RE: Comment on Exemption to Allow "Jailbreaking" of Smart Phone \

I am a User of iPhones on the ATT network.

I frequently travel to Europe and have "unlocked" my iPhone to use in Europe with local SIM cards. I understand I installed "jailbreak" software that allows my phone to use a local country's SIM card, and still have full functionality to the other programs and apps installed.

I want to be able to continue this use legally. Please extend permanently the exemption for 'jailbreaking" to legally permit this use.
