

I support the jailbreaking of Smartphones/Tablets, and game consoles.

I am a hobbyist and a user, i have been doing part time repairs and jailbreaking since iOS 2.0 was released, jailbreaking is a huge part of this.

If i had to choose just 1 device to be allowed jailbrokem it would be the iPhone.

If i wasnt able to jailbreak, life would be grim, children would cry and business would come to a stand still.
