HABS No. HI-62A

Location:

Lot bounded by Hale Aili Avenue, Fourteenth Street
and South Avenue
Pearl Harbor
Honolulu County
Hawaii

USGS Pearl Harbor Quadrangle, Hawaii
7.5 minute series (orthophotoquad)
Universal Transverse Mercator coordinates:
4.609000.2361330

Significance:

Building No. 239 is rated a Category 3 historical building. A Category 3 building is defined as only of minor importance to the historic character of Pearl Harbor. Building No. 239 is located within the Pearl Harbor National Historic Landmark, which has historical significance due to the calamitous events of 7 December 1941 and its vital role in supporting the nation's subsequent war effort in the Pacific theater of World War II.

Description:

The building is a small rectangle one-story wooden structure.

History:

The building was originally designed for boiler house of the bachelor officer quarters mess hall and gallery. The mess hall and gallery was originally designed for seating 360 men and included the cooks quarters. The expansion of the wing increased the capacity to 720 men. The mess hall/gallery was later converted to office use circa 1949 and housing for enlisted women circa 1952. The boiler house was at that time converted to storage use. The U.S. Naval Base at Pearl Harbor was designated as a National Historic Landmark in 1964. Building is presently used as the 1st Lieutenant shop storage space. Military Construction Project, P-443, proposes to build a Transient Personnel Unit and the demolition of the building is included in the project.
