

Hello,

I personally want jailbreaking to stay. I support jailbreaking of any device, smartphones/tablets and video game consoles. I'm just a user who loves electronic devices. iPhones, iPads, iPods, and PS3 need to have legal authority to jailbreak. I want to jailbreak these items because it allows me to have some control over my \$200 device. If I can't jailbreak I'm limited in what I can put on my device. I enjoy looking at the specs of the device and exploring a sort of unknown boundary. Without jailbreaking I can't use my device really. My home button is broken and with the jailbreak it's an easy get-around for it. Jailbreak helps me have a little bit of freedom and I love it. Please keep jailbreaking.
