

[Proposed class or classes of copyrighted work(s) to be exempted]= Any circumvention for the purposes of "Fair Use". Please reference the Betamax decision for a review of what should constitute fair use.

[Brief summary of the argument(s) in support of the exemption proposed above]= Fair Use has been an institutionalized part of our individual rights since this country was founded (and earlier). While some feel that the DMCA protects their property, it also prevents Fair Use. The needs of corporations should NEVER be allowed to usurp the rights of the citizens.
