(d) *Verification of reports and payments.* The market administrator shall verify all reports and payments of each handler by audit of such handler's records and of the records of any other handler or person upon whose disposition of milk the classification depends. Each handler shall keep adequate records of receipts and utilization of milk and milk products and shall, during the usual hours of business, make available to the market administrator or his representatives such records and facilities as will enable the market administrator to:

(1) Verify the receipts and disposition of all milk and milk products, and in case of errors or omissions, ascertain the correct figures;

(2) Weigh, sample, and test for butterfat content the milk purchased or received from producers and any product of milk upon which classification depends; and

(3) Verify the payments to producers prescribed in section 8.

Sec. 4. Classification of milk—(a) Milk to be classified. All milk and milk products purchased or received by each handler at his approved plant shall be classified by the market administrator in the classes set forth in paragraph (b) of this section.

(b) *Classes of utilization.* Subject to the conditions set forth in paragraph (c) of this section, the classes of utilization of milk shall be as follows:

(1) Class I milk shall be all milk and bottled skim milk disposed of in the form of milk, skim milk, buttermilk, and flavored milk drinks, and unaccounted for butterfat in excess of 3 percent of the total receipts of butterfat other than receipts from other handlers converted to a 3.8 percent milk equivalent, except such milk as is classified as Class II milk and as Class III milk pursuant to subparagraphs (2) and (3) of this paragraph.

(2) Class II milk shall be all milk used to produce cream which is disposed of in the form of cream, other than for use in products specified in subparagraph (3) of this paragraph, creamed cottage cheese, products sold or disposed of in the form of cream testing less than 18 percent of butterfat, aerated cream, and eggnog.

(3) Class III milk shall be all milk used to produce butter, cheese, (other than creamed cottage cheese), evaporated milk, condensed milk, ice cream, and powdered whole milk; used for starter churning, wholesale baking and candy making purposes; accounted for as salvage from products where the recovery of fat is impossible; and not accounted for but not in excess of 3 percent of the total receipts of butterfat other than receipts from other handlers.

(c) *Transfers of milk, skim milk, and cream.* (1) Milk or skim milk sold or disposed of in fluid form by a handler to a plant of a nonhandler who distributes fluid milk shall be Class I unless all of the following conditions are met: (i) Such nonhandler's plant is located less than 100 miles from the approved plant where such milk was received from producers; (ii) the market administrator is permitted to audit the records of such nonhandler; (iii) the receipts of producer milk at approved plants are greater than the total sales of Class I and Class II milk from handlers' routes in the marketing area; and (iv) such nonhandler receives milk from dairy farmers who the market administrator determines constitute such nonhandlers' regular source of supply.

If all the above conditions are met the market administrator shall classify such milk as follows: (a) Determine the use of all milk and all milk products received at the plant of such nonhandler, and (b) allocate the milk disposed of by the handler to such nonhandler to the highest use remaining after subtracting in series beginning with the highest use classification receipts of milk by such nonhandler direct from dairy farmers.

(2) Cream sold or disposed of in fluid form by a handler to a plant of a nonhandler who distributes fluid cream shall be Class II unless all of the following conditions are met: (i) Such nonhandler's plant is located less than 100 miles from the approved plant where such milk was received from producers; (ii) the market administrator is permitted to audit the records of such nonhandler; (iii) the receipts of producer milk at approved plants are greater than the total sales of Class I and Class II milk from handlers' routes in the marketing area; and (iv) such nonhandler receives milk from dairy farmers who the market administrator determines constitutes such nonhandler's regular source of supply.

If all the above conditions are met the market administrator shall classify such milk as follows: (a) Determine the use of all milk and all milk products received at the plant of such nonhandler; and (b) allocate the cream disposed of by the handler to such nonhandler to the highest use remaining after subtracting in series beginning with the highest use classification receipts of milk by such nonhandler direct from dairy farmers.

(3) Milk, skim milk or cream sold or disposed of by a handler to a plant of a nonhandler who does not distribute fluid milk or cream shall be Class III milk.

(4) Milk or skim milk sold or disposed of in fluid form by a handler, who purchases or receives milk from producers to another handler who purchases or receives milk from producers, shall be Class I milk: *Provided*, That if the amount of such milk so sold or disposed of is in excess of the amount classified as Class I at such purchasing handler's plant, such excess milk shall be classified in series beginning with the next highest class in which such purchasing handler has use: *Provided*, That if either or both handlers have purchased other source milk, such milk so sold or disposed of, shall be classified at both plants so as to return the highest class utilization to producer milk.

(5) Cream sold or disposed of as fluid cream by a handler who purchases or receives milk from producers to another handler who purchases or receives milk from producers shall be Class II: *Provided*, That if the amount of such cream so sold or disposed of is in excess of the amount classified as Class II in such purchasing handler's plant, such excess cream shall be classified in the next highest class in which such purchasing handler has use: *Provided*, That if either or both handlers have purchased other source milk such cream so sold or disposed of shall be classified at both plants so as to return the highest class utilization to producer milk.

(6) Milk or skim milk sold or disposed of in fluid form by a handler who purchases or receives milk from producers to a producer-handler or to a handler who purchases or receives no milk from producers shall be Class I milk.

(7) Cream sold or disposed of as fluid cream by a handler who purchases or receives milk from producers to a producer-handler or to a handler who purchases or receives no milk from producers shall be Class II milk.

(d) *Responsibility of handlers in establishing the classification of milk.* In establishing the classification as required in paragraph (b) of this section of any milk received by a handler from producers, the burden rests upon the handler who receives the milk from producers to account for the milk and to prove to the market administrator that such milk should not be classified as Class I milk.

(e) *The allocation of other source milk.* Other source milk purchased or received at an approved plant of a handler who purchases or receives milk from producers shall be allocated to Class III except that other source milk may be allocated to Class II to the extent that Class II milk exceeds the amount of all producer milk classified as Class II milk, and other source milk may be allocated to Class I only to the extent that the total amount of Class I milk of the handler exceeds the total amount of producer milk received by such handler.

(f) *Computation of milk in each class.* For each delivery period each handler shall compute, in the manner and on forms prescribed by the market admin-

istrator, the amount of milk in each class as defined in paragraph (b) of this section, as follows:

(1) Determine the total pounds of milk received as follows: add together the total pounds of milk received from (i) producers, (ii) own farm production, (iii) other handlers, and (iv) other sources.

(2) Determine the total pounds of butterfat received as follows: (i) multiply by its average butterfat test the weight of the milk received from (a) producers, (b) own farm production, (c) other handlers, and (d) other sources, and (ii) add together the resulting amounts.

(3) Determine the total pounds of milk in Class I as follows: (i) convert to pounds the quantity of Class I milk on the basis of 2.15 pounds per quart, (ii) multiply the result by the average butterfat test of such milk, and (iii) if the quantity of butterfat so computed when added to the pounds of butterfat in Class II milk and Class III milk, computed pursuant to subparagraph (4) (ii) and subparagraph (5) (iv) of this paragraph, is less than the total pounds of butterfat received, computed in accordance with subparagraph (2) of this paragraph, an amount equal to the difference shall be divided by 3.8 percent and added to the quantity of milk determined pursuant to subdivision (i) of this subparagraph.

(4) Determine the total pounds of milk in Class II as follows: (i) multiply the actual weight of each of the several products of Class II milk by its average test, (ii) add together the resulting amounts, and (iii) divide the result obtained in subdivision (i) of this subparagraph by 3.8 percent.

(5) Determine the total pounds of milk in Class III as follows: (i) multiply the actual weight of each of the several products of Class III milk by its average butterfat test, (ii) add together the resulting amounts, (iii) subtract from the total pounds of butterfat computed pursuant to subparagraph (2) of this paragraph, the total pounds of butterfat in Class I milk, computed pursuant to subparagraph (3) (ii) of this paragraph, the total pounds of butterfat in Class II milk, computed pursuant to subparagraph (4) (ii) of this paragraph and the total pounds of butterfat computed pursuant to subdivision (ii) of this subparagraph which resulting quantity shall be allowed as plant shrinkage for the purposes of this paragraph (but in no event shall such plant shrinkage allowance exceed 3 percent of the total receipts of butterfat except receipts from other handlers) (iv) add together the results obtained in subdivisions (ii) and (iii) of this subparagraph and (v) divide the result obtained in subdivision (iv) of this subparagraph by 3.8 percent.

(6) Determine the classification of milk received from producers as follows:

(i) Subtract from the total pounds of milk in each class the pounds of producer milk which were received from other handlers and used in such class.

(ii) Subtract from the remaining pounds of milk in each class the pounds of other source milk allocated to such class pursuant to paragraph (e) of this section.

(g) *Reconciliation of utilization of milk by classes with receipts of milk from producers.* In the event of a difference between the total quantity of milk utilized in the several classes as computed pursuant to paragraph (f) (6) of this section and the quantity of milk received from producers, except for excess milk or milk equivalent of butterfat pursuant to paragraph (c) of section 6, such difference shall be reconciled as follows:

(1) If the total utilization of milk in the various classes for any handler, as computed pursuant to paragraph (f) (6) of this section, is less than the receipts of milk from producers, the market administrator shall increase the total pounds of milk in Class III for such handler by an amount equal to the difference between the receipts of milk from producers and the total utilization of milk by classes for such handler.

(2) If the total utilization of milk in the various classes for any handler, as computed pursuant to paragraph (f) (6) of this section, is greater than the receipts of milk from producers, the market administrator shall decrease the total pounds of milk for such handler by subtracting in series beginning with the lowest class use of such handler an amount equal to the difference between receipts of milk from producers and the total utilization of milk by classes for such handler.

SEC. 5. Minimum prices—(a) Class prices. Subject to the differentials set forth in paragraphs (c) and (d) of this section, each handler shall pay producers, at the time and in the manner set forth in section 8, for milk purchased or received from them not less than the following prices:

(1) *Class I milk.* The price per hundredweight of Class I milk during each delivery period shall be the price determined pursuant to paragraph (b) of this section, plus 75 cents.

(2) *Class II milk.* The price per hundredweight of Class II milk during each delivery period shall be the price determined pursuant to paragraph (b) of this section, plus 50 cents.

(3) *Class III milk.* The price per hundredweight of Class III milk during each delivery period shall be the highest price ascertained by the market administrator to have been quoted for ungraded milk of 3.8 percent butterfat content received during such delivery period by any of the following plants:

Center Milk Products Co., Maryville, Mo.
Beatrice Foods Co., St. Joseph, Mo.
Western Dairy & Ice Cream Co., St. Joseph, Mo.
Hy-Klass Food Products Co., St. Joseph, Mo.

(b) *Basic formula price to be used in determining Class I and Class II prices.* The basic formula price to be used in determining the Class I and Class II prices, set forth in this section, per hundredweight of milk as computed and announced by the market administrator on or before the 5th day of the delivery period shall be the arithmetical average of the prices per hundredweight reported to the United States Department of Agriculture as being paid all farmers for milk of 3.5 percent butterfat content

delivered f. o. b. plant during the immediately preceding delivery period at the following plants and places:

Borden Co., Mt. Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Greenville, Wis.
Borden Co., Black Creek, Wis.
Borden Co., Orfordville, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Carnation Co., Jefferson, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
Borden Co., New London, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

divided by 3.5 and multiplied by 3.8, but in no event shall such basic formula price to be used be less than the following: multiply by 3.8 the average price per pound of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture for the immediately preceding delivery period, and add 20 percent: *Provided*, That such price shall be subject to the following adjustments: (1) Add 3½ cents per hundredweight for each full one-half cent that the price of dry skim milk for human consumption is above 5½ cents per pound or (2) subtract 3½ cents per hundredweight for each full one-half cent that the price of such dry skim milk is below 5½ cents per pound. For purposes of determining this adjustment the price per pound of dry skim milk to be used shall be the average of the carlot prices for dry skim milk for human consumption, f. o. b. manufacturing plant, as published by the United States Department of Agriculture for the Chicago area during the immediately preceding delivery period, including in such average the quotations published for any fractional part of the previous delivery period which were not published and available for the price determination of such dry skim milk for the previous delivery period. In the event the United States Department of Agriculture does not publish carlot prices for dry skim milk for human consumption, f. o. b. manufacturing plant, the average of the carlot prices for dry skim milk for human consumption, delivered at Chicago, shall be used. In the latter event such price shall be subject to the following adjustments: (i) Add 3½ cents per hundredweight for each full one-half cent that the price of dry skim milk for human consumption, delivered at Chicago, is above 7½ cents per pound or (ii) subtract 3½ cents per hundredweight for each full one-half cent that such price of dry skim milk is below 7½ cents per pound.

(c) *Butterfat differential.* If the average butterfat content of milk purchased or received from producers by any handler during any delivery period is more or less than 3.8 percent, there shall be added or subtracted per hundredweight of such milk for each one-tenth of 1 percent above or below 3.8 percent an amount equal to the Class III price for such delivery period, divided by 38.

SEC. 6. Application of provisions. (a) The provisions of sections 4, 7, 8, 9 and 10 shall not apply to a producer-handler or to a handler whose sole source of supply is from other handlers.

(b) If a handler has purchased or received other source milk the market administrator, in determining the net pool obligation of the handler pursuant to paragraph (a) of section 7, shall consider such milk as Class III milk. If the receiving handler sells or disposes of such milk for other than Class III purposes, the market administrator shall add an amount equal to the difference between (1) the value of such milk according to its utilization by the handler, and (2) the value at the Class III price. (This provision shall not apply if Association is not in position to supply producers milk.)

(c) If a handler, after subtracting receipts from other handlers and receipts of other source milk, has disposed of milk or butterfat in excess of the milk or butterfat which, on the basis of his reports, has been credited to his producers as having been delivered by them, the market administrator, in determining the net pool obligation of the handler pursuant to paragraph (a) of section 7, shall add an amount equal to the value of milk or butterfat according to its utilization by the handler.

(d) Milk which is caused to be diverted by a handler directly from producers' farms to an approved plant of another handler for not more than 5 days during any delivery period shall be considered an interhandler transfer of milk, and shall be reported by the handler who caused such milk to be diverted, as though the milk had first been received at such handler's plant.

SEC. 7. Determination of uniform price to producer—(a) Net pool obligation of handlers. Subject to the provisions of section 6, the net pool obligation of each handler for milk received during each delivery period shall be a sum of money computed for such delivery period by the market administrator as follows:

(1) Multiply the pounds of milk in each class computed pursuant to section 4 by the class prices set forth in section 5 and add together resulting values;

(2) Add, if the average butterfat content of all milk purchased or received from producers is more than 3.8 percent, or deduct if the average butterfat content of all milk purchased or received from producers is less than 3.8 percent, an amount equal to the total value of the butterfat differential applicable pursuant to paragraph (c) of section 5.

(3) Add an amount equal to the total values pursuant to paragraphs (b) and (c) of section 6; and

(4) Deduct, if the average butterfat content of all milk purchased or received from producers is more than 3.8 percent, and add, if the average butterfat content of all milk purchased or received from producers is less than 3.8 percent, the total value of the butterfat differential applicable pursuant to paragraph (c) of section 8.

(b) **Computation and announcement of the uniform price.** The market administrator shall compute and announce

the uniform price per hundredweight for milk purchased or received from producers during each delivery period in the following manner:

(1) Combine into one total the net pool obligation computed pursuant to paragraph (a) of this section of all handlers who made the reports prescribed by section 3 and who made the payments prescribed by section 8 for the previous delivery period;

(2) For each of the delivery periods of May, June and July, subtract an amount equal to 20 cents per hundredweight of the total amount of milk received by handlers from producers and included in these computations, to be retained in the producer-settlement fund for the purpose specified in paragraph (f) (2) of section 8;

(3) Add an amount equal to one-half of the unobligated balance in the producer-settlement fund;

(4) Divide by a figure equal to the total hundredweight of milk received by handlers from producers and included in these computations;

(5) Subtract from the figures computed pursuant to subparagraph (4) of this paragraph not less than 4 cents nor more than 5 cents for the purpose of retaining in the producer-settlement fund a cash balance to provide against errors in reports and payments or delinquencies in payments by handlers. This result shall be known as the uniform price for such delivery period for the milk of producers containing 3.8 percent butterfat; and

(6) On or before the 8th day after the end of such delivery period, mail to all handlers (i) such of these computations as do not disclose information confidential pursuant to the act; (ii) the uniform price per hundredweight computed pursuant to this subparagraph; (iii) the prices for Class I milk, Class II milk and Class III milk; and the butterfat differentials computed pursuant to paragraph (c) of section 5 and paragraph (c) of section 8.

SEC. 8. Payments for milk—(a) Time and method of payment. On or before the 12th day after the end of each delivery period, each handler, after deducting the amount of the payment made pursuant to paragraph (b) of this section, and subject to the differentials set forth in paragraph (c) of this section, shall make payment to producers at the uniform price per hundredweight computed pursuant to paragraph (b) of section 7 for the total quantity of milk received from producers: *Provided*, That with respect to producers whose milk was caused to be delivered to such handler by a cooperative association which is authorized to collect payment for such milk, the handler shall pay such cooperative association an amount equal to the sum of the individual payments otherwise payable to such producers in accordance with this subparagraph.

(b) **Half-delivery period payments.** On or before the 23d day of each delivery period, each handler shall make payment to each producer for the approximate value of the milk of such producer which, during the first 15 days of such delivery

period, was received by such handler: *Provided*, That with respect to producers whose milk was caused to be delivered to such handler by a cooperative association which is authorized to collect payment for such milk, the handler shall pay such cooperative association an amount equal to the sum of the individual payments otherwise payable to such producers in accordance with this subparagraph.

(c) **Butterfat differential.** If during the delivery period, any handler has purchased or received from any producer milk having an average butterfat content other than 3.8 percent, such handler, in making the payments prescribed in paragraph (a) of this section, shall add to the prices per hundredweight for such producer for each one-tenth of 1 percent of average butterfat content in milk above 3.8 percent not less than, or shall subtract from such prices for such producer for each one-tenth of 1 percent of average butterfat content in milk below 3.8 percent not more than, an amount computed as follows: add 4 cents to the average price of 92-score butter at wholesale in the Chicago market, as reported by the United States Department of Agriculture for the delivery period during which such milk was received, and divide the resulting sum by 10.

(d) **Producer-settlement fund.** The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments made by handlers pursuant to paragraphs (e) and (g) of this section and out of which he shall make all payments to handlers pursuant to paragraphs (f) and (g) of this section: *Provided*, That the market administrator shall offset any such payment due to any handler against payments due from such handler. Immediately after computing the uniform price for each delivery period, the market administrator shall compute the amount by which each handler's net pool obligation is greater or less than the sum required to be paid producers pursuant to this section by such handler, and shall enter such amount on such handler's account as such handler's pool debt or credit, as the case may be, and render such handler a transcript of his account.

(e) **Payments to the producer-settlement fund.** On or before the 10th day after the end of each delivery period, each handler shall make payment to the market administrator of any pool debit balance shown on the account rendered pursuant to paragraph (d) of this section for such delivery period.

(f) **Payments out of the producer-settlement fund.** (1) On or before the 11th day after the end of each delivery period, the market administrator shall pay to each handler the pool credit balance shown on the account rendered pursuant to paragraph (d) of this section for such delivery period, less any unpaid obligations of the handler. If at such time the balance in the producer-settlement fund is insufficient to make all payments pursuant to this paragraph, the market administrator shall reduce uni-

formly such payments and shall complete such payments as soon as the necessary funds are available. No handler, who, on the 12th day after the end of each delivery period, has not received the balance of the payment due him from the market administrator shall be deemed to be in violation of paragraph (a) of this section if he reduces his total payments uniformly to all producers by not more than the amount of the reduction in payment from the producer-settlement fund. Nothing in this paragraph shall abrogate the right of a cooperative association to make payment to its member producers in accordance with the payment plan of such cooperative association.

(2) On or before the 15th day after the end of each of the delivery periods of October, November, and December, the market administrator shall pay out of the producer-settlement fund to each producer an amount computed as follows: divide one-third of the total amount held pursuant to paragraph (b) (2) of section 7 by the hundredweight of producer milk received during the delivery period (October, November, or December, as above) and apply the resulting amount per hundredweight to the milk of each producer for such delivery period: *Provided*, That payment under this subparagraph due any producer who has given authority to a cooperative association which is qualified pursuant to paragraph (b) of section 9 to receive payments for his milk shall be distributed to such cooperative association if the cooperative association requests receipt of such payment.

(g) *Adjustment of errors in payments.* Whenever verification by the market administrator of reports or payments of any handler discloses errors made in payments to the producer-settlement fund pursuant to paragraph (e) of this section, the market administrator shall promptly bill such handler for any unpaid amount and such handler shall, within 5 days of such billings, make payment to the market administrator of the amount so billed. Whenever verification discloses that payment is due from the market administrator to any handler pursuant to paragraph (f) of this section, the market administrator shall, within 5 days, make such payment to such handler or offset any such payment due any handler against payments due from such handler. Whenever verification by the market administrator of the payment by a handler to any producer, for milk purchased or received by such handler, discloses payment to such producer of less than is required by this section, the handler shall make up such payment to the producer not later than the time of making payments to producers next following such disclosures.

(h) *Statements to producers.* In making payments to producers as prescribed in paragraph (a) of this section, each handler shall furnish each producer with a supporting statement, in such form that it may be retained by the producer, which shall show:

(1) The delivery period and the identity of the handler and of the producer;

(2) The pounds per shipment, the total pounds, and the average butterfat test of milk delivered by the producer;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of paragraphs (a) and (c) of this section;

(4) The rate which is used in making the payment, if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (b) of this section and section 9 together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

SEC. 9. Marketing service—(a) *Deduction for marketing service.* Except as set forth in paragraph (b) of this section, each handler shall deduct 4 cents per hundredweight from the payments made to each producer other than himself pursuant to paragraph (a) of section 8 with respect to all milk of each producer purchased or received by such handler during the delivery period, and shall pay such deductions to the market administrator on or before the 12th day after the end of such delivery period. Such monies shall be expended by the market administrator for market information to, and for the verification of weights, sampling, and testing of milk received from said producers.

(b) *Producers' cooperative associations.* In the case of producers for whom a cooperative association, which the Secretary determines to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," is actually performing the services set forth in paragraph (a) of this section, each handler shall make the deductions from the payments to be made pursuant to paragraph (a) of section 8, which are authorized by such producers, and, on or before the 12th day after the end of each delivery period, pay over such deductions to the association of which such producers are members.

SEC. 10. Expense of administration—(a) *Payments by handlers.* As his pro rata share of the expense of the administration hereof, each handler who purchased or received milk from producers, with respect to all milk received from producers during the delivery period, shall pay to the market administrator, on or before the 12th day after the end of such delivery period, or such lesser amount as the Secretary may from time to time prescribe.

The Dairy Branch, Production and Marketing Administration, has proposed the following provisions:

SEC. 11. Effective time, suspension, or termination—(a) *Effective time.* The provisions hereof, or any amendment hereto, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to paragraph (b) of this section.

(b) *Suspension or termination.* The Secretary may suspend or terminate this order, or any provision hereof, whenever he finds that this order, or any provision hereof, obstructs, or does not tend to effectuate the declared policy of the act. This order shall terminate, in any event, whenever the provisions of the act authorizing it cease to be in effect.

(c) *Continuing power and duty of the market administrator.* If, upon the suspension or termination of any or all provisions hereof, there are any obligations arising hereunder the final accrual or ascertainment of which require further acts by any handler, by the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate.

(1) The market administrator, or such other person as the Secretary may designate, shall (i) continue in such capacity until removed by the Secretary, (ii) from time to time account for all receipts and disbursements and, when so directed by the Secretary, deliver all funds or property on hand together with the books and records of the market administrator, or such person, to such person as the Secretary may direct, and (iii) if so directed by the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant thereto.

(d) *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions hereof, the market administrator, or such person as the Secretary may designate, shall liquidate, if so directed by the Secretary, the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions hereof, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

SEC. 12. Separability of provisions. If any provisions hereof, or its application to any person or circumstances, is held invalid, the application of such provision, and of the remaining provisions hereof, to other persons or circumstances shall not be affected thereby.

SEC. 13. Agents. The Secretary may, by designation in writing name any officer or employee of the United States, or name any bureau or division of the United States Department of Agriculture, to act as his agent or representative in connection with any of the provisions hereof.

The St. Joseph milk distributors have proposed the following provisions:

1. In place of paragraph (c) of section 1 of the above proposed marketing agreement and order substitute the following:

(c) "St. Joseph marketing area," hereinafter called the "marketing area," means all the territory in Buchanan County, Missouri, Jefferson Township and Nodaway Township, both in Andrew County, Missouri, and Doniphan County, Kansas.

2. In place of paragraphs (e) and (f) of section 1 of the above proposed marketing agreement and order substitute the following:

(e) "Producer" means any person, except a producer-handler, having certifi-

cation issued by the appropriate health authority in the marketing area to produce milk for disposition within the marketing area in the form of fluid milk.

(f) "Handler" means (1) any person, including any cooperative association, who operates a milk plant from which a route is operated wholly or partially within the marketing area; (2) any cooperative association which operates a milk plant at which milk is received from producers. This definition shall include a cooperative association with respect to the milk of any producer which it causes to be diverted from a plant from which milk is disposed of as Class I milk in the marketing area to a plant from which no milk is disposed of as Class I milk in the marketing area.

3. Add to section 5 of the above proposed marketing agreement and order the following:

(d) *Sales outside the marketing area.* The price to be paid by handlers for Class I milk disposed of outside the marketing area shall be 23 cents per hundredweight less than the Class I price.

Copies of this notice of hearing may be procured from the Hearing Clerk, United States Department of Agriculture, Room 0306, South Building, Washington 25, D. C., or may be there inspected.

7. 23 miles of 12-inch pipe extending from Linden to Paterson, New Jersey.

8. 3 miles of 12-inch pipe to Jersey City, New Jersey.

9. 24 gas compressor stations with an aggregate of 122,000 installed horsepower in addition to three (3) compressor stations with an aggregate of 18,000 installed horsepower to be built under a temporary certificate issued in Docket No. C-880 by order dated March 21, 1947.

11. 30 loop lines at river crossings of 16-inch pipeline.

12. 63 additional main line 24-inch valves and 69 additional main line 20-inch valves.

The application describes the proposed project substantially as follows:

Applicant is a new corporation, recently organized for the purpose, among other things, of buying, constructing and operating the pipeline and facilities hereinbefore specified for the transportation of natural gas in interstate commerce from the Southwest to the Appalachian and Eastern Seaboard areas. Applicant has entered into a Letter of Intent with the War Assets Administration, dated February 25, 1947, for the purchase of the Big Inch and Little Big Inch pipeline properties. Applicant has entered into a Lease Agreement with Reconstruction Finance Corporation, dated March 12, 1947, for the lease of said properties commencing on May 1, 1947. Applicant proposes to operate the pipelines in the transmission of natural gas to the Appalachian area during the term of such lease. Thereafter, Applicant proposes to operate the pipelines for the transmission of natural gas to the Appalachian area and initially to the Eastern Seaboard areas of Philadelphia and New Jersey. In the Philadelphia and New Jersey areas, Applicant proposes to sell natural gas to gas distributing companies now distributing manufactured gas in these areas. It is anticipated that the natural gas supplied to these companies will be used principally to supplement the present supply through the enrichment and reforming of the manufactured gas product, and in this use, it will replace in part the oil which is now used for enriching. It is not contemplated that natural gas will replace coal nor reduce the amount of coal or coke consumed or used in the manufacture of artificial gas. It is contemplated that such distributing companies will do their own load-balancing, but if it is necessary for Applicant to make any interruptible sales for load-balancing purposes, it will undertake to make such sales to oil refineries on the Eastern Seaboard which are using oil as fuel. Applicant further states that at a later date it may request authority to extend and enlarge its system to serve the Baltimore, New York and New England areas.

Applicant has obtained a permit to do business in the State of Texas, and it will obtain permits to do business in the

States of Louisiana, Ohio, Pennsylvania, Maryland, New Jersey and New York.

The facilities sought to be acquired, constructed and operated are designed to deliver at the eastern terminal approximately 425,000,000 cubic feet of gas per day using all of the facilities described herein. The intake pressure will be approximately 750 pounds p. s. i. The pipelines will be operated as a looped system from Little Rock, Arkansas, to Linden, New Jersey, and this will require tying the lines together at river crossings and at compressor stations.

Applicant proposes to purchase its gas requirements from sources within economic gas pipeline gathering distances from the termini of its lines, or from other sources located along the lines within economic reach thereof, with particular reference to purchases from independent producers. Applicant does not, at present, contemplate entering into the business of producing or gathering gas, but intends to accept delivery of gas at its main line connections at the operating pressure in the main line at the point of connection (not to exceed 750 pounds).

Applicant is now negotiating with various producers for its gas requirements. Applicant is considering a proposal to purchase an amount not to exceed 25% of its requirements from United Gas Pipe Line Company. Additional negotiations are being undertaken to purchase other gas from producers in the Gulf Coast area, one of the major gas producing areas of the country. Applicant states that the reserves available to it in this area are adequate to support its project for a period in excess of thirty years.

Applicant's prospective physical connections with the United Gas System described above afford Applicant a unique opportunity to make the maximum utilization of flare gas and the gas of independent producers throughout the entire Gulf Coast area. Gas may be introduced into the main lines of Texas Eastern at any of the points of intersection with United's system, as well as at the termini of Texas Eastern's main lines. In cases where flare gas, or other gas of independent producers, is produced from fields located at points too remote for economic piping to the lines of the Texas Eastern System, the gas may be purchased and placed in United's system, and an equal quantity taken from United's system at the points of intersection. Applicant intends to give priority to the purchase of flare gas up to at least 25 percent of the throughput capacity of Applicant's lines.

The estimated total over-all capital cost of acquiring the Big Inch and Little Big Inch pipeline properties, converting the pipelines to gas transmission service, constructing compressor stations sufficient to provide a throughput capacity of approximately 425,000 Mcf per day, and extending the lines to the distribution systems to be served in the Philadelphia and New Jersey areas is \$182,107,000. No estimated cash requirements for interest during construction is included. Applicant estimates that interest payments during the interim lease and conversion period will be more than

covered by cash income during such period. At or immediately prior to the time of transfer of title to the properties, Applicant intends to raise sufficient funds by the sale of securities to make the final payment due the Government amounting to approximately \$138,000,000, and to repay the notes payable then outstanding. Applicant proposes in carrying out its permanent financing plan to repay the then outstanding notes payable and to authorize the issuance of the following securities: \$20,000,000 of 2¼% Notes Payable, \$123,000,000 of 3% First Mortgage Bonds and 37,900,000 Preferred and Common Stock. It is currently anticipated that the financing described above will be carried out through the sale of securities to private investors and/or the public generally.

Applicant will furnish an exhibit at the hearing, details concerning the contracts for the sale and purchase of gas which it is now negotiating. Applicant will at that time also furnish as an exhibit a statement of the total revenues expected from the operation of the properties to be acquired and operated, the total fixed charges and the total operating expenses, based, among other things, on the prices for natural gas established in Applicant's gas sales and gas purchase contracts.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and, if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.

The application of Texas Eastern Transmission Corporation is on file with the Commission and is open to public inspection. Any person desiring to be heard or to make any protest with reference to the application shall file with the Federal Power Commission, Washington 25, D. C., not later than fifteen days from the date of publication of this notice in the FEDERAL REGISTER, a petition to intervene or protest. Such petition or protest shall conform to the requirements of the rules of practice and procedure (effective September 11, 1946) and shall set out clearly and concisely the facts from which the nature of the petitioner's or protestant's alleged right or interest can be determined. Petitions for intervention shall state fully and completely the grounds of the proposed intervention and the contentions of the petitioner in the proceeding, so as to advise the parties and the Commission as to the specific issues of fact or law to be raised or controverted, by admitting, denying, or otherwise answering specifically and in detail, each material allegation of fact or law asserted in the proceeding.

CITIES SERVICE GAS CO.
NOTICE OF APPLICATION

APRIL 16, 1947.

Notice is hereby given that on April 2, 1947, Cities Service Gas Company (Applicant) a Delaware corporation having its principal office in Oklahoma City, Oklahoma, filed an application with the Federal Power Commission pursuant to section 7 of the Natural Gas Act for authority to abandon a certain portion of its natural gas facilities, subject to the jurisdiction of the Commission, described as follows:

Approximately 8.03 miles of 4-inch pipeline extending from a point on Applicant's 10-inch pipeline in Section 11, Township 25 South, Range 2 West, Sedgwick County, Kansas, North to a point near Halstead, Kansas, in Section 35, Township 23 South, Range 2 West, Harvey County, Kansas.

Applicant states in its application that the said line was constructed in 1906 to transport gas for distribution within the City of Halstead, Kansas, and that at the present time the said City of Halstead is operating its municipally owned distribution system for which purchases of gas are made from Drillers Gas Company. Applicant further states that the facility sought to be abandoned is not used for service to any other customer and said facility is no longer used or useful in its present location. Applicant wishes to reclaim the facility in order to obtain the pipe for use elsewhere on its pipeline system.

Any interested State commission is requested to notify the Federal Power Commission whether the application should be considered under the cooperative provisions of the Commission's rules of practice and procedure, and if so, to advise the Federal Power Commission as to the nature of its interest in the matter and whether it desires a conference, the creation of a board, or a joint or concurrent hearing, together with the reasons for such request.
