

[Proposed class or classes of copyrighted work(s) to be exempted]= 1 - motion pictures and other audiovisual works used privately  
2 - sound recordings used privately

[Brief summary of the argument(s) in support of the exemption proposed above]= It should be possible to perform the following Fair Use activities:

- 1 - Move content from one medium to another to accomodate technology changes.
- 2 - Move content from one playback/display device to another and make simultaneously stored copies among multiple playback/display devices just like a book can be moved about and copies can be made for private use.
