

I am supporting both the jailbreaking of smartphones/tablets and the hacking of video game consoles.

I am a user and a hobbyist.

The devices I wish to jailbreak are: iPod, iPhone, iPad

The devices I wish to hack are: Xbox 360

If I do not jailbreak, I would lose my YouTube status, quick messaging to my family and friends, customization of my device, using a better GUI, being able to use Siri on my iPod Touch, unable to customize my Siri, be able to secure my device, and manage what I use.

Please keep these options available so that I may have a future in my hobby.

Yours Truly,
Kurt Grosser
