Identification: Jailbreaking and Rooting consoles and devices

Jailbreaking and rooting devices is not a crime within the United States. All devices that consumers pay for should be theirs in every way, and having full access to a device should be a consumer's right. I urge you to allow Jailbreaking and rooting to remain a free and legal service since it is a consumer's prerogative to have access to a device that the consumer paid for. Thank you for your consideration in this matter.

Sincerely,

Tim McFarland
