SCOTT BUILDING

HABS No. GA-2410

Location: 5117 State Route -- west side of State Route 53 between Frances Street & State Route 124, Braselton, Jackson County, Georgia.

U.S.G.S. Auburn Quadrangle (7.5)
Georgia – Jackson County
Universal Transverse Mercator Coordinates:
17.245129.3777655

Present Owner: Braselton Ventures LLC

Present Occupant: Scott Property Management

Present Use: Office

Significance: The Scott Building is a contributing historic resource in the existing Braselton National Register of Historic Places District and represents the commercial significance of the district. As part of the second group of historic commercial resources located at the southwest corner of State Route 53 and State Route 124, it is significant as a commercial and retail building serving portions of three counties, including western Jackson, northwestern Barrow, and southeastern Hall counties. Constructed ca. 1920, this building is also significant as the second home of the Braselton Post Office during the historic period. The Scott Building is also significant architecturally as an excellent example of a vernacular commercial building constructed with Craftsman-style elements. Character-defining features of the building include its front gable roof, wide overhanging eaves, exposed rafters, stone porch piers and tapered wood columns, and multi-pane upper windows sash over a single-pane sash.

PART I. DESCRIPTIVE INFORMATION

The Scott Building is a one-story rectangular-shaped commercial building sited east to west and oriented east toward State Route 53 on a 2.78 acre parcel of land. It is representative of an early twentieth century front-gable commercial building constructed with Craftsman-style elements.

The building is of wood frame construction and the exterior walls are clad with wood drop siding. There are wood brackets, comprised of 2" x 4" boards at the corners of the east and west elevations.

The building foundation consists of brick masonry piers along the east elevation to compensate for the sloping topography north to south. The front gable roof is clad with standing seam metal roofing. The roof has a wide overhanging eave with a simple wood fascia board and exposed rafters. There are two chimneys located at the interior slope of the roof. Both chimneys are constructed of brick and painted white.

A single-bay addition has been made at the rear of the building. The shed-roof is clad with standing seam metal roofing and the exterior walls are clad with Hardi-plank. A two-over-two modern vinyl window is located at the west elevation of the addition.

The building has two front doors, each a single door with three horizontal molded wood panels below a nine-pane glazed upper section. Each doorway also has a wood screen door. Windows are single and paired double hung wood windows with a six-over-six pane sash. The doors and windows have simple casings at the jambs and head consisting of 1" x 4" flat boards. There are no shutters on the windows.

The building has a projecting front gable porch that is supported by two tapered wood posts supported by square piers of fieldstone with stone caps. The porch foundation is comprised of a fieldstone foundation wall at the south elevation of the porch. The porch floor is made of poured concrete painted grey.

The site slopes down from north to south and consists of gravel and grass at the east (front) and north (side) of the building. A wooded area exists to the south of the building. A foundation wall is located at the south side of the site marking the transition of the grade change from north to south.

This wall is constructed of fieldstone with a poured concrete cap. A concrete sidewalk and granite curb are located at the front of the site adjacent with the roadway. There are no extant outbuildings associated with the building.

The current condition of the Gas Station is good. The building appears to have been well maintained and is currently being used as commercial offices.

PART II. HISTORICAL INFORMATION

The Scott Building was constructed ca. 1920. The architect and builder are not known. The building has a one-story rectangular-shaped plan with an inset front porch and faces east toward State Route 53. It was historically used for municipal and commercial purposes. It served as the second Braselton Post Office for a period of time. It was later used for commercial purposes, and housed Louise's Music Center. It is currently being adaptively used as offices for Scott Property Management. The building retains the potential for continued commercial use. The building has been owned by Braselton Ventures LLC since June 2005. Previous owners include Madison Ventures LTD, Limex LLC, and Braselton Acquisitions.

Braselton is located in southwestern Jackson County in northeast Georgia. Jackson County is the state's twenty-second county, created in 1796 from portions of Franklin County that was originally the home of the Cherokee and Creek Indians.

Jackson County

Following the end of the Revolutionary War, veterans and other pioneers began settling in parts of Franklin County, one of Georgia's original eleven counties, in 1784. As the population increased, citizens in the southwestern portion of the county made application to the state assembly for the creation of a new county. On February 11, 1796, Georgia Governor Jared Irwin signed the act creating the new county.

The county was named Jackson for James Jackson, who was a Revolutionary War general and Georgia statesman. Jackson served six years with the Georgia state forces and participated in the unsuccessful defense of Savannah in 1778, the Battle of Cowpens in 1781, and the recoveries of Augusta (1781) and Savannah (1782). He went on to serve in the Georgia Legislature after the war and was elected to the first Federal Congress, where he became one of the first Jeffersonians in opposition to Alexander Hamilton and the Federalists. He later served in the U.S. Senate before returning to Georgia to overturn the Yazoo Act that had sold Georgia's western lands to unscrupulous speculators. He later served as Georgia's Governor from 1798 to 1801.

Early Towns

The first settlement in Jackson County was Groaning Rock in 1784. The town changed its name to Harmony Grove in 1825 and again to Commerce in 1904. The Native American community of Thomocoggan was renamed Jefferson after Thomas Jefferson and became the new county seat in 1806 following the creation of Clarke County from portions of Jackson County in 1803. Other communities developed along the pattern of railroad lines in Jackson County, including Maysville in 1879, Arcade, Nicholson, Pendergrass, Talmo, Hoschton, and Braselton.

Braselton

Braselton was founded in 1884 following the marriage of William Henry Braselton, Sr. to Susan Hosch on December 11, 1867. The Braselton's lived in Hoschton, Georgia on the Hosch family

plantation for a number of years following their marriage. It was there that their first two sons, Henry and Green, were born.

The Braselton family first began farming the present site of Braselton after the Braselton's purchased 800 acres of land near the Hosch home from G.W. Smith on December 8, 1876. The family lived in a log cabin on their property, where a third son, John Oliver, and two daughters, Belle and Lena, were born.

Braselton Stores

The Town of Braselton began when John Oliver Braselton, the youngest son of William and Susan, decided at the age of eight years old that he would become a storekeeper. In 1887, John's father, William Braselton, built a small six-by-six foot structure to be his son's store. From this small building in the front yard of their house, John sold some foodstuffs including sweet crackers and sardines, snuff and tobacco, and rock candy to local farm hands. John sold a grand total of \$97.41 worth of goods and merchandise in his first year of business.

After the first store was destroyed in 1888 by a runaway horse and buggy, a second larger store measuring 14' x 16' was constructed. This second store was large enough to have a window. (3Bs, 60) That same year, John invited his older brother, Green Braselton, to join the store. And by 1891 the oldest brother, William Henry, Jr. joined the business. They became locally known as the Three B's. The house currently located in the overgrown lot on the northeast corner of State Route 53 and State Route 124 behind the Post Office was originally built as John Braselton's second one-room store. This building was later enlarged into a residence during the historic period.

With their continued success, the Braselton's replaced the second store with a larger third store in 1891 measuring 22' x 50'. As business continued to increase, the brothers added twenty-two additional feet to this third store.

The Braselton Brothers built their stores close to the junction of State Route 53 and State Route 124 and the Gainesville, Jefferson and Social Circle Railroad. The roads had been in place for some time prior, but the rail line had been built in 1882 and spurred growth in the area. Local farmers had access to shipping and receiving large cargoes of agricultural goods. Before the completion of the railroad through Braselton, farmers used the freight station located in Hoschton, a town just south of Braselton.

In 1902, a side-track of the railroad was installed along what is today Wall Street behind the store. The brothers had erected a large 24' x 120' warehouse along the spur track to store merchandise that they purchased by the railroad car-load.

Business continued to increase so the brothers erected a fourth store. Construction began on the new brick building on March 1, 1904 and was completed on September 1st of that same year. An article in the February 18, 1907 *Atlanta Saturday Evening News* entitled "The Wonderful

Progress of 3 Young Men” described the new store as having “every modern convenience and is the most substantial up-to-date and prettiest storehouse in northeast Georgia.” This article also described the building as follows:

“This handsome new brick store is 60 x 95 feet, with 14 feet walls and a basement 30 x 60 feet. The main floor is divided into three departments—one for dry goods, notions and shoes; one for millinery and clothing; one for groceries and the basement for heavy groceries. It has a solid plate glass front of 60 feet with iron columns made at the Winder Foundry and Machine Works, which firm had to compete with a large plant in Evansville, Ind. to secure this contract for furnishing the columns. The entire building, including basement, is lighted by acetylene gas, requiring 730 candles. This is the brightest light known and makes this large store, with its different departments, a thing of beauty when lighted up at night. The building also has two handsome and well arranged offices, one of them being the private office. The dry goods department is one of the prettiest store rooms in Georgia, being 36 x 60 feet. The Millinery and Clothing department, 20 by 60 feet, is a model of beauty and artistic design. The grocery department 30 x 36 feet, is equal in appearance to most stores and is fitted with heavy groceries. Mr. S.B. Baker, who superintended the building of this magnificent store, can afford to feel proud of the construction and workmanship, as it cannot be surpassed.”¹

By the time this new brick store was constructed, the business had expanded from candy to dry goods, notions, shoes, millinery, clothing, and groceries. Already the largest building in Braselton, the store was expanded to 28,000 square feet in 1910 with the addition of a three-story building to provide additional space for the store and offices.

By 1921, the Braselton Brothers Store housed the store as well as the local post office, the offices and freight depot of the Gainesville Midland Railroad, the local express office, Braselton Bank Company, Braselton Chamber of Commerce, a wholesale general merchandise company known as the Braselton Commission Company, and space for over 500 bales of cotton in the warehouse section of the building. By 1922, the Braselton Mercantile Company was doing \$250,000 per year in business and the company motto was “Dealers in Everything.”² With the rise in the automobile, the Braselton Brothers slogan changed to “It will pay you to drive miles to our big store and save money.” By 1944, additional businesses included undertaker, barber shop, filling station, garage, planing mill, and blacksmith. Also during the 1940s and 1950s, the brothers added two additional one-story masonry sections to the side of the original building.

² *Ibid*, 76

The first section (now the middle section) housed the Super Market department and the second section (now the far left section) housed the Furniture and Appliance departments.

Agriculture

Agriculture has played a dominant economic role in Georgia's history for more than 250 years, beginning with the settlement by General James Oglethorpe and the English colonists in 1733. Early crops that were grown include corn, silk, indigo, and rice. Cotton and tobacco became the primary crops after the Revolutionary War, with cotton soon dominating agricultural production following the invention of the cotton gin by Eli Whitney in 1793 in Savannah. By 1860 there were 68,000 farms in the state producing some 700,000 bales of cotton. Cotton continued to dominate production after the Civil War, with more than 725,000 bales produced in 1870.

Braselton was one of the richest and most fertile farming sections of Georgia during the late-nineteenth and early-twentieth century. Crops grown in the region included corn, pea-hay, sugar cane, and cotton. William Henry Braselton, father to the 3Bs, had been a successful farmer during his lifetime, and the brothers continued that success. They continued to produce crops on their farm of 1,800 acres and produced on average anywhere from 700 to 800 bushels of wheat, 150 to 200 bales of cotton, and thousands of bushels of corn per year.³ They produced and distributed hundreds of tons of their own private label brand of fertilizer known as the BBB brand.

Industry

The presence of the railroad spurred industrial development to take advantage of the agricultural production of the area. In 1900, the Braselton Brothers had constructed the large rolling mill to the south of the store on the west side of State Route 53. The rolling mill, known as the Enterprise Flour and Grist Mill, was one of the earliest fully-operating rolling mills in northeast Georgia and survives today as a rare representative example of an early-twentieth century steam-powered rolling mill in Georgia. According to the 1907 article in the Atlanta Saturday Evening News, the rolling mill had the capacity to produce 50 to 75 barrels of flour and 300 bushels of meal per day. The brothers sold their products under the labels of the "Three B's" and "Fast Flyer."⁴

Following the construction in 1902 of the railroad spur along Wall Street described above, the Braselton Brothers constructed a Cotton Gin along the siding during the early 1900s. The gin contained a complete Murray suction ginning system and had the capacity to gin some 2,000 bales of cotton per season.⁵ The ability to ship cotton directly from Braselton made it possible to keep more money in the community rather than pay dealers in Gainesville, Jefferson or Athens

to process the cotton. This led to an expansion of the family businesses and an overall increase in wealth for the Braselton family and residents.

The Braselton Brothers played the central role in bringing the new technology of the telephone to Braselton in the early-twentieth century. In 1912, the brothers partnered with Judge R. B. Russell of Winder to purchase an existing telephone system from Hoschton that had begun there in 1907. The Hoschton Telephone Company headquarters with its “plug or drop” system switchboard were later transferred to a small two-room house in Braselton in 1927. The telephone service grew from just five subscribers in the early 1900s to some 230 by 1957.⁶

Braselton Incorporated

Braselton was incorporated on August 21, 1916, with W.H. Braselton as mayor. The town limits were defined as follows upon incorporation:

“The inhabitants of the territory, embraced within the limits of one half of one mile in every direction (except the southern limits herein after described) from the center of the crossroads of what is known as the Hog Mountain and Hurricane Shoals public road, and the Gainesville and Monroe public road, said crossroads being near the store of Braselton Brothers, in the county of Jackson, and the southern limits on the southeast shall run south.”⁷

Shortly after incorporation, the Braselton Brothers paid \$40,000 for the construction of a high school in 1919 (though the school was destroyed the following year during a storm). Braselton continued to grow during the 1920s with the construction of more housing and commercial buildings.

The next year, 1920, was one of the worst years for the Braselton Brothers. Not only did the cotton market crash in Georgia and the south, but a tornado swept through Braselton destroying the brand new school, the rear fourth of the brick store, and the old frame store, among other buildings in town. In addition to the \$110,000 loss from the physical destruction caused by the tornado, the Braselton Brothers lost \$150,000 from customers unable to pay their bills at the store.

While the financial losses from the cotton crash and tornado were devastating, the Braselton Brothers would recover, not only due to their continued tenacity but also with help from many people from bankers to their customers. When the time came to pay their loans to the banks, the bankers told them not to worry and sent \$500 to help with repairs to the store. In addition, many of their customers sent money, usually in nickels and dimes. All told, they received some \$8,000

⁶ Ibid, 75

⁷ Angela Gary and Jana Adams. *Our Time and Place: A History of Jackson County, Georgia*. Jefferson, Georgia: Main Street Newspapers, Inc., 2000; 2-4.

in gifts to help rebuild their damaged store. But in true 3B fashion, the brothers did not spend any of this money on the store, but instead donated it toward the rebuilding of the school that had also been destroyed by the tornado.

The depression in the 1930s posed little threat for the local economy because the agricultural products were comprised of staples rather than luxuries. The Braselton Brothers' businesses continued to thrive during this period as their customers came from surrounding counties. As in most agricultural areas, the local businesses extended credit through the year and were paid when the crops were sold. Braselton did better than most communities in this endeavor because the Braselton Brothers charged much less than other merchants for this carrying fee. When most Georgia merchants were charging \$8.00 to carry a sack of flour worth \$5.00, the Braseltons were charging their customers \$5.50. The net result was that more people came to Braselton to transact their business rather than going to other nearby towns of similar and even larger size.

In 1939, Braselton was a thriving town in northeast Georgia. In addition to the store, the Braseltons were operating the warehouse for cotton, cotton seed, and fertilizer; the rolling mill and gin; shops; filling station; marble yard; depot; post office; private bank; and the high school.⁸

While cotton production was declining during the late 1930s and 1940s, Braselton residents transitioned from agricultural to manufacturing jobs. Textile mills, manufacturing plants, and poultry dressing plants moved into the area. Poultry production began in the county around 1927 and has increased tremendously over the past forty years such that Northeast Georgia has become one of the nation's leading poultry-producing regions.

Following the end of World War II, the importance of Braselton shifted from a regional agricultural business center to that of a more regional shopping center. Braselton was an established mid-point between Gainesville and Winder, which resulted in commercial traffic moving through the town. Braselton became a convenient shipping and mercantile center for produce and goods during the mid twentieth century. Following the establishment of the large regional shopping malls, the Braselton commercial core slowly started to decline.

As late as 1990, the Braselton Brothers Store still housed a grocery, hardware, furniture, appliance, and dry goods store. Today, the Braselton Store houses several retail stores including the Braselton Tile Company and Braselton Antiques Shop.

Despite the changes to the Braselton commercial core, the town has grown both physically and economically in more recent years. Having expanded its boundaries, major attractions and companies located in Braselton, turning the once rural farming community and commercial center into a thriving residential and manufacturing area in northeast Georgia. These major attractions and companies include Chateau Elan, a 3,500 acre resort and winery; the Panoz Motor Sports Group and Panoz Auto Development Company that builds the handmade Panoz Esperante

⁸ Braselton, 92

sports car; the International Motor Sports Association; the Mayfield Dairy Visitors Center; and Haverly's Distribution Center.
