Spotify++ | Spotify Plus

HOME › HOW TO

Music streaming is one of the top activities for mobile device users and Spotify has to be the most used streaming service of all. Boasting over 140 million users every month, more than half of these use the free version of the service but suffer from popup ads and limited features. The rest pay out almost \$10 every month for the privilege of not having the ads and for getting better features. Not everyone has pockets deep enough to justify this expense every month but, luckily, we now have **Spotify++**. This is a modified app with no connection to the stock app, containing all the premium features without the need to pay a subscription. We're going to be showing you how to download **Spotify++** but first, here are some of the features you get.

Image : Spotify pPlus Download Tutorial

Download Tutorial

Spotify++

© Download Spotify.com

AdChoices

Install

Download Cydia

Spotify++ Features :

As well as the features of the free version, you also get:

- None of the irritating ads

- Unlimited track skips
- Unlimited track scrubbing

- Top-quality sound streaming
- Free to download
- Free to use forever

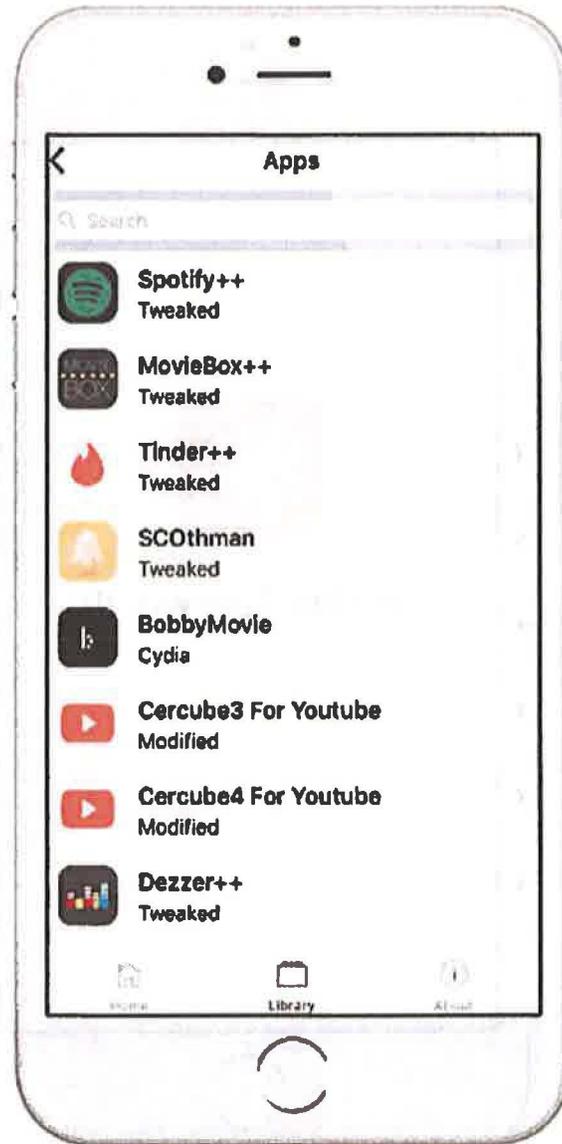

How to Download Spotify++ :

Now we can look at how to download **Spotify++**. You are going to need Cydia for this so, for those of you who can install Cydia, here's how to get Spotify++:

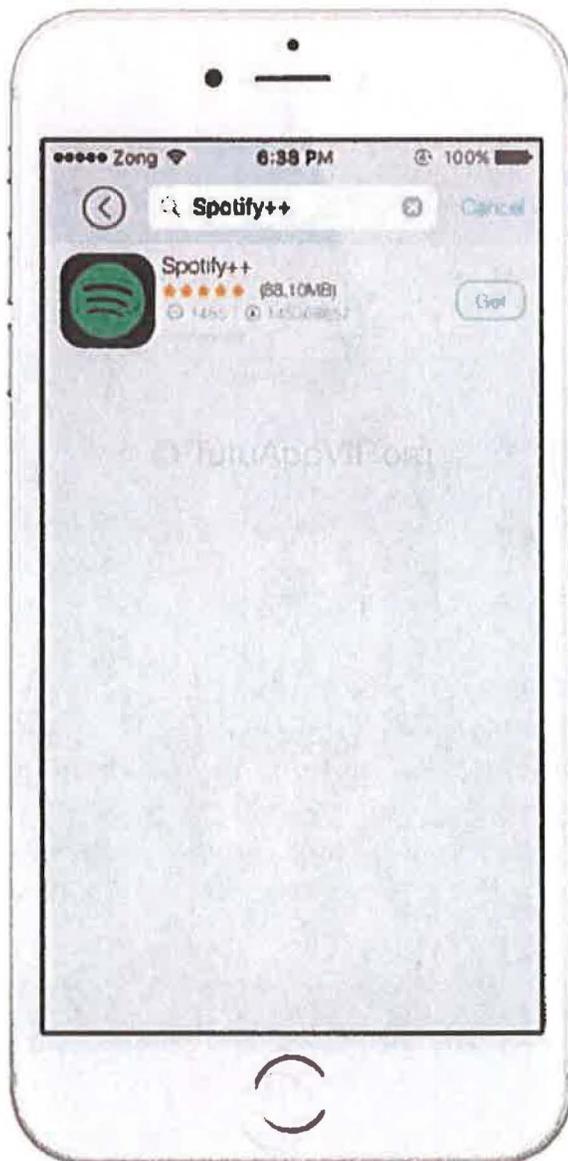

1. Follow the tutorial at the link to [download Cydia](#) on your iPhone or iPad

2. Launch Cydia on your device
3. Using the search facility, look for **Spotify++**

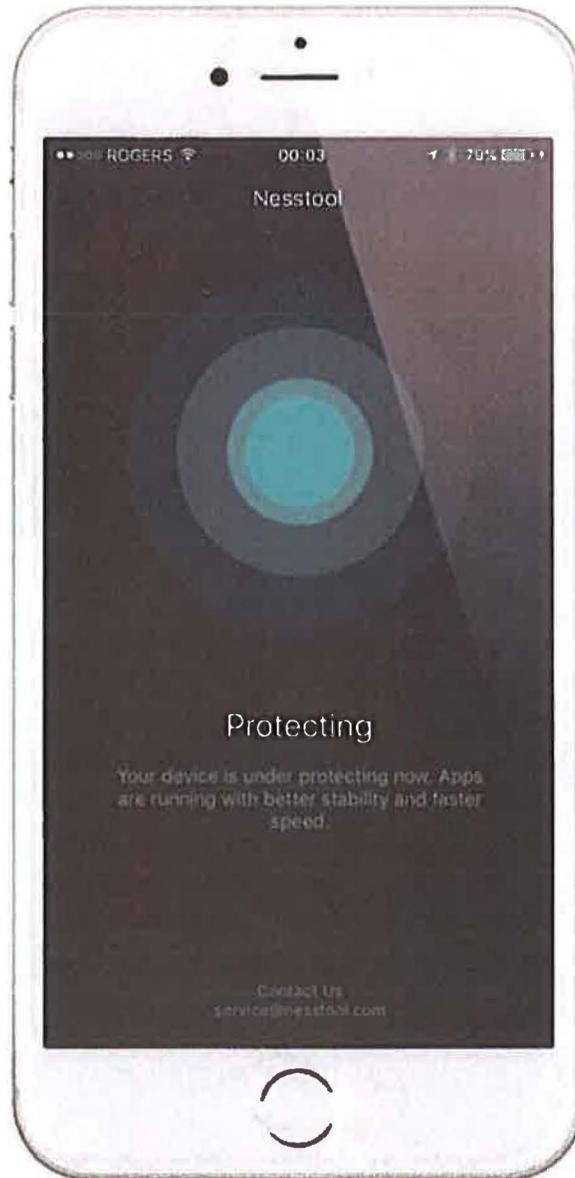

4. Choose the download that matches your iOS device and iOS firmware version
5. Wait for Spotify++ to be installed on your device and then close Cydia
6. Tap the **Spotify++** [ext link] icon on your home screen to start using the app

How to Fix Spotify++ Not Working :

Because **Spotify++** is not an official app and can't be found in the app store, you can expect Apple to revoke the app certificate that lets it run. This will cause the app to crash and, while you may reinstall it, Apple will just revoke the certificate again. You may stop this from happening by using a **VPN** tool that hides the app certificate and protects it from being revoked by Apple. That tool is called **NessTool** [ext link] and you can find all the information you need at the linked article.

Spotify++ is just one of the useful apps that you will find in Cydia, the ideal one for music lovers everywhere who don't want to pay for the premium features in the stock app. If you can't install Cydia right now but are missing the tweaks and apps that you used to enjoy, then take a look at one of the third-party app installers that have recently been released to try to replace Cydia. There are plenty of these installers, such as Cyrus Installer, **FlekStore**, **TweakBox**, and **AppValley** so try one and see how you get on with it.

For those who try **Spotify++**, tell us how you get on with it and follow us on Facebook for more jailbreak updates and other news.

Download HD Cinema

The HD Cinema app lets you watch and download HD movies and TV shows for free on your iPad, iPhone, or iPod. Download HD Cinema to your Apple device running iOS 9.0.2 or lower. There are many sites that claim you can download HD Cinema without jailbreak, however unless you are running iOS 8.0 or lower then you will not be able to install HD Cinema unless you jailbreak the device (Apple fixed the workaround). This tutorial will show you how to easily jailbreak your device and install HD Cinema.

Unable to Download App
"HDCinema" could not be downloaded at this time.

Done

Retry

HD Cinema offers the latest movies and TV shows. You can watch videos in 1080P or you can download the videos to your device to watch later. HD Cinema is a good alternative to Movie Box and offers a huge selection of films.

Pandora iOS 11.1.2 Apps: Pandora Downloader, Skips, Essentials, Enhancer Cydia Tweak for iPhone, iPad

▶ AdChoices

Free Pandora

Download for Free

There is a lot of things for users who love music. You can enjoy iTunes Radio, Spotify, iHeartRadio and Songza on your iPhone, iPad Mini, iPad Air or iPod Touch. Pandora is also such music streaming service which is hot favorite in all the users whether they use iOS device or Android smartphone.

Fortunately for jailbreak users, there are some hacks that make most of these service free of charge and without limitation. For example, you can use Cydia tweaks to get free songs and couple of features from Pandora Music service which is not possible directly.

▶ AdChoices

Download for Free

Cydia Download

If you've jailbroken iPhone, iPad or iPod Touch, you can install below popular Pandora apps such as Pandora Downloader, Enhancer, Unlimited Skips and Pandora Essentials. All of these Pandora collection apps have their own set of features which can be used on jailbroken device only.

Pandora Downloader: It is popular Cydia tweak which is available on jailbreak store which allows user to download Pandora songs and music. Pandora Downloader Cydia tweak is must have for all of those who love to listen Pandora music.

Make your website happen

Our all-in-one platform gives you everything you need to run your business.

Squarespace

PandoraEnhancer: Do you feel that you're missing any feature from Pandora app? PandoraEnhancer adds couple of great features to Pandora. You can get unlimited skips, download music from Pandora and allows user to block ads during listening songs on Pandora.

Pandora Essentials: There are couple of features which you won't get normally such as Unlimited Skips, Quality adjustment, navigation of history and a lot more. Pandora Essential Cydia tweak brings these features on your iPhone or iPad using Pandora Essentials.

In short, using these Cydia tweaks, you can use your iPhone or iPad like a music hub with Pandora. To use Pandora Music service properly, you should look into these Cydia apps and jailbreak hacks.

Unpack with Spectrum

Moving is hard enough. Reward yourself with free installation, WiFi setup & DVR service

How to Use Cydia Apps to Download Free Music

by [blanka](#) • [2 Comments](#)

advertisements

Music is something we could not live without in our daily life. If you are using a jailbroken iDevice, you can get tons of free music from [Cydia apps](#). Here I will show you how to use Cydia apps to download free music in a few simple steps. All it takes is just a few minutes to load your favorite music. Adele, Lady Gaga, Beyonce, Rihanna, Alicia Keys, Usher, Eminem, and Jenifer Lopez's songs are just minutes away from your iDevice.

Artist: Santana feat Rob Thomas
Year: 1999

Search Queue Charts My Music Now Playing

Music Box – One best Cydia apps for music lovers. Simply search for your favourite music and download it

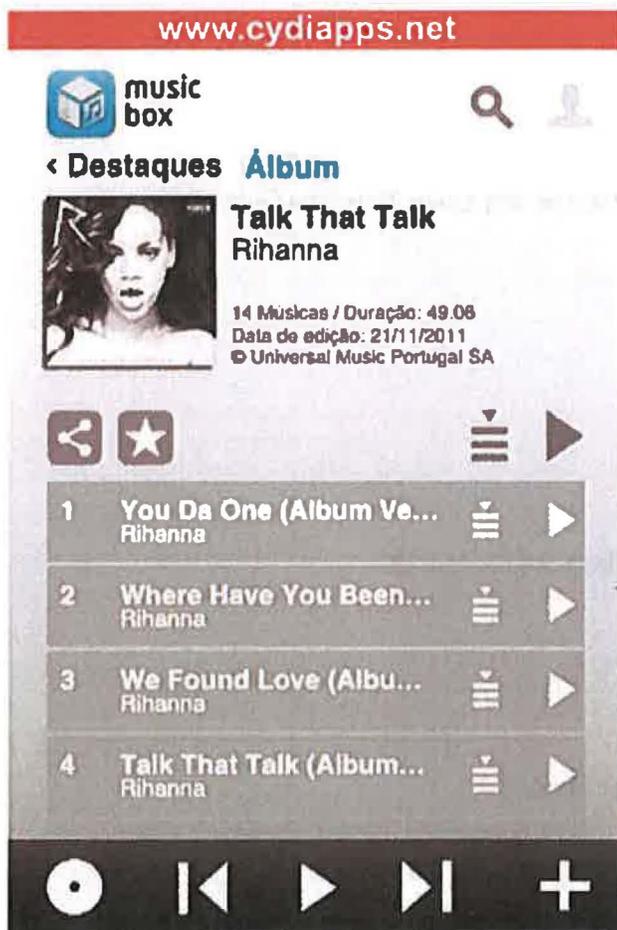

for free.

Step 1: I know I've repeated this step for many times since day one, but still I have to pay the respect to my readers who have never use Cydia before. Therefore, here I will repeat it again. First of all, you must jailbreak your iPhone, iPad, or iPod Touch. If you haven't done so, you can simply follow the steps here: [download Cydia and get it installed in five minutes](#), otherwise, you can skip this step.

Step 2: Launch your Cydia by tapping the Cydia icon on your iDevice. Go to **Manage -> Sources**. On top right of your screen, tab **Edit** and then **Add**.

Step 3: You will be prompt a text box to enter the Cydia/APT URL, key in the BigBoss repo: **<http://apt.bigboss.us.com/repo/files/cydia/>** (see also: [list of Cydia repositories from A to Z](#)). You can then search for "**Music Box**" in the search box.

Step 4: What else other than tap the install button?

Alternative way to install Music Box: Download the deb file manually at [here](#) and install the deb file on your iDevice. If you never manually install any Cydia apps to your iDevice, you can follow my previous articles [How to manually install Cydia to iPhone, iPod Touch, and iPad](#). The steps are almost similar.

Other recommended music related Cydia apps: MusicBanner, SiriLoveLyrics, Awesome Music Controller, and SBMusic.

Now you can say goodbye to the old fashion way of downloading music to your iDevices through a computer. You know what, the happiest thing about this Cydia app is free, totally FREE.

Best Cydia Tweaks for Apple Music: Mousai, MusicMod, and Audicy

Last Updated on February 10, 2018 by Staff

If there is anything I could change from iOS 8.4 to iOS 10, it would be the Music app or known as Apple Music. With every major firmware update, Apple tries to change things up a bit. Be it redesigning the Control Center, lock screen, or enhancing their stock applications.

That's understandable to me but I think the Music app was just fine before it was rebranded and redesigned in iOS 9. For users who are still using iOS 8.3 or below, you will know exactly what I'm talking about.

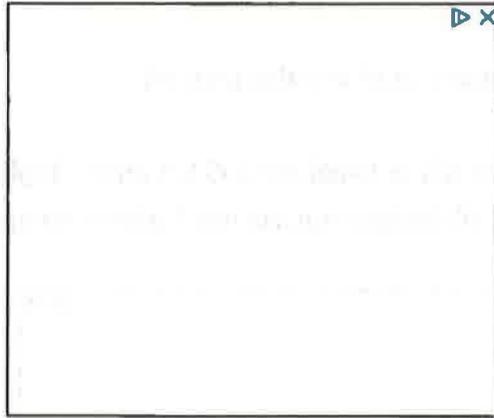

Picture [credit](#)

Contents

- [I hate the new Apple Music](#)
- [Erato \(formally Mousai\)](#)
- [MusicMod](#)
- [Audicy](#)
 - [How to Import Media Files directly on your iPhone](#)
- [Erebus](#)

I hate the new Apple Music

With even more enhancements in iOS 10, the Music app now looks completely different. Not to mention that Apple Music now put restrictions on its users by displaying tons of useless elements, and most importantly, a limited number of skips you can make per hour.

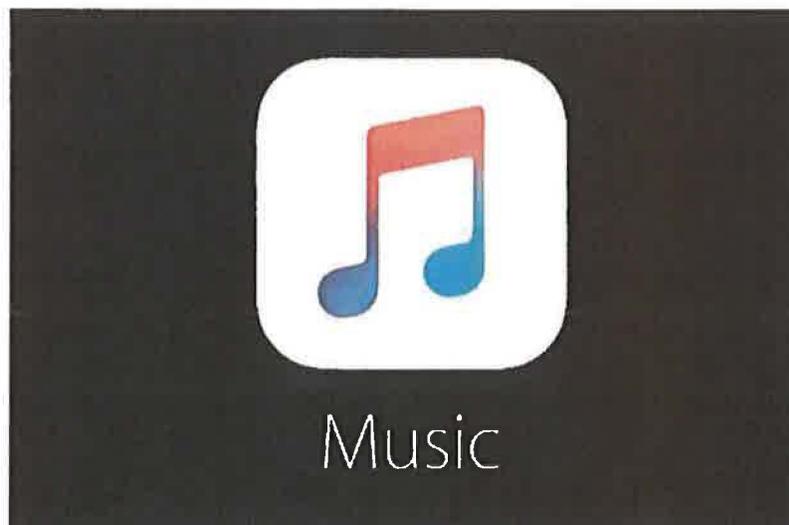

Below are four of my favorite Cydia tweaks for Apple Music. You can now partially revert to the old app and enjoy some of the features that Apple removed.

Erato (formally Mousai)

There are tons of jailbreak tweaks on Cydia that let you bypass limited skips on Pandora, Spotify, and remove ads or modify the application. That's exactly what Mousai tweak is bringing to Apple Music: unlimited amount of skips you can handle.

And a couple more includes the ability to hide certain features that might cause annoyances in the app.

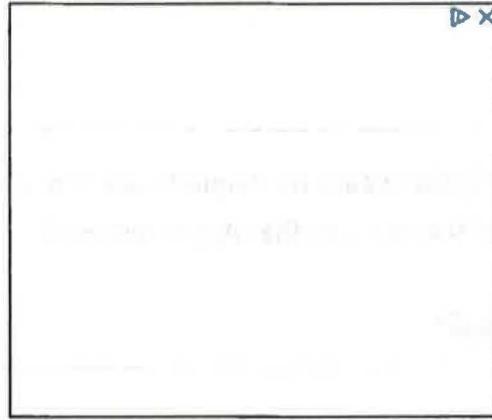

Full list of features:

- Hide the Connect tab
- Hide the Arrow on album art view while playing (native swipe gestures are still enabled)
- Hide the status bar while playing music
- Unlimited Radio Skipping

- Hide recently played
- Hide the radio tab (because not all use this feature)

Mousai is currently available as a free tweak for iOS 8.4 on the BigBoss repo. Users can install it from Cydia and then adjust all the Settings via the Preferences app.

MusicMod

Unlike Mousai, MusicMod doesn't give you any additional features.

Instead, it will allow you to get rid of elements that you do not like in the new Apple Music. For instance, bring back the recent library, recent playlist, and playback history.

Want more? Read below.

- Hide Connect, Radio, and "for you"/New Tabs

- Hide recent radio stations played
- Hide now playing down arrow
- Disable the background blur
- Hide status bar in either the whole app or now playing window exclusively
- Remember song and app position from last session
- Disable check mark animation HUD
- Allow rotation (beta)

If you want your Apple Music to look nice and neat, MusicMod is your handy man to customize and and clean up the application.

Audicy

iTunes isn't the only software that can be used to import music, audio, and video to your iPhone and iPad. There are many alternatives out there that work beyond what we expected.

For example, a new jailbreak tweak called Audicy that allows you to import any media files right on your iOS device, meaning no need for iTunes.

It's now very easy to take control of the app, download music and videos then import them directly to your Music app. This is extremely useful if you want to listen to music or watch movies offline (while on the road, for example).

Ultimately, the primary goal of Audicy is not to get iTunes involved or require users to connect their device to a computer (Mac or Windows).

How to Import Media Files directly on your iPhone

1. The first thing you want to do is open Cydia
2. Since this is not a free tweak, you will have to buy it (\$2.99). Switch over to the Search option and type in Audicy
3. After the purchase is completed, tap on Install and wait

4. Respring your iPhone or iPad

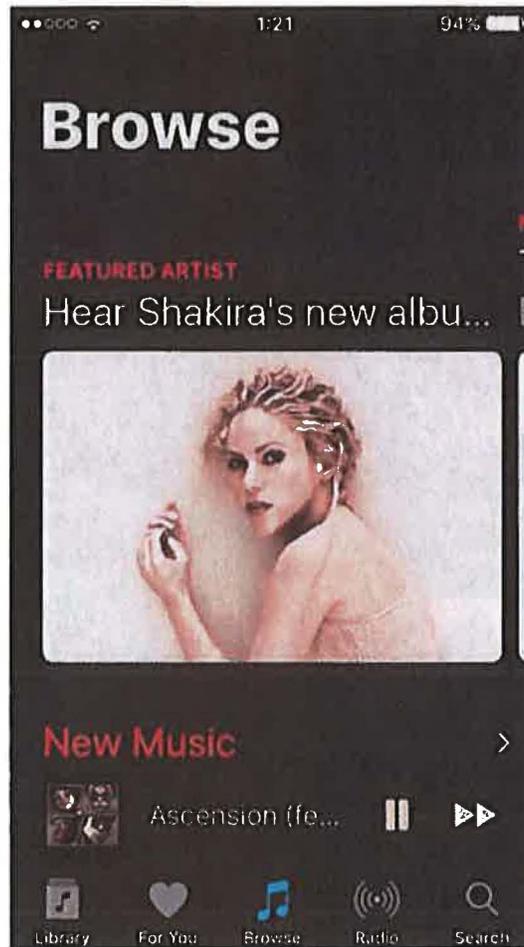

Audicy is a standalone app instead of built-in feature for an iOS downloader. Look for the application on your home screen and launch it.

Using this tweak is just one way of doing things, users may also install [YouTube++](#) which also included the option to download YouTube videos as either audio or original video and then import them into the Music or Video app.

Erebus

Everyone seems to love dark mode these days. [Twitter has it](#) as their default feature, you can [partially do the same with Snapchat](#), and now comes Apple Music. Erebus is a new jailbreak tweak that brings dark mode to the Music app in iOS 10.

Unlike other "dark mode" packages that already exist on Cydia, this one was designed specifically for just your stock Music app. Furthermore, it doesn't create any problems if you also have any tweaks above installed.

Erebus is now available on the BigBoss repo for free. Once enabled, you can configure the colors and settings to your liking.

Tl;dr

NAME	PRICE	SCORE
Mousai	Free	10
MusicMod	Free	9
Audicy	Paid	9.5

Can anyone help with find an alternative way to sync my music into my phone. I know it'd still require iTunes. But last I checked there was a way. I lost the link. So if anyone can please help out here. It'd be much appreciated.

Best Tweaks for Cydia Tweak for iOS 10

Introduction

The Cydia ecosystem has grown significantly over the years, offering users a wide range of tweaks to customize their iOS devices. This article highlights some of the best Cydia tweaks available for iOS 10, specifically focusing on music-related tweaks like Mousai, MusicMod, and Audicy.

These tweaks offer various features to enhance your music listening experience, such as playlist management, audio quality control, and more.

Check out the list below for more details.

1. **Mousai**: A powerful music management tweak that allows you to create and manage playlists, albums, and stations. It also offers features like shuffle and repeat controls.

2. **MusicMod**: A tweak that lets you modify the audio output of your music, including volume, bass, and treble. It also provides options for equalization and audio normalization.

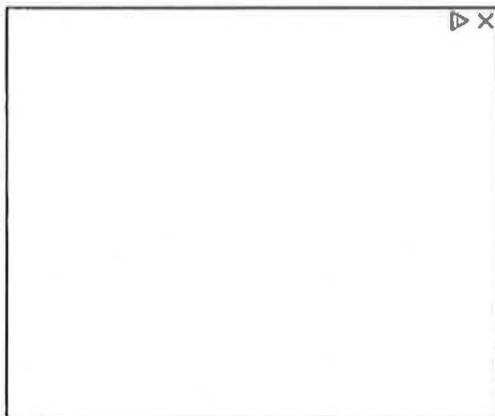

3. **Audicy**: A tweak that provides advanced audio processing options, such as noise reduction, reverb, and delay. It's a great choice for users who want to enhance the sound quality of their music.

Best YouTube Cydia Tweaks for iOS 9 & 10: Cercube 3 vs. YouTube++

Last Updated on September 11, 2017 by Staff

YouTube recently hit a milestone. According to [a report](#) from TechCrunch, people are watching a billion hours of YouTube videos each day. That's huge if you asked me. Who would disagree with me that YouTube is the ultimate place for all sort of entertainment? Not just entertainment but also a hub for educational clips, how-to videos, and much more.

The only problem with YouTube is its limitations in features, especially on the iPhone and iPad.

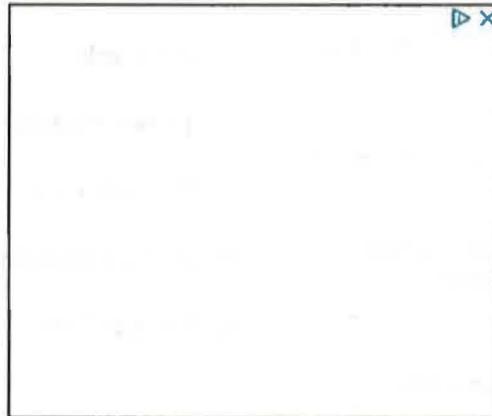

Here is an example:

If you want to download a YouTube video from your computer, it's as easy as copy and pastes the URL into services like ClipConverter and VideoGrabby. However, the same concept doesn't apply to an iOS device. If you want to download your favorite YouTube videos on your iPhone, it will require much more work. It takes longer because you have to download an additional app from the App Store and watch their annoying ads before you can get to the download section.

I'm sure they can easily hit more than a billion minutes of views (a day) if users get the functionalities they requested. Unfortunately, none of that is coming soon.

In this post, I'll help you break free from all that hassle of downloading videos from YouTube and improve the way the app works so that you can spend more time watching your favorite YouTubers.

Contents

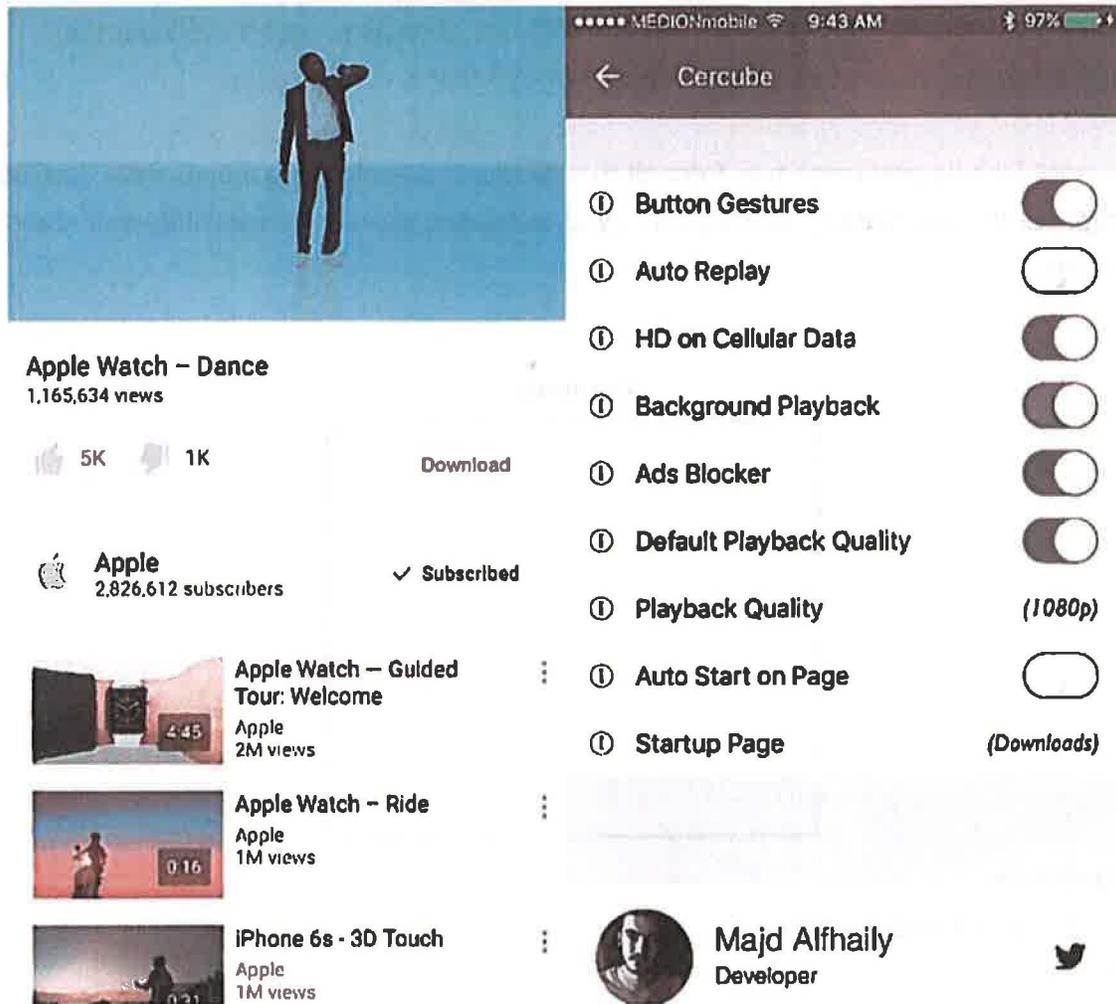

- Cercube 3
 - Cercube 4 Without Jailbreak
- YouTube++
 - Is there an IPA version of YouTube++?
 - Why You Should NOT Pay For YouTube Red
- 3. NoYoutubeDoubleTap

Cercube 3

Those of you who previously used Cercube will know how it function as well as what it has to offer.

This jailbreak tweak not only allows users to download YouTube videos on their iOS devices but also

- Block ads
- Enable HD mode while your device is using cellular data
- Play video in the background (you can still listen to the audio while using another app or lock your device)
- Set custom settings for YouTube

What's in Cercube 3 tweak

- Download any video in any available quality. (from 144p to 1080p).
- View, manage and share all your downloads in Cercube's download manager.
- Import downloaded songs and videos to your Music Library, or Videos app.
- Block all promoted and video ads.
- Send downloaded videos via AirDrop to other devices.
- Background playback capability for both streamed and downloaded videos.
- Downloaded videos are displayed within a beautifully crafted downloads manager that shows all the available information.
- Select which page to display when launching the YouTube app.
- Unique short-hold button gestures.
- HD streaming on mobile networks.
- Auto replay videos.
- Custom Startup Page

As you can see, the new YouTube Red that cost on a monthly basis will only include some of these features while these has been around on jailbroken devices for quite some time now. This gives new users another reason to jailbreak their device and ignore the YouTube Red service.

If you want to download and save YouTube videos on your iOS 9 device or an earlier version, head over to Cydia and install Cercube 3 from the BigBoss repo for free.

Cercube 4 Without Jailbreak

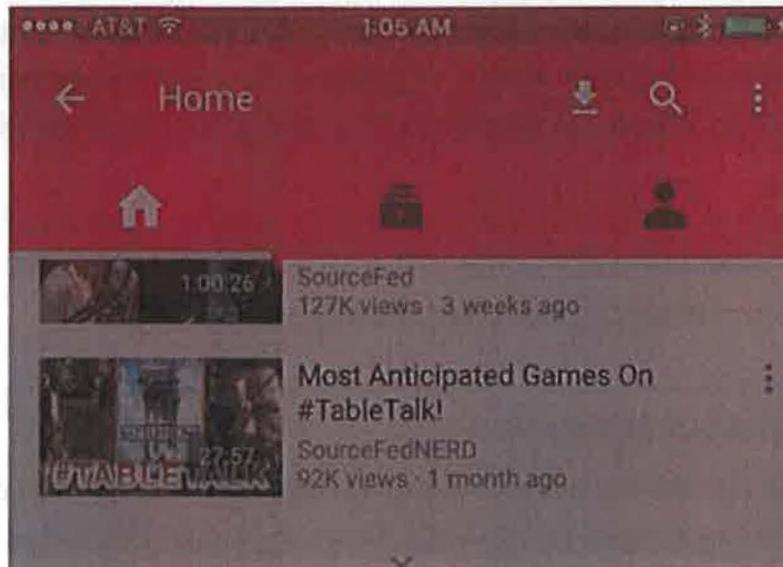

The developer of Cercube has made his tweak available for non-jailbroken devices. To make this possible, he compiled it into a .IPA file which you can sideload using Cydia Impactor.

Here's how you can install it:

1. Click here to get the Cercube v4.0.9.8 (as of writing this)
2. Remove the original YouTube app on your iPhone
3. Connect the device to your computer. Make sure Impactor is already installed
4. Drag and drop the .IPA file from Step 1 to Cydia Impactor
5. Enter your Apple ID and Password

Unlock your iOS device and open the YouTube app.

YouTube++

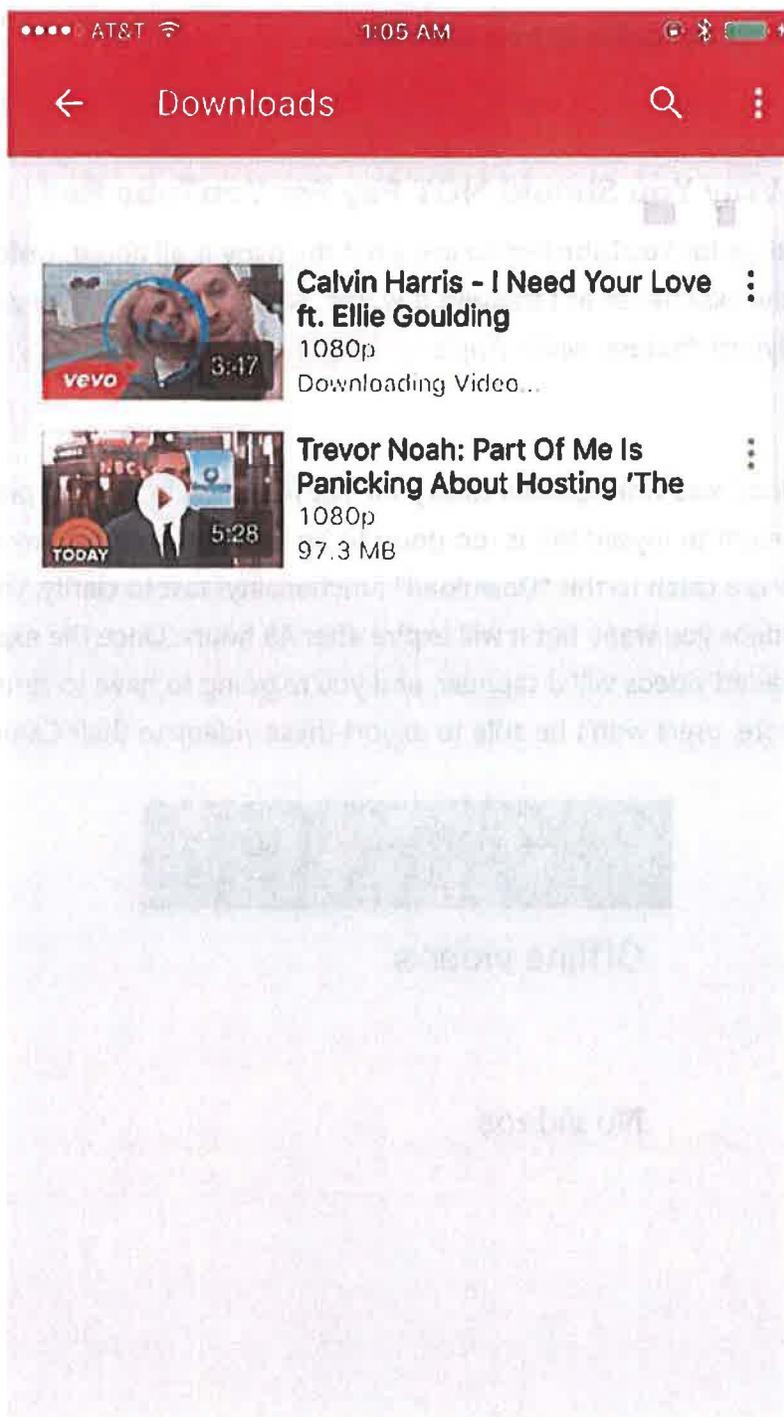

Calvin Harris - I Need Your Love ft. Ellie Goulding

- 1080p
- 720p
- 480p
- 360p
- 240p
- 144p
- Audio
- Cancel

UnlimApps is the company behind a bunch of packages for social apps such as [Snapchat](#), [Twitter](#), and [Instagram](#). Recently, they have updated their YouTube++ tweak to work with iOS 9 and 10.

Just like Cercube 3, this tweak makes it easier for users to use YouTube while having some of their most wished features such as background playback, support for videos download, in-app web browser, disable age restrictions, and much more.

After downloading a video, users have two options: either store it inside the YouTube++ downloader or save it directly to their Camera Roll.

YouTube++ is also available on Cydia's BigBoss repo for free. If you want to get the latest version when it comes out, I recommend you add their official repository at <http://beta.unlimapps.com/>.

Is there an IPA version of YouTube++?

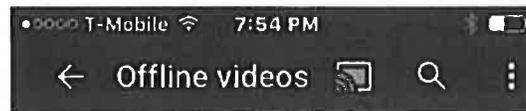

Not everyone is willing to jailbreak their iPhone or iPad. If you are that person, don't worry. You can still install YouTube++ through Cydia Impactor.

Click [here](#) to see the full guide on how to do that.

Why You Should NOT Pay For YouTube Red

I recently signed up for YouTube Red to see what the hype is all about. Unfortunately, it didn't provide the experience as I thought it would. Sure, they finally give you the background playback feature, which Apple no longer support on their iOS 10 Safari app.

The 'Offline Videos' was what got me to pay for YouTube Red in the first place. In the beginning, I thought to myself this is too good to be true. It turned out my prediction was right. There is a catch to this "Download" functionality. Just to clarify, you can save any YouTube videos you want, but it will expire after 48 hours. Once the expiration hits, all your downloaded videos will disappear, and you're going to have to re-download them. Furthermore, users won't be able to export these videos to their Camera Roll.

Offline videos

No videos

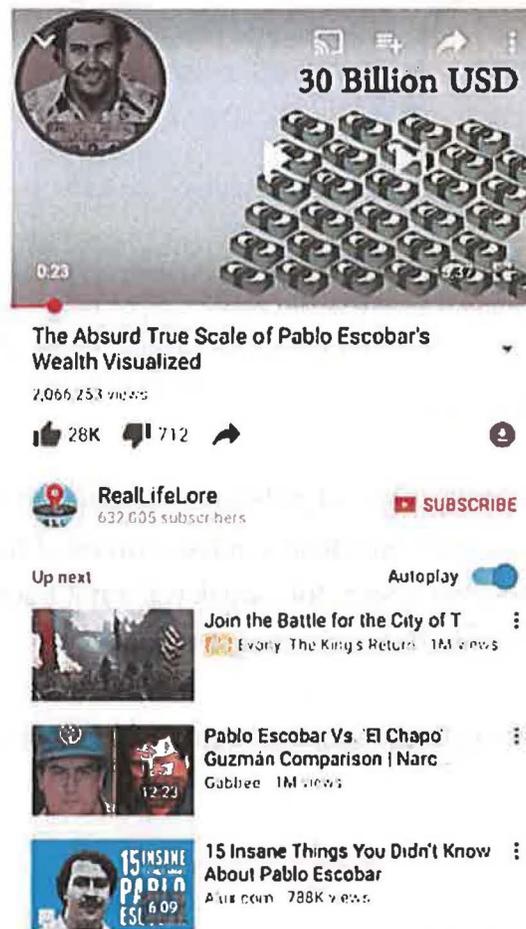

Now that you know more about what YouTube Red have to offer, please think twice before you pay for the monthly subscription.

The tweak below has been added in corresponding to one of the recent updates.

3. NoYoutubeDoubleTap

YouTube has been focusing a lot on improving the user experience for its iOS app. Within the past couple of months, they have introduced numerous features that make it easier for people to use the application.

Last month, a higher resolution video options were added. Despite YouTube effort to improve its app, some of the updates often upset users. If you recently updated the [YouTube app on your iPhone or iPad](#), you will notice a minor change to the video player. The progress bar has been minimized, and that makes it harder to scroll through the video.

In additional, users can now skip through the videos or go backward (by 10 seconds) by double tapping on the screen. To quickly move forward or backward in a video, you just have to double tap on either the right or left side of the screen.

For those who have a habit of tapping on the video screen every once in awhile will experience a lag in the new update and onward. That's because YouTube will now wait and see if you will double tap to skip or not. Therefore, it will slow down to understand your needs.

I honestly don't find this new skipping feature useful since I use the progress bar on a daily basis. If you feel the same, there is a way to disable the new skipping +/- 10 seconds in the YouTube app.

NoYoutubeDoubleTap is a recently released jailbreak tweak by Ben Giannis to help you turn off the double tapping gesture when watching a video. Instead of having to experience the lagging when you tap on the video screen, this tweak will put it back to normal mode. As a result, tapping in any videos on YouTube is fast again.

Once you installed it from the BigBoss repo, the tweak will take action right away. No need to configure anything.

Why is it not possible to install poke go++ along side YouTube++, it is only one or the other but not both?

Any solution will be great

[MENU](#)

Download Cydia

[HOME](#) › [CYDIA](#) › [DOWNLOAD](#) › [HOW TO](#)

For those looking to download **Cydia** on iOS firmware , follow the below tutorial for step by step process. For people who don't want to go through the hassle and want to download Cydia directly **without PC** , read the linked tutorial. Please note that we are always working to improve Cydia every day. So keep reading this post for more information on Cydia download .

Image : Cydia Download on latest iPhone

How to Download

Cydia

© CydiaiOS7.com

[Free Downloader for PC](#)[PC Windows 10](#)

Supported iOS Versions :

- **iOS 7**
- **iOS 8**
- **iOS 9**
- **iOS 10**
- **iOS 11 [Latest]**

Compatible iOS Devices :

Cydia is compatible with every single model of **iPhone**, **iPad** and **iPod Touch**, provided it can be jailbroken. It continues to grow as more and more developers join in and develop their own tweaks but it's no longer just for iOS users to have all the fun.

How to Download Cydia :

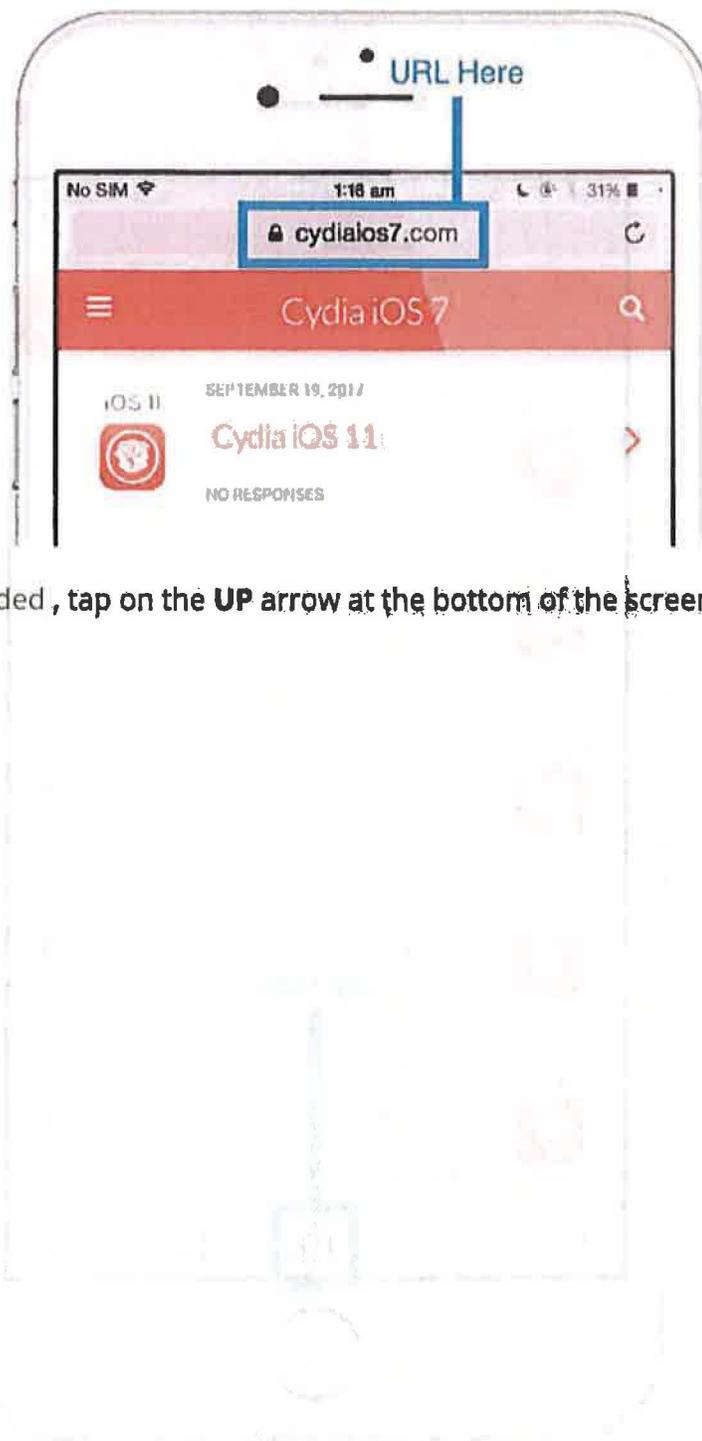

There are several ways to download Cydia on your iPhone running iOS . All the methods are explained below in details. More methods keep adding as they are released.

Method 1: Safari Browser [Easy Method]

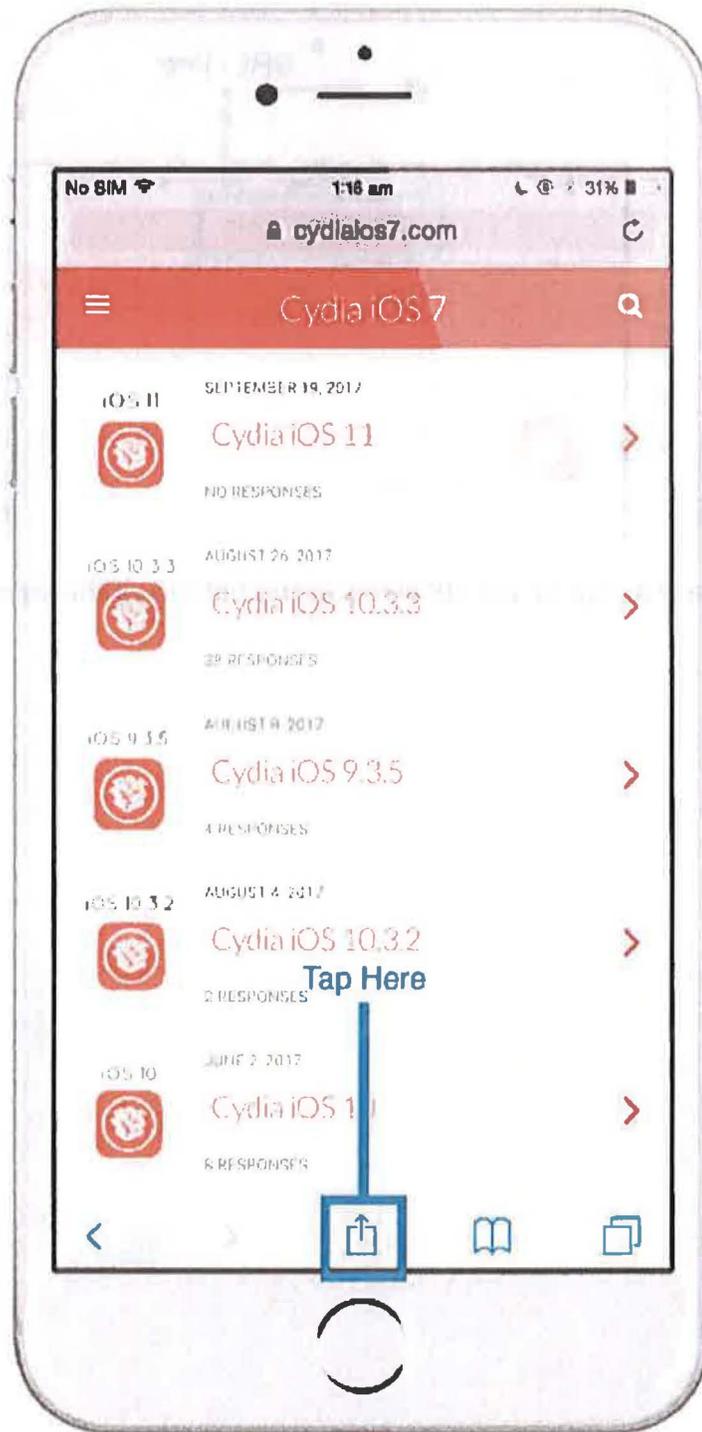

1. First launch safari

2. Open the website with the url [cydialos7.com](https://www.cydialos7.com) and tap on that .

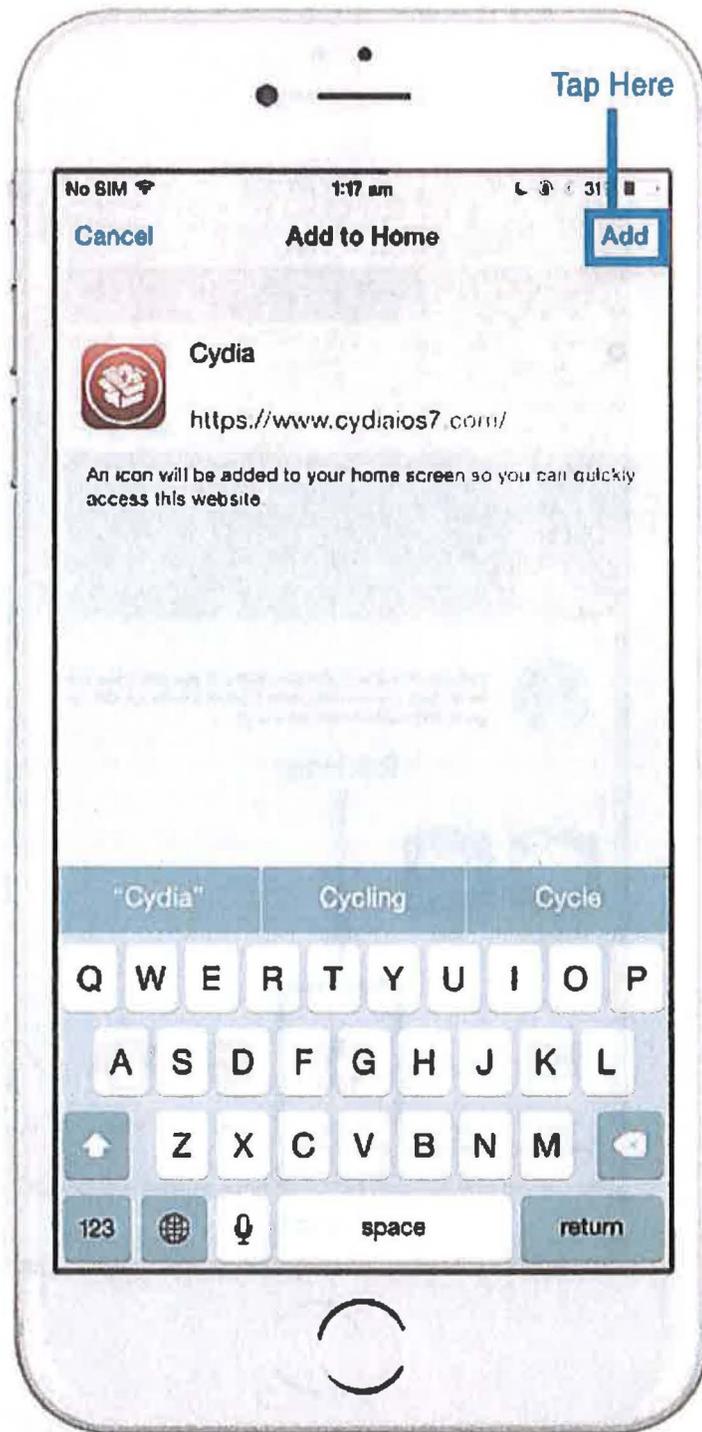

3. After the page is loaded , tap on the **UP** arrow at the bottom of the screen .

4. This will open up a new option window where you can choose "Add to Home Screen" as shown below. Tap on that

5. Now you get the option to save the Cydia app icon , rename it to **Cydia** .

6. After that you will get Cydia icon on your iPhone , iPad home screen . Tap on it to launch it .

Video : Here is a step by step explanation of the above process

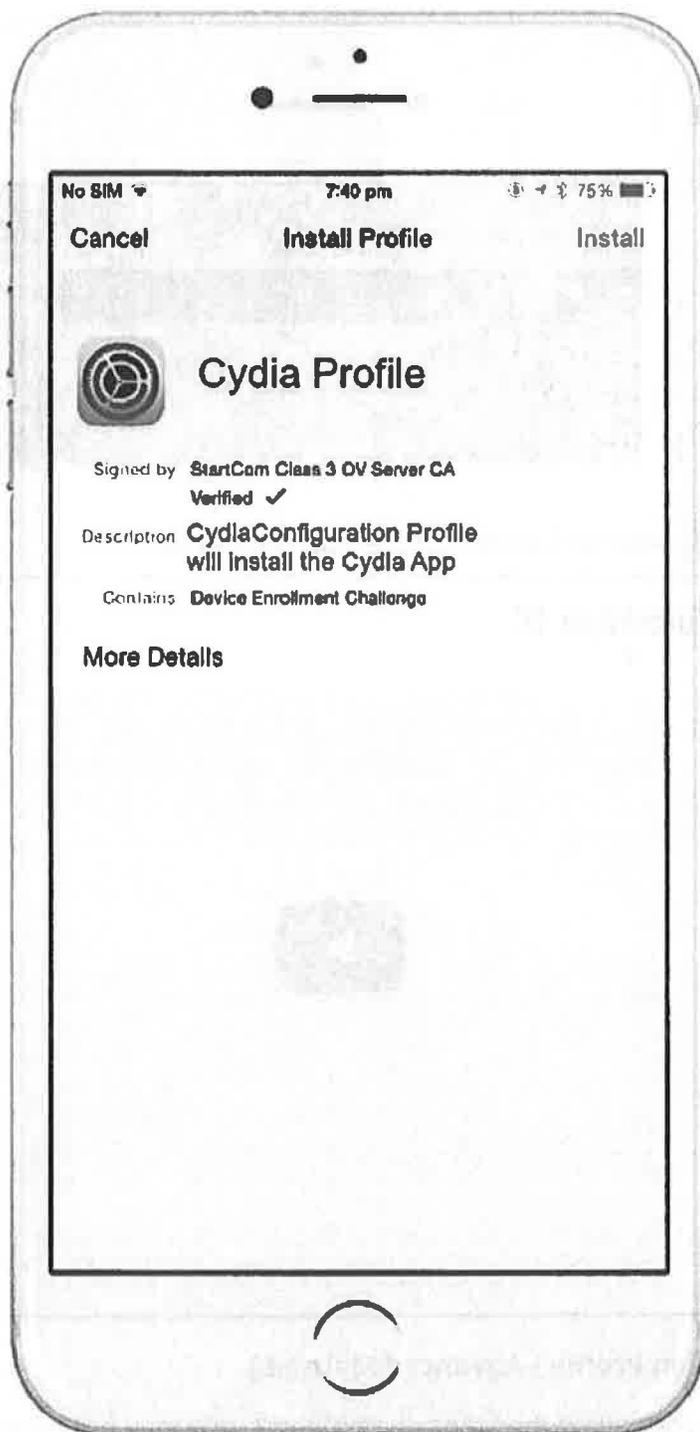

Download Cydia Tutorial in 4K

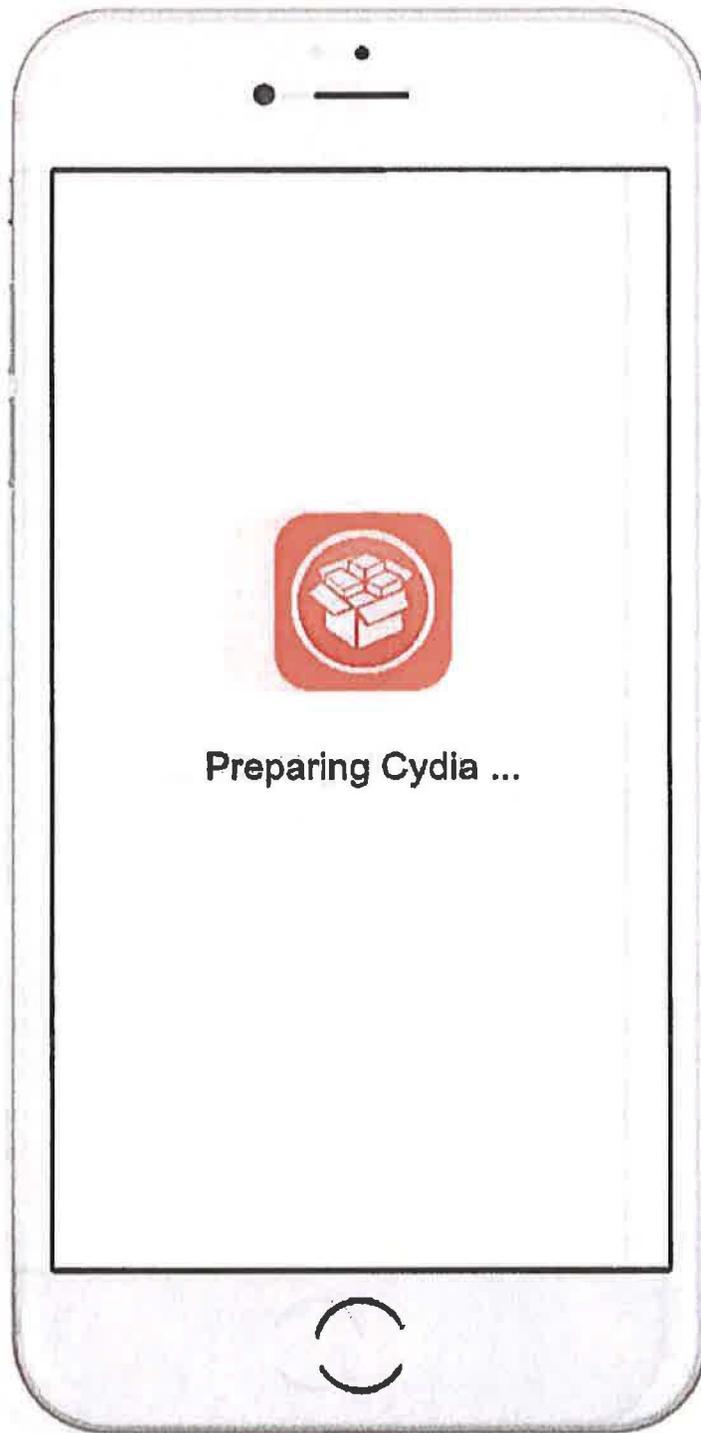

Method 2: Configuration Profile [Advanced Method]

Please make sure that you follow the steps properly as Cydia may not be installed otherwise:

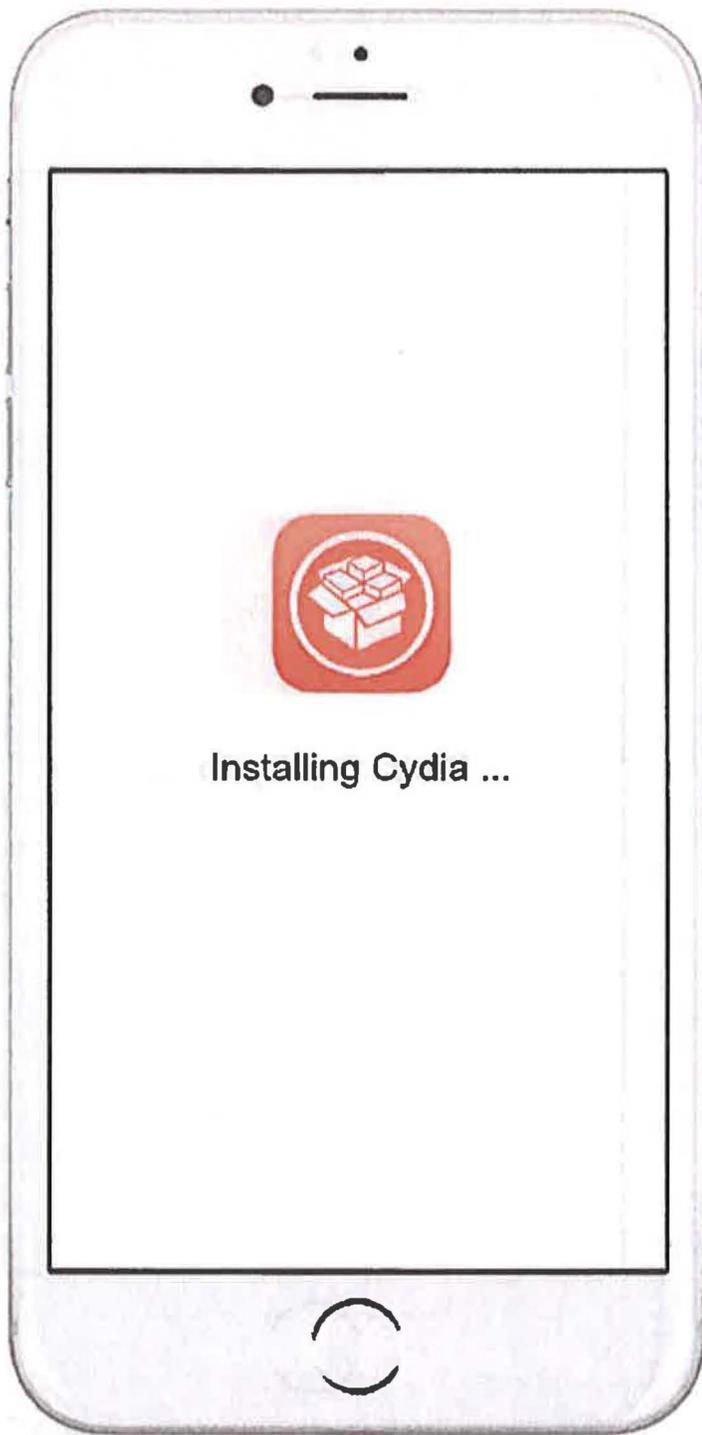

1. Launch Safari browser and open this [[link](#)]

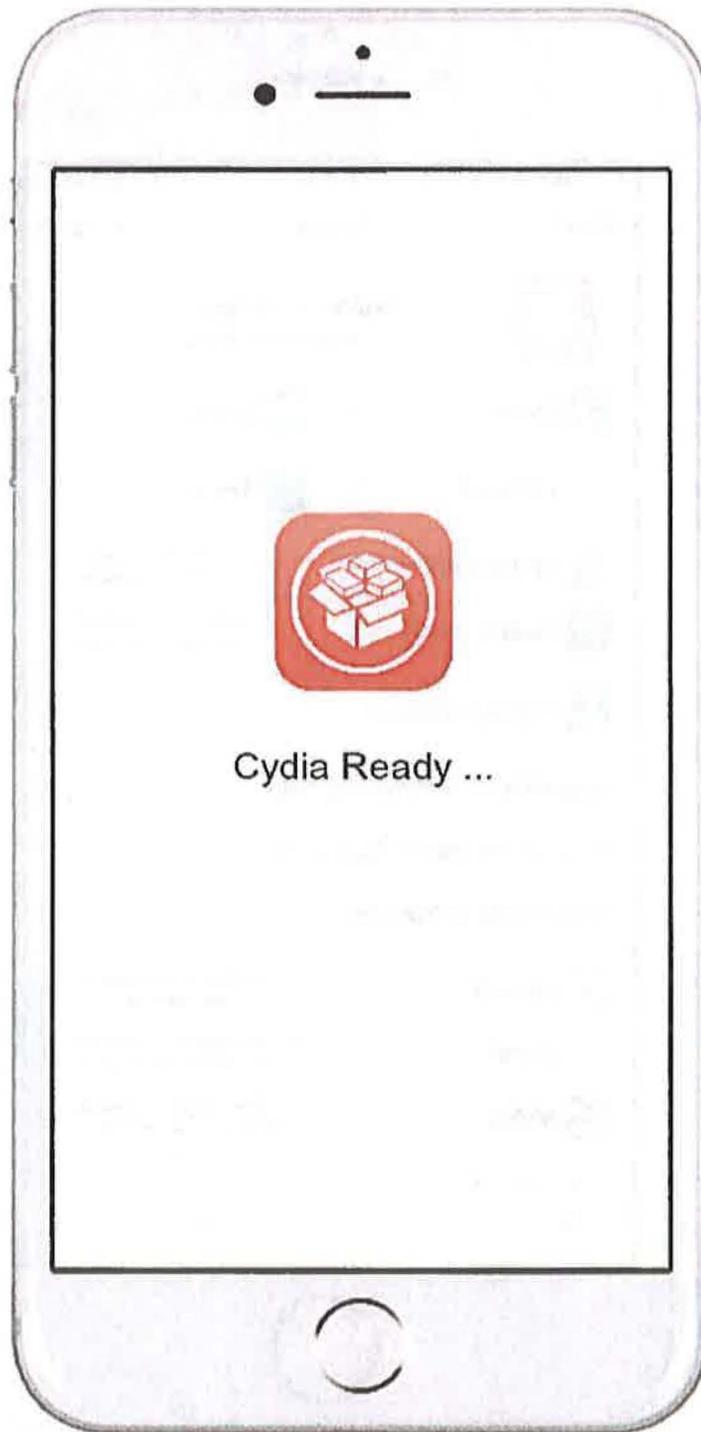

2. Tap on the link to **Install** on the page that opens , this will allow the profile to be installed on your device
3. When your Settings app has opened, tap on **Install Profile**
4. Type your passcode in and then Safari browser will open
5. Tap on **Install Cydia** and then **Install** to confirm your intention

6. Settings will open, tap **Install > Next > Done**

7. Wait for the install to finish and start downloading your tweaks

If Cydia does not install you must go back over the steps and repeat them

Method 3: Evasi0n App [Expert Method]

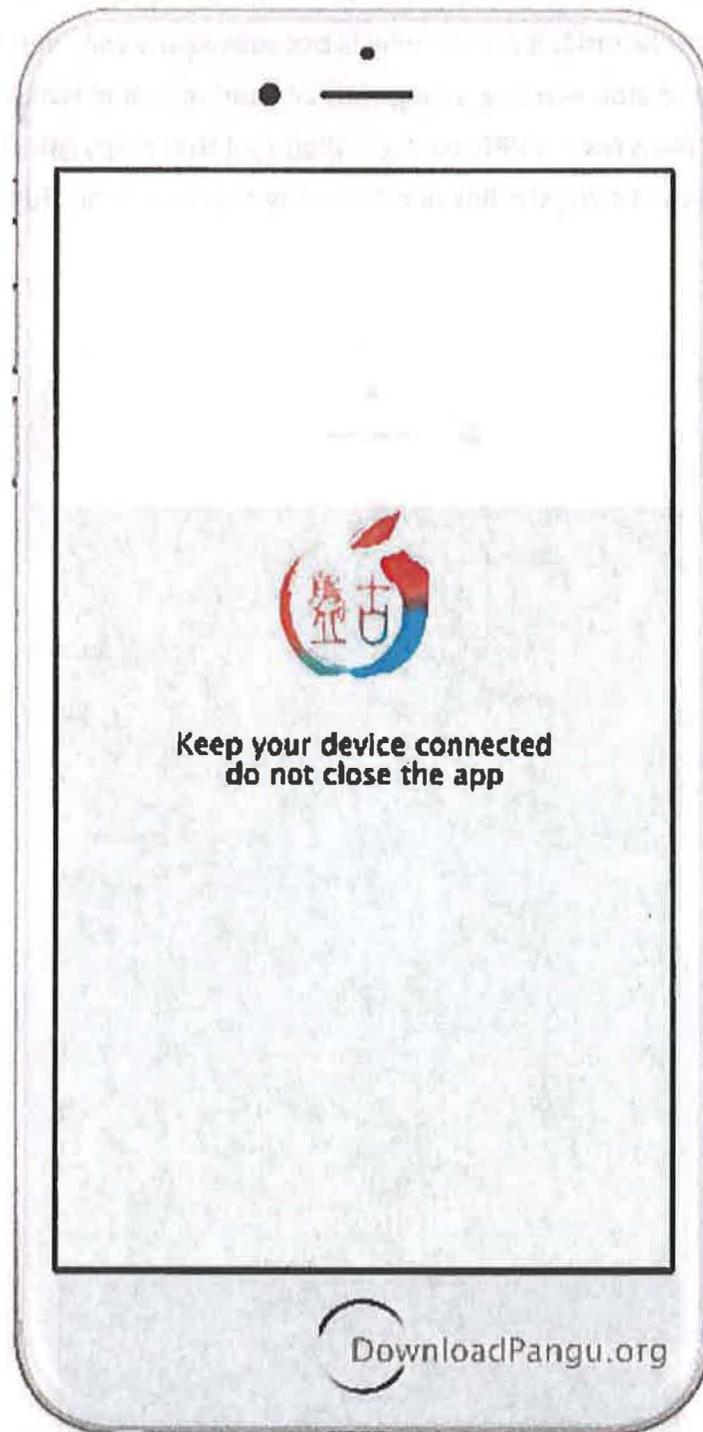

You have to go to Evasion's website and download the latest version of Evasion . [link : Evasion Jailbreak] . Install Evasion following the given instructions .

Method 3 : Taig App [Expert Method]

This method involved using Taig Jailbreak tool for windows. Taig is exclusively supported on Windows . They are one of the fastest jailbreak releasers . [link : [Taig Jailbreak](#)]

Method 4 : Pangu App [Expert Method]

Pangu Team is the second most popular jailbreak team after iPhone Dev . Their much popular Pangu tool is supported on both Windows and Mac OSX . You can get full step by step tutorial and latest tools here [link : [Pangu Jailbreak](#)] .

Stop Cydia Crashing Issue :

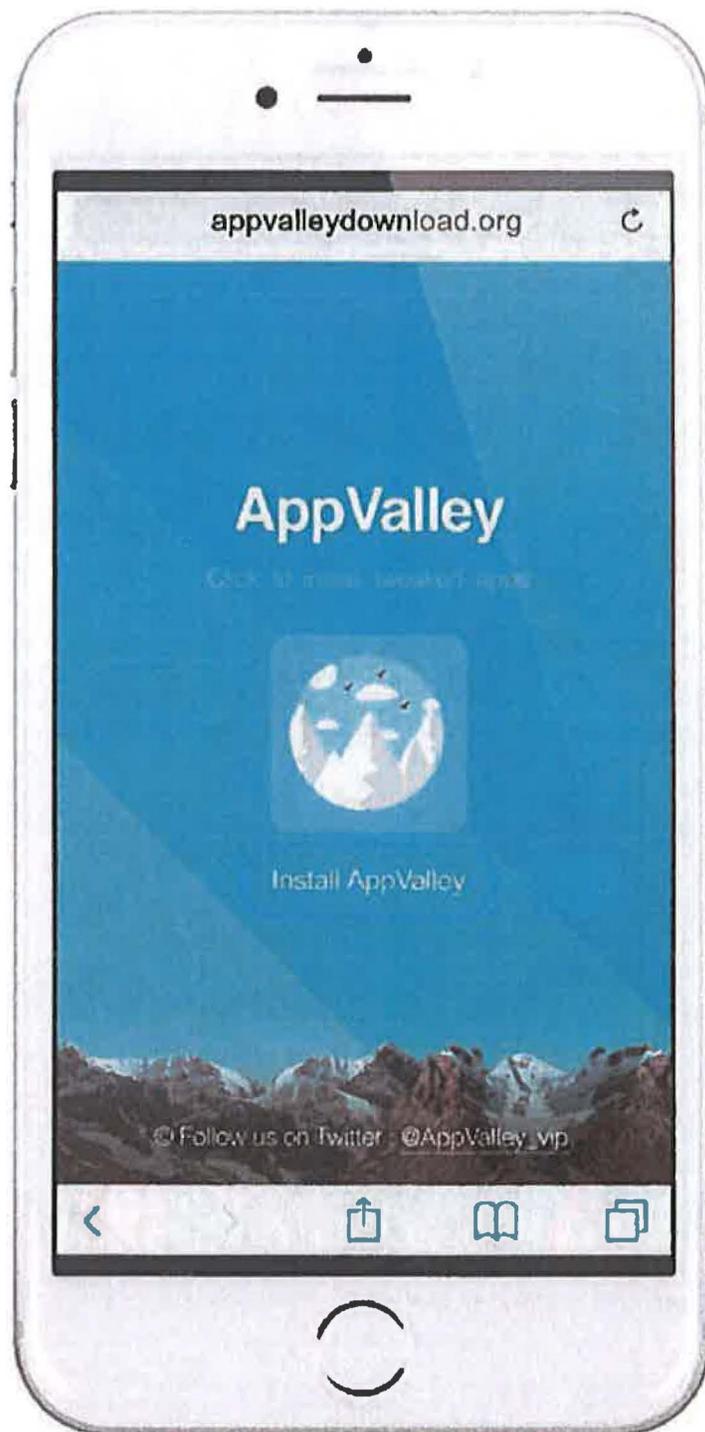

Cydia will crash inside of a week after you install it, and this will happen to all users. Reinstalling it will work but only temporarily and the reason why is because Apple will keep on revoking the certificates, causing Cydia to stop working, along with all your apps and tweaks. This can easily be stopped by downloading **NesTool**, a **VPN** configuration tool that stops Apple revoking the certificates. Find out how by clicking the link and following the **NesTool** [Full Tutorial] download guide.

Cydia Alternatives :

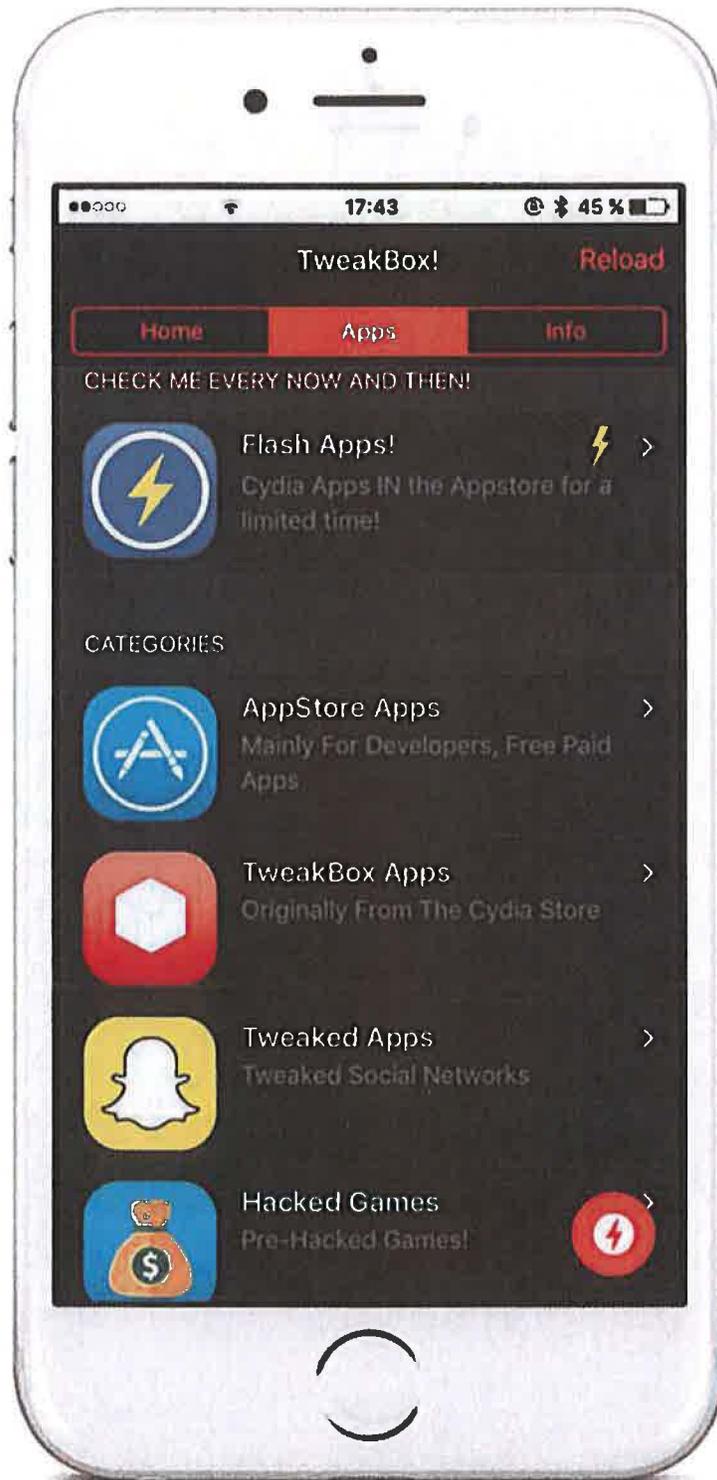

Cydia will not work on all devices but, we do have some other alternatives. Several app installers have now been released to provide a limited selection of Cydia tweaks without needing that jailbreak. Have a go with these two :

- **AppValley**

AppValley is an excellent source of content, including a decent selection of Cydia tweaks, lots of modified apps, including **Pokémon Go++**, **Instagram++** and **Snapchat++** as well as a whole heap of paid content for free and loads of other apps and games. Check out the detailed information and **AppValley** [ext link] download guide at the link

- **TweakBox**

Because **TweakBox** has so much to choose from, the developers have set it up in categories. There are several categories to look at, including App Store apps, modified apps, tweaked apps and a few more besides and all the apps and games in the installer can be found in one of these. Find out how to download **TweakBox** today by clicking on the link.

Cydia Impactor

Cydia Impactor is a GUI tool for working with mobile devices. It has features already, but is still very much a work-in-progress. It is developed by saurik ([Twitter](#) and [website](#)).

You can use this tool to install IPA files on iOS and APK files on Android. It also can help you exploit the series of Android "Master Key" vulnerabilities.

Download whatever the latest version of Cydia Impactor is for [Mac OS X](#), [Windows](#), [Linux \(32-bit\)](#), or [Linux \(64-bit\)](#). (These URLs will always redirect to the most recent versions, so feel free to directly link to the packages from howto guides.)

Note: Do *not* "Run as Administrator" Impactor; doing this makes drag/drop of files not work on Windows 10.

Also: Tons of people are downloading Cydia Impactor in an attempt to install some kind of Pokemon Go hack in the form of an IPA file... to their Android device... an IPA file is for devices running iOS only, not Android.

If you are on Windows, you may have to install a device driver to talk to your Android device over USB. If your device is not detected, use Impactor's USB Driver Scan feature to attempt to automatically construct and install a driver for your device. You do not need the Android SDK installed to use Impactor.

For iOS, if you are using wither Windows or macOS, you definitely need to have iTunes installed for this tool to work (for different reasons). You do not need Xcode installed to use Impactor (even for features such as signing IPA files).

To download new versions, use "Check for Updates..." under the Impactor menu from inside of the application. Impactor will also occasionally prompt about new versions that come out. (This feature is currently not available in the Linux versions.)

If you are having problems using Cydia Impactor (it crashes, doesn't work on your device, or simply doesn't make any sense) please join [#android on irc.saurik.com](#) (for Android questions) or [#iphone on irc.saurik.com](#) (for iPhone/iPad/iPod

questions). I also recommend [this reddit thread](#) for general help with the iOS 9.3 jailbreak (including issues with Impactor).

The Android "Master Key" vulnerability was found by [Bluebox Security](#). For more information on how this bug works, I have done an [overly-detailed article](#) on the exploit technique.
