financial assistance submit a general assurance of compliance with the Act. Without the assurance to the legal obligation of a recipient remains unchanged. In addition, as discussed in §90.34, the Department is proposing a targeted approach to data collection. This approach should limit data collection to those data which are most likely to identify violations of the Act and to indicate what progress is being made toward the elimination of those violations. Every effort is being made to comply with the Congressionally mandated requirement that certain data be collected. Every effort also will be made to collect data useful in eliminating age discrimination. Finally, a concerted effort will be made to keep the cost of the data collection as inexpensive as possible.

§90.46 What further provisions must an agency make in order to enforce its regulations after an investigation indicates that a violation of the Act has been committed?

Text of the proposed rule:

(a) Each agency shall provide for enforcement of its regulations through:

(1) Termination of a recipient's federal financial assistance under the program or activity involved where the recipient has violated the Act or the agency's regulations. The determination of the recipient's violation may be made only after a recipient has had an opportunity for a hearing on the findings before an impartial hearing examiner or an administrative law judge. Therefore, cases which are settled in the mediation process, or prior to the hearing before an impartial hearing examiner or an administrative law judge, will not involve termination of a recipient's federal financial assistance.

(2) Any other means authorized by law including but not limited to:

(i) Referral to the Department of Justice for proceedings to enforce any rights of the United States or obligations of the recipient created by agency regulations under the Act.

(ii) Use of any requirement of or referenced in any federal, State, or local government agency which will have the effect of correcting a violation of the Act or implementing regulations.

(b) Any termination under section 90.46(a)(1) shall be limited to the particular recipient and particular program or activity receiving federal financial assistance or portion thereof found to be in violation of the Act or agency regulations. No termination shall be based in whole or in part on a finding with respect to an intramural activity of the recipient which does not receive federal financial assistance.

(c) No action under paragraph (a) of this section may be taken until:

(1) The head of the agency involved has advised the recipient of its failure to comply with the regulations involved and has determined that voluntary compliance cannot be obtained.

(2) Thirty days have elapsed after the head of the agency involved has sent a written report of the circumstances and grounds of the action to the committees of Congress having legislative jurisdiction over the federal program or activity involved. A report shall be filed whenever any action is taken under paragraph (a) of this section.

(d) An agency may defer granting new federal financial assistance to a recipient when termination proceedings under §90.46(a)(1) are initiated.

(1) New federal financial assistance includes all assistance administered by or through the agency for which an application or approval, or renewal or continuation of existing activities, or authorization of new activities, is required during the deferral period. New federal financial assistance does not include assistance approved prior to the beginning of term
limits on how long a deferral may last under existing commitments continues the hearing process. The flow of funds ready due recipients under commitment for new federal financial assistance that action is deferred on their application because of agency imposed delays in the administrative hearing process. §90.47 Alternate funds disbursement procedure.

Text of the proposed rule: Whenever an agency withholds funds from a recipient pursuant to its regulations issued under §90.31, the head of the agency may disburse the funds so withheld directly to any public or non-profit private organization or political subdivision of the State. These alternate recipients must demonstrate the ability to achieve the goals of the federal statute authorizing the program or activity while complying with the agency's regulations issued under this Act.

This section implements the language of a 1978 amendment. No further discussion is warranted on this section. The following comments are welcome and will be considered.

§90.48 Federal monitoring role.

Text of the proposed rule: Each agency shall have responsibility for monitoring the effectiveness of the compliance and enforcement program established by its regulations and shall take necessary corrective action.

Federal agencies are required to see that the entire compliance and enforcement effort, including that part carried out by the recipient, is operating effectively and to take corrective action when it is not.

§90.49 Remedial and affirmative action by recipients.

Text of the proposed rule: Where a recipient is found to have discriminated on the basis of age, the recipient shall take any remedial action which the agency may require to overcome the effects of the discrimination. If another recipient exercises conciliation efforts, both recipients may be required to take remedial action.

Even in the absence of a finding of discrimination, a recipient may take affirmative action to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity on the basis of age.

In the case of a formal finding of past discrimination, appropriate remedial action is a necessary part of an enforcement program. This section authorizes agencies to require remedial action when it is called for after a finding of discrimination. It also permits recipients voluntarily to take affirmative action to overcome the effects of conditions which have limited program participation on the basis of age.

§90.50 Exhaustion of administrative remedies.

Text of the proposed rule: (a) The agency shall provide in its regulations that a complainant may file a civil action following the exhaustion of administrative remedies under the Act. Administrative remedies are exhausted if: (1) 180 days have elapsed since the complaint and the agency has made no finding with regard to the complaint; and (2) The agency issues any finding in favor of the recipient.

(b) If the agency issues a finding in favor of the recipient as described in §90.50(a)(2), the agency shall: (1) Promptly advise the complainant of this fact; and (2) Advise the complainant of his right, under Section 305(e) of the Act to bring a civil action for legal or equitable relief that will effect the purposes of the Act; and (3) Inform the complainant: (i) That a civil action can only be brought in an United States district court in the district in which the recipient is located or transacts its business; (ii) That a complainant prevailing in a civil action has the right to be awarded the costs of the action, including reasonable attorney's fees, but that these costs must be demanded in the complaint; (iii) That before commencing the action the complainant shall give 30 days notice by registered mail to the Secretary, the Attorney General of the United States, to the head of the granting agency, and the recipient; (iv) That the notice shall state: the alleged violation of the Act; the relief requested; the court in which the action will be brought; and whether or not attorney's fees are demanded in the event the complaint prevails; and (v) That no action shall be brought if the same alleged violation of the Act by the same recipient is the subject of a pending action in any court of the United States.

(c) The agency shall cooperate with the court and the parties to facilitate a fair resolution of the action. To the extent possible under the law, the agency shall observe a policy of confidentiality regarding the mediation process described in §90.43(d)(3).

The 1978 amendments to the Act permit persons to file a private civil action to enforce the Act. The Act spells out the conditions under which a civil action can be brought. If a complaint exhausts all administrative remedies under §90.50(a), the complainant may file a civil action in federal court even while the agency continues the investigation process. The provision of attorney's fees to successful complainants implements a statu-
PROPOSED RULES

Section 3 of Executive Order 12044 Improving Government Regulations, requires a regulatory analysis for "significant" regulations which "may have major economic consequences for the general economy, for individual industries, geographical regions or level of governments." The Department has concluded that a regulatory analysis is not required for these proposed regulations.

The Department has made every effort to minimize burdens of compliance with these proposed regulations and has prepared preliminary estimates of the costs. The principal burdens of the proposed regulations include the following elements:

Enforcement. Based on previous federal experience with complaints of discrimination, the Department anticipates (300-700) complaints annually, which may generate up to several million dollars annually in enforcement costs to recipients. (Similar costs for federal agencies might also be as much as several million dollars annually.)

Non-federal enforcement costs are expected to affect less than 1% of the 90-100,000 recipients.

Self-evaluations. Self-evaluations will affect all of the approximately 70-80,000 recipients on record. However, self-evaluations are limited to the small portion of all policies and procedures which involve age distinctions created by recipients, and for most recipients should require no more than a day or two of staff time.

Even so, one-time costs to recipients may total approximately $16-18 million nationally for self-evaluations.

Services Costs. Ending age discrimination may increase program service costs. There are known types of noncompliance which would cost recipients significant sums to correct. Any such costs would be imposed only on those recipients discriminating on the basis of age.

Reporting. Developing detailed age specific participation and related data could involve costs of thousands of dollars for any single recipient and millions of dollars annually for any single program. However, as discussed in section 90.34, the Department is proposing a targeted approach which it believes will limit data collection to those data which are most likely to identify violations of the Act and measure progress toward their elimination. As a result, recipients which do not discriminate will not ordinarily be required to invest in new data reporting and total national costs are likely to be minimal.

As indicated earlier, the Department has concluded that a regulatory analysis for these proposed regulations is not required under Executive Order 12044. However, because of the possibility that cost burdens may exist of which the Department is currently unaware, and because there are alternatives which are substantially more costly, the Department invites comments which identify any significant costs recipients may encounter in complying with the requirements of the Act and these regulations.

FRANK PETER S. LIEBESL, General Counsel, Department of Health, Education, and Welfare.

JOSEPH A. CALIFANO, Jr., Secretary, Department of Health, Education, and Welfare.

The Department of Health, Education, and Welfare proposes to add Part 90 to Title 45 of the Code of Federal Regulations, as set forth below:

PART 90—NONDISCRIMINATION ON THE BASIS OF AGE IN PROGRAMS OR ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

Subpart A—General

§ 90.1 Purpose of this subpart.

§ 90.2 Rules against age discrimination.

§ 90.3 Definitions of "normal operation" and "statutory objective."...
§ 90.1 What is the purpose of the Age Discrimination Act of 1975?

The purpose of this section is to state general, government-wide rules for the implementation of the Age Discrimination Act of 1975, as amended, and to guide each agency in the preparation of agency-specific age discrimination regulations.

(b) These regulations apply to each federal agency which provides federal financial assistance to any program or activity, and recipients of federal funds, to continue to use age distinctions and factors other than age which are reasonable in light of the purposes of the Act.

§ 90.2 What is the purpose of these regulations?

(a) The purpose of these regulations is to state general, government-wide rules for the implementation of the Age Discrimination Act of 1975, as amended, and to guide each agency in the preparation of agency-specific age discrimination regulations.

(b) These regulations apply to each federal agency which provides federal financial assistance to any program or activity.

§ 90.3 What programs and activities does the Age Discrimination Act of 1975 cover?

(a) The Age Discrimination Act of 1975 applies to any program or activity receiving federal financial assistance, including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (51 U.S.C. 1231 et seq.).

(b) The Age Discrimination Act of 1975 does not apply to:

(1) An age distinction contained in that part of an Option #1 Federal statute, State statute, or local statute or ordinance; or Federal, State, or local regulation which: or Option #2 Federal statute, State statute, or local statute or ordinance which: or Option #3 Federal statute or State statute which: or Option #4 Federal statute which:

(i) Provides any benefits or assistance to persons based on age; or
(ii) Establishes criteria for participation in age-related terms; or
(iii) Describes intended beneficiaries or target groups in age-related terms.

(2) Any employment practice of any employer, employment agency, labor organization, or any labor-management joint apprenticeship training program, except for any program or activity receiving federal financial assistance for public service employment under the Comprehensive Employment and Training Act of 1974 (CETA), as amended.

§ 90.4 How are the terms in these regulations defined?

As used in these regulations, the term:

"Act" means the Age Discrimination Act of 1975, as amended, (Title III of Public Law 94-135).

"Action" means any act, activity, policy, rule, standard, or method of administration; or the use of any policy, rule, standard, or method of administration.

"Age" means how old a person is, or the number of elapsed years from the date of a person's birth. "Age distinction" means any action using an age or age-related term.

"Age-related term" means a word or words which necessarily imply a particular age or range of ages (for example, "children," "adult," "older persons").

"Agency" means a federal department or agency that is empowered to extend financial assistance.

"Federal financial assistance" means any grant, entitlement, loan, contract (other than a procurement contract or a contract of insurance or guaranty), or any other arrangement by which the agency provides or otherwise makes available assistance in the form of:

(a) funds;
(b) services of federal personnel;
(c) real and personal property or any interest in or use of property, including:

(1) transfers or leases of property for less than fair market value or for reduced consideration; and
(2) proceeds from a subsequent transfer or lease of property if the federal share of its fair market value is not returned to the Federal Government.

"Recipient" means any State or its political subdivision, any instrumentality of a State or its political subdivision, any public or private agency, institution, organization, or other entity, or any person to which federal financial assistance is extended, directly or through another recipient. Recipient includes any successor, assignee, or transferee but excludes the ultimate beneficiary of the assistance.

"Secretary" means the Secretary of the Department of Health, Education, and Welfare.

§ 90.11 Purpose of this subpart.

The purpose of this subpart is to set forth the prohibitions against age discrimination and the exceptions to those prohibitions.

§ 90.12 Rules against age discrimination.

The rules stated in this section are limited by the exceptions contained in sections 90.13, 90.14, and 90.15 of these regulations.

(a) General rule: No person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving federal financial assistance.

(b) Specific rules: A recipient may not, in any program or activity receiving federal financial assistance, directly or through contractual, licensing, or other arrangements use age distinctions or take any other actions which have the effect, on the basis of age, of:

(1) Excluding individuals from, denying them the benefits of, or subjecting them to discrimination under, any program or activity receiving federal financial assistance;

(2) Denying or limiting individuals in their opportunity to participate in any program or activity receiving federal financial assistance;

(c) Reservation: The specific forms of age discrimination listed in paragraph (b) of this section do not necessarily constitute a complete list.

§ 90.13 Definitions of "normal operation" and "statutory objective." The terms "normal operation" and "statutory objective" are important to an understanding of the statutory exceptions to the prohibition against age discrimination. Therefore, for purposes of §§ 90.14 and 90.15, the terms "normal operation" and "statutory objective" shall have the following meanings:

"Normal operation" means the operation of a program or activity without significant changes that would impair its ability to meet its objectives;

"Statutory objective" means any purpose of a program or activity expressly stated in a statute (or reasonably inferred from its provisions or legislative history.)

§ 90.14 Exceptions to the rules against age discrimination. Normal operation or statutory objective of any program or activity.

A recipient is permitted to take an action, otherwise prohibited by § 90.12, if the action reasonably takes into ac-
PROPOSED RULES

§ 90.15 Exceptions to the rules against age discrimination. Reasonable factors other than age.

A recipient is permitted to take an action otherwise prohibited by § 90.14 which is based on a factor other than age, even though that action may have a disproportionate effect on persons of different ages. However, the factor must bear a rational/relationship to the normal operation of the program or activity or to the achievement of a statutory objective.

§ 90.16 Burden of proof.

The burden of proving that an age distinction or other action falls within the exceptions outlined in §§ 90.14 and 90.15 is on the recipient of federal financial assistance.

Subpart C—What are the Responsibilities of the Federal Agencies?

§ 90.31 Issuance of regulations.

(a) The head of each agency which extends federal financial assistance to any program or activity shall publish proposed and final age discrimination regulations in the Federal Register:

(1) Carry out the provisions of section 303 of the Age Discrimination Act of 1975; and

(2) Provide for appropriate investigative, conciliation, and enforcement procedures.

(b) Each agency shall publish its proposed agency age discrimination regulations no later than 90 days after the publication date of the final general, government-wide age discrimination regulations.

(c) Each agency shall publish final agency regulations no later than 120 days after publication of proposed agency age discrimination regulations.

(d) Agency age discrimination regulations shall be consistent with these general, government-wide age discrimination regulations and shall not become effective until they meet all requirements of the Act.

(e) Each agency shall include in its regulations a provision governing the operation of an alternate funds disbursement procedure as described in § 90.47 of these regulations.

§ 90.32 Review of agency policies and administrative practices.

(a) Each agency shall conduct a review of age distinctions it imposes on its recipients by regulations, policies, and administrative practices. The purpose of this review is to identify how age distinctions are used by each federal agency and whether those age distinctions are permissible under the Act and implementing regulations.

(b) No later than 12 months from the date the agency publishes its final regulations, the agency shall publish, for public comment, a report in the Federal Register containing its programs:

(1) The results of the review conducted under paragraph (a) of this section;

(2) A list of the age distinctions contained in regulations which are to be continued;

(3) A list of the age distinctions not contained in regulations but which will be adopted by regulation in order to remain in use;

(4) The justification for each age distinction to be continued; and

(5) A list of the age distinctions to be eliminated.

§ 90.33 Interagency cooperation.

Where two or more agencies provide federal financial assistance to a recipient or class of recipients, their regulations shall provide for a single compliance and enforcement procedure. Their regulations shall also designate one of the agencies as the sole agency for all compliance and enforcement purposes with respect to those recipients, except the ordering of termination of funds and the notification of the appropriate committees of Congress.

§ 90.31 Agency reports.

Each agency shall submit to the Secretary not later than December 31 of each year, beginning in 1979, a report which:

(a) Describes in detail the steps taken during the preceding fiscal year to carry out the Act;

(b) Contains data on the frequency, type, validity, and resolution of complaints and on compliance reviews sufficient to analyze the agency’s progress in reducing age discrimination in its programs;

(c) Contains data directly relevant to the extent of any pattern or practice of age discrimination which the agency has identified in any of its programs, and to progress toward eliminating it; and

(d) Contains evaluative or interpretative information which the agency determines is useful in analyzing agency progress in reducing age discrimination in its programs.

§ 90.41 What is the purpose of this Subpart?

This subpart seeks forth requirements for the establishment of compliance, investigation, conciliation, and enforcement procedures by agencies which extend federal financial assistance.

§ 90.42 What responsibilities do recipients and agencies have generally to ensure compliance with the Act?

(a) A recipient has primary responsibility to ensure that its programs and activities are in compliance with the Age Discrimination Act and shall take steps to eliminate violations of the Act. A recipient also has responsibility to maintain records, provide information, and to afford access to its records to the extent required by agencies to determine whether it is in compliance with the Act.

(b) An agency has responsibility to attempt to secure recipient compliance with the Act by voluntary means. This may include the use of the services of appropriate federal, State local, or private organizations. An agency also has the responsibility to enforce the Age Discrimination Act when a recipient fails to eliminate violations of the Act.
§ 90.43 What responsibilities do recipients and agencies have specifically to ensure compliance with the Act?

(a) General. An agency and a recipient each have responsibilities for establishing and carrying out procedures to ensure compliance with the Age Discrimination Act.

(b) Written notice, technical assistance, and educational materials. Each agency extending federal financial assistance to recipients shall:

(1) Provide written notice to each recipient of its obligations under the Act. The notice shall include a requirement that where the recipient initially receiving funds makes the funds available to a sub-recipient, the recipient shall notify the sub-recipient of its obligations under the Act.

(2) Provide technical assistance, where necessary, to recipients to aid them in complying with the Act.

(c) Self-evaluation. (1) Each agency extending federal financial assistance to recipients, or having 15 or more persons shall require each recipient to complete a written self-evaluation of its compliance under the Act within 18 months of the effective date of the agency regulations.

(2) Each recipient's self-evaluation shall identify and justify those age distinctions imposed by the recipient.

(3) Each recipient shall take corrective and remedial action whenever a self-evaluation indicates a violation of the Act.

(d) Complaints. (1) Receipt of complaints. Each agency shall establish a complaint processing procedure which includes the following:

(i) A procedure for the filing of complaints with the agency;

(ii) A review of complaints to assure that they fall within the jurisdiction of the Act and contain all information necessary for further processing; and

(iii) Notice to the complainant and the recipient of their rights and obligations under the complaint procedure, including the right to have a representative at all stages of the complaint procedure; and

(iv) Notice to the complainant and the recipient (or their representative) of their right to contact the agency for information and assistance regarding the complaint resolution process.

(2) Prompt resolution of complaints. Each agency shall establish procedures for the prompt resolution of complaints. These procedures shall require each recipient and complainant to participate actively in efforts toward speedy resolution of the complaint.

(3) Mediation of complaints. Each agency shall promptly refer all complaints to a mediator.

(i) The agency shall require the participation of both the recipient and the complainant in the mediation process.

(ii) If the complainant and recipient reach a mutually satisfactory resolution of the complaint during the mediation stage, they shall reduce the agreement to writing. The mediator shall notify the referring agency that a settlement has been reached. No further action shall be taken based on that complaint unless it appears that the complainant or recipient is failing to comply with the agreement.

(iii) If the mediator and the parties to the mediation shall protect the confidentiality of all information obtained in the course of the mediation process. No mediator or party to a mediation shall testify in any adjudicative proceeding, produce any document, or otherwise disclose any information obtained in the course of the mediation process without prior approval of the head of the agency appointing the mediator and the parties to the mediation, except as required by law.

(iv) Federal initial investigation. Each agency shall investigate complaints unresolved after mediation.

(1) Not more than 60/90 days after the agency receives the complaint, the mediator shall refer a still unresolved complaint to the referring agency for initial investigation.

(ii) As part of the initial investigation, the agency shall use informal fact finding methods including joint or individual discussions with the complainant and recipient to establish the facts, and, if possible, resolve the complaint to the mutual satisfaction of the parties. The agency may seek the assistance of any involved State or program agency.

(v) Formal investigation, conciliation, and hearing. If the agency cannot resolve the complaint during the early stages of the investigation, it shall:

(i) Complete the investigation of the Complaint.

(ii) Attempt to achieve voluntary compliance satisfactory to the agency, if the investigation indicates a violation.

(iii) Arrange for enforcement as described in § 90.46, if necessary.

$ 90.44 Compliance reviews.

(a) Each agency may provide in its regulations for the conduct of compliance reviews, preaward reviews, and other similar procedures which permit the agency to investigate, and correct, violations of the Act without regard to its procedures for handling complaints.

(b) If a compliance review or preaward review indicates a violation of the Act, the agency shall attempt to achieve voluntary compliance with the Act. If voluntary compliance cannot be achieved, the agency shall arrange for enforcement as described in § 90.46.

$ 90.45 Information requirements and prohibitions against intimidation or retaliation.

Each agency shall provide in its regulations a requirement that the recipient:

(a) Provide to the agency information necessary to determine whether the recipient is in compliance with the Act.

(b) Permit reasonable access by the agency to the books, records, accounts, and other recipient facilities and sources of information to the extent necessary to determine whether a recipient is in compliance with the Act.

(c) May not engage in acts of intimidation or retaliation against any person who:

(1) Attempts to assert a right protected by the Act; or

(2) Cooperates in any investigation, hearing, or other part of the agency's investigation, conciliation, and enforcement process.

§ 90.46 What further provisions must an agency make in order to enforce its regulations after an investigation indicates that a violation of the Act has been committed?

(a) Each agency shall provide for enforcement of its regulations through:

(1) Termination of a recipient's federal financial assistance under the program or activity involved where the recipient has violated the Act or the agency's regulations. The determination of the recipient's violation may be made only after a recipient has had an opportunity for a hearing on the record before an impartial hearing examiner or an administrative law judge. Therefore, cases which are settled in the mediation process, or prior to the hearing before an impartial hearing examiner or an administrative law judge, will not involve termination of a recipient's federal financial assistance.

(2) Any other means authorized by law including but not limited to:

(i) Referral to the Department of Justice for proceedings to enforce any rights of the United States or obligations of the recipient created by agency regulations under the Act;

(ii) Use of any requirement of or referral to any federal, State, or local government agency which will have the effect of correcting a violation of the Act or implementing regulations.

(b) Any termination under section 90.46(a)(1) shall be limited to the par-
ticular recipient and particular program or activity receiving federal financial assistance or portion thereof found to be in violation of the Act or agency regulations. No termination shall be based in whole or in part on a finding with respect to any program or activity of the recipient which does not receive federal financial assistance.

(c) No action under paragraph (a) of this section may be taken until:

(1) The head of the agency involved has advised the recipient of its failure to comply with the regulations involved and has determined that voluntary compliance cannot be obtained.

(2) Thirty days have elapsed after the head of the agency involved has sent a written report of the circumstances and grounds of the action to the committees of the Congress having legislative jurisdiction over the federal program or activity involved. A report shall be filed whenever any action is taken under paragraph (a) of this section.

(d) An agency may defer granting new federal financial assistance to a recipient when termination proceedings under §90.46(a)(1) are initiated.

(1) New federal financial assistance includes all assistance administered by or through the agency for which an application or approval, including renewal or continuation of existing activities, or authorization of new activities, is required during the deferral period. New federal financial assistance does not include assistance approved prior to the beginning of termination proceedings or to increases in funding as a result of changed computation of formula awards.

(2) A deferral may not begin until the recipient has received a notice of opportunity for a hearing under §90.46(a)(1) and may not continue for more than 60 days unless a hearing has been held within that time or the time for beginning the hearing has been extended by mutual consent of the recipient and the agency. A deferral may not continue for more than 30 days after the close of the hearing, unless the hearing results in a finding against the recipient.

§90.47 Alternate funds disbursal procedure.

Whenever an agency withholds funds from a recipient pursuant to its regulations issued under section 90.31, the head of the agency may disburse the funds so withheld directly to any public or non-profit private organization, or agency, or State or political subdivision of the State. These alternate recipients must demonstrate the ability to achieve the goals of the federal statute authorizing the program or activity while complying with the agency's regulations issued under this Act.

§90.48 Federal monitoring role.

Each agency shall have responsibility for monitoring the effectiveness of the compliance and enforcement program established by its regulations and shall take necessary corrective action.

§90.49 Remedial and affirmative action by recipients.

(a) Where a recipient is found to have discriminated on the basis of age, the recipient shall take any remedial action which the agency may require to overcome the effects of the discrimination. If another recipient exercises control over the recipient that has discriminated, both recipients may be required to take remedial action.

(b) Even in the absence of a finding of discrimination, a recipient may take affirmative action to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity on the basis of age.

§90.50 Exhaustion of administrative remedies.

(a) The agency shall provide in its regulations that a complainant may file a civil action following the exhaustion of administrative remedies under the Act. Administrative remedies are exhausted if:

(1) 180 days have elapsed since the complainant filed the complaint and the agency has made no finding with regard to the complaint; or

(2) The agency issues any finding in favor of the recipient.

(b) If the agency issues a finding in favor of the recipient as described in §90.50(a)(1), the agency shall:

(1) Promptly advise the complainant of this fact; and

(2) Advise the complainant of his or her right, under Section 305(e) of the Act, to bring a civil action for legal or equitable relief that will effect the purposes of the Act; and

(3) Inform the complainant:

(i) That a civil action can only be brought in an United States district court for the district in which the recipient is found to conduct business;

(ii) That a complainant prevailing in a civil action has the right to be awarded the costs of the action, including reasonable attorney's fees, but that these costs must be demanded in the complaint;

(iii) That before commencing the action the complainant shall give 30 days notice by registered mail to the Secretary, the Attorney General of the United States, the head of the granting agency, and the recipient;

(iv) That the notice shall state the alleged violation of the Act; the relief requested; the court in which the action will be brought; and whether or not attorney's fees are demanded in the event the complainant prevails; and

(v) That no action shall be brought if the same alleged violation of the Act by the same recipient is the subject of a pending action in any court of the United States.

(c) The agency shall cooperate with the court and the parties to facilitate a fair resolution of the action. To the extent possible under the law, the agency shall observe a policy of confidentiality regarding the mediation process described in §90.43(d)(3).

Subpart E—Future Review of Age Discrimination Regulations

§90.51 Review of general regulations.

The Secretary shall review the effectiveness of these regulations in securing compliance with the Act. As part of this review, 30 months after the effective date of these regulations, the Secretary shall publish a notice of opportunity for public comment on the effectiveness of the regulations. The Secretary will assess the comments and publish the results of the review and assessment in the Federal Register.

§90.52 Review of agency regulations.

Each agency shall review the effectiveness of its regulations in securing compliance with the Act. As part of this review, 30 months after the effective date of its regulations, each agency shall publish a notice of opportunity for public comment on the effectiveness of the agency regulations. Each agency shall assess the comments and publish the results of the review in the Federal Register.

AGENCY: Office of the Secretary, HEW.

ACTION: Proposed rules, notice of public hearings.

SUMMARY: The Department of Health, Education, and Welfare will conduct public hearings on the proposed general, government-wide regulations to carry out the provisions of the Age Discrimination Act of 1975, as amended. The Act applies to persons of all ages. It prohibits discrimination on the basis of age in programs or activities receiving Federal financial as-
asistance. However, the Act permits some distinctions based on age. The proposed regulations contain government-wide standards. The oral and written comments received at the hearings will be considered in the drafting of the final regulations.

DATES: Public hearings will be held in 10 cities and the District of Columbia. See Supplementary Information section for the dates of each hearing.

ADDRESSES: See Supplementary Information section for the address of each hearing.

FOR FURTHER INFORMATION CONTACT:

See Supplementary Information section for the person to contact in Washington, D.C. and in each region.

SUPPLEMENTARY INFORMATION:
The schedule of hearings is set forth below. The date, time and location of the hearing is provided, as well as the name and address of the person to contact for further information.

WASHINGTON, D.C.

REGION I (BOSTON)

February 5, 1979, 11 a.m.–8 p.m., John F. Kennedy Federal Building, Room 2003A, Government Center, Boston, Massachusetts.

Contact: Mr. Charles Vann, Acting Assistant to the Principal Regional Official, DHEW Regional Office, Room 2411, John F. Kennedy Federal Building, Government Center, Boston, Massachusetts 02203. Telephone 617-223-6831.

REGION II (NEW YORK)

January 30, 1979, 11 a.m.–8 p.m., Federal Office Building, Room 305, 26 Federal Plaza, New York, New York.

Contact: Ms. Stanlee Joyce Stahl, Executive Assistant to the Principal Regional Official, DHEW Regional Office, Room 3855, 26 Federal Plaza, New York, New York 10007. Telephone 212-264-4602.

REGION III (PHILADELPHIA)

January 26, 1979, 9 a.m.–7 p.m., Gold Room, Allegheny County Court House, Grant and Forbes Street, Pittsburgh, Pennsylvania.

Contact: Mr. Paul Cushing, Executive Assistant to the Principal Regional Official, DHEW Regional Office, P.O. Box 13718, Philadelphia, Pennsylvania 19101. Telephone 215-598-6492.

REGION IV (ATLANTA)

January 22, 1979, 9 a.m.–9 p.m., Atlanta City Council Chambers, 68 Mitchell Street NW, Atlanta, Georgia.

Contact: Mr. A. B. Albritton, Director, Public Affairs, DHEW Regional Office, Suite 1403, 101 Marietta Tower, Atlanta, Georgia 30323. Telephone 404-321-2311.

REGION V (CHICAGO)

January 23, 1979, 9 a.m.–7 p.m., 11th Floor Conference Room, DHEW Regional Office Building, 300 South Wacker Drive, Chicago, Illinois.

Contact: Ms. Marian H. Miller, Regional Program Director, Administration on Aging, DHEW Regional Office, 300 South Wacker Drive, 15th Floor, Chicago, Illinois 60606. Telephone 312-353-3141.

REGION VI (DALLAS)

February 2, 1979, 9 a.m.–7 p.m., South Ballroom, 2nd Floor, Southland Center, 2117 Live Oak St., Dallas, Texas.

Contact: Mr. John Stokes, Regional Attorney, DHEW Regional Office, Suite 1330, 1200 Main Tower Bldg., Dallas, Texas 75202. Telephone 214-767-3465.

REGION VII (KANSAS CITY)

January 31, 1979, 2 p.m.–8 p.m., Federal Office Building, 601 East 12th Street, Kansas City, Missouri.

Contact: Mr. Steve Glorioso, Director, Public Affairs, DHEW Regional Office, Room 612, 601 East 12th Street, Kansas City, Missouri 64106. Telephone 816-374-3425.

REGION VIII (DENVER)

February 1, 1979, 12 noon–9 p.m., Federal Office Building, Room 1063, 1961 Stout Street, Denver, Colorado.

REGION IX (SAN FRANCISCO)

January 24, 1979, 9 a.m.–7 p.m., State Auditorium, 107 South Broadway, Los Angeles, California.

Contact: Ms. Sharon Fujii, Special Assistant to the Principal Regional Official, DHEW Regional Office, Room 443, 50 United Nations Plaza, San Francisco, California 94102. Telephone 415-556-2560.

REGION X (SEATTLE)

January 29, 1979, 9 a.m.–7 p.m., Federal Office Building, Rooms 380 and 390, 915 Second Avenue, Seattle, Washington.

Contact: Mr. Andrew Young, Regional Attorney, DHEW Regional Office, 1321 Second Avenue, Mail Stop 624, Arcade Plaza Building, Seattle, Washington 98101. Telephone 206-442-0470.

These hearings are being held to solicit views and experience of individuals and organizations with respect to issues raised by the proposed regulations. Requests to present statements at the hearing should be made in writing to the above addresses and should include the name and address of the person to contact for further information. Persons who are unable to attend the hearings may submit statements in writing to: Ms. Bayla F. White, Director, Age Discrimination Task Force, Office of the General Counsel, Room 716E, 200 Independence Avenue SW, Washington, D.C. 20201. Telephone 202-245-6284.

FRANK PETER S. LIMASSI, General Counsel, Department of Health, Education, and Welfare.

JOSEPH A. CALIFANO, JR., Secretary, Department of Health, Education, and Welfare.

- Subpart C - Refund Obligation                                              258  

Part 274 - Determinations by Jurisdictional Agencies
- Subpart A - General Provisions                                             271  
- Subpart B - Requirements for filing with Jurisdictional Agencies           276  
- Subpart C - Waivers                                                       300  
- Subpart D - Delegations to State Agencies                                  303  
- Subpart E - Identification of State and Federal Jurisdictional Agencies   304  

- Subpart A - [reserved]                                                    313  
- Subpart B - Procedure for Commission Review of Jurisdictional Agency Determinations 316  

Part 276 - Reports
- Subpart A - Reports for Sales of Natural Gas Under Sections 105, 106(b) and 109, of the NGPA 322  

III. Subchapter I - Other Regulations Under the Natural Gas Policy Act of 1978
- Part 280 - [reserved]                                                    336  
- Part 281 - [reserved]                                                    337  
- Part 282 - [reserved]                                                    338  
- Part 283 - [reserved]                                                    339  
- Part 284 - Certain Sales and Transportation of Natural Gas
  - Subpart A - Certain Transportation by Interstate Pipelines                340  
  - Subpart B - Certain Transportation by Intrastate Pipelines               341  
  - Subpart C - [reserved]                                                   342  
  - Subpart D - Assignment of Contractual Rights to Receive Certain Gas       343  

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
I. INTRODUCTION

On November 9, 1978, the Natural Gas Policy Act of 1978 (NGPA) was signed into law. By passage of the NGPA, Congress has mandated a new legislative framework for the regulation of most facets of the natural gas industry. The new law affects sales, transmission and distribution of natural gas. The previously controlling federal regulatory statute, the Natural Gas Act (NGA) has in many respects been limited, replaced or superseded by the NGPA, although it continues to be of significance with respect to gas previously dedicated to interstate commerce.

A primary effect of the NGPA is the substitution of a series of specific statutory maximum price levels applicable to discrete types of "first sales" of natural gas for the previously established system of price regulation of interstate sales of natural gas which had been grounded in a cost-based methodology. An important distinction between producer regulation under the NGA and the NGPA is the expansion of the Federal Energy Regulatory Commission's (Commission) jurisdictional scope to encompass not only sales made in interstate commerce but in intrastate commerce as well. Under the NGA, all first sales of natural gas are controlled by the maximum statutory ceiling rates and as a result, it is unlawful for any person to sell natural gas at a price in excess of the statutory maximum regardless of whether the sale occurs in the inter- or intrastate market.

The Commission wishes to call specific attention to the provisions of section 101(b)(9) of the NGPA. The Congress, by that provision, emphasizes and makes clear that the maximum lawful prices under the NGPA are ceiling prices and do not supersede or nullify the effectiveness of any contractual agreement to pay a lower price. Therefore, the Commission cautions producers not to assume entitlement to any NGPA ceiling price which is higher than their contract prices.

The Commission is directed to administer essentially all of the NGPA and is authorized to perform any and all acts and to prescribe and issue such rules and orders as it finds necessary or appropriate to carry out its functions under the NGPA. On November 13, 1978, the Commission proposed interim regulations as the first step in implementing the NGPA. These interim regulations, contained in this notice, mark the second step in carrying out the basic responsibilities for implementation and administration of the Act and provide a mechanism for transition from the NGA regulating regime to the NGPA scheme.
The NGPA is divided into six titles:

I. Pricing
   A. Price Controls Applicable to Sales of Natural Gas
   B. Decontrol of Certain Natural Gas Prices

II. Incremental Pricing

III. Additional Authorities and Requirements
   A. Emergency Authorities
   B. Other Authorities and Requirements

IV. Natural Gas Curtailment Policies

V. Administration, Enforcement, and Review

VI. Coordination with the Natural Gas Act, Effect on State Laws

The interim regulations prescribed here do not implement all titles under the NGPA. Rather, the regulations propose to deal with those areas demanding the most expedient treatment.

This first group of regulations is designed to set in motion the new scheme for pricing of first sales of natural gas and to provide mechanisms for implementation of provisions of the NGPA covering certain arrangements for transportation of natural gas. However, before setting out in detail a full description of the specific regulations proposed, a summary of the most salient features of the NGPA, the effect on regulation under the NGA, and a capsule description of the implementing regulations and corollary modifications of regulations under the NGA, may be useful.

THE LEGISLATIVE SCHEME OF THE NGPA

The nature and scope of Commission regulation of producer sales under the NGPA has been substantially transformed from utility-type regulation of a limited market to what is essentially price regulation of an entire national market. Under the scheme set up by the NGPA, there exist two major categories of first sales: those requiring a prior determination of eligibility to be made by a jurisdictional federal or state agency (within the meaning of the NGPA) before collection of the maximum lawful price and those not explicitly requiring such a determination. A decision as to whether a first sale falls into a category requiring a determination is fundamental. A decision to seek a determination triggers quite different regulatory consequences than a decision not to seek a determination.

Although under certain provisions the Commission may be called upon to return to the cost-based, just and reasonable methodology within the meaning of the NGA in establishing rates in excess of the NGPA ceiling prices, the basic administration of the pricing provisions of the NGPA will be undertaken from an entirely different perspective.
The Commission will no longer inquire into producer costs or set permissible rates of return for producers. Instead, the Commission’s focus will center on whether geological information, production history, field records, prior contractual relationships and information of a similar nature support the categorization for pricing purposes claimed by producers.

Another crucial factor in anticipating what regulatory treatment will be accorded producer sales of natural gas is whether gas is “committed or dedicated” for purposes of NGA regulation. The limitations on NGA regulation as a result of enactment of the NGPA will be addressed in another section of this preamble. However, the distinction between gas which is deemed to be subject to continuing regulation under the NGA and gas which falls solely within the NGPA regulatory format is significant and affects both pricing and nonpricing regulation of producer matters.

For categories of gas requiring a prior determination by a federal or state agency, the Commission’s function is more in the nature of an appellate body, reviewing, on a substantial evidence basis, the factual determinations of the appropriate jurisdictional agency with the right of disapproval in the event the initial determination is not adequately substantiated. The Commission rules reflect this role and prescribe the basic and minimum factual foundation necessary to meet its review responsibilities without directly interposing the Commission into the procedural functioning of the jurisdictional agency. The review process of initial determinations begins when notice is received of a jurisdictional agency’s determination with the appropriate supporting material specified in Part 274 of the proposed regulations. In the absence of a reversal, the determination of the jurisdictional agency becomes final and no longer subject to review unless based on any untrue statement of material fact or upon any omission of material fact which omission was misleading.

Categories of first sales explicitly requiring that a determination as to qualification to collect the maximum lawful price be made by either a jurisdictional federal or state agency are:

- section 102 which sets a maximum lawful price for first sales of new natural gas (gas produced from a new lease on the Outer Continental Shelf (OCS) or certain new onshore wells) and gas produced from any OCS lease which was from a reservoir discovered after July 27, 1976;
Section 103 which sets a maximum price for first sales of new onshore production wells;
Section 107 which sets a maximum lawful price for first sales of high-cost natural gas including gas produced from geopressurized brine, coal seams, Devonian shale or gas produced under other conditions the FERC determines to present "extraordinary" risks or costs; and
Section 108 which sets the maximum lawful price for first sales of stripper well natural gas.

An essential element in the regulatory system established with respect to categories requiring a prior determination is the provision for interim collection procedures by producers awaiting a final determination or the outcome of a review of such determination. The Commission has a concomitant power to require refunds from the producer if the gas eventually qualifies for a lower price. Section 503(e) sets out this collection and refunding procedure.

Part 273 of the regulations states the prerequisites for interim collection. First, the Commission has established a "transitional rule" to permit the collection by producers of the section 109 price if a producer files for a determination by March 1, 1979. Additional rules are established for interim collection pending and following a state or federal agency determination.

Those first sales of natural gas not requiring a prior determination to be made by a jurisdictional federal or state agency are tied to previously existing contractually set prices or price levels established by the Federal Power Commission or this Commission. First sales not requiring a prior determination under the NGPA are:

- section 104 which incorporates by reference the just and reasonable rates established under the NGA for first sales of gas committed or dedicated to interstate commerce on the day before the date of enactment of the NGPA;
- section 105 which establishes maximum lawful prices for first sales under existing contracts of natural gas not previously committed or dedicated to interstate commerce;
- section 106 which establishes maximum lawful prices for first sales under interstate and intrastate rollover contracts; and
- section 109 which establishes the maximum lawful price for first sales of natural gas...
from the Prudhoe Bay in Alaska and categories of gas not otherwise covered by other sections of the NGPA.

The Commission has general administrative and enforcement authority under the NGPA and the NGA to order refunds in cases where the maximum lawful price level has been improperly exceeded.

**EFFECT OF THE NGPA UPON CONTINUED NGA REGULATION**

Natural gas which remains committed or dedicated to interstate commerce on the day before the date of enactment of the NGPA, or which is not specifically exempted from the jurisdictional consequences of commitment or dedication by the NGPA, remains subject to all the non-price regulatory requirements of the NGA. An important aspect of continued NGA regulation is the requirement that a producer file an abandonment application with the FERC pursuant to section 7(b) of the NGA before terminating service to the interstate market or before abandonment of facilities used to render interstate service. Additionally, although price regulation of first sales by producers of gas committed or dedicated is now governed by the NGPA, sections 104 and 106(a) are grounded in previously-established rates under the NGA. As a result, producers wishing to establish their right to collect under these sections will be required to make a filing under their rate schedules under the NGA. The Commission has amended its previously-existing filing requirements to provide new procedures governing these rate increase filings.

If gas is not committed or dedicated to interstate commerce as defined in section 2(18) or is exempted from the jurisdiction of the NGA under section 601(a)(1)(B) as high cost natural gas, new natural gas, or natural gas produced from any new onshore production well, the prior framework of utility-type regulation under the NGA no longer applies.

If natural gas sales are freed from the requirements of the NGA, several adjuncts to NGA regulation are obviated. First, there is no longer any necessity for a producer to seek certification of the sale as serving the public convenience and necessity. The replacement for this requirement under the NGPA is limited to the prior determination mechanism, where applicable, and the pricing limits established in the NGA. New sales of such gas in interstate commerce no longer require certification as a prerequisite to commencement of deliveries. Nor does the requirement for abandonment authorization before termination of deliveries of natural gas exist with respect to natural gas no longer
subject to NGA regulation. In the case of first sales of natural gas not previously committed or dedicated to inter-
state commerce or exempted from NGA regulation, tariff
filings and rate increase applications are dispensed with.
(Of course, specific requirements for filing to establish
the right to collect the maximum lawful price levels exist
under the regulations and annual reporting will be required
under the NGPA in many instances. However, the nature of
these filings, which are in many cases one-time notification
type filings is quite different from the rate filings
previously required under the NGA.)

For natural gas which on the date of enactment was
committed or dedicated but which is exempted from the NGA
under section 601(a)(1) of the NGPA, there are substitute
mechanisms for NGA section 7(c) abandonment authorization.
These substitute provisions, intended to provide a degree
of certainty to purchasers dependent upon a predictable
natural gas supply, are found in section 315 of the NGPA.
The Commission has not attempted to implement these
sections in the initial implementing regulations. It is
our intent to do so in the near future. That section
gives the Commission dual authority to establish by rule
or order the minimum duration of any contract (other
than an existing contract) for the purchase of natural
gas and to require by rule the right of first refusal with
respect to any gas committed or dedicated to interstate
commerce before the date of enactment if such gas is high
cost gas, new natural gas or natural gas produced from any
new, onshore production well.

Indirectly, NGA regulation is affected by the opera-
tion of section 601(b) and (c) of the NGPA. Section 601(b)
provides that any amount paid in any first sale of natural
gas shall be deemed to be just and reasonable if such amount
does not exceed the maximum lawful ceilings established by
the NGPA or if there is no maximum lawful price applicable
by reason of elimination of price controls. Section 601(c),
the guaranteed pass-through provision, states that the
Commission may not deny, or condition, the grant of any
certificate under section 7 of the NGA based upon the amount
paid in any sale of natural gas if the amount paid meets the
standards of section 601(b) and is, therefore, by statutory
flat, just and reasonable. Additionally, the Commission
may only deny the recovery by any interstate pipeline of any
amount paid with respect to the purchase of natural gas
under section 601(b) to the extent the Commission determines
that the amount paid was excessive due to fraud, abuse, or
similar grounds.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
Finally, included in the implementing regulations are provisions covering certain transportation arrangements by both interstate and intrastate pipelines. Provision is made for intrastate pipeline sales and for the assignment of natural gas excess to their requirements. Also, the Commission has revised its regulations previously applicable to emergency transactions and revised the procedure and the standards for emergency sales of natural gas for this winter's heating season.

**GENERAL OUTLINE OF IMPLEMENTING REGULATIONS**

The interim regulations add two new subchapters to the Commission's regulations in Chapter 1 of Title 18. New Subchapter H (Parts 270 through 276) contains the new producer regulations under the NGPA. Part 270 sets forth general rules applicable to the entire subchapter. Maximum lawful prices under NGPA sections 102 through 109 are implemented in Part 271. Part 273 provides for interim collections and refunds, while determinations of eligibility by state and federal agencies and Commission review of those determinations are provided for under Parts 274 and 275. Finally, Part 276 covers reports.

New Subchapter I will cover regulations under the NGPA other than those relating to producer regulation. The interim regulation prescribed today includes only Part 284, which implements the Commission's authority under sections 311(a) (relating to certain pipeline transportation of natural gas) and 312 (relating to assignment of intrastate pipeline's contractual right to receive surplus natural gas). Regulations relating to other authorities of the Commission will be added later under Subchapter I.
II. SUMMARY OF PROPOSED REGULATIONS

PART 270

Part 270 prescribes rules and definitions that apply to Subchapter B. Subpart A contains the general rules and definitions, and Subpart B contains special rules which relate to sales made under particular conditions.

The general rules of § 270.101 relate to the application of the maximum lawful price provisions of the NGPA. This section makes it unlawful for any person to sell natural gas at a first sale price which is greater than the highest maximum lawful price permitted under Part 271. Thus, if more than one maximum lawful price is applicable to a first sale, the "highest" maximum lawful price may be obtained.

This section also describes the categories of natural gas for which prior determinations by jurisdictional agencies must be made in order to establish the maximum lawful price. In addition, this section reflects the statutory rule that the pricing provisions of Part 271 do not supersede or nullify contract provisions which establish prices below the applicable maximum lawful price. It also provides that collection of a first sale price under Subchapter B is subject to any refund obligation as may be applicable. The refund provision has been modified from the proposal to recognize the fact that refund obligations may arise as a result of provisions other than those in Part 273.

Comments on the proposed regulations requested additions to the general rules. One comment suggested a rule to protect confidential data submitted pursuant to these new regulations. The Commission, in response to this concern, has added a rule to Subpart B of Part 275 concerning the confidentiality of materials submitted to it as part of a determination by a jurisdictional agency.

Section 270.102 contains definitions. Paragraph (a) provides that unless further defined, terms defined in the NGPA have the same meaning for purposes of these regulations as they do under the NGPA.

The definitions provided under paragraph (b) include basic terms used throughout the regulations and particular terms, such as "production in commercial quantities," "crude oil," "surface location," "intrastate contract," "successor to an intrastate contract," and "intrastate rollover contract," used in more than one subpart. Two of these definitions differ from those which were first proposed; that for "Btu," and that for "production in commercial quantities."
The definition of "Btu," found in clause (2) of paragraph (b), has been amended to conform it to § 270.204. This was done in response to those comments which pointed out a discrepancy between these two sections.

In addition to several minor clarifying changes, the term "production in commercial quantities" has been amended in two major respects. First, in response to those comments which noted the Commission's omission of any reference to the rebuttable presumption in section 102(c)(3) of the NGPA, a citation to a new § 271.204(e), which embodies that presumption, has been included. Also in response to comments, the definition has been modified to make clear that the information in clauses (A) to (E) inclusive, of § 270.102(b)(4)(iii), may be considered evidence of production for beneficial economic use. However, the Commission wishes to point out that these enumerated clauses are not conclusive as to the matter; evidence to show the contrary may be presented by an applicant for a determination.

Several comments proposed that this section be expanded to include certain other terms, including "local distribution company," "intra-state sales," and "first sale." The Commission has determined that definition of these terms is not required at this time.

The table of names and addresses of the jurisdictional agencies has been moved from Part 270 to the new Subpart E of Part 274. In addition, several corrections have been made in the table.

The special rules of Subpart E apply to first sales of natural gas subject to differing maximum lawful prices, resales covered by first sale pricing regulations, sales of natural gas attributable to pipeline or distributor production, and the measurement of Btu content of natural gas.

Section 270.201 provides that the maximum lawful price for a first sale of natural gas produced from wells, properties, or reservoirs which have different applicable maximum lawful prices will be the weighted average of the maximum lawful prices applicable to each well, property or reservoir. The weighted average will be based upon the volumes of gas contributed by each such well, property or reservoir.

Section 270.202 applies to "resellers." The section provides that one who purchases natural gas at a first sale and subsequently resells the gas in a transaction which is also a first sale may collect a maximum lawful price which is the higher of either: (1) the maximum lawful price
which would apply to such a sale under Part 271 if it
were not a resale; or (2) the maximum lawful price which
was applicable to the transaction in which the reseller
purchased the natural gas. A rule similar to § 270.201
applies to any sale by a reseller of volumes purchased
subject to different maximum lawful prices.

Paragraph (c) of the rule contains two provisions
applicable to allowances under Subpart K of Part 271.
First, the reseller may collect the applicable maximum law-
ful price on his sale plus any allowances permitted by the
Commission under the provisions of Subpart K of Part 271.
Second, if the reseller's maximum lawful price is determined
under § 270.202(a)(2) by reference to the maximum lawful
price of the person selling to him, the reseller may pass
through any Subpart K allowances which the person selling
to him collected. In addition, under § 270.202(d), a
reseller may apply to the Commission for adjustment relief
pursuant to section 502(c) of the NGPA, to the extent the
application of the reseller provisions results in hardship,
ingequity, or an unfair distribution of burdens.

Section 270.202 also spells out the manner in which
the interim collection rules apply to resellers and sets out
rules respecting reporting and record retention. With regard
to reporting requirements, it should be pointed out that
resellers must make reports of their first sales under
Part 276 in the same manner as other first sellers.

Significant modifications in the reseller rule as
proposed were made in response to comments received by the
Commission, in particular in its treatment of allowances
under Subpart K of Part 271. The comments pointed to the
possibility of a reseller's being "squeezed" between appli-
cable, prices at which he purchased and those at which he
could sell. These comments suggested that the Commission
explicitly provide for allowances such as the current
gathering allowances permitted to interstate producers
and those afforded producers under Subpart K of Part 271.
In addition, suggestions were made that the regulation
provide for some form of margin protection to resellers.
While the Commission declines to go so far as to guarantee
existing margins, we believe that, as presently constructed,
this regulation meets the concerns expressed by those who
commented upon the proposed rule. The result, especially
with the changes made respecting reseller allowances and
passthrough of allowances, and with the provision for adjust-
ments under section 502(c) of the NGPA, should provide for
equitable treatment of resellers. It should be noted that
changes in Subpart K of Part 271 have also been made.
Section 270.203 relates to pipeline and distributor production. Section 2(21)(B) of the NGPA provides that a sale of natural gas by a pipeline or distributor (or an affiliate thereof) is not a first sale unless the sale is "attributable to volumes of natural gas produced" by such pipeline or distributor (or an affiliate thereof).

Section 270.203 describes the circumstances under which a sale of natural gas will be considered to be a first sale of natural gas attributable to volumes produced by a pipeline or distributor. To the extent a sale is comprised exclusively of production volumes from identifiable wells, properties, or reservoirs which are owned by the pipeline or distribution company or affiliate thereof making the sale, then it is attributable to volumes of natural gas produced by that pipeline or distributor.

For example, if a pipeline sells to a particular customer production volumes from a well which it owns, the volumes are commingled with system supply, and equivalent volumes are withdrawn for delivery to that customer, then the transaction would be a sale comprised of production volumes from a particular well, and thus a first sale.

In order to prevent circumvention of this rule, a provision is made pursuant to the Commission's authority under section 2(21)(A)(v) of the NGPA, that mixed-volume sales comprised of both production volumes from identifiable wells, properties, or reservoirs owned by the pipeline or distributor/seller and of other production volumes will be considered as a first sale, unless one of the two exclusions under the rule applies. The first exclusion provides that if the rate at which such natural gas is sold by the pipeline or distributor is regulated by a state agency under state law, then the sale will not be considered to be a first sale by reason of the "circumvention rule." (To qualify for the state regulation exemption, the sale must be subject to regulation by a state agency empowered by state statute to establish, modify or set aside the rate for the sale.) The second exclusion provides that the sale will not be considered as a first sale if, on application to the Commission, a determination has been made not to so treat the sale.

The effect of § 270.203 on sales made by an interstate pipeline of volumes of natural gas produced by it, is to continue resale rate regulation under the provisions of the NGPA. While some comments were received calling the Commission's attention to intracorporate transfers, the Commission will not specifically deal with this question without receiving further comment. Unless the Commission otherwise
provides, intracorporate transactions by interstate pipelines will continue to receive the treatment presently accorded them under the NGA.

The Commission should note at this point the relationship of section 602(a) of the NGPA to the attribution and circumvention rules set out in § 270.203. Section 602(a) states that nothing in the NGPA limits the authority of a state to establish or enforce a maximum lawful price for the first sale of natural gas produced in the state, provided the price set does not exceed any appropriate maximum lawful price under Title I of the NGPA.

Comments were received that indicate certain states have authorized their regulatory body to set or impute a price on the basis of fair value or reasonable market price for the sale or transfer to an intrastate pipeline by its producing affiliate or production department. These state-set values may be below the applicable NGPA ceiling price.

Nothing in § 270.203 or the NGPA precludes a state agency from establishing a ceiling price for a sale of gas by an intrastate pipeline affiliate to an intrastate pipeline at a rate which is lower than the NGPA ceiling price. Likewise, a state agency may impute a price for an intracorporate transaction involving intrastate pipeline production which is lower than the NGPA ceiling price.

Some comments received by the Commission interpreted the proposal as one which, contrary to the NGPA, worked to exclude all sales of pipeline-produced natural gas from the provisions of the NGPA. Others interpreted the proposed rule as one which would continue, where applicable, cost-of-service regulation subject to the maximum lawful pricing provisions of the NGPA. Still others, notably intrastate producer pipelines, pointed out cases where state regulation does not take the form of cost-of-service or average cost regulation.

We disagree with those comments that concluded that the Commission is without authority to determine the extent to which sales by pipelines and distribution companies are "attributable" to production by these entities, or their affiliates. Under a broad reading of this section, arguably all sales of natural gas by pipelines and distribution companies would be "first sales" where any volume of natural gas was produced by that pipeline, distribution company or an affiliate. Under such a reading, a substantial portion of retail sales by pipelines and distribution companies would be subject to the provisions of the NGPA.
under such a broad reading of the "first sale" definition, it could be asserted that the provisions of the NGA would not apply to jurisdictional sales by interstate pipelines by reason of section 601 of the NGPA.

Applying the provisions of Title I of the NGPA, particularly section 104, to "first sales" by interstate pipelines under such a broad reading would entail a major restructuring of pipeline regulation under the NGA. Retail sales by intrastate pipelines and distribution companies, which are traditionally regulated by the states, would also be subject to the provisions of Title I of the NGPA and the Commission's authority. Such incongruous results were clearly not intended by the legislative draftman.

For these reasons we have concluded that sales by pipelines and distribution companies should only be considered to be "attributable" to production by pipeline distributors where the sale is of production from identifiable wells, properties or reservoirs owned by such pipelines (or distributor or affiliates thereof) to an identifiable purchaser. In order to prevent circumvention of this rule by pipelines or distributors who sell volumes of production by others together with volumes produced by them, the Commission has found it necessary to exercise its authority under section 2(21)(A)(y) of the NGPA, to impose first sale price regulation on those "mixed" sales where the price is not otherwise subject to regulation or where the Commission affirmatively finds that first sale regulation is unnecessary.

Section 270.205 incorporates discussion at page 83 of the Statement of Managers which relates to the effect of establishment of ceiling prices under the NGPA on indefinite price escalator clauses in existing contracts. As discussed there, the mere establishment of NGPA ceiling prices will not trigger these clauses. The special rule is consistent with that discussion which is equally applicable to existing intrastate and interstate contracts. The phrase "indefinite price escalator clause" is defined for purposes of this special rule by reference to the definition in Section 105(b)(3)(B). Good cause exists to incorporate this special rule in the interim regulations given the uncertainty that would result absent a provision which provides guidance to the parties to those contracts.
PART 271 - SUBPART A

Subpart A of Part 271 sets out, in summary tables, the pricing provisions applicable to certain categories of first sales of natural gas delivered in the months of December 1978 and January 1979. It also provides the method and the inflation adjustment factors to be used for calculating maximum lawful prices for those categories of natural gas for which prices cannot be derived from the summary tables. These latter categories are ones for which maximum lawful prices must be calculated by the seller.

Section 271.102 sets out the methodology by which certain maximum lawful prices are to be calculated. The procedure involves adjustment for inflation and requires only simple multiplication. The price for a given month is calculated by multiplying (1) the price which was allowed for the sale of natural gas delivered in the preceding month, by (2) a single adjustment factor which is published by the Commission. The adjustment factor, referred to as the "monthly equivalent of the annual inflation adjustment factor" in the NGPA, and "inflation adjustment" in the interim regulation, is computed by the Commission under the method of calculation prescribed by section 101(a) and (b) of the NGPA. The inflation adjustment for each month after April 1, 1977, appears in Table III in § 271.102. This adjustment will be published by the Commission at least 5 days before the beginning of any month for which the factor will apply.

The first price from which all maximum lawful prices under § 271.102 are to be calculated is referred to as a "base price." This price varies according to the category of natural gas for which a calculation is to be made. Once this price is known the calculation can proceed, month-to-month, until the applicable monthly maximum lawful price is determined.

By way of example, assume that a calculation is to be made to determine the December 1978, maximum lawful price for natural gas subject to § 271.402(d)(1) for which a just and reasonable rate of $1.00 was in effect on April 20, 1977. First the "base month" and "base price" must be determined. These are determined under § 271.102(d) to be April 1977, and $1.00 respectively. Second, a calculation for May 1978, is made. This is done by multiplying $1.00 by 1.00636, the inflation adjustment for May 1977, as presented in the table accompanying § 271.102(c). The result, rounded to the nearest mill, is $1.006. Next, the process is repeated for June 1978 by multiplying the $1.006
figure by 1.00636, the inflation adjustment for June. The product, again rounded to the nearest mill, is $1.012. This figure is then multiplied by the inflation adjustment for July 1977 (1.00431) and so on through the monthly iterations. The result should be a price of $1.115 for the month of November 1978. At this point, the maximum lawful price applicable for deliveries made in December 1978, can be determined. This is done by multiplying the November figure of $1.115 by 1.00581, the factor which applies for December. The result is a maximum lawful price of $1.121 for deliveries made during December 1978.

This example is chosen to illustrate the calculation which § 271.402 will require of some sellers. Sellers subject to either the § 271.502 or § 271.602 pricing provisions will be entitled to prices based on the contract price per MMBtu on November 9, 1978, or in the case of rollover contracts, the month in which the rollover occurs. In either event, only a single multiplication need be made to determine the next month's maximum lawful price.

PART 271 - SUBPART B

Subpart B of Part 271, which implements section 102 of the NGPA, establishes a maximum lawful price for "new natural gas" and for "natural gas produced from a new OCS reservoir on an old OCS lease." These terms are defined by reference to the NGPA.

Section 271.204(a) is a special rule for vertical measurement of the 1,000 foot distance between completion locations necessary for certain determinations under this subpart. The rule also clarifies the measurement methodology for completions made by perforation and for "open-hole" completions.

Section 271.204 also provides special rules regarding the statutory terms "capable of producing in paying quantities," "commercially producible," "suitable facilities," and "production in commercial quantities."

Comments suggested the term "reservoir" be defined in § 271.203. Section 270.102(a) of the regulations provide that the NGPA statutory definitions are incorporated by reference in the regulations. The term reservoir is defined in section 2(5) of the NGPA.

Comments suggested several modifications to the special rules in § 271.204. Specifically, comments directed toward § 271.204(a) suggested an alternate method of measuring
vertical depth, viz. from the lowest perforation point in the marker well to the highest perforation point in the new well completion location. Further comments suggested that measurement of open-hole completions should be from the total depth of the marker well to the highest point of the new well reservoir. The Commission has considered this suggestion and has decided for reasons of ease of measurement and consistency, not to change the special rule. However, in response to some comments, the rule regarding vertical measurements has been changed to make clear that for open-hole completions, measurements are from the highest elevation point of the reservoir "within the well bore."

Several comments sought modification of the special rule regarding "commercially producible" arguing that section 102(d)(2)(B)(ii) of the NGPA requires a determination based upon the producing characteristics of the reservoir. The Commission has found no basis for concluding that the term "commercially producible" has a meaning different from "production in commercial quantities." The latter term is defined in § 270.102(b)(4) of the regulations.

Other comments suggested that the language in § 271.204(d), which provides that suitable facilities were in existence if such facilities were "substantially installed and additional facilities necessary for such production and delivery were readily available," should be deleted or modified. It is the Commission's position that the statutory term "suitable facilities" includes facilities which were installed or substantially installed, if any additional facilities necessary for production and delivery were readily available. However, the section has been modified, in response to comments, to make clear that unless suitable facilities were actually in place, such facilities will not be considered to be "readily available" unless the additional facilities could have been installed in time to allow production and delivery to commence prior to April 20, 1977.

Finally, in response to other comments, § 271.204(d) has been modified to reflect the statutory provisions that facilities installed solely for purposes of sales under section 6 of the Emergency Natural Gas Act of 1977, or for the purposes of 60-day emergency sales are not "suitable facilities" within the meaning of section 102 of the Act.
PART 271 - SUBPART C

Subpart C of Part 271 implements section 103 of the NGPA and establishes a maximum lawful price for first sales of natural gas from new, onshore production wells. Section 271.303 defines a "new, onshore production well" in accordance with the statutory definition in section 103(c), as one spudded on or after February 19, 1977, which complies with applicable well-spacing requirements, and is outside an existing proration unit. Wells which do not comply with applicable well-spacing requirements or are drilled within an existing proration unit do not qualify for the new, onshore production well price unless the requirements of the special rule set out in § 271.304 are met. Section 271.304 makes clear that if a jurisdictional agency grants a waiver of well-spacing requirements prior to commencement of surface drilling, the new well is deemed to satisfy applicable well-spacing requirements.

The special rule in § 271.305 is divided into two parts. The first part, paragraph (b) of § 271.305, provides that for wells spudded after December 31, 1978, the requirements of section 103(c)(3) of the NGPA can only be satisfied if the jurisdictional agency finds that the well is necessary to effectively and efficiently drain a portion of the reservoir covered by the proration unit, which portion of the reservoir cannot be effectively and efficiently drained by any existing well within the proration unit. Such a finding must involve a redefinition or alteration of the proration unit, or an exception to otherwise applicable well-spacing requirements.

Paragraph (c) of the rule recognizes that some wells drilled between February 19, 1977, and January 1, 1979, may qualify for the price established in section 103. The rule permits such wells to qualify if the agency which authorized the drilling of the new well explicitly or implicitly made the finding, prior to commencement of the drilling of the well, that the new well was necessary to effectively and efficiently drain a portion of the reservoir covered by the proration unit, which portion of the reservoir could not be effectively and efficiently drained by any existing well within the proration unit. Similar treatment is accorded certain wells for which drilling permits are issued prior to January 1, 1979.

Numerous comments requested that the applicability of the special rule in § 271.305 be clarified. The special rule only applies to a second well drilled in
an existing proration unit. If there is no proration unit in existence and applicable to the reservoir, or if there is no well drilled in the existing proration unit to the reservoir, the special rule does not apply. Paragraph (a) of the special rule regarding the applicability of the rule has been revised to clarify this point.

Several comments requested a transition period during which jurisdictional agencies may develop procedures necessary to make the explicit finding required by §271.305(b). The Commission recognizes the need to permit a sufficient transition period. Paragraph (b) now applies to "wells spudded after December 31, 1978," and paragraph (c) now applies to "wells spudded on or after February 19, 1977, and before January 1, 1978."

Many comments questioned whether the finding that the new well is necessary to effectively and efficiently drain a portion of the reservoir covered by the proration unit which cannot be effectively and efficiently drained by any existing well within the proration unit must be made prior to the commencement of drilling. Comments stated that this requirement would cause drilling delays or make it impossible to obtain a new, onshore production well determination for wells drilled prior to the date of enactment. The Commission believes that the statute requires that the necessary finding be made prior to the commencement of drilling. Consequently, this aspect of the special rule in §271.305 remains unchanged.
PART 271 - SUBPART D

Subpart D of Part 271 implements sections 104 and 106(a) of the NGPA. These sections prescribe the maximum lawful price for the first sale of natural gas which was committed or dedicated to interstate commerce on November 8, 1978, and for which a just and reasonable rate under the NGA was in effect. Under section 104, the maximum lawful price is the just and reasonable rate for each vintage of gas established by the Commission as of April 20, 1977, as adjusted monthly for inflation from that date forward. Just and reasonable rates established by the Commission after April 20, 1977, constitute the ceiling rates under section 104 and are not generally adjusted for inflation. Section 106(a) prescribes the maximum lawful price for rollover contracts executed after November 9, 1978.

The interim regulations set forth the maximum lawful price applicable to each vintage of gas and define the various vintages of gas established by the Commission's national or area rate opinions. Rules for calculating the maximum lawful price applicable to natural gas for which a nonvintage just and reasonable rate was not previously established under special relief and optional procedures are also included in this subpart.

Section 271.402(a) of Subpart D includes a table of maximum lawful prices for each vintage of previously committed or dedicated natural gas. Transition from the Natural Gas Act prices to the NGPA prices affects two of the prices included therein differently from other categories. First, the price established in section 106(a) of the NGPA for sales by small producers of rollover contract gas is less than the rate such producers would have received for the same category of gas under the Natural Gas Act. Pursuant to § 157.40(c)(1) of this chapter, small producers were entitled, under the Natural Gas Act, to 130% of the maximum base rate established by the Commission for replacement contracts. Thus, for replacement contracts entered into prior to November 9, 1978, section 104 of the NGPA, which is keyed to the rates previously established by the Commission, prescribes a rate reflecting this 30% differential for sales by small producers. However, for contracts rolling over on or after November 9, 1978, section 106(a) prescribes a rate of 54 cents per MMBtu, as adjusted for inflation from April 20, 1977, for both large and small producers. As a result of this anomaly, a small producer who executed a replacement contract prior to November 9, 1978, would be entitled to a rate of 77.1 cents per MMBtu as of December 1, 1978, whereas a small producer who executed a rollover contract on or after
November 9, 1978, would be entitled, under section 106(a), to a rate of 60.3 cents per MMBtu.

In order to prevent a small producer from receiving a rate under the NGPA lower than that to which he would be entitled under the Natural Gas Act, the Commission finds it necessary to invoke our authority under section 106(c) of the NGPA. This section provides that the Commission may prescribe a maximum lawful price higher than would otherwise be applicable under section 106 if such higher rate is determined to be just and reasonable within the meaning of the Natural Gas Act. The Commission finds, pursuant to this section, that the rate previously established by the Commission for small producer replacement contract gas is just and reasonable within the meaning of the Natural Gas Act, and should be made applicable to small producer sales of rollover contract gas. The price so determined is 70.2 cents per MMBtu as of December 1, 1978. This price may be increased, in accordance with Opinion Nos. 770, et seq., and Opinion Nos. 742, et seq., by an amount not to exceed 1.3 cents per MMBtu per annum commencing on January 1, 1979, and the first day of every year thereafter for the term of the contract dedicating the subject gas for sale in interstate commerce.

We note that this price is still not identical to the 77.1 cents per MMBtu price prescribed in the table for small producer sales of replacement contract gas. The price in the table was determined by adjusting for inflation the April 20, 1977, price of 68.9 cents per MMBtu established by the Commission for replacement contract gas. We invite the submission of data, views and arguments on or before December 15, 1978, regarding the question whether, under the standard set forth in section 106(c), the 70.2 cents per MMBtu rate applicable to small producer rollover contracts should be found not just and reasonable, and the just and reasonable rate should be raised to the 77.1 cents per MMBtu rate as adjusted for inflation in months following December 1978.

One commenting party argues that the Commission has exceeded its authority in raising the small producer rollover contract rate to 70.2 cents per MMBtu. The comment alleged that by not mentioning small producers in section 106(a), Congress intended to eliminate the small producer differential for rollover contract gas. We disagree. The Commission believes the intent of Congress, as expressed in sections 104 and 106(a) of the NGPA, was to key the price of previously committed or dedicated gas to the prices previously determined by the Commission to be.
just and reasonable under the Natural Gas Act. Accordingly, we believe that the failure of section 106(a) to mention small producers was inadvertent rather than intentional. In any event, the Congress clearly provided the Commission with the authority, under section 106(c), to prescribe a just and reasonable rate for small producers selling rollover contract gas which is higher than that provided in section 106(a).

A second transition problem exists regarding the large producer rate for rollover contracts prescribed in section 106(a). Such rate is determined by applying the inflation adjustment factor to an April 1977 rate of 54 cents per MMBtu in order to arrive at a December 1, 1978, rate of 60.3 cents per MMBtu. However, the large producer rate for replacement contracts was 53 cents as of April 20, 1977, which when adjusted for inflation translates to a rate of 59.3 cents per MMBtu as of December 1, 1978. Again, we note that the only difference between a replacement contract and rollover contract is that the latter is executed on or after November 9, 1978. In view of this disparity in treatment for the same types of sales of natural gas, we invite the submission of data, views and arguments on or before December 15, 1978, regarding the question whether, under the standard set forth in section 104(b)(2), the large producer replacement contract rate of 59.3 cents per MMBtu should be found not just and reasonable, and the just and reasonable rate should be raised to the 60.3 cents per MMBtu rate for large producer rollover contracts.

Under § 271.402(d)(2) of these regulations, any "just and reasonable" rate established by the Commission for a sale of natural gas after April 20, 1977, and prior to November 9, 1978, is the maximum lawful price applicable to such sale if higher than the otherwise applicable price prescribed in § 271.402(a) or (d)(1). As to producer applications under the optional procedure regulation set forth in § 2.75 of this chapter, a "just and reasonable" rate is that rate established by the Commission in its final order on such applications. However, the holder of a certificate issued by the Commission under the optional procedure was required to waive the right to receive the applicable national and area rates and other rights under section 4 of the Natural Gas Act and regulations thereunder, we do not believe that the inflation adjustment should apply to rates established under the optional procedure.

Under § 271.403 of these regulations, we have provided a special rule regarding a carrying charge adjustment for advance payments. In Opinion No. 770-A, the Federal Power
Commission recognized that capital generated through the advance payment program was no longer required to bring additional gas supplies to the interstate market. The Commission noted that the rate level set forth in that opinion was designed to achieve the capital formation objective. Accordingly, the Commission found that as to additional advance payments made after the issuance of that opinion, it would be inequitable to require consumers also to pay the carrying charges on these amounts.

The Commission determined that producers who accept advance payments after the date of the opinion should reduce the rate prescribed therein for post-1974 gas which was committed under any further advance payments by the cost of the advances borne by consumers.

Because of these same considerations, we have provided in §271.403 for the same adjustment in the rates charged by producers for post-1974 gas. Producers subject to this carrying charge rule would be required to reduce their rates by .83 cents per MMBtu for all deliveries made pursuant to the applicable advance payment agreement until the total amounts so deducted equal the amounts collected by the purchasing pipeline from its customers as a result of including the applicable advance payments in their rate base.

Several parties commented that §271.402(a) should include a reference to the minimum rate of 18 cents per Mcf prescribed by §2.56(b) of this chapter. These parties also stated that this 18 cents per Mcf minimum rate be adjusted for inflation as provided for in section 104(b)(1)(A).

We agree that the 18 cents per Mcf minimum rate should be included in the table of rates set forth in §271.402(a) and should be adjusted for inflation as provided in section 104(b)(1)(A). Accordingly, we have added a new category to the table of rates set forth in §271.402(a) which is entitled "minimum rate gas." Also, we have added a new subparagraph (9) to §271.402(c) which defines this term.

Several comments were received regarding the "small producer" definition set forth in §271.402(c)(9). One comment suggested that the definition be expanded to include a crossreference to §157.40, the current regulation governing sales made by small producers. Specifically, this comment requested that it be made clear that the small producer rates established under sections 104 and 106(a) should only be applicable to sales from "small producer reserves" as defined in §157.40. In order to clarify this matter, we have deleted the definition of small producer and, in its place, provided a definition of "small
producer sales" which references the requirements of § 157.40 under which such sales may qualify for the small producer rate.

One comment recommended that we amend the definition of small producer to permit the small producer exemption to apply even where the producer is a director of a class A pipeline company and the producer makes no sales to such pipeline company. This prohibition against affiliation with a class A pipeline company was incorporated in the current small producer regulations set forth in § 157.40 as promulgated by Order No. 568. On rehearing of Order No. 568, the issue presented in this comment was raised. Since this issue is more appropriately raised in the context of Order No. 568, we shall address it on rehearing of that order.

Finally, a comment was received recommending that small producers be defined by reference to the level of sales in both the inter- and intrastate markets, because the NGPA abolished this distinction between the markets. However, the small producer definition set forth in § 271.402(c)(4) is only applicable to sales of natural gas which was previously committed or dedicated to interstate commerce, and the maximum lawful prices established for such gas are based on the just and reasonable rates previously established by the Commission. Accordingly, the small producer exemption which is provided for under the Commission's current pricing regulations and which is based solely on the level of inter-state sales, should be maintained. To include intrastate sales in the exemption rule would mean that certain producers would receive a rate under the NGPA lower than that to which they would be entitled under the Natural Gas Act, a result clearly not intended under sections 104 and 106(a).

One party indicated that the term "replacement contract" as used in § 271.402(c)(4) should be clarified in that it may be confused with the term "successor to an existing contract" under section 2(14) of the NGPA. No further clarification in the regulations need be made because the two terms are distinguishable on their face. First, "successor to an existing contract" means a contract executed on or after November 9, 1978, whereas a "replacement contract" refers only to contracts executed prior to that date. Also, a replacement contract also differs from a "successor to an existing contract" in that it refers only to contracts for the sale of natural gas which was previously subject to an existing contract which expired by its own terms.

Subpart E of Part 271 implements section 105 of the NGPA by setting forth the procedure for determining the maximum lawful price for first sales of natural gas under existing, or successors to existing, intrastate contracts. No prior Commission approval is required in order to collect the maximum lawful prices established in this subpart. Persons making sales under existing intrastate contracts need only file reports as provided in Part 276. "Existing intrastate contracts" are defined in § 270.102(b)(8) to be any intrastate contracts for the first sale of natural gas in existence on November 8, 1978.

Although throughout the proposed regulations the reference is to intrastate contracts, it should be noted that these provisions apply to contracts which govern the sale of natural gas which was not committed or dedicated to interstate commerce on November 8, 1978, (the day before the date of enactment of the NGPA). Included in this category is any gas which was sold in interstate commerce under an emergency sale, a limited term certificate, and certain direct sales for which specific transportation certificates had been issued by the Commission.

Under Subpart E of the proposed regulations, the maximum lawful prices depend upon the relationship that existed on November 9, 1978, between the price under the terms of the existing intrastate contract and the new natural gas price. Under § 271.502(a), if the existing intrastate contract price was less than the new natural gas price, then the maximum lawful price will be, pursuant to section 105(b)(1) of the NGPA, the lower of the new natural gas price of $2.060 per MMBtu or the price under the terms of the existing intrastate contract on November 9, 1978, (as such price may be changed from time to time in accordance with contract terms in effect on November 9, 1978). Under § 271.502(b), if the existing intrastate contract price exceeded the new natural gas price of $2.060 per MMBtu on November 9, 1978, then the maximum lawful price will be the higher of the new natural gas price or the existing intrastate contract price limited to escalation by the monthly equivalent of the annual inflation adjustment factor.

The term "contract price" is defined in § 271.504 to mean the price per MMBtu charged for deliveries of natural gas occurring on November 9, 1978, or the price that would have been charged had deliveries occurred on that date.
Comments were received from various parties concerning our use of the phrase "contract price" in § 271.502(a)(1). They asserted that its use in that paragraph caused confusion as to whether future contractually authorized fixed or indefinite price escalator clauses, including price reevaluation provisions, operate to effect price increases. The commenters fear that an interpretation more restrictive than required by the legislation would apply in the case of § 271.502(a)(1). One commenter therefore suggested that § 271.502(a)(1) be revised to track the statutory language in section 105(b)(1)(A) of the NGPA to refer to the "price under the terms of the existing contract." We agree and we have revised § 271.502 (a)(1) to track the appropriate statutory language. This change should allay the apprehensions of those commenters who feared that fixed or indefinite price escalator clauses in contracts were abrogated by § 271.502(a)(1).

One comment suggested adding a new section which would provide, inter alia, that the mere establishment of ceiling prices under the NGPA shall not trigger indefinite price escalator clauses in existing intrastate contracts. Only prices actually paid for sales actually made under the NGPA would trigger such clauses. This is similar to language at page 83 of the Joint Explanatory Statement of the Committee on Conference and reflects, in our opinion, the general intent of Congress with respect to sales under all existing contracts, whether inter- or intrastate.

Accordingly as discussed above, we have added a new section 270.205 which provides that the establishment of maximum lawful prices under the NGPA shall not trigger "indefinite price escalator provisions," as defined in the NGPA in either existing intrastate or interstate contracts.

A comment suggested that § 271.502(a)(2) should be revised to allow the § 271.802 stripper well maximum lawful price to apply, instead of the new natural gas price, in any case where there is no contract price for such month or when prices for life-of-well contracts are established from time to time by price lists published by the buyer. We do not find merit in this suggestion. Section 105(b)(1)(B) is quite specific and only provides for the new natural gas rate. However, we have altered the language of § 271.502(a) slightly in order to make clear that that section applies in any case where there is no contract price established on November 9, 1978.

Another comment asserted that the previous language of § 271.504, respecting take-or-pay clauses, may lead to undue burdens where the purchaser has not made payments under a
take-or-pay clause or where the parties to the contract have not calculated the volumes to be taken under such clause. It was suggested that the last sentence of § 271.504, dealing with take-or-pay clauses, should either be eliminated or revised. We concur and have established a special provision in paragraph (b) of § 271.505 concerning the effect of take-or-pay clauses which incorporates the commentor's suggested revision. However, we wish to emphasize that this rule is to apply only with respect to the determination of "contract price" on November 9, 1978. It does not apply with respect to any other date (except to the extent the maximum lawful price is determined by reference to the contract price on such date).

Another comment sought clarification of the right to collect a contract price under § 271.502 that exceeds the new natural gas price solely because of the inclusion of contractually authorized payments for state severance taxes allowed under § 110 of the NGPA. No modification of Subpart E is required. The rules for determining adjustments for state severance taxes are found in Subpart K of this part.

Uncertainty was also expressed as to whether regulations under Subpart K would cause a roll-back of the contract price to less than $1.00 per MMBtu in a case where it exceeds $1.00 per MMBtu because of reimbursement for state severance taxes. No such "roll-back" would occur if the severance tax provision was in the existing intrastate contract and effective as of November 9, 1978. No revision of Subpart E is required to reflect that fact.

Subpart E sets forth a special rule limiting the effects of modifications of contract terms executed after November 9, 1978. Section 271.505 has been revised to provide in paragraph (a)(1) that no such modification may have the effect of requiring the purchaser to bear any production-related costs which were allocated to the seller under the terms of the existing contract. We have also added a new paragraph (b) which clarifies that paragraph (a) does not preclude contract modifications in the limited circumstance in which a purchaser who was not a party to the existing intrastate contract agrees to bear responsibility to pay for increased production-related costs. The costs contemplated in this new paragraph are those necessary to enable the new purchaser to take delivery of the natural gas subject to the existing contract. We have made this revision in response to a comment pointing out that a new pipeline purchaser may have to install facilities to permit deliveries into its system which would be prohibited under a literal reading of this section. Paragraph (a)(2) of
§ 271.505 stipulates that no such modification may provide for an earlier date for deliveries than that provided for in the existing contract.

The previous paragraph (b) of § 271.505, which has now been deleted, provided that no modifications to existing successors to existing intrastate contracts may alter the terms of such contract to provide for a higher price. It was suggested that there was an ambiguity created by paragraph (b) respecting the right of parties to amend existing intrastate contracts where the sales under those contracts otherwise qualify for maximum lawful prices under another subpart of Part 271, and as to whether amendments relating to state severance taxes or production-related costs allowed under § 110 of NGPA are not considered part of the ceiling price. We have deleted the former paragraph (b) of § 271.505 that would have precluded such modifications and have restricted the scope of that section to Subpart E. The Commission wishes to study the matter further before specifying the latitude parties have to effect bilateral modifications to the terms of contracts in existence on November 9, 1978, and invites further comments thereon. Interpretation of contracts remains an initial responsibility of parties thereto.

PART 271 - SUBPART F

Subpart F of Part 271 implements section 106(b) of the NGPA. Subpart F applies to first sales of natural gas under intrastate rollover contracts, and sets forth the procedure for determining the maximum lawful price applicable to such sales.

Tables are provided in the regulation for the prices permitted to be charged under section 106(b)(1) and section 106(b)(2). As is the case with sales qualifying under Subpart E, persons who sell gas pursuant to intrastate rollover contracts may collect the maximum lawful prices without prior Commission approval. Reporting requirements with respect such sales are found in Part 276.

The maximum lawful price under Subpart F for first sales of natural gas under section 106(b)(1) of the NGPA is the higher of (a) the maximum price under the expired intrastate contract in the month of expiration as escalated by the monthly equivalent of the annual inflation adjustment factor, or (b) $1.10 per MMBtu escalated from April 1977 by the same inflation adjustment. Section 271.602(b) provides for the maximum lawful price for natural gas which may be charged for a certain state or an Indian tribe's natural gas production interests under section 106(b)(2) of the NGPA.
Subpart F also contains a special rule similar to the rule in § 271.505. Section 271.604 provides that no intrastate rollover contract may have the effect of shifting to the purchaser, production-related costs which were allocated to the seller under the expired contract.

We received one comment asserting that § 271.505 as proposed might have an adverse effect on interstate pipelines seeking to gain intrastate natural gas. The commentor suggested that § 271.505 should not operate to preclude intrastate rollover contracts from requiring the purchaser to bear costs of installing facilities necessary for the purchaser to take physical delivery of the gas. We have added a new paragraph (b) to this section which provides that a new purchaser may agree to incur increased production-related costs if such costs are necessary for the purchaser to take delivery of the natural gas. We deleted paragraph (b) of the previous draft which related to modifications of delivery dates after having concluded that such a restriction is unnecessary.

One comment asserted that Subpart F may not permit persons making final sales under intrastate rollover con-

tracts to collect severance taxes, borne by the seller and allowed under section 110 of the NGPA, in addition to the maximum lawful price.

The rule is not intended to restrict the collection of contractually authorized maximum lawful prices for which sales otherwise qualify. However, where the contract is silent as to payment of state severance taxes, the seller shall be presumed to be obligated to pay these taxes.

Finally, a comment requested a clarification of the effect of Subparts E and F in cases where sales were being made on November 9, 1978, pursuant to limited term or emergency sales contracts. As the November 15, 1978, notice stated, natural gas sold in interstate commerce under such contracts is excluded from the definition of "committed or dedicated to interstate commerce" under section 2(18) of the NGPA. Accordingly, the maximum lawful prices of Subparts E and F may apply to such sales.
PART 271 - SUBPART G

Subpart G of Part 271 implements section 107 (a) of the NGPA, which applies to first sales of natural gas from deep high-cost natural gas wells. It contains a special rule in § 271.704 clarifying the method of determining the depth of a well.

Section 107 of the Act authorizes the Commission to establish incentive prices for gas from geopressurized brine, occluded natural gas from coal seams, and gas from Devonian shale. It also authorizes the Commission to establish incentive prices for gas produced under other conditions as the Commission determines present extraordinary risks or costs.

This interim regulation does not attempt to implement the provisions of section 107 except as that section specifies prices for deep high-cost gas wells. Practical considerations have precluded our undertaking that effort at this time.

Comments suggested that the special rule in § 271.704, which provides the method of measurement to be used in this subpart, is "inapplicable to offshore wells." It was requested that for offshore wells the measurement be made from the floor of the drilling rig rather than from the surface of the ground. As written, the regulation reflects what the Commission believes to be the appropriate point from which to measure the depth of the well. However, the Commission specifically requests additional comments with supporting data on the appropriate point from which to measure the 15,000 foot depth for offshore production.
PART 271 - SUBPART H

Subpart H of Part 271 implements section 108 of the NGPA, which is applicable to first sales of natural gas produced from stripper wells. This subpart contains definitions of terms used in section 108, and prescribes several special rules intended to assist in implementation.

Section 108 of the NGPA provides a maximum lawful price for stripper well natural gas, and prescribes a definition for stripper well gas. According to the general rule prescribed in section 108(b)(1) of the statute, natural gas is stripper well natural gas if, during the 90-day production period preceding the date on which application is made for a determination, the well produced nonassociated natural gas at its maximum efficient rate of flow and did not exceed an average of 60 Mcf per production day. Natural gas may qualify as stripper well natural gas regardless of the spud date for the producing well. Section 108(b)(2) also provides that a well may, after initial qualification, continue to qualify as a stripper well if production exceeds 60 Mcf per day during any 90-day production period, so long as the increased production is determined to have resulted from the application of recognized enhanced recovery techniques.

Section 271.803 of Subpart H defines "recognized enhanced recovery techniques" and "nonassociated natural gas." The definition of "recognized enhanced recovery techniques" includes processes or equipment which increase the ultimate recovery of gas from a well and excludes techniques or equipment necessary for normal well maintenance, repair or replacement.

The definition of "nonassociated natural gas" would permit a stripper well to qualify under this subpart if it produces crude oil in volumes which do not exceed specific limits. The rule provides for a sliding-scale ratio of natural gas to crude oil production. If a well produced an average volume of between 50 and 60 Mcf of gas per production day in the 90-day production period, it would qualify as a stripper well, provided that it produced no more than 1 barrel of crude oil during the same period. If, on the other hand, a well produced an average volume of between 30 and 50 Mcf per production day, it would qualify if crude oil production did not exceed 2 barrels per production day. Wells below 30 Mcf would qualify if crude oil production did not exceed 3 barrels per day.
Section 271.804 sets forth special rules which interpret and apply terms used in the NGPA. Section 271.804(a) and (b) concern the methodology for measurement of production from a well. Section 271.804(a) states that the volumetric basis for determining the rate of production from a single well is the total volume of gas produced from all producing intervals of the well.

Section 271.804(b) applies when the wells are not individually metered. In this circumstance, jurisdictional agencies may average rates of production in order to determine whether particular wells are stripper wells. For example, if six wells were attached to a single meter, and the meter showed deliveries averaging 360 Mcf per production day or less, presumptively all wells would qualify. If, on the other hand, deliveries from the six wells averaged 370 Mcf per production day, then presumptively, none of the wells would qualify. In either case, alternative evidence may be offered in rebuttal to establish qualification or the lack of qualification.

Section 271.804(d) is a rule applying the statutory requirements with respect to "maximum efficient rate of flow" (MER). The section sets forth the statutory requirement. It also provides that a well is presumed to have produced at its MER during the 90-day production period if it produced an average volume of 60 Mcf or less per production day during a 12-month period ending concurrently with the 90-day production period upon which the determination is based. There may, however, be situations in which a 12-month production history is not available. In such situations, the jurisdictional agency may look to other types of evidence, such as flow tests, which would measure the production capability of a well, or it may defer making the determination for a time necessary to acquire and submit a 12-month production history. If the agency defers the determination, the applicant would, if contractually entitled, be able to collect the stripper well price subject to refund.

The special rules contained in § 271.804(d) are designed to create a presumption upon which the jurisdictional agency may rely to determine that the well for which a determination is sought produced at its maximum efficient rate of flow during the 90-day production period upon which the application is based. This presumption is not exclusive, however. If results of well flow tests or other tests designed to determine the production capability of a well are available, the jurisdictional agency may rely on such results or other substantial evidence to make the factual finding that the well produced at its maximum efficient rate of flow.
Section 271.804(e) is a special rule which permits wells to retain stripper status despite increases in production above the 60 Mcf per day level, provided the increase is attributable to seasonal fluctuations. Jurisdictional agencies may make the determination that a well is seasonally affected on the basis of production history over a 24-month period if production from the well has not and cannot reasonably be expected to have exceeded an average of 60 Mcf per day for any 12-month period.

Section 271.805 is a rule implementing section 108(b)(2) of the NGPA. The rule disqualifies wells which, subsequent to the jurisdictional agency determination, produce quantities of gas in excess of the amounts permitted by the law and this subpart.

This rule provides for a reporting mechanism to monitor the continued qualification of the well. Both the operator of the well and the purchaser of the gas are obligated to report any increase in gas production above an average of 60 Mcf per production day for any 90-day production period. Unless the operator receives a determination from a jurisdictional agency that the increase was due to the application of recognized enhanced recovery techniques, or is determined to be seasonally affected, he may no longer collect the stripper price for the well. If the operator files a petition for a determination that the increase in production results from enhanced recovery techniques or seasonal fluctuations, continued collection of the stripper well price shall be made subject to refund for deliveries made after the last day of the applicable 90-day or 12-month production period.

Most of the comments on this section were addressed to the proposed definition of "nonassociated natural gas." Many of the comments were made by persons from the Appalachian area -- Ohio, West Virginia, Pennsylvania, and Kentucky. Comments from the State of New Mexico also expressed concern over the definition of "nonassociated natural gas."

With only one exception, all of the parties concluded that the Commission's proposed definition of "nonassociated natural gas" was too restrictive. More specifically, they suggested that to base eligibility under this subpart on the showing that the well produced an average of one barrel of oil or less per production day for a 90-day production period will exclude many marginal wells in the Appalachian area from qualifying as stripper wells.

These comments asserted that the "one-barrel" limitation will result in the premature plugging and abandonment of marginal gas wells in the area which in turn could result in a permanent loss of reserves. It was argued that the
definition was unduly restrictive and was neither required
nor contemplated by the law.

As is noted above, the Commission has decided to expand
its definition of "nonassociated natural gas" so as to permit,
in certain instances, a higher crude oil-to-natural gas
production ratio than was originally proposed. The new
definition uses a "sliding scale" which permits greater
 crude oil production as gas production declines. This
approach is predicated in part on the economics of producing
oil and gas from a marginal gas well. The new definition
recognizes the limited revenues from marginal wells and
attempts to provide a reasonable incentive to preserve this
production. The Commission believes that the definition is
a reasonable one, and is of the type contemplated by the
authority given it in section 501(b) of the NGPA.

It was suggested that the proposed special rule which
requires the total volume of natural gas produced from the
well be utilized for purposes of calculating the average
rate of production, regardless of whether the well is com-
pleted in more than one interval (§ 271.804(a)), be deleted.
In support of this recommendation, it was argued that the
proposed definition was contrary to the statutory intent of
maintaining production from economically marginal wells.

In several instances, the NGPA clearly distinguishes
between the terms "completion location" and "well." The
terms are separately defined in section 2 of the NGPA. In
sections 102 and 107 the distinction between "completion
location" and "well" is clearly the basis for several determin-
ations. However, section 108 provides that the stripper
well natural gas classification can only be obtained for
production from a "well." Unlike other sections, no mention
is made of a "completion location" within a well. Accordingly,
we have not adopted this recommendation.

One comment recommended that the special rule on
"seasonally affected wells" (§ 271.804(e)) should be deleted
because section 108 does not provide a statutory predicate
for such a rule. The Commission disagrees. Production
from a well often varies as a result of the pressure differ-
centials created by temperature fluctuations. A rule that
ignores this occurrence would place an undue administrative
burden on producers, states and the Commission. Many wells
would have to go through the qualification and disqualification
process each year. For these wells the Commission believes
that once a well qualifies as a stripper well, the provision
permitting it to remain qualified as long as production does
not exceed 60 MCF per production day on a yearly basis, where
the well is determined to be seasonally affected, is both practical and within the spirit and intent of the law. The Commission believes that the practical result of not providing this exception to the 60-Mcf-per-production-day rule requires this exercise of its rulemaking authority under section 501(a) of the NGPA.

It was also proposed that §§ 271.804, 271.805, and 271.806 be amended to delete references to "90-day production period" and to insert in its place the phrase, "3-month production period." It was argued that this change will greatly simplify the administration of the regulations. It was further argued that because production records are kept on a monthly basis rather than a daily basis, it is impossible to calculate the 90-day production period figure required by section 108 of NGPA.

The Commission has incorporated the statutory language in its regulations. The Commission recognizes that production records and billing statements are often kept on a monthly basis. Consequently, the Commission believes that reasonable assumptions premised upon such records, which attempt to calculate average production per production day for the 90-day production period upon which the application is based, will provide the jurisdictional agency with sufficient evidence upon which a determination may be made.

Several comments requested that we define "recognized enhanced recovery techniques" with greater specificity. Some comments suggested that the proposed definition should be drafted to specifically exclude wellhead compression techniques.

The Commission believes that the term "recognized enhanced recovery techniques" should not be more explicitly defined until more experience has been gained as to what specific equipment and processes should be included. It is anticipated that the Commission will identify specific enhanced recovery techniques in the future. In the interim, the Commission will address the question of whether enhanced recovery techniques have been applied on a case-by-case basis. After some experience, the Commission will determine whether general rules are either necessary or desirable.

It was pointed out that the determination as to what constitutes enhanced recovery techniques under § 271.803(a) should be left to jurisdictional agencies and not to the Commission. This suggestion is contrary to the statutory requirement of section 108(b)(2). This section requires that the Commission provide a rule for continued qualification of nonassociated natural gas where such natural gas is produced from a well when production from such well exceeds 60 Mcf per production day as a result of the application of enhanced recovery techniques.
The rule promulgated by the Commission to implement this section relies on the expertise of both the jurisdictional agencies and the Commission. This reliance is required at this time since the question of whether enhanced recovery techniques have been applied will often turn upon factual considerations.

Finally, the Commission was asked to require that all flow tests be made by employees of jurisdictional agencies or independent engineers certified by a jurisdictional agency. At this time, we find that this requirement is unnecessary.

PART 271 - SUBPART I

Subpart I of Part 271 implements section 109 of the NGPA by setting a maximum lawful price for "other categories of natural gas," that is, for first sales of natural gas that are not covered by any maximum lawful price under any other subpart of Part 271. [Emphasis supplied.]

Section 109 of the NGPA presents an important question of interpretation. The portion of section 109(a) which precedes paragraph (1) limits section 109's application to "natural gas which is not covered by any maximum lawful price under any other section of this subtitle." [Emphasis supplied.] However, paragraph (1) of section 109(a) specifically includes natural gas "produced from any new well not otherwise qualifying for a higher maximum lawful price." [Emphasis supplied.] The question presented is whether the general language in section 109(a) is intended to limit the scope of the examples which follow (so that new wells which qualified for a lower price under another section of the NGPA would be excluded from section 109), or whether the specific examples override the general statement of the scope of section 109 (so that new wells otherwise subject to a maximum lawful price which is lower than the section 109 price nonetheless would be eligible for the higher section 109 price).
In this regard, it should be noted that the portion of section 109(a) which precedes paragraphs (1) through (4) introduces those paragraphs with the word "including." Under general rules of construction therefore, it would appear that paragraphs (1) through (4) are qualified and controlled by the general statement of applicability which limits section 109 to first sales not covered by any maximum lawful price. For this reason, the Commission is of the view that the first interpretation is correct and has incorporated that interpretation in the regulations implementing section 109. A special rule in § 271.904 provides that the maximum lawful price in this subpart applies to a first sale of natural gas described in paragraphs (1), (2), (3), or (4) of section 109(a) only if that first sale is not covered by any other maximum lawful price in the NGPA.

Several comments were received which argue that the interpretation of section 109(a) which is reflected in the regulations is wrong. These comments state that the specific examples set forth in section 109(a)(1) through (4) are intended as additions to the general category set forth in the portion of section 109(a) which precedes paragraph (1). We specifically invite further comments on this issue.

Finally, a comment was submitted recommending that § 271.904(a) contain a reference to § 273.201 in order to help eliminate confusion over the right of the producer initially to apply for the section 109 price under the interim collection regulations. The recommendation is in error in that natural gas which qualifies for the interim rate under § 273.201 must also be the subject of an application for a determination under Subparts B, C, G, or H of Part 271. The natural gas subject to the price established in § 271.904(a) under section 109 of the NGPA cannot, by definition, qualify under those subparts.
PART 271 - SUBPART K

Subpart K of Part 271 of the Commission's interim regulations implements section 110 of the NGPA. That section permits a first sale price of natural gas to exceed the applicable maximum lawful price for that sale to the extent necessary to recover state severance taxes borne by the seller. It also permits a first sale price of natural gas to exceed the applicable maximum lawful price for that sale to the extent necessary to permit the recovery of allowances for certain production-related costs which are a component of just and reasonable rates established under the NGA and certain production-related costs for natural gas not subject to just and reasonable rates under the NGA, if such costs are borne by the seller, and allowed by the Commission.

Section 271.1101(a) incorporates the definition of "state severance tax" contained in section 110(c) of the NGPA. This definition includes most types of production taxes, including ad valorem taxes which are based upon the amount of production. Therefore, the Commission believes it is unnecessary to specifically include the various types of severance taxes in the definition. Subparagraph (2) of paragraph (a) of § 271.1101 incorporates the statutory exclusion of taxes, which were enacted on or after December 1, 1977, and which do not apply equally to natural gas produced for delivery to interstate commerce and gas produced but not so delivered.

Section 271.1102 states that the maximum lawful price applicable to a first sale of natural gas will not be deemed to be exceeded, if the first sale price exceeds the maximum lawful price only to the extent necessary to recover state severance taxes borne by the seller. Paragraph (b) of § 271.1102 acknowledges that the just and reasonable rates applicable to natural gas produced from the Permian Basin area already include a specific allowance for state severance taxes. Therefore, those amounts are excluded from the provisions of the section so as not to permit double-recovery by the seller of State severance taxes for production in the Permian Basin which is subject to the Permian Basin area rate. State severance taxes actually paid by the seller in excess of 2.6 cents per Mcf for large producers and 3.05 cents per Mcf for small producers will be permitted to be recovered under paragraph (a) of § 271.1102 (so long as such taxes are paid by the seller).

Section 271.1103 contains a requirement that sellers retain records verifying the amount of state severance taxes borne by the seller for transactions in which the maximum lawful price is exceeded as a result of the addition of amounts necessary to recover state severance taxes.
Section 271.1104 provides that an applicable maximum lawful price for a first sale may be exceeded to the extent necessary to recover certain allowances permitted under the Natural Gas Act. These allowances include the area-wide gathering allowances and the allowances permitted for the delivery of offshore natural gas currently described under Part 2 of the Commission's regulations. While references to both the national rates for sales from wells commenced on or after January 1, 1973 ($2.56a) and those from wells commenced prior to that date ($2.56b) are given, these allowances are identical. The two references were supplied to make it clear that persons who were receiving such allowances, under either provision, will continue to receive them if they are qualified. Qualifications for these allowances are set forth in paragraph (b). To receive these allowances for a first sale of natural gas the seller must (1) be selling natural gas which was committed or dedicated to interstate commerce on November 8, 1978, and for which a just and reasonable rate was in effect on that date; and (2) must meet the applicable requirements of §§2.56a(d), 2.56b(e), 2.56a(e), or 2.56b(f) of this chapter.

Several comments, particularly those dealing with the problems of resellers, requested the inclusion of what is now § 271.1104. The Commission believes that while the allowances are based on cost data supplied several years ago, such allowances should be permitted inasmuch as they were permitted for rates previously set by the Commission. It would serve no regulatory purpose to require sellers making first sales under these previously established just and reasonable rates to apply for such allowances under § 271.1105 when such gathering allowances, as permitted in Part 2 of this chapter, have already been deemed just and reasonable.

Section 271.1105 establishes a procedure under which the Commission will consider applications for amounts to be collected in addition to maximum lawful prices to the extent necessary to recover certain production-related costs.

Paragraph (b) of § 271.1105 precludes the filing of any application for such an allowance if the natural gas subject to the first sale was committed or dedicated to interstate commerce as of November 8, 1978, and was subject to a just and reasonable rate in effect at that time. It also precludes applications with respect to natural gas subject to an existing intrastate contract, successor to an existing intrastate contract, or an intrastate rollover contract.

Several comments focused on the exclusions in this section. The exclusion of committed or dedicated natural gas is not an attempt on the part of the Commission to decide the issues now before the Commission on rehearing in
Phillips Petroleum Company, Docket No. CI77-412, et al. Instead, the exclusion of natural gas for which a just and reasonable rate was established by the Commission on or before November 8, 1978, from the operation of 271.1105 reflects the Commission's intention to reserve these issues for decision in the Phillips case rather than in the interim regulations.

The subsequent and separate order in the Phillips rehearing will set out the Commission's policy in this regard. The exclusion of natural gas sold intrastate subject to existing contract obligations reflects a similar view: namely, that the existing contract provisions reflect the allocation of costs of production as they were contemplated by the parties at the time the contract was negotiated. These provisions, and more importantly any change in such provisions, would change the price actually paid for the natural gas subject to the existing contract. The NGPA in sections 105 and 106(b) establishes a pricing mechanism which relies upon the prices and the contractual terms as they relate to price as such prices and terms were in existence on the date of enactment of the NGPA. It would be contrary to the intent of Congress to permit a change in such prices and terms that would have the effect of increasing the total costs borne by the purchaser for acquiring the very same commodity as he was acquiring for a lower price before date of enactment. This would also be contrary to the intent of this provision and the NGPA and would unnecessarily complicate the implementation of sections 105 and 106(b) of the NGPA. The Commission believes that the exclusion contained in 271.1105(b)(2) is consistent with Congressional intent to establish maximum lawful prices for such contracts by reference to the terms and conditions as they relate to the allocation of production-related costs as they were in existence on the date of enactment.

The interim regulations provide, in paragraph (c), that applications to the Commission will be considered for costs of gathering, liquefaction or transportation only if those latter activities occur off the lease from which the natural gas was produced. It is the intent of the Commission that the costs of gathering, liquefaction, or transportation should only be permitted to the extent that they are not activities normally performed in the production of natural gas. The Commission believes that costs of gathering, liquefaction, and transportation when performed on-the-lease are activities normally performed by a producer in production of natural gas. Where such costs for activities performed on-the-lease are extraordinary, a seller may seek an
adjustment pursuant to section 502(c) of the NGPA to prevent special hardship, inequity, or an unfair distribution of burdens. Such relief is specifically recognized in § 271.1106.

The regulation does differ from the notice of proposed rulemaking in that the term "off-lease" has been revised to read "off the lease from which the natural gas was produced." This change was made in response to a comment in the proposed regulation that the original language would unfairly impact upon operations where such activities were performed for one producer by another producer but off of the lease from which the natural gas was produced.

Paragraph (d) sets out certain quality standards for natural gas. Only applications for recovery of that portion of costs necessary to bring gas to a quality greater than specified in the standards will be considered under this section. This section provides an exception to this rule for transactions involving direct sales to end users. With respect to the pipelines, the Commission has determined after a review of existing contractual terms and data filed with the Commission, the standards specified are those which are normally required for pipeline quality natural gas. The Commission does not have sufficient data to draw the same conclusions with regard to direct sales to end users. The Commission requests further comment on these standards.

A substantial number of comments were received on this section. Some comments argued that section 110 of the NGPA addresses only costs relating to the production of natural gas. It was argued that, to the extent costs such as those enumerated under this section are incurred after production, the Commission lacked authority to regulate them under section 110. Second, it was argued that all costs, those respecting processing and treating, as well as those for such activities as gathering and transportation, should be treated together. Third, the method used to identify the minimum quality standards was questioned. It was submitted that such requirements, as set down by the Commission, overlooked the extraordinary costs which may be required to meet the stated conditions. Fourth, it was argued that no minimum standards should be set; that the Commission should merely permit a dollar-for-dollar pass-through of those and similar costs. Finally, the point was raised that if such standards are to be set, they should be made uniformly applicable and they should be based upon area-wide requirements determined after the gathering of more detailed data.

The Commission believes that section 110 of the NGPA does not require that all costs for compressing, gathering, processing, treating, liquefaction, or transportation must be treated together and dealt with identically. Indeed, this reading of section 110 is inconsistent with the fact that the
different types of costs are indeed incurred at different
times and locations. Treating all such costs as a group
is impossible as a practical matter and could not have been
intended by the Congress. To restrict the applicability of
section 110 to costs borne only by the producers and only
to the extent necessary to bring natural gas to the surface
of the ground would work a hardship on other "sellers" sub-
ject to maximum lawful prices. This result is clearly con-
trary to section 110 which refers to costs "borne by the
seller".

The Commission has provided regulations to permit re-
covery of costs relating to certain gathering, liquification,
transportation, and compression under § 271.1105(c). The
Commission has also provided for the recovery of costs relat-
ing to certain conditioning and treating under § 271.1105(d).
These separate provisions are warranted since the costs are
similarly incurred during the production cycle.

Several comments were specifically directed to the pro-
visions of § 271.1105(d). These comments argued that the Com-
mission is establishing minimum standards of quality and that
the Commission does not have the requisite authority. The Com-
mission disagrees with these comments. First, the Commission
is addressing the issue of which costs will be allowed to be
added-on to the statutorily specified maximum prices. Section
110(a)(2) specifically states that costs for processing and
treating, among other things, may be recovered only to the extent
"allowed for, by rule or order," of the Commission. The
statute does not require the Commission to automatically
permit the recovery of all such costs, but leaves to the
discretion of the Commission whether to grant the authority
to the sellers to recover such costs. In exercising such
discretion, the Commission may attach such terms and con-
ditions as it seems appropriate so long as they are not
contrary to statutory intent or arbitrary and capricious.

On the basis of the discussion set forth in this preamble,
the Commission believes that the terms and conditions im-
posed by these regulations are necessary and appropriate
to carry out the intent of Congress in enacting the NGPA.

Standards for determining when the Commission will
treat applications for a determination that the maxi-
mum lawful price has not been exceeded as a result of the
addition of certain production-related costs are required in
order to assure that natural gas for which the maximum law-
ful prices set by the NGPA are paid is that commodity which
is of relatively uniform value to the purchaser. When a
price is charged and collected for a specific commodity,
such a product is normally deemed to have certain basic
qualities which define the item being purchased. The
Commission does not believe that Congress, when setting the maximum lawful prices for natural gas, did not anticipate that the sellers would bear normal costs of production in making this commodity useful to the purchaser. The maximum lawful prices were designed to permit the sellers to recoup such costs. Section 110 recognizes that some sellers may incur abnormally high costs of production and permits recovery of those costs in circumstances where the Commission finds such recovery to be warranted.

The statute envisioned that the Commission could perform these responsibilities either by rule or on a case-by-case basis. Recognizing the differences in production cost that may occur, the Commission, through these regulations, is utilizing both rulemaking and particularized orders to implement section 110.

Section 271.1100(b) excludes from the operation of § 271.1104, § 271.1105, and § 271.1106, natural gas produced from the Prudhoe Bay Unit of Alaska and transported through the system approved under the Alaska Natural Gas Transportation Act of 1976 (ANGTA). Prudhoe Bay is a new and unique producing area for which there is no history of industry practice relative to the bearing of production-related costs. Therefore, a separate rule under the provisions of ANGTA for natural gas from that producing area is required and will be promulgated by the Commission in the immediate future.

This exclusion received some comment. One comment, while agreeing that natural gas produced from Prudhoe Bay should be treated differently from that produced in more conventional settings, evidenced a concern that it would not be so treated. Instead, it was feared, the Commission would seek to apply to this natural gas such standards as were set forth in Subpart K. In addition, the same comment raised the question of how natural gas produced from areas similar to that of Prudhoe Bay would be treated. Both of these concerns turned upon the view that as proposed, the regulation did not touch upon a typical situation of costs for production or transportation. A second comment took issue with the Commission's consideration of separate costs associated with the Prudhoe Bay effort. The gravamen of this comment was two-fold: first, that excepting Prudhoe Bay gas resulted in continued uncertainty as to the Commission's treatment of this natural gas; second, that a rulemaking under ANGTA, as opposed to the NGPA, was neither warranted nor proper.

The failure to except other, similar production areas (as for example the North slope), was intentional. It is envisioned that to the extent such other areas evidence
particular characteristics which require special treatment, either more data will be available whereby they can be properly treated, or they can be considered under § 271.1106. Prudhoe Bay requires special consideration, for in that case data is available to assist the Commission in considering the questions attendant to maximum lawful pricing provisions. As already mentioned, these questions are to be dealt with by a special rulemaking.

The issue as to which statute applies for purposes of providing for Prudhoe Bay is, like the issue of the actual treatment of production-related and similar costs for this production area, best addressed within the setting of the proposed rulemaking. Suffice it to say that the Commission believes that its authority under section 110 of the NGPA is broad enough to make special provisions and exceptions as between regions if good cause can be found. Considering the state of production from Prudhoe Bay, the Commission is of the opinion that the exception is, at this stage, required.

PART 273

The purpose of Part 273 is the establishment of procedures for the interim collections authorized by section 503(e) of the NGPA. Section 503(e) permits interim collection, subject to refund, of those prices for certain categories of natural gas for which a determination of eligibility is made by a jurisdictional agency and is subject to review by the Commission. These categories are new gas and certain OCS gas (as defined in section 102 of the NGPA), gas from new onshore production wells (section 103), high-cost natural gas (section 107) and stripper well natural gas (section 108).

Description of the regulations. Part 273 is divided into three subparts: general provisions, interim and retroactive collection provisions, and the procedures for refund guarantees and refund payments.

Subpart A which contains general provisions has not been revised. Few comments on this subpart were received. Section 273.101 states that eligibility under these regulations to collect a maximum lawful price for a particular category of gas does not give a seller the right to collect a price which is higher than that permitted by the sales contract. Section 273.102 defines a "final determination" for purposes of this part as a determination of eligibility.
by the jurisdictional state or federal agency which is no longer subject to review and reversal by the Commission or the courts except pursuant to section 503(d)(1) of the NGPA. Section 273.183 requires each seller to file an annual report of any collections and refunds under this part.

One comment noted that the annual report requirement would be burdensome to small intrastate producers. Another comment suggested that this report replace the specific filing requirements of Subpart B for each first sale. The Commission believes that specific filings and the annual report are necessary to monitor collections and refunds under this part. Prior to the end of the first reporting period, on December 31, 1979, the Commission will issue a rule specifying the form and scope of the annual report.

Subpart B of Part 273 provides the specific rules for interim collections and for retroactive collections where the maximum lawful price established by a final determination exceeds the price collected on an interim basis. Section 273.201 establishes a transitional rule which is limited to first sales from new wells. It was suggested that the eligibility for interim collections under §273.201 be broadened to include first sales of natural gas in a new reservoir that is produced from an old well or is stripper well natural gas. The limitation to new wells is taken directly from section 503(e)(1) of the NGPA and applies the definition of new wells found in section 2(j) of the NGPA.

It will not be modified. Sales of stripper gas or new gas from an old well may qualify for interim collections under §273.202 and for retroactive collections under §273.204.

Under the regulations proposed for comment, the transitional rule would have terminated on March 1, 1979. The interim regulations have been revised to permit collections under this provision to continue until the jurisdictional agency issues a determination of eligibility. A seller may collect, subject to refund, the price determined under section 109 of the NGPA, if an application for determination is submitted to the jurisdictional agency by March 1, 1979. This price may be charged and collected beginning on the date on which the seller completes the filing requirements under this section and ending on the date of notice to the Commission of a determination by the jurisdictional agency for the well from which the sale is being made. One comment requested a grace period allowing full interim collections for December 1978 if the filing required under this section is submitted by December 31, 1978. This modification of the statutory scheme will not be adopted. The retroactive collection procedure under §273.204 may be available.
to recoup charges, and collections which cannot be made immediately because of delayed compliance with the filing requirements.

To qualify for the transitional collection authority, the proposed regulation stated that a seller must file with the Commission a sworn statement that the sale is being made from a new well which is eligible for the price to be collected, and that the seller has filed an application for determination with the jurisdictional agency or will do so by March 1, 1979. Two comments noted that some jurisdictional agencies do not permit filings to be made by sellers who are not actually operating the well. Therefore, the filing requirements have been modified to permit a sworn statement that the seller will cause an application to be submitted, on or before March 1, 1979, by a person authorized to do so by the rules of the jurisdictional agency. A seller who cannot make that sworn statement in good faith may substitute a sworn statement by a person eligible to file a timely application.

After an application for determination has been filed, a seller may use the procedure established by § 273.202 to collect, subject to refund, the maximum lawful price for which the sale is believed to be eligible, for a period of up to eighteen months (or twelve months where collections under this section begin on or after May 1, 1979). Alternatively, if the application for determination was filed by March 1, 1979, the seller may continue to collect the price specified in § 273.201(a) until the Commission receives notice of the determination by the jurisdictional agency.

The proposed § 273.202 rule has been modified to some extent. To qualify for interim collection authority under § 273.202, a seller must fulfill certain filing requirements, by submitting a sworn statement of eligibility, a duplicate of FERC Form 121 accompanying the application for determination, and either a statement certifying that a portion of the amounts collected under this procedure will be placed in escrow or secured by surety bond or a release from this obligation executed by the purchaser.

The authorization to make interim collections of the price for which the sale is believed to be eligible terminates on the date on which the Commission receives a notice that a determination of eligibility has been made, or after eighteen months (or twelve months where collections under the section begin on or after May 1, 1979) where no determination has been made. After such termination, the seller may not use this procedure again for this sale or any other

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
sales from the same well. Where a determination has not been made within eighteen months and the authority to collect a price under this section ends, a seller may use § 273.201 to collect the price authorized by that section; but only where the application for determination was filed on or before March 1, 1979. Otherwise, the seller will be limited to collection of the applicable maximum lawful price specified in Subparts D, E, F, or I of Part 271. After an initial determination is made, § 273.203 can be used to collect the price established by that determination.

Three significant questions were posed by the comments on the proposed § 273.202. In addition, there was one suggestion that each of the items to be filed under paragraph (c) are not needed. Many comments requested deletion of the proposed condition in paragraph (a) that collections cannot begin under this section until the appropriate jurisdictional agency has filed with the Commission an undertaking to diligently consider and decide applications and the report on procedures to be used by the agency, as required by § 274.105. These comments argue that this qualifying condition is unlawful or inequitable, chiefly because compliance is beyond any seller's control. The comments recommend that sellers be permitted to make interim collections under this section after an appropriate filing with this Commission.

Section 503(e)(2) of the NGPA provides that the price sought in an application for determination can be charged and collected upon filing of an application. The Commission believes that it is particularly important that higher prices dependent on determinations of eligibility should not be charged and collected, subject to refund, until a jurisdictional agency has undertaken to consider these applications and has established procedures to make determinations that on these applications. Moreover, collections under this section should not continue if a jurisdictional agency is not actively proceeding to make specific determinations.

To better express our intent, the proposed § 273.202(a) will be changed in two respects. First, this condition will be restated as a requirement that no filing to charge and collect a maximum lawful price under this section may be submitted to this Commission until the jurisdictional agency to which the application for determination has been made has filed the report and undertaking required by § 274.105.

As noted in the discussion of Subpart A of Part 274, the form of the undertaking has been modified to require the jurisdictional agency to state that it will take such steps as are reasonably necessary or appropriate to perform its functions under Part 274. Second, unless a jurisdictional agency has notified the Commission by March 1, 1979, that it is actively
processing the applications for determinations, then
authority to make interim collections under this section
will be suspended with respect to deliveries made during
the period from March 1, 1979, until the date on which the
jurisdictional agency gives notice that the applications
are being processed. During this suspension period, collec-
tions under § 273.201 will be permitted if an application
was submitted to such agency by March 1, 1979. A similar
change is made in § 273.204 so that later retroactive col-
clections will also be suspended and not permitted over the
same period.

One comment has also addressed two of the other para-
graphs within § 273.202. First, it is argued that the limi-
tation of interim collections under this section to no more
than eighteen or (twelve) months should be deleted as "unrea-
sonable and inequitable", again because termination of interim
collections under this section could result from inaction by
a jurisdictional agency beyond the control of any seller.
The Commission does not believe that this limitation is unre-
asonable or unnecessary. The Commission will consider a revi-
sion of this rule if it proves to be unworkable or if sub-
stantial hardships result. In any event, retroactive
collections under § 273.204 or additional interim collections
under § 273.201 may be available in such circumstances.

There is a final suggestion that paragraph (d) of
§ 273.202 should be modified to permit successive interim
collections of the maximum lawful price for stripper natural
gas; for example, where there is a determination that a well
is not a stripper well under section 108 of the NGPA, but
another application for determination is properly submitted
after a change in the level or character of production from
that well. This suggestion will not be adopted. Upon a
final and later determination that a well qualifies as a
stripper well, the seller may be eligible to use the pro-
visions of § 273.304 to collect retroactively the maximum
lawful price for stripper natural gas, plus carrying charges
back to the date on which the later application was filed.

When the jurisdictional agency issues its determina-
tion of eligibility for the well from which the sale is
being made, § 273.203 authorizes interim collection, subject
to refund, of the price established by that initial deter-
mination. Within 15 days after interim collection begins
under this section, a notice of collections must be filed
with this Commission and the jurisdictional agency and also
served upon the purchaser. There are no other filing re-
quirements under this section. The Commission will not adopt
the suggestions that these limited requirements should be
deleted as unnecessary. The authority to collect the price
established by the initial determination of eligibility ends when that determination has been reviewed and becomes final. If the Commission does not approve or reverse an initial determination, but makes a final finding that the determination should be remanded to the jurisdictional agency for further consideration, then the seller may continue to collect the price established by the remanded determination for up to six months during reconsideration by such agency.

When a determination of well eligibility becomes final, a seller may immediately collect the price established there for all future sales from that well under the authority of the applicable section of Title I of the NGPA and Part 271 of these regulations. Section 273.204 of this part authorizes the retroactive collection of that finally determined price for all first sales of gas delivered after the application for determination was filed. If this application is filed by March 1, 1979, then retroactive collections may be made for gas delivered on or after December 1, 1978. However, as previously explained, retroactive collections cannot be made for first sales of gas delivered during the period in which a jurisdictional agency is not actively considering the applications for determination that have been submitted. Unless the Commission receives written notification by March 1, 1979, that the jurisdictional agency is then making determinations, later retroactive collections of the finally determined price will not be authorized for the period from March 1, 1979, until the jurisdictional agency gives notice to the Commission that determinations are being made.

Although recognizing that section 501 of the NGPA empowers the Commission to impose conditions on retroactive collections, one comment stated that the "cut-off" of complete retroactive collections, (where the application for determination has not been filed by March 1, 1979) is unreasonable. Otherwise, it continued, producers lacking immediate engineering assistance will be precluded from retroactively collecting the finally-determined price from December 1, 1978 until the date of application for a determination (if filed after March 1, 1979) and thus suggested that the minimum acceptable "cut-off" would be July 1, 1979.

The Commission believes that the current "cut-off" of March 1, 1979, reflects a reasonable balancing of the sellers need for sufficient time to prepare applications against the burden to be placed on purchasers and their consumers by the accrual of large sums for later retroactive collection. Interstate pipelines commented that retroactive collections "could have substantial adverse repercussions" for them and for their customers.
We should also provide a clarification that the period of retroactive collections is based upon the filing date of a complete application for determination, in compliance with Subpart B of Part 274, and the applicable regulations of the jurisdictional agency receiving the application. Where an application is rejected, either by the jurisdictional agency or after an initial determination by this Commission that the application does not conform to these regulations, then retroactive collections will be authorized from the date on which a conforming application is filed (or December 1, 1978, if the conforming application is filed by March 1, 1978).

Conversely, there was one comment that any provision for retroactive collections would be unlawful, because there is no explicit authorization within section 503(e) of the NGPA. In our opinion, a retroactive collection rule is not inconsistent with the statutory language and is mandated by the Statement of Managers and the floor debate on the statute. We have attempted to establish reasonable limitations and conditions on these collections.

Many comments were directed to the qualifying conditions proposed in § 273.304(b); and the interim regulations will reflect several modifications. The proposed subparagraph (1) of § 273.304(b) stated that "[r]etroactive collections may be made only to the extent and in the manner specified by the applicable sales contract (or amendment thereto) . . ." The Commission does not agree with this comment that some explicit statement of this principle is unnecessary although the specific wording has been changed. As that comment recognizes, no price or amount authorized by any of these regulations may actually be collected from the purchaser unless there is sufficient contractual authorization for the payment. Also, we will not accept the other suggestion that a single method for such payments should be mandated, believing that this question should be left to the discretion of the parties within the limits provided by the sales contract and any later amendments. Thus, we will not require that all retroactive amounts must be collected immediately after a determination becomes final or over a period equal to the time during which this obligation accrued. The seller will be required to file a concurrence by the purchaser in the method and amount of retroactive collections.

Proposed subparagraph (2) of § 273.304(b) would have required "full compliance" with all applicable regulations of the Commission as a condition upon any retroactive collections. This requirement has been deleted.
comments reflected substantial confusion about the scope of this subparagraph and argued that it is "overly broad", particularly because of the uncertainties and difficulties which the comments were anticipates during the initial implementation of these regulations. This deletion will not limit our ability to enforce compliance with the NGPA and these regulations.

Similarly, the scope and intent of subparagraph (3) of the proposed § 273.304(b) will be clarified. Subparagraph (2) of § 273.304 in the interim regulations will state that a seller may not collect a retroactive amount from a purchaser for any sale, until the seller has refunded to that purchaser any amounts due to be refunded to such purchaser for any other sale under the NGPA and this subchapter of the Commission's regulations. Compliance with any separate obligation to refund amounts collected under section 4 of the NGA (rather than under the NGPA) will be monitored and enforced using the Commission's existing producer regulations in Part 154.

Finally, the proposed regulations stated that carrying charges on the amount to be collected retroactively would be permitted "only to the extent agreed upon by the parties" to the sales contract. The interim regulations, § 273.304(b)(4), have been revised to require that any agreement of the parties which provides for carrying charges must be reduced to writing and then filed with the Commission. There were no comments on this provision, except for one question: whether an interstate pipeline is entitled under section 601(c)(2) of the NGPA to guaranteed pass-through to its customers of any carrying charges paid under this section. Consideration of this question is not required at this time. It may be addressed by rule or in specific cases, after carrying charges have been paid by interstate pipelines. We should explain now that section 601(c)(2) of the NGPA does not guarantee automatic pass-through of charges to interstate pipelines under the interim collection provisions. Interim collections will necessarily precede final determination of the maximum lawful price for such sales. Therefore, interim collections cannot be deemed just and reasonable under section 601(b) and thus cannot qualify for guaranteed pass-through to pipeline customers under section 601(c)(2).

In some instances, the provisions of this part will be used to collect interim prices for first sales of natural gas which was committed or dedicated to interstate commerce on November 8, 1978, the day before the date of enactment of the NGPA. Under section 601(a)(1)(B) of the NGPA, sales of committed or dedicated gas will be subject to the Commission's jurisdiction under the Natural Gas Act, particularly to the filing requirements for making a rate
change, until a final determination that such gas qualifies as high-cost gas, new gas, or gas produced from a new onshore production well. The relationship between the filing requirements of these NGPA regulations and Part 154 of the regulations under the NGA is discussed in the Commission's final rule amending § 154.94(h) of Part 154, issued November 17, 1978 in Docket No. RM79-4, as Order No. 15. Under the final rule, in the case of interim collections for first sales of gas which remain subject to the requirements of the NGA, full compliance with the filing requirements of this part and the other regulations under the NGPA will also satisfy the additional filing requirements under section 4(e) of the NGA and Part 154 of the Commission's regulations. Thus, a seller which makes the filing required by § 273.202(c) may collect the price specified in the application for determination of eligibility without submitting the prior notice of rate change required by § 154.94 of the Commission's regulations under the NGA.

Subpart C of this part establishes procedures to assure that any interim collections will be refunded as necessary and for the actual payment of refunds with interest after a final determination that a first sale does not qualify for a price already collected under this part. Section 273.301 establishes a general obligation upon each seller to refund any collections which are not authorized by the NGPA and these regulations, if ordered to do so by the Commission at any time. For example, a determination can be reconsidered and modified after it becomes final, if it was based on an untrue or misleading statement of material fact in the application for determination. As a result of that modification, additional refunds could be ordered even though the seller would have already discharged any specific refund obligations under § 273.302 and the prior final determination.

Section 273.302 sets out specific procedures for refund assurance and payment. A seller's potential liability to refund any interim collections must first be secured by the filing of a written undertaking to make refunds using one of the forms set out in § 273.302(b). A seller must file a series of refund undertakings covering collections for sales from the wells identified in an appendix to each successive undertaking, or one blanket undertaking which is a general agreement to make all refunds which may be required under the NGPA.

Interim collections that are made under § 273.202 pending an initial determination of eligibility and the proper price are subject to a further requirement providing additional refund assurance. Section 273.302 of the proposed regulations required the seller to secure
by surety bond or to place in escrow the portion of the price collected under § 273.202 which exceeds the maximum lawful price determined under section 109 of the NGPA (for sales from new wells) or the maximum lawful price under sections 104, 105 or 106 of the NGPA (for sales from old wells).

This provision was opposed by comments from a variety of persons. These comments argued that a mandatory escrow provision would be unduly burdensome to producers and costly to consumers who would receive a lower rate of interest on escrowed refunds. A corporate guarantee or undertaking to make refunds should be sufficient, according to these comments, because this simple procedure has been used successfully by the Commission to provide ample assurance of refunds under the NGPA. In response to these many comments, the proposed § 273.302(c) has been modified to require in the interim regulations that a portion of interim collections under § 273.202 must be secured by a surety bond or placed in escrow, unless the purchaser by written agreement releases the seller from this requirement for additional refund assurance. Thus, the Commission will accept initially a judgment by the purchaser on the seller's ability to make future refunds; but, in specific cases under subparagraph (b)(3) of this section, additional refund assurance may be ordered by the Commission at any time for any interim collections under Subpart B.

Other provisions of § 273.302 require each seller to maintain full records of the amounts that are collected subject to refund, and to make the actual refunds by cash or check within forty-five days after the applicable determination of eligibility becomes final. There is no provision for any other method to discharge a refund obligation, such as by work-offs, commitment of additional reserves to each purchaser, or reduction of the price charged for future deliveries. Permission to use an alternative refund method will be granted only in exceptional cases:
to the procedures by which jurisdictional agencies make
initial determinations and give notice of those determina-
tions to the Commission. Subpart B of Part 275 of the
regulations prescribes the method by which the Commission
will review those determinations. Each of these provisions
is summarized below.

PART 274 — SUBPART A

Subpart A of Part 274 prescribes procedures by which
jurisdictional agencies make determinations pursuant to
and in accordance with the NGPA. This subpart provides
that the procedures applicable to the determinations by
the agency shall be those procedures prescribed by State
law to make the determinations under the NGPA or comparable
determinations. In addition, this subpart contains a rule
concerning the manner in which a jurisdictional agency
must notify the Commission that it has made a final deter-
mination of eligibility.

Section 274.102 provides that a determination is made
once it is "administratively final" before the jurisdictional
agency. If, for example, a state agency's decisions are
normally subject to rehearing under its usual procedures,
the determination is not final until the period for rehearing
expires or rehearing is sought and denied.
Section 274.104 provides that a jurisdictional agency must notify the Commission within 15 days after making a determination and prescribes the manner in which the jurisdictional agency shall give the notice. The notice must include: (1) a list of participants in the proceeding and any person who submitted or sought to submit written comments; (2) a statement indicating whether the matter was opposed before the jurisdictional agency; (3) the information set forth in § 275.105 as applied to the determination in question, unless the jurisdictional agency has filed a report with the Commission in accordance with § 274.105; (4) a copy of the application and a copy or description of other material in the record upon which the determination was made; and (5) an affirmative finding that the information described in the applicable filing requirements is contained in the notice.

The final regulations differ from the proposed regulations in three respects. First, the requirement that the agency submit to the Commission a copy of the FERC form submitted to the agency by the applicant has been deleted. The final rule requires the application to be filed whenever an affirmative determination is made, and the FERC form is part of the application. The rule also differs from the proposal by not requiring the jurisdictional agency to submit to the Commission a copy of the complete record; instead the agency must submit the application and either a copy or a description of the materials in the record, in addition to the application, upon which it relied in making the determination. This change was made in response to two comments which indicated that the necessity to file the complete record would be unduly burdensome, requiring the copying and transmittal of large amounts of technical data for a single application. Upon reconsideration, the Commission has determined that it will be able to fulfill its review obligation by looking to the application and if necessary, procuring other materials described as being in the record upon which the agency relied.

The third change is reflected in a new subparagraph (5) in § 274.103. This subparagraph requires that the jurisdictional agency make an affirmative finding that the information required to be filed with an application has been forwarded to the Commission. If some of that information was in the files of the jurisdictional agency, copies of the relevant portions of the files must be forwarded to the Commission as part of the notice.

Several comments requested that the Commission add a provision to protect the confidentiality of material submitted under § 274.104, which material may include trade
secrets or other sensitive information. The Commission agrees and, accordingly, has added a provision to protect such material in § 275.206.

Section 274.105 provides an option to the procedures prescribed in § 274.104. If an agency chooses to adopt the § 274.105 option, it may file with the Commission a report in which it undertakes to make the necessary determinations and which includes a description of the procedures which it would follow in making them. The jurisdictional agency would then be relieved of the obligation to describe its procedures in each case.

Two comments requested the Commission to add provisions to Part 274 governing certain aspects of the proceedings before the jurisdictional agencies. One comment suggested that the Commission require the jurisdictional agencies to hold full adjudatory hearings on delegated determinations and allow gas consuming states to participate as a party in interest to the hearings as of right. The other comment suggested that the Commission adopt procedures allowing distribution companies and state commissions and agencies to intervene and have the rights of full parties in interest in hearings held in gas producing states, and that the Commission's "Rules of Practice and Procedure" be made applicable to the hearings before commissions and agencies in other states.

The Commission has rejected these suggestions because it does not believe that it has the statutory authority to determine the nature of the proceedings before the jurisdictional agencies. Section 503(c)(3) of the NGPA states:

Determinations of a Federal or State agency referred to in subsection (a)(1) shall be made in accordance with the procedures generally applicable to such agency for the making of such determinations or comparable determinations under the provisions of Federal or State law, as the case may be, pursuant to which they exercise their regulatory jurisdiction. The Commission may prescribe the form and content of filings with a Federal or State agency in connection with determinations made under this section.

The Statement of Managers indicates that questions regarding procedures followed by the jurisdictional agencies are to be reviewed directly by the state or federal court having jurisdiction to hear such appeals in accordance with applicable state or federal law. S. Rep. No. 95-1126, 95th Cong., 2d Sess. 119(1978). Since Congress specifically provided that proceedings before the jurisdictional agencies were to be in accordance with their generally applicable procedures and that review was to be by the courts, the Commission lacks the statutory authority to prescribe the procedures suggested in the comments. In
view of the Commission's lack of authority, comments concerning proceedings before jurisdictional agencies should be directed to those agencies.

PART 274 - SUBPART B

Subpart B of Part 274 prescribes the filing requirements which must be met by an applicant to obtain a determination from a jurisdictional agency.

Section 274.201 sets forth general rules applicable to all applications, including persons who may file for a determination, the persons who must sign the filing, and the requirement that an applicant give notice of the filing to purchasers.

A number of comments suggested changes in § 274.201(b) with respect to who may file. Several comments requested that the operator be designated as the responsible person. Other comments stated that designating the operator as the responsible person would be too limiting. Concern over non-operating interests was also expressed.

After consideration of these comments, the Commission determined that this is a matter best left to the jurisdictional agency. Accordingly, the section has been revised to provide that the application may be submitted by that person whom the jurisdictional agency identifies as eligible to make filings.
Comments addressing § 274.201(c) indicated that requiring the signature of a "responsible officer of the corporation" was too limiting. The Commission agrees and has modified this section to permit a "responsible official of the corporation" to attest to the application. It should also be noted that this section has been modified to delete the attestation requirement.

One comment requested that § 274.201(e), "Notice to Purchasers," be expanded to include notice to all working interest owners. Although the Commission has decided not to expand the notice requirements in this manner, it notes that such a requirement might be imposed by the jurisdictional agency. Also the applicant may want to give such notice as a prudent business practice.

Section 274.201(e), as proposed, required that the applicant provide the purchaser(s) with a copy of the application. Upon further consideration, it has been determined that the purpose of this paragraph can be served by requiring only that the applicant provide the purchaser with a copy of FERC Form No. 121.

One comment requested the addition to the general provisions of a section allowing the filing of simultaneous multiple applications for determinations. Permitting these filings appears to the Commission to be desirable; there is clear legislative history that such filings were contemplated under the NGPA. However, since this matter involves procedures of jurisdictional agencies, whether such filings will be permitted is a matter which is better left to the discretion of such agencies.

One comment suggested that the purchaser should be required to play a larger role in the regulatory scheme by concurring in a producer application for a determination with regard to a sale of at least 1,000,000 Mcf per year. The Commission recognizes the merits of a procedure which would involve the monitoring of applications by purchasers. Although this type of program will not be adopted at this time, purchasers are encouraged to participate in the determination process to the extent permitted by the jurisdictional agency.

Several comments suggested that the Commission recognize the problem of confidentiality which was not addressed in the proposed regulations. The Commission agrees that this problem should be addressed and has included such a regulation in § 275.206. Since this rule was not previously proposed, the Commission is particularly interested in comments on the procedures contained in this rule.
Section 274.202 sets forth filing requirements for a determination that gas qualifies as new natural gas under section 102 of the NGPA. The regulations require an applicant to present evidence substantiating, to the extent practicable, each element of proof required for a determination of eligibility. Section 274.202(c)(1) is typical of other sections in this subpart in that the applicant must file certain specific documents as well as the oath statements. Each applicant filing for a new onshore well determination under § 274.202(c)(1), must file a location plat locating his own well and any other well within the 2.5 mile radius which is producing or has produced natural gas after January 1, 1970. In order to demonstrate that none of these wells is a marker well, an applicant must consult available, relevant records which would indicate whether any of these wells produced in commercial quantities at any time during the period from January 1, 1970, to April 20, 1977. Rather than require an applicant to file all production records with the application, however, the proposal requires the filing of a statement under oath describing the applicant’s search of records, and attesting to the fact that none of these wells is a marker well.

Applicants filing under § 274.202(d) for a new onshore reservoir determination must submit geological information which demonstrates that production is from a new onshore reservoir. This information is accompanied by a sworn statement similar to that required by paragraph (c). In all cases, individual agencies may, if they wish, require certified copies of all documents relied upon by the applicant.

Several comments recommended the filing of the OCS lease in lieu of the proposed filing requirements. Acknowledging this recommendation, the Commission has changed the filing requirements to require a copy of the OCS lease or such other identification of the lease as permitted by the jurisdictional agency together with an oath statement by the applicant that the gas is produced from a new OCS lease.

Several comments suggested modification of the diligent search requirement for new onshore wells and new onshore reservoirs. Comments stated that in some instances royalty records do not exist and tax records were not public. Other comments stated that the search should be limited to pertinent records; still others stated that the search of production, severance tax and royalty records should be illustrative and not mandatory. In response to these comments, these requirements have been modified in all sections to require a “diligent search of all records (including but not limited to production, state severance tax, and royalty payment records)
which are reasonably available and contain information relevant to the determination of eligibility."

One comment suggested a modification in the "inconsistent information" language of the oath statements required for new onshore wells and new onshore reservoirs. The regulations now require that the applicant state under oath "that applicant has no knowledge of any other information not described in the application which is inconsistent with his conclusion." (§ 274.202(c)(1) (v)(D) and (c)(2)(vi)(D)).

One comment regarding new onshore reservoirs suggested the addition of surface pressure surveys to the list of geological data which must be consulted if readily available. The regulation now requires in § 274.202(d)(1)(ii)(B), "bottom hole pressure surveys, or surface pressure surveys."

Several comments objected to the task of locating all wells within a 2.5 mile radius on the location plat (§ 274.202(c)(1)(iii)) or identifying all marker wells on a location plat (§ 274.202(c)(2)(iii)). Recognizing that this filing requirement may be unnecessarily burdensome, the regulations now require identification of those wells which are producing or have produced natural gas after January 1, 1970, within the 2.5 mile radius and a specific identification of all marker wells within the 2.5 mile radius.

Section 274.203 sets forth filing requirements for a determination that gas qualifies as a new reservoir on old OCS leases under section 102 of the NGPA. The regulations require the applicant to file geological information to the extent necessary to support such a determination. In addition to the submission of geological information, the applicant must file a statement under oath containing the basis for the conclusion that the gas is produced on an old lease on the OCS from a reservoir not discovered before July 27, 1976. If the date of penetration of the reservoir is prior to July 27, 1976, certain requirements of OCS Order No. 4 must be met in order to qualify for this determination.

Comments similar to those addressed in § 274.202 which requested modification of the diligent search filing requirement and the "inconsistent information" oath statement were filed. The changes noted above have been made.

Section 274.204 sets forth filing requirements for a determination that the well qualifies as a new onshore production well under section 103 of the NGPA. The regulations require the applicant to file, inter alia, the well completion report, a location plat which identifies the subject well and all other wells within that production unit. In addition, the applicant must file a statement under oath,

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
that the surface drilling of the well was begun on or after February 19, 1977, that the well satisfies well-spacing requirements and was not within an existing proration unit. If the applicant is seeking a determination for a new well drilled in an existing proration unit, the applicant must also demonstrate that the new well is necessary to effectively and efficiently drain a portion of the reservoir covered by that proration unit.

Only comments similar to those addressed in § 274.202 were suggested for this section.

Section 274.205 sets forth filing requirements for a determination that gas qualifies as deep high-cost gas under section 107 of the NGPA. The regulations require the applicant to file, inter alia, the well completion reports, the well logs or well servicing company reports or such other information necessary to substantiate the depth of the well. In addition, the applicant must file a statement under oath that the surface drilling began on or after February 19, 1977 and that the well is completed at the depth of at least 15,000 feet.

Based on a concern for protecting confidential filings, several comments suggested the deletion of well logs as a filing requirement for high-cost gas. The Commission recognizes the importance of protecting proprietary interests and the need for confidentiality. The regulation has been modified to require "well logs, or well servicing reports or such other information which will corroborate the depth of the completion location" reported in the well completion report." The final phrase of the oath statement was modified slightly to read, "that he has no knowledge of any other information not described in the application which is inconsistent with his conclusions."

Section 274.206 prescribes the filing requirements for applications for stripper well determinations. To a greater extent than other sections of this subpart, this section requires the submission of actual documents rather than oath statements. In addition to the documents, applicants must submit an affidavit attesting to the well's eligibility.

After reviewing the comments, we believe that § 274.206(a)(6) should be modified. We adopt the comment suggesting that the Commission change this section to provide that an applicant must file the production records for crude oil produced during the 90-day period on which the application is based rather than the 12-month period immediately preceding the date of filing. We believe this change is consistent with section 108 of the NGPA.

Several comments objected to the requirement in § 274.206(b) that pipeline companies monitor the production
of natural gas from stripper wells. It was argued that the qualification of wells as strippers is a responsibility of the producers and not the pipelines. However, we find that to require the pipeline purchaser to monitor its purchases of stripper well natural gas is not unduly burdensome. Further, we believe that it is consistent with the obligation owed to their purchasers to insure that all gas purchases are properly priced.

One jurisdictional agency suggested that the Commission should require one-page production decline curves instead of monthly production reports. In those instances where a jurisdictional agency prefers to use a production curve, it may seek Commission approval of this alternative filing requirement under § 274.207.

Section 274.207 entitled "Alternative filing and notice requirements," acknowledges that due to differences in state records, some jurisdictional agencies may want to require other documents than those enumerated in the interim regulations. Under this section, a state agency may propose alternative filing requirements which might replace some or all of the requirements specifically provided in Subpart B. If the Commission concludes that the alternative requirements will satisfy its evidentiary requirements, the Commission may approve the alternative requirements. Upon such approval, applicants for determinations in that jurisdictional agency would file according to the alternative plan rather than under Subpart B. The section has been modified to permit jurisdictional agencies, subject to Commission approval, to provide different documents in their notification to the Commission of determinations from those now required. As jurisdictional agencies and the Commission develop experience under the NGPA, this section will provide needed flexibility.

Several comments suggested that the Commission should formulate alternative filing requirements for small producers to ease the burden of complying with Section 274, Subpart B filing requirements. While the Commission appreciates the concerns of the small producer, a specific regulation addressing small producers is not contemplated. However, the regulations do not prohibit the jurisdictional agency from adopting specific small producer filing requirements under the alternative filing requirements section provided the alternative filings constitute a reliable record upon which determination may be based.
PART 274 - SUBPART C

Subpart C of Part 274 briefly describes the procedures by which a jurisdictional agency may execute an agreement to waive its authority to make NGPA determinations. It implements section 503(c)(2) of the NGPA.

In order for a jurisdictional agency to waive its authority, it must enter into an agreement with the Commission. Under § 274.302, an agency may submit a request for waiver to the Commission. Section 274.302 also specifies the contents of such a request and requires an agency to state the reasons and the necessity for a waiver. If the Commission agrees to enter an agreement of waiver, it may do so on terms and conditions agreed to by the Commission and the jurisdictional agency. The provisions of § 274.303 specify the method of revoking or terminating the waiver agreement by the Commission or the jurisdictional agency. Section 274.304 provides that the Commission shall give public notice of all agreements of waiver and any termination or revocation of a waiver.

PART 274 - SUBPART D

Subpart D of Part 274 authorizes delegation to certain state regulatory agencies of the Commission's authority under Part 276 to receive filings under Part 276. Any such delegation is made by agreement with the state agency in accordance with section 501(c) of the NGPA.

PART 274 - SUBPART E

This subpart defines jurisdictional agency, contains a table of agencies by state, defines Federal lands, and provides for recognition of agreements between the United States Geological Survey and state jurisdictional agencies which would permit the state agency to make determinations under Part 274 respecting wells on Federal lands within the state.
PART 275 - SUBPART B

Subpart B of Part 275 prescribes the procedures governing Commission review of determinations by jurisdictional agencies. The regulations are promulgated under the provisions of section 503 of the FGPA and the general rulemaking authority of section 501(a) of the Act.

Section 275.201 provides that upon receipt of the notice of determination from a jurisdictional agency, the Commission will give public notice of the determination in the Federal Register. In addition to identifying the specific proceeding, the notice will indicate that the application and a copy or description of materials relied on by the jurisdictional agency in making the determination is available for inspection in the Commission's Office of Public Information, except to the extent such material is treated as confidential under § 275.206. The final rule is changed from the proposal to reflect the change to § 274.104 which no longer requires the complete record to be submitted by the jurisdictional agency.

Subparagraph (a) of § 275.202 tracks section 503(b)(1) and (2) of the statute in setting forth the standards which govern Commission review. The determination of the jurisdictional agency will become final 45 days after the

Commission receives notice of the determination unless within that time the Commission issues a preliminary finding and notice that the determination was not supported by substantial evidence or that there is evidence in the Commission's records which was not before the jurisdictional agency and which is inconsistent with the determination.

One comment suggested that the Commission should delete paragraph (b) of the proposal which provided that the Commission would return determinations to jurisdictional agencies if such determinations were based on applications which did not satisfy applicable requirements. After consideration of this matter, the Commission has decided that a more appropriate procedure is to provide that the 45-day review period will not begin if the Commission notifies the jurisdictional agency that the notice is incomplete in certain respects. This provision is set out in § 275.202(b). This provision accomplishes the same purpose as the proposal and gives the jurisdictional agency an opportunity to perfect its notice to the Commission.

Paragraph (c) of § 275.202 changes the proposal by providing that the Commission will publish notice of a preliminary finding in the Federal Register and will also post the notice in its Office of Public Information. The notice will contain the reasons for the preliminary finding. This provision was
added in the final rule in response to comments suggesting that the views of interested persons and state or federal agencies should be allowed subsequent to a preliminary finding.

Paragraph (d) of § 275.202 provides that any state or federal agency, or any interested person may submit written comments with respect to a preliminary finding. The rule further provides that any jurisdictional agency, any state agency, any person who participated in, the proceeding before the jurisdictional agency and any person who has filed a protest may request a conference with the Commission staff, which request will be granted, if timely made. In response to one comment, the final rule has increased the time period within which comments may be filed to 30 days.

As noted above, the changes in procedure were made in response to a comment indicating that interested persons or state agencies may not be able to participate before a jurisdictional agency or be able to prepare a protest to the Commission within 15 days after public notice of a jurisdictional agency determination. Therefore, they might be effectively excluded from participation. The revised procedures provide the greatest opportunity for public involvement possible in the limited time for Commission review. Another comment suggested that participation in proceedings before the Commission be limited to agencies or persons who had participated in proceedings before the jurisdictional agency, or who could show good cause why they did not participate. While the Commission agrees that participation before the jurisdictional agency would be preferable, it cannot guarantee, or provide procedures for such participation. Further, in view of the statutory time constraints, the Commission cannot undertake to make individual findings as to whether the person or agency had good cause for not participating before the jurisdictional agency. Accordingly, the Commission has rejected the suggestion to limit participation in its proceedings.

Section 275.202(e), consistent with sections 503(b)(1)(B) and (b)(2)(B) provides that the Commission will issue a final order within 120 days after issuance of a preliminary finding. While the statute requires a final order only when the Commission reverses or remands a decision, the regulation provides that the Commission will issue such an order in any case in which a protest was filed and a preliminary reversal or remand was issued. The final rule differs from the proposal only to clarify the persons to whom notice will be given.
Under § 275.203 any person may file a protest with the Commission within 15 days after the Commission publishes notice of receipt of a determination by a jurisdictional agency. Any person protesting a determination must indicate whether it is alleged that the determination is not supported by substantial evidence or that there is inconsistent information in the Commission's files. It should be noted that under § 275.203(b) (iii), a protester may submit information for inclusion in the Commission's public records. Accordingly, the data or information on which the Commission may rely in remanding a determination need not have been in the Commission's records at the time the jurisdictional agency made the determination.

One comment suggested that a provision be added to permit an applicant to respond to protests prior to the preliminary finding. The Commission has not adopted this suggestion because it has determined that to provide for such a response before the preliminary finding is impracticable in view of the short time within which the Commission must make its preliminary finding. The applicant's interests are adequately protected by the procedure permitting comments and conferences after the issuance of the preliminary finding.

Another comment objected to the procedure which allows a protester to submit information for inclusion in the Commission's public record for purposes of supporting a remand of the determination. The Commission has retained this procedure because it believes its procedure should encourage interested persons to submit any relevant information which is likely to result in a correct final determination.

One comment suggested that the Commission require protests to be filed under oath. The Commission has not implemented this suggestion because it does not feel that such an oath is necessary. If, after gaining some experience in administering the Act, the Commission feels that such an oath is necessary, it will amend its regulations to include the suggested provision.

Under section 503(d), final determinations are binding unless based on an untrue statement of fact, or based on a record from which a statement of material fact was omitted. Section 275.205 of the regulations sets forth a procedure for reopening determinations on those grounds. The Commission may, at any time, on its own motion or in response to a petition, reopen a determination if it appears that the necessary grounds exist.
If the Commission does reopen a determination, it will give notice to the jurisdictional agency involved as well as to all persons who participated in the prior proceeding. Within 150 days of the Commission order reopening a determination the Commission will issue a final order after giving all persons who received notice an opportunity to express their views. If the Commission finds that the requisite grounds exist, it will vacate the determination and order remedies, including refunds, as it deems appropriate.

Confidentiality. Section 275.206(a) provides that the Commission will accord confidential treatment to any information submitted to the Commission by a jurisdictional agency under §274.104, if the agency protected the information as confidential and if the grounds for confidential treatment fall within one of the nine exemptions of the Freedom of Information Act (5 U.S.C. 552(b)). Paragraph (b) provides that if the Commission receives a request for disclosure of the information protected as confidential under paragraph (a), it will determine whether the information is exempt from public disclosure under the Freedom of Information Act. If the information is determined not to be exempt, it will be released to the public. If it is determined to be exempt, the information will not be released unless the Commission determines that its conduct of the proceedings requires the disclosure of the information to the public or to particular parties, subject to conditions prescribed by the Commission. The person who submitted the information will be given at least 10 days notice before the information is made public. This section of the regulations was not in the proposed rules. Several comments suggested that the Commission add a provision to protect the confidentiality of material submitted by the applicant or contained in the materials submitted by the jurisdictional agency to the Commission, since the release of such information could inflict substantial competitive harm upon the applicant. The Commission agrees with the comments and accordingly has added this section to the final rules.
PART 276 - SUBPART A

Subpart A of Part 276 sets forth reporting requirements applicable to first sales of natural gas sold under existing intrastate contracts and intrastate rollover contracts, as well as first sales of other categories of natural gas (Subparts E, F, and I of Part 271).

For each first sale under these subparts of Part 271, the seller is required to report certain information. If the purchaser of gas under section 103 and 106(b) of the NGPA is a pipeline, the purchaser must file certain reports. Finally, in some instances, sellers of less than 10,000 MMBtu of natural gas per year may elect to make oath filings instead of detailed reports.

Under § 276.102 a seller of natural gas under an existing intrastate contract must file an annual report setting forth detailed contract information as well as an oath filing that the information in the report is true, and that sales in the reporting period comply with the NGPA and Subpart E of Part 271. Successive annual reports need not restate previously reported information. The seller must also undertake to retain all records containing information reported.

If the sale is to an interstate or intrastate pipeline, the pipeline, rather than the seller, is responsible for filing the contract information, as well as an oath statement attesting to the accuracy of the information so reported. If a pipeline purchaser makes the principal filing, the seller must still file a statement under oath that the sale complies with the NGPA and Subpart E of Part 271, and that the seller undertakes to retain records which reflect the detailed contract information required to be reported by the purchasing and reporting pipeline.

Reports required to be filed with respect to sales under intrastate rollover contracts are essentially the same as for sales under existing intrastate contracts, with appropriate modifications. These reporting requirements are set forth in § 276.103.

The annual report requirements with respect to sales under Subpart I of Part 271 are set forth in § 276.104. The report must be filed by the seller in all instances and must contain detailed information with respect to the sale. The seller is also required to make an oath statement that the gas does not qualify under any subpart of Part 271 which provides a maximum lawful price lower than that provided under Subpart I, and that, if the gas was committed or dedicated to interstate commerce, a notice of rate change has
been filed pursuant to § 154.94. The oath filing must also contain a statement regarding compliance with the NGPA and the requirements of Subpart I and must attest to the truth of the information reported.

Sellers who sell less than 10,000 MMcf per year may elect to comply with reduced reporting requirements with respect to sales under Subparts E and F of Part 271 to purchasers other than a pipeline. Instead of the detailed information otherwise required, these sellers may file an oath statement attesting to compliance with the NGPA and the applicable regulations. Such sellers must also undertake to retain books and records containing the requisite information.

As issued, the interim regulations in this subpart reflect several substantive changes. Sections 276.102(b) and 276.103(b) have been amended to impose two new reporting requirements. The requirement that the highest price per MMBtu charged and collected during the reporting period be reported for sales under Subparts E and F of Part 271 has been added in order to enable the Commission to conduct a more meaningful review of the reports filed. A requirement that all contract provisions be identified which were executed during the reporting period and which obligate a new purchaser to incur increased production-related costs has been added to correspond to revisions made in §§ 271.505 and 271.604. In addition, all persons making first sales under sections 105, 106(b), and 109 of the NGPA must retain records containing the information relevant to those sales under § 276.107.

One comment on this subpart of the regulations challenged the statutory sufficiency of an audit procedure, alleging that the Commission must make separate determinations regarding each seller's ability to charge those maximum lawful prices prescribed under sections 105, 106(b), and 109(a)(1) and (3) of the NGPA. However, the statute does not specifically provide for nor require such determinations. Given the administrative burdens attendant on making such determinations, the delay which such a determination procedure would cause, and the efficacy of the current reporting system in providing the information necessary for auditing to ensure compliance with the pricing limitations in the statute, the Commission can foresee no valid reason for instituting such a determination procedure.

Correspondingly, the Commission rejects the suggestion by a second commenter that all intrastate producers be relieved of the burdens imposed by such reporting requirements for the next several years, and be required, instead, merely to retain the relevant records for that period until the need for such data is demonstrated through the
Commission's experience in enforcing the NGPA. The Commission considers the auditing process to be essential to ensuring that those persons making first sales comply with the new pricing system under the NGPA and Part 271 and emphasizes that, because compliance with the statute is an essential element to its workability, the pricing provisions must be enforced as soon as possible.

Another comment suggested that purchasers rather than sellers be required to fulfill all reporting requirements imposed by this subpart. The Commission has already implemented such a policy, where it deems it appropriate, in order to assist the Commission in enforcing compliance with sections 105 and 106(b) of the NGPA. The Commission concludes that pipelines are the appropriate entities for filing reports concerning those sales. As purchasers of the natural gas, the pipelines have an immediate economic interest in determining that a lawful price is charged. Accordingly, they should closely scrutinize any price charged by a seller in order to determine whether that price is consistent with the maximum lawful prices permitted by the NGPA ana Part 271. Since the pipelines have the economic interest, the Commission believes it will receive the most accurate information from their filings and that such accuracy will more adequately ensure that maximum lawful prices are not exceeded by sellers. By requiring pipeline to make filings under this subpart, the Commission has also more equally distributed the burden of making filings under the NGPA. Because the information required in this subpart will have been compiled incident to the pipeline's own audits, the burdens imposed should be limited.

Such filings by pipelines are appropriate from a legal as well as a policy perspective. Section 508(b) of the NGPA provides that:

[i]n order to obtain information for the purposes of carrying out its functions under this Act, the Commission shall have the same authority as is vested in the Secretary [of Energy] under section 301(a) of the Department of Energy Organization Act with respect to the exercise of authority under section 11(b) of the Energy Supply and Environmental Coordination Act of 1974 and sections 13(b), (c), and (d) of the Federal Energy Administration Act of 1974.

The Congressional grant of authority in section 508(b) of the NGPA in broad. Section 301(a) of the Department of Energy Organization Act vests in the Secretary of Energy all of the functions vested by law in the Administrator of the Federal Energy Administration or the Federal Energy Administration; the Administrator of the Energy Research and Development Administration or the Energy Research and Development Administration; and the functions vested by law in officers and components of either such Administration.
Thus, the Commission may exercise these same powers in order to obtain information for the purposes of carrying out its functions under the NGPA. One such function is enforcement under section 504 of the NGPA of the pricing rules.

The information gathering powers enumerated in § 508(b) permit the Commission to carry out this function by requiring filings by pipelines. Section 11(b)(1)(A) of the Energy Supply and Environmental Coordination Act of 1974 permits the Commission "to require by rule, any person who is engaged in the production, processing, refining, transportation by pipeline or distribution (at other than the retail level) of energy resources to submit reports...." [Emphasis supplied] Moreover, section 13(e) of the Federal Energy Administration Act of 1974 likewise provides for certain information gathering powers:

[the Administrator [i.e., the Commission] may require, by general or special orders, any person engaged in any phase of energy supply or major energy consumption to file with the Administrator in such form as he may prescribe, reports or answers in writing to such specific questions, surveys, or questionnaires as may be necessary to enable the Administrator to carry out his functions under the Act. Such reports and answers shall be made under oath, or otherwise, as the Administrator may prescribe, and shall be filed with the Administrator within such reasonable period as he may prescribe. [Emphasis supplied]

The Commission has decided to exercise its information gathering powers in a manner that requires pipeline companies to submit the reports required by Subpart A of Part 276 of the regulations.

Another comment suggested that the category of sellers exempted from certain filing requirements under §§ 276.102 and 276.103 be revised to coincide with the definition of small producers in § 271.402(b)(9). That provision has now been revised, however, the use of the definition in paragraph (b)(9) would not cover all sellers intended to be included in the exemption. It would eliminate all sellers who were not also producers but who would qualify as having made a first sale subject to the pricing provisions of the NGPA. The Commission intends to establish in this regulation a simple volumetric limitation based on which sellers may be exempted from providing detailed contract information pursuant to this subpart. The purpose of the exemption is substantially different from the pricing considerations which were imposed by the NGA and which underlie the provisions of § 271.402(a). The definition in § 271.402(b)(9) only incidentally concerns filing requirements and was intended to implement under the NGPA a pricing system established under the NGA.
In the interim, intrastate pipeline sales will be governed under the emergency program established under the Natural Gas Act. Of course, assignments by intrastate pipelines may be made beginning on December 1, 1978, pursuant to the provisions of Subpart D which implements section 312 of the NGPA.

**PART 284 - SUBPART A**

This subpart governs the transportation of natural gas by interstate pipelines on behalf of intrastate pipelines and local distribution companies pursuant to the terms of section 311(a)(1) of the NGPA. Two mechanisms are established. The first is self-executing and allows transportation arrangements to be entered into without necessity of prior Commission approval for periods not in excess of two years. The Commission has also added a provision that would permit transportation arrangements for fixed periods in excess of two years. In this latter case, however, application must be made to the Commission and prior approval obtained. The Commission believes that it is appropriate to review and evaluate long-term transportation arrangements in view of the potential impacts of such arrangements on the operation of on an interstate
pipeline's system. Arrangements for fixed terms in excess of two years may involve significant investments in the construction and operation of facilities. This consideration also supports the approach taken here by the Commission.

Several commentors suggested that the Commission should remove the two-year limitation and rely instead on its ability to impose terms and conditions which would have the effect of terminating an arrangement if the Commission concluded that a continuance of the arrangement was not in the public interest. We do not believe that is a sensible regulatory approach to this problem. As noted above, long-term transportation arrangements may be expected to contribute to the need for future investment which will require amortization over a period of years and may impose a burden upon all customers of the pipeline. Serious questions of equity and practicality would attend any attempt to abruptly terminate an arrangement which had been entered into in contemplation of its continuance for a period sufficiently long to justify the investment. Moreover, we doubt that parties would enter into long-term arrangements if they were subject to the jeopardy that the Commission may, on its own motion and at any time, terminate the arrangement.

The Commission, wishes to emphasize that the two-year limitation applicable to transportation arrangements which may be entered into without prior Commission approval should not be read as indicating a predisposition on the part of the Commission against longer-term arrangements. Indeed, the Commission is well aware that the NGPA seeks to strike down the jurisdictional barriers which have precluded interstate and intrastate pipelines from taking advantage of the most economic and efficient means of transporting natural gas. Sections 311(a)(1) and 311(a)(2) provide the Commission with important new authorities designed to achieve a national transportation system with its attendant economies and efficiencies. On the other hand, transportation arrangements for fixed periods greater than two years contemplate service periods which may so significantly affect a pipeline's system operation as to require prior Commission scrutiny and approval. It is for these reasons that the Commission has chosen the two-pronged mechanism contained in Subpart A and Subpart B of Part 284.

Other than the addition of the application procedure for transportation arrangements in excess of two years, only minor revisions have been made to the proposed regulation. The most significant is the addition of provisions
to § 284.103 which would permit an interstate pipeline to retain revenues in excess of 1 cent per Mcf if it is able to demonstrate that the amounts retained represent actual out-of-pocket expenses in excess of the 1 cent allowance. The Commission notes, parenthetically, that the 1 cent per Mcf allowance for out-of-pocket costs derives from the Commission's experience in a number of individual cases under the Natural Gas Act which evidenced that the 1.0 cent per Mcf reasonably represented the level of out-of-pocket costs normally incurred by interstate pipelines in rendering transportation service. But, we recognize that individual transportation arrangements occurring under Subpart A may involve the incurrence of out-of-pocket expenses greater than 1.0 cent per Mcf. Accordingly, the Commission will permit an allowance in excess of 1 cent per Mcf provided the pipeline is able to substantiate greater out-of-pocket cost.

Section 284.104(c) has been revised, in response to comments, to provide that the terms and conditions which the Commission may impose by rule or order, under the section, shall be prospective. Section 284.106(d) has been revised to clarify that the final report is required only after the termination of an extension where one has been entered into in accordance with § 284.105.

Subpart A provides that interstate pipelines engaging in transactions under this subpart may recover the costs of providing the service including the retention of any revenues where such transportation transactions have been reflected in the pipeline company's rates either through the crediting of revenues or the inclusion of the transportation volumes in billing determinants.

**PART 284 - SUBPART B**

This subpart governs the transportation of natural gas by intrastate pipelines on behalf of interstate pipelines and local distribution companies served by interstate pipelines under section 311(a)(2) of the NGPA. Sections 284.122 and 284.127 have been revised to conform to §§ 284.102 and 284.107 of Subpart A. The considerations which prompted the Commission's decision under Subpart A apply equally here. Parity of treatment of interstate and intrastate pipelines under similar statutory provisions also support this decision.

Section 284.123(b)(1)(i) has been revised to provide for rates which are based on recovery of all costs which may be associated with the transportation function. Section 284.123(b)(2) has been added to govern those cases where the intrastate pipelines' transportation rates are not subject to the jurisdiction of an "appropriate state
regulatory agency." Section 284.123(d) provides that transportation rates computed in accordance with § 284.123(b)(1) are presumed to be fair and equitable and not in excess of the rates and charges which interstate pipelines would be permitted to charge for providing similar transportation service. This is consistent with and conforms to statutory language in section 311(a)(2) of the NGPA. Moreover, the Commission presumes that all revenues associated with those transportation transactions engaged in by regulated intrastate pipelines have been, or will be, considered by the appropriate state regulatory authority in establishing rates to be charged. This treatment would be consistent with treatment of inter-state pipelines by this Commission.

Section 284.124(a) has been added; and § 284.124(c) has been revised to conform to the corresponding section in Subpart A. The initial report required by § 284.126(a) will be filed with the "appropriate state regulatory agency." This term which is also used in § 284.123 is defined in § 284.128. The filing of the initial report with the "appropriate state regulatory agency" is necessary to implement the provisions of § 284.123(c).

The Commission wishes to call special attention to certain features of the regulation under Subpart B. The provisions of § 284.123 governing the rates and charges by intrastate pipelines for transportation arrangements under this subpart have been revised to permit an intrastate pipeline to elect to base its rates upon the methodology and cost used in determining the allowance permitted by an appropriate state regulatory agency for city-gate service. The Commission understands from a number of comments received that in some cases, state regulatory agencies exercise cost of service type regulation at the distribution company level permitting an allowance for city-gate service rendered by intrastate pipelines. Thus, commentors have pointed out, the intrastate pipeline is effectively regulated albeit the state regulatory agency does not directly accept for filing and pass on "rates and charges for transportation" as such. Also, the Commission has modified § 284.123 to specify that in any case where an intrastate pipeline does not elect to base its rates upon the methodology and cost formulae contained in paragraph (b)(1) or where the intrastate pipeline is not regulated directly or indirectly on a cost-of-service basis, the pipeline may file proposed...
rates and charges with the Commission supported by information showing that the proposed rates and charges are fair and equitable. Upon filing, the intrastate pipeline may commence the transportation service and charge the proposed rates subject to refund. It need not await approval or further action of the Commission. Paragraph (b)(2) also provides, however, that the Commission may order refunds of any amounts which it may, through subsequent procedures, determine to have been charged in excess of rates and charges which interstate pipelines would be permitted to charge for similar service or amounts which it determined to be in excess of those which have been shown to be fair and equitable.

A number of commenters were concerned that the Commission had not allowed an opportunity for the intrastate pipeline to earn a reasonable profit as required by section 311 of the NGPA. If the intrastate pipeline files its proposed rates and charges pursuant to § 284.123(b)(2), the intrastate pipeline, of course, would include a reasonable profit within its proposed rates. If, on the other hand, the intrastate pipeline elects the alternative procedures contained in § 284.123(b)(1), the reasonable profit is built into the formulae contained in clauses (i) and (ii). In other words, the intrastate pipeline is permitted the same opportunity for profit as is permitted by the appropriate state regulatory agency under the methodologies used in designing rates or in determining the allowance referred to in those clauses.

As set forth in § 284.123(d), the rate charged by an intrastate pipeline which elects the procedures under paragraph (b)(1)(i) or (ii) is presumed to be fair and equitable and not in excess of the rates and charges to which interstate pipelines would be permitted to charge for providing similar service. The Commission has had considerable difficulty in determining a practical method for applying the statutory limitation on rates contained in section 311(a)(2). At this time, we have attempted to resolve this problem by presuming that if an intrastate pipeline is regulated on a cost-of-service basis, it would not be permitted to charge a rate which is greater than the rate which would be allowed an interstate pipeline similarly regulated on a cost-of-service basis. The Commission recognizes, however, that no two pipelines are alike and that rate schedules of interstate pipelines reflect the particular characteristics of the pipeline.
and are tied to the size and length of the line, the load factor of its operation, the location and nature of its supply and the characteristics of its markets.

It is for these reasons that the Commission rejected suggestions made by some commentors that the Commission permit intrastate pipelines to merely select a rate schedule on file with the Commission governing transportation service by interstate pipelines. We are also in doubt as to how we would measure comparability of service in the case of pipelines which have substantially different investments, operations and costs. While we are not prepared to conclude that an approach of this nature cannot be fashioned, we must admit that we are unable to do so at this time. For this reason, the Commission invites interested parties to address this question in the extended comment period on the interim regulations.

PART 284—SUBPART D

Subpart D implements section 312 of the NGPA which governs assignments of contractual rights to receive surplus natural gas by intrastate pipelines to interstate pipelines and local distribution companies. Rates charged for transportation services in connection with assignments are determined in accordance with Subpart B. Changes made in that subpart have been reflected in similar provisions of § 284.164(a) and §§ 284.165(a)(5) and (e)(1)(v). The report requirements have also been reduced in response to comments received. No other significant changes have been made in this subpart.
The Commission's existing regulations promulgated under the Natural Gas Act exempt from the certificate requirements under section 7 of that Act certain emergency transactions. These provisions, contained in 18 C.F.R. §§ 2.68, 157.22 and 157.29, permit the transportation and sale of natural gas in interstate commerce without prior certificate authorization from the Commission. Under these provisions, emergency supplies of natural gas have been obtained in substantial quantities in past winter heating periods and during times of summer storage fill at market prices in excess of otherwise applicable national or area rates governing jurisdictional sales.

It is generally acknowledged that these exemptions for emergency transactions have allowed interstate pipelines, distribution companies and others dependent upon interstate pipeline supplies to avoid, or at least alleviate, the consequences of severe supply shortages of natural gas in the interstate market. Nonetheless, a number of criticisms have been leveled at the existing program suggesting that it was subject to abuse and required administrative tightening.

Accordingly, on April 7, 1978, the Commission determined to review the current emergency program and issued a Request for Comments inviting interested persons to submit their views on the program and to offer suggestions for change. After the comments were reviewed and analyzed, the Commission issued a Notice of Proposed Rulemaking on August 14, 1978, and again requested comments. That proposal would have substantially changed the provisions of the Commission's current regulations applicable to emergency transactions.

Comments were received from parties representing a wide range of interests, including independent and associate producers, interstate and intrastate pipelines, distribution companies, industrial consumers and the public.

The August 14, 1978, proposal was described in substantial detail in the Notice of Proposed Rulemaking and no recapitulation or further elaboration will be attempted here. It is sufficient to note only that it would have imposed stricter requirements for participation in emergency transactions and would have added additional reporting requirements to allow the Commission to monitor more closely the activities of emergency purchasers and sellers.
Prior to final action by this Commission on the August 14, 1978, proposal, the Congress passed and the President signed into law the NGPA, which changed much of the statutory authority on which the proposed rulemaking had been based and established new congressional directives and policies governing the sale and transportation of natural gas. For this reason, the Commission determined on November 13, 1978, to publish a revised Notice of Proposed Rulemaking more consonant with the requirements and policies of the NGPA. Comments were to be submitted no later than November 20, 1978. The Commission determined that good cause existed to dispense with the full 30 day notice and comment period, inasmuch as the winter heating season had already begun and because the NGPA was to take effect on December 1 -- one month into the heating season.

Practical considerations preclude the Commission from attempting to restate or discuss the comments received since November 13, 1978, in the detail which in other circumstances would be appropriate. The Commission advises, however, that it has read and considered the comments received and made revisions that it considers appropriate and practical given the exigencies of the moment.

Because emergency transactions under the NGA have been overtaken by passage of the NGPA on November 9, 1978, we have determined to promulgate the revised regulations applicable to emergency transactions as interim regulations to be effective December 1, 1978. Accordingly, the revised regulations under the NGA applicable to emergency transactions are to be considered together with the implementing regulation under the NGPA and may be subject to further revision as the Commission may find appropriate after the extended comment period.

Revised Interim Regulations

The interim emergency regulations prescribed herein leave the current emergency program largely intact. The Commission acknowledges that there are deficiencies in the program which would require correction if it were to continue as a permanent feature of the Commission's regulations. However, that is not to be the case. Rather the Commission intends to continue the emergency interim regulations in their present form only through the current winter heating season.

The Commission intends to substantially revise and limit the applicability of the emergency program following the current winter heating season. We did not, therefore, consider it wise public policy to attempt major revisions
in a program which is to last for only a few additional months. Moreover, recognizing that we are already in the midst of the current heating season, it did not appear reasonable to risk the disruption and uncertainty as would attend a significant revision of the prior existing program.

Some further comment on the proposed duration of the emergency program prescribed herein is appropriate. As previously announced, the Commission intends to implement section 311(b) of the NGPA governing sales by intrastate pipelines effective March 1, 1979. Although not included in this stage of implementing regulations, the Commission intends in the near future to issue a revised notice of proposed rulemaking under Subpart C of Part 284 which will reflect changes in the original proposal.

In the future, therefore, intrastate pipeline sales and assignments, as well as transportation arrangements between and among inter- and intrastate pipelines and local distribution companies are to be governed by the NGPA regulations contained in Part 284.

Effective December 1, 1978, all first sales by natural gas producers are subject to maximum lawful prices and other aspects of the Commission's regulations implementing the NGPA. Moreover, under the NGPA it is no longer necessary for producers to obtain certificates under section 7 of the NGA to commence sales in the interstate market, provided the natural gas was not previously committed or dedicated to interstate commerce. This is so whether producer sales are entered into for emergency purchases or otherwise.

Thus, an exemption from section 7 of the NGA is no longer required or appropriate for producer sales of natural gas not previously committed or dedicated to interstate markets. Accordingly, we have revised our existing regulations to remove those features applicable to producer sales.

Inasmuch as Part 284 is scheduled for full implementation on March 1, 1979, and because producer sales are now governed under the NGPA and not the NGA, the question occurs whether there is any continued need or justification for an emergency program under the NGA after the conclusion of this winter's heating season. The Commission specifically invites comments on this question. At the very least, it would seem that the emergency program, if it is to be continued at all, should be limited to circumstances involving a sudden unanticipated loss of supply or situations in which immediate action is required for protection
of life and health or the maintenance of physical property. The Commission would benefit from whatever guidance or suggestion is provided on this subject.

**Brief Summary of Emergency Interim Regulations**

Sections 2.68, 157.22 and 157.29 of the Commission's current regulations are preserved only to the extent that they apply to existing emergency transactions. Accordingly, the current regulations are to continue in effect and remain applicable to contracts executed before November 9, 1978, in the case of a first sale governed by the NGPA (which will include all producer sales), or before December 1, 1978, in any other case (including sales by intrastate pipelines whose sales are generally not considered first sales governed by the NGPA). The emergency interim regulations also add to the Commission's existing regulations under the NGA a new Subpart C which contains §§ 157.45 through 157.52.

Section 157.45 defines the purpose of new Subpart C and sets out the relationship of this subpart to other parts of the implementing regulations under the NGPA.

Section 157.46 contains definitions which establish the parameters of eligibility for the exemption from section 7 of emergency transactions. The definition of emergency has been revised from the November 13 proposal in a number of respects. Specifically the definition has been expanded to make clear that an emergency includes a sudden unanticipated loss of supply or increase in demand. An emergency qualifying under this section would also include situations where additional supplies are necessary to maintain deliverability from storage, or to replenish storage volumes in order to alleviate curtailment. Also, persons described in section 1(c) of the NGA have been included as qualified sellers and purchasers. This responds to a number of comments which has suggested the inclusion of so-called Hinshaw pipelines under the program.

In addition, the Commission has defined a "sale of emergency natural gas" to include an exchange of natural gas to alleviate an emergency, provided the volumes exchanged are paid back within 180 days after the termination of deliveries of emergency natural gas. The 180-day pay-back rule is designed to assure that the parties to the exchange are made whole prior to the commencement of the next winter heating season. The Commission, in addition, wishes to make clear that the emergency program contemplates the rendering of emergency storage service by local distribution companies as was permitted under § 2.68 of the Commission's Rules.

A number of comments expressed concern that the Commission may take action under its authority in
section 315 of the NGPA to specify a minimum contract
duration in such a manner as to disrupt the emergency
program. The Commission advises that, although it in-
tends to act in the near future to implement section 315,
any such specification of a minimum contract duration will
operate prospectively only. Moreover, the Commission will
give special consideration to the need to provide an excep-
tion to any minimum contract duration requirement for emer-
gency transactions which by their very nature contemplate
transactions of brief duration.

Section 157.47 contains the specific exemptions from
certificate requirements under section 7 of the NGA. Only
minor technical changes in this language have been made.
Transportation by an interstate pipeline for another inter-
state pipeline or for a direct assignee is specifically
exempted. Transportation by an interstate pipeline for a
local distribution company or a person described in
section 1(c) of the NGA is governed by Subpart A of
Part 284. In this regard, the Commission should note
parenthetically that although Hinshaw pipelines are not
expressly governed by Subpart A of Part 284, the defini-
tion of local distribution companies under the NGPA
specifically includes such persons.

The Commission wishes to call special attention
to paragraph (c) of § 157.47. Under its terms, the
Commission seeks to make abundantly clear that the
Commission's jurisdiction under the NGA does not vest
with respect to any transaction or person participating
in an emergency transaction except to the extent provided
in the emergency regulations themselves. Several comments
expressed concerned that provisions in existing producer
contracts which preclude intrastate pipelines from
reselling natural gas in interstate commerce or com-ming-
ling natural gas in interstate commerce could operate to
prevent intrastate pipelines from fully participating under
the emergency program. This should no longer be a matter
of concern. Those provisions contained in producer con-
tracts were apparently designed to guard against a pro-
ducer's becoming unwillingly and unknowingly subject to the
cost-based rate regulation of the NGA. Passage of
the NGPA coupled with the limited vesting of Commission
jurisdiction under paragraph (c) of § 157.47 should obviate
those concerns.

Section 157.48 contains terms and conditions appli-
cable to emergency transactions. The section has been
revised to delete or modify language previously proposed
The revisions and deletions were considered appropriate in light of the interim character of the revised emergency program. In response to comments, this section has been revised to clarify its scope and applicability and to include a provision which places on the person for whom the emergency natural gas is acquired and transported, responsibility to provide volumes for compressor station fuel and line losses.

Section 157.49 establishes requirements which govern the rates for emergency transactions. No significant change has been made in the language. The Commission has determined to keep the presumption of prudence provided at paragraph (b) in cases where the purchased gas cost for emergency natural gas supplies does not exceed the maximum lawful price specified in § 271.202 of Subchapter H applicable to "new gas".

The Commission wishes to emphasize that this, is a rebuttable presumption of prudence and is not intended to operate as a floor, as some comments suggested. Moreover, nothing in this section will operate to preclude an interstate pipeline from availing itself of the opportunity to establish that a rate in excess of the new natural gas price was prudent in the circumstances.

The Commission has significantly revised the treatment of revenues contained in § 157.50. Under its terms the interstate pipeline would not be required to credit revenues if its actual out-of-pocket expenses exceed the one cent per Mcf allowance or if the retention of revenues did not provide double recovery. Various formulas are contained in paragraphs (b), (c), (d) and (e) of this section to carry out this intent.

Section 157.51 contains reporting requirements for emergency requirements for emergency transactions. The Commission has revised the quarterly report requirement to limit it to calendar quarters occurring in 1979. Sections 157.52, regarding a waiver of requirements for emergency transactions, and 157.53, relating to certain exemptions for drilling, testing or purging of pipeline facilities are prescribed without revision.
III. PUBLIC PROCEDURE

Subchapters H and I of Title 18 were published in the Federal Register as a notice of proposed rulemaking at 43 FR 53270 on November 15, 1978. That proposal included the following description of the procedures the Commission had applied and would apply to the promulgation of final regulations implementing the Natural Gas Policy Act:

Although the NGPA was not enacted until November 9, 1978, most of its provisions become effective on December 1, 1978. On that date, persons affected by the Act, including a large portion of the natural gas industry not previously regulated by the Federal government, will be subject to a comprehensive and complex new regulatory structure. For reasons set out more fully below, regulations implementing the Act must be effective on December 1, 1978, both for guidance to those regulated and to insure compliance with the new law.

When it became apparent that the period between final enactment of the law and its effective date would not provide sufficient time for the normal rulemaking procedures, the Commission established the following schedule and procedures:

The Commission has been meeting in public session since November 1, 1978, in order to discuss regulations drafted by the staff to implement the NGPA. Prior to the first meeting, the Commission made copies of the various proposals under consideration available to the public. As successive drafts were completed, these too were released prior to Commission discussion. During all of this period, certain members of the Commission staff were publicly designated as contact persons to answer legal and technical questions concerning the implementation of the Act.

For other categories, pricing determinations must be made by State or Federal agencies with regulatory authority over the production of natural gas. Unless the interim regulations are available on December 1, 1978, members of the public whose sales are governed by provisions of the Act will not be able to ascertain the applicable maximum lawful price governing their sales of natural gas. Indeed, some sellers and transporters of natural gas could unknowingly be in technical violation of the law. Purchasers may be uncertain whether prices requested exceed the prices permitted under the law. Similarly, agencies which must make determinations with respect to eligibility for prices established by the Act must be made aware of Commission requirements applicable to these determinations, including the manner in which the Commission will review such determinations.

After consideration of the problems associated with any delay in promulgating implementing regulations, the Commission has reached the conclusion that because the regulations must be effective by December 1, 1978, good cause exists to limit as described above notice and public procedure on this proposal. Full notice and public procedure on the proposal at this time, which as a practical matter would result in a delay of the effective date of the regulations beyond the effective date of the NGPA, are impractical and contrary to the public interest. It should be emphasized that all of the procedures described above will provide the fullest possible opportunity for public participation during the entire process leading to the promulgation of final regulations.
The Commission intends to promulgate interim regulations on November 27, 1978. The interim regulations will be effective on December 1. A 60-day comment period will be afforded with respect to the interim regulations and public hearings will be held. The interim regulations will, after the 60-day period and after all views received since November 1, 1978, have been considered, be modified to the extent such comments and the Commission's experience under the interim regulations indicate the modification is appropriate.

The proposal published today provides for a comment period ending on November 20. The Commission is aware that in view of the significance and complexity of these regulations, comments will be extensive. To the extent possible, comments received before November 20 will be reviewed and appropriate changes incorporated into the interim regulations. As stated above, all comments will be retained and considered together with the additional comments received during the 60-day period afforded for comments on the interim regulations. The Commission believes that to the extent practicable, the procedures being followed with respect to these regulations are those best designed to insure maximum public participation prior to the time when the interim regulations must be effective.

In establishing this notice and comment procedure, the Commission has considered a number of factors. Most important, as stated above, is the fact that most of the Act's provisions become effective on December 1, 1978, including provisions establishing maximum lawful prices applicable to first sales of natural gas delivered after November 30, 1978. Some of the prices which may be charged for natural gas deliveries under the Act are established by reference to existing prices.

Consideration of Comments

A substantial number of written comments have been received in response to the notice of proposed rulemaking. In addition, the staff met informally, prior to the close of the comment period, with representatives of state agencies, consumer groups, and the industries affected by the proposed regulations. A notice, describing these meetings and inviting any interested person to meet informally with designated members of the Commission staff was issued on November 17, 1978. Minutes of these informal meetings, together with any written materials presented at these meetings, have been included in the public file. All comments received by the Commission by November 20, 1978, and to the extent possible, comments received after that date, have been considered. In the limited time available to the Commission and its staff, changes in the regulations have been made. The major changes are noted in Section II of this preamble. The preamble also discusses a number of suggestions made in the comments which have not been incorporated into these regulations.

Because of the time limitation, some changes have been made, generally of a minor nature which are not discussed in the preamble, and the reasons for not
adopting some suggestions are not mentioned. To the extent possible, significant changes have been explained.

The Commission wishes to emphasize that all comments will be retained and reconsidered with comments received as a result of this publication. Accordingly, suggested changes, deletions or additions, not adopted by the Commission in these rules, will, in light of additional information received in the next 60 days, be re-examined and possibly adopted as amendments to the interim regulations.

ADDITIONAL COMMENTS

In accordance with the procedures described below, the Commission solicits comments on all aspects of these interim regulations. It should be emphasized that the Commission intends to review the regulations in their entirety and make whatever changes it deems appropriate based on the comments already received, additional written comments, the views expressed in public hearings, and experiences under the regulations during the next 60 days.

Interested persons are invited to submit written comments on the regulations to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Comments should reference Docket No. RM79-3 on the outside of the envelope and on all documents submitted to the Commission. To assist the Commission, it is requested that comments identify the section or subpart addressed, state whether the comments involve technical, legal, or policy matters, and if alternative approaches are suggested, provide proposed implementing language to the extent practicable.

Fifteen copies should be submitted. All comments and related information received by the Commission by January 31, 1979, will be considered prior to promulgation of revisions or amendments to these regulations.

PUBLIC HEARINGS

The Commission intends to hold a series of public hearings on these interim regulations, as required by section 502(b) of the NGPA. For the reasons stated above, however, the Commission finds that it is impracticable to provide an opportunity for oral presentation of data, views and arguments prior to the effective date of the regulations, and waives for 45 days the requirement of prior hearings under section 502(b). The dates and locations of the public hearings will be announced as soon as practicable.
EFFECTIVE DATE

As stated above, the Commission has determined that a delay of the effective date of the regulations beyond the effective date of the Natural Gas Policy Act is impractical and contrary to the public interest. Accordingly, the Commission finds that good cause exists for making the regulations effective on December 1, 1978.

In consideration of the foregoing, Chapter I of Title 18, Code of Federal Regulations, is amended as set forth below.

By the Commission.

Lois D. Cashell
Acting Secretary

PART 2 - GENERAL POLICY AND INTERPRETATIONS

1. Section 2.68 is amended by adding a new paragraph (c) to read as follows:

§ 2.68 Policy with respect to temporary emergency sales and deliveries of natural gas for resale in interstate commerce by persons with exemptions under the Natural Gas Act pursuant to section 1(c), and certain persons exempt under the Natural Gas Act pursuant to section 1(b).

   (c) This section does not apply to any transaction other than an existing emergency transaction (as defined in § 157.46(i)).

PART 157 - APPLICATIONS FOR CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND FOR ORDERS PERMITTING AND APPROVING ABANDONMENT UNDER SECTION 7 OF THE NATURAL GAS ACT

2. Section 157.22 is amended by amending a new paragraph (f) to read as follows:

§ 157.22 Exemption of temporary acts and operation.

   (f) This section does not apply to any transaction other than an existing emergency transaction (as defined in § 157.46(i)).

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
3. Section 157.29 is amended by adding a new paragraph (e) to read as follows:

§ 157.29 Exemption of emergency sales or transportation.

(e) This section does not apply to any transaction which is not an existing emergency transaction (as defined in § 157.46(1)).

4. Part 157 is amended by adding new Subparts C (§§ 157.45 through 157.52) and D (§ 157.53), to read as follows:

SUBPART C—EXEMPTION OF EMERGENCY SALE ARRANGEMENTS FOR NATURAL GAS FROM CERTIFICATE REQUIREMENTS

Sec. 157.45 Purpose and exclusion.
157.46 Definitions.
157.47 Exemptions from certificate requirements.
157.48 Terms and conditions of emergency transactions.
157.49 Rates for emergency transactions.
157.50 Treatment of revenues.
157.51 Reporting requirements for emergency transactions.
157.52 Waiver of requirements for emergency transactions.

§ 157.45 Purpose and exclusion.

(a) Purpose. The purpose of this subpart is to prescribe the conditions under which certain emergency transactions involving the construction and operation of facilities or the sale or transportation of natural gas in interstate commerce are exempt from the requirements of section 7 of the Natural Gas Act. Requirements relating to certain arrangements for the transportation of natural gas, including transportation in emergency situations, are set forth in Part 284 of this chapter and apply to transportation for intrastate pipelines and certain local distribution companies including persons exempt from Natural Gas Act jurisdiction under section 1(c). Requirements relating to certain arrangements for the transportation of emergency natural gas by an interstate pipeline on behalf of another interstate pipeline and certain direct assignees of emergency natural gas are set forth in this subpart. This subpart also applies to certain arrangements for exchange of natural gas for emergency purposes.

(b) Exclusion. This subpart does not apply to existing emergency transactions.

§ 157.46 Definitions.

For purposes of this subpart:

(a) "Emergency" means:

(1) a situation where the gas supply either available or expected to be available would require the interstate pipeline company, distribution company, or person described in section 1(c) of the Natural Gas Act to impose curtailment on its system (including a situation where additional supplies
are necessary to maintain deliverability from storage or to replenish storage volumes in order to avoid or alleviate curtailment on its system); 

(2) a sudden unanticipated (i) loss of natural gas supply or (ii) increase in demand; or 

(3) a situation in which the qualified purchaser, in good faith, determines that immediate action is required or is reasonably anticipated to be required for protection of life or health or for maintenance of physical property. 

(b) "Qualified seller" means any intrastate pipeline, interstate pipeline, distribution company or person described in section l(c) of the Natural Gas Act. 

(c) "Qualified purchaser" means a distribution company, interstate pipeline or person described in section l(c) of the Natural Gas Act. 

(d) "Interstate pipeline" means any natural gas company as defined in section 2(6) of the Natural Gas Act which is engaged in the transportation by pipeline of natural gas. 

(e) "Distribution company" means any person (or governmental entity) who receives natural gas for local distribution and resale to natural gas users. 

(f) "Intrastate pipeline" means any person (other than an interstate pipeline or distribution company) engaged in the transportation by pipeline of natural gas. 

(g) "Emergency natural gas" means natural gas sold or transported to alleviate an emergency in accordance with this subpart. 

(h) "Sale of emergency natural gas" includes an exchange of natural gas to alleviate an emergency in accordance with this subpart between a qualified seller and qualified purchaser, provided that the volumes exchanged are paid back within 180 days after the termination of deliveries of emergency natural gas. 

(i) "Existing emergency transactions" means a transaction under §§ 2.47, 157.12, or 157.29 pursuant to a contract executed: 

(1) before November 9, 1976, in the case of a sale which is a first sale within the meaning of the Natural Gas Policy Act of 1978; or 

(2) before December 1, 1978, in any other case. 

§ 157.47 Exemptions from certificate requirements. 

(a) Sales, construction and operation of facilities. 

Any qualified seller who sells emergency natural gas to a qualified purchaser, and any person who constructs or
operates facilities for the sale of transportation of emergency natural gas, is exempt from the requirements of section 7 of the Natural Gas Act, to the extent that:

(1) the sale of emergency natural gas or the construction or operation of facilities is necessary to alleviate an emergency; and

(2) the sale, construction or operation is conducted in accordance with the provisions of this subpart.

(b) Transportation. Any interstate pipeline transporting emergency natural gas on behalf of (1) any direct assignee described in §157.48(d), or (2) another interstate pipeline, may engage in such transportation in accordance with this subpart without necessity of obtaining any other authorization for such transportation under section 7 of the Natural Gas Act.

(c) Jurisdiction of the Commission under the Natural Gas Act. Participation in any transaction in accordance with this subpart shall not subject any person to the jurisdiction of the Commission under the Natural Gas Act except to the extent provided in this subpart.

§157.48 Terms and conditions of emergency transactions.

(a) General conditions. (1) Qualified purchasers may purchase emergency natural gas in accordance with the provisions of this subpart but should make every reasonable attempt to conduct their operations in such a manner as to minimize or, if possible, to avoid continuing reliance upon emergency natural gas supplies.

(2) In applying the definition of emergency, flexibility will be accorded interstate pipelines and distribution companies to account for colder than normal winter weather. A reasonable relationship should exist between volumes purchased under this subpart and the volumes which are anticipated to be needed during the emergency.

(3) When a distribution company purchases, or a direct sale customer or distribution company requests assignment of emergency natural gas, a responsible official of the distribution company or direct sale customer shall advise the interstate pipeline which will make the deliveries, before commencement of the deliveries, that the emergency exists or is imminent and shall provide the interstate pipeline with such information as may be required within sufficient time to enable the interstate pipeline to make the reports required in §157.51 of this subpart.
(b) **Duration.** (1) An emergency transaction under this subpart shall be limited to a period of not more than 60 consecutive calendar days, except that such transaction may be continued for an additional period of not more than 60 consecutive days where:

(i) fifteen days prior to the end of the initial 60-day period, the qualified purchaser files a petition requesting a waiver so as to permit one additional 60-day period of exemptions describing fully the continued emergency; and

(ii) the Commission does not, within the 15-day period, by order, prohibit continuation of the emergency transaction for such additional period.

(2) Transactions necessary for the pay back of volumes of natural gas exchanged for emergency natural gas, may occur within the 100-day period which follows the termination of deliveries of the emergency natural gas for which the pay back volumes are exchanged.

(c) **Cost of facilities.** No cost associated with facilities installed by interstate pipelines in connection with emergency transactions shall be included in the interstate pipeline's jurisdictional rates unless certificate authorization under section 7 of the Natural Gas Act exists or is obtained for such facilities.

(d) **System supply and direct assignment of supplies.**

(1) Interstate pipelines may purchase emergency natural gas for general system supply for an emergency.

(2)(i) Interstate pipelines may purchase emergency natural gas and directly assign volumes and costs associated with such gas, including transportation costs, to its direct sale and distribution company customers, or persons described in section 1(c) of the Natural Gas Act, faced with an emergency, if such customers or persons comply with paragraph (a)(3) of this section.

(ii) An interstate pipeline, at its discretion, may choose to establish a separate account to cover the cost of all assigned emergency purchases and allocate costs in that account to the individual assignment customers or person described in section 1(c) of the Natural Gas Act on a weighted average cost basis. If an interstate pipeline purchases emergency gas supplies for direct assignment in quantities greater than related emergency requirements, then the balance may be used for general system supply. It is expected that such excess emergency natural gas volumes will be small and that pipelines will make every reasonable attempt to balance assignments with supplies. Interstate pipelines may also act as brokers or agents.
(without compensation for acting as broker or agent) in acquiring and transporting emergency natural gas for distribution company customers, or persons described in section 1(c) of the Natural Gas Act, faced with an emergency and shall cooperate with these customers, or persons in arranging for such acquisition and transportation.

(iii) In the case of any direct assignment of emergency natural gas or brokered or agency transaction, the customer or person for whom the natural gas is acquired and transported shall be responsible for providing volumes for compressor station fuel and lost and unaccounted for volumes of natural gas.

§ 157.49 Rates for emergency transactions.

(a) Rates and charges. (1) Rates for transportation by an interstate pipeline under this subpart shall be computed in accordance with subparagraph (2) of this paragraph. Sales by interstate pipelines shall be made at rates prescribed in their tariffs, except that if the natural gas is purchased for assignment to particular direct customers, distribution companies, or persons described in section 1(c) of the Natural Gas Act, the natural gas will be priced to recover the cost of purchased gas plus an amount for transportation as provided in subparagraph (2) of this paragraph.

(2)(i) If an interstate pipeline has on file with the Commission a transportation rate schedule applicable to transportation arrangements under Subpart A of Part 284, the interstate pipeline shall use the rates contained in that schedule.

(ii) If an interstate pipeline does not have on file with the Commission a transportation rate schedule applicable to transportation arrangements under Subpart A of Part 284, the interstate pipeline may elect either:

(A) to base its rates upon the methodology and cost used in designing rates to recover the transmission and related storage costs included in its then effective sales rate schedules; or

(B) to use the rates contained in a transportation rate schedule on file with the Commission which the interstate pipeline determines covers service comparable to transportation service under Subpart A of Part 284.

(b) Presumption of prudence. The Commission will examine the prudence of emergency purchases by interstate pipelines, except that a rebuttable presumption of prudence
shall be accorded to the extent that the rates paid do not exceed the maximum lawful price specified in § 271.202 of this chapter.

§ 157.50 Treatment of revenues.
(a) General. Except as provided in paragraphs (b), (c), (d), and (e), an interstate pipeline shall credit to Account No. 191, all revenues, received from emergency transactions in excess of the sum of (1) the cost of purchased gas, plus (2) one cent per Mcf, for any such volumes of natural gas transported, sold or assigned.

(b) Direct assignments. An interstate pipeline purchasing emergency natural gas for direct assignment will not be required to credit to Account No. 191 revenues pursuant to paragraph (a) to the extent the pipeline can show that:

(1) its currently effective rates are based upon billing determinants which include a representative level of sales associated with assigned volumes; or

(2) its currently effective rates reflect a representative level of revenues associated with sales of assigned volumes which have been credited to the cost of service.

(c) Transportation. An interstate pipeline providing transportation of emergency natural gas will not be required to credit revenues to Account No. 191 pursuant to paragraph (a):

(1) to the extent revenues attributable to such services fall within representative levels which have been credited in arriving at a test period cost of service; or

(2) to the extent that volumes transported fall within representative levels which have been included in billing determinants for the purpose of establishing rates.

(d) An interstate pipeline selling emergency natural gas will not be required to credit revenues to Account No. 191 pursuant to paragraph (a) to the extent the pipeline can show that:

(1) its currently effective sales rates are based upon billing determinants which include a representative level of sales associated with emergency natural gas volumes; or

(2) its currently effective sales rates reflect a representative level of revenues associated with sales of emergency natural gas volumes which have been credited to the cost of service.

(e) Actual expenses. An interstate pipeline will not be required to credit to Account No. 191 any amount in excess of one cent per Mcf if the pipeline demonstrates upon application to the Commission that the amount is necessary to compensate for actual out-of-pocket expenses incurred by reason of engaging in the emergency transaction.
§ 157.51 Reporting requirements for emergency transactions.

(a) Initial reports. Within 48 hours after commencement of deliveries of emergency natural gas, the interstate pipeline shall notify the Commission in writing of the sale, stating the specific nature and duration of the emergency; the amount of emergency natural gas to be purchased or transported on a daily basis; the name of the seller, transporter, and any person to whom the emergency natural gas is to be assigned; and the price.

(b) Quarterly reports. For any calendar quarter during which an interstate pipeline engages in any transaction for emergency natural gas, the interstate pipeline shall file with the Commission, within thirty days after the end of each calendar quarter occurring in 1979, whether the transactions are completed or in progress, a sworn statement and four conformed copies thereof, which shall include the following information:

1. Identification of each emergency transaction completed or in progress;
2. The volumes of emergency natural gas delivered during the quarter under each transaction;
3. The total revenue or other compensation received by each seller for each emergency transaction during the quarter;
4. The total amount of revenue or other compensation received for each emergency transaction during the quarter;
5. The charges and the methods by which the pipeline determined compensation for the transportation of assigned emergency gas;
6. Information relied on to determine eligibility for each transaction;
7. The volumes of emergency natural gas included in system supply;
8. A statement from a responsible company official attesting that the activities of the interstate pipeline were carried out in accordance with the requirements of this subpart and to the best of his or her knowledge, an emergency did exist or was reasonably anticipated, and a sworn statement from a responsible company official of each purchasing distribution company or each direct sale customer or distribution company which requested the assignment of emergency supplies describing the emergency circumstances as required by § 157.48(a)(3).

§ 157.52 Waiver of requirements for emergency transactions.

The Commission may by order waive the requirements of this subpart in connection with any emergency transaction to the extent required by the public interest.
§ 157.53 Drilling of gas or oil wells and testing or purging of new natural gas pipeline facilities.

(a) Construction and operation of facilities necessary to render direct natural gas service for use in the drilling of gas or oil wells or for the use in the testing and purging of new natural gas pipeline facilities are exempted from the certificate requirements of section 7(c) of the Natural Gas Act, when the construction and operation of such facilities are conducted in accordance with paragraph (b) of this section.

(b) Operations undertaken to render direct natural gas service shall be terminated upon the completion of the well or the purging or testing of the pipeline facilities. Persons undertaking any construction or operation of facilities or service under this section shall file an original and two copies of an annual statement, by February 1 of each year, describing their activities hereunder.
§ 270.101 Application of ceiling prices to first sales of natural gas.

(a) Maximum lawful price. It is unlawful for any person to sell natural gas at a first sale price in excess of the highest maximum lawful price applicable to such gas under Part 271.

(b) Effect of maximum lawful price on contract price. If the price established under a contract for the first sale of natural gas does not exceed the applicable maximum lawful price, then such maximum lawful price does not supersede or nullify the effectiveness of the price established under such contract.

(c) Maximum lawful prices requiring jurisdictional agency determinations. Except to the extent that a seller authorized to make interim collection under Part 273, any price specified in any of the following subparts of Part 271 applies to a first sale of natural gas only if a determination by a jurisdictional agency that such gas qualifies under such subpart has become final in accordance with Parts 274 and 275:

1. Subpart D (relating to new natural gas and certain OCS gas);
2. Subpart C (relating to new, onshore production wells);
3. Subpart G (relating to high-cost natural gas), and
4. Subpart H (relating to stripper well natural gas).

(d) Other categories of natural gas. (1) Certain committed or dedicated natural gas. The maximum lawful prices under Subpart D of Part 271 (relating to certain committed or dedicated natural gas) apply to a first sale to the extent provided in such subpart, if the applicable filing requirements under §§154.92 and 154.94 of this chapter are met.

2. Existing intrastate contracts; intrastate rollover contracts; certain other categories. The maximum lawful prices under Subparts E, F, and I of Part 271 (relating to existing intrastate contracts, intrastate rollover contracts, and certain other categories of natural gas) apply to first sales of natural gas without requirement of a prior determination by the Commission or a jurisdictional agency.

(e) Refund obligations. Any collection of a first sale price under this subchapter is subject to any refund obligation which may be applicable under Part 273 or under otherwise applicable law or regulation.
§ 270.102 Definitions.
(a) NGPA definitions. Terms defined in the NGPA shall have the same meaning for purposes of this subchapter as they have under the NGPA, unless further defined in this subchapter.

(b) Subchapter H definitions. For purposes of this subchapter:
(1) "NGPA" means the Natural Gas Policy Act of 1978.
(2) "British thermal unit" or "Btu" means the quantity of heat required to raise the temperature of one pound avoirdupois of pure water from 58.5 degrees to 59.5 degrees Fahrenheit, determined in accordance with § 270.204.
(3) "MMBtu" means million British thermal units.
(4)(i) Except as provided in clause (ii), "production in commercial quantities" means production of natural gas from a well or reservoir which is either: (A) sold and delivered to one other than the operator; or (B) subject to § 271.204(e) retained by the operator, or any owner of the production at severance, for beneficial economic use.
(ii) Natural gas used for the testing of natural gas wells or for other field uses which are production related shall not be considered produced in commercial quantities.

(iii) Any of the following information may be considered as evidence of sale and delivery, or production for the operator's or other owner's beneficial economic use:
(A) payment of severance taxes;
(B) payment of royalties;
(C) production reports filed with a jurisdictional agency;
(D) a sales contract together with verification by a purchaser that natural gas had been delivered and paid for under the contract; or
(E) any other substantial evidence that production has been sold and delivered, or retained for the beneficial use of the operator or other owner of production at severance.

(5) "Crude oil" means a mixture of hydrocarbons that exists in the liquid phase in natural underground reservoirs and remains liquid at atmospheric pressure after passing through surface separating facilities.

(6) "Surface location" means the point on the earth's surface from which drilling of a well is commenced, except that in the case of a well drilled in permanent surface waters, surface location means the point of penetration of the earth's surface immediately below the water's surface, beneath a floating or fixed drilling structure.
(7) "OCS" means the Outer Continental Shelf as defined in section 2(35) of the NGPA.

(8) "Existing intrastate contract" means any intrastate contract for the first sale of natural gas in existence on November 8, 1978. A contract is in existence on November 8, 1978 if on that date, there is a promise or a set of promises for the breach of which the law gives a remedy, or the performance of which the law in some way recognizes as a duty. For the purposes of this subchapter "existing intrastate contract" includes a "successor to an existing intrastate contract."

(9) "Successor to an existing intrastate contract" means any intrastate contract, other than an intrastate rollover contract, entered into on or after November 9, 1978, for the first sale of natural gas which was previously subject to an existing contract, whether or not there is an identity of parties or terms with those of such existing contract. The term "successor to an existing intrastate contract" includes a contract the primary term of which has not expired but which has been assigned to a different party in interest.

(10) "Intrastate contract" means any contract applicable to the sale of natural gas which was not committed or dedicated to interstate commerce on November 8, 1978.

(11) "Intrastate rollover contract" means any contract, entered into on or after November 9, 1978, for the first sale of natural gas that was previously subject to an existing intrastate contract which expired at the end of a fixed term (not including any extension thereof taking effect on or after November 9, 1978), specified by the provisions of such existing contract, as such contract was in effect on November 9, 1978, whether or not there is an identity of parties or terms with those of such existing contract.

(12) "Jurisdictional agency" means the state or federal agency identified in Subpart E of Part 274.

§ 270.103 Effective date.

The provisions of this subchapter apply to deliveries of natural gas on or after December 1, 1978.

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
§ 270.201 First sale of natural gas subject to differing maximum lawful prices.

In the case of a first sale of any quantity of natural gas (a) which is sold at a single price, and (b) which is comprised of various volumes of natural gas to which different maximum lawful prices are applicable, the maximum lawful price for such sale shall be the average of such maximum lawful prices (weighted according to the respective volumes of gas subject to different maximum lawful prices).

§ 270.202 Resales.

(a) General rule. In the case of any first sale of natural gas which is a resale of such gas, the maximum lawful price shall be the higher of:

1. the maximum lawful price which would be applicable to such sale if it were not a resale; or

2. whichever of the following is applicable:

   (i) in the case of natural gas which when sold to the reseller was subject to a single maximum lawful price, the maximum lawful price applicable to the natural gas sold to the reseller; or

   (ii) in the case of natural gas which when sold to the reseller was subject to more than one maximum lawful price, the average of the maximum lawful prices applicable to the natural gas sold to the reseller (weighted according to the volumes of the purchased natural gas that are subject to the different maximum lawful prices).

(b) Special rule for interim collections.

1. If the price charged and collected for a sale to a reseller is charged and collected under the authority of Part 273 (relating to interim collection), then:

   (i) the price authorized to be collected by Part 273 shall be treated as a maximum lawful price for purposes of paragraph (a)(2); and

   (ii) the price charged and collected by the reseller shall be subject to the same refund conditions as are imposed on the person who sold the natural gas to the reseller under Part 273.

2. The reseller is not obligated by Part 273 to make any filings with the Commission if the person who sold the natural gas to the reseller has made the filings required by Part 273.

(c) Allowances. A resale of natural gas shall not be considered to exceed any maximum lawful price established in paragraph (a) of this section if it exceeds such price to the extent necessary to recover state severance taxes or production-related costs which are borne by the reseller and
recovery of which is authorized under Subpart K of Part 271. If a price for a first sale to a reseller of natural gas is not considered to exceed the applicable maximum lawful price applicable to such sale by reason of an amount allowed under Subpart K, then for purposes of applying paragraph (a)(2), the maximum lawful price applicable to the sale to the reseller shall be considered to include the amount so allowed.

(d) Adjustments. Pursuant to section 502(c) of the NGPA, a reseller may apply to the Commission for an adjustment of the maximum lawful price in paragraph (a) of this section on the grounds that such price results in special hardship, inequity or an unfair distribution of burdens.

(e) Definition. For purposes of this section:

(1) "Resale" of natural gas means the sale of natural gas, all or a portion of which was both purchased and resold in transactions which are first sales as defined in the NGPA.

(2) A "reseller" means the seller in a resale of such natural gas.

(f) Record retention. In addition to any records required to be retained by reason of an election made under § 276.101(b), resellers shall maintain such records as are sufficient to demonstrate that prices charged in connection with resales of natural gas do not exceed the maximum lawful prices prescribed in this section. Such records shall include:

(1) a record of each resale of natural gas by the reseller, including the identity of the purchaser and the volume and price of such sale;

(2) a record of each sale of natural gas to the reseller including the volume and price of such sale;

(3) a copy of each contract covering the purchase and sale of natural gas resold; and

(4) a record of the method by which the reseller computes the maximum lawful price applicable to each resale and the documents relied on to make the computations.

(g) Period for keeping records. Each reseller required to maintain records under this section shall maintain and preserve contracts for at least three years after expiration and such other records for at least three years after the date of the relevant transaction or event.

§ 270.203 Pipeline or distributor production.

(a) Attribution rule. For purposes of applying section 2(21)(B) of the NGPA, a sale by a pipeline or
distributor is a sale of natural gas attributable to volumes of natural gas produced by such pipeline or distributor (or affiliate thereof) to the extent such sale is a sale comprised of production volumes from identifiable wells, properties, or reservoirs which are owned by such pipeline or distributor (or affiliate thereof).

(b) Circumvention rule. To the extent a sale of natural gas by a pipeline or distributor is comprised of production volumes from identifiable wells, properties, or reservoirs and a portion of those volumes is produced from wells, properties, or reservoirs owned by such pipeline or distributor (or affiliate thereof), then such sale shall be treated as a first sale pursuant to the Commission's authority under section 2(21)(A)(v) of the NGPA unless:

(1) the price at which such natural gas is sold is regulated pursuant to the Natural Gas Act or is regulated or subject to regulation by a state agency; or

(2) the Commission, on application, has determined not to treat such sale as a first sale.

(c) Definitions. For purposes of this section:

(1) "Pipeline or distributor" means an interstate pipeline, an intrastate pipeline, a local distribution company, or an affiliate of any of the above.

(2) "State agency" means a state, a political subdivision of a state, or an agency or instrumentality of either.

§ 270.204 Btu content per unit volume of natural gas.

For purposes of determining the number of Btu's per unit volume of natural gas, the Btu content of one cubic foot of natural gas is the number of Btu's produced by the combustion, at constant pressure, of the amount of gas which would occupy a volume of 1.0 cubic foot at a temperature of 60 degrees Fahrenheit, saturated with water vapor and under a pressure equivalent to that of 30.00 inches of mercury at 32 degrees Fahrenheit, and under standard gravitational force (980.665 centimeters per second squared) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of the gas and air and when the water formed by combustion is condensed to the liquid state.

§ 270.205 Indefinite price escalator clauses.

(a) The establishment of maximum lawful prices under the NGPA shall not trigger indefinite price escalator clauses in existing intrastate or interstate contracts.

(b) For purposes of this section, the term
"indefinite price escalator clause" shall have the same meaning as provided in section 105(b)(3)(B) of the NGPA.

PART 271 - CEILING PRICES

Subpart A - Summary Tables and Calculations

Sec.
271.101 Ceiling prices for certain categories of natural gas.
271.102 Calculation of inflation adjustment for certain maximum lawful prices.

Subpart B - New Natural Gas and Certain Natural Gas Produced from the Outer Continental Shelf

Sec.
271.201 Applicability.
271.202 Maximum lawful price.
271.203 Definitions.
271.204 Special rules.

Subpart C - New, Onshore Production Wells

Sec.
271.301 Applicability.
271.302 Maximum lawful price.
271.303 Definition of new, onshore production well.
271.304 Waivers of well-spacing requirements.
271.305 Special rule applicable to existing proration units.

Subpart D - Natural Gas Committed or Dedicated to Interstate Commerce

Sec.
271.401 Applicability.
271.402 Maximum lawful prices.
271.403 Special rule regarding carrying charge adjustment for advance payments.
Subpart E — Sales Under Existing Intrastate Contracts

Sec.
271.501 Applicability.
271.502 Maximum lawful prices.
271.503 Filing requirements.
271.504 Determination of contract price and price under existing contract.
271.505 Contract modifications.

Subpart F — Interstate Bypass Contracts

Sec.
271.601 Applicability.
271.602 Maximum lawful price.
271.603 Filing requirements.
271.604 Special rule.

Subpart G — High-Cost Natural Gas

Sec.
271.701 Applicability.
271.702 Maximum lawful price.
271.703 Definition of deep, high-cost natural gas.
271.704 Special rule.

Subpart H — Stripper Well Natural Gas

Sec.
271.801 Applicability.
271.802 Maximum lawful price.
271.803 Definitions.
271.804 Special rules.
271.805 Continuing qualification.
271.806 Jurisdictional agency determinations and Commission review.

Subpart I — Other Categories of Natural Gas

Sec.
271.901 Applicability.
271.902 Maximum lawful price.
271.903 Filing requirements.
271.904 Special rule.

Subpart J — [Reserved]

Subpart K — Adjustments for State Severance Taxes, Allowances, and Certain Production-Related Costs

Sec.
271.1100 Applicability.
271.1101 Definitions.
271.1102 State severance taxes.
271.1103 Record retention.
271.1104 Natural Gas Act allowances.
271.1105 Production-related costs.
271.1106 Adjustments.

Authority: This part is issued under the Natural Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350.

SUBPART A — SUMMARY TABLES AND CALCULATIONS

§ 271.101 Ceiling prices for certain categories of natural gas.

(a) Subparts B through J of this part specify maximum lawful prices applicable to first sales of natural gas. Maximum lawful prices for Subparts B, C, G, H, and I, and for certain categories of natural gas under Subpart D, are determined in accordance with price tables which appear in those subparts and which are summarized in the following tables:

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

</table>
(a) **Caveat.** The tables in paragraph (a) of this section are summaries of applicable maximum lawful prices and may not be relied upon to establish qualification for a particular price. The seller should examine the other provisions of this subchapter in order to ascertain whether the natural gas in question qualifies for the price appearing in the table or some other price.

(c) **Cross reference.** For maximum lawful prices applicable to natural gas sold under existing intrastate contracts or intrastate rollover contracts, see Part 271, Subparts D and F.

§ 271.102 Calculation of inflation adjustment for certain maximum lawful prices.

(a) Maximum lawful prices for first sales of certain categories of natural gas to which Subparts D, E, and F apply are to be calculated in the following manner:

1. Determine the base price applicable for the base month.

2. For the month following the base month, multiply the inflation adjustment applicable for such following month by the base price.

3. For each succeeding month (through the month of delivery), multiply the inflation adjustment applicable for such succeeding month by the price calculated under this paragraph for the prior month.

(b) The price determined for each month under paragraph (a) shall be rounded to the nearest mill (rounding to the next highest mill only that fraction which is one-half a mill or greater).

(c) **Inflation adjustment.** The following table contains the inflation adjustment applicable for each month beginning with May 1977, and ending with January 1979:

<table>
<thead>
<tr>
<th>Month of Delivery</th>
<th>Factor by which price in preceding month is multiplied</th>

(d) Definitions. For purposes of this section:

(1) "base price" means:

(i) for maximum lawful prices to be calculated under § 271.402(d)(1) (relating to certain committed or dedicated gas), the just and reasonable rate for April 20, 1977;

(ii) for maximum lawful prices to be calculated under § 271.502(b)(2) (relating to certain existing intrastate contracts), the contract price per MMBtu on November 9, 1976; and

(iii) for maximum lawful prices to be calculated under § 271.602(a)(1) (relating to certain rollover contracts), the contract price per MMBtu under the expired contract for the month in which the effective date of the rollover contract occurs.

(2) "base month" means:

(i) April 1977, for maximum lawful prices under § 271.402(c)(1); and

(ii) November 1976, for maximum lawful prices under § 271.502(b)(2); and

(iii) the month in which the effective date of the rollover contract occurs, for maximum lawful prices under § 271.602(a)(1).

SUBPART B—NEW NATURAL GAS AND CERTAIN NATURAL GAS PRODUCED FROM THE OUTER CONTINENTAL SHELF

§ 271.201 Applicability.

This subpart implements section 102 of the NGPA and applies to the first sale of:

(a) new natural gas; or

(b) natural gas produced from a new OCS reservoir on an old OCS lease.

§ 271.202 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

<table>
<thead>
<tr>
<th>If delivery occurs in the calendar month of:</th>
<th>The maximum lawful price is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>December 1978</td>
<td>$ 2.078</td>
</tr>
<tr>
<td>January 1979</td>
<td>$ 2.096</td>
</tr>
</tbody>
</table>
§ 271.203 Definitions.

For purposes of this subpart:

(a) "New natural gas" means natural gas which a jurisdictional agency has determined, in accordance with Parts 274 and 275, to be new natural gas (as defined in section 102(c) of the NGPA).

(b) "Natural gas from a new OCS reservoir on an old OCS lease" means natural gas which the jurisdictional agency determines, in accordance with Parts 274 and 275 and under section 102(d)(2), (3), (4), and (5) of the NGPA, to be natural gas produced from a reservoir which is on an old lease on the OCS and which was not discovered before July 27, 1976.

(c) "OCS lease" means a lease of submerged acreage which is entered into with the Secretary of the Interior under the Outer Continental Shelf Lands Act, as amended, (43 U.S.C. 1331, et seq.).

(d) "New OCS lease" means an OCS lease entered into by the Secretary of the Interior on or after April 20, 1977.

(e) "Old OCS lease" means an OCS lease other than a new OCS lease.

§ 271.204 Special rules.

(a) Vertical measurement of 1,000 feet between completion locations. For the purpose of determining under section 102(c)(1)(B)(ii) of the NGPA the vertical distance between the deepest marker well completion location and a new well completion location, for which a determination is sought, measurement shall be the true vertical depth from the highest perforation point of such marker well completion location to the highest perforation point in the new well completion location. In the case of any well which is an open-hole completion, measurement shall be from the highest elevation point within the well bore of the reservoir being produced.

(b) Capable of producing in paying quantities. For purposes of section 102(d)(2)(B)(i) and (ii) of the NGPA, a reservoir is capable of producing in paying quantities if a well completed therein can reasonably be expected to produce natural gas in quantities sufficient to yield revenues in excess of operating costs.

(c) Commercially producible. For purposes of section 102(d)(2)(B)(iii) of the NGPA, a reservoir is commercially producible if a well completed therein can reasonably be expected to produce natural gas in commercial quantities as defined in § 270.102(b)(4).
(d) Suitable facilities. For purposes of section 102(c)(1)(C)(iii)(I) of the NGPA (but subject to section 102(c)(1)(C)(iv) thereof), suitable facilities for the production and delivery of natural gas described in section 102(c)(1)(C)(iii)(I) of the NGPA were in existence on April 20, 1977, if on that date facilities for the production and delivery of natural gas to a pipeline were:

(1) installed; or

(2) substantially installed and additional facilities necessary for such production and delivery were readily available and could have been installed by April 20, 1977.

(e) Production in commercial quantities. For purposes of determining whether production of natural gas in commercial quantities has occurred under section 102(c)(1)(C) of the NGPA:

(1) a rebuttable presumption exists that production from a reservoir in commercial quantities has not occurred if natural gas has not been sold and delivered from such reservoir before April 20, 1977. Such presumption may be rebutted by evidence of retention of the natural gas by the operator, or owner of the production at severance, for beneficial economic use; and

(2) quantities of natural gas sold in interstate commerce (within the meaning of the Natural Gas Act) before November 9, 1978, shall not be taken into account if such sales were made:

(1) under section 6 of the Emergency Natural Gas Act of 1977; or

(2) under the emergency sale authority pursuant to Opinion 699-B, issued by the Commission under section 7(c) of the Natural Gas Act.
§ 271.301 Applicability.
This subpart implements section 103 of the NGPA and applies to the first sale of natural gas produced from a new, onshore production well.

§ 271.302 Maximum lawful price.
The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

<table>
<thead>
<tr>
<th>Delivery Occurs in</th>
<th>Maximum Lawful Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>December 1978</td>
<td>$1.969</td>
</tr>
<tr>
<td>January 1979</td>
<td>$1.980</td>
</tr>
</tbody>
</table>

§ 271.303 Definition of new, onshore production well.
For purposes of this subpart, the term "new, onshore production well" means a well which a jurisdictional agency has determined, in accordance with Parts 274 and 275, to be a new, onshore production well (as defined in section 103(c) of the NGPA).

§ 271.304 Waivers of well-spacing requirements.
If a jurisdictional agency alters, or grants a waiver of, any applicable well-spacing requirements prior to the commencement of surface drilling of the well for which a determination is sought, the new well shall be deemed to satisfy any applicable Federal or State well-spacing requirements as required by section 103(c)(2) of the NGPA.

§ 271.305 Special rule applicable to existing proration units.
(a) Applicability. This section applies to a jurisdictional agency determination with respect to a new well which is drilled:

1. within a proration unit in existence at the time the surface drilling of such new well began; and

2. to a reservoir to which the proration unit applies and from which natural gas either was or is being produced in commercial quantities through an existing well or (ii) to a reservoir to which the proration unit applies and from which natural gas was capable of being produced in commercial quantities through a well, the surface drilling of which commenced prior to February 19, 1977.
(b) Wells spudded after December 31, 1978, and for which a drilling permit had not been issued prior to January 1, 1979. (1) This paragraph applies to wells to which this section applies and:

(i) for which a drilling permit is issued after December 31, 1978; or

(ii) (A) the surface drilling of which began after December 31, 1978; and

(B) for which a drilling permit had not been issued prior to January 1, 1979.

(2) In order for natural gas from a well to which this paragraph applies to qualify for the maximum lawful price under this subpart, the jurisdictional agency must find, prior to the commencement of drilling, that the well is necessary to effectively and efficiently drain a portion of the reservoir covered by the proration unit which cannot be effectively and efficiently drained by any existing well within the proration unit. Such finding must be explicit and must involve either a redefinition of the boundaries of the previously existing proration unit or an alteration of or exception to otherwise applicable well-spacing rules.

(c) Wells spudded after February 19, 1977, and before January 1, 1979, or for which a drilling permit was issued before January 1, 1979. (1) This paragraph applies to wells to which this section applies and:

(i) the surface drilling of which began on or after February 19, 1977, and before January 1, 1979; or

(ii) for which a drilling permit was issued before January 1, 1979.

(2) Upon request of an applicant for a determination for a well to which this paragraph applies, the jurisdictional agency shall review the record which was developed prior to the commencement of drilling of (in the case of a well described in subparagraph (1)(i) of this paragraph) or the issuance of the drilling permit for (in the case of a well described in subparagraph (1)(ii) of this paragraph) the well for which the determination is sought. In order for natural gas from such well to qualify for the maximum lawful price under this subpart, the jurisdictional agency must make a finding based on such review that prior to the commencement of drilling the maximum lawful price or the issuance of the drilling permit.
(i) the agency explicitly found that the drilling of
the new well was necessary to effectively and efficiently
drain a portion of the reservoir covered by the proration
unit which could not be effectively and efficiently drained
by any existing well within the proration unit; or
(ii) the agency implicitly made such finding and the
record developed by such agency before commencement of
drilling would support an explicit finding that the drilling
of the new well was necessary to effectively and efficiently
drain a portion of the reservoir covered by the proration
unit which could not be effectively and efficiently drained
by any existing well within the proration unit.
(d) Notice of findings. If the jurisdictional agency
makes a finding under paragraph (b) or (c) of this section,
it shall notify the Commission of such a determination in
accordance with § 274.104.

SUBPART D - NATURAL GAS COMMITTED OR DEDICATED TO
INTERSTATE COMMERCE

§ 271.401 Applicability.
This subpart implements sections 104 and 106(a) of
the NGPA and applies to the first sale of natural gas
committed or dedicated to interstate commerce on November 8,
1978, and for which a just and reasonable rate under the
Natural Gas Act was in effect on November 8, 1978, for the
sale of such gas.

§ 271.402 Maximum lawful prices.
(a) Ceiling prices. Unless a different rate is appli-
cable under paragraph (d), the maximum lawful price for
natural gas to which this subpart applies shall be the
amount determined in accordance with the following table:

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

(b) Definitions. For the purposes of this section:

(1) "Post-1974 gas" means natural gas to which this subpart applies which is produced from a well the surface drilling of which commenced on or after January 1, 1978.

(2) "1973-1974 biennium gas" means natural gas, to which this subpart applies, from a well the surface drilling of which commenced on or after January 1, 1973, and prior to January 1, 1975.

(3) "Interstate rollover gas" means:
   (i) natural gas to which this subpart applies which is sold under a rollover contract as defined in section 2(12) of the NGPA; or
   (ii) natural gas to which this subpart applies which is sold under a contract which would have been a rollover contract, but for the fact that the expiration of the previous contract occurred prior to November 9, 1978.

(4) "Replacement contract gas or recompletion gas" means natural gas to which this subpart applies which is:
   (i) sold under a replacement contract which was executed on or after January 1, 1973, but prior to November 9, 1978, where the prior contract expired by its own terms prior to January 1, 1973; or
   (ii) sold under a replacement contract executed prior to November 9, 1978, where the prior contract expired by its own terms after January 1, 1973; or
   (iii) sold under a contract for the sale of natural gas from a well commenced prior to January 1, 1973, and
not sold in interstate commerce prior to January 1, 1973, (excluding gas sold prior to such date under §§ 2.68, 2.70, 157.22 or 157.29 of this chapter); or
(iv) produced as a result of a completion operation
into a different formerly nonproductive reservoir, commenced on or after January 1, 1973, and produced through a well commenced prior to January 1, 1973.
(5) "Certain Permian Basin gas" means natural gas (other than replacement contract gas or recompletion gas) to which this subpart applies and which is produced in the Permian Basin Area, as defined in FPC Opinion No. 662 (50 F.P.C. 390 at 400-401) and is sold pursuant to a contract executed on or after October 1, 1968.
(6) "Certain Rocky Mountain gas" means natural gas (other than replacement contract gas or recompletion gas) to which this subpart applies and which is produced in the Rocky Mountain Area, as defined in § 154.109(b) of this chapter and sold pursuant to a contract executed on or after October 1, 1968.
(7) "Certain Appalachian Basin gas" means natural gas (other than replacement contract gas or recompletion gas) to which this subpart applies and which is produced by a large producer either (i) in the south subarea under contracts dated after October 7, 1969, or (ii) in the north subarea, of the Appalachian Basin Area, as defined in § 154.107 of this chapter.
(8) "Flowing gas" means natural gas to which this subpart applies (other than natural gas described in the preceding subparagraphs of this paragraph) produced from a well the surface drilling of which commenced prior to January 1, 1973.
(9) "Minimum rate gas" means natural gas to which this subpart applies produced from a well the surface drilling of which commenced prior to January 1, 1973, and which is sold pursuant to a contract providing for a fixed rate lower than that applicable to such gas under paragraph (a).
(10) A sale qualifies as a small producer sale under this subpart: (i) if it is a small producer sale (as defined in § 157.40(a) covered by a blanket certificate under § 157.40(b) and (d), or (ii) if it is a sale by a large producer from small producer reserves, and such sale is entitled to the small producer rate under § 157.40(f)(2).
(11) A large producer sale is a first sale which does not qualify as a small producer sale under subparagraph (10) of this paragraph.
§ 271.403 Special rule regarding carrying charge adjustment for advance payments.

The rate prescribed in § 271.402 for post-1974 gas to which Opinion No. 770-A applies shall be subject to a deduction of 83 cents per MMBtu as a carrying charge adjustment if the seller has accepted advance payments on or after 1:00 p.m., EST, November 5, 1976, under an advance payments contract with an interstate pipeline company and such pipeline company has received rate base treatment of such advance payments made. The resulting adjusted rate shall be employed in the discharge of the obligations of any advance payments after 1:00 p.m., EST, November 5, 1976, for all deliveries until an amount of natural gas has been delivered at the adjusted rate such that the total carrying charge credits equal the amounts lawfully collected by the jurisdictional pipeline company as a result of including the advance payments in rate base.
SUBPART E – SALES UNDER EXISTING INTRASTATE CONTRACTS

§ 271.501 Applicability.
This subpart implements section 105 of the NGPA and applies to the first sale of natural gas under an existing intrastate contract or under a successor to an existing intrastate contract. This subpart is not applicable to sales made under an intrastate rollover contract as defined in § 270.102(b)(11) of this part.

§ 271.502 Maximum lawful prices.
(a) November 9, 1978, contract price at or below \$2.060 per MMBtu. In the case of a first sale of natural gas to which this subpart applies (other than a first sale to which paragraph (b) applies), the maximum lawful price for natural gas delivered in any month shall be the lower of:

1. the price for such month under the terms of the existing intrastate contract to which such natural gas was subject on November 9, 1978, as such contract was in effect on November 9, 1978; or

2. the maximum lawful price per MMBtu for such month under § 271.202 (relating to new natural gas).

(b) November 9, 1978, contract price greater than \$2.060 per MMBtu. In the case of a first sale of natural gas to which this subpart applies, if the contract price applicable on November 9, 1978, was greater than \$2.060 per MMBtu, the maximum lawful price for natural gas delivered in any month shall be the higher of:

1. the maximum lawful price per MMBtu for such month under § 271.202 (relating to new natural gas); or

2. the contract price per MMBtu on November 9, 1978, adjusted for inflation in accordance with § 271.102 of this part.

§ 271.503 Filing requirements.
Any person who collects a price under this subpart shall file reports required by § 276.101.

§ 271.504 Determination of contract price.
For purposes of this subpart:

(a) Contract price. "Contract price," when used with respect to any specific date and contract, means:

1. the price paid per MMBtu under a contract for deliveries of natural gas occurring on that date; or
(2) if no deliveries of natural gas occurred under such contract on that date, the price per MMBtu that would have been paid had such deliveries occurred on that date.

(b) Take-or-pay clauses. If the contract contains a take-or-pay clause and payments were made under such clause for deliveries on November 9, 1978, the contract price on November 9, 1978, shall be determined as if volumes obligated to be taken were taken.

§ 271.505 Contract modifications.

(a) Except as provided in subparagraph (b), for purposes of this subpart, no successor to an existing intrastate contract or modification executed after November 9, 1978, of an existing intrastate contract may:

(i) alter the terms of the existing intrastate contract in a manner which has the effect of requiring the purchaser to bear any production-related costs (as defined in § 271.1101(b)) which were allocated to the seller under the existing intrastate contract; or

(ii) provide for an earlier date for deliveries than provided for under the existing contract.

(b) Nothing in paragraph (a) shall preclude a purchaser who was not a party to the existing intrastate contract on November 9, 1978, from agreeing, by modifications of the existing intrastate contract, or otherwise, to bear responsibility and pay for any increase (or portion thereof) in production-related costs, incurrence of which is necessary in order for such person to take delivery of the natural gas subject to the existing intrastate contract.
RULES AND REGULATIONS

SUBPART F - INTRASTATE ROLLOVER CONTRACTS

§ 271.601 Applicability.
This subpart implements section 106(b) of the NGPA and applies to the first sale of natural gas under an intrastate rollover contract.

§ 271.602 Maximum lawful price.
(a) The maximum lawful price for a first sale of natural gas under an intrastate rollover contract to which section 106(b)(1) of the NGPA applies shall be the higher of:

(1) the maximum lawful price paid under the expired contract, per MWh, in the case of the month in which the effective date of such rollover contract occurs; and

(2) the amount determined under the following table:

<table>
<thead>
<tr>
<th>Month</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>Christmas 1978</td>
<td>$1.121</td>
</tr>
<tr>
<td>January 1979</td>
<td>$1.128</td>
</tr>
</tbody>
</table>

(b) The maximum lawful price, per MMBtu, for natural gas to which section 106(b)(2) of the NGPA (relating to certain State or Indian natural gas production interests) applies shall be the amount determined in accordance with the following table in lieu of the amount determined under the table under paragraph (a)(2):

<table>
<thead>
<tr>
<th>Month</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>December 1978</td>
<td>$2.078</td>
</tr>
<tr>
<td>January 1979</td>
<td>$2.096</td>
</tr>
</tbody>
</table>

§ 271.603 Filing requirements.
Any person who collects a price under this subpart shall file reports required by § 276.101.

§ 271.604 Special rule.
(a) No intrastate rollover contract may contain terms which differ from the terms of the expired contract and which have the effect of requiring the purchaser to bear any production related costs (as defined in § 271.1101(b)) which were allocated to the seller under the expired contract.
(b) Nothing contained in paragraph (a) shall preclude a purchaser who was not a party to the expired contract from agreeing in the intrastate rollover contract to bear responsibility and pay for any increase (or portion thereof) in production-related costs, the incurrence of which is necessary in order for such person to take delivery of the natural gas subject to the intrastate rollover contract.

SUBPART G - HIGH-COST NATURAL GAS

§ 271.701 Applicability.

This subpart implements section 107(a) of the NGPA and applies to the first sale of natural gas which is deep, high-cost natural gas.

§ 271.702 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

<table>
<thead>
<tr>
<th>If delivery occurs in the calendar month of:</th>
<th>The maximum lawful price is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>December 1978</td>
<td>$ 2.078</td>
</tr>
<tr>
<td>January 1979</td>
<td>$ 2.096</td>
</tr>
</tbody>
</table>

§ 271.703 Definition of deep, high-cost natural gas.

For purposes of this subpart, deep, high-cost natural gas is natural gas which a jurisdictional agency determines, in accordance with Parts 274 and 275, is produced:

(a) from any well, the surface drilling of which began on or after February 19, 1977; and

(b) from a completion location which is located at a depth of more than 15,000 feet.
§ 271.704 Special rule.

For purposes of determining depth under this subpart and section 107(c)(1) of the NGPA, measurement shall be the true vertical depth from the surface of the ground to the highest perforation point in the completion location.

§ 271.801 Applicability.

This subpart implements section 108 of the NGPA and applies to any first sale of natural gas which a jurisdictional agency determines is stripper well natural gas.

§ 271.802 Maximum lawful price.

The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

<table>
<thead>
<tr>
<th>If delivery occurs in</th>
<th>The maximum lawful price is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>the calendar month of:</td>
<td></td>
</tr>
<tr>
<td>December 1978</td>
<td>$ 2.224</td>
</tr>
<tr>
<td>January 1979</td>
<td>$ 2.243</td>
</tr>
</tbody>
</table>

§ 271.803 Definitions.

For purposes of this subpart:

(a) "Recognized enhanced recovery techniques" means processes or equipment, or both, which when performed or installed, increase the ultimate recovery of gas from a well. Processes qualifying as enhanced recovery techniques include mechanical as well as chemical stimulation of the reservoir formation. Equipment may include items installed in the well bore or on the surface. Normal well maintenance, repair, or replacement of equipment or facilities does not qualify as enhanced recovery techniques.
(b) "Nonassociated natural gas" means natural gas produced from a well which a jurisdictional agency determines produced an average number of barrels of crude oil per production day during the production period upon which the determination is based, which does not exceed the number of barrels determined in accordance with the following table:

<table>
<thead>
<tr>
<th>If the average production of natural gas per production day during such production period was:</th>
<th>then average crude oil production per day may not exceed:</th>
</tr>
</thead>
<tbody>
<tr>
<td>50 Mcf or more but less than 60 Mcf</td>
<td>1 bbl</td>
</tr>
<tr>
<td>30 Mcf or more but less than 50 Mcf</td>
<td>2 bbl</td>
</tr>
<tr>
<td>Less than 30 Mcf</td>
<td>3 bbl</td>
</tr>
</tbody>
</table>

§ 271.804 Special rules.

(a) Rate of production. For purposes of determining the rate of production from a well for which a stripper well determination is sought, the total volume of natural gas produced from the well shall constitute its daily production regardless of whether the well shall constitute its daily production regardless of whether the well is completed in more than one interval or the production is separately metered from separate intervals.

(b) Averaging of production. If a determination of stripper well status is sought with respect to wells which are not individually metered, rates of production of natural gas and oil may, in the absence of other reliable evidence, be averaged equally among the non-metered wells.

(c) Applications for determinations. Applications under this subpart shall be based on a 90-day production period ending within 120 days prior to the date on which the application is filed.

(d) Maximum efficient rate of flow.

(1) Where a maximum efficient rate of flow for a well, determined in accordance with recognized conservation practices designed to maximize the ultimate recovery of natural gas, has been established by a jurisdictional agency, production of natural gas at that rate shall be deemed to be production at the maximum efficient rate of flow.

(2) In the absence of applicable recognized conservation practices designed to maximize the ultimate recovery of natural gas established by a jurisdictional agency for determining the maximum efficient rate of flow of wells producing natural gas, a well which has produced nonassociated natural gas at an average rate of 60 Mcf per day or less for a 90-day production period is presumed to have produced
at its maximum efficient rate of flow if during the 12-month period ending concurrently with the 90-day production period which is the basis for the application under paragraph (c), such well produced nonassociated natural gas at a rate which did not exceed an average of 60 Mcf per production day; or

(3) if the production data described in subparagraph (2) of this paragraph are not available, the jurisdictional agency shall, if the well has produced nonassociated natural gas at an average rate of 60 Mcf or less for a 90-day production period:

(i) make the determination as to whether the well produced at its maximum efficient rate of flow based upon other substantial evidence, such as flow tests, which measure the capability of the well to produce natural gas under normal operating conditions; or

(ii) defer making an affirmative determination and designate a 12-month period during which the applicant may secure the data described in subparagraph (2) of this paragraph, allowing the applicant 30 days from the end of such period to submit the data.

(4) The jurisdictional agency shall make a negative determination as to eligibility and give notice thereof to the applicant, any identified purchasers and the Commission, if:

(i) the applicant fails to submit production data pursuant to subparagraph (3)(ii) of this paragraph, within the time allowed; or

(ii) the production data submitted by the applicant indicate that for the 12-month period, the well produced nonassociated natural gas at a rate which exceeded an average of 60 Mcf per production day.

(5) Upon submission of an application which is to be considered pursuant to subparagraph (3)(ii) of this paragraph, the applicant, if permitted to do so by contract, may collect the maximum lawful price provided in §271.802 from the date of filing until the date of a final determination pursuant to this subpart, subject to the interim collection requirements in Part 273.

(e) Seasonally affected wells. (1) If together with a petition for qualification as a stripper well, the applicant submits to the jurisdictional agency, production reports for a period of at least 24 months ending concurrently with the 90-day production period which is the basis for the application under paragraph (c), and if such reports demonstrate that the well is subject to seasonal fluctuations which temporarily increase average production above 60 Mcf per production day, the jurisdictional agency may, upon
request, designate the well as "seasonally affected." Such designation shall be granted by the jurisdictional agency only if it finds that the seasonal fluctuations have not and cannot reasonably be expected to increase production levels above an average of 60 Mcf per production day for any 12-month period.

(2) If at any time subsequent to a final determination of stripper well status, the operator acquires production reports for a period of 24 consecutive months which demonstrate that the well is seasonally affected, a petition may be filed with the jurisdictional agency for designation as a seasonally affected well unless the average rate of production exceeds 60 Mcf per production day for any 12-month period.

(3) If a well is designated as seasonally affected, the operator of such well and the purchaser of production from such well are exempt from the filing requirements of § 274.805 unless the average rate of production exceeds 60 Mcf per day for a 12-month period.

§ 271.805 Continuing qualification.

(a)(1) Unless exempt under § 271.804(e)(3), the operator or any purchaser of natural gas shall give written notice if:

(i) such well produces nonassociated natural gas at a rate exceeding an average of 60 Mcf per production day for any 90-day production period; or

(ii) such well which has been designated a seasonally affected well produces at an average rate in excess of 60 Mcf per day for a 12-month production period.

(2) Such notice shall, as appropriate, be given to the jurisdictional agency, the Commission, and any purchaser. Except as provided in paragraph (b) of this section, such notice shall terminate the right of any seller to continue the collection of the maximum lawful price set forth in § 271.802 for natural gas from the well identified in the notice.

(b) The operator may, at the same time the notice described in paragraph (a)(1) of this section is filed, file a petition with the jurisdictional agency for a determination under § 271.806 that the increased production of nonassociated natural gas is the result of the application of enhanced recovery techniques or, if the well has not been designated as seasonally affected, the result of seasonal fluctuations. A copy of the petition shall be provided to the jurisdictional agency, the Commission, and the purchaser together with the notice under paragraph (a)(1) of this section.
(c) Any notice required by this section shall be made within 45 days after the last day of the 90-day or the 12-month production period in which the increased production of natural gas occurred.

(d) If the notice pursuant to paragraph (a)(1) of this section is filed by a purchaser, an operator shall have 30 days from the date of the notice within which to oppose the allegation or to seek a determination from the jurisdictional agency that the increase in production is the result of the application of recognized enhanced recovery techniques or seasonal fluctuations. Unless the operator of a well, within 30 days of such notice, files a petition with a jurisdictional agency as provided in paragraph (b) of this section, a well for which notice is given under paragraph (a)(1) of this section shall immediately be disqualified as a stripper well and the right of any seller to collect the maximum lawful price set forth in §271.802 shall terminate as of the last day of the 90-day or the 12-month production period described in the notice.

(e) If an operator files a petition with a jurisdictional agency pursuant to paragraph (b) or (d) of this section, further collection of the maximum lawful price set forth in §271.802 shall be made subject to refund from the last day of the 90-day or the 12-month production period described in the notice under paragraph (a)(1) of this section.

(f) If subsequent to the filing of a petition it is determined that an increase in production of natural gas is the result of recognized enhanced recovery techniques, neither the operator nor the purchaser shall be obligated to report average production levels above 60 Mcf per day during any 90-day production period unless the increased production results from a cause other than recognized enhanced recovery techniques determined to have been used.

§271.806 Jurisdictional agency determinations and Commission review.

(a) Upon receipt of a petition to designate a well as a seasonally affected well pursuant to §271.804(c) or an application to determine that production in excess of an average of 60 Mcf per production day for any 90-day production period was due to enhanced recovery techniques, the jurisdictional agency shall treat the petition or application as if it were an application for an initial determination and follow the applicable provisions of Subpart A of Part 274.

(b) Upon receipt of notice of a determination under paragraph (a), the Commission will review such a determina-
tion pursuant to the applicable provisions of Subpart B of Part 275.

(c) A jurisdictional agency, when making a determination under §271.806 (relating to production in excess of 60 MCF per production day resulting from the application of recognized enhanced recovery techniques), may seek a declaratory order from the Commission that a process (or type of process) or the installation of equipment (or type of equipment) qualifies as recognized enhanced recovery techniques as defined in §271.803(a) of this subpart.

SUBPART I - OTHER CATEGORIES OF NATURAL GAS

§271.901 Applicability.
This subpart implements section 109 of the NGPA and applies to a first sale of natural gas that is not covered by any maximum lawful price under section 102, 103, 104, 105, 106, 107, or 108 of the NGPA.

§271.902 Maximum lawful price.
The maximum lawful price, per MMBtu, for natural gas to which this subpart applies shall be the amount determined in accordance with the following table:

<table>
<thead>
<tr>
<th>If delivery occurs in the calendar month of:</th>
<th>The maximum lawful price is:</th>
</tr>
</thead>
<tbody>
<tr>
<td>December 1978</td>
<td>$1.630</td>
</tr>
<tr>
<td>January 1979</td>
<td>$1.639</td>
</tr>
</tbody>
</table>

§271.903 Filing requirements.
Any person who collects a price under this subpart shall file reports required by §276.101.

§271.904 Special rule.
First sales of natural gas described in section 109(a)(1), (2), (3), or (4) of the NGPA are covered by this subpart only to the extent such first sales are not covered by any maximum lawful price under section 102, 103, 104, 105, 106, 107, or 108 of the NGPA.
SUBPART J - [RESERVED]

SUBPART K - ADJUSTMENTS FOR STATE SEVERANCE TAXES,
ALLOWANCES AND CERTAIN PRODUCTION-RELATED COSTS

§ 271.1100 Applicability.
(a) General. This subpart prescribes regulations under which a price for a first sale of natural gas shall not be considered to exceed the applicable maximum lawful prices set forth in Part 271 if such first sale price exceeds the maximum lawful price to the extent necessary to recover:
   (1) State severance taxes under § 271.1102;
   (2) Natural Gas Act allowances under § 271.1104; and
   (3) production-related costs approved by order of the Commission under § 271.1105.
(b) Exclusions. Sections 271.1104, 271.1105 and 271.1106 shall not apply to any natural gas produced from the Prudhoe Bay Unit of Alaska and transported through the natural gas transportation system approved under the Alaska Natural Gas Transportation Act of 1976.

§ 271.1101 Definitions.
(a)(1) Except as provided in subparagraph (2), the term "State severance tax" as used in this subpart means any severance, production, or similar tax, fee, or other levy imposed on the production of natural gas:

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978

(1) by any State;

(ii) by any Indian tribe recognized as eligible for services provided by the Secretary of the Interior to Indians; or

(iii) by any political subdivision of a State if the authority to impose such tax, fee, or other levy is granted to such political subdivision under State law.

(2) The term "State severance tax" does not include any amount of tax which results from a provision of state law enacted on or after December 1, 1977, unless such provision of law is equally applicable to natural gas produced in such State and delivered in interstate commerce and to natural gas produced in such State and not so delivered.

(b) The term "production-related costs" as used in this subpart means costs of compressing, gathering, processing, treating, liquefaction, conditioning, or transporting natural gas, or other similar costs.

§ 271.1102 State severance taxes.
(a) Except as provided in paragraph (b) of this section, the price for any first sale of natural gas shall not be considered to have exceeded the maximum lawful price applicable to that sale as set forth in this part if such
first sale price exceeds the maximum lawful price to the extent necessary to recover State severance taxes borne by the seller.

(b) The maximum lawful prices prescribed under this part for interstate sales of natural gas produced from the Permian Basin area include State severance taxes in the amount of 2.6 cents for large producers and 3.05 cents for small producers. To the extent maximum lawful prices are established by reference to the Permian Basin area rate, only amounts of State severance tax in excess of those amounts already included may be considered under paragraph (a) of this section.

§ 271.1103 Record retention.

A seller in a first sale in which the price includes State severance taxes permitted under § 271.1102 shall retain a record of the sale which shall identify the seller, and shall retain such other records as are necessary to demonstrate that such seller has borne the amount of State severance taxes included in the sale price. Such records shall be preserved for at least three years from the date on which the sale occurred.

§ 271.1104 Natural Gas Act allowances.

(a) Applicability. The provisions of this section shall apply only to natural gas which was committed or dedicated to interstate commerce on November 8, 1978, and for which a just and reasonable rate was in effect on that date.

(b) General rule. A maximum lawful price applicable to a first sale of natural gas to which this section applies may be exceeded to the extent necessary to recover:

(1) gathering allowances, if allowable in accordance with §§ 2.56a(d) or 2.56b of this chapter; and

(2) allowances for delivery of offshore natural gas, if allowable in accordance with §§ 2.56a(e) or 2.56b(f) of this chapter.

§ 271.1105 Production-related costs.

(a) General rule. The Commission will entertain applications for a determination that the maximum lawful price applicable to a first sale of natural gas shall not be considered to be exceeded as a result of the addition to such price of an amount expended for production-related costs only as permitted by this section.

(b) Exclusion of certain natural gas. Applications under paragraph (a) of this section will not be considered
by the Commission if the natural gas for which the determination is sought:

(1) was committed or dedicated to interstate commerce on November 8, 1978, and is natural gas for which there was a just and reasonable rate in effect on that date; or

(2) is subject to an existing intrastate contract, an intrastate rollover contract or a successor to an existing intrastate contract.

c) Costs for gathering, liquification, transportation, and compression. Except as provided in paragraph (b) of this section, applications under paragraph (a) of this section will be entertained by the Commission respecting costs incurred for:

(1) compression; and

(2) gathering, liquification, or transportation to the extent such activities take place off the lease from which the natural gas was produced.

d) Other production-related costs. (1) Except as provided in paragraph (b) of this section and in subparagraph (2) of this paragraph, the Commission will entertain applications under paragraph (a) of this section only with respect to production-related costs to the extent they exceed the amount attributable to meeting the following standards:

(i) total sulphur (grains per 100 cf.) . . . . . 20
(ii) hydrogen sulphide (grains per 100 cf.) . . . 1
(iii) water (pounds per MMcf) . . . . . . . . . . 7
(iv) carbon dioxide (percent by volume) . . . . . . 3
(v) oxygen, nitrogen, dust, dirt, gum, or other impurities in amounts in excess of which the buyer would be required to incur costs to meet pipeline requirements.

(2) Subject to paragraph (b) of this section, the Commission will entertain applications for costs necessary to meet or exceed the standards in subparagraph (1) of this paragraph with respect to first sales of natural gas to any person for use by such person.

e) Applications. Applications made to the Commission pursuant to this section shall be under oath and shall include the following information:

(1) identification of the maximum lawful price applicable to the first sale of the natural gas under Part 271;

(2) documents supporting the identification of the applicable maximum lawful price, including copies of any determinations by a jurisdictional agency or the Commission or copies of applications made for such determinations;

(3) a summary of the contract provisions which contain the obligations of the parties with respect to production-related costs;
(4) if the applicant has purchased the natural gas which is the subject of an application under this paragraph, documentation of the price paid by the applicant for such gas;

(5) the specific costs sought to be recovered by the applicant and a description of the method used to compute such costs; and

(6) the circumstances which make it necessary for the applicant to collect any amount in excess of the maximum lawful price provided for under Part 271.

(f) Additional information. The Commission may, upon receipt of an application made under this section, require the submission of additional information and hold or cause to be held such other proceedings as it deems necessary or appropriate.

§ 271.1106 Adjustments.

Pursuant to section 502(c) of the NGPA, any person may apply to the Commission for an adjustment on the grounds that the operation of § 271.1105 results in special hardship, inequity, or an unfair distribution of burdens to such person.

PART 273 COLLECTION AUTHORITY; REFUNDS

Subpart A - General Provisions

Sec.
273.101 Private contractual rights.
273.102 Definition of final determination.
273.103 Annual report of collections and refunds.
273.104 Cross reference.

Subpart B - Interim Collection Authority

Sec.
273.201 Transitional rule for certain new wells.
273.202 Collection pending jurisdictional agency determination of eligibility.
273.203 Collection pending review of jurisdictional agency determination.
273.204 Retroactive collection after final determination.

Subpart C - Refund Obligation

Sec.
273.301 General refund obligation.
273.302 Refunds of interim collections.

Authority: This part is issued under the Natural Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350.

SUBPART A - GENERAL PROVISIONS

§ 273.101 Private contractual rights.

Authorization by this part to collect a price for natural gas does not affect any person's contractual right to purchase natural gas at a lower price.

§ 273.102 Definition of final determination.

For purposes of this part, a determination by a jurisdictional agency of eligibility to collect a maximum lawful price under Subpart B, C, G, or H of Part 271 is final at
such time as such determination is no longer subject to:

(a) remand or reversal (other than on grounds specified in section 503(d)(1)(A) or (B) of the NGPA) by the Commission under Part 275; or

(b) judicial review in the Court of Appeals under section 503(b)(4)(B) of the NGPA.

§ 273.103 Annual report of collections and refunds.

(a) General rule. A seller which makes any first sale of natural gas for which a price authorized by this part is charged or collected shall file an annual report of all collections and refunds under this part for all such first sales, beginning with the period from December 1, 1978 through December 31, 1979, and for each calendar year thereafter until all collections and refunds under this part for such first sales have been reported fully. An original and 2 copies of each annual report shall be filed with the Commission on or before April 1st of the next year.

(b) Contents. The annual report shall be filed in accordance with forms and instructions prescribed by the Commission and shall include:

(1) all collections for each first sale for which a price authorized by this part is charged or collected,

identifying the well from which such sale is made and the application for or determination of eligibility for that well;

(2) the portions of such collections which are subject to the refund undertaking required by § 273.302(b) and those portions which were secured by surety bond or placed in escrow as required by § 273.302(c); and

(3) for each first sale, the amount of any refunds paid to each purchaser and the basis for computation of that amount, together with releases signed by each purchaser to indicate payment and full satisfaction of the seller's refund obligation or a statement that the purchaser did not sign such a release.

§ 273.104 Cross reference.

For special rule applicable to resellers, see § 270.202(b).

SUBPART B - INTERIM COLLECTION AUTHORITY

§ 273.201 Transitional rule for certain new wells.

(a) General rule. (1) The price determined under the following table may be charged and collected for any first sale of natural gas from a new well to which this section applies:

[Table not visible in the image]
If delivery occurs in the calendar month of:

December 1978 $1.630
January 1979 $1.639

(2) This section does not apply to a first sale if
the seller is collecting a price under the authority of
§§ 273.202 or 273.203.

(b) Period of collection. (1) Except as provided in
subparagraph (2), the price authorized by paragraph (a) may
be charged and collected for natural gas deliveries:

(i) beginning on the date on which the seller first
meets the requirements of paragraph (c); and

(ii) ending on the date on which the Commission
receives a notice of jurisdictional agency determination
under § 275.201.

(2) No collection may be made under this section for
deliveries of natural gas on or after March 1, 1979, unless
before March 1, 1979, the seller has filed an application
with a jurisdictional agency for a determination respecting
such natural gas under Subpart B, C, G, or H of Part 271.

(c) Filing requirements. (1) Prior to making any
collection under the authority of this section, the seller
shall file with the Commission and the jurisdictional agency
a statement under oath that:

(i) the natural gas for which the collection is made
is produced from a new well;

(ii) the seller believes in good faith that such
natural gas is eligible under the NGPA to be sold at a price
not less than the price specified in paragraph (a); and

(iii) the seller has filed, or will cause to be filed
not later than March 1, 1979, an application with the jurisdic-
tional agency for a determination of qualification under
Subpart B, C, G, or H of Part 271. Where the seller is not
eligible to apply directly for a determination, the seller
shall file either a duplicate of FERC Form No. 121 already
submitted to the jurisdictional agency or a statement under
oath by a person eligible to file the application that it
will be filed not later than March 1, 1979.

(2) The statement shall include any well identification
number assigned to the well or if none has been assigned,
other information sufficient to identify the well, and shall
specify the extent to which such natural gas was committed
or dedicated to interstate commerce on November 8, 1978, and
if so committed or dedicated, the just and reasonable rate
applicable to such natural gas under the Natural Gas Act on
November 8, 1978, and any rate schedules for such natural
gas on file with the Commission on November 8, 1978.
§ 273.202 Collection pending jurisdictional agency determination of eligibility.

(a) General rule. If an application has been filed with the jurisdictional agency for a determination of eligibility under Subpart B, C, G, or H of Part 271 (relating to new natural gas and certain OCS natural gas, natural gas from new onshore production wells, high-cost natural gas or stripper well natural gas), the price specified in § 273.201(a)(1) or the highest maximum lawful price which is specified in any of the subparts for which application is made may be charged and collected.

(b) Period of collection. Except to the extent prohibited by paragraph (c), the price authorized by paragraph (a) may be charged for natural gas deliveries occurring on or after the date on which the application is filed with the jurisdictional agency and collected for such deliveries:

(1) beginning on the date on which the seller complies with the requirements of paragraph (d); and

(2) ending on the earlier of:

(i) 18 months after the first delivery for which collection is made under this section (12 months in the case of deliveries beginning on or after May 1, 1979); or

(ii) the date on which the Commission receives a notice of jurisdictional agency determination under § 275.201.

(c) Special limitation on the period of collection

Unless by March 1, 1979, the jurisdictional agency to which application is made has notified the Commission in writing that such agency has authority to process applications for determinations under Subparts B, C, G and H of Part 271 and is making such determinations, then the price authorized to be charged and collected by paragraph (a) may not be charged and collected under this section for deliveries during the period beginning on March 1, 1979, and ending on the date on which such jurisdictional agency notifies the Commission in writing that such agency has the authority to process applications for determinations under Subparts B, C, G and H of Part 271 and is making such determinations.

(d) Filing requirements. (1) In order to make an interim collection under this section with respect to a first sale of natural gas, a seller shall file with the Commission:

(i) a statement under oath that he believes in good faith that such natural gas is eligible under the NGPA and this subchapter for a maximum lawful price not less than that to be collected;

(ii) a duplicate of FERC Form No. 121 submitted to the jurisdictional agency;

(iii) a certificate of service of this filing upon any purchasers in the form required by §§ 1.17 and 1.51 of this chapter;
(iv) either a statement certifying that collections under this section will be placed in escrow or secured by a surety bond to the extent required by § 273.302(c) or a release from the surety or escrow obligation executed by the purchaser; and

(v) a statement of the extent to which such natural gas was committed or dedicated to interstate commerce on November 8, 1978, and if so committed or dedicated, the just and reasonable rate applicable to such natural gas under the Natural Gas Act on November 8, 1978, and any rate schedules for such natural gas on file with the Commission on November 8, 1978.

(2) No filing may be made under this paragraph unless the Commission has given public notice that the jurisdictional agency to which the application for determination has been made has filed a report in conformance with § 274.105.

(e) Filing limitation. Upon termination of the interim collection authority under this section for any sale, further filings under this section cannot be made for any sale from the same well.

§ 273.203 Collection pending review of jurisdictional agency determination.

(a) General rule. If the jurisdictional agency has determined in accordance with Part 274 that natural gas qualifies for a maximum lawful price under Subpart B, C, G, or H of Part 271, the seller may charge and collect such price during the period described in paragraph (b).

(b) Period of collection. The price authorized by paragraph (a) may be charged and collected for natural gas deliveries:

1. beginning on the date on which the Commission receives notice under § 275.201 of a jurisdictional agency determination with respect to such gas; and

2. ending on the date the jurisdictional agency's determination becomes final, or if the determination of the jurisdictional agency is remanded by final finding of the Commission, six months after the date of such remand.

(c) Filing requirements. No later than ten days after commencement of collection under this section, the seller shall file with the Commission and jurisdictional agency a notice of interim collection of the applicable price established by a determination of the jurisdictional agency and a certificate of service of this notice upon any purchasers in the form required by §§ 1.17 and 1.51 of this chapter. If the seller is not the operator of the well for which the determination has been made, then the notice shall identify the well and operator.
§ 273.204 Retroactive collection after final determination.

(a) General rule. If (1) a jurisdictional agency determination that first sales of natural gas from a well qualify for a maximum lawful price under Subpart B, C, G, or H of Part 271 has become final, and (2) such maximum lawful price exceeds the price collected for deliveries of such natural gas for any period between the date of filing for the determination and the date on which the determination became final, then the seller may retroactively charge and collect for such period the amount of such excess; except that if the application for determination was filed by March 1, 1979, then the amount of such excess may be computed, charged and collected for first sales of natural gas delivered after November 30, 1978.

(b) Special limitation on the period of retroactive collection. Unless by March 1, 1979, the jurisdictional agency to which application was made has notified the Commission in writing that such agency has authority to process applications for determination under Subparts B, C, G, and H of Part 271 and is making such determinations, then retroactive collections otherwise authorized by paragraph (a) may not be collected for deliveries during the period beginning on March 1, 1979 and ending on the date on which such jurisdictional agency notifies the Commission in writing that such agency has the authority to process applications for determinations under Subparts B, C, G, and H of Part 271 and is making such determinations.

(c) Conditions. Collections may be made under this section only in accordance with the following conditions:

(1) Retroactive collections may not begin until 45 days after a determination of eligibility under Subpart B, C, G, or H of Part 271 becomes final pursuant to § 275.202.

(2) A seller may not collect any amount under this section from any purchaser unless the seller has paid to such purchaser all amounts that are due to be refunded under this subchapter by the seller to such purchaser under this subchapter on or before any date on which retroactive collections are made.

(3) Within 15 days after retroactive collection begins for any first sale, the seller shall file with the Commission:

(i) a notice specifying the total amount to be collected and the amount of and basis for any carrying charges;

(ii) a statement that the seller has paid all refunds then due to such purchaser under this subchapter; and

(iii) a statement of concurrence in the filing signed by such purchaser from whom retroactive collections are made.

(4) Collection under this section may be made only to
the extent permitted by the applicable sales contract.

(5) Carrying charges may be collected only to the extent provided by a written agreement of the parties to the applicable sales contract (or amendment thereto) which shall be included in the filing required by this paragraph. The rate of such charges may not exceed nine percent per annum.

SUBPART C - REFUND OBLIGATION
§ 273.301 General refund obligation.
Any price collected with respect to a first sale of natural gas to which this subchapter applies is collected subject to a general obligation promptly to refund any portion of such price which is in excess of the maximum lawful price, or collection of which is not authorized by this subchapter. Compliance with the specific refund requirements of § 273.302 shall not terminate the general refund obligation under this section.

§ 273.302 Refunds of interim collections.
(a) Applicability. The provisions of this section apply to any interim collections made under the authority of Subpart B of this part.

(b) General undertaking.
(1) Except as provided for in subparagraph (2), any notice of collection which is filed with the Commission pursuant to Subpart B for a first sale of natural gas shall include an undertaking with respect to particular first sales in the following form:

AGREEMENT OF
(Name of Applicant) TO COMPLY WITH REFUND PROVISIONS OF PART 273 OF THE COMMISSION'S REGULATIONS UNDER THE NATURAL GAS POLICY ACT

(Name of Applicant) hereby agrees and undertakes to comply with the refund provisions of Part 273 of the Commission's Regulations under the Natural Gas Policy Act insofar as they are applicable to the collections for the wells identified in the annex to this agreement.

By ___________________________ (Authorized Signatory)

Attest:

(2) In lieu of filing undertakings with respect to particular first sales as provided in subparagraph (1), a seller may elect to file a general undertaking applicable to all first sales made by the seller in the following form:

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
AGREEMENT OF
(Name of Applicant) TO COMPLY WITH REFUND
PROVISIONS OF PART 273 OF THE COMMISSION'S REGULATIONS
UNDER THE NATURAL GAS POLICY ACT AND PART 154
OF THE COMMISSION'S REGULATIONS UNDER THE
NATURAL GAS ACT

(Name of Applicant) hereby agrees and undertakes to
comply with the refund provisions of Part 273 of the
Commission's Regulations under the Natural Gas Policy Act
insofar as they are applicable to any collections made
by or on the applicant under these regulations.

By ____________________________________________

(Authorized Signatory)

Attest:

______________________________________________

19

(3) Additional refund assurance may at any time be
required by order of the Commission.

(4) Any undertaking filed under subparagraph (2), or
(3) shall be signed in the manner required by § 274.201(c).

(c) Escrow. In the case of interim collections under
§ 273.202, the following additional requirements apply:

(i) Any amount (i) which is collected under § 273.202
and (ii) which (A) in the case of a new well, is in excess
of the price specified in § 273.201(a)(1); or (B) in the
case of any other well, is in excess of the otherwise appli-
cable maximum lawful price, shall be secured by a surety
bond or held in escrow unless the purchaser has executed a
written agreement which releases the seller from this
obligation.

(ii) Any amount held in escrow under subparagraph (1),
shall be deposited in an interest-bearing account (segregated
from the assets of the seller) at a financial institution
which is chartered and supervised by a state or federal
agency and in which deposits are insured by a state or federal
agency.

(d) Records. If any collection is made under Subpart B,
the seller shall keep accurate accounts of all amounts so
collected for each billing period and for each purchaser;
and resulting revenues as computed under the price being
charged pursuant to this part; the price charged immediately
prior to any interim collections; and the price prescribed
by § 273.201 of this part (or any other maximum lawful price
used to compute the amount bonded or escrowed under this
paragraph), together with the differences in revenues so
computed for each sale.

(e) Refund payment.

(i) Within 45 days after a determination that a first
sale is not eligible for the price collected under this
part becomes final, the seller shall refund to the purchaser
by cash or check the refund amount computed under para-
graph (g) together with interest at the rate of nine percent
per annum on the excess charges that have been collected
from the date of payment until the date of refund.

(2) No interest is required to be paid on any portion
of a refund:

(i) which represents payments of royalties or taxes to
federal or state governmental authorities, except to the
extent that such authorities pay interest to the seller when
refunding overpayments of royalties or taxes; or

(ii) which is paid from escrow (but interest which
accrued in the escrow on the amount required to be refunded
shall be paid at the time of refund).

(f) Discharge of obligation. If a determination that
natural gas is eligible for the price collected becomes final,
then upon receipt of such final determination, the bond,
escrow, or undertaking shall be discharged to the extent it
applies to first sales from the well for which the determina-
tion was made. If any refunds required by this section are
made in conformity with the terms and conditions of the
bond, escrow, or undertaking, the bond, escrow, or under-
taking shall be discharged insofar as it applies to such
refund obligation.

(g) Refund computation. (1) Where the final deter-
mination that the sale is not eligible for the price collected
under Subpart B also includes a final determination of the
maximum lawful price for that sale, that finally determined
price, to the extent permitted by the applicable sales contract,
shall be used to compute the excessive interim collections
and refund amount.

(2) In any other case, the appropriate maximum lawful
price specified under Subpart D, E, F, or I of Part 271,
to the extent permitted by the applicable sales contract,
shall be used to compute the excessive interim collections
and refund amount.

PART 274 - DETERMINATIONS BY JURISDICTIONAL AGENCIES

Subpart A - General Provisions

Sec. 274.101 Applicability.
274.102 Definition of determination.
274.103 Determinations by jurisdictional agencies.
274.104 Notice to the Commission.
274.105 Reports of determination process.

Subpart B - Requirements for Filings with Jurisdictional Agencies

Sec. 274.201 General requirements.
274.202 New natural gas.
274.203 New reservoirs on old OCS leases.
274.204 New, onshore production wells.
274.205 High-cost natural gas.
274.206 Stripper well natural gas.
274.207 Alternative filing and notice requirements

Subpart C - Waivers

Sec. 274.301 Applicability.
274.302 Requests for waiver.
274.303 Termination or revocation of agreements.
274.304 Notice.

Subpart D - Delegations to State Agencies

Sec. 274.401 Delegation of authority to receive certain reports.
Subpart E - Identification of State and Federal Jurisdictional Agencies

Sec. 274.501 Jurisdictional agency.

Authority: This part is issued under the Natural Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350.

SUBPART A - GENERAL PROVISIONS

§ 274.101 Applicability.

This part applies to determinations of jurisdictional agencies (as defined in § 274.501) made under the following subparts of Part 271:

(a) Subpart B (relating to new natural gas and certain OCS natural gas);
(b) Subpart C (relating to new, onshore production wells);
(c) Subpart G (relating to high-cost natural gas); and
(d) Subpart H (relating to stripper well natural gas).

§ 274.102 Definition of determination.

For purposes of this part and Part 275, a determination has been made by a jurisdictional agency when such determination is administratively final before such agency.

§ 274.103 Determinations by jurisdictional agencies.

A jurisdictional agency shall make determinations to which this part applies in accordance with procedures applicable to it under the law of its jurisdiction for making such determinations or for making comparable determinations.

§ 274.104 Notice to the Commission.

(a) Affirmative determinations. Within 15 days after making a determination that natural gas qualifies for a maximum lawful price under this part, the jurisdictional agency shall give written notice of such determination to the Commission. Unless alternative notice requirements under § 274.207 have been approved, such notice shall include the following:

(1) A list of all participants in the proceeding as well as any persons who submitted or who sought an opportunity to submit written comments (whether or not such persons participated in the proceeding);

(2) A statement indicating whether the matter was opposed before the jurisdictional agency;

(3) The information set forth in paragraph (a)(1) through (7) of § 274.105 as applied to the determination in question, unless the jurisdictional agency has on file with the Commission a report describing its determination process under that section; and

(4) A copy of the application together with a copy or description of other materials in the record upon which the determination by the jurisdictional agency was made; and

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
(5) an affirmative finding that the information contained in the notice to the Commission pursuant to this section includes all of the information required to be filed by the applicant under Subpart B of Part 274 or under § 274.207, and in any case in which other materials in the record constitute portions of such information, a copy of those portions of the record.

(b) Negative determinations. Within 15 days after making a determination that natural gas does not qualify for a maximum lawful price under this part, the jurisdictional agency shall give written notice of such determination to the Commission, including a copy of FERC Form No. 121; except that if the applicant or any aggrieved party so requests within the 15 days following the determination, the notice shall include all of the information specified in paragraph (a) of this section.

§ 274.105 Reports of determination process:

(a) Report. A jurisdictional agency may file with the Commission a report which states that it will take such steps as are reasonably necessary or appropriate to perform its functions under this part and which describes the method by which such agency will make determinations to which this part applies. The report shall be in narrative form and shall include:

(1) any filing requirements imposed by the jurisdictional agency in addition to those required by Subpart B of this part including specific forms, as well as any more specific identification of documents listed as minimum requirements as provided in Subpart B;

(2) the type of notice of filing that applicants will be required to give;

(3) the public or specific notice that will be given by the agency of filings, hearings, and determinations;

(4) the internal procedures applicable to such determinations, including specific references to the use of hearings, examiners, and formal consideration by the agency;

(5) the extent to which applicable rules permit interested parties to intervene, participate, or express views in proceedings before the agency;

(6) a description of the relevant data contained in the official records of the agency or contained in the official records of other agencies to which the jurisdictional agency has access; and

(7) a detailed explanation of the manner in which the agency will review applications including identification of the official records which will be examined.

(b) Change in procedures. The jurisdictional agency shall give written notice to the Commission of any change
in procedures described in the report filed pursuant to this section.

(c) Public files. Reports and any changes thereto filed by the jurisdictional agency will be placed in the public files of the Commission.

SUBPART B - REQUIREMENTS FOR FILINGS WITH JURISDICTIONAL AGENCIES

§ 274.201 General requirements.
(a) Filing requirements applicable if alternative requirements are not adopted. The provisions of §§ 274.201 through 274.206 of this subpart apply to the extent not superseded by alternative filing requirements which have taken effect under § 274.207.
(b) Who may file. An application to which this subpart applies may be filed with the jurisdictional agency by any person the jurisdictional agency designates as eligible to make filings with respect to the well for which the application is made.
(c) Signature. If the person filing an application under this part is an individual, the filing shall be signed by such individual, or in the case of a minor or other legally disabled person, his duly qualified legal representative. If the person making such filing is a corporation, partnership, or trust, the filing shall be signed by a responsible official of the corporation, a general partner of the partnership, or the trustee of the trust. In the case of any other legal entity, the operator of the well may sign the application. An operator under a joint operating agreement may sign an application for a well covered by the operating agreement if notice of the application is given by the operator to all other parties to the joint operating agreement and that fact is certified in the application.
(d) Additional information. The documents required by this subpart are the minimum required in support of a request for a determination. The jurisdictional agency may require additional support as it deems appropriate, and may more specifically identify the documents indicated as the minimum required.
(e) Notice to purchasers. Where an application for a determination is sought for natural gas for which the applicant has an identified purchaser, the application shall include a statement that the applicant has delivered or mailed a copy of the completed FERC Form No. 121 to the purchaser.

§ 274.202 New natural gas.
(a) Applications for determination. A person seeking a determination for purposes of Subpart B of Part 271 that
production from a well qualifies as new natural gas shall file an application with the jurisdictional agency for a determination that:

1. such production is from a new OCS lease, in accordance with paragraph (b);
2. such production is from a new onshore well, in accordance with paragraph (c); or
3. such production is from a new onshore reservoir, in accordance with paragraph (d).

(b) New OCS lease. For purposes of demonstrating that natural gas is, or is to be, produced from a new OCS lease, the applicant shall file:

1. FERC Form No. 121;
2. a statement by the applicant under oath that the natural gas is, or is to be, produced from a new OCS lease which is a lease of submerged acreage, entered into with the Secretary of the Interior on or after April 20, 1977; and
3. a copy of the OCS lease or other identification of the lease as the jurisdictional agency may permit.

(c) New onshore wells. An application for a determination that a well is a new onshore well may be filed under subparagraph (1) or (2) of this paragraph, or both.

1. 2.5 mile test. For purposes of demonstrating that a new onshore well is not within 2.5 miles of any marker well, the applicant shall file:

(i) FERC Form No. 121;
(ii) the well completion report;
(iii) the directional drilling survey, if the jurisdictional agency requires such a survey to be conducted;
(iv) a location plat which locates and identifies the well for which the determination is sought and any other well which is producing, or produced after January 1, 1970, natural gas and is within the 2.5 mile radius drawn from the well for which a determination is sought;
(v) a statement by the applicant under oath that he has made, or has caused to be made, pursuant to his instructions, a diligent search of all records (including but not limited to, production, severance tax, and royalty payment records) which are reasonably available and contain information relevant to the determination of eligibility;

(B) describing the search made, the records reviewed, the location of such records, and a description of any records which he believes may contain information relevant to the determination but which he has determined are not reasonably available to him;

(C) that on the basis of the results of this search and examination, he has concluded that to the best of his information, knowledge and belief, there is no marker well
within 2.5 miles of the well for which he seeks a determination; and

(D) that he has no knowledge of any other information not described in the application which is inconsistent with his conclusion; and

(vi) if the jurisdictional agency so requires, certified copies of records relied on by the applicant including copies of the agency's official files.

(2) 1,000 feet deeper test. For purposes of demonstrating that the completion location of a new onshore well is at least 1,000 feet deeper than the deepest completion location of each marker well within a 2.5 mile radius of the well for which a determination is sought, the applicant shall file:

(i) FERC Form No. 121;

(ii) the well completion report;

(iii) a location plat which locates and identifies the well for which the determination is sought and all wells which are producing, or produced after January 1, 1970, natural gas within the 2.5 mile radius drawn from the well for which a determination is sought; including specific identification of all marker wells within the 2.5 radius drawn from the well for which a determination is sought;

(iv) a list of the deepest completion locations for all marker wells identified on the location plat;

(v) the directional drilling survey, if the jurisdictional agency requires such survey to be conducted;

(vi) a statement by the applicant, under oath:

(A) that he has made, or has caused to be made pursuant to his instructions, a diligent search of all records (including but not limited to production, State severance tax, and royalty payment records) which are reasonably available and contain information relevant to the determination of eligibility;

(B) describing the search made, the records reviewed, the location of such records, and a description of any records which he believes may contain information relevant to the determination but which he has determined are not reasonably available to him;

(C) that on the basis of the results of this search and examination, he has concluded that to the best of his information, knowledge and belief, there is no marker well within 2.5 miles of the well for which he seeks a determination which has a completion location less than 1,000 feet above the completion location of the new well; and

(D) that he has no knowledge of any other information not described in the application which is inconsistent with his conclusion; and
(vii) if the jurisdictional agency so requires, certified copies of records relied on by the applicant including copies of the agency's official files.

(d) New onshore reservoir.

(i) For purposes of demonstrating that production is from a new onshore reservoir, the applicant shall file:

(ii) geological information sufficient to support a determination that the reservoir is a new onshore reservoir.

Such information shall include to the extent reasonably available to the applicant at the time the application is filed:

(A) well logs;
(B) bottom hole or surface pressure surveys;
(C) well potential tests;
(D) formation structure maps;
(E) a subsurface cross-section chart; and
(F) a gas analysis;

(iii) the well completion report;

(iv) the directional drilling survey if the jurisdictional agency requires such a survey to be conducted; and

(v) a statement by the applicant, under oath:

(A) that he has made, or has caused to be made pursuant to his instructions, a diligent search of all records

(including but not limited to production, State severance tax, and royalty payment records) which are reasonably available and contain information relevant to the determination of eligibility;

(B) describing the search made, the records reviewed, the location of such records, and a description of any records described in clause (ii) of this subparagraph or any records which he believes may contain information relevant to the determination but which he has determined are not reasonably available to him;

(C) that on the basis of the results of this search and examination, he has concluded that to the best of his information, knowledge and belief, the natural gas to be produced and for which he seeks a determination is from a new onshore reservoir;

(D) that he has no knowledge of any other information not described in the application which is inconsistent with his conclusion; and

(vi) if the jurisdictional agency so requires, certified copies of records relied on by the applicant, including copies of the agency's official files.

(2) The applicant, in his statement under oath, shall also answer, to the best of his information, knowledge and
belief, and on the basis of the results of his search and examination, the following questions:

(i) was natural gas produced in commercial quantities from the reservoir prior to April 20, 1977?

(ii)(A) was the reservoir penetrated before April 20, 1977, by an old well from which natural gas or crude oil was produced in commercial quantities from any reservoir?

(B) if the question in clause (ii)(A) is answered in the affirmative, could natural gas have been produced in commercial quantities from the reservoir before April 20, 1977, from any old well described in clause (ii)(A)?

(C) if the natural gas is to be produced through an old well, were suitable facilities for the production and delivery to a pipeline of such natural gas in existence on April 20, 1977?

(D) if the applicant is unable to answer the questions in clauses (B) and (C) in the negative, the applicant shall provide the information upon which he bases his conclusion that the natural gas for which he seeks a determination is to be produced from a new onshore reservoir.

§ 274.203 New reservoirs on old OCS leases.

A person seeking a determination for purposes of Subpart B of Part 271 that natural gas is produced from a new reservoir on an old OCS lease (as defined in

§ 271.203(b)), shall file an application with the jurisdictional agency which contains the following items:

(a) FERC Form No. 121;

(b) the date the reservoir was penetrated;

(c) geological information sufficient to support a determination that the reservoir is a new reservoir on an old OCS lease. Such information shall include to the extent reasonably available, to the applicant at the time of the determination:

(1) well logs;

(2) bottom hole or surface pressure surveys;

(3) well potential tests;

(4) formation structure maps;

(5) a subsurface cross-section chart;

(6) a gas analysis;

(d) the well completion report;

(e) if the date of penetration of the reservoir is prior to July 27, 1976:

(1) the results of any production test meeting the requirements of OCS Order No. 4 demonstrating that, as of the time of such test, the reservoir was not capable of producing in paying quantities;

(2) any production capability evidence meeting the requirements of OCS Order No. 4 demonstrating that, as of
the time such evidence was obtained, the reservoir was not capable of producing in paying quantities;

(3) an induction-electric log, sidewall cores and core analysis, or a wire line formation test indicating that, as of the time of such tests, the reservoir was not capable of producing in commercial quantities; or

(4) a statement by the applicant, under oath, that no such production tests were performed and that no evidence existed on the date the reservoir was penetrated that the reservoir was capable of producing in paying quantities;

(f) a statement by the applicant, under oath:

(1) that he has made, or has caused to be made pursuant to his instructions, a diligent search of all records (including but not limited to production and royalty payment records) which are reasonably available and contain information relevant to the determination of eligibility;

(2) describing the search made, the records reviewed, the location of the records, and a description of any records which he believes may contain information relevant to the determination but which he has determined are not reasonably available to him;

(3) that on the basis of the results of this search and examination, he has concluded that to the best of his information, knowledge and belief, the natural gas for which he seeks a determination is produced on an old lease on the OCS from a reservoir which was not discovered before July 27, 1976; and

(g) if the jurisdictional agency so requires, certified copies of records relied on by the applicant including copies of the agency’s official files.

§ 274.204 New, onshore production wells.

A person seeking a determination for purposes of Subpart C of Part 271 that a well is a new, onshore production well shall file an application with the jurisdictional agency which contains the following items:

(a) FERC Form No. 121;

(b) the well completion report;

(c) a location plat which locates and identifies the well for which a determination is sought and all other wells within the proration unit in which the well for which a determination is sought is located;

(d) a statement by the applicant, under oath:

(i) that the surface drilling of the well for which he seeks a determination was begun on or after February 19, 1977;
(2) that the well satisfies any applicable federal
or state well-spacing requirements; and that the well is
not within a proration unit:
(i) which was in existence at the time the surface
drilling of the well began;
(ii) which was applicable to the reservoir from
which such natural gas is produced; and
(iii) which applied to any other well which either
produced natural gas in commercial quantities or the
surface drilling of which was begun before February 19,
1977, and was thereafter capable of producing natural gas
in commercial quantities;
(3) that he has concluded that to the best of his
information, knowledge and belief, the natural gas for which
he seeks a determination is produced from a new, onshore
production well and the basis for such conclusion; and
(4) that he has no knowledge of any other information
not described in the application which is inconsistent with
his conclusions;
(e) if the jurisdictional agency so requires, certified
copies of records relied on by the applicant including copies
of the agency's official files; and
(f) if the applicant is seeking a determination with
respect to a new well drilled into an existing proration
unit, then pursuant to §271.304, the applicant must, in
addition to the filing requirements listed in para-
graphs (a) through (e) of this section demonstrates by
appropriate geological evidence that the new well is
necessary to effectively and efficiently drain a portion
of the reservoir covered by the proration unit which cannot
be effectively and efficiently drained by any existing
well within the proration unit.

§274.205 High-cost natural gas.
A person seeking a determination for purposes of
Subpart G of Part 271 that natural gas is produced from a
well which is a deep, high-cost well shall file an applica-
tion with the jurisdictional agency which contains the
following items:
(a) FERC Form No. 121;
(b) all well location reports for the well for
which a determination is sought;
(c) well logs or well servicing company reports
or such other information which will corroborate the depth
of the completion location reported in the well completion
report;
(d) directional drilling surveys if available;
(e) a statement by the applicant, under oath, that the

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
surface drilling of the well for which he seeks a determination began on or after February 19, 1977, and that the well completion location is below a true vertical depth of 15,000 feet; and that he has no knowledge of any information not described in the application which is inconsistent with his conclusions; and

(f) if the jurisdictional agency so requires, certified copies of records relied on by the applicant, including copies of the agency's official files.

§ 274.206 Stripper well natural gas.

A person seeking a determination for purposes of Subpart H of Part 271 that a well either qualifies or continues to qualify as a stripper well shall file an application with the jurisdictional agency which contains the following items:

(a) Application for determination. For purposes of initially qualifying a stripper well, the applicant shall file:

(1) FERC Form No. 121;
(2) production records, if available, and if not, tax records, if available, or verified copies of billing statements upon which the average production for the 90-day production period is based;
(3) a copy of the results of any tests which measure the production capability of the well; and, if such test results are not available and the maximum efficient rate of flow has not been previously established:

(i) production records, if available, and if not, tax records, if available, or verified copies of billing statements for 12 calendar months ending on the last day of the 90-day production period upon which the application is based, which demonstrate that the well produced non-associated natural gas at a rate which did not exceed an average of 60 Mcf per production day during the 12-month period;

(ii) If the well for which a determination is sought has produced non-associated natural gas at an average rate not in excess of 60 Mcf per production day for a 90-day production period within 120 days of the date of filing, but such an average rate of production has not been experienced for a 12-month period, the applicant shall file, as soon as practicable but in no event later than 10 months after the date the application for the determination is filed with the jurisdictional agency, either production records, if available, and if not, tax records, if available, or verified copies of billing statements for the 12-month period, including any part of the 90-day production period upon which the application is based, which demonstrates that such well produced non-associated natural gas at a
rate which did not exceed an average of 60 Mcf per production day during such period; or 

(iii) such other evidence as the applicant may submit upon which the jurisdictional agency could establish the maximum efficient rate of flow;

(4) the number of days natural gas was not produced during the 90-day production period and a description of the state law or conservation practice recognized or approved by the state agency having regulatory jurisdiction over the production of natural gas which prohibited production;

(5) the number of days not included in the 90-day production period and a statement of the reasons why each day was excluded except to the extent they are covered under subparagraph (4);

(6) the production records for crude oil produced from the well for the 90-day production period upon which the application is based;

(7) an inventory of the lease and production equipment used for the well for the past 24 months or for such lesser period as the well has been in production prior to date of filing, as well as the identification of any equipment or processes used in connection with recognized enhanced recovery techniques during the completion of

the well or during production subsequent to the completion of the well but prior to the filing for a determination;

(8) a statement by the person signing the application, under oath, that he has made, or has caused to be made pursuant to his instructions, a diligent search of all records which are reasonably available and contain information relevant to the determination; a description of the search made, the records reviewed, the results of this search and examination he has concluded that to the best of his information, knowledge and belief, the well qualifies as a stripper well; and that he has no knowledge of any other information which is inconsistent with his conclusion;

(9) if the jurisdictional agency so requires, certified copies of records relied upon by the applicant including copies of the agency’s official files.

(b) Notice by an operator or purchaser of an increase in production. For purpose of the notices required under § 271.805, the person filing shall include:

(1) the names and addresses of the operator and purchaser(s) with a designation of who is filing the notice;

(2) identification of the subject well and accurate record reference to the original determination qualifying the well as a stripper well;
(3) the monthly production reports, tax records or billing statements upon which the notice is based for the period of production in question;

(4) a statement of the average production per production day for the period in question;

(5) a statement that all of the information contained in the notice is true to the best of his information, knowledge and belief; and that the notice has been served on the appropriate entities specified in § 271.805; and

(6) if the jurisdictional agency so requires, certified copies of records relied on by the applicant including copies of the agency's official files.

d) Determination of increased production resulting from enhanced recovery techniques. For purposes of a determination that increased production resulted from the use of enhanced recovery techniques, the applicant shall file:

(1) the names and addresses of the applicant and purchaser(s);

(2) an identification of the well and accurate record reference to the original determination qualifying the well as a stripper well and the notice, if any, filed by a purchaser pursuant to § 271.805;

(3) production records, tax records or billing statements for a period of 24 months, including the 90-day or

FEDERAL REGISTER, VOL. 43, NO. 222—FRIDAY, DECEMBER 1, 1978
12-month production period which is the subject of the notice by the operator or the purchaser;

(4) a description of the nature of the seasonal fluctuations as inferred from the data supplied;

(5) a statement, under oath, that the production records, tax records or billing statements relied upon in the application for the designation are correct; that the operator has no knowledge of any information not described in the application which is inconsistent with any of his conclusions; and that the notice has been served on the appropriate entities specified in § 271.005; and

(6) if the jurisdictional agency so requires, certified copies of the records relied on by the applicant including copies of the agency's official files.

§ 274.207 Alternative filing and notice requirements.

(a) General. Upon written application by a jurisdictional agency pursuant to this section, the Commission may approve:

(1) filing requirements which differ from those in §§ 274.201 through 274.206 of this subpart; and

(2) notice requirements which differ from those in § 274.104 of this subpart;

(b) Contents of applications. Applications for approval of alternative filing or notice requirements shall include:

(1) each requirement of this part for which an alternative is proposed;

(2) a description of the specific requirements which will replace the requirements in subparagraph (1), including copies of any forms to be used by the agency;

(3) the reasons for requesting approval of each alternative requirement, which may include the fact that such information is not available; and

(4) the basis for the belief that filings under the alternative filing requirements provide substantial evidence on which the jurisdictional agency may base a determination or that notice under the alternative notice requirements provides the Commission with an adequate basis upon which to review the determination.

(c) Commission review of applications. Upon receipt of an application pursuant to this section, the Commission shall give public notice of such application and after review of any written comments, may issue an order approving the alternative requirements. The Commission will publish the order in the Federal Register.

(d) Effective date of alternative filing and notice requirements. (1) With respect to applications received by a jurisdictional agency after the effective date of approval of alternative filing requirements, such alternate
requirements as are specified and approved shall apply in lieu of the provisions of §§ 274.201 through 274.206 of this subpart.

(2) With respect to determinations made by a jurisdictional agency after the effective date of approved alternative notice requirements, the alternative notice requirements as are specified and approved shall apply in lieu of the provisions of § 274.104 of this subpart.

(e) Termination of alternative filing and notice requirements. (1) A jurisdictional agency may, upon notice to the Commission, discontinue the use of any alternative filing or notice requirements approved under this subpart.

(2) The Commission may, after a public comment period of no less than 30 days give notice to a jurisdictional agency that the Commission has terminated its approval of alternative filing or notice requirements, if it finds that the alternative filing or notice requirements:

(i) are not sufficient to carry out the purpose of the NGPA; or

(ii) after notice and opportunity for hearing, the jurisdictional agency has not complied, or required compliance, with the alternative provisions.

(3) Applications for determinations received by jurisdictional agencies after notice of termination of

the applicability of alternative filing requirements pursuant to this section shall be subject to the filing requirements set forth in §§ 274.201 through 274.206 of this subpart.

(4) Notice of determinations made by jurisdictional agencies after notice of termination of the applicability of alternative notice requirements pursuant to this section shall be subject to the notice requirements set forth in § 274.104 of this subpart.

**APPLICATION FOR DETERMINATION OF THE MAXIMUM LAWFUL PRICE UNDER THE NATURAL GAS POLICY ACT (NGPA)**  
Sections 102, 103, 107 and 108

**PLEASE READ BEFORE COMPLETING THIS FORM:**

**General Instructions:**

Complete this form if you are applying for price classification under sections 102, 103, 107 or 108 of the NGPA. A separate application is required for each well. If any reservoir qualifies for a category which differs from the category applicable to the producing well, separate applications must be made for the producing well and the reservoir. Complete each appropriate item on the reverse side of this page. The code numbers used in items 4.0 and 5.0 can be obtained from the Buyer/Seller Code Book. If there is more than one purchaser or contract, identify the additional information in the space below. Enter any additional remarks in the space below.

Submit the completed application to the appropriate Jurisdictional Agency as listed in title 18 of the CFR, part 270. If there are any questions, call (202) 276-4339.

**Remarks:**

---

FEDERAL REGISTER, VOL. 43, NO. 232—FRIDAY, DECEMBER 1, 1978
§ 274.301 Applicability.

This subpart contains the procedures by which jurisdictional agencies and the Commission may enter into agreements under which jurisdictional agencies waive to the Commission authority to make the determinations set forth in Subpart A of this part.

§ 274.302 Requests for waiver.

(a) General. A jurisdictional agency may file with the Commission a request to enter into a written agreement waiving, in whole or in part, the authority of the jurisdictional agency to make determinations pursuant to Subpart A of this part.

(b) Contents of requests. Requests filed pursuant to this section shall include:

(1) the name of the jurisdictional agency;

(2) each class of determination for which a waiver is sought;

(3) the reasons the jurisdictional agency believes a waiver is necessary; and

(4) the length of time any waiver is to remain in effect.

(c) Commission action on requests. After consideration of any request under this section, the Commission may execute a written agreement which shall provide:

(1) that upon written acceptance of the agreement by the jurisdictional agency, the Commission, in lieu of such agency, will make the determinations waived in the agreement, and

(2) any terms and conditions the Commission deems appropriate with respect to such waiver, including the date on which the waiver shall terminate; and

(3) the effective date of the waiver.

§ 274.303 Termination or revocation of agreements.

Agreements pursuant to this subpart shall remain in effect until public notice is given by the Commission that:

(a) the agreement of waiver has expired pursuant to a term or condition of the waiver agreement;

(b) the Commission has received written notice from the jurisdictional agency that such agency terminates the agreement as of a specified date and assumes the authority to make determinations under Subpart A of this part; or

(c) the Commission has revoked the agreement pursuant to a term or condition of the waiver agreement.
§ 274.304 Notice.

The Commission shall cause public notice to be made of agreements of waiver and of any termination or revocation of a waiver.

§ 274.401 Delegation of authority to receive certain reports.

(a) Delegation. The Commission may delegate to a state agency the authority to receive the reports required by §§ 276.102(d) and 276.103(d) to be filed by an intrastate pipeline pursuant to sections 105 and 106(b) of the NGPA.

(b) State agency. A delegation pursuant to this section may be made only to a state agency with jurisdiction over the rates and charges of the intrastate pipelines that would be making the required filing.

(c) Terms of the delegation. Such delegation shall be contained in an agreement executed between the Commission and the state agency, and shall contain such terms and conditions as the parties deem appropriate. Notice of the delegation agreement will be published in the Federal Register.
SUBPART E - IDENTIFICATION OF STATE AND FEDERAL JURISDICTIONAL AGENCIES

§ 274.501 Jurisdictional agency.

(a) Definition. Except as provided in paragraph (b), "jurisdictional agency" means:

(1) With respect to a well on the OCS, one of the following offices or the United States Geological Survey:

(i) for OCS wells located in the Gulf Coast Region:
   Area Oil & Gas Supervisor
   Suite 336
   3301 N. Causeway Blvd.
   Metairie, LA 70005

(ii) for OCS wells located in the Atlantic Region:
   Area Oil & Gas Supervisor
   Atlantic OCS Operations
   Suite 204
   1725 K Street, N. W.
   Washington, DC 20244

(iii) for OCS wells located offshore Alaska:
   Area Oil & Gas Supervisor
   P. O. Box 259
   Suite 109
   800 A Street
   Anchorage, AK 99510

(iv) for OCS wells located offshore California:
   Area Oil & Gas Supervisor
   7211 Federal Building
   300 North Los Angeles Street
   Los Angeles, CA 90012

(2) With respect to a well the surface location of which is on lands within the boundaries of a State (including Federal lands and offshore State lands), the agency specified in the following table:

(b) Waiver. In the case of any determination to which a waiver under Subpart C of Part 274 is applicable, "jurisdictional agency" means the Commission.

(c) Federal lands. For purposes of this section, "Federal lands" means:

1. all lands leased under:
   (i) the Mineral Lands Leasing Act, as amended, 30 U.S.C. §§ 181 et seq.; and
   (ii) the Mineral Leasing Act for Acquired Lands, as amended, 30 U.S.C. §§ 351 et seq.; and

2. all Indian lands which are under the supervision of the United States Geological Survey (30 CFR Part 221).

(d) Agreements. If the United States Geological Survey and
any state jurisdictional agency enter into an agreement authorizing such state agency to make determinations under Subpart A with respect to wells located on Federal lands, such agreement shall be filed with the Commission. If such an agreement is filed, then such state agency shall be considered the jurisdictional agency with respect to wells on Federal lands in such state to the extent provided in the agreement.

PART 275 - COMMISSION DETERMINATIONS AND REVIEW OF JURISDICTIONAL AGENCY DETERMINATIONS

Subpart A - [Reserved]

Subpart B - Procedure for Commission Review of Jurisdictional Agency Determinations

Sec. 275.201 Publication of notice from jurisdictional agency.  
275.202 Commission review of final determinations.  
275.203 Protests to the Commission.  
275.204 Contents of protests to the Commission.  
275.205 Procedure for reopening determinations.  
275.206 Confidentiality.

Authority: This part is issued under the National Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350.

SUBPART A - [RESERVED]

SUBPART B - PROCEDURE FOR COMMISSION REVIEW OF JURISDICTIONAL AGENCY DETERMINATIONS

§ 275.201 Publication of notice from jurisdictional agency.  
Upon receipt of a notice of determination by a jurisdictional agency under § 274.104, the Commission shall publish notice of such determination in the Federal Register. Such notice shall include:

(a) the date on which the jurisdictional agency notice was received;

(b) certain information contained in Part I of the FERC Form No. 121;

(c) a statement that the application and a copy or description of other materials in the record on which such determination was made is available for inspection, except to the extent the material is treated as confidential under § 275.206, at the offices of the Commission; and
(c) a statement that persons objecting to the final determination may, in accordance with this subpart, file a protest with the Commission within 15 days after the publication.

§ 275.202 Commission review of final determinations.

(a) Review by Commission. Except as provided in paragraph (b) of this section, a determination submitted to the Commission by a jurisdictional agency shall become final 45 days after the date on which the Commission received notice of the determination, unless within the 45 day period, the Commission:

(1) makes a preliminary finding that:

(i) the determination is not supported by substantial evidence in the record on which the determination was made; or

(ii) the determination is not consistent with information which is contained in the public records of the Commission and which was not part of the record on which the jurisdictional agency made the determination, and

(2) issues written notice of such preliminary finding, including the reasons for the preliminary finding. Copies of the written notice will be sent to the jurisdictional agency which made the determination, to the persons identified in the notice under § 274.104 of such determination, and to any persons who have filed a protest.

(b) Incomplete notice. Notwithstanding the provisions of paragraph (a) of this section, the 45-day period for Commission review of a determination shall not begin if:

(1) the notice forwarded to the Commission pursuant to Subpart A of Part 274 does not contain all the information required in § 274.104(a)(4) and (5); and

(2) the Commission notifies the jurisdictional agency within 45 days after the date on which the Commission receives notice of the determination that the notice is incomplete.

(c) Public notice. The Commission shall publish notice of the preliminary finding in the Federal Register and shall post the notice in its Office of Public Information. The notice shall set forth the reasons for the preliminary finding.

(d) Procedures following notice of preliminary finding. Any state or federal agency or any person may, within 30 days after issuance of the preliminary finding, submit written comments and request an informal conference with the Commission staff. Any jurisdictional agency, any state agency and any person receiving notice under paragraph (a)(2) may request an informal conference with the Commission staff. All timely requests for conferences will be granted. Notice of, and permission to attend, such conferences will be given to persons identified in paragraph (a)(2) and to state or federal agencies or persons who submitted comments under this paragraph.
(e) Commission review. In any case in which a protest was filed with the Commission pursuant to this subpart and a preliminary finding was issued, the Commission will issue a final order within 120 days after issuance of the preliminary finding; either affirming, reversing, or remanding the determination of the jurisdictional agency. Such order shall state the specific basis for the Commission's action. Notice of the issuance of such order shall be given to the jurisdictional agency, to participants in the proceeding before the jurisdictional agency and to participants in the proceeding before the Commission under paragraph (d) of this section and under §275.203. In the event that the Commission fails to issue a final order within such 120 day period, the determination of the jurisdictional agency shall become final.

§275.203 Protests to the Commission.

(a) Who may file. Any person may file a protest with the Commission with respect to a determination of a jurisdictional agency.

(b) Grounds. Protests may be based only on the grounds that the final determination is:

1. not supported by substantial evidence;
2. not consistent with information which is contained in the public records of the Commission and which was not part of the record on which the determination was made;
3. not consistent with information submitted with the protest for inclusion in the public records of the Commission, which information was not part of the record on which the determination was made; or
4. not based on an application which complied with the filing requirements set forth in Subpart B of Part 274, or alternative filing requirements approved pursuant to §274.207.

§275.204 Contents of protests to the Commission.

Each protest shall include:

(a) an identification of the determination protested;
(b) the name and address of the person filing the protest;
(c) a statement of whether or not the person filing the protest participated in the proceeding before the jurisdictional agency, and if not, the reason for his non-participation;
(d) a statement of the effect the determination will have on the protestor;
(e) a statement of the precise grounds under §275.203 for the protest, and all supporting documents or references to any information relied on which is in the record on which
the determination is based or is in or to be inserted in the
public files of the Commission; and

(f) a statement that the protestor has served, in
accordance with §§ 1.17 and 1.51 of this chapter a copy of
the protest together with all supporting documents on the
jurisdictional agency and all persons who participated in
the proceeding before the jurisdictional agency.

$ 275.205 Procedure for reopening determinations.
(a) Grounds. At any time subsequent to the time a
determination becomes final pursuant to this subpart, the
Commission, on its own motion, or in response to a petition
filed by any person aggrieved or adversely affected by the
determination, may reopen the determination if it appears that:

(1) in making the determination, the Commission or the
jurisdictional agency relied on any untrue statement of
material fact; or

(2) there was omitted a statement of material fact
necessary in order to make the statements made not mis-
leading, in light of the circumstances under which they
were made to the jurisdictional agency or the Commission.

(b) Contents of petition. A petition to reopen the
determination proceeding shall contain the following
information, under oath:

(1) the name and address of the person filing the
petition;
(2) the interest of the petitioner in the outcome of
the determination proceeding;
(3) the statement of material fact that is alleged to
be untrue or omitted;
(4) a statement explaining why the outcome of the
determination proceeding would have been different had the
statement or omission not occurred; and
(5) copies of all documents relied on by the petitioner,
or references to such documents if they are contained in the
public files of the Commission.

(c) Procedures after reopening. In the event the
Commission reopens a determination pursuant to this section
it shall:

(1) give notice to the jurisdictional agency and all
persons who participated, before both that agency and the
Commission, in the proceedings resulting in the determina-
tion in question;

(2) permit the jurisdictional agency and other persons
receiving notice pursuant to subparagraph (1) to submit
whatever documentary evidence such agency or persons deem
relevant; and

(3) take such other action or hold or cause to be
held such proceedings as it deems necessary or appropriate for a full disclosure of the facts.

(d) **Final order of Commission.** Within 150 days after issuance of the notice under paragraph (c)(1) of this section, the Commission shall issue a final order. If the Commission finds that the grounds referred to in paragraph (a) of this section exist, it shall vacate the determination, and order refund or other appropriate action, and the right to collect the previously determined maximum lawful price shall terminate.

§ 275.206 Confidentiality.

(a) Except as provided in paragraph (b), the Commission will accord confidential protection to, and not disclose to the public, any information submitted to the Commission by a jurisdictional agency under § 274.104(a)(4), if:

(1) the jurisdictional agency, on its own motion or on request of the applicant, afforded such information confidential treatment before the jurisdictional agency; and

(2) the agency order or the applicant's request stated grounds for confidential treatment which fall within one of the exemptions described in paragraphs (1) through (9) of 5 U.S.C. 552(b).

(b) Upon receipt of a request for disclosure of information treated as confidential under paragraph (a), the Commission will determine in accordance with 5 U.S.C. 552 whether the information is exempt under 5 U.S.C. 552(b). If it determines the information is not exempt, the information will be made public. If it determines that the information is exempt, the Commission will not make it public unless the Commission determines that its conduct of the proceeding to review the jurisdictional agency determination requires making such information available to the public or to particular parties, subject to such conditions (including a protective order) as the Commission may prescribe. Before making any information public under this paragraph, the Commission shall provide at least 10 days notice to the person who submitted the information.
PART 276 - REPORTS

Subpart A - Reports for Sales of Natural Gas Under Sections 105, 106(b), and 109 of the NGPA

Sec. 276.101 Reporting entities.
276.102 Existing intrastate contracts.
276.103 Intrastate rollover contracts.
276.104 Other categories of natural gas.
276.105 Elective filing for certain sellers.
276.107 Record retention.

SUBPART A - REPORTS FOR SALES OF NATURAL GAS UNDER SECTIONS 105, 106(b), AND 109 OF THE NGPA

§ 276.101 Reporting entities.
(a) General rule. Except as provided in paragraph (b), any person who makes a first sale of natural gas with respect to which a maximum lawful price under section 105, 106(b), or 109 of the NGPA applies, shall file with the Commission reports in accordance with the provisions of this subpart.

(b) Exceptions. (1) Any person who, in the 12 month period which began on December 1, 1977 and ended on November 30, 1978, sold less than a total of 10,000 MMBtu of natural gas (including the sales by any affiliate of such person and including all sales whether such sales occurred in inter- or intrastate commerce) may, in lieu of the reports otherwise required under §§ 276.102 and 276.103 of this subpart, elect to make, under oath, the elective filing described in § 276.105 of this subpart.

(2) In the case of a first sale under sections 105 and 106(b) of the NGPA to an interstate pipeline or an intrastate pipeline, the provisions of paragraphs (a) and (b)(1) of this section shall not apply and the reports specified in §§ 276.102 and 276.103 of this subpart shall be filed by the purchasing interstate pipeline or intrastate pipeline. With regard to first sales reported under this subparagraph, the person making the first sale must file an oath statement with the Commission in accordance with §§ 276.102(e) and 276.103(e).

§ 276.102 Existing intrastate contracts.
(a) Any person who makes a first sale of natural gas under an existing intrastate contract shall file with the Commission on March 1, 1979, and annually thereafter, a report in accordance with forms and instructions issued by the Commission which contains:
(1) with respect to each existing intrastate contract under which first sales of natural gas occurred in the reporting period, a statement identifying:

(i) the date the existing intrastate contract, and all successors to the existing intrastate contract, were entered into;

(ii) the contract price on November 9, 1978, as defined in §271.504 of Subpart E, if any;

(iii) if the contract price on November 9, 1978, is less than or equal to $2.00 per MMBtu, a copy or summary of the contract price escalator terms, if any;

(iv) the duration of the contract;

(v) the identity of all purchasers under the contract;

(vi) the contract price on December 31, 1984;

(2) a statement under oath to be filed by a responsible official of such person: (i) that to the best of such official's information, knowledge and belief:

(A) all information submitted in the report is true; and

(B) all first sales of natural gas occurring in the reporting period were made in compliance with the maximum lawful prices specified in section 105 of the NGPA and the Commission's regulations under Subpart E of Part 271; and

(ii) that books and records kept and maintained by such person reflect all the information reported pursuant to this section and that such person undertakes to retain such records for a period of 3 years after the expiration of any contract under which any first sales have occurred during the reporting period.

(b) In the case of any report filed with the Commission under this section, the report shall include the volumes sold under each existing intrastate contract during the reporting period, the highest price per MMBtu charged and collected with respect to any sale under each such contract during the reporting period, an identification of the month in which such highest price was charged, and an identification of all contract modifications described in §271.505(b) of this subchapter executed during the reporting period.

(c) Any person filing annual reports with the Commission under this section may exclude from his report any information which had been previously reported to the Commission under an earlier report filed by such person under paragraph (a) of this section.

(d) An interstate or intrastate pipeline purchasing natural gas under an existing intrastate contract shall file on March 1, 1979, and annually thereafter a report with...
the Commission or, in the case of an intrastate pipeline, the appropriate state regulatory agency if a delegation of functions has been made to such state regulatory agency pursuant to Subpart D of Part 274. Such report shall contain the information specified in this section for all purchases by the reporting pipeline under existing intrastate contracts except that, in lieu of the oath filing required under paragraph (a)(2), the reporting pipeline shall make a statement under oath by a responsible official of such pipeline that to the best of such official's information, knowledge and belief all of the information contained in the report is true.

(e) Any person who makes a first sale of natural gas to any interstate or intrastate pipeline under an existing intrastate contract shall file with the Commission by March 1, 1979, and annually thereafter, a statement under oath by a responsible official of such person:

(1) that to the best of such official's information, knowledge and belief, any first sales of natural gas occurring in the reporting period under existing intrastate contracts were made in compliance with applicable maximum lawful prices specified in section 105 of the NGPA and the Commission's regulations under Subpart E of Part 271; and

(2) that books and records kept and maintained by such person reflect all the information required to be reported by the purchasing and reporting pipeline under paragraph (d) of this section and that such person undertakes to retain such records for a period of 3 years after the expiration of any contract under which any first sales have occurred during the reporting period.

§ 276.103 Intrastate rollover contracts.
(a) Any person who makes a first sale of natural gas under an intrastate rollover contract shall file with the Commission on March 1, 1979, and annually thereafter, a report in accordance with forms and instructions issued by the Commission which contains:

(1) with respect to each intrastate rollover contract under which first sales of natural gas occurred in the reporting period, a statement identifying:

(i) the effective date on which first sales began under the intrastate rollover contract;

(ii) identification of the expired contract;

(iii) the identity of all parties to the existing intrastate contract which expired and to the intrastate rollover contract;
(iv) a specification of all changes, if any, in price related terms in the intrastate rollover contract from those price related terms contained in the existing intrastate contract which has expired;

(v) the contract price paid, or which would have been paid, under the existing intrastate contract for the month in which first sales began under the rollover contract;

(vi) the price charged for the month in which first sales began under the intrastate rollover contract; and

(2) a statement under oath to be filed by a responsible official of such person:

(i) that to the best of such official's information, knowledge and belief:

(A) all information submitted in the report is true; and

(B) any first sales of natural gas occurring in the reporting period were made in compliance with the maximum lawful prices specified in section 106(a) of the NGPA and the Commission's regulations under Subpart F of this part;

(ii) that books and records kept and maintained by such person reflect all the information reported pursuant to this section and that such person undertakes to retain such records for a period of 3 years after the expiration of any contract under which any first sales have occurred during the reporting period.

(b) In the case of any report filed with the Commission under this section, the report shall include the volumes sold under each intrastate rollover contract during the reporting period, and the highest price per MMBtu charged and collected for sales of natural gas under each such contract during the reporting period, an identification of the month in which such highest price was charged, and an identification of all contract provisions described in §271.604(b) of this subchapter executed during the reporting period.

(c) Any person filing annual reports with the Commission under this section may exclude from his report any information which had been previously reported to the Commission under an earlier report filed by such person under paragraph (a).

(d) An interstate or intrastate pipeline purchasing natural gas under an intrastate rollover contract shall file on March 1, 1979, and annually thereafter a report with the Commission or, in the case of an intrastate pipeline, the appropriate state regulatory agency where a delegation of functions has been made to such state regulatory agency pursuant to Subpart D of Part 274. Such report shall contain all of the information specified in this section for
all purchases by the reporting pipeline under intrastate rollover contracts except that, in lieu of the oath filing required under paragraph (a)(2), the reporting pipeline shall make a statement under oath by a responsible official of such pipeline that to the best of such official's information, knowledge and belief all the information contained in the report is true.

(e) Any person who makes a first sale of natural gas to any interstate or intrastate pipeline under an intrastate rollover contract shall file with the Commission by March 1, 1979, and annually thereafter, a statement under oath by a responsible official of such person:

(1) that to the best of such official's information, knowledge and belief, any first sales of natural gas occurring in the reporting period under intrastate rollover contracts were made in compliance with applicable maximum lawful prices specified in section 106(b) of the NGPA and the Commission's regulations under Subpart E of Part 271; and,

(2) that books and records kept and maintained by such person reflect all the information required to be reported by the purchasing and reporting pipeline under paragraph (d) of this section and that such person undertakes to retain such records for a period of 3 years after the expiration of any contract under which any first sales have occurred during the reporting period.
§ 276.104 Other categories of natural gas.

A person who makes a first sale of natural gas which qualifies under Subpart I of Part 271 shall file in accordance with forms and instructions issued by the Commission, a report with the Commission on March 1, 1979, and annually thereafter, which contains the following items:

(a) the volumes of natural gas sold in such first sale during the reporting period;

(b) a statement that the natural gas sold in the reporting period was not committed or dedicated to interstate commerce on November 8, 1978; or if such natural gas was so committed or dedicated, a just and reasonable rate was not in effect under the Natural Gas Act on such date for the natural gas (including the basis for such conclusion); and with respect to any natural gas sold in the reporting period which was not committed or dedicated to interstate commerce on November 8, 1978, the natural gas sold in the reporting period is not subject to an existing intrastate contract as defined in § 270.102(b)(8) or intrastate rollover contract as defined in § 270.102(b)(11);

(c) a statement that the natural gas does not qualify for a maximum lawful price under any subpart of Part 271 that is lower than the maximum lawful price permitted under § 271.902;

(d) (1) if the natural gas was committed or dedicated to interstate commerce on November 8, 1979, a statement that a notice of change in rate schedule pursuant to § 154.94 of this chapter has been filed;

(2) if the natural gas was not committed or dedicated to interstate commerce on November 8, 1978, a statement identifying the well, reservoir, and acreage from which the natural gas is produced;

(e) a statement under oath to be filed by a responsible official of such person that to the best of such official's information, knowledge and belief:

(1) all information submitted in the report is true; and

(2) any first sales of natural gas occurring in the reporting period were made in compliance with the maximum lawful prices specified in section 109 of the NGPA and the Commission's regulations under Subpart I of Part 271.

(f) Any person filing annual reports with the Commission under this section may exclude from his report any information which had been previously reported to the Commission under an earlier report filed by such person under this section.
§ 276.105 Elective filing for certain sellers.
(a) Any person described in paragraph (b)(1) of § 276.101 who elects to file an oath statement and undertaking, in lieu of reports otherwise required under §§ 276.102 and 276.103 of this subpart, shall file with the Commission no later than March 1, 1979, and annually thereafter, a statement under oath to be filed by a responsible official of such person:

(1) that such person in the 12 month period which began December 1, 1977, and ended on November 30, 1978, sold less than a total of 10,000 MMCF of natural gas (including the sales by any affiliate of such person and including all sales which occurred both in inter- and intrastate commerce);

(2) that books and records kept and maintained by such person reflect all the information required to be reported under §§ 276.102 and 276.103 of this subpart and that such person undertakes to retain such records for a period of 3 years after the expiration of any contract under which any first sales have occurred in the reporting period;

(3) that to the best of such person's knowledge, information and belief all first sales occurring during the reporting period were made in compliance with the applicable maximum lawful prices specified in section 105 and 106 of the NGPA and the Commission's regulations under Subparts E and F of Part 271.

(b) Any person filing annual statements with the Commission under this section, beginning with the report to be filed by March 1, 1980, shall only be required to file the information required by paragraphs (a)(2) and (a)(3).

§ 276.106 Definition.
For the purposes of this subpart, the term "reporting period" means:

(a) in the case of the March 1, 1979, report, the period which begins on December 1, 1978, and ends on January 31, 1979; and

(b) in the case of annual reports filed beginning with March 1, 1980, the period which begins on February 1 of the preceding calendar year and ends on January 31 of the reporting year.

§ 276.107 Record retention.
Each person who makes a first sale under section 105, 106(b) or 109 of the NGPA shall maintain such books and records as may be necessary to reflect all the information required to be reported under §§ 276.102, 276.103 or 276.104, or which would be required to be reported but for an election under
§ 276.105 of this subpart. Such books and records shall be
retained for a period of three years after the expiration of
any contract under which any first sales have occurred in the
reporting period.

Authority: This part is issued under the Natural Gas Policy Act of 1978, P.L. 95-621, 92 Stat. 3350.

FEDERAL REGISTER, VOL. 43, NO. 222—FRIDAY, DECEMBER 1, 1978
SUBPART A—CERTAIN TRANSPORTATION BY INTERSTATE PIPELINES

§ 284.101 Applicability.

This subpart implements section 311(a)(1) of the
NGPA and applies to the transportation of natural gas
by interstate pipelines on behalf of:
(a) intrastate pipelines; and
(b) local distribution companies.

§ 284.102 Transportation by interstate pipelines:

(a) General rule. (1) Except as provided in para-
graph (b) of this section and subject to the provisions
of this subpart, any interstate pipeline, without prior Com-
mission approval, may transport natural gas on behalf of:
(i) any intrastate pipeline; and
(ii) any local distribution company.

(2) Rates charged for transportation under this
paragraph may not exceed just and reasonable rates as
provided in § 284.103.

(3) Transportation arrangements under this paragraph
shall be subject to such further terms and conditions as provided
by rule or order of the Commission pursuant to § 284.104.

§ 284.103 Rates and charges.

(a) Rates and charges for transportation of natural
gas by interstate pipelines under § 284.102(a) shall be
determined as provided in paragraphs (b) through (d) of this
section.

(b) If an interstate pipeline has on file with the
Commission a transportation rate schedule applicable to
transportation arrangements under § 284.102(a), the inter-
state pipeline shall use the rates contained in that schedule.

(c) If an interstate pipeline does not have on file with the Commission a transportation rate schedule applicable to transportation arrangements under § 284.102(a), the interstate pipeline may elect either:

1. to base its rates upon the methodology and cost used in designing rates to recover the transmission and related storage costs included in its then effective sales rate schedules; or

2. to use the rates contained in a transportation rate schedule on file with the Commission which the interstate pipeline determines covers service comparable to transportation service under this subpart.

(d)(1) Except as provided in subparagraphs (2) and (3), all revenues received for transportation rendered pursuant to an arrangement under this subpart in excess of an allowance of one cent per Mcf for out-of-pocket expenses shall be credited to Account No. 191 and flowed back to the interstate pipeline's customers.

(2) An interstate pipeline is not required to credit revenues to Account No. 191 pursuant to subparagraph (1):

(i) to the extent revenues attributable to such services fall within representative levels which have been credited in arriving at a test period cost of service; or

(ii) to the extent that volumes transported fell within representative levels which have been included in billing determinants for the purpose of establishing rates.

3. An interstate pipeline is not required to credit to Account No. 191 pursuant to subparagraph (1) of this paragraph any amount which it is able to demonstrate, upon application to the Commission, represents actual out-of-pocket expenses in excess of one cent per Mcf.

§ 284.104 Terms and conditions.

(a) Contracts for the transportation of natural gas pursuant to § 284.102(a) shall provide:

(1) that service under the contract shall be conditioned upon the availability of capacity sufficient to provide the service without detriment or disadvantage to the interstate pipeline's existing customers who are dependent on the pipeline's general system supply; and

(2) that the transportation arrangement is subject to the provisions of this subpart.

(b) Transportation arrangements under § 284.102(a) may be for a period not exceeding two years and may be extended as provided in § 284.105.

(c) The Commission may prospectively, by rule or order, impose further terms and conditions as it deems appropriate and in the public interest.
§ 284.105 Extensions.

(a) Interstate pipelines seeking to extend transportation arrangements under § 284.102(a) shall file an extension report, as required in § 284.106(c).

(b) If an extension report as required in § 284.106(c) is duly filed, the proposed extension may take effect unless the Commission, prior to the beginning of the proposed extension, and after opportunity for written comments, determines, by order, that the proposed extension is not approved. If the Commission determines, by order, that the proposed extension shall be modified, the extension may take effect only as modified.

(c) Extensions may be for a period not exceeding two years unless otherwise ordered by the Commission.

§ 284.106 Reporting requirements.

(a) Initial report. Within thirty days after commencing transportation under § 284.102(a), an interstate pipeline shall file with the Commission an initial report, under oath, signed by a senior official of the company, containing the following information:

(1) the exact legal name of the interstate pipeline and the name, title and mailing address of the person or persons to whom communications concerning the transportation arrangement pursuant to this subpart should be addressed;

(2) a description of the transportation service, including:

(i) the identity of the parties;

(ii) the dates of commencement and projected termination of the service;

(iii) the estimated total and daily volumes of natural gas to be transported;

(iv) the points between which the natural gas is to be transported; and

(v) the rate to be charged, and with respect to the rate:

(A) if the interstate pipeline is charging a rate contained in a rate schedule under § 284.103(b), the identity of the rate schedule;

(B) if the interstate pipeline is charging a rate computed pursuant to § 284.103(c)(1), an explanation of how the rate is computed; or

(C) if the interstate pipeline is charging a rate contained in a rate schedule under § 284.103(c)(2), a statement of the basis upon which the interstate pipeline determined that the rate schedule used was for comparable service;

(3) a statement that the contract provides that:

(i) service under the contract is conditioned upon the
availability of capacity sufficient to provide the service without detriment or disadvantage to the interstate pipeline's existing customers who are dependent on the pipeline's general system supply; and

(ii) the transportation arrangement is subject to the provisions of this subpart.

(b) **Subsequent reports.** If any significant change occurs with respect to the information filed under paragraph (a) of this section, the interstate pipeline shall file with the Commission, under oath, signed by a senior official of the company, appropriate amendments to its initial report.

(c) **Extension report.** Not less than ninety days prior to the expiration of a contract for the transportation of natural gas pursuant to § 284.102(a), an interstate pipeline seeking to extend the transportation arrangement beyond the initial two-year period or any period of extension shall file with the Commission an extension report, under oath, signed by a senior official of the company, stating:

(1) current information with respect to any matters required to be reported under paragraph (a) of this section; and

(2) the proposed terms of the extension.

(d) **Final report.** Within thirty days after the termin- nation of any transportation arrangement under § 284.102(a), or, if extended, within thirty days after the end of the period of the extension, the interstate pipeline shall file with the Commission a report, under oath, signed by a senior official of the company, stating:

(1) current information with respect to the matters required to be reported under paragraph (a) of this section;

(2) actual total and daily volumes of natural gas transported pursuant to the arrangement; and

(3) total revenues received and a complete statement of the manner in which the revenues were treated.

§ 284.107 **Application.**

An interstate pipeline seeking Commission approval for a transportation arrangement for any fixed period in excess of two years under § 284.102(b) shall file with the Commission a transportation rate schedule for the transportation service to be provided, and an application, under oath, signed by a senior official of the company, containing the following information:

(a) the exact legal name of the interstate pipeline and the name, title and mailing address of the person or persons to whom communications concerning the transportation arrangement pursuant to this subpart should be
(b) a description of the transportation service, including:
   (1) the identity of the parties;
   (2) the dates of commencement and termination of the service;
   (3) the estimated total and daily volumes of natural gas to be transported;
   (4) the points between which the natural gas is to be transported;
   (c) a statement that the contract provides that:
      (1) service under the contract is conditioned upon the availability of
          capacity sufficient to provide the service without detriment or
disadvantage to the interstate pipeline's existing customers who are
dependent on the pipeline's general system supply; and
      (2) the transportation arrangement is subject to the provisions of
          this subpart.

SUBPART B—CERTAIN TRANSPORTATION BY INTRASTATE PIPELINES

§284.121 Applicability.

This subpart implements section 311(a)(2) of the NGPA and applies to the transportation of natural gas by intrastate pipelines on behalf of interstate pipelines and local distribution companies served by interstate pipelines.

§284.122 Transportation by intrastate pipelines.

(a) General rule. (1) Except as provided in paragraph (b) of this section, and subject to the provisions of this subpart, any intrastate pipeline may, without prior Commission approval, transport natural gas on behalf of:

   (i) any interstate pipeline; and
   (ii) any local distribution company served by an interstate pipeline.

(2) Rates charged for transportation under this subpart may not exceed fair and equitable rates as provided in §284.123.
(3) Transportation under this paragraph shall be subject to such further terms and conditions as provided by rule or order of the Commission pursuant to § 284.124.

(4) Transportation arrangements under this paragraph may be extended as provided in § 284.125.

(5) Intrastate pipelines engaging in transportation arrangements under this paragraph shall file reports as required by § 284.126.

(b) Transactions in excess of two years. (1) An intrastate pipeline proposing to enter into transactions for the transportation of natural gas on behalf of any interstate pipeline or local distribution company served by an intrastate pipeline for a fixed period in excess of two years shall apply to the Commission for prior approval of the transaction.

(2) The intrastate pipeline shall apply for approval as provided in § 284.127.

(3) The Commission may, by order, approve or deny an application. An order approving an application shall specify the applicable rates and charges, duration and reporting requirements and such other terms and conditions as the Commission deems appropriate and in the public interest.

§ 284.123 Rates and charges.

(a) Rates and charges for transportation of natural gas pursuant to this subpart shall be fair and equitable as determined in accordance with paragraph (b) of this section.

(b)(1) The intrastate pipeline may elect either:

(i) to base its rates upon the methodology and cost used:

(A) in designing rates to recover the cost of gathering treatment, processing, transportation, delivery or similar service (including storage service) included in its then effective firm sales rate schedules for city-gate service on file with the appropriate state regulatory agency; or

(B) in determining the allowance permitted by an appropriate state regulatory agency or for city-gate service by the intrastate pipeline; or

(ii) to use the rates contained in a transportation rate schedule for intrastate service on file with the appropriate state regulatory agency which the intrastate pipeline determines covers service comparable to service under this subpart.

(2) In the case of an intrastate pipeline which does not make an election under subparagraph (i), the intrastate pipeline shall file with the Commission the proposed rates and charges, supported by information showing that the proposed rates and charges are fair and equitable. The intrastate pipeline may commence the
transportation service and charge and collect the proposed rates, subject to refund of amounts which the Commission may, by order, after affording notice and opportunity for the oral presentation of views, data and arguments, and written comments, determine to be in excess of those shown to be fair and equitable or in excess of the rates and charges which interstate pipelines would be permitted to charge for providing similar transportation service.

(c) The Commission presumes that all revenues received by an intrastate pipeline in connection with transportation arrangements pursuant to § 284.122(a) and computed in accordance with paragraph (b)(1)(i) or (ii) of this section have been or will be taken into account for purposes of establishing rates charged by the intrastate pipeline for service to intrastate customers.

(d) If the intrastate pipeline is charging a rate computed pursuant to § 284.123(b)(1)(i) or (ii), the rate charged is presumed to be:

(i) fair and equitable; and

(ii) not in excess of the rates and charges which interstate pipelines would be permitted to charge for providing similar transportation service.

§ 284.124 Terms and conditions.
(a) Contracts for the transportation of natural gas pursuant to § 284.122(a) shall provide that the transportation arrangement is subject to the provisions of this subpart.

(b) Transportation arrangements pursuant to § 284.122(a) may be for a period not exceeding two years and may be extended for periods not exceeding two years.

(c) The Commission may prospectively, by rule or order, impose further terms or conditions as it deems appropriate and in the public interest.

§ 284.125 Extensions.
(a) An intrastate pipeline seeking to extend a transportation arrangement under § 284.122(a) shall file an extension report as required in § 284.126(c).

(b) If an extension report as required in § 284.126(c) is duly filed, the proposed extension may take effect unless the Commission, prior to the beginning of the proposed extension, and after opportunity for written comments, determines, by order, that the proposed extension is not approved. If the Commission determines, by order, that the proposed extension shall be modified, the extension may take effect only as modified.
§ 284.126 Reporting requirements.

(a) Initial report. Within thirty days after commencing transportation service pursuant to this subpart, an intrastate pipeline shall file with the Commission and the appropriate state regulatory agency an initial report, under oath, signed by a senior official of the company, containing the following information:

(i) the exact legal name of the intrastate pipeline; and the name, title and mailing address of the person or persons to whom communications concerning the transportation arrangement pursuant to this subpart should be addressed;

(ii) a general description of the intrastate pipeline's existing operations;

(iii) a description of the transportation service, including:

(a) the identity of the parties;

(b) the dates of commencement and projected termination of the service;

(c) the estimated total and daily volumes of natural gas to be transported;

(d) the points between which the gas is to be transported; and

(v) the rate to be charged, and with respect to the rate:

(A) if the intrastate pipeline is charging a rate computed pursuant to §284.123(b)(1), an explanation of how the rate is computed; or

(B) if the intrastate pipeline is charging a rate contained in a rate schedule under §284.123(b)(2), a statement of the basis upon which the intrastate pipeline determined that the service provided is comparable to service provided for under the rate schedule; and

(c) a statement that the appropriate state regulatory agency has been notified that the Commission has presumed that all revenues received by an intrastate pipeline in connection with the transportation arrangement pursuant to §284.122(a) and computed in accordance with §284.123(b)(1) (i) or (ii), have been or will be taken into account by the appropriate state regulatory agency for purposes of establishing transportation rates for intrastate service.

(b) Subsequent reports. If any significant change occurs with respect to the information filed under paragraph (a) of this section, the intrastate pipeline shall file with the Commission and the appropriate state regulatory agency, under oath, appropriate amendments to
its initial report, signed by a senior official of the company.

(c) Extension report. Not less than 90 days prior to the expiration of a contract for the transportation of natural gas pursuant to this subpart, an intrastate pipeline seeking to extend the transportation arrangement beyond the initial two-year period or any period of extension shall file with the Commission and the appropriate state regulatory agency, under oath, an extension report, signed by a senior official of the company stating:

1. current information with respect to any matters required to be reported under paragraph (a) of this section; and

2. the proposed terms of the extension.

(d) Final report. Within thirty days after the termination of any transportation arrangement under §284.122(a) or, if extended, within thirty days after the end of the period of the extension, the intrastate pipeline shall file with the Commission and the appropriate regulatory agency a report, under oath, signed by a senior official of the company, providing:

1. current information with respect to any matters required to be reported under paragraph (a) of this section;

2. actual total and daily volumes of natural gas transported; and

3. total revenues received and a complete statement of the manner in which such revenues were treated.

§ 284.127 Application.

An intrastate pipeline seeking Commission approval for a transportation arrangement for any fixed period in excess of two years under §284.122(b) shall file with the Commission a transportation rate schedule for the transportation service to be provided supported by information showing that the proposed rates and charges are fair and equitable, and an application, under oath, signed by a senior official of the company, containing the following information:

(a) the exact legal name of the intrastate pipeline and the name, title and mailing address of the person or persons to whom communications concerning the transportation arrangement pursuant to this subpart should be addressed;

(b) a description of the transportation service, including:

1. the identity of the parties;

2. the dates of commencement and termination of the service;
(3) the estimated total and daily volumes of natural gas to be transported;

(4) the points between which the natural gas is to be transported;

(c) a statement that the contract provides that the transportation arrangement is subject to the provisions of this subpart.

§ 284.128 Definition.

For the purposes of this subpart the term "appropriate state regulatory agency" means a state agency which regulates rates and charges for transportation by the intrastate pipeline on a cost-of-service basis.

§ 284.161 Applicability.

This subpart implements section 312 of the NGPA and applies to assignment by any intrastate pipeline to any interstate pipeline or local distribution company of its contractual right to receive surplus natural gas.

§ 284.162 General rule.

Except as provided in § 284.163, no assignment pursuant to this subpart may take place unless the Commission in its discretion approves, by order, an application for assignment filed in accordance with § 284.165(a) upon a determination that the assignment is consistent with the NGPA and this subpart and is necessary or appropriate in the public interest.

§ 284.163 Special rule.

An intrastate pipeline may assign, without compensation, to any interstate pipeline or local distribution company...
all or any portion of its contractual right to receive surplus natural gas without prior approval of the Commission, if:

(a) a state agency having regulatory jurisdiction over the intrastate pipeline which would be entitled to receive the natural gas in the absence of the assignment has determined that such natural gas exceeds the then current demands on such pipeline for natural gas;

(b) the price per MMBtu for the natural gas delivered in any month under the contract to be assigned does not and will not exceed an amount equal to the maximum lawful price per MMBtu prescribed under § 271.202; and

(c) the reports required under § 284.165(d) are filed with the Commission within 60 days of the commencement of deliveries under the assignment.

§ 284.164 Terms and conditions.

(a) Upon approval by the Commission of an application for assignment, filed in accordance with § 284.165(a) or in the case of compliance with § 284.162, an intrastate pipeline may assign, without compensation, to any interstate pipeline or local distribution company all or any portion of its contractual right to receive surplus natural gas. Rates charged for any gathering, treatment, processing, transportation, delivery or similar service (including storage service) performed in connection with an assignment under this subpart shall be computed in accordance with Subpart B of this part.

(b) Upon receipt and review of reports required under § 284.165(e) for assignments without prior Commission approval, the Commission reserves the right, by order to compel termination of the assignment if it determines such termination is required in the public interest.

(c) Any assignment under this subpart shall be subject to any further terms or conditions that the Commission determines prospectively, by rule or order, are appropriate and in the public interest to impose.

§ 284.165 Filing requirements.

(a) An application for authorization of an assignment pursuant to this subpart shall be filed by the intrastate pipeline, under oath, with the Commission, and shall set forth the following information:

(i) a description of the proposed assignment agreement, including:

(ii) the identity of the parties;

(iii) the estimated volumes of natural gas, on a total and daily basis;

(iv) the price per MMBtu applicable to volumes to be
delivered pursuant to the assignment and any other terms of
the assignment relating to price; and
(iv) the point of delivery;
(2) a copy of the contract which covers the natural
gas being assigned as surplus natural gas and any
ancillary agreements;
(3) evidence of the determination by the state
agency having regulatory jurisdiction over the intrastate
pipeline that the quantity of natural gas to be assigned
is in excess of the volume of natural gas available to
the intrastate pipeline and needed to satisfy then
current demands;
(4) an attestation that the particular supplies
of natural gas were not committed or dedicated to interstate
commerce on November 8, 1978; and
(5) the computation of any rates to be charged pursuant
to Subpart B of this part for any gathering, treatment,
processing, transportation, delivery or similar service
(including storage service) to be performed by the
intrastate pipeline under the assignment agreement.
(b) An intrastate pipeline or local distribution
company to which an intrastate pipeline would make an
assignment under this subpart shall file with the Commission
a statement, under oath, signed by a senior official of the
company, in support of the application under paragraph
(a), that to the best of his knowledge, information
and belief the price to be paid for the natural gas
under the assignment (exclusive of any rates to be
charged pursuant to Subpart B of this part) does not
and will not exceed the maximum lawful price applicable
to first sales of such gas under the NGPA and Part 271
of this Chapter.
(c) An interstate pipeline to which an intrastate
pipeline would make an assignment under this subpart shall,
in addition to the statement required under paragraph (a),
file, under oath, with the Commission a statement in support
of the application under paragraph (a) containing the fol-
lowing:
(1) the extent of curtailment, if any, anticipated
to occur in the period in which the natural gas is to be
delivered pursuant to the assignment;
(2) the effect which the price of the natural gas
is expected to have on the interstate pipeline's average
purchased gas cost in the period in which the natural gas
is to be delivered pursuant to the assignment; and
(3) the reasons why in the opinion of the inter-
state pipeline the assignment should be authorized as
necessary or appropriate in the public interest.
under an assignment made without prior approval of the
Commission pursuant to the special rule in § 284.163,
the following information shall be filed, under oath,
with the Commission:
(1) by the intrastate pipeline;
(1) a description of the proposed assignment,
including:
(A) the identity of the parties;
(B) the volumes of natural gas delivered and estimated
to be delivered, on a total and daily basis;
(C) the price per MMBtu applicable to volumes delivered
and to be delivered pursuant to the assignment and
any other terms of the assignment relating to price;
and
(D) the point of delivery;
(ii) a copy of the contract which covers the natural
gas being assigned as surplus natural gas and any ancillary
agreements;
(iii) evidence of the determination by the state agency
having regulatory jurisdiction over the intrastate pipeline
that the quantity of natural gas to be assigned is in
excess of the volume of natural gas available to the intras-
state pipeline and needed to satisfy then current demands;
(iv) an attestation that the particular supplies

(d) Within 60 days of the commencement of deliveries
under an assignment made without prior approval of the
Commission pursuant to the special rule in § 284.163,
the following information shall be filed; under oath,
with the Commission:
(1) by the intrastate pipeline;
(1) a description of the proposed assignment,
including:
(A) the identity of the parties;
(B) the volumes of natural gas delivered and estimated
to be delivered, on a total and daily basis;
(C) the price per MMBtu applicable to volumes delivered
and to be delivered pursuant to the assignment and
any other terms of the assignment relating to price;
and
(D) the point of delivery;
(ii) a copy of the contract which covers the natural
gas being assigned as surplus natural gas and any ancillary
agreements;
(iii) evidence of the determination by the state agency
having regulatory jurisdiction over the intrastate pipeline
that the quantity of natural gas to be assigned is in
excess of the volume of natural gas available to the intras-
state pipeline and needed to satisfy then current demands;
(iv) an attestation that the particular supplies of natural gas were not committed or dedicated to interstate commerce on November 8, 1978; and

(v) the computation of any rates charged or to be charged pursuant to Subpart B of this part for any gathering, treatment, processing, transportation, delivery or similar service (including storage service) performed or to be performed by the intrastate pipeline under the assignment agreement;

(2) by the interstate pipeline or local distribution company to which the assignment is made, a statement under oath, signed by a senior official of the company that to the best of his knowledge, information and belief the price for natural gas under the assignment (exclusive of any rates charged or to be charged pursuant to Subpart B of this part) does not and will not exceed the maximum lawful price applicable to first sales of such gas under the NGPA and Part 271 of this chapter.
