

My comment responding to the "Proposed Classes of Works".

I am Kieron Dickson, a user of 'jailbreaks/jailbreaking' who is supporting the use of jailbreaking on smartphones and tablets.

I am a user who uses tweaks to make my device more simple to use.

The following devices I would love to be able to jailbreak would be iPhones, iPads, iPods, Android devices and phones and game consoles.

If I lose the ability to jailbreak/root (Android) I lose the ability to use my device at ease and jailbreaking/rooting provides me with a simple solution to make my device look beautiful and I'm a perfectionist and photographer. I like something I've purchased to work the way I want it to. I use jailbreaks to utilise tools, tweaks, file managers, themes and things that have a positive influence on my device. I do not use bad things such as apps which enable me to get free paid apps. The jailbreak app and tool advises you not to as well showing that it doesn't encourage negative behavior.
