

The Copyright Office should be listening to the public. We protested SOPA and PIPA, there are numerous other bills we will protest too. The idea is that we want to have freedom for the use of devices, songs, and voice that is allowable by law and our rights. Why is this being taken from us?

My name is Shannon. I live in Austin, TX. I want my freedom and I will fight for it. I will do what I want with software and upload and download what I want to my devices. I don't think the apps Android has will make it very far if everyone is scared they will be arrested.

I had a heated discussion the other day with family. We understand art and music and all things “pre-made” are going to become the art as we know it today. Someone will take Picasso's paintings, put them on a wall, and call it “their” art. There is no way to stop. The idea that Picasso should be cited remains, but she would not have art, if she didn't use his work. Don't abandon this idea to use things in the world. We need the freedom of expression!!

Thank you,
Shannon
