Class of works: I am writing in support of Class #2 (DVD Region Coding):  
Audiovisual works stored on Digital Versatile Disks ("DVDs") that are not  
available in Region 1 DVD format and access to which is prevented by  
technological measures.

Summary:

Disc name: Final Fantasy: The Spirits Within

The DVD had a region lock system on it that for some reason made it unable to play on my laptop. I checked into it and found that it was a common problem, and there was no way for me to play the DVD that I bought, on my entirely legal player, which was in the correct region, without using some kind of illegal method to circumvent it. This is an outrage that because of a badly thought out region locking scheme, I would be unable to play a DVD that I paid for in a player that's supposed to be able to play it.
