

I do not currently jailbreak my phone, mostly because I do not know how, but that is going to change very soon as I can not upgrade my phones OS to the latest release for whatever reason. So I believe jailbreaking our bought and paid for devices should always be our option. It is no different than buying a computer with Windows on it and changing it to Linux because it is a better, more secure OS. In this world of safety and security issues we should be allowed to do what we need in order to protect ourselves not to mention being able to get the most out of our high dollar devices. This should be our legal right!
