(e) *Conversion weight.* Conversion weights shall be computed in accordance with (p) of War Food Order No. 75-1. The Director may, upon written application, revise any conversion weight factor where it is shown that such factor

is working an undue hardship in the preparation of certain products.

(f) *Credits allowed on deliveries.* Subject to the provisions of (g) hereof, any set aside meat delivered to a governmental agency, authorized purchaser, or person entitled to purchase set aside meat under the provisions of War Food Order No. 73, or War Food Order No. 74, may be credited against the requirements of (b) hereof for meat of the type and grade so delivered.

The slaughterer shall endorse on such certificate the conversion weight of such meat, together with a description permitting conversion in accordance with (p) of War Food Order No. 75-1. The slaughterer and the authorized purchaser shall each retain an original of such certificate for delivery to the Director upon request. All statements contained in or accompanying such certificate shall be deemed made to an agency of the United States. No person shall be entitled to rely upon any such certificate if he knows or has reasonable cause to believe it to be false.

(h) *Storage; packaging.* All Army-style beef set aside and reserved under this order shall be stored in such manner as to maintain the quality thereof, and shall be prepared and packaged in accordance with Army specifications.

(i) *Authorized purchasers required to redeliver.* Each authorized purchaser who receives set aside meat under the provisions of this order shall deliver all such meat, or an equivalent amount of set aside meat to a governmental agency or person entitled to purchase set aside meat under the provisions of War Food Order No. 73, or War Food Order No. 74.

(j) *Allocation.* The Director may, by general order or written notice to individual slaughterers, order the allocation of meat set aside under this order to or among specific governmental agencies, authorized purchasers, or persons entitled to purchase set aside meat under War Food Order No. 73, or War Food Order No. 74. In the absence of such allocation, slaughterers may, subject to (g) hereof, sell meat so set aside to any such person or agency.

(k) *Existing contracts.* The provisions of this order shall not be construed as reducing the amount of meat which any slaughterer is required to offer or to deliver under any existing contract with a governmental agency, as defined herein, or with the United States Maritime Commission.

(l) *Reports.* Every slaughterer subject to (b) hereof shall report to the Director concerning his production of and transactions in set aside meat. Such reports shall be made at such times and upon such forms as the Director may require.

(m) *Effective date.* This amendment shall become effective at 12:01 a. m., e. w. t., October 15, 1944. TITLE 32—NATIONAL DEFENSE

Chapter IX—War Production Board

AUTHORITY: Regulations in this chapter, unless otherwise noted at the end of documents affected, issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 177; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended Dec. 31, 1943, 9 F.R. 64.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 18, as Amended Oct. 14, 1944]

FROZEN SCHEDULES

§ 944.39 *Priorities Regulation 18*—(a) **Definitions.** (1) "Producer" means any person whose production, delivery or shipping is subject to a "frozen schedule" as defined below. The term includes all divisions, branches, and plants of a corporation, association or other legal entity, but does not include any parent, subsidiary or affiliated company which is itself a separate legal person.

(2) "Frozen schedule" means a production, delivery, or shipping schedule approved or prescribed pursuant to any order listed in Appendix A of this regulation, or pursuant to any other order of the War Production Board which states expressly that schedules thereunder are to be deemed frozen schedules within the meaning of Priorities Regulation 18, whether or not the schedules are filed with the War Production Board. When any such order provides that the filing of a schedule is equivalent to approval or that a filed schedule may not be varied without approval, the term "frozen schedule" means the schedule as filed with any modifications approved or prescribed by the War Production Board. When any such order requires the approval by the War Production Board of every purchase order for a particular type of item before the producer accepts the purchase order or delivers the item,

the term "frozen schedule" includes all purchase orders on the producer's books which have been so approved, unless such order expressly states otherwise. The term "frozen schedule" does not include, and the protection of "frozen schedules" provided by this regulation shall not extend to any unrated purchase order, unless the unrated purchase order was part of a "frozen schedule" prior to October 14, 1944, or unless the War Production Board specifically directs a manufacturer to include unrated purchase orders in a particular "frozen schedule."¹

(b) **Protection of frozen schedules.** (1) Notwithstanding any contrary provisions of any other regulation, order or other instrument issued by or under authority of the War Production Board (including AAA's and other preference rating instruments and CMP allotments), no producer shall interfere with any frozen schedule by eliminating, displacing or altering the precedence of any purchase order (unless removed from the schedule as provided in paragraph (d), (e), or (f) below) listed for production, delivery or shipment thereon in favor of any other purchase order unless he is specifically authorized or directed to do so by an order or direction of the War Production Board which identifies the frozen schedule and states on its face that it is an amendment of that schedule.

(2) An amendment of a frozen schedule may be requested of the War Production Board by the producer, by the person to whom shipment is to be made, or by the claimant agency sponsoring the program, by letter or, at the election of the person making the request, on the form required for filing shipping schedules. The request may relate to one or more purchase orders or may constitute a proposed revision of the frozen schedule.

(c) **Automatic scheduling of certain components.** (1) The following definitions shall apply for the purposes of this paragraph (d):

(i) "Product" of a producer means the final product manufactured or assembled by that producer. It may be a complete end product or merely a part or subassembly which some other producer will incorporate into the end product.

(ii) "Component" means any part of a product which is physically incorporated in it except a controlled material as defined in CMP Regulation 1.

(iii) "Principal component" means the component which performs the principal function of the product. In the case of transportation equipment of any kind or equipment which generates electric energy, the principal component is the prime mover. In other types of motive equipment, the main driven component is the principal component.

¹See §§ 944.1a and 944.1b of Priorities Regulation 1 with respect to the AA-S rating assigned to certain defense orders specifically authorized by the War Production Board.

(iv) "Auxiliary component" means any component which is physically incorporated in the principal component or is attached to the principal component by a shaft, gears, bolt, chain or cable.

(2) When a producer's product is subject to a frozen schedule, all components of that product which are being made by the same producer shall automatically become part of that frozen schedule.

(3) When a producer's product is not subject to a frozen schedule, but the principal component of the product is made by the same producer and is subject to a frozen schedule, then all auxiliary components of that principal component which are being made by the same producer shall automatically become part of that frozen schedule.

(4) When neither the producer's product nor the principal component of the product is subject to a frozen schedule, but some other component, made by the same producer, is subject to a frozen schedule, then all components which are being made by the same producer for physical incorporation into the scheduled component shall automatically become part of that frozen schedule.

(5) This automatic scheduling shall obtain in all cases, whether or not the components which are automatically scheduled would otherwise be subject to scheduling. A schedule which has been automatically frozen shall enjoy the same protection as any other frozen schedule, except that an amendment of the schedule pursuant to paragraph (b) (1) need not identify the frozen schedule if the schedule has not been filed with the War Production Board.

(6) If any order is removed from a frozen schedule then all components of the product covered by the order cease to be part of that frozen schedule.

(7) Producers are not excused from including in reports or schedules required to be filed with the War Production Board any information which is required concerning the components which they are producing. When any of the components has been automatically scheduled under this regulation, a notation to that effect must be made on the report or schedule.

(d) **Cancellation and requests to hold up work on orders subject to a frozen schedule.** When a person who has placed an order which has become part of a frozen schedule cancels his order, it ceases to be part of the frozen schedule. If the person does not cancel his order which has become part of a frozen schedule but merely instructs the producer to hold up work on it, the producer must remove it from the frozen schedule. If requested to do so within ten days the producer must reinstate the order as near as possible to its former place in the frozen schedule without causing loss of production or delay in the previously scheduled delivery on any other order in the schedule. If, however, in requesting reinstatement of the order, the person makes a substantial change, the order must not be reinstated but treated as a new order as explained in paragraph (e) below.

(e) *Other changes in purchase orders already placed.* When a person who has placed an order which has become part of a frozen schedule makes a substantial change in the order, the general rule is that the order must be considered a new order placed on the date of the change. Unless the producer has received specific authorization for the change from the War Production Board, the order must be removed from the frozen schedule. The change is substantial if (1) it involves an alteration of the manufacturer's production schedule so as to interfere with production; or (2) it involves an alteration in the product classification of the item. If the change is not substantial, it may be made without notifying the War Production Board.

(f) *Notification to the War Production Board.* Whenever an order is removed from a frozen schedule, a manufacturer should make his shipments under later scheduled orders as nearly as practicable in the prescribed sequence, moving up the shipping dates of other orders. In any case where the producer foresees an appreciable acceleration of production, he must notify the War Production Board of the reason for the acceleration and the revised dates on which he expects to be able to make shipment under each purchase order affected.

(g) *Reinstatement of cancelled orders.* In any case, except where an order is reinstated as required under paragraph (d) above, an order which has been removed from a frozen schedule which is subsequently reinstated by the purchaser is to be treated as a new order. In such a case, and in cases where a change in the order involves the placing of a new order under paragraph (e), the acceptance or rejection of the new order and its place on the manufacturer's schedule shall be governed by conditions existing at the time the order is reinstated.

Issued this 14th day of October 1944.

Recording Secretary.

PART 3208—SCHEDULED PRODUCTS

[General Scheduling Order M-293, as Amended Oct. 14, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the production of certain products for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote national defense:

§ 3208.1 *General Scheduling Order M-293*—(a) *Definitions.* For the purpose of this order:

(1) "M-293 product" means any item listed in the tables to this order except Table 1. These items are identified in the Tables as Class X; Class Y and undesignated. The same products may be designated X and Y and, if so, are subject to the provisions applying to each class. Class X, Class Y and undesignated products are subject to all other provisions of this order.

(2) "Manufacturer" means any person to the extent that he is engaged in making an M-293 product.

(b) *Operations reports.* Each manufacturer must file an operations report on the applicable form shown in Column 1 of the appropriate table in accordance with the instructions accompanying the form at the times there shown. If no form is designated in Column 1, no operations report need be filed.

(c) *Provisions covering Class X products*—(1) *Filing of shipping schedules of Class X products.* Each manufacturer of Class X products must file with the War Production Board each month his shipping schedule, beginning with shipments to be made on and after the first of the following month, and other information called for on the form shown in

Column 2 of the appropriate table, at the time shown and in accordance with the instructions accompanying the form, except when he is excused from filing by the War Production Board. A manufacturer who is so excused from filing is not excused from complying with paragraph (f) or any of the other provisions of this order. A manufacturer who has been excused may, nevertheless, if he wishes, file the Column 2 form with the War Production Board just as if he had not been excused. In any case, unless otherwise directed by the War Production Board, the manufacturer in arranging the sequence of shipments on his shipping schedules shall be governed by Priorities Regulation No. 1 and other applicable orders and regulations of the War Production Board. The shipping dates of purchase orders which are already part of a frozen schedule must not be changed. In preparing the Column 2 form for filing each month the manufacturer shall include all purchase orders received up to the close of business on a date which is as near as practicable to the date the form is due to be filed. Orders received after the close of business on that date shall not be included on the form for that month.

(2) *Maintaining shipping schedules of Class X products when not filed.* Each manufacturer of a Class X product who is excused from filing his shipping schedule by the War Production Board, must maintain his proposed shipping schedule on the forms shown in Column 2 of the appropriate table if so instructed by the War Production Board, otherwise in such manner that they can be readily transferred to that form. In arranging the sequence of shipments on his shipping schedule, unless otherwise directed by the War Production Board, the manufacturer shall be governed by Priorities Regulation No. 1 and other applicable orders and regulations of the War Production Board. The shipping dates of purchase orders which are already part of a frozen schedule must not be changed.

(3) *Freezing of X product shipping schedules which are filed.* When a manufacturer who has not been excused from filing, or one who has been excused but still wishes to file, files his schedule, that schedule is automatically frozen under Priorities Regulation 18 on the date it is filed, for shipments to be made during the periods specified in Column 4 of the appropriate table. This period begins on the first day of the month after the schedule is filed. If a previously frozen schedule covers shipments to be made before the beginning of the period, those shipments remain part of the frozen schedule.

(4) *Freezing of X product shipping schedules of manufacturers who are excused from filing and do not file.* If a manufacturer is excused and does not file, his shipping schedule becomes frozen under Priorities Regulation 18 at the close of business on the date he would have had to file his schedule if he were not excused, and at the close of business on the same day of each month

after that. The schedule is frozen for shipments to be made during a period of two months, unless a shorter period of time is specified in Column 4 of the appropriate table, in which case it is frozen for the shorter period. This period in either case begins on the first day of the month following the date on which he would have had to file his schedule if he were not excused. If a previously frozen schedule covers shipments to be made before the beginning of the period, those shipments remain part of the frozen schedule.

(5) *Production and shipment of X products.* When a shipping schedule has become frozen, the manufacturer must schedule his production and make his shipments so as to meet the schedule without regard to preference ratings or directions from any governmental agency, except that the schedule may be amended by the War Production Board as explained in Priorities Regulation 18 and paragraph (g) of this order.

(d) *Provisions covering Class Y products—(1) Authorization of orders required.* No person shall place a purchase order with a manufacturer and no manufacturer shall accept a purchase order for any Class Y product unless the purchase order is accompanied by specific authorization of the War Production Board obtained on the form shown in Column 3 of the appropriate table. If a time for shipment is specified in the authorization of the War Production Board, a manufacturer must not accept a purchase order specifying any other shipping time. He must not accept an order which will interfere with a previously frozen schedule or on which delivery cannot be made on the specified date because of the requirements of Priorities Regulation No. 1 or any other applicable order or regulation of the War Production Board.

(2) *Freezing of authorized orders for Y products.* All authorized purchase orders for Class Y products which the manufacturer accepts, automatically become a "frozen schedule" under Priorities Regulation No. 18, and the manufacturer must schedule his production and make his shipments so as to meet the schedule without regard to preference ratings or directions from any governmental agency, except that the schedule may be amended by the War Production Board as explained in Priorities Regulation 18 and paragraph (g) of this order.

(3) *Authorization of orders for Y products placed by distributors.* A distributor who places a purchase order for a Class Y product must accompany it by an authorization as provided in subparagraph (1) above. If he wants to buy for immediate resale, the information called for by the application for authorization must be given about the customer and not the distributor. The application may be filled out and filed either by the distributor or by the customer. In either case the distributor must forward the authorization with his purchase order to the manufacturer. If the distributor is buying for stock, he must say so on his application and give all information called for by the application form in

terms of the type of customers to whom he expects to sell. A manufacturer must obtain authorization for the transfer of a Y product to a distribution outlet owned or controlled by him. The term "distributor" includes wholesalers, retailers, jobbers, sales agencies and consignees for sale.

(e) *Provisions covering undesignated products.* No manufacturer of an undesignated M-293 product need file the form shown in Column 2 of the appropriate table unless specifically directed to do so by the War Production Board or unless he chooses to do so. If the manufacturer is directed to file, the shipping schedule shown on the form becomes frozen in accordance with the direction. If the manufacturer is not directed, but chooses to file the form, the shipping schedule shown on it does not become a frozen schedule until the War Production Board specifically directs the manufacturer that it is one.

(f) *Special reporting provisions covering certain M-293 products—(1) Reports of requirements by purchasers of M-293 products.* Any claimant agency listed on Table 1 may instruct its prime contractor (or the prime contractor of a procuring agency which the claimant agency represents) who is purchasing M-293 products required in his prime contracts, or any other person purchasing M-293 products except for incorporation into other M-293 products manufactured by himself, to file with the claimant agency a report on Form WPB-3003 or other form approved for the purpose by the Bureau of the Budget. In such a case the person must file the form giving the information called for concerning the purchase orders which he has placed or will place for each specified M-293 product required under the Table 1 programs, except those which are indicated on the tables as being exempt from this paragraph. The report must state how many of each M-293 product will be used as spares.

(2) *Reports of shipping schedules.* A claimant agency listed on Table 1 may send to a manufacturer a Form WPB-3003, or other form approved for the purpose by the Bureau of the Budget, which shows the requirements of purchasers described in paragraph (f) (1) above covering all M-293 products for Table 1 programs, except those indicated on the tables as being exempt from the provisions of this paragraph. If a manufacturer receives such a form filled out and certified by the claimant agency in accordance with the accompanying instructions, he must fill in only the proposed shipping dates determined in accordance with Priorities Regulation No. 1 and other applicable orders and regulations of the War Production Board. The shipping dates of purchase orders which already are part of a frozen schedule must not be changed. He must file copies of the form with the claimant agency in accordance with the accompanying instructions and also with the War Production Board when requested to do so by the appropriate industry division. This schedule does not become a frozen schedule unless the

War Production Board specifically directs the manufacturer that it is one.

(g) *Other scheduling provisions.* With respect to any M-293 product, the War Production Board may, notwithstanding any other order, preference rating, directive, rule or regulation (except Priorities Regulation 18) of the War Production Board, or of any other government agency:

(1) Revoke any authorization or approval to place a purchase order granted by it under paragraph (d) above;

(2) Direct the return or cancellation of any purchase order on the books of a manufacturer;

(3) Direct the filing of shipping schedules by any manufacturer and direct changes in the shipping schedule of any manufacturer.

(4) Cancel purchase orders placed with one manufacturer and direct that they be placed on another manufacturer;

(5) Take such other action as it deems necessary with respect to the production of, the placing of purchase orders for, or the shipment of M-293 products.

(h) *Deviations from a frozen schedule.* If a manufacturer is unable to fulfill on time a frozen schedule of any M-293 product, he must make shipments, so far as practicable, in the sequence required by the schedule. In any case where the manufacturer foresees an appreciable delay in or acceleration of production, the manufacturer must notify the War Production Board of the reason for the delay or acceleration and the revised dates on which he expects to be able to make shipments under each purchase order affected. The manufacturer shall notify the War Production Board, either by letter or telegram, at his option.

(i) *Unrated orders.* No manufacturer shall include in any shipping schedule filed or frozen under this order after October 14, 1944, any unrated purchase order, unless the War Production Board specifically directs him to include unrated purchase orders.¹

NOTE: Paragraphs (j), (k) and (l), formerly (i), (j) and (k), redesignated Oct. 14, 1944.

(j) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provisions appealed from, and stating fully the grounds of the appeal.

(k) *Reports and communications.* The list of M-293 products is arranged so that the name of the Industry Division appears at the top of the table covering M-293 products for which it is primarily responsible. All reports and forms required by the order and all appeals should be addressed to the War Production Board, Washington 25, D. C.,

¹ See §§ 944.1a and 944.1b of Priorities Regulation 1 with respect to the AA-5 rating assigned to certain defense orders and orders specifically authorized by the War Production Board.

attention of the appropriate Industry Division so listed. All reports and forms required in paragraphs (b), (c), (d), (e), (f), (g), and (h) of this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(1) *Violations.* Any person who wilfully violates any provisions of this order, or who in connection with this order wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control, and may be deprived of priorities assistance.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-637]

ECHLIN MANUFACTURING CO.

Echlin Manufacturing Company, a corporation located at 220 East Street, New Haven, Connecticut, is engaged in the business of manufacturing electrical testing equipment and automotive maintenance equipment. Between November 8, 1943 and May 26, 1944, the corporation manufactured and assembled electrical testing equipment of the automatic vehicle type consisting of 85 ammeters, 7 meter panel assemblies and one voltage regulator meter panel without authorization from the War Production Board, and in violation of Limitation Order L-270. During the second and third quarters of 1943, and the first and second quarters of 1944, the corporation manufactured and assembled automotive maintenance equipment consisting of 41 coil testers, 117 condenser testers, 7 circuit testers and 17 vacuum gauges, all in excess of its allowable quota for such items, and in violation of Limitation Order L-270. During the period from June 4, 1943 to May 12, 1944, it sold, transferred and delivered a large number of items of automotive maintenance equip-

ment on orders and which did not bear preference ratings of AA-5 or higher in violation of Limitation Order L-270. Between April 1, 1943 and March 31, 1944, it expended approximately \$22,139.65 in excess of its allowable quota for maintenance, repair and operating supplies in violation of CMP Regulation 5. Between October 19, 1942 and April 27, 1944, the corporation extended preference ratings to obtain automotive maintenance equipment greatly in excess of the preference ratings it was authorized to extend for this equipment in violation of Priorities Regulation 3. In addition, the corporation failed to keep and preserve accurate and complete records of its sales of automotive maintenance equipment in violation of Priorities Regulation 1. The responsible officers of Echlin Manufacturing Company were familiar with the provisions of Limitation Order L-270, Priorities Regulation No. 1, Priorities Regulation No. 3 and CMP Regulation No. 5 and its actions constituted wilful violations of these orders.

These violations have diverted critical materials to uses not authorized by the War Production Board and have hampered and impeded the war effort of the United States. In view of the foregoing, it is hereby ordered, that:

§ 1010.637 *Suspension Order No. S-637.* (a) Echlin Manufacturing Company shall not manufacture, assemble, sell or deliver any automotive maintenance equipment as specified by Limitation Order L-270, except on orders bearing a preference rating of AA-1, or higher, unless hereinafter specifically authorized in writing by the War Production Board.

(b) The restrictions and prohibitions contained herein shall apply to Echlin Manufacturing Company, its successors or assigns, or persons acting on its behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

(c) Nothing contained in this order shall be deemed to relieve Echlin Manufacturing Company, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on October 14, 1944, and shall expire on December 31, 1944.

Issued this 7th day of October 1944.

(b) *Restrictions on installations of certain copper products*—(1) *Restrictions.* Installation of certain copper and copper base alloy products is prohibited notwithstanding any contract or agreement of any person to make the installation and notwithstanding any preference rating or CMP allotment, in the following instances:

(i) The installation in place, of any copper or copper base alloy building material in or on any building or structure, or in or on any cooling tower or water tower.

(ii) The installation in place, for plumbing, heating or cooking purposes, of any copper or copper base alloy pipe or tubing, in any building or structure.

(iii) The installation in place, whether inside or outside of a building, of any copper or copper base alloy pipe or tubing in any water supply or water distribution system, in any water sprinkling system, in any underground gas supply or gas distribution system, or in or on any cooling tower or water tower.

(2) *Exceptions.* Notwithstanding the prohibitions against installation of paragraph (b) (1):

(i) Copper or copper base alloy building material may be installed in place when necessary to replace in or on a building, structure or system, like worn out items of copper or copper base alloy building material.

(ii) Copper or copper base alloy pipe or tubing in the possession of the person owning a building, structure or system, or in the inventory of a plumber, jobber, distributor, or warehouse other than a brass mill warehouse (which is authorized to replace deliveries from stock under the provisions of letter BM-36 (WPBI-505-Brass Mill warehouse replacement orders) of July 23, 1943), (a) may be installed in place when necessary to replace in, or on such building, structure or system, like worn out items of copper or copper base alloy pipe or tubing; and (b) may be installed in place when necessary to connect a new water heater which is being installed to replace a water heater worn out and damaged beyond repair, provided that copper or copper base alloy pipe or tubing was similarly used in the installation which is being replaced.

(iii) Copper or copper base alloy pipe and tubing which were, on January 1,

1944, in the inventory of a plumber, may be connected by the plumber in whose inventory the material was on that date, to a water supply or water distribution system or to any underground gas supply or gas distribution system, if the pipe or tubing are to be used both underground and outside of a building; and copper or copper base alloy pipe and tubing which were, on January 1, 1944, in the inventory of a water or gas utility may be connected by a utility to a water supply or water distribution system or to any underground gas supply or gas distribution system, if the pipe or tubing are to be used both underground and outside of a building.

(v) Copper or copper base alloy building material, pipe and tubing purchased by or for the account of the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or the Veterans' Administration may be installed in place: Provided, however, That nothing in this order shall supersede any applicable instructions to any officers of the foregoing, including without limitation the directive for War Time Construction dated May 20, 1942, issued by the Chairman of the War Production Board, the Secretary of War and the Secretary of the Navy, or the List of Prohibited Items for Construction Work dated April 1, 1942, issued by the Army and Navy Munitions Board, as amended from time to time.

(vi) Copper or copper base alloy building material, pipe and tubing may be installed in place, upon the written authorization of the War Production Board, authorizing the specific installation. Applications for such authorization may be made by letter setting forth the reasons why the person applying believes such material should be installed in or connected to a structure or system. If the applicant is applying for authorization to begin construction on Form WPB-517, he may apply for authorization under this order on that Form or in a supplemental letter attached thereto, and need not make a separate application.

(c) *Restrictions on delivery.* Notwithstanding any contract or agreement to the contrary or the receipt of any CMP order or a preference rating, no person shall deliver, sell or otherwise dispose of any copper or copper base alloy building material, pipe or tubing, if it is to be used for a purpose prohibited by this order; and no person shall accept delivery or a transfer of, or purchase, such building material, pipe or tubing unless the person making the delivery, sale or other disposition was permitted to do so. Applications for authorization may be made by the person seeking to make delivery, sale or disposal, by letter setting forth the reasons why the person believes such material should be delivered, sold or otherwise disposed of

(d) *Restrictions on sale and use of nails, tacks, screws, nuts, bolts, rivets, washers, and expansion shields.* (1) No manufacturer, warehouse, store or outlet, other than a retail store or retail outlet, shall sell or deliver, without the specific authorization in writing of the War Production Board, any copper or copper base alloy nails, tacks, screws, nuts, bolts, rivets, washers or expansion shields except on a preference rating of AA-5 or higher.

(2) No retail store or retail outlet shall sell or deliver, without the specific authorization in writing of the War Production Board, any copper or copper base alloy nails, tacks, screws, nuts, bolts, rivets, washers or expansion shields except on a preference rating of AA-5 or higher. However, each store or outlet may sell such products to fill unrated orders or orders rated lower than AA-5 provided that the total sales of such products after December 31, 1943, to fill unrated orders or rated lower than AA-5, does not exceed \$25 in amount.

§ 3291.90 *Limitation Order L-21—(a) Definitions.* For the purposes of this order:

(1) "Automatic phonograph" means any coin or token operated phonograph.

¹ Formerly Part 1020, § 1020.1.

RESTRICTIONS ON PAPER CUPS

(c) *Prohibited sales and deliveries.* (1) No person shall manufacture, sell or deliver the following types of paper cups if he knows or has reason to believe that they will be used for the purposes stated:

(i) Packages of cups for retail sales. This restriction shall not apply to stocks of paper cups made up for retail sales which were on hand on January 29, 1944. (ii) Hot drink cups for any purpose other than in-plant feeding. (iii) Portion control or soufflé cups for retail sales or for party favors.

(d) *Limitation on use of hot drink cups.* No person shall commercially use more hot drink cups in any month than 80 per cent of his average monthly consumption during the months of January through March, 1944. This provision does not apply to the Armed Forces, including post exchanges and ship's service stores.

(e) *Maintenance of production of hot drink cups and flat-bottom cold drink cups.* To meet the requirements of in-plant feeding operations, manufacturers of hot drink cups and flat-bottom cold drink cups shall maintain during each calendar quarter a production of these items equivalent to the highest quarterly production attained during any calendar quarter beginning on or after October 1, 1943, to the extent permitted by paragraph (i) and subject to contingencies beyond his control.

(f) *Distribution of production between military and civilian requirements.* (1) Regardless of preference ratings on other orders, each manufacturer of paper cups must set aside the following percentages of his production of paper cups in each month beginning with October, 1944, for delivery to the Army and the Navy (excluding domestic post exchanges and ship's service stores, but including those located outside of continental United States) in the sizes ordered by them: 35 per cent of his monthly production of 6 to 9 ounce hot drink cups inclusive (not more than 60 per cent of the total production of any one size to be produced need be included in the set-aside); 70 per cent of his monthly production of 6 to 9 ounce flat-bottom cold drink cups inclusive; 100 per cent of his monthly production of 10 to 24-ounce flat-bottom cold drink cups inclusive. For the month of November, 1944, and each succeeding month, he must make this set-aside only to the extent that he has received orders from the Army and the Navy for such cups on or before the 15th day of the preceding month. For the month of October, he must do it to the extent that he has received orders from the Army, and the Navy on or before the 15th of October. If a manufacturer has not received orders from the Army and Navy (excluding domestic post exchanges and ship's service stores, but including those located outside of continental United States) by the dates specified above for the full amount of his set-aside, he must release any surplus for delivery on orders as specified in paragraph (f) (2). Set-asides under this paragraph shall be computed on the basis of number of cups.

The production and delivery of any of the above types of cups prior to October 14, 1944, in compliance with paragraph (g) of Order L-336 as amended August 29, 1944, shall not constitute a violation of this paragraph.

(2) The balance of each manufacturer's production of hot drink cups and

flat-bottom cold drink cups shall be used exclusively to fill orders other than Army and Navy orders (excluding domestic post exchanges and ship's service stores, but including those located outside the continental United States) in accordance with Priorities Regulation 1 and the provisions of this order.

(3) Any distributor who delivers hot drink cups or flat-bottom cold drink cups to the Army and Navy, including post exchanges and ship's service stores outside continental United States, shall notify the manufacturer who supplied him with the cups, giving the contract or purchase number, and the cups so sold shall be deducted from the set-aside for the following calendar month by the manufacturer. No manufacturer shall make any deduction from the set-aside because of deliveries made by a distributor, unless he has received the above information from the distributor.

(g) *Use of MRO preference ratings.* (1) Subject to the other provisions of this order, any person may use the blanket MRO rating assigned to him by any regulation of the War Production Board including CMP Regulation 5, CMP Regulation 5A, and orders in the P or U series to buy paper cups for in-plant feeding. Also, a caterer or concessionaire may use his customer's blanket MRO rating to buy paper cups for use in providing in-plant feeding to employees of the customer. Furthermore, persons whose employees are being fed may distribute paper cups obtained by them to the person who is engaged in in-plant feeding of their employees.

(2) Except as permitted above for caterers and concessionaires for in-plant feeding, blanket MRO ratings may not be used to get paper cups for commercially packaging food or other products for shipment or delivery. Also, persons engaged in in-plant feeding operations may not use their blanket MRO ratings to buy paper cups which are to be sent to a commercial food packer to be filled and returned to the plant for in-plant feeding.

(h) *Certification.* No person shall sell or deliver any hot drink cups after October 26, 1944, unless he has received from the purchaser a certification signed manually or as provided in Priorities Regulation 7. This certification shall be in substantially the following form and, once filed by a purchaser with a supplier, covers all future deliveries from the supplier to that purchaser:

The undersigned purchaser certifies, subject to original penalties for misrepresentation, that he is familiar with Order L-336 of the War Production Board, and that all purchases from you of items regulated by that order, and the use of the same by the undersigned will be in compliance with the order, as amended from time to time.

GENERAL RESTRICTIONS

(1) *Restrictions on tonnage of sanitary food container stock to be processed.* No manufacturer of sanitary food containers shall accept delivery of any sanitary food container stock except as authorized by the War Production Board pursuant to Appendix B in Order M-241. A manufacturer may use the stock allo-

cated to him only for the purpose for which it was allocated.

(j) *Inventory.* No person shall accept, have set aside or held for his account, any quantity of sanitary food containers which will increase his inventory for such containers to more than his reasonably anticipated requirements for the next 45 days, except that, whenever his inventory is less than a 45-days' supply, he may accept the minimum delivery required by his supplier under a published price list or sales policy in effect on October 29, 1943. No person shall order any quantity of sanitary food containers for delivery to him or for his account on any date, if receipt thereof on that date would increase his inventory of such containers to more than the amount permitted in the first sentence of this paragraph. This provision does not apply to the Armed Forces, Post Exchanges and Ship's Service Stores.

(k) *Appeals.* Appeals from Order L-336 shall be filed by addressing a letter to the appropriate field office of the War Production Board.

The letter of appeal need not follow any particular form. It should state informally, but completely, the particular provisions appealed from, the precise relief desired, the reasons why denial of the appeal would result in undue and excessive hardship, and such other statistical and narrative information as may be pertinent.

(l) *Violations.* Any person who willfully violates any provision of this order, or whol, in connection with this order wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(m) *Reports.* Any person affected by this order shall file such reports and questionnaires as the War Production Board may request from time to time subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(n) *Communications.* All inquiries relating to this order other than requests for authorization or appeals shall be addressed to the War Production Board, Containers Division, Washington 25, D. C., reference Order L-336.

PART 3270—CONTAINERS

[Limitation Order L-337 as Amended Oct. 16,
1944]

FIBRE SHIPPING DRUM

The fulfillment of requirements for the defense of the United States has cre-

ated a shortage in the supply of the material to make fibre drums for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 3270.76 *Limitation Order L-337—(a) Definitions.* For the purpose of this order:

(1) "Packer" means any person who uses fibre drums for commercially packing any product.

(2) "Fibre drums" means any new cylindrical shipping container in breakdown or set-up form which (i) is of the types known in the container industry as "fibre drums" and "fibre pails", (ii) is made with a body of paperboard and end or ends of paperboard, steel (30 gauge or heavier), wood or any combination thereof, (iii) has a capacity of one gallon or more, or a capacity of less than one gallon if made with fibre body and ends, and (iv) is customarily used for shipment without a covering container.

Restrictions

(b) *Restrictions on packing.* No packer shall pack or ship any product in a fibre drum other than those listed in Schedules A, B and C. Where sizes are specified in the schedules, he shall not pack or ship any product in any fibre drums of sizes other than those so specified.

(c) *Restrictions on manufacture, sale or delivery.* No person shall manufacture, sell or deliver any fibre drums which he knows or has reason to believe will be accepted or used in violation of the terms of this order.

(d) *Restrictions on inner containers.* No packer shall accept delivery of or use any fibre drums for packing or shipping products already packaged in an inner container except those items specifically listed in Schedule C of this order. This restriction does not apply to the use of a parchment or cellophane pouch where these have been customarily used for the safe delivery of the product. This restriction also does not apply to single bag linings for chemical products where a standard of purity must be maintained.

(e) *Export restrictions.* No person shall export any empty fibre drums to any foreign country except Canada unless specifically authorized by the Foreign Economic Administration. The application for authorization shall be made by letter to the Foreign Economic Administration setting forth the product to be packed and all other pertinent facts.

(f) *Quota restrictions.* (1) No packer shall, during any calendar year, accept delivery of or use for packing any product listed in Schedule B more fibre drums than his quota for that product as shown in the Schedule. A packer's quota for any calendar year shall be the designated percentage of the quantity of a product which he packed in fibre drums in 1943.

(2) The quota restrictions of this paragraph shall become effective July 1, 1944. A packer's quota for the second half of 1944 shall be computed as follows: He takes the quantity of the product that he packed in fibre drums in the corresponding period of 1943 and multiplies this by the designated quota percentage for that product.

(g) *Inventory restrictions.* No packer shall, at any time, accept delivery of fibre drums which will increase his total inventory of that type or size of drum to more than his requirements for the following sixty day period.

(h) *Certification.* No person shall sell or deliver any fibre drums on orders received on or after October 30, 1944, except where the order is validated by the delivery to such person of a purchaser's certificate signed manually or as provided in Priorities Regulation No. 7. The certificate shall be in substantially the form set forth in this paragraph (h), and, once filed by a purchaser with a supplier covers all future deliveries from that supplier to that purchaser.

The undersigned purchaser certifies, subject to criminal penalties for misrepresentation, that he is familiar with Order L-337 of the War Production Board, and that all purchases from you of items regulated by that order, and the use of the same by the undersigned, will be in compliance with the order, as amended from time to time.

NOTE: Paragraphs (l) through (o) formerly (h) through (n) redesignated Oct. 16, 1944.

Authorizations

(l) *Authorizations.* The War Production Board may authorize persons to pack products, other than those listed in the Schedules, in fibre drums. Application for such authorization shall be made by letter to the War Production Board and such applications will be considered only on the basis of the essential need for, and the supply of, new fibre drums, and the availability of used drums or substitute containers.

General Exceptions

(j) *Fibre drums for certain government agencies.* The restrictions of this order shall not apply (1) to fibre drums manufactured to meet the packaging specifications of, and for delivery to or for the account of, the government agencies listed below, or (2) to fibre drums for delivery of a product for the account of any of the listed agencies, provided the packaging specifications call for fibre drums, or (3) to the purchase, acceptance, use or export of fibre drums by these agencies: Army, Navy, United States Post Office, Federal Reserve System, United States Treasury Department, United Nations Rehabilitation and Relief Administration, any agency procuring for delivery pursuant to the Act of Congress of March 11, 1941, entitled "An Act to Promote the Defense of the

United States" (Lend-Lease Act), Veterans Administration, and Maritime Commission or War Shipping Administration of the United States (including persons operating vessels for such Commission or Administration for use thereon and other persons pursuant to authorization by the Maritime Commission under Form WPB-646 (formerly PD-300)).

Miscellaneous Provisions

(k) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Containers Division, Washington 25, D. C. Ref.: L-337.

(l) *Reports.* Any person affected by this order shall file such reports and questionnaires as the War Production Board may request from time to time, subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(m) *Appeals.* Appeals from this order shall be filed by addressing a letter to the War Production Board, Containers Division, Washington 25, D. C. Ref.: L-337.

The letter of appeal need not follow any particular form. It should state informally, but completely, the particular provision appealed from, the precise relief desired, the reasons why denial of the appeal would result in undue and excessive hardship, and such other statistical and narrative information as may be pertinent.

(n) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

(o) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control and may be deprived of priorities assistance.

Issued this 16th day of October 1944.

PART 3281—PULP AND PAPER

[General Conservation Order M-241, as Amended Oct. 16, 1944]

PAPER AND PAPERBOARD

§ 3281.63 *General Conservation Order M-241—(a) Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time, except to the extent of any inconsistency, in which event the provisions of this order shall govern.

(b) *Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation

or agency, or any organized group of persons whether incorporated or not.

(2) "Produce" and "manufacture" mean and include all making and finishing operations prior to packing or packaging.

(3) "Finished production" means paper or paperboard ready for packing or packaging.

(4) "Grade" means any kind of paper or paperboard for which a caption or subcaption is provided in Form WPB-514 or any particular grade even though not specifically mentioned within such kind, except those grades listed below which are covered by other WPB orders as specified. Also included are all the coated papers not mentioned by captions but for which any captioned grade or item thereunder is used as a base stock.

Paper and paperboard under the following WPB-514 Captions in the table immediately following are specifically excluded from this order and are subject to and should be reported under the appropriate controlling order indicated therein.

TABLE 1

Type	WPB-514 caption	Controlling order

(c) *Restrictions on production of paper and paperboard.* Unless specifically authorized by the War Production Board, no person shall produce paper or paperboard on any paper machine (Yankee, Harper, Fourdrinier, Cylinder or Wet Machine), which did not produce paper or paperboard in the period May 1, 1943 to July 15, 1943 inclusive.

(d) *Reserve production.* (1) (i) Each manufacturer shall reserve in his total

overall production of paper and paperboard for the month of October, 1944, and for each calendar month thereafter time and supplies sufficient to produce and deliver within such month the following percentage applied either to his total production or to his production of a stated "grade" or "class" as indicated in Table 2:

The War Production Board may from time to time change such percentage or percentages and apply percentages to other grades or combinations, by notice in writing to each manufacturer or by publication in the FEDERAL REGISTER at least ten days prior to the first of the month to the production of which such change is applicable.

(ii) When production is reserved by applying a percentage to a stated "grade" or "grades" (See Table 2), the production of such "grade" or "grades" for which a manufacturer is obligated shall be determined by applying the

stated percentage to the average monthly finished production of such "grade" or "grades" which the manufacturer has reported on Form WPB-514 for the most recent three calendar quarters.

When production is reserved by applying a percentage to a "class" or "classes" (See Table 2), the production of such "class" or "classes" for which a manufacturer is obligated shall be determined by applying the percentage to the lesser of: (a) The monthly production of the "class" or "classes" which the manufacturer can produce subject to his authorized use of pulp under Order M-93, or

(b) the average monthly production of the "class" or "classes" which the manufacturer has reported on Form WPB-514 for the most recent three calendar months.

NOTE: The words in quotations refer to listed types in Table 2.

(2) (i) If, on or before the 15th day of any month in which production is reserved, the manufacturer does not receive from the War Production Board directions as to the disposition of all production reserved in such month, he may employ, subject to the provisions of paragraph (d) (2) (ii) below, the production for which no directions have been received, as he may desire consistent with the provisions of this and other orders of the War Production Board.

(ii) If, as of record with the War Production Board on the 15th day of any month, a manufacturer of paper or paperboard has not been credited with accepting voluntarily or by directive from the War Production Board, an order or orders for paper and paperboard to be delivered, directly or through another person to the Armed Forces (i. e., the first six procurement activities listed in paragraph (d) (5)) from his production in such month in a total amount equal to 30% of his reserve production by type the manufacturer shall continue to be obligated for such month until the close of the fourth calendar day prior to the first day of the next succeeding month, for that portion of such percentage of his reserve production for which he has accepted no orders for delivery to the Armed Forces.

(3) The War Production Board may establish in an appendix or appendices to this Order M-241 additional controls over the production, distribution, delivery and use of any grade or combination of grades of paper or paperboard for which 100 percent production is reserved. The reserve of such grade or combination of grades shall then be subject to direction for the entire month and continuously for so long as 100 percent of such production is reserved. When 100 percent of the production of any grade or combination of grades is reserved, the use of reporting Form WPB-3270 is not required for such grade or combination since the full control will be specified in the proper appendix.

(4) (i) Credit for directed tonnage. Should the War Production Board direct a manufacturer of paper or paperboard to accept an order to be shipped from his reserve production, the reserve production for which such manufacturer is obligated shall be reduced (except as provided in the paragraph immediately following) by the tonnage specified in such directive, and such reduction concurrently recorded to such manufacturer's credit on the records of the War Production Board.

(ii) When directed tonnage is not credited. Credit against the reserve production obligations of a manufacturer is not given for the tonnage specified in a directive when the following conditions prevail:

(a) Any one of the first six procurement activities (the Armed Forces) requests a qualified manufacturer to bid on a contract or accept a purchase order from such activity, and

(b) The manufacturer fails to bid on the contract or refuses to voluntarily accept the purchase order, and

(c) The War Production Board records on the acceptance of contracts and purchase orders by such manufacturer against his reserve production show that the acceptance of such contract or part thereof or such purchase order at the time the request was issued would not have caused him to produce more tonnage in any month than his reserve production obligations for such month, and

(d) Because of such failure to bid on the contract or refusal to accept the purchase order, a directive is issued to the manufacturer by the War Production Board.

(iii) Any manufacturer who has accepted, directly or through another person, an order or orders for paper or paperboard to be produced for the account of any activity or use listed in paragraph (d) (5), shall immediately report such acceptance in triplicate on Form WPB-3270 and thereafter shall immediately report to the War Production Board on such form any change requested by the purchaser in any previously reported order or orders, if such change involves cancellation, or a change in quantity or in the month of manufacture. When the proper order or orders or requested changes reported on Form WPB-3270 have been correctly reported to the War Production Board, the manufacturer will be notified accordingly and credit against the manufacturer's reserve production will be recorded, subject to the provisions of paragraph (d) (2) (ii). Thereafter the manufacturer shall produce such orders according to his schedule as so reported to the War Production Board. (The reporting requirements of this paragraph have been approved by the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.)

as a component part of the product or part thereof, or is to be used exclusively for the necessary packaging of the product or part thereof, to be delivered on a contract or purchase order issued by such activity. (Report Government Department, Order Number and Name of Contractor or user. If the use of the paper cannot be identified directly with a Government Order Number by a producer of a product of indirect military or Governmental nature, then the CMP Allotment Symbol, if available, and the name of the product may be supplied for identification.)

(e) Restrictions on inventory. Unless specifically authorized by the War Production Board or excepted by paragraph (e) (4):

(1) Consumers inventories except those covered by M-241-a, L-240, L-241, L-244, L-245, L-340 and L-289. (i) No person shall knowingly deliver to any person except a paper merchant, and no person except a paper merchant shall accept delivery of, any quantity of paper or paperboard if such person's total inventory is, or will by virtue of such delivery become, in excess of the greater of (a) thirty tons or (b) thirty calendar days' supply on the basis of his average rate of consuming such paper and paperboard for the latest preceding three full calendar months.

(ii) Regardless of the provisions of (1) (i) above no person shall knowingly deliver to a manufacturer of folding boxes, setup boxes, or paper shipping sacks and no manufacturer of folding boxes, setup boxes, or paper shipping sacks shall accept delivery of any quantity of paper or paperboard if the manufacturer's total inventory of paper and paperboard is, or will by virtue of such delivery become, in excess of the greater of (a) forty tons or (b) sixty calendar days' supply on the basis of his average rate of consuming such paper and paperboard during the latest preceding three full calendar months.

(2) Merchant inventories. On and after November 1, 1944, no paper merchant shall accept delivery of, and no person shall knowingly deliver to a paper merchant, any paper or paperboard for his warehouse stock if the dollar inventory value, as determined by customary accounting practice, of all paper and paperboard (excluding that which has been sold to and paid for by another person) in the merchant's store and warehouses exceeds or by virtue of such delivery will exceed, fifty per cent (50%) of the merchant's total dollar sales from his warehouse inventory during the latest preceding three full calendar months. Each affiliate, subsidiary or branch is to be considered individually in applying the provisions of this paragraph.

(3) Mill inventories. "Mill inventory" means all paper and paperboard other than that produced or being produced for prompt shipment against a definite order.

No person shall produce at any mill any quantity of paper or paperboard, if his total inventory at such mill is, or will by virtue of such production become, in excess of the greater of (a) thirty tons, or (b) thirty calendar days' supply on the basis of the average rate of shipment of paper or paperboard from such mill during the latest preceding three full calendar months.

(4) (i) Delivery restrictions and certification requirements. No paper merchant, and no person on behalf of a paper merchant, may order or accept delivery, from a mill operator, or other supplier of any paper, unless the buyer furnishes, or has previously furnished, to the person making delivery of certification in substantially the following form signed manually, or as provided in Priority Regulation No. 7 (§ 944.27) by an official duly authorized for such purpose.

(ii) No manufacturer, paper merchant or other person shall sell or deliver paper or paperboard to any other person whose inventory or use of paper or paperboard is controlled by one or more of the orders in List I below unless and until he has received such certificates (if any) as may be called for under the order governing delivery and use of the paper or paperboard by the purchaser:

List I

L-177 Wallpaper manufacturers.
L-240 Newspaper publishers.
L-241 Commercial printers.

L-289 Greeting card and picture postcard producers.
L-294 Display.
L-340 Government commercial printing.
M-241-a Certain converters.
M-241 Paper and paperboard.

(5) Item inventories. The restrictions of paragraph (e) apply equally to paper and paperboard of foreign and domestic origin, and apply to intra company deliveries as defined in § 944.12 of Priorities Regulation No. 1. They do not, however, apply to those papers commonly reported on United States Department of Commerce (Census) Form WPB-514, as revised, under the captions "Blueprint and similar base stock (043110 and 043210); photographic and other sensitizing stock (043130, 043220 and 043230); and Cigarette (047300)"; or to any paper or paperboard after it is printed or converted beyond waxing or coating.

Restriction on delivery and receipt of condenser tissue:

(b) Restrictions on acceptance of delivery. On and after July 1, 1944, no consumer shall accept delivery from a producer of condenser tissue except as authorized by the War Production Board on Form WPB-3680.

(c) Delivery restrictions. On and after July 1, 1944 no producer shall deliver condenser tissue except on an order accompanied by a written statement, manually signed by the consumer or an authorized official of the consumer in the following form:

Authorized under M-241 Appendix A.

This written statement shall constitute a representation (subject to the penalties of Section 35A of the United States Criminal Code) that the consumer is authorized under this and other applicable War Production Board regulations and orders to place the delivery order and receive the items ordered for the purpose for which ordered. The standard certification of Priorities Regulation 7

must not be used instead of the certification described in this paragraph (c).

(d) Ratings. Ratings shall be used in connection with condenser tissue only as may be directed by the War Production Board on form WPB-3680. No consumer shall apply any other rating to any order for condenser tissue or use a rating in any other way to procure condenser tissue from a producer.

(e) The War Production Board may at any time by wire or letter revise a previously issued authorization so as to make any of the paper covered by such authorization available for another use, and, for the purpose of fulfilling a time requirement of the armed forces, may direct a producer to produce and deliver condenser tissue for such requirement prior to the production and delivery of any other condenser tissue.

(f) Applications and reports. (1) Each person who desires to receive a delivery or deliveries of condenser tissue in any calendar month shall file his application in triplicate on Form WPB-3680 with the War Production Board on or before the fifth day of the month immediately preceding such month, or at any other time currently required in such form, and shall furnish the information provided for on such form.

225003 Liquid tight cylindrical can and lid stock	224005 Cup lid stock.
225004 Milk bottle cap and plug stock	224008 Milk bottle cap and plug stock.

(b) Reserve production. (1) The reserve production for which a manufacturer is obligated under this Appendix B shall be determined for each kind of "Sanitary Food Container Stock" by the total monthly production of such kind which the manufacturer can produce subject to his authorized use of pulp under WPB Order M-93.

(2) The War Production Board may at any time direct any manufacturer to employ that part of his reserve production for which no directive has been issued (and which has not been used or for which a definite commitment has not been made to fill a purchase order authorized by the War Production Board) to produce any grade of "sanitary food container stock" and to sell and deliver

such production to any person it may name, and thereafter such manufacturer shall so produce and deliver. The manufacturer may refuse to so sell and deliver such production only for the reasons specified for the refusal of rated orders in § 944.2 of Priorities Regulation No. 1.

(3) A manufacturer may use any part of his reserve production for which he has not received a directive or directives by the War Production Board to produce and deliver the quantity of "sanitary food container stock" specified by a purchaser in an order authorized and certified in accordance with the provisions of paragraph (c) (2) below.

(c) *Delivery restrictions.* (1) On and after July 18, 1944 no person shall purchase or accept delivery from any manufacturer of any quantity of "sanitary food container stock" except as authorized by the War Production Board on Form GA 1959.

(2) On and after July 18, 1944 no person shall sell or deliver any part of his production of "sanitary food container stock" except in accordance with a directive issued by the War Production Board or in fulfillment of a purchase order containing a statement manually signed by an authorized official of the purchaser in the following form:

Authorized by the War Production Board under M-241
 Appendix B. Date of authorization _____
 Authorization No. _____
 Quantity _____

This written statement shall constitute a representation (subject to the penalties of section 35A of the United States Criminal Code) that the purchaser is authorized under this and other applicable War Production Board regulations and orders to purchase and receive the quantity of "sanitary food container stock" ordered, for the purpose, if any, specified in the purchase authorization issued to him by the War Production Board. The Standard Certification of Priorities Regulation 7 must not be used as a substitute for the certification specified in this paragraph (c).

(3) An authorization to purchase given to a converter of "sanitary food container stock" may be passed on by the converter to an intermediate processor, such as a waxer of the stock, and the manufacturer may sell and deliver to the processor under the authorization provided the processor delivers a certificate in the form prescribed in paragraph (c) (2) and also certifies on his order that the stock so purchased under a particular authorization number will be delivered only to the converter to whom the authorization was issued.

(d) *Variations in quantity produced and delivered.* (1) Each directive and each purchase authorization issued by the War Production Board under this order is subject as to quantity manufactured, delivered and accepted, to the following percent of variation in quantity ordered:

	Percent
Less than 20,000 pounds.....	15
20,000 to 40,000 pounds.....	10
40,000 pounds or more.....	5

This variation shall not be exceeded as to delivery, and if exceeded in manufacture, the amount of the excess, unless it can and may be used in filling another authorized purchase order, shall be immediately reported to the War Production Board with information as to the specifications, amounts, and name of purchaser who ordered it. The War Production Board will thereafter promptly direct its disposition.

(2) If, on or before the 15th day of the second month in any calendar quarter year, a manufacturer has not received directives and accepted authorized purchase orders for "sanitary food container stock" in a total tonnage equal to the total tonnage he is able to produce in such calendar quarter year,

subject to his use of pulp authorized under Order M-93, he shall on or before the 20th day of such month mail to the War Production Board a statement of the tonnage of each kind of "sanitary food container stock" he is able to produce in such calendar quarter year over and above the tonnage for which he has received directives or accepted authorized purchase orders. The War Production Board will thereafter endeavor to see that such manufacturer receives directives or authorized purchase orders of sufficient tonnage to cover such production. This provision shall not prevent the manufacturer from accepting authorized purchase orders thereafter voluntarily offered him and is only for the purpose of assuring the full production authorized under Order M-93 and the distribution of any unsold production to those who have not received the full amount they have been authorized to purchase.

(3) If, for any reason beyond his control, a manufacturer finds he is unable to use in any calendar quarter year the pulp allocated to him for the manufacture of "sanitary food container stock" or to produce and deliver during such calendar quarter year in accordance with any directive or directives issued to him by the War Production Board or to produce and deliver any authorized purchase order or orders accepted by him for production in such quarter year, he shall immediately so notify the War Production Board giving specific information with respect to each such directive or purchase order as to name of customer, specifications, promised shipping dates and the tonnage of the pulp allocated to him which he is unable to use in such quarter. The War Production Board may, pursuant to Order M-93, direct that the pulp such manufacturer is unable to use for producing such directives or authorized purchase orders be sold and shipped to another manufacturer or manufacturers of such stock for use in manufacturing such "sanitary food container stock" and may, pursuant to M-93 authorize such other manufacturer to use such pulp for manufacturing such stock. Thereafter, such other manufacturer's reserve production of "sanitary food container stock" shall be correspondingly increased.

(e) This Appendix B of M-241 is subject to all the provisions of M-241 not inconsistent with the provisions of this Appendix except the provisions of paragraphs (d) (2) and (d) (4).

Note: The reporting requirements of this appendix have been approved by the Bureau of the Budget, pursuant to the Federal Reports Act of 1942.

PART 3281—PULP AND PAPER

[General Conservation Order M-241-a, as Amended Oct. 16, 1944]

CONSERVATION OF PAPER AND PAPERBOARD

§ 3281.64 *General Conservation Order M-241-a—(a) Definitions.* For the purpose of this order:

(1) A "converted product" means any article or type of converted paper resulting from the processing of pulp, paper, or paperboard which alters the original form or characteristics of the pulp, paper, or paperboard. (xvi) A "flashlight" as defined in General Limitation Order L-71.

(2) A "converter" is any person who, regardless of the identity or nature of his business, manufactures or assembles any converted product.

(b) *Computation of quotas for a portion of a calendar quarter.* Each converter whose quota provisions for a current calendar quarter are affected by this or any subsequent amendment to this order shall compute his permitted quota on a pro rata basis from the effective date of the order for the balance of the current calendar quarter.

(c) *Unrestricted consumption of pulp, paper and paperboard in the manufacture of certain converted products.* Any converter may consume any quantity of pulp, paper and paperboard in the manufacture and assembly of any converted product shown on List A of this order.

(d) *Restriction on consumption of pulp, paper and paperboard in the manufacture of certain named converted products.* (1) No converter shall consume in the manufacture or assembly of any converted product on List B, List C or List D of this order any quantity, in tons, of pulp, paper and paperboard greater than the quantity ascertained:

For the final quarter of 1943, and for each calendar quarter thereafter, by applying the entire percentage figure for each such converted product, as shown in paragraph (d) (2) of this order, to the quantity, in tons, of pulp, paper and paperboard consumed by such person in the manufacture or assembly of such product during the corresponding calendar quarter of 1942.

(2) The following percentage figures shall be used for the calculations described in the preceding paragraph (d) (1):

	Percent

(ii) List C products.....	100
(iii) List D products.....	80

(3) [Deleted Oct. 5, 1943]

(e) *Restrictions on consumption of pulp, paper and paperboard in the manufacture of converted products not specifically listed.* (1) No converter shall dur-

ing the final calendar quarter of 1943 or during any calendar quarter thereafter consume in the manufacture or assembly of any converted product not named on List A, List B, List C or List D of this order, any quantity, in tons, of pulp, paper and paperboard greater than 65 percent of the tonnage consumed in the manufacture or assembly of such converted product during the corresponding calendar quarter of 1942.

(2) In the instance of any converted products not named on any of the lists of this order, the following processes and operations shall not be considered as processing:

(i) Cutting, trimming or rewinding to a different size when such is performed as part of any established finishing room procedure and provided the paper or paperboard so processed is not intended for a use which serves to defeat the purpose of the order. (Example: the cutting of plain paper to a given size for use as a tray cover, the manufacture of which is curtailed by this order).

(ii) Punching or corner cutting.

(iii) Super-calendering.

(iv) Laminating.

(v) Coating, friction calendering, flint glazing, plating and embossing.

(vi) Collating and binding.

(vii) Printing, when such contributes to the functional value of the product to such a degree that the product would be incapable of performing the use intended if not printed, (Examples: advertising streamers, posters, menus, programs, timetables, sheet music, patterns, decalcomania transfers, checks), or when such printing is an intermediate process in the manufacture of an article or type of converted paper.

(viii) Printing wrappers (excluding gift wrappings) when printing is the only conversion operation other than cutting or trimming.

(ix) Embossing, corrugating, creping and crinkling for industrial and non-decorative uses.

(f) *Alternate method of calculating quotas.* As an alternate method of calculating quarterly quotas for any converted product, any person may, after the filing of a notice in writing with the War Production Board, elect to apply the percentages established by paragraphs (d) and (e) (1) of this order to one fourth of his total yearly consumption of pulp, paper and paperboard in such product during 1942. When such election has been made and the required notice in writing has been given to the War Production Board, the method of determining quotas may not thereafter be changed.

(g) *Converter's responsibility in determining coverage of this order.* It shall be the duty of each converter to determine in the first instance which of his products are included among the converted products referred to in this order. In case of doubt he may apply to the War Production Board in writing describing the product in question, for a specific ruling determining whether or not the same is so included. The War Production Board may of its own motion in any case, by telegram or letter, issue a specific ruling determining whether

or not a particular product of a particular converter is so included.

(h) *Inventory restrictions.* No converter shall accept delivery of, and no person shall knowingly deliver to a converter, any quantity of pulp, paper or paperboard if the total inventory of pulp, paper and paperboard in the possession of the converter is, or will by virtue of such delivery become, in excess of the greater of the following: (1) thirty tons, or (2) a thirty days supply, based on the converter's average rate of consuming pulp, paper and paperboard during the latest preceding full calendar month.

(i) *Certification to paper dealer or mill.* No converter of paper, and no person on behalf of a converter of paper, may order or accept delivery, from a paper merchant, mill operator, or other supplier of any paper for use in converting paper, unless the buyer furnishes, or has previously furnished, to the person making delivery, certificate in substantially the following form, signed manually, or as provided in Priority Regulation No. 7 (§ 944.27) by an official duly authorized for such purpose:

The undersigned converter certifies, subject to the penalties of section 35 (A) of the U. S. Criminal Code, to the seller and to the War Production Board that he is familiar with Order M-241-a and that all purchases by him of items regulated by that order, as amended from time to time, will be in compliance therewith.

The above certificate must be used and the certification provided for in Priority Regulation No. 7 may not be used in its place or stead.

This is a one-time certification and need not accompany each individual order for paper.

NOTE: Paragraphs (j) through (n), formerly (l) through (m), redesignated Oct. 16, 1944.

(j) *Allocations.* The War Production Board may from time to time direct the production and delivery of specific quantities of any converted product included in this order. Such directions will be made to insure the satisfaction of war requirements both direct and indirect and essential civilian requirements and shall take precedence over any preference rating to the extent indicated by the War Production Board.

(k) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(l) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(m) *Violations.* Any person who willfully violates any provisions of this or-

der, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance.

(n) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Paper Division, Washington 25, D. C. Ref: M-241-a.

Issued this 16th day of October 1944.

LIST E (Deleted Oct. 5, 1943)**INTERPRETATION 1—WAXED PAPER CONVERSION**

"Waxed and oiled paper, all types and grades other than household packages, excluding waxed paper wrappings for direct war use as provided in List A," as that caption appears in List B of General Conservation Order M-241-a, applies to all the kinds of paper so described regardless of whether produced as a result of a separate converting operation, as is commonly the case, or produced as a result of having been oiled or waxed on the paper machine. For the purpose of this order control has been placed on the end product. The method employed in consuming paper in the manufacture of the end product is not a factor of consideration in determining the applicability of the order. (Issued Feb. 15, 1944.)

INTERPRETATION 2—RETAIL UNITS

This interpretation of General Conservation Order M-241-a applies to the consumption of paper in the manufacture of retail units of wrapping and other papers as dispensed through the variety chain stores, the department stores, the stationery stores and all other retail outlets. These retail units are regarded as within the definition of a "converted product" in Order M-241-a and therefore subject to the restrictions contained in paragraphs (d) or (e) of the order.

All grades and kinds of paper, plain or printed, when converted into retail units for wrapping purposes are subject to the order, although the percentage restriction on consumption need not be separately applied to each of the grades and kinds of paper consumed during the base period. It is permitted to calculate an aggregate quota and to consume any grade or kind of paper, plain or printed, within the quota without regard to the maintenance of the same relationship of grade and kind that prevailed during the base period.

Any person who did not consume paper during the base period of the order in the conversion of such retail units of wrapping and other papers has no basis from which to calculate a quota and, therefore, cannot become a converter.

There is a distinction in the instance of printed wrapping paper as follows:

1. When printed wrapping paper is delivered by the printer in bulk form (not packaged) for further sale or further distribution the printer is the "converter" as defined in the order, and, therefore, subject to the restrictions of paragraph (e); but,

2. If the printer delivers the printed wrapping paper to a person for subsequent conversion into retail units, the final converter is the one subject to the restrictions of paragraph (e) and not the printer.

Since retail units are regarded as a separate and distinct type of "converted product," it is obvious that tonnage from other products cannot be included when calculating a quota for retail units.

Plain wrapping tissue purchased in quires, or flat, when subsequently folded and labeled or otherwise packaged, is deemed to be a retail unit and therefore restricted by paragraph (e).

Quota tonnage which has not been consumed at the end of a calendar quarter may not be carried over to the succeeding calendar quarter. (Issued Feb. 15, 1944.)

INTERPRETATION 3—PUNCH BOARDS, PULL BOARDS AND SIMILAR ARTICLES

This interpretation of General Conservation Order M-241-a applies to punch boards, pull boards and similar articles. Punch boards, pull boards and similar articles are not included in "Games and Toys" on List D of the order. They are to be considered as coming within the provision of paragraph (e) (1) of the order. (Issued May 26, 1944.)

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L-335, Direction 1 as Amended Oct. 16, 1944]

SAWMILLS' SHIPMENTS OF DOUGLAS FIR, WHITE FIR, NOBLE FIR, SITKA SPRUCE (EXCEPT AIRCRAFT GRADE) AND WEST COAST HEMLOCK

The following amended direction is issued pursuant to Order L-335:

(a) *What sawmills are covered by this direction.* This direction applies only to sawmills located in the States of Oregon and Washington west of the crest of the Cascade Mountain range which produce the following species of lumber: Douglas fir (*pseudotsuga taxifolia*), White fir, Noble fir, Sitka spruce, (except aircraft grade of Sitka spruce) and West Coast hemlock.

(b) *Military orders placed with sawmills that take precedence over other orders.* This paragraph applies to every sawmill mentioned in paragraph (a) above which currently produces 25,000 or more board feet of lumber (whether one of the named species or not) per average day of eight hours of continuous operation or which produced an average of 25,000 or more board feet of lumber per day during the days from June 3, 1943 to December 3, 1943 on which it was in operation. Starting with the month of August 1944, sawmills that receive orders of the types described in paragraph (c) below must accept and ship such orders in preference to all other orders (except orders rated AAA) to the extent that such orders do not require more than 35 percent of the sawmill's anticipated monthly shipments of all species listed in paragraph (a) above. Such an order may not be accepted by a sawmill after the beginning of the month preceding the month of shipment if the acceptance of the order would result in displacing other certified and rated orders amounting to more than 10 percent of the sawmill's anticipated monthly shipments. A sawmill's shipment on such

orders shall be in the sizes required by the agency or person placing the order.

(c) Military orders. The following types of certified and rated orders placed with a sawmill shall be accorded the treatment provided for in paragraph (b) above and shipments made on such orders may be credited against the percentage that a sawmill is required to ship under that paragraph in preference to other orders:

(1) Orders for the Account of the United States Government placed by the U. S. Army, U. S. Navy, U. S. Marine Corps, U. S. Coast Guard, U. S. Maritime Commission, and War Shipping Administration;

(2) Orders for the account of the United States Government placed by the Treasury Department, Procurement Division on behalf of the Foreign Economic Administration bearing the symbol DA-TF3;

(3) Orders placed by any other person which bear a certification of the Central Procuring Agency, Procurement Division of the United States Corps of Engineers to the effect that the lumber purchased thereby is for the use of one of the agencies mentioned in subparagraph (1) or subparagraph (4) of this paragraph, or is for "command construction" or "advance base procurement". A person who receives such a certificate from the Central Procuring Agency may extend that certificate in placing orders with his supplier to the extent necessary to replace lumber delivered or to obtain lumber required for delivery on the order bearing the original certificate of the Central Procuring Agency.

(4) Orders placed for the account of the United States Government by the Veterans Administration or orders placed by any other person bearing a certification of the Director of Construction of the Veterans Administration to the effect that the lumber purchased thereby is for use on construction work done for the Veterans Administration.

For the purposes of this direction "orders" shall be deemed to include the memorandum of purchase issued by the Central Procuring Agency on ED Form 526 commonly known as a "purchase allocation." A "purchase allocation" order is not to receive the preferential treatment to be accorded military orders under paragraph (b) above unless it is one of the types of orders described above.

(d) Other military orders. The amount of lumber that must be made available to the military on orders receiving the preferential treatment described in paragraph (b) is the minimum and a sawmill must continue to accept other orders coming from the same sources for lumber in excess of the required percentage mentioned in paragraph (b) in accordance with paragraphs (x) (1) and (x) (2) of Order L-335, but orders placed with a sawmill over and above the required 35 percent shall be treated like any other order and they will not take precedence over other orders which are equally or higher rated.

(e) Sawmills producing less than 25,000 board feet not getting certified orders may ship on uncertified orders. Any sawmill defined in paragraph (a) which is smaller than the type of sawmill included in paragraph (b) must accept certified orders (whether military or not) of consumers and distributors offered it in accordance with paragraphs (x) (1) and (x) (2) of Order L-335 but if such a sawmill has not been offered certified orders for all of its lumber

it may ship the balance to lumber distributors or consumers on uncertified and unrated orders. A shipment of lumber on an uncertified and unrated order must not be made if it will interfere with the filling of a certified order.

Issued this 16th day of October 1944.

(d) Other military orders. The amount of lumber that must be made available to the military on orders receiving the preferential treatment described in paragraph (b) is the minimum and a sawmill must continue to accept other orders coming from the same sources for lumber in excess of the required percentage mentioned in paragraph (b) in accordance with paragraphs (x) (1) and (x) (2) of Order L-335, but orders placed with a sawmill over and above the required 20 percent shall be treated like any other order and they will not take precedence over other orders which are equally or higher rated.

General Provisions

(f) Appeal. Any appeal from the provisions of this order shall be made by filing a letter, in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(g) Equitable distribution. It is the policy of the War Production Board that items covered by this order not required to fill rated orders shall be distributed equitably. In making such distribution, due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy, every seller of such items, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location, or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction may be deemed a violation.

(h) Communications to the War Production Board. All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Division, Washington 25, D. C. Ref: L-224.

(i) Violations. Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

Issued this 14th day of October 1944.

By J. JOSEPH WHELAN,

PART 1351—FOOD AND FOOD PRODUCTS
[FFR 3, Supp. 5]

LINSEED PRODUCTS

Such specifications and standards as are used in this supplement were, prior to such use, in general use in the trade or industry.

A statement of the considerations involved in the issuance of this supplement, issued simultaneously herewith, has been filed with the Division of the Federal Register.

ARTICLE II—PRICING PROVISIONS

SEC. 6. Base per ton prices for linseed products. Base prices for linseed products are set forth below. These prices depend upon the giving and fulfilling of a guarantee of minimum protein content, and vary with the location of the production plant. Paragraphs (a) through (e) pertain to base prices for domestically produced products. In addition, paragraph (f) sets forth a separate base price for all importers.

The base prices set forth in this section are for sales or deliveries of 60,000 pounds or more, for carload shipments, and for pool car lots. In the event you sell and deliver a less than carload lot, you may add \$1.00 per ton to the price listed below in arriving at your base price.

(a) If you guarantee, at the time of sale, that the lot will contain, at a minimum, any of the protein guarantees specified below for the commodity at the point of production, and you fulfill such guarantee by delivering a lot with at least such protein content, base per ton prices at the following points are as follows:

	Guaranteed protein content	Oil meal or cake	Sized cake or pellets	Linseed feed or flaxseed screenings oil feed
1. Minneapolis and Red Wing, Minn.....	32% or more.....	\$42.00	\$43.50
2. Chicago, Ill. and Milwaukee, Wis.....	32% or more.....	44.50	46.00	\$37.00
3. Cleveland and Toledo, Ohio.....	32% or more.....	46.00	47.50	39.50
4. Emporia and Fredonia, Kans.....	32% or more.....	46.00	47.50	41.00
5. Buffalo, New York.....	32% or more.....	46.00	47.50	41.00
6. Amsterdam, New York.....	34% or more.....	45.00	46.50	41.00
7. Edgewater and Newark N. J.; Philadelphia, Pa.; Brooklyn and Staten Island, N. Y.....	32% or 33%.....	43.00	44.50	40.00
8. Corpus Christi, Harlingen and Houston, Texas.....	32% or more.....	47.00	48.50	40.00
9. Los Angeles, Calif.....	34% or more.....	46.00	47.50	42.00
10. San Francisco, Calif.....	32% or 33%.....	44.00	45.50	39.00
11. Fresno, Calif.....	28% up to 32%.....	42.00	43.50	39.00
12. Portland, Oregon.....	30%.....	44.00	45.50	41.00
	32% or more.....	42.00	43.50	39.00
	30%.....	42.00	43.50	37.00

(b) If you guarantee, at the time of sale, that the lot will contain, at a minimum, any specified protein content lower than the percentage shown above for the commodity at that point, and if you fulfill such guarantee by delivering a lot with at least the minimum protein content guaranteed, base per ton prices at any point named above are as follows:

(1) If you deliver linseed oil meal, oil cake, sized cake or pellets, you subtract from the lowest base price listed above for that commodity at the same point \$1.30 per ton for each unit of protein or fraction thereof by which the guarantee you give is under the protein guarantee appropriate for such lowest base price.

(2) If you are delivering linseed feed or flaxseed screenings oil feed, you subtract from the prices listed above for the same commodity at the same point, \$0.75 per ton for each unit of protein or fraction thereof by which your guarantee is under the guarantee named above for the same commodity at the same point.

(c) If the lot you are pricing is produced at any point in the United States other than one named above, and if at the time of sale you give a guarantee of minimum protein content which you fulfill on delivery, the base price is the same as the base price established in paragraph (a) or (b) above for the same commodity sold and delivered under the same circumstances and produced at the point nearest to the point at which the lot you are pricing was produced.

(d) If, at the time of sale, you guarantee any minimum protein content, and you deliver a lot that falls short of your guarantee, you determine your base price by dividing the base price that would be applicable if the guarantee had been fulfilled by the number of units guaranteed and multiplying that result by the number of full units of protein in the lot.

(e) If, at the time of sale, you do not guarantee any minimum protein content, you figure your base price by multiplying the number of full units of protein in the lot by \$1.20. Your base price may not, however, exceed the prices established in paragraphs (a) and (c) above for the same commodity with standard protein guarantee, produced at the same point.

(f) *Base prices for importers.* The base per ton price for an importer at any point is the sum of the importer's transportation cost from the point of entry to such point plus the appropriate price set out in paragraph (a), (b), (c), (d) or (e) above for the same commodity sold and delivered under the same circumstances and produced at the point of entry.

SEC. 7. Maximum prices for sales by processors. Section 3.1 of Food Products Regulation No. 3, which provides a pricing method for processors, is applicable to this supplement.

(a) *Base prices.* The base price referred to in section 3.1 is the appropriate base price found in section 6 of this supplement.

NOTE: If you are the importer as well as the processor of the lot, you determine your

base price under section 6 (1) of this supplement.

(b) *Maximum markup.* As a processor you are not permitted to add a maximum markup in figuring the maximum price for the sale of any lot unless you have unloaded such lot into a warehouse or store operated by you as a separate place of business not located at the production plant and you sell from such warehouse or store. If, as to any lot, you comply with this requirement, you may add the appropriate one of the following markups:

	<i>Per ton</i>
If you sell to a feeder from a store.....	\$4.50
In all other cases.....	1.50

(c) *Transportation cost.* The transportation cost referred to in section 3.1 is defined in section 1.20 of Food Products Regulation No. 3. However, if you are a processor selling in carload lots from your plant at Red Wing, Minnesota, you should add, instead of your transportation cost as defined in section 1.20, the flat or proportional carload freight rate, whichever is lower, from Minneapolis to the point at which you deliver to your customer.

SEC. 8. Maximum prices for sales by trucker-merchants. Section 3.2 of Food Products Regulation No. 3, which provides a pricing method for trucker-merchants, is applicable to this supplement.

(a) *Your supplier's maximum price.* Section 3.2 refers to "your supplier's maximum price on the sale to you". It is defined in section 1.14 of Food Products Regulation No. 3.

(b) *Hauling allowance.* Section 3.2 of Food Products Regulation No. 3 also refers to "hauling allowance". That term is defined in section 1.21 of Food Products Regulation No. 3.

SEC. 9. Maximum prices for sales by jobbers and car door sellers. Section 3.3 of Food Products Regulation No. 3, which provides a pricing method for jobbers and car door sellers, is applicable to this supplement.

(a) *Your supplier's maximum price.* Section 3.2 refers to "your supplier's maximum price on the sale to you". It is defined in section 1.14 of Food Products Regulation No. 3.

(b) *Maximum markup—(1) Jobbers.* If you are a jobber and no other jobber has already handled the same lot, you may add one of the following maximum markups:

	<i>Per ton</i>
For delivery in pool car lots.....	\$1.00
For all other deliveries.....	.75

(2) *Car door sellers.* If you are a car door seller, you may add a maximum markup of \$3.50 per ton for sales or deliveries of all linseed products.

SEC. 10. Maximum prices for sales by wholesalers and retailers. Section 3.4 of Food Products Regulation No. 3, which provides a pricing method for wholesalers and retailers, and section 3.5 of Food Products Regulation No. 3, which provides base prices for wholesalers and retailers, are applicable to this supplement.

(a) *Base prices.* Base prices referred to in section 3.4 are the base prices set

out in section 3.5 of Food Products Regulation No. 3.

(b) *Maximum markup.* This regulation aims to prevent the inclusion in any maximum price of more than one markup for any class of seller. As a retailer, you can always add a retailer's markup since a seller can qualify as a retailer only when he is selling a particular lot to a person who will use the lot and will not resell it. It is therefore impossible for two retailers to handle the same lot. As a wholesaler, however, you are permitted to add the maximum markup set out below in figuring the maximum price for the sale of any lot only if no other wholesaler has already handled the lot. On this condition, the following maximum markups may be added:

	<i>Per ton</i>
Wholesalers.....	\$2.50
Retailers.....	5.50

SEC. 11. Maximum prices for sales by government agencies, including Commodity Credit Corporation. The maximum price which a government agency, including the Commodity Credit Corporation, may charge is the same price the processor could charge for the same sale.

SEC. 12. Charges for sacks and sacking. Section 3.6 of Food Products Regulation No. 3, dealing with increases for sacks, and section 3.7 of Food Products Regulation No. 3, dealing with sacking charges, are applicable to this supplement.

This supplement shall become effective on the 19th day of October 1944.

NOTE: The record keeping provisions of this regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 14th day of October 1944.

CHESTER BOWLES,
Administrator.

PART 1351—FOOD AND FOOD PRODUCTS
[FPR 3, Supp. 6]

ALFALFA HAY PRODUCTS

In the judgment of the Administrator, it is necessary and proper to revise, in certain minor respects, the maximum prices established for the alfalfa hay products covered prior hereto by Second Revised Maximum Price Regulation 456, and to reissue the existing regulation as a Supplement to Food Products Regulation No. 3. Accordingly, this supplement supersedes Second Revised Maximum Price Regulation 456 insofar as that regulation establishes maximum prices for sales of alfalfa hay products as that term is defined herein.

Such specifications and standards as are used in this supplement were, prior to such use, in general use in the trade or industry.

A statement of the considerations involved in the issuance of this supplement, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

*Copies may be obtained from the Office of Price Administration.

ARTICLE II—PRICING PROVISIONS

SEC. 6. Base per ton prices for alfalfa hay products. Base prices for all alfalfa hay products are set forth below. Paragraph (c) sets forth a separate base price for all importers. Base prices vary with the location of the production plant. These base prices vary also with the method by which the products are produced; you can have either sun cured or dehydrated products.

The following are base prices for sales or deliveries of 60,000 pounds or more and for a carload shipment or pool car lot. To determine the base price for any alfalfa hay product, you first take the price you find in Table I which is appropriate for the location of your production plant and to the particular lot, and then you add or subtract the differentials appropriate to your sale found in Tables II or III, or the differential you figure under paragraph (b) (3) of this section. In the event you sell and deliver a less-than-carload lot of any alfalfa hay product, you may add \$1.00 per ton to the prices listed below in arriving at your base prices.

(a) Prices per ton by location are as follows:

during July 1943, between the processor's price, bulk, f. o. b. his production plant for No. 1 fine ground sun cured alfalfa meal having less than 15 per cent protein, and his bulk, f. o. b. production plant price for the product in question. If the processor had no such differential he shall take the July 1943 customary trade differential between the two. This differential shall be added or subtracted as is appropriate in each case, pursuant to the practice during July 1943.

(c) *Base prices for importers.* The base per ton price for an importer at any point is the sum of the importer's transportation cost from the point of entry to such point, plus the appropriate price set out in paragraph (a) and (b) above for the same commodity produced at the point of entry.

SEC. 7. *Maximum prices for sales by processors.* Section 3.1 of Food Products Regulation No. 3, which provides a pricing method for processors, is applicable to this supplement.

(a) *Base prices.* The base price referred to in section 3.1 is the appropriate base price found in section 6 of this supplement.

NOTE: If you are the importer as well as the processor of the lot, you determine your base price under section 6 (c) of this supplement.

(b) *Maximum markup.* As a processor you are not permitted to add a maximum markup in figuring the maximum price for the sale of any lot unless you have unloaded such lot into a warehouse or store operated by you as a separate place of business not located at the production plant, and you sell from such warehouse or store. If, as to any lot, you comply with this requirement, you may add the appropriate one of the following markups:

If you sell to a feeder from a store.....	Per ton \$9.00
In all other cases.....	1.50

(c) *Transportation cost.* Section 3.1 refers to "transportation cost." It is defined in section 1.20 of Food Products Regulation No. 3. However, on a shipment involving a rail movement, charges incurred in getting the lot of alfalfa hay products being sold to the rail point of origin may not be included as part of your transportation cost.

SEC. 8. *Maximum prices for sales by trucker-merchants.* Section 3.2 of Food Products Regulation No. 3, which provides a pricing method for trucker-merchants, is applicable to this supplement.

(a) *Your supplier's maximum price.* Section 3.2 refers to "your supplier's maximum price on the sale to you." It is defined in section 1.14 of Food Products Regulation No. 3.

(b) *Hauling allowance.* Section 3.2 of Food Products Regulation No. 3 also refers to "hauling allowance". That term is defined in section 1.21 of Food Products Regulation No. 3.

SEC. 9. *Maximum prices for sales by jobbers and car door sellers.* Section 3.3 of Food Products Regulation No. 3, which provides a pricing method for jobbers and car door sellers, is applicable to this supplement.

(a) *Your supplier's maximum price.* Section 3.3 refers to "your supplier's maximum price on the sale to you". It is defined in section 1.14 of Food Products Regulation No. 3.

(b) *Maximum markup*—(1) *Jobbers.* If you are a jobber and no other jobber has already handled the same lot, you may add one of the following maximum markups:

For deliveries in pool car lots.....	Per ton \$1.00
For all other deliveries.....	.75

(2) *Car door sellers.* If you are a car door seller, you may add a maximum markup of \$5.00 per ton for sales or deliveries of all alfalfa hay products.

SEC. 10. *Maximum prices for sales by wholesalers and retailers.* Section 3.4 of Food Products Regulation No. 3, which provides a pricing method for wholesalers and retailers, and section 3.5 of Food Products Regulation No. 3, which provides base prices for wholesalers and retailers, are applicable to this supplement.

(a) *Base prices.* Base prices referred to in section 3.4 are the base prices set out in section 3.5 of Food Products Regulation No. 3.

(b) *Maximum markups.* This regulation aims to prevent the inclusion in any maximum price of more than one markup for any class of seller. As a retailer you can always add a retailer's maximum markup since a seller can qualify as a retailer only when he is selling a particular lot to a person who will use the lot and will not resell it. It is therefore impossible for two retailers to handle the same lot. As a wholesaler, however, you are permitted to add the maximum markup set out below in figuring the maximum price for the sale of any lot, only if no other wholesaler has already handled the lot. On this condition, the following maximum markups may be added:

Wholesalers.....	Per ton \$2.50
Retailers.....	7.00

SEC. 11. *Charges for sacks.* Section 3.6 of Food Products Regulation No. 3, dealing with increases for sacks, is applicable to this supplement.

That record must show all orders received, indicating which were accompanied by certificates and the dates of receipt. He must also keep a record of acquisitions and transfers for which he was not required to surrender or obtain certificates. His record must also show the number of stoves delivered on all orders and the dates of delivery.

6. A center heading immediately preceding section 14.1 is added to read as follows: "Article XIV—Special Provisions for Coal or Wood Heating and Coal or Wood Cooking Stoves."

7. Sections 14.1, 14.2 and 14.3 are added to read as follows:

SEC. 14.1 *Coal or wood heating or cooking stoves are certificate free.* (a) Regardless of any other provision of this order:

(1) After October 15, 1944, coal or wood heating and coal or wood cooking stoves may be transferred by any person to any other person without the surrender of certificates.

(2) After October 15, 1944, no consumer may transfer a certificate for such a stove, and no person may accept such a certificate from a consumer.

(3) No such certificate may be issued to any consumer after October 15, 1944, or to any other person after October 31, 1944, except as provided in section 5.4.

(4) After October 31, 1944, no person may transfer or acquire such a certificate. (This subparagraph does not apply to the surrender of such certificates to the War Production Board under section 4.3 or to the Office of Price Administration under section 5.2 or the receipt by mail of such certificates in envelopes postmarked by 11:59 p. m. October 31, 1944, under section 14.3.)

(b) After October 15, 1944, the requirement stated in the sections under this Article XIV and in the following sections are the only ones that apply to coal or wood heating or coal or wood cooking stoves; section 3.10 (Distributors and dealers must keep records); section 4.2 (Manufacturers must file reports); section 4.3 (Manufacturer must send in certificates with his monthly report); section 4.4 (Manufacturers must keep records); section 5.2 (Certificates are the property of the Office of Price Administration and may be revoked); section 5.4 (Combining and splitting up certificates); section 5.5 (How to replace lost, stolen, destroyed, damaged or mutilated certificates); section 6.5 (Dealers, distributors and manufacturers may not discriminate in sale of stoves); section 8.1 (Records must be kept for two years);

(b) Every dealer and distributor shall also keep with the other records required by this order all certificates for coal or wood stoves, which he has on November 1, 1944 and which he receives after that date.

SEC. 14.3 *Orders accompanied by certificates for coal or wood stoves, placed by dealers or distributors before November 1, 1944, are given preference over certificate-free orders.* (a) A dealer or distributor may place orders for coal or wood heating or coal or wood cooking stoves accompanied by certificates (endorsed in the manner prescribed by section 5.3 (b) if the orders are delivered to his supplier by 11:59 p. m. October 31, 1944 (or are sent by mail and the envelope is postmarked by that time). Every person who receives such an order within that time limit must deliver the stoves so ordered (unless he is excused by section 6.5 (b) from making such delivery) before he delivers stoves of the same type and model against orders (whether received before or after that date) not accompanied by certificates from persons or agencies other than those specified in section 1.3 (c).

PART 1436—PLASTIC AND SYNTHETIC RESINS

[MPR 406,¹ Amdt. 5]

SYNTHETIC RESINS AND PLASTIC MATERIALS AND SUBSTITUTE RUBBER

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 406 is amended in the following respects:

1. A new listing is added to the table of contents between the listings of section 20 and Appendix A to read as follows:

21. Synthetic resins and plastic materials; applications for adjustment.

2. A new section 21 is added to read as follows:

SEC. 21. *Synthetic resins and plastic materials; applications for adjustment.* If the materials and labor used by a manufacturer in the production of a synthetic resin or plastic material of a class listed in paragraph (a) hereof have increased in cost to him so substantially that his maximum price therefor could be adjusted upward under the standards of this section, and the War Production Board has made a finding that such a synthetic resin or plastic material is in short supply, he may file an application for adjustment of his maximum price for the product. The application shall be submitted to the Chemicals and Drugs Price Branch, Office of Price Administration, Washington 25, D. C., and shall contain the information hereafter specified.

(a) *Classes of synthetic resins and plastic materials subject to the provisions of this section.* (1) Synthetic resins containing 50% or more of gum rosin.

(b) *Amount of adjustment.* Any adjustment made under this section shall ordinarily be limited as set forth below: (As used below, "over-all profits" means over-all aggregate dollar profits, adjusted for changes in investment and before de-

duction of income and excess profits taxes, of applicant or of the entire investment enterprise; "other manufacturing costs and general administrative and selling expenses per unit" means other manufacturing costs and general administrative and selling expenses per unit as of the date a maximum price for the product in question was first established by regulation or order, or as of the date an application for adjustment is filed hereunder, whichever is lower).

(1) *Primary limitations.* Adjustments shall in the first instance be limited to:

(i) An amount sufficient to make the adjusted price per unit equal to direct cost plus other manufacturing costs per unit where applicant's current over-all profits on an annual basis are favorable as judged by his own or the industry's historical experience.

(ii) An amount sufficient to make the adjusted price per unit equal to unit direct cost, plus other manufacturing costs and administrative and selling expenses per unit, where applicant's current over-all profits on an annual basis are normal as judged by his own or the industry's historical experience. However, the increase shall not ordinarily exceed the least amount which will cause his current over-all profits on an annual basis to be favorable as judged by his own or the industry's historical experience.

(iii) An amount sufficient to make the adjusted price per unit equal to total cost per unit, plus an adequate margin of profit per unit, where applicant's current over-all profits on an annual basis are unfavorable as judged by his own or the industry's historical experience. However, the increase shall not ordinarily exceed the least amount which will cause his current over-all profits on an annual basis to be favorable as judged by his own or the industry's historical experience.

(2) *Special limitations*—(i) *Synthetic resins containing 50% or more of gum rosin.* Any adjustment granted hereunder with respect to a synthetic resin containing 50% or more of gum rosin shall be further limited to an amount equal to the difference between the cost, currently, and at the time the maximum price being adjusted was established for the synthetic resin by regulation or order, of gum rosin contained in the synthetic resin.

(c) *Information to be submitted.* (Provided, however, That if applicant seeks adjustment of his maximum price per unit to a price no higher than unit direct cost (i. e. materials plus direct labor cost per unit) plus other manufacturing cost per unit, he need not include in the application the profit and loss statements and balance sheets mentioned below):

(1) Name, description, unit of sale and production, established maximum selling prices of the product, and full terms of sale.

(2) Sales volume of the above designated product, in units and dollars for the last complete calendar or fiscal year, for the latest periods of the current year for which information is available, the

estimated future sales in units for the 3 months next following the date an application for adjustment is filed hereunder (assuming the adjustment proposed is granted). Also total over-all dollar sales for the last complete calendar or fiscal year and for the latest periods of the current year for which information is available.

(3) Cost of production per unit for the product currently and at the time a maximum price was first established for the product by regulation or order, including:

(i) Itemization of unit direct cost (i. e. materials plus direct labor cost per unit) including the cost and quantity of each item of material and, if increased labor costs are shown, a full explanation of the reason for the increase and showing that any wage rates subject to approval by the War Labor Board have been approved by that Board.

(ii) Other manufacturing costs properly assignable to the production of the product such as indirect labor, factory supplies, repairs and maintenance of building, machinery and equipment, insurance, property taxes, depreciation at normal rates on plant and equipment actually used in manufacture, purchased utility services, and other items commonly associated with factory operation. Other manufacturing costs shall be broken down at least in the detail customarily used by the manufacturer and the method of allocating such costs to the product must be shown.

(iii) General administrative and selling expenses such as executive and administrative salaries, office expenses, commissions, advertising, and similar items but not including income or excess profit taxes, charges to war reserves, or reserves for contingencies. General administrative and selling expenses shall be broken down at least in the detail customarily used by the manufacturer and the method of allocating such expenses to the product must be shown.

(4) Profit and loss statements and balance sheets for the years 1936-1939, inclusive (on OPA Form A, Annual Financial Report, or applicant's own prepared statements), for the most recent full fiscal or calendar year, and for the latest periods of the current year for which complete information is available. Such financial data shall cover applicant's over-all operations, or in the event applicant is a parent, subsidiary or affiliate of other corporations or business units, the over-all operations of the entire investment enterprise. The filing of the financial data designated in this subparagraph is optional in certain cases. Should the applicant prefer and so request, this information for years prior to 1943 will be obtained by the Office of Price Administration directly from the Bureau of Internal Revenue if available. If the applicant has submitted any of such data on Office of Price Administration Financial Report Forms A or B for certain periods, he may so state and omit those periods in his present report.

*Copies may be obtained from the Office of Price Administration.

¹ 8 F.R. 8372, 10825, 12879, 9 F.R. 6885, 11513.

(5) The proposed selling prices and terms of sale.

(6) *Special information*—(i) *Synthetic resins containing 50% or more of gum rosin.* In the case of synthetic resins containing 50% or more of gum rosin the maximum prices of which have been changed since maximum prices for the synthetic resins were first established, the cost of gum rosin per unit at the time of the last change in maximum prices, specifying the date thereof.

(d) *Orders issued under this section.* The Price Administrator may authorize or deny by order the maximum prices requested or any modification thereof. In cases where adjustments are granted to manufacturers, he may also establish maximum prices for resellers, and may require in appropriate cases a compensatory decrease in the maximum prices for another product or products manufactured by applicant.

Any order issued hereunder may be amended or revoked at any time.

This amendment shall become effective October 21, 1944.

NOTE: Approval of the reporting requirements of this amendment has been waived by the Bureau of the Budget.

Issued this 16th day of October 1944.

Chapter XVIII—Office of Economic Stabilization

[Directive 13]

PART 4004—PRICE STABILIZATION; MAXIMUM PRICES

CANNED VEGETABLES, 1944

My directive on payment of subsidies on products processed from the four major vegetables, dated July 17, 1944, and amended August 8, 1944, is hereby amended to read as follows:

1. The War Food Administrator having submitted certain information and recommendations to me on July 6, 1944, August 2, 1944, and September 29, 1944, and the Price Administrator having submitted certain information and recommendations to me on July 15, 1944, September 22, 1944, and October 4, 1944, with reference to a program for the payment of subsidies on eligible sales made during the period March 1, 1944, to April 30, 1945, both dates inclusive, with respect to canned commodities processed from green peas, snap beans, sweet corn, and tomatoes, and establishment of maximum prices for the 1944 pack of these commodities, I hereby find that:

(a) The payment of the subsidy with respect to canned green peas, snap beans, sweet corn, tomatoes, tomato juice, tomato soup, green pea soup, tomato catsup, tomato paste, tomato puree, tomato sauces, tomato juice contained in mixed vegetable juices, and tomato cocktail, will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328.

(b) The payment of the subsidy on completed sales of canned green peas, snap beans, sweet corn, tomatoes, and tomato juice will greatly facilitate the administration of the subsidy program;

(c) Under Maximum Price Regulation No. 306, which continues in effect with respect to the above-mentioned commodities (other than canned tomato soup, canned green pea soup, and canned tomato cocktail), until establishment of new maximum prices for the 1944 pack of those commodities, canners cannot comply with the increases over 1943 support prices established by the 1944 grower support program of the War Food Administration, without provision for a correspondingly higher subsidy;

(d) The establishment of maximum prices (1) for sales to purchasers other than government procurement agencies of canned green peas, snap beans, sweet corn, tomatoes and tomato juice, which will reflect in each case approximately the average of the maximum prices established for similar sales of such commodity in 1943; (2) for sales to purchasers other than government procurement agencies of canned tomato catsup, tomato paste, tomato puree, tomato sauces, tomato juice contained in mixed vegetable juices, and tomato cocktail, which will reflect in each case no more than the average prices paid for the raw product in 1942; and (3) for all other canned products (except canned tomato soup and canned green pea soup) produced wholly or in part from the four major vegetables, which will reflect increases in raw material and other costs pursuant to my Directive of April 6, 1944, will effectuate the purposes of the Emergency Price Control Act of 1942, as amended, the Stabilization Act of 1942, as amended, and Executive Orders Nos. 9250 and 9328, by aiding in the effective prosecution of the war through encouragement of production; and

(e) The agreed pricing method for the 1944 pack of canned fruits and vegetables will be fulfilled.

2. The Office of Price Administration is hereby authorized and directed:

(a) To establish maximum prices for sales to purchasers other than government procurement agencies of canned green peas, snap beans, sweet corn, tomatoes and tomato juice, which will reflect in each case approximately the average of the maximum prices established for similar sales of such commodity in 1943;

(b) To establish maximum prices for sales to purchasers other than government procurement agencies of tomato catsup, tomato paste, tomato puree, tomato sauces, tomato juice contained in mixed vegetable juices, and tomato cocktail, which will reflect in each case no more than the average prices paid for the raw product in 1942;

(c) To establish maximum prices for all other canned products (except canned tomato soup and canned green pea soup) produced wholly or in part from the four major vegetables, which will reflect increases in raw material and other costs pursuant to my Directive of April 6, 1944; and

(d) To determine and furnish to the War Food Administration, as soon as calculations have been completed, the amount of subsidy necessary to maintain the 1943 level of maximum prices for sales to purchasers other than government procurement agencies of canned green peas, snap beans, sweet corn, tomatoes and tomato juice, and to calculate this subsidy by computing the difference in each case between the 1943 average price for those sales and the midpoint of the 1944 range of gross maximum prices.

3. The War Food Administration is hereby authorized and directed, by use of the Commodity Credit Corporation's funds:

(a) To absorb the differentials from the 1944 gross maximum prices established by the Office of Price Administration for sales to purchasers other than government procurement agencies of canned green peas, snap beans, sweet corn, tomatoes and tomato juice;

(b) To subsidize canned green peas, snap beans, sweet corn, tomatoes and tomato juice, in each case until the effective date of a new regulation (or amendment) for the 1944 pack of the product, by absorbing the increased cost of the raw material of the four major vegetables; and

(c) To subsidize sales to purchasers other than government procurement agencies of canned tomato soup, canned green pea soup and canned tomato catsup, tomato paste, tomato puree, tomato sauces, tomato juice contained in mixed vegetable juices, and tomato cocktail, by continuing to absorb the increases by area between the average prices paid in 1942 and the 1944 grower support prices for processing for tomatoes and green peas used in producing these commodities.

PART 4004—PRICE STABILIZATION; MAXIMUM PRICES

MILK IN OHIO MARKETING AREA, 1944

The Price Administrator, on October 4, 1944, having submitted certain information to me and having recommended that the maximum prices for purchasers of milk from producers for resale in the Covington and Newport, Kentucky, and Hamilton, Middletown, Dayton, Springfield, and Columbus, Ohio, milk marketing areas be increased in order to prevent substantial diversion of milk from these communities; and the War Food Administrator having submitted certain information to me and concurred in these recommendations on October 10, 1944.

I hereby find that the present maximum prices for milk purchased from pro-

ducers for resale in the communities of Covington and Newport in Kentucky, and Hamilton, Middletown, Dayton, and Springfield, all in Ohio, are below the Cincinnati price by such amounts as to threaten a substantial diversion of milk from these markets to Cincinnati, and that it is necessary in order to maintain essential supplies of fluid milk among these competing markets and in order to maintain essential supplies of fluid milk in the Columbus, Ohio, market against the competition of the Springfield, Ohio, market that the maximum price adjustments recommended by the Price Administrator and concurred in by the War Food Administrator be adopted.

Therefore, the Office of Price Administration or the Cleveland Regional Office thereof, is authorized and directed to increase the maximum prices for purchases of milk from producers in the following areas to the price set forth opposite each area:

Maximum Price Per Cwt. (4 Percent Milk)
F. O. B. Receiving Plant

Market area:	
Columbus, Ohio.....	\$3.50
Hamilton, Ohio.....	3.75
Middletown, Ohio.....	3.75

Newport, Ky.....	3.75

PART 4003—SUBSIDIES: SUPPORT PRICES
DIVERSION OF TOBACCO TO NICOTINE

The War Food Administrator has, by letter dated October 12, 1944, recommended a program to be carried out by the Commodity Credit Corporation to increase so far as practicable the production of nicotine for agricultural purposes. Under the program, the Commodity Credit Corporation would dispose of, for nicotine purposes, or exchange for other tobacco usable for nicotine, certain low-grade tobacco acquired by it under its 1943 and 1944 Tobacco Loan and Purchase Programs.

I hereby find that the execution of this program is necessary in order to effectuate the policy of Executive Orders 9250 and 9328.

Therefore, I authorize and direct the War Food Administration to carry out through the Commodity Credit Corporation the program described in the War Food Administrator's letter.

Chapter XX—Office of Contract Settlement

[Reg. 8]

PART 8006—TERMINATIONS

CONTRACT SETTLEMENT FORMS

OCTOBER 13, 1944.

Pursuant to the authority conferred upon me by section 4 (b) of the Contract Settlement Act of 1944, the attached forms, designated thereon Office of Contract Settlement forms 1, 1a, 1b, 2a, 2b, 2c, 2d, and 3, are hereby prescribed for use by all government agencies in connection with the settlement of claims under terminated fixed-price war supply contracts in accordance with "Instructions for use of Standard Contract Settlement Proposal Forms" hereto attached.

ROBERT H. HENCKLEY,
Director.

INSTRUCTIONS FOR USE OF STANDARD CONTRACT SETTLEMENT PROPOSAL FORMS

GENERAL

OCTOBER 1, 1944.

1. *Standard Forms provided.* The Standard Forms are prescribed by the Director of Contract Settlement under the Contract, Settlement Act of 1944. They are required to be used by all prime contractors and subcontractors in submitting proposals for settlement of claims under terminated fixed-price war supply contracts. This includes fixed-price supply subcontracts underlying cost-plus-fixed-fee prime contracts or subcontracts. The forms should be used by prime contractors for filling with the Government, and by subcontractors for filling with the company from which the notice of termination was received. They have been made uniform for all Departments and agencies of the United States Government in order to expedite preparation and review of settlement proposals. Previously authorized forms of the War Department or Navy Department may continue to be used until the Standard Forms are generally available.

2. *Departures from Standard Forms.* Although minor deviations from the requirements of the forms are permissible, prior approval of the contracting officer or the customer (contractor in next higher tier) should be obtained for any substantial departures from the requirements. However, a contractor receiving such approval may not require his subcontractors to submit their proposals on other than the prescribed standard forms. Submission of additional information which the contractor considers relevant is encouraged and may expedite review and approval of the proposal. As used in these instructions, the term "contracting officer" includes the contracting officer's representatives.

3. *Where to obtain Forms.* The forms may be obtained from any Government contracting agency and the larger war contractors.

4. *Reproduction of Forms.* Reproduction of the forms in any size is authorized, without approval of any Government agency, provided no change is made in the general arrangement. Reproduction of the inventory schedules on larger forms is encouraged where desired.

SHORT FORM SETTLEMENT PROPOSAL

(Form 1a)

5. This form may be used only where:

(a) the contractor proposes to dispose of or retain all the inventory allocable to the terminated portion of the contract, and

(b) the net amount of the proposed settlement, after deducting his offer for the entire inventory (including proceeds of sales of any inventory disposed of) is less than \$1,000.

6. Neither the inventory schedules (Forms 2a, 2b, 2c, and 2d) nor the Schedule of Accounting Information (Form 3) are to be submitted with this form. The back of the form contains instructions for its use. Also see Miscellaneous Instructions on page 3 hereof.

OTHER FORMS

7. The other forms are as follows:

(a) *Settlement proposal.* Form 1. General form, which may be used for any proposal, other than one on the total cost basis, regardless of amount.

Form 1b. Total cost basis form, for use only where it is necessary to present the proposal on the total cost basis. This form is not generally distributed but will be provided by any Government contracting office on request.

(b) *Termination inventory schedules.* Form 2a. Metals (in mill product form).

Form 2b. Raw Materials (other than metals), Purchased Parts, Finished Components, Finished Product, and Miscellaneous.

Form 2c. Work in Process.

Form 2d. Dies, Jigs, Fixtures, etc., and Special Tools.

(c) *Schedule of accounting information.* Form 3. This form is provided to facilitate accounting reviews of settlement proposals, and, wherever possible, to enable the review to be made without field examination.

SETTLEMENT PROPOSAL

8. *Basis of presenting proposal.* Form 1 may be used for any settlement proposal, other than one on the total cost basis, regardless of amount. It is designed for presenting proposals on the *inventory basis*, which should be used wherever practicable. Under this basis the settlement proposal will consist essentially of an inventory of individual items or groups of similar items stated at cost. In those cases where the inventory method is not practicable, contractors may present their proposals on the *total cost basis*. Under this method, the accumulated costs applicable to all work done on the contract are summarized; profit, if any, is added, and any amounts previously invoiced or to be invoiced for finished product are then deducted. Form 1b, designed for presenting proposals on the total cost basis, may be obtained from any Government contracting agency on request. When using this form, a contractor must, however, for purposes of property accountability and disposition, submit Termination Inventory Schedules listing all the inventory items for which amounts are included in the total costs presented in the Settlement Proposal. The Contract Settlement Act of 1944 authorizes the use of any other equitable basis deemed appropriate by the contracting agency for determining fair compensation for the termination of war contracts. When using any such other method, the contractor should consult his customer or the contracting officer concerning the manner and form of presenting it.

9. *Separate proposals for separate contracts.* A separate proposal should ordinarily be submitted for each terminated war contract or purchase order unless some other procedure

is approved by the contracting officer or customer. Claims based on a series of orders from the same purchaser for items applicable to the same contract may, however, be combined in a single proposal.

10. *Interim proposals.* Normally, a proposal when submitted should cover all elements of the claim, including the contractor's own charges and settlements with subcontractors. However, proposals may be filed in successive steps covering separate portions of a claim arising from the termination. Except with the approval of the customer or contracting officer, this system of progressive reporting should not be used to present claims covering portions of the contractor's own costs as they may be determined. Rather, it is intended to enable the contractor to file proposals covering either all his own costs, or his settlements with subcontractors, or his settlement expenses. In submitting an interim proposal, the contractor should complete only those portions of the form applicable to his proposal; for example, in submitting a proposal to cover settlements or proposed settlements with subcontractors, he should fill out, in addition to the boxes at the top of the form, only Schedule F and Item 14, and execute the certificate at the bottom of the form. Interim proposals may also be filed in connection with requests for partial payments. In submitting an initial proposal, amounts should be inserted only in column 4, and the required supporting schedules be completed. In filing subsequent proposals, the schedules should be completed in support of the items in column 3, or if this is not feasible, a revised schedule should be prepared in support of the accumulated totals in column 4.

11. *Individual items of Form 1—Settlement expenses—Item 12.* These are sometimes referred to as post-termination expenses. They include reasonable accounting, legal, clerical, and other costs and expenses incident to termination and settlement of the contract or order, and reasonable costs and expenses of preserving and protecting termination inventory.

Settlements with subcontractors—Item 14. The war contractor submitting a settlement proposal need attach settlement proposals of his subcontractors only in cases where such settlement proposals are required by Government regulations to be reviewed or examined by the contracting officer or a Government review board, or where the contracting officer or customer so directs.

Acceptable finished product—Item 15. Normally prime contractors will be authorized to obtain payment for acceptable finished product on hand at date of termination by invoicing at the contract price, and such product will not be reported on the inventory forms or be included in the proposed settlement. Subcontractors should similarly seek to obtain payment for acceptable finished product on hand at the date of termination through regular billing procedure. Where, however, such payment is not obtained (solely because of the termination), the items should be listed on the appropriate inventory schedule (Form 2b), the contract price should be entered instead of cost in the cost column, and the items included at contract price in the settlement proposal. If the contract price is a delivered price, freight and other charges which would have been payable by the contractor had delivery been completed should be deducted.

Allowance for interest—Item 16. The Contract Settlement Act of 1944 provides for allowing interest on the amount due and unpaid from time to time on the termination claim at the rate of 2½ percent per annum for the period beginning 30 days after the date fixed for termination and ending with the date of final payment, with certain exceptions stated in section 6 (f) of the Act. For guidance in computing the interest to

be allowed, reference is made to regulations of the various contracting agencies.

Disposal credits—Item 18. This item represents amounts by which the contractor's proposal should be reduced on account of (1) the contractor's offers to retain or sell inventory items, and (2) the proceeds of authorized sales (including credits for authorized retentions). The amount entered on Schedule G in the first proposal filed should agree with the total of the contractor's offers and the proceeds of authorized sales shown in column 8 on all the inventory schedules. If a subsequent settlement proposal is filed, increases or decreases in the amount of the disposal credits need not be supported by revised inventory Schedules, but adjustments should be explained in Schedule G. If practicable, the part of the disposal credit applicable to acceptable finished product included in the proposal should be shown separately in Schedule G.

12. *Supporting inventory schedules.* Items 1 through 7, and Item 15, must be supported by the inventory schedules described below.

TERMINATION INVENTORY SCHEDULES

(Forms 2a, 2b, 2c, and 2d)

13. *When used.* These schedules, which are filed either with or in advance of the Settlement Proposal (other than the Short Form) serve two principal purposes: (1) To support the amount of inventory costs included in the Settlement Proposal; and (2) to aid in arranging for the removal, storage, sale, or other disposition of the termination inventory.

14. *Partial inventories.* Where inventory schedules covering a substantial portion of the inventory can be prepared in advance of other portions, partial filings are encouraged in the interest of expediting property removal and disposal.

15. *Description—Column 2.* On Form 2a (Metals) full commercial description is required for all items. On all other inventory schedules full commercial description is required only for items believed to have commercial value. For other items, the contractor need furnish only such description as is sufficient to enable the contracting officer or customer, as the case may be, to determine the appropriate disposition. This may involve ascertaining whether the items can be used elsewhere in the procurement program, or passing upon scrap recommendations or offers to purchase. The more limited description required for these purposes will ordinarily suffice in the case of most special parts, most special tools, dies, jigs and fixtures, and most work in process. Where the contractor is in doubt as to the extent of the description required, he should consult with the contracting officer or the customer who may accept such description as he thinks satisfactory under all the circumstances. The "Handbook of Standards for Describing Surplus Property" compiled for the disposal agencies of the Government, will be made available by contracting agencies to war contractors. It will be helpful as a guide to the type of information needed for a full commercial description.

16. *Sundry listing of small amounts.* Items having a cost of less than \$100 need not be listed separately but may be lumped together under a "sundry" caption with only a general description of the type of items, provided the aggregate amount included does not exceed \$5,000, or 20 percent of the total inventory cost, whichever is less. For this purpose, the term "item" means all the substantially similar articles in the termination inventory at any one location. Contractors are urged to retain or dispose of all such items at the best price obtainable. In the case of items retained by the contractor this means a price which in his judgment is fair and reasonable and not less than the price

he would obtain if the item were offered for sale. His insertion in column 8 of the Inventory Schedules, or in Schedule G of the Settlement Proposal, of amounts in respect of such items will constitute this representation that such amounts are in his judgment the best prices obtainable, as that phrase is used above. No approval of such prices by the customer or the contracting officer will be required.

17. *Common items.* Items which are reasonably usable on other work of the contractor because they are materials, parts, or components, common in nature to both the terminated contract and other work of the contractor, should not be listed, nor should any costs with respect thereto be included in the proposal, to the extent that the items are reasonably applicable to the contractor's other work in accordance with regulations of the contracting agency.

18. *Classification of items.* To aid in selling or storing property which is to be removed from the contractor's plant by the Government, a classified arrangement of the items on the inventory schedules is essential. Except in the case of work in process and of items having no commercial value, like items are required to be listed with like items and, with certain exceptions, a separate sheet must be used for each classification of property at any one location. Instructions for arranging the items on the Inventory Schedules are given in Appendix A hereto and must be closely followed.

19. *Submission of termination inventory schedules and obligation of Government to remove property.* These schedules will serve as the contractor's statement showing the material claimed to be termination inventory which, if not otherwise disposed of or covered by agreement, he desires to have removed by the Government. The obligation of the Government under the Contract Settlement Act of 1944 to remove or arrange for storage of any such items will not arise until 60 days, or such other time as may be agreed on, after the Termination Inventory Schedules on which they are listed are received in satisfactory form by the appropriate Government officer in such manner as may be prescribed. In the case of a prime contract, the appropriate Government officer is the contracting officer, or his representative*, administering the contract, or such other representative as the contracting agency may designate. In the case of a subcontract, it is the contracting officer, or his representative*, administering the prime contract under which the subcontract is terminated, or such other representative as the contracting agency may designate. Both the description and classification required by these instructions are necessary for satisfactory form. Schedules will not be deemed unsatisfactory in form with respect to items under \$100 cost merely because they are lumped under a "sundry" caption in accordance with paragraph 16 above: *Provided*, The contractor files a supplementary Termination Inventory Schedule or Schedules with respect thereto which are in satisfactory form and meet the following conditions: (1) that they be received by the appropriate Government officer at least 20 days (or such other time as the contracting agency may prescribe) before the obligation of the Government would arise to remove or arrange for storage of the items in the "sundry" caption, (2) that there be listed any such items which have not by that time been disposed of and are to be tendered to the Government, and (3) that such items be de-

*In the case of the Navy Department, Navy Material Inspectors and other designated representatives for property disposition purposes with regard to the particular prime contract or subcontract will act as the representative of the contracting officer for this purpose.

scribed and classified in accordance with paragraphs 15 and 18 above.

20. *Option to submit unclassified schedules.* Subject to the conditions stated below, contractors who desire to do so may prepare and submit the Termination Inventory Schedules without classification of the items. This may make possible an earlier submission of the Settlement Proposal and may enable the contractor to avoid classification of items which will in fact be scrapped, retained, or otherwise disposed of without transfer to the Government. Schedules so submitted to the contracting officer or his representative will not, however, be deemed to be satisfactory in form, as that term is used in paragraph 19 above, and the 60-day period there referred to will not commence to run with respect to any of the items included on them until supplementary schedules containing the required classified listing of such items are received by the appropriate Government officer.

21. *Condition—Column 3.* For purposes of indicating condition of material, other than work in process, the following code should be used. It requires the combination of a letter and a number in each instance (as E4 or N2).

- N—New.
- E—Used—reconditioned.
- O—Used—usable without repairs.
- R—Used—repairs required.
- 1—Excellent.
- 2—Good.
- 3—Fair.
- 4—Poor.

Use the letter "X" without a number, for material considered to have no further value for use as originally intended, but of possible salvage value other than as scrap.

22. *Costs—Columns 5 and 6.* Any generally recognized basis for costing inventory may be used, providing the system has been regularly in use by the contractor and reasonably reflects his costs. In some cases, particularly where a settlement proposal is filed on the total cost basis, complete costing of inventory schedules may not be possible; in such cases, however, the contractor should give as much cost information as practicable, particularly with respect to items of inventory other than work in process. Where the contractor's system of accounting makes it impracticable to determine unit costs for each item of inventory, it is permissible to enter total costs for all of the items or for groups of similar items. Estimated costs should be given where actual costs are not available.

23. *Scrap recommendation—Column 7.* A contractor should make scrap recommendations by inserting an "S" in column 7.

24. *Contractor's offer, or proceeds of authorized sale.* The letter "C" inserted after the dollar amount in column 8 will indicate the contractor's offer to retain or sell, and the letter "A" so inserted will indicate a sale (or credit for retention) previously authorized or approved by or on behalf of the contracting officer or customer. In either case quantity should also be shown (on a second line) if less than the full quantity shown in column 4.

25. *Inventory certificate required.* The Inventory Schedules, whether or not filed with the Settlement Proposal, must be accompanied by a certificate in the form set forth in Appendix B hereto. When the procedure authorized in paragraph 20 is followed, the second paragraph of the form of certificate should be omitted.

26. *Government-owned property.* Whenever Government-owned property is listed on the Termination Inventory Schedules, separate sheets should be used, marked to show that the items are Government-owned, and the schedules should be filed with the authorized Government representative as that term is used in paragraph 19 above.

(a) Termination inventory to which the Government has title under fixed-price contracts should be listed on the Termination Inventory Schedules as follows:

(1) Government-owned materials furnished under the terminated contract without cost to the contractor (sometimes called "Government-furnished materials" or "Government-furnished equipment") should, for purposes of property accountability and disposition and not as a part of the settlement proposal, be listed unless the contracting officer directs otherwise.

(2) Where under a fixed-price supply contract, title to materials purchased by the contractor is vested in the Government, such materials should be listed, and cost data supplied to the extent required under paragraph 22 above.

(b) Government-owned facilities should not be listed on the Termination Inventory Schedules unless the contracting agency or the contracting officer so directs.

(c) Although these instructions relate to fixed-price supply contracts, termination inventory under cost-plus-fixed-price contracts may also be listed on the Termination Inventory Schedules if the contractor desires, and shall be so listed if required by the contracting agency.

SCHEDULE OF ACCOUNTING INFORMATION (Form 3)

27. Form 3 is intended to facilitate accounting reviews and particularly to obviate the necessity of many field examinations which might otherwise be required. It should be filed only once in connection with each termination. It is not required if (1) the proposal is submitted on the short form (Form 1a), or (2) filing of Form 3 has been waived by the contracting officer or customer, or (3) the contractor has already filed a Form 3 with the contracting officer or customer in connection with a previous termination. In the latter case a statement showing any changes in accounting information from that set forth in the previously filed Form 3 will be sufficient.

MISCELLANEOUS INSTRUCTIONS

28. *Cents may be omitted.* In any of the forms, cents may be omitted, either by dropping them entirely or by stating the amount at the nearest dollar, except in the case of the unit cost column (col. 5) of the inventory schedules.

29. *Separate schedules.* If the space provided for any information called for by any of the forms is insufficient, attach separate supporting schedules.

30. *Number of copies.* The number of copies required of any of the forms will be indicated by the Government contracting agency or the contractor from whom notice of termination is received.

31. *Retention of records.* Attention is called to Section 19 of the Contract Settlement Act of 1944, which with certain exceptions requires contractors to retain their records and working papers for five years after (1) disposition of termination inventory, or (2) final settlement of the war contract, or (3) termination of hostilities in the present war, whichever is latest. Attention is also called to the provisions of Section 19 of the Act imposing penalties for filing fraudulent claims.

32. *Deliveries to Government may be required.* Contractors will be advised, usually in the Notice of Termination, of any portions of the termination inventory which the Government requires to be delivered to it.

33. *Approval of proposals filed on Form 1a (Short Form).* Where a war contractor in good faith approves any settlement proposal properly submitted to him on Form 1a by his immediate subcontractor, the settlement, including credits for retention or disposal of inventory, will be recognized by the Government as final and conclusive for the purpose of settling the terminated prime contract,

to the extent the subcontract is allocable to it, unless the contracting agency has previously caused notice to be given to the settling war contractor that such settlements made by him are subject to approval by the Government.

34. *References.* For guidance in preparing settlement proposals reference is made to the termination article of the contract, the Contract Settlement Act of 1944, and the regulations and instructions of various Government contracting agencies, and of the Director of Contract Settlement.

35. *Changes in instructions.* These instructions are subject to change by notice published in the FEDERAL REGISTER.

APPENDIX A—CLASSIFYING ITEMS ON THE INVENTORY SCHEDULES

GENERAL

1. *Why classification required.* Inventory schedules will not be considered to be in satisfactory form for the purposes of the 60-day period referred to in paragraph 19 of instructions above unless the items are arranged in general groupings on separate sheets in accordance with the following instructions. This procedure is prescribed in order to facilitate removal from the contractor's plant and disposal of property listed on the inventory schedules and to meet the requirements of the disposal agencies. Contractors are urged to follow the instructions carefully in order to avoid delays in clearing their plants.

2. *Classification distinguished from description.* These instructions concerning classification apply solely to the arrangement of items on separate inventory sheets and in no way affect the requirements for description of the items, set forth in paragraph 15.

3. *When classification required:*

- On Form 2a—Metals:
Classification required for all items.
- On Form 2c—Work in Process:
No classification required.
- On Form 2b—Raw materials (other than metals); purchased parts; finished components; finished product; miscellaneous;
- On Form 2d—Dies, jigs, fixtures, etc., and special tools:

Classification required for items believed to have commercial value; items having no commercial value may be placed in a single classification designated "No commercial value."

Description is, however, required in all instances in accordance with paragraph 15 of the instructions.

4. *Instructions for classifying.* For metals (in mill product form) and raw materials, list items of one material with items of the same material. For all other products, list like items with like items. Each group will then comprise a separate classification of property. See examples below.

5. *Write in the top right-hand corner of each inventory sheet* opposite "Property classification" the name of the classification for which the sheet is used. For example, in the case of metals the name of the metal; in the case of raw materials (other than metals), or of parts, finished components, finished product, or miscellaneous, the name by which the material or article is commonly known in the trade.

6. *Use a new sheet* for each such separate general classification. In the case of small inventories or classifications having only a few items, however, several different classifications may be put on the same page, provided they are separate by at least three spaces, and the name of each classification is written in the top right-hand corner of the form.

7. *Option to submit unclassified schedules.* See paragraph 20 of the instructions concerning filing inventory schedules without

CERTIFICATE

The undersigned, individually and as an authorized representative of the contractor, certifies that he has examined this Settlement Proposal and that, to the best of his knowledge and belief: (1) AS TO CONTRACTOR'S OWN CHARGES—The Proposed Settlement (exclusive of charges set forth in Item 14) and supporting schedules and explanations have been prepared from the books of account and records of the contractor in accordance with recognized commercial accounting practices; they include only those charges allocable to the terminated portion of this contract; they have been prepared with knowledge that they will, or may, be used directly or indirectly as the basis of settlement of a claim or claims against the United States or an agency thereof; and the charges as stated are fair and reasonable. (2) AS TO SUBCONTRACTORS' CHARGES—(a) The contractor has examined, or caused to be examined, to an extent it considers adequate in the circumstances, the claims

of its immediate subcontractors (exclusive of claims filed against such immediate subcontractors by their subcontractors); (b) the settlements on account of immediate subcontractors' own charges are fair and reasonable, said charges are allocable to the terminated portion of this contract and said settlements were negotiated in good faith and are not more favorable to its immediate subcontractors than those which the contractor would make if reimbursement by the Government were not involved; (c) the contractor has received from all its immediate subcontractors appropriate certificates with respect to their claims, which certificates, if the claims are for more than \$1,000, are substantially in the form of this certificate; and (d) the contractor has no knowledge leading it to doubt (i) the reasonableness of the settlements with more remote subcontractors or (ii) that the charges for them are allocable to this contract. Upon receipt by the contractor of amounts covering settlements with its immediate subcontractors, the

contractor will pay or credit them promptly with the amounts so received, to the extent that it has not previously done so. The term subcontractor as used above includes suppliers.

The undersigned certifies that to the best of his knowledge and belief the statements with respect to accounting matters made in the above Certificate are true.

INSTRUCTIONS

1. This settlement proposal should be submitted to the contracting officer, if you are a prime contractor, or to your customer, if you are a subcontractor.

2. You should review any provisions of your contract relating to termination. The Contract Settlement Act of 1944 provides for the payment of fair compensation for termination of war contracts, and regulations of Government contracting agencies contain detailed information relating to termination claims. Your claim for fair compensation may be prepared on a cost basis, or on the basis of a percentage of the contract price representing the estimated percentage of completion of work under the terminated contract, or may be calculated by any other method that will provide fair compensation for the preparations made and work done for the terminated portion of the contract, including a reasonable profit on such preparations and work.

3. Generally, if your settlement proposal is prepared on a cost basis, it may include, under items 2 and 3, the following:

(a) *Costs.* Costs incurred which are reasonably necessary and are properly allocable to the terminated portion of your contract under recognized commercial accounting practices, including direct and indirect manufacturing, selling and distribution, administrative, and other costs and expenses incurred.

(b) *Settlements with subcontractors.* Reasonable settlements of claims of subcontractors allocable to the terminated portion of your contract.

(c) *Settlement expenses.* Reasonable costs of preserving and protecting termination inventory in your possession and of settling your claim.

(d) *Profit.* A reasonable profit with respect to the preparations you have made and work you have actually done for the terminated portion of your contract. No profit should be included with respect to work which has not been done.

4. If you use this form, your net proposal must be less than \$1,000, and you must retain or dispose of all the termination inventory at the best price obtainable. The Government may examine your books and records relative to this proposal, and if you are a subcontractor, your customer must be satisfied with respect to it. Acceptance of this proposal will constitute approval of the price which you offer for the entire inventory, including the proceeds of any sales which you have made.

5. Reference is made to Section 19 of the Contract Settlement Act of 1944 relating to the retention of records and working papers, and to any similar provisions of your contract, and to the provisions of Section 19 of the Act imposing penalties for the filing of fraudulent claims.

In such instances a statement of availability shall be issued by the United States Employment Service.

SEC. 9. Workers who may be hired only upon referral by the United States Employment Service. Under the circumstances set forth below, a new employee may not be hired solely upon presentation of a statement of availability, but may be hired only upon referral by,

S. Employment Service or other referral agencies with which arrangements have been made with the War Manpower Commission.

(b) To achieve this objective, the United States Employment Service and other authorized referral agencies shall offer to each worker subject to priority referral successive job opportunities in the order of their relative urgency in the war program. Referral shall be made in the following order:

SEC. 11. Assignment of priority ratings. The Area Director, in assigning a priority rating to a job order, shall consider the following factors:

(a) The urgency of production in relation to the war effort.

(b) The extent to which manpower requirements are the cause of present or threatened production lags.

SEC. 12. Employment ceilings. (a) The Area Manpower Director, may fix for all or any establishments in the Rochester Area, fair and reasonable employment ceilings and allowances, limiting the number of employees or other specified types of employees which such establishments may employ during specified periods.

(b) Such ceilings and allowances will be determined on the basis of the establishments labor needs required under an approved and necessary production schedule, the available labor supply, and/or the relative urgency of the establishment's products or services to the war effort.

(c) Except as authorized by the Area Manpower Director, no employer shall hire any new employee for work in such establishment if the hiring of such employee would result in such establishment's exceeding the employment ceiling or allowance currently applicable to it.

SEC. 13. Minimizing lost time. Until such time as the issuance of the statement of availability is granted or denied by the employer or the War Manpower Commission, the worker shall be requested to remain on the job from which he is seeking release.

SEC. 14. Surrender, filing and inspection of statement of availability. The statement of availability issued to an employee must be surrendered by him at the time of hiring to the new employer who shall file and retain such statement for a period of 6 months and make his file available for inspection upon request by the War Manpower Commission.

SEC. 15. Referral in case of under-utilization. If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment

Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

SEC. 16. General referral policies. No provision of this plan shall limit the authority of the United States Employment Service to make referrals in accordance with approved policies and instructions of the War Manpower Commission.

SEC. 17. Soliciting and advertising. (a) No employer shall advertise or otherwise solicit for the purpose of hiring any individual, if the hiring of such an individual would be subject to restrictions under this employment stabilization plan, except in a manner consistent with such restrictions. All such advertising or soliciting shall be under the supervision of, and subject to the approval of the Area War Manpower Committee.

(b) All advertisements for hiring employees within the area shall contain in type consistent with the type used in such advertisement, the following:

Persons now in war work or essential activities will not be considered.

(c) Any employer outside of the Rochester area who seeks to advertise for help within the Rochester area shall be subject to the above restrictions, and in addition, to prior clearance with the Rochester Area War Manpower Commission.

SEC. 18. Seniority and re-employment. To accelerate the war production effort, it may be necessary to facilitate the transfer of workers now employed by establishments engaged in less essential activities to establishments engaged in essential activities in the Rochester area. It may also be necessary to facilitate the movement of essential employees from one essential employer to another at least for a limited period. It is planned to attempt to bring about these transfers on a voluntary basis through cooperation between the employee and the employer of such establishments. Where such cooperation is obtained, the employee should not lose his cumulative seniority rights thereby, provided the employee shall apply for reemployment with his original employer within 40 days after the cessation of hostilities. In the case of a worker released by an essential industry for a limited period of time, such employee shall apply for reemployment with his original employer within 72 hours after the expiration date of the limited period. The issuance by his previous employer of a statement of availability, or a limited statement of availability, guaranteeing his cumulative seniority rights shall constitute an acceptance of this principle.

SEC. 19. Exclusion from plan.—No provision of this employment stabilization plan shall be applicable to:

(a) The hiring of a new employee for agricultural employment;

(b) The hiring of a new employee for work of less than 7 days' duration, or for work which is supplementary to the employee's principal work, but such work shall not constitute the individual's "last employment" for the purposes of the plan, unless the employee is customarily engaged in work of less than 7 days' duration;

(c) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii;

(d) The hiring by foreign, State, county, or municipal government or by New York State, or by any county or municipal government, or their political subdivisions, or their agencies, and instrumentalities, or to the hiring of any of their employees, unless such foreign, State, county or municipal government or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the constitution and laws applicable to it, with the program;

(e) The hiring of a new employee for domestic service, or to the hiring of a new employee whose last regular employment was in domestic service;

(f) The hiring of a school teacher for vacation employment, or the rehiring of a school teacher for teaching at the termination of the vacation period.

SEC. 20. Prohibition against discriminatory hiring and referral practices. The decision to hire or refer an employee shall be based on the qualifications essential for performance of or suitability for the job, and shall be made without discrimination as to race, color, creed, sex, national origin, or, except as required by law, citizenship.

SEC. 21. Employment practices. All employers, employees and other persons or groups affected by this plan are to cooperate with the Area War Manpower Commission in an aggressive program for:

(a) Reduction of absenteeism;

(b) Full utilization of both in-plant and pre-employment training;

(c) Full utilization of women, minority groups, handicapped and other groups.

(d) Up-grading and job simplification;

(e) The utilization of manpower at maximum skills.

SEC. 22. Collective bargaining agreements. Nothing contained in this plan shall be construed to change, modify or restrict any agreement between any employee or group of employees or their duly designated representatives, and his or their employer with respect to exist-

ing seniority or other reemployment rights of any employee or employer thereunder.

SEC. 23. Representation. Nothing contained in this plan shall be considered to restrict any individual from seeking the advice and aid of, or from being represented by the labor or management organization of which he is a member, or any other representative freely chosen by him, at any step in the operation of the plan.

SEC. 24. Appeals. Any employee or employer may appeal to the Appeals Board from any act or failure to act under this Employment Stabilization Plan by the War Manpower Commission, in accordance with the regulation and procedures of the War Manpower Commission.

SEC. 25. Effective date. (a) This amended plan shall take effect as of July 1, 1944.

(b) This plan may be amended from time to time by the Area Director after consulting with the Area War Manpower Committee with the approval of the Regional Director.

(c) This plan will terminate automatically ninety days after the cessation of hostilities by the United States of America, at such earlier time as may be determined by the Regional Director.

Dated: August 16, 1944.

RUSSELL C. MCCARTHY,
Area Director.

Approved: August 24, 1944.
