

To whom it may concern,

Hello. My name is Brien O'Brien and I am in support of the jailbreaking exemption of smartphones and tablets. I am an iPhone user. As much as

I love my iPhone, I depend on the jailbreak. There are hundreds of creative and useful 3rd party applications that are only available on a jailbroken

device, but the one I find most useful is "Magnifier for Safari". This simple app allows me to increase the font size of my mobile browser. Without this

useful app, I would not be able to use my phone! That is why I am writing, to ensure that I continue to have the legal authority to jailbreak my device!

Thank you.
