

Please do not make modifying/jailbreaking software illegal.

Because we jailbreak the iPhone and iPad we get 1000's of new tweaks and add-ons that we can add and change just about anything on our device..

I want to be able to modify any Smartphone, tablet, game console that I buy. or Jailbreak you would say.

I am just an advanced User who likes to modify his iPhone with tweaks, and themes that Apple for some reason does not do.

Since the A5 Jailbreak for the iPad2 and iPhone 4S has been released. there have been Numerous tweaks added to Siri the personal assistant on the iPhone 4S that you cannot get with Apple's stock firmware.

When apple finally decides to take ideas from the "Jailbreak community" it will get implemented but I why should I have to wait for months and months for a new Firmware release to get a tweak,app, or add-on that can do it now through jail braking?

I fully supper the JAILBREAKING of your device that you own. If i want to take my iPhone 4S out and run it over with my car that is my prerogative so I should be able to install any LEGAL software on my iDevice without facing any legal charges.

Thanks in Advance! FREE THE IDEVICES from APPLE!
