

I am Tristen Teixeira I am an Academic at the moment, I am not a developer or hacker of any sort, I use the jailbreaking software for unlocking purposes as well as adding modifications to my iPhone iPod and iPad, I support apple a lot, we are Apple people, everything technical we own is Apple products. I use the software to unlock my iPhone as it was bought from America and I live in South Africa, I also don't use the software with any intentions in mind, if I find something I find cool I put it on for fun to see what people are coming up with these days. I wish to make all devices legal to jailbreak
