

Hello I am Matthew Gentle. I feel very strongly that jailbreaking should be kept legal. Please extend this exemption because I do a lot of developing using open source jailbreaking tools. I am only 14 years old so I am currently not yet capable developing my own program from scratch so this open source programing helps /alot/ apple does not allow apps into the app store if they are 'similar' to another app or if there is already an app on the app store with that functionality. So I would have a very hard time getting any of my apps into the app store, jailbreaking allows me to submit my apps without any approval required to cydia. Jailbreaking also allows me to custimize my device the way / I / want it. It is something that I am very passionate about. Please do not make jailbreaking illegal because it would ruin my ipod. i would hate it if it werent for jailbreaking.

I hope you realize that I am only 14 and to be writing this letter shows how much it means to me to be able to jailbreak my ldevices.

-sincerely,  
Matthew Gentle
