I am average US citizen that enjoys the use of my iPhone immensely, and being able to jailbreak it makes it infinitely more useful and enjoyable in my every day interactions. Apple does a wonderful job of building and outstanding iOS, but they are not all knowing and are not capable of including every possible combination and functionality to their devices. Please extend and make permanent the exemption to the DMCA to continue to allow the jailbreaking of smart phones and tablets. We pay a princely sum for the ownership of these devices and should be allowed to modify them as we see fit, as long as we are not doing anything illegal or infringing on any copyrights.
