Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

*NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979

x  FEDERAL REGISTER, VOL. 44, NO. 45---TUESDAY, MARCH 6, 1979
Presidential Determination No. 79-4 of January 31, 1979

Waiver of the Limitation on the Aggregate of Military Assistance Under the Foreign Assistance Act of 1961, and of Credits Extended and Loans Guaranteed Under the Arms Export Control Act for African Countries in Fiscal Year 1979

Memorandum for the Secretary of State

Pursuant to the authority vested in me by Section 33(b) of the Arms Export Control Act I hereby determine that the waiver of the limitations of Section 33(a) of the Arms Export Control Act, as amended, for fiscal year 1979 is important to the security of the United States.

You are requested, on my behalf, to report this determination promptly to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate, as required by law.

This determination shall be published in the Federal Register.

THE WHITE HOUSE,

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
Presidential Determination No. 79-5 of February 6, 1979

Eligibility of Botswana to Make Purchases of Defense Articles and Defense Services Under the Arms Export Control Act, as Amended

Memorandum for the Secretary of State

Pursuant to the authority vested in me by Section 3(a)(1) of the Arms Export Control Act, as amended, I hereby find that the sale of defense articles and defense services to the Government of Botswana will strengthen the security of the United States and promote world peace.

You are directed on my behalf to report this finding to the Congress.

This finding, which amends Presidential Determination No. 73-10 of January 2, 1973 (38 FR 7211), as amended by Presidential Determinations No. 73-12 of April 26, 1973 (38 FR 12799), No. 74-9 of December 13, 1973 (39 FR 3537), No. 75-2 of October 29, 1974 (39 FR 39863), No. 75-21 of May 20, 1975 (40 FR 24869), No. 76-1 of August 5, 1975 (40 FR 37205), No. 76-11 of March 25, 1976 (41 FR 14163), No. 76-12 of April 14, 1976 (41 FR 18281), No. 77-5 of November 5, 1976 (41 FR 50625), No. 77-17 of August 1, 1977 (42 FR 40169), and No. 77-20 of September 1, 1977 (42 FR 48867), shall be published in the Federal Register.

THE WHITE HOUSE,

THE PRESIDENT
This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 1—General Provisions

CHAPTER IV—MISCELLANEOUS AGENCIES

PART 475—PRIVACY ACT IMPLEMENTATION

Adoption of Regulations

AGENCY: Presidential Commission on World Hunger.

ACTION: Adoption of regulations implementing the Privacy Act of 1974.

SUMMARY: On November 29, 1978, the Commission proposed the adoption of regulations implementing the Privacy Act of 1974, 5 U.S.C. 552a, and invited comments from interested persons (43 FR 55770). No comments were received.

The Commission is adopting the proposed regulations with only one minor change. The title "Deputy Executive Director" is changed to "Executive Director".

DATE: Part 475 is effective March 6, 1979.

FOR FURTHER INFORMATION CONTACT:

Signed this 1st day of March 1979.

DANIEL E. SCHA:DUGHESSY, Executive Director.

Title 1 of the CFR is amended by adding the following new Part 475.

PART 475—PRIVACY ACT IMPLEMENTATION

Sec. 475.9 Disclosure of record to a person other than the individual to whom the record pertains.

§ 475.9 Fees.

§ 475.1 Purpose and scope.

The purposes of these regulations are to:

(a) Establish a procedure by which an individual can determine if the Presidential Commission on World Hunger hereafter known as the Commission maintains a system of records which includes a record pertaining to the individual; and

(b) Establish a procedure by which an individual can gain access to a record pertaining to him or her for the purpose of review, amendment and/or correction.

§ 475.2 Definitions.

For the purpose of these regulations—

(a) The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(b) The term "maintain" includes maintain, collect, use or disseminate;

(c) The term "record" means any item, collection or grouping of information about an individual that is maintained by the Commission, including, but not limited to, any individual's employment history, financial transactions and information that contains his or her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as social security number;

(d) The term "system of records" means a group of any records under control of the Commission from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual; and

(e) The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

§ 475.3 Procedures for requests pertaining to individual records in a records system.

An individual shall submit a request to the Director of Administrative and Fiscal Services to determine if a system of records named by the individual contains a record pertaining to the individual. The individual shall submit a request to the Executive Director of the Commission which states the individual's desire to review his or her record.

§ 475.4 Times, places, and requirements for the identification of the individual making a request.

An individual making a request to the Director of Administrative and Fiscal Services of the Commission pursuant to § 475.3 shall present the request at the Commission offices, 734 Jackson Place, N.W., Washington, D.C. 20506, on any business day between the hours of 9 a.m. and 5 p.m. The individual submitting the request should present himself or herself at the Commission's offices with a form of identification which will permit the Commission to verify that the individual is the same individual as contained in the record requested.

§ 475.5 Access to requested information to the individual.

Upon verification of identity the Commission shall disclose to the individual the information contained in the record which pertains to that individual.

§ 475.6 Request for correction or amendment to the record.

The individual should submit a request to the Director of Administrative and Fiscal Services which states the individual's desire to correct or to amend his or her record. This request is to be made in accord with provisions of § 475.4.

§ 475.7 Agency review of request for correction or amendment of the record.

Within ten working days of the receipt of the request to correct or to amend the record, the Director of Administrative and Fiscal Services will acknowledge in writing such receipt and promptly either—

(a) Make any correction or amendment of any portion thereof which the individual believes is not accurate, relevant, timely, or complete; or
RULES AND REGULATIONS

§ 475.8 Appeal of an initial adverse agency determination on correction of amendment of the record.

An individual who disagrees with the refusal of the Director of Administrative and Fiscal Services to correct or to amend his or her record may submit a request for a review of such refusal to the Executive Director, Presidential Commission on World Hunger, 734 Jackson Place, N.W., Washington, D.C. 20006. The Executive Director will, not later than thirty working days from the date on which the individual request such review, complete such review and make a final determination unless, for good cause shown, the Executive Director extends such thirty day period. If, after his or her review, the Executive Director also refuses to correct or to amend the record in accordance with the request, the individual may file with the Commission a concise statement setting forth the reasons for his or her disagreement with the refusal of the Commission and may seek judicial review of the Executive Director's determination under 5 U.S.C. 552a(g)(1)(A).

§ 475.9 Disclosure of record to a person other than the individual to whom the record pertains.

The Commission will not disclose a record to any individual other than to the individual to whom the record pertains without receiving the prior written consent of the individual to whom the record pertains, unless the disclosure has been listed as a "routine use" in the Commission's notices of its system of records, or falls within one of the special disclosure situations listed in the Privacy Act of 1974 (5 U.S.C. 552a(b)).

§ 475.10 Fees.

If an individual request copies of his or her record, he or she shall be charged ten cents per page, excluding the cost of any search for review of the record, in advance of receipt of the pages.

[F.R. Doc. 79-6622 Filed 3-5-79; 8:45 a.m.]

2. Wherever the term "Office of Budget, Planning and Evaluation" appears it is amended to read "Management Staff".

While it is the general policy of the Department of Agriculture to give notice of proposed rule making and to invite the public to participate in the rule making process, this amendment is entirely administrative in nature and good cause is found that such procedures are unnecessary.

JOAN S. WALLACE, Assistant Secretary for Administration.

(F.R. Doc. 79-6738 Filed 3-5-79; 8:45 a.m.)

[3410-02-M]

CHAPTER IX—AGRICULTURAL MARKETING SERVICE

PART 916—FRESH NECTARINES GROWN IN CALIFORNIA

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Findings and Determinations With Respect to the Continuation of the Amended Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the determination of the Assistant Secretary for Administration as the Department's Committee Management Officer with respect to the applicable provisions of the Marketing Agreement Act for the determination with respect to the economic marketing orders covering nectarines, fresh pears, plums, and peaches grown in California. Growers approved the continuation in a referendum held January 27-February 11, 1979.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: Findings and determinations. Pursuant to the applicable provisions of the marketing agreements, as amended, and Order Nos. 916 and 917, as amended (7 CFR Parts 916 and 917), and the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), notice was given in the Federal Register on December 8, 1978 (43 FR 57629), that a referendum would be conducted among the growers who, during the period March 1 through
December 31, 1978 (which period was determined to be a representative period for the purpose of such referendum), were engaged, in the State of California, in the production of any fruit covered by said amended marketing agreements and orders for market in fresh form to ascertain whether continuance of the said amended marketing orders as to such fruit is favored by the growers.

Upon the basis of the results of the aforesaid referendum, which was conducted during the period January 27 through February 11, 1979, it is hereby found and determined that the termination of the said marketing orders, with respect to any of the fruits covered thereby, is not favored by the requisite majority of such growers.

Dated: March 1, 1979.

JAMES C. HILL, Deputy Assistant Secretary.

(F.R Doc. 79-6745 Filed 3-5-78; 8:45 a.m.)

[4410–10–M]

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

Adjustment of Status for Certain Aliens Paroled Into the United States as Refugees Prior to September 30, 1980

IMPLEMENTATION OF PUB. L. 95–412

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final Rule.

SUMMARY: This final rulemaking order amends the regulations of the Immigration and Naturalization Service to implement Pub. L. 95–412 relating to adjustment of status for certain aliens paroled into the United States as refugees. The first amendment enables an eligible alien paroled into the United States as a refugee prior to September 30, 1980, to adjust his status to that of a lawful permanent resident after residing in this country for two years. The second amendment permits an alien paroled as a refugee prior to September 30, 1980, who has acquired the status of a lawful permanent resident under some other provision of law, to have his date of permanent residence recorded as of the date of his parole into the United States.

EFFECTIVE DATE: March 6, 1979.
necessary in view of the ambiguity in the statutory language.

This writer also contended that since the “roll back” right was conferred by statute, adjudication by a district director was not required, unless it should it be imposed by regulation. We cannot accept this argument. Under Service regulations, district directors have the authority to grant and deny petitions and applications for benefits or relief under the immigration and nationality laws and regulations. Applications for the “roll back” of a date of permanent residence under section 5 are applications which must be adjudicated by district directors. Therefore, the provision of the proposed rule requiring submission of the “roll back” application to the district director will not be changed.

The third criticism of this proposed rule concerned the need to issue new Alien Registration Cards to all refugee parolees eligible for “roll back”, especially when the granting of the “roll back” would make the applicant immediately eligible for naturalization. This argument has merit and the final rule will be amended to provide that where the “roll back” would make the applicant eligible to apply for naturalization and he indicates a desire to apply for naturalization immediately, no new Alien Registration Card need be issued. However, in those instances where the “roll back” would not confer eligibility for naturalization or the person, if eligible, does not indicate a desire to apply for naturalization immediately, the Service will require that a new Alien Registration Card be issued.

The proposed rules will be amended in the following respects:

1. Proposed 8 CFR 235.9(e) will be amended by adding a new sentence to the end. That sentence will provide that where the inspection and admission of an alien under this regulation would make him eligible to apply for naturalization, his case will be processed in accordance with 8 CFR 235.9(f)(3), if he or she wishes to apply for naturalization immediately. This amendment is being made to facilitate the naturalization of eligible refugee parolees.

2. Proposed 8 CFR 235.9(f) will be subdivided into three subparagraphs. Subparagraph (1) will contain general instructions concerning the manner in which “roll back” applications are to be filled. These general instructions will also require the applicant for a “roll back” to submit Form G-325, Biographic Information and FD-258, Fingerprint Chart, as part of the “roll back” application. This is necessary in order to update the information in the applicant’s file subsequent to his or her adjustment of status to that of a permanent resident. Subparagraph (2) will provide that the applicant for a “roll back” who is not thereby eligible for naturalization, or who, if eligible, does not wish to file an application for naturalization immediately, shall submit the required photographs and be issued a new Alien Registration Card. Subparagraph (3) will provide that where approval of the “roll back” application would make the applicant eligible to apply for naturalization and he or she indicates an intention to file an application for naturalization immediately, the applicant will be provided the forms and instructions necessary to apply for naturalization, and a new Alien Registration Card need not be issued.

In the light of the foregoing, the following amendments are hereby prescribed to Chapter I of Title 8 of the Code of Federal Regulations:

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

1. Section 235.9 is amended by revising subparagraph (e), redesignating existing subparagraph (e) as (g), adding a new subparagraph (f), and by revising newly designated subparagraph (g) by amending the first, second, and seventh sentences as set forth below.

§ 235.9 Conditional entries.

(e) Inspection of conditional entrant and parolee parole as to admissibility for permanent residence. Each alien who has been (i) admitted under section 203(a)(7) as a conditional entrant; or (ii) paragraphed under section 212(d)(5) of the Act, as a refugee prior to September 30, 1980, who is otherwise eligible for retroactive adjustment of status to permanent resident; shall be required to appear before an immigration officer two years following conditional entry or parole. If over 14 years of age, such conditional entrant or parolee shall be interrogated under oath by an immigration officer and a determination of admissibility shall be made in accordance with sections 235 and 320 of this chapter. Except as provided in Parts 245 and 249 of this chapter, an application under this part shall be the sole method of requesting the exercise of discretion under section 212(h), (b), or (i) of the Act, insofar as they relate to the excludability of an alien in the United States. The case of an alien who is inspected and admitted under this part who is eligible for and wishes to apply for naturalization immediately shall be processed in accordance with § 235.5(f)(3) of this chapter.

(d) Request to “roll back” permanent resident date of permanent resident who was paroled into the United States as a refugee. (1) General. A request by a permanent resident who was originally paroled into the United States as a refugee before September 30, 1980 to “roll back” his/her date of permanent residence to the date of original parole as a refugee shall be made in writing to the district director having jurisdiction over the applicant’s place of residence. Each request shall be accompanied by the Alien Registration Card, Form I-151 or Form I-551, previously issued to the applicant, and completed Forms G-325 and FD-258. In the case of an applicant who is eligible for and wishes to apply immediately for naturalization, the request shall contain a statement to that effect. The decision on the request shall be made by the district director, and no appeal shall lie from that decision.

2. Applicants for “roll back” who are not eligible or do not wish to file an application for naturalization immediately. Where the recipient of a “roll back” would not be immediately eligible to apply for naturalization, or if eligible, does not wish to do so immediately, his/her “roll back” would be immediately and shall be accompanied by three identical color photographs taken within the past thirty days, which must comply with the requirements of an ADIT card. These requirements may be obtained from offices of the Immigration and Naturalization Service. If the request is approved, the applicant shall be furnished a new Alien Registration Card bearing the new date as of which the lawful admission for permanent residence has been recorded.

3. Cases in which “roll back” would make applicant immediately eligible for naturalization and applicant intends to file such application immediately. Where a “roll back” of the date of permanent residence under this regulation would make the applicant immediately eligible for naturalization, and the applicant indicates a desire to file an application for naturalization immediately, the district director shall receive the “roll back” application and process it as provided in subparagraph (1) above. If the “roll back” application is granted, the new date as of which the lawful admission for permanent residence has been recorded shall be entered on Form I-181 and placed in the applicant’s file. The applicant shall then be furnished the appropriate forms and instruction for filling his/her application for naturalization. A new Alien Registration Card need not be issued under these circumstances. In cases where a new Alien Registration Card is not issued, Form I-181 will be so noted.
(g) Termination of conditional entrant or refugee parole status. Whenever a district director has reason to believe that a conditional entrant under section 203(a)(7) or an alien parolee under section 212(d)(5) before September 30, 1980 as a refugee, whose status has not otherwise been terminated, or changed, is or has become ineligible to the United States under any provision of section 212(a) of the Act (except section 212(a)(20)), he shall, in the case of parolee, comply with § 212.5(b) of this chapter, and thereafter serve on either class of alien Form I-122, Notice to Alien Detained for Hearing Before Immigration Judge, in accordance with the provisions of § 235.6. The alien shall be referred for a hearing before an immigration judge in accordance with the provisions of sections 235, 236, and 237 of the Act and of this chapter. * * * An appeal shall lie from the decision of the immigration judge in accordance with the provisions of § 236.7 of this chapter.

§ 235.9 [Amended]

2. Also in redesignated § 235.9(g), in the third sentence change "special inquiry officer" to read "immigration judge"; in the fifth sentence change "a special inquiry officer" to read "an immigration judge"; in the sixth sentence change "special inquiry officer" to read "immigration judge".

Effective date: The amendments contained in this order become effective on March 6, 1979. The amendments contained in this order are being made effective on less than 30 days notice because compliance with the 30 day notice requirement of 5 U.S.C. 553(d) would be impracticable and contrary to the public interest in this instance, because it would only delay implementation of section 5 of Pub. L. 95-412 and delay the conferring of benefits on refugee-parolees who are eligible under this section.

Dated March 1, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

(FR Doc. 79-6751 Filed 3-5-79; 8:45 am)

RULES AND REGULATIONS

[1505-01-M]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 85—PSEUдорABIES

Pseudobubalies Regulations

Corrections

In FR Doc. 79-5053 appearing at page 10306 in the issue for Friday, February 16, 1979, make the following changes:

1. On page 10307, first column, eleventh line from the top ‘vaccinated’ should read ‘vaccinate’.

2. On page 10311, first column, fifth line of paragraph (cc) of § 85.1, insert ‘a’ after ‘by’.

PART 82—EXOTIC NEWCASTLE DISEASE; AND PSITTACOSIS OR ORNITHOSIS IN POULTRY

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final Rule.

SUMMARY: The purpose of this amendment is to quarantine portions of Los Angeles County, California, and a portion of Riverside County, California, because of the existence of exotic Newcastle disease. Therefore, the restrictions pertaining to the interstate movement of poultry, mnah, and psittacine birds, and birds of all other species under any form of confinement, and their carcasses and parts thereof, and certain other articles, from quarantined areas, as contained in 9 CFR Part 82, as amended, will apply to the quarantined areas.

Accordingly, Part 82, Title 9, Code of Federal Regulations, is hereby amended in the following respects:

In § 82.3, (a)(1), relating to the State of California, new paragraphs (ii) and (iii) relating to Los Angeles County, and a new paragraph (iv) relating to Riverside County are added to read:

§ 82.3 Areas quarantined.

(ii) California.

(iii) The premises of Nellard R. Berne, 13742 Fairlock, Paramount, Los Angeles County.

(iv) That portion of Riverside County bounded by a line beginning at the junction of Victoria Avenue and Van Buren Boulevard and extending along Victoria Avenue in a northeasterly direction to Allesandro Boulevard; thence following Allesandro Boulevard in a southeasterly direction to Interstate Highway 15 E; thence following Interstate Highway 15 E in a southwesterly direction to Cajalco Road; thence following Cajalco Road in a westerly direction to Mockingbird Canyon Road; thence following Mockingbird Canyon Road in a northwest direction to Van Buren Boulevard; thence following Van Buren Boulevard in a northwesterly direction to its junction with Victoria Avenue.

Dated March 1, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

(FR Doc. 79-6751 Filed 3-5-79; 8:45 am)
RULES AND REGULATIONS

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the Federal Register.

Done at Washington, D.C., this 28th day of February 1979.

Note—This final rulemaking is being published under emergency procedures as authorized by E.O. 12044 and Secretary’s Memorandum 1955. It has been determined by M. A. Mixson, Acting Assistant Deputy Administrator, Animal Health Programs, APHIS, VS, USDA, that the possibility of the spread of exotic Newcastle disease into other States or Territories of the United States from the quarantined areas is severe enough to constitute an emergency which warrants the publication of this quarantine without waiting for public comment. This amendment as well as the complete regulation, will be scheduled for review under provisions of E.O. 12044 and Secretary’s Memorandum 1955. The review will include preparation of an Impact Analysis Statement which will be available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782, 301-436-8695.

G. V. Peacock,
Acting Deputy Administrator, Veterinary Services.

INTERPRETATION 1979-01
To: John Gould, Jr.

Regulations and Rulings Interpreted: 10 CFR 212.72; 212.74(a); Ruling 1975-15; Council Statement of Policy, 1955.

Code GCW—PI—Property, def., BPCL

FACTS

John Gould, Jr. (Gould) is a crude oil producer subject to the price regulations set forth in 10 CFR Part 212, Subpart D. Under a “farmout” lease, Gould possesses the production rights to the northeast quarter of the northeast quarter of Section 451, Block 27, H & TC RR Co. Survey, Scenery County, Texas (the Gould lease), and Gould now intends to reenter the Pan American Baggett A-2 well (the Baggett A-2 well), located on this lease.

According to the facts submitted in this case, the base lease conveyed the right to produce crude oil from the entitled oil holder under the base lease that remained after the unitization in 1955. The Baggett A-2 well was drilled in 1967 and produced crude oil until July 1971, when it was plugged and abandoned. Other than the crude oil produced from the Baggett No. 1 well and the Baggett A-2 well, there has been no production under the base lease.

ISSUE

Where there was no production and sale of crude oil in 1972 or in 1976 from that portion of the base lease that remained after the unitization in 1955, is the Baggett A-2 well, the proposed reentry well, located on the base lease that remained after the unitization in 1955, the Baggett A-2 well, the proposed reentry well, located on the base lease that remained after the unitization in 1955.

SUMMARY: Attached are the Interpretations issued by the Office of General Counsel of the Department of Energy under 10 CFR Part 205, Subpart F, during the period January 1, 1979, through January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Diane Stubbs, Office of General Counsel, Department of Energy, 12th & Pennsylvania Avenue, NW., Room 1121, Washington, D.C. 20461, (202) 693-8070.

SUPPLEMENTAL INFORMATION:

Interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the Federal Register in accordance with the editorial and classification criteria set forth in 42 FR 7923 (February 8, 1977), as modified in 42 FR 46270 (September 15, 1977).

These Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.85(c)), An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (10 CFR 205.85(e)). The Interpretations published below are not subject to appeal.

Issued in Washington, D.C., February 27, 1979.

EVERARD A. Marseglia, Jr.,
Acting Assistant General Counsel for Interpretations and Rulings, Office of General Counsel.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
fore, regardless of whether the Gould lease or the base lease is considered the property from which the Baggett-A-2 well produces crude oil, the BPCL equals zero.

The issue of determining the BFCL for a property has been addressed by the DOE in several proceedings. In those instances, the DOE has stated that where there was no production and sale of crude oil in 1972 or 1975, the BFCL for that property is zero. Any later production qualifies as new crude oil and is therefore subject to the upper-tier crude oil price rule as set forth in §212.74.

According to the facts presented in this case, there was no production and sale of crude oil from either the base lease or the Gould lease in 1972 or 1975, the BFCL is therefore zero. Thus, all crude oil produced from the Baggett-A-2 well will be classified as new crude oil upon prior certification pursuant to §212.131(a)(2)(B), and may therefore be sold at the applicable upper-tier ceiling price for first sales of new crude oil.

EVERT A. MARESCEL, Jr.
Acting Assistant General Counsel for Interpretations & Rulings.

INTERPRETATION 1979-02

To: Placid Oil Company

Regulations and Rulings Interpreted: 10 CFR 212.63 and 212.167(b)(3); Ruling #686-A-6

Code: GCW-Pi-Natural Gas Shrinkage

FACTS

Placid Oil Company (Placid) is engaged in the production of natural gas as the operator of the Black Lake Pettit Zone Unit, Black Lake Field, Natchitoches Parish, Louisiana (Black Lake). A reservoir containing crude oil and natural gas was discovered in 1964 at Black Lake.

"It is important to note that this conclusion is based on the particular facts presented in this case and would not necessarily be correct as to other factual situations. For instance, if there were production in 1972 or 1975 from wells located on the base lease but not on the Gould lease, an important issue would be whether the Gould lease alone constitutes a property within the meaning of §212.72.

It is not uncommon for less than the total premises to be produced, to form a single "property," leaving the balance of the premises formerly subject to a single right to produce not aggregated with any other such rights. The portion of the premises which is not aggregated is appropriately recognized as a separate property and apart from the portion of the premises which has been aggregated with other rights to produce.

Therefore, in determining the BFCL for the base lease, volumes produced and sold from the 40 acres on which the Baggett No. 1 well is located are not considered.

Placid sought approval of a full pressure maintenance program at Black Lake, rather than having Louisiana Conservation Commission initiate a fact-finding proceeding with the likelihood of a contested hearing. With respect to the Black Lake operations, the full pressure maintenance program was intended to increase recovery of crude oil and condensate. The program was not expected to improve the overall recovery of natural gas liquids (NGL's). Three benefits generally result from a gas cycling full pressure maintenance program such as the one initiated by Placid:

1. Pressure maintenance limits the influx of water into the reservoir;
2. As the relented dry gas expands into the oil rim (not to be confused with the gas cap), oil is absorbed thereby increasing the overall recovery of crude oil; and
3. Maintenance of reservoir pressure reduces retrograde condensate losses thereby increasing the overall recovery of condensate.

Utilization of the reservoir and the recommended plan of operation were approved by the Department of Conservation, and made effective January 1, 1975. Subpart A-2 of the Mandatory Petroleum Price Regulations has always permitted the method by which it produced natural gas from Black Lake could not be economically justified. The Department of Conservation would have rescinded Order #686-A-3 and permitted gas sales from Black Lake.

In such event, however, Placid alleges that the ultimate recovery of liquid hydrocarbons would have been reduced.

ISSUE

Has Placid, as described above, properly calculated its increased "cost of natural gas shrinkage" with reference to NGL's extracted from Black Lake natural gas?

INTERPRETATION

For the reasons set forth below, the Department of Energy (DOE) has determined that the manner in which Placid calculates the increase in the cost of natural gas shrinkage prior to August 1, 1975, was not permitted under the Mandatory Petroleum Price Regulations. For the period from August 1, 1975, Placid may use the contractual price in effect for delivered residual shrinkage costs.

1The refiner price regulations effective from August 10, 1973 to December 31, 1974, were promulgated by the former predecessor agencies of the Department of Energy (DOE), the Cost of Living Council, the Federal Energy Office and the Federal Energy Administration (FEA), were often amended in ways not pertinent to this issue.
price regulations—designed specifically to address crude oil refiners—were not altogether well-suited for gas processing plants. Thus, those regulations did not expressly treat certain increased processing and product costs associated with the manufacture of NGL's from "wet" natural gas. In the preamble to the proposed Subpart K, the FEA acknowledged this problem stating:

The refiner price rules of the FEA are not, however, well-suited for regulating prices of liquids processed from natural gas by gas processors, since the operations of a gas plant are quite different from those of a refinery. In effect, the applicable rules for the sale of gas to gas plants has had the result of limiting the lawful prices of natural gas liquids to essentially their May 15, 1973, levels, since gas plants have typically had little or no increased cost of natural gas, from which natural gas liquids are produced. The natural gas from which these liquids are extracted is not consumed in the process, as is crude oil in the refining process. Rather, there is a "shrinkage" in the volume and BTU content of the gas, 39 FR 32718, 32719 (September 10, 1974).

In an effort to clarify the treatment of increased product costs for gas processors in the period prior to promulgation of Subpart K, the FEA issued Ruling 1976-4, 40 FR 21650, 21651, 21656 (May 20, 1975). That ruling states, in pertinent part, that:

Although Subpart E of Part 212 of FEA’s regulations specifically addresses only the pass through of the increased cost of crude petroleum and petroleum product, a comparable dollar-for-dollar pass through of increased shrinkage costs is also permitted…The cost of such shrinkage is the reduction in sales revenues that could otherwise have been received for the natural gas pursuant to the contract under which the gas is being sold, if its volume or BTU content had not been reduced through processing to extract natural gas liquids.

Accordingly, where the natural gas sales revenues are reduced by processing, and where the selling price of the natural gas that has been processed has increased since May 15, 1973, the cost of shrinkage resulting from extraction of the liquids will also have increased. This increased cost of shrinkage to be an "increased product cost" under § 212.83 and it may therefore be recovered on dollar-for-dollar basis on the firm’s base prices for natural gas liquid products in the month following the month of measurement.

The cost of shrinkage shall be determined by comparing the value of the natural gas prior to processing with the value of the natural gas after processing. The value of the natural gas stream for this purpose shall be computed by reference to the contractual terms in effect for the sale of the firm’s "residue" natural gas during the relevant month. (Emphasis added.)

Thus, increased shrinkage costs are designed to provide recoupment in NGL prices of the reduction in sales revenue resulting from the processing of natural gas by reference to the contractual price terms in the relevant month for that residue gas.

Increased shrinkage "costs" are a compensation for lost opportunities, i.e., opportunity to sell the natural gas without extracting the liquid content of the "wet" stream. This opportunity cost is measured "by reference to the contractual terms in effect for the sale of the [firm’s] 'residue' natural gas during the relevant month." Id. Subpart K now imposes the same general requirements for measuring shrinkage costs in § 212.162, which states:

"Cost of natural gas shrinkage" means the reduction in selling price per thousand cubic feet (MCF) of natural gas processed, which is attributable to the volume or BTU value of the natural gas resulting from the extraction of natural gas liquids, as determined pursuant to the contract in effect at the time for which cost of natural gas shrinkage is being measured, and under which the processed natural gas is sold.

We have recently considered the propriety of shrinkage calculations pursuant to Subpart K when no sales of residue gas were made the imputed residue gas price be imputed from a neighboring field as a reasonable alternative to a literal reading of § 212.162. Id.

Martin is delaying sales of natural gas from the Wilcox Unit to maintain a price cycling operation, and ultimate recovery of condensate from that unit, Id. Since there is no sale of the processed natural gas, it is impossible for the firm to determine the "cost of natural gas shrinkage" in accordance with the express language of § 212.162.

Martin argues that to disallow increased shrinkage costs会导致 unusual inequities and that such costs should be allocated to the various crude oil processors. Martin maintained that increased product costs in their operations and are so treated for regulatory purposes pursuant to both the Subpart K regulations. Ruling 1975-6, supra, did not specifically authorize any shrinkage calculation.

Placid argues that a residue gas sales price be imputed by the method specified in Ruling 1975-6, supra, which was not issued until after the time those calculations were to be made would violate the dollar-for-dollar pass through requirement contained in § 4(b)(2) of the EPA.

It should be noted that the refiner price regulations in Subpart E provided no express authorization for any shrinkage calculations whatever. Ruling 1975-6, supra, was the first official pronouncement by the FEA on how such costs could properly be claimed. After issuance of that Ruling Placid first calculated and claimed shrinkage costs in the manner previously described. Since the regulations in effect prior to Ruling 1975-6, supra, did not specifically authorize any shrinkage calculations and thus must conform with the limits of the effective, retrospective benefit offered by Ruling 1975-6, supra.

Placid, 2372 F.2d 2372, 2375 (May 6, 1979), was issued "to make explicit that the regulations of Subpart E . . . afford [a] dollar-for-dollar pass through of increased product costs on processing of natural gas, in the same manner as is now expressly provided for in Subpart K." Computation and recoupment of increased shrinkage costs is designed to compensate on a dollar-for-dollar basis for lost revenues resulting from the extraction of the liquids from the wet natural gas stream in § 212.162(a). For gas processors, increased shrinkage costs are the equivalent of an increased product cost in their operations and are so treated for regulatory purposes pursuant to both the Subpart E and the Subpart K regulations. Ruling 1975-6, supra; 39 FR 44407, 44409 (December 24, 1974). While the opportunity costs described as:

Section 4(b)(2)(A) of the EPA, as amended, states as follows:

(2) In specifying prices (or prescribing the manner for determining them), the regulation under subsection (a)—

(A) shall provide for a dollar-for-dollar pass through of net increases in the cost of crude oil, residual fuel oil, and refined petroleum products at all levels of distribution from the producer through the retail level;

Prior to its amendment on December 22, 1975, in the EPA, Pub. L. No. 94-163, effective February 1, 1976, § 4(b)(2)(A) of the EPA applied only to refiners marketing "at the retail level." Although this provision speaks directly only to "crude oil, residual fuel oil, and refined petroleum products," the Temporary Emergency Court of Appeals has upheld DOE’s authority in Subpart K to regulate natural gas liquids and natural gas liquid products stating:

"We are aware that Congress contemplated substantially greater coverage for the EPA than would result from strict adherence to the technical meanings of the terms "crude oil," "residual fuel oil," and refined petroleum products." Mobil v. Honda, 566 F.2d at 99 (citation omitted); accord, National Rainbow.
creased shrinkage costs are the equivalent of increased product costs, such "costs" do not represent outlays of dollars and therefore cannot be recouped on an exact dollar-for-dollar basis. Natural gas liquids, however, are not residual natural gas and do not therefore, experience a "reduction in sales revenues.

_Twin-Tech Oil Company v. FEA_ [53,125, at 83,561 (1977), aff'd _Placid Oil Co. v. FEA_ [50,585 (September 30, 1977), aff'd _Placid Oil Co. v. FEA_ [73,126, No. R-77-1977 (S.D. Tex., November 13, 1978)]._1 Placid asserts that once the liquids are extracted, sales revenues from the natural gas must perform be reduced. The fact that lost opportunity cannot be measured in the conventional way, Placid asserts, should not preclude recovery of these "costs" pursuant to _§ 4(b)_ (2) of the _ monk. 2

Shrinkage costs are recognized for cost computation and allocation only when the gas sales revenue due to extraction are lost, i.e., when the sale is not made. Prior to July 1975, there is no guarantee that the gas will be sold and that a firm will actually incur any lost opportunity cost. Placid argues that shrinkage costs were acually incurred, because the raw material, natural gas, was consumed in the process of extracting natural gas liquids. Placid asserts that the only relevance of the residue gas sales contract is that it provides one method, but not the only method, of placing a value on the materials which a gas processor uses to manufacture natural gas liquids. Placid bolsters its conclusion by reference to various administrative precedents which either interpret the term "produced and sold" to include the internal consumption of crude oil, _Phillips Petroleum Co. _[53,125, Interpretation 1977-12, 42 FR 31148 (June 29, 1977); _Tenneco Oil Co. _[50,585 (December 31, 1976), or require the allocation of increased costs to products consumed internally, _Ruling 1974-27, 39 FR 44415 (December 31, 1974)._2 These precedents, according to Placid, demonstrate that the key consideration is "value," a factor which exists regardless of the existence of an actual residue gas sales contract.

Placid's reliance on these precedents is misplaced, because the key consideration is the reduction in natural gas sales attributable to the extraction of NGLs. _Ruling 1975-6, supra_ [52,125, _supra_ § 212,162; 39 FR 44497, 44499 (December 31, 1974). If the natural gas is injected into the ground instead of sold, then there is no reduction in gas sales revenue in the relevant current month resulting from this transaction. The amount of gas sales revenue lost as a result of NGL extraction is measured by the contracts under which the processed gas is sold, because the liquids would presumably have been sold under these contracts as part of the "wet" gas had no processing occurred. Until and unless the processed natural gas is sold, there is no current increased lost opportunity cost to Placid from extracting NGLs.

Placid also argues that computing a residue gas sales price from a neighboring field is supported by analogy and reference to the crude oil producer price regulations contained in _18 CFR_ 133.3 and _18 CFR_ 133.4, and are therefore similar in kind and quality in the nearest field .... _§ 212.73; 212.74._

There is no authorization in any pronouncement of the DOE, or its predecessor agencies, which permits the _ad hoc_ incorporation of Subpart D producer price rules into _Subpart B_ and Subpart E. Additionally, there are sound reasons for rejecting the analogy in this instance. Crude oil prices are administered market prices. Residue gas prices that may be charged and are not specifically and directly related to costs actually incurred, nor to lost opportunity costs incurred as in the case of crude oil. Under the non-cost related crude oil pricing regulations, the important references for imputation are NGLs or the characteristics and location of the crude oil. Because processed natural gas sales revenues depend on the applicability of varying natural gas pricing rules under the _producer_ regulations, the relevant contracts base price terms on volume (MBtu) or heating value (Btu), there is no assurance that prices used in one gas field will in any way reflect the price opportunities in another field. Placid maintains that the prices in the field which were selected for use in its shrinkage calculations were reasonable and did not represent the highest prices which could have been selected. Nevertheless, the fact that Placid may have imputed "reasonable" price does not mean that imputation is sanctionable by the price regulations.

Finally, Placid asserts that if it were aware that increased shrinkage costs were not available where there were no sales of residue gas, then Placid would have applied to the Louisiana Conservation Commission for permission to make immediate sales of natural gas and to discontinue the pressure cycling program. According to Placid, without allowance of shrinkage costs its pressure cycling program could not have been economically justified to the Louisiana Conservation Commission. Thus, Placid delayed sales of residue gas thereby increasing production of condensate allegedly without knowledge that such a course would frustrate recovery of its raw material costs. Many of Placid's contentions, including this one, are potentially cogent in the exceptions process, but do not assist the proper construction of the pricing regulations. In any, in order to be relevant, one must have been granted price relief through the exceptions process to account for the economic necessity of the operation. _Martin Exploration Co._ __2 DOES (January 5, 1979).

Accordingly, as described above for the period in question, Placid has not calculated its increased cost of natural gas shrinkage in conformance with the price regulations.

From January 1, 1975, through July 31, 1975, Placid made no sales of residue gas. During that period Placid's pricing of NGLs was governed by Subpart E. As discussed previously, in _Martin_ we held that shrinkage costs were not allowed under Subpart E unless there were sales of residue gas in the relevant current month. Placid has offered no reason to depart from the rationale of that interpretation and, therefore, we conclude that Placid has not calculated its increased natural gas shrinkage from January 1, 1975, through July 31, 1975, in conformance with the price regulations. From August 1, 1975, to the present, Placid has made sales of residue gas in the relevant current month. In its shrinkage calculations during this period, Placid has used the weighted average selling price of residue gas according to the contracts in effect during the month the gas is processed. Thus, Placid's use in its shrinkage calculations of the weighted average selling prices according to its contract prices of residue gas in sales in the relevant current month from Black Lake has not proved to the present is and was proper.
RULES AND REGULATIONS

Since the Commission has promulgated rules that establish accounting standards for oil and gas producers a change to either of the methods contained in those rules will be exempt from Instruction 4(f) of Form 10-Q, which requires registrants to state the reasons for any accounting change which they adopt and to furnish a letter from their independent accountants indicating whether the change is to an alternative principle that is preferable under the circumstances.

In order not to discourage voluntary early implementation of accounting standards, the Commission will not object to adoption of the specified full cost method by companies who had previously changed from the full cost method to the successful efforts method in early compliance with FASB Statement No. 19, prior to the publication of ASR No. 253 (even though this would not meet the significance change criterion).

SUBSEQUENT CHANGES

In ASR No. 253 the Commission discussed the basis for its conclusions on accounting methods for oil and gas producing companies. In doing so, the Commission expressed the belief that neither successful efforts nor full cost was the preferable method. Since the Commission found that the change is to a preferable method, including successful efforts or full cost was the requirement that all companies adopt a uniform method. The Commission heard numerous arguments during the course of its oil and gas proceedings as to why either successful efforts or full cost was the more appropriate method, including arguments involving access to or costs of equity capital. As stated in ASR No. 253, none of these were found to be convincing. The Commission concluded that the most significant information to be reported to investors by oil and gas producers concerns quantities and valuations of proved oil and gas reserves and success in discovering such reserves.

The Commission considers the consistent application of accounting principles by individual registrants from year to year to be very important to investors. Furthermore, under generally accepted accounting principles, a change in accounting principle is prohibited unless it can be demonstrated that the change is to a preferable method. Since the Commission found in ASR No. 253 that neither successful efforts nor full cost is clearly preferable to the other, it believes that subsequent changes by registrants from one of the specified methods to the other would not be in the interests of investors.

Commission Action: 17 CFR Part 211 is amended by adding the following subject heading: "Accounting Changes by Oil and Gas Producers.”

By the Commission.

GEORGE A. FITZSIMMONS, Secretary.

CHAPTER 1—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

[Docket No. 78N-104]

PART 7—ENFORCEMENT POLICY

Presentation of Views Before Report of Criminal Violation

AGENCY: Food and Drug Administration.

ACTION: Final rule.
SUMMARY: The Food and Drug Administration revises the regulations for issuing, before the grand jury referred a criminal violation to a United States attorney for prosecution, a notice of an opportunity to present views. This document also revises the hearing procedures themselves. The agency is taking this action to clarify and simplify hearing procedures.

EFFECTIVE DATE: March 6, 1979.

FOR FURTHER INFORMATION CONTACT:
William L. Schwemer, Special Assistant to the Associate Commissioner for Regulatory Affairs (HFC-3), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4110.

SUPPLEMENTARY INFORMATION:
In the Federal Register of May 12, 1978 (43 FR 20568), the Commissioner of Food and Drugs proposed to revise the regulations governing procedures under section 305 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 335) concerning the report of a criminal violation to a United States attorney for prosecution. The proposed revisions were designed to (1) delineate those situations in which a referral need not be preceded by an opportunity to present views, (2) simplify the procedures to resemble more closely the informal conferences customarily held with potential defendants, and (3) delete the phrase "informal hearing" from the regulations.

Interested persons were given until June 12, 1978 to submit written comments regarding the proposed regulation. Comments were submitted by two drug trade associations, one public interest law firm, and one food product manufacturer. The following are the comments and the Commissioner's responses to them:

1. One comment on proposed §7.84(a)(2) (21 CFR 7.84(a)(2)) noted that the Commissioner provided no historical justification for proposing that no notice and opportunity to present views need be given if a potential defendant might flee or destroy evidence. The comment suggested, therefore, that the Commissioner's concern was merely hypothetical and thus did not support the issuance of the proposed regulations.

2. Another comment on proposed §7.84(a)(2) argued that the existing standard—"compelling circumstances"—lacked sufficient flexibility and that the proposed revision lacks guidelines for determining when circumstances such as destruction of evidence in fact exist.

3. A comment argued that the direct reference to grand jury investigation under proposed §7.84(a)(3) constitutes an improper delegation of FDA's primary responsibility to review technical and scientific questions bearing on the enforcement of the act.

4. A comment on proposed §7.84(a)(3) argued that the proposal would lengthen the time until disposition, thus increasing the period of uncertainty for those under investigation.

5. Another comment on proposed §7.84(a)(3) took exception to FDA's view that a recommendation for further investigation by the grand jury did not constitute the reporting of a violation for "prosecution" within the meaning of section 305 of the act. The comment argued that this proposal frustrates the intent of section 305.

6. The same comment noted that section 167 of the Drug Reform Act of 1978 recently proposed by the Department of Health, Education, and Welfare (HEW) would amend what is now section 305 of the act in a manner consistent with §7.84(a)(3) as proposed and argued that FDA was attempting to achieve by regulation something that it recognizes must be achieved by statute.

7. One comment on proposed §7.84(a)(3) argued that extending the opportunity to present views before requesting grand jury investigation would, in many cases eliminate the need for a grand jury proceeding, thus promoting basic fairness to potential defendants by providing an opportunity to resolve problems before the grand jury process.

The grand jury process will be necessary to supplement the facts that have been determined by FDA's own investigative authority, and to identify additional individuals who may be responsible for violative conduct (and thus to whom a notice cannot be issued because their identity is unknown). Therefore, the Commissioner does not believe that in a significant number of cases a prior section 305 proceeding will demonstrate that further inquiry by a grand jury is unnecessary. The Commissioner believes
that the basic rights of potential defendants are protected by the secrecy of the grand jury process and by the opportunity to present views to United States attorneys and their assistants.

8. One comment argued that referral of a matter to a grand jury may be contrary to public policy, which favors avoiding needless expenditures of Federal funds. The Commissioner agrees that needless expenditures of both money and personnel should be avoided whenever they can be. However, in cases in which a matter is referred to a grand jury for further investigation, expedition will be served. Although a section 305 proceeding may be informal and preliminary, it nevertheless can be time consuming and can require the expenditure of measurable agency resources. A central purpose of this final rule is to eliminate unproductive public expenditures for resources for section 305 hearings that in most instances serve no useful purpose.

9. One comment argued that proposed § 7.84(c) would create undue uncertainty by requiring an opportunity to present views in connection with violations of the Federal Food, Drug, and Cosmetic Act, but providing discretion with respect to such opportunity if other statutes administered by the agency are involved. The Commissioner notes that § 7.84(b) and (c), when read together, were designed to eliminate the uncertainty referred to by the comment. The Federal Food, Drug, and Cosmetic Act is the only statute enforced by FDA that provides for an opportunity for presentation of views before a recommendation to a United States attorney for prosecution. There is no statutory requirement to provide such a notice if a violation of another statute is involved. Accordingly, the proposed regulation as applied to other statutes would, if § 7.84(c) notice is not required if the statute that appears to have been violated does not provide for such a notice. Nevertheless, under proposed § 7.84(c), the Commissioner will give notice if a violation of the Federal Food, Drug, and Cosmetic Act also involves a violation of another Federal statute, even though the other statute contains no notice requirement. The purpose of this provision is to advise a potential defendant of the extent and scope of violations that FDA is considering recommending for prosecution. With knowledge that the conduct at issue is suspected of violating other Federal statutes and that such apparent violations may be brought to the attention of a United States attorney, the respondent can present evidence and arguments that address the elements of proof under those statutes as well. Although the notice provision acknowledges some uncertainty about the breadth of the prosecution recommendation that may ultimately be made, the uncertainty is clearly outweighed by the value of the increased notice to the potential defendant.

10. One comment objected to the exceptions in § 7.84 of both the current regulations and the proposed revisions. The comment noted, however, that the courts have held that section 305 of the act is directory, not mandatory, and that "case law appears to support the proposed regulation's discretion." The comment objected to the lack of objective standards in the exercise of this discretion, alleging that such discretion invites arbitrary and capricious decisions and denial of equal protection. The comment argued that the Commissioner would not have to justify discretionary judgments opportuines for presentation of views.

The Commissioner notes that the proposed regulations are designed to, and do, prescribe criteria for determining whether section 305 procedures are required. These criteria set boundaries for the exercise of discretion. Not all exercise of discretion is arbitrary, and FDA's interpretation and implementation of its statutory authority is to be afforded great weight (see United States v. Jencks, 353 U.S. 591 (1957)). Offenders will be "treated differently for similar offenses" only if their behavior provides a reason to believe they acted differently (e.g., by destroying evidence). A written record of the Commissioner's reasons to "bypass" the section 305 procedures under proposed § 7.84 will be made and will be reviewed by FDA's chief counsel. This record will provide a basis for any subsequent judicial challenge to the propriety of the decision.

11. One comment argued that the procedural changes in proposed § 7.85 (21 CFR 7.85) were substantial enough to require a more detailed, fuller explanation in the preamble of the proposal. The comment argued that the proposal was inadequate and inconsistent with § 10.40(b)(1) (21 CFR 10.40(b)(1)), which provides that a notice of proposed rulemaking contain a preamble that summarizes the proposal and the facts and policy underlying it. The comment suggested that the proposal be withdrawn and resuessed with an explanatory note.

The purpose of the proposed revisions to § 7.85 was stated in the initial information paragraph of the preamble—to "further simplify the procedures to more closely resemble conferences customarily held with potential defendants." The Commissioner further summarized the revisions by noting that the proposed procedural revisions were "intended to preserve the information paragraph of the section 305 proceeding because these nonadversary proceedings, affording "wide latitude to explain voluntarily why a criminal prosecution should not be recommended," have served their purpose well." The Commissioner believes that these comments, though brief, were sufficient to advise any interested party of the reasons for the proposed revisions. The Commissioner also notes that the proposed revisions to § 7.85 do not contemplate and the regulation is neither lengthy nor encumbered with technical or scientific terminology. In these circumstances, the Commissioner believes that notice was adequate and that all interested persons were given the opportunity to submit meaningful comments on the proposed changes.

12. One comment objected to the proposed revision to § 7.85(a) which deleted the provision that an FDA employee's attendance at a section 305 presentation be stated for the record. The comment argued that "fundamental fairness" dictates that a potential defendant know the identity and reason for each person's attendance at a section 305 proceeding.

The Commissioner points out that the proposed revision does not prevent a respondent from determining the identity of any FDA employees who may be present. The only change in the current regulation is deletion of the requirement that the purpose of each FDA employee's attendance be stated on the record. FDA employees will be present only in their official capacity, which may include training. The Commissioner agrees that potential defendants should know the identity of all persons at a conference to present views, but finds that a "statement for the record" of their identity is unnecessary.

13. One comment objected to deleting from current § 7.85(b)(3) (proposed § 7.85(b)(3)) the requirement that the meaning of a term be included in the preamble of the proposal. The comment objected to deletion of the preamble of the basis on which criminal prosecution is contemplated. The comment noted that a summary of the violations would be contained in the section 305 notice but suggested that a respondent also be provided with the facts relied on by FDA.

As both the current and the proposed revised regulations make clear, the opportunity to present views belongs to the respondent. The rules of evidence do not apply. The agency is under no obligation to present evidence or witnesses. Neither the current regulations nor the proposed revisions provide for reciting the evidence known to FDA.

14. Another comment objected to proposed § 7.85(c) on the ground that it deprives a potential defendant of a meaningful right to confrontation. Although the notice provision acknowledges some uncertainty about the breadth of the
give incriminating information, a right of confrontation should exist.

This comment mischaracterizes the section 305 procedure. First, the section 305 notice identifies the respondent involved, the FDA sample number, if any, and the specific provisions of law that appear to have been violated. The notice also states that no reply is required and that if a response is made, the respondent must identify the presiding officer. During recent revisions in §7.85(g), the presiding officer is named in a notice who presents views and any attachments thereto. A summary will always be pre-

pared to have a transcript constitutes an abuse. A summary will always be prepared when the proceeding is not trans-
scribed and, under proposed §7.85(f) and (g), the summary will be given to all respondents, who will then have the opportunity to supplement it or make any correction. For these rea-
sons, the Commissioner believes that the automatic transcription of section 305 presentations is unnecessary. The comment proposing automatic transcrip-
tion at FDA's expense is there-

fore rejected.

16. One comment objected to the re-

vision of current §7.85(d) (proposed §7.85(f)) eliminating the procedure in which a respondent remains after a presentation of views during the dicta-
tion of the summary to be given to each re-
spondent and, in §7.85(g), specify that the respondent may comment on, and supplement, the summary dictated by the hearing officer. The Commissioner agrees that in most cases this procedure has worked well. However, because the summary is not intended to be a catalog of evi-
dence or a piece of written advocacy, the stay-to-comment procedure has been misunderstood and has resulted in confusion. On more than a few oc-
casions, it has resulted in a time-con-
suming and disruptive effort by re-
spondents and their attorneys to alter the summary. However, both the cur-
rent regulations and the proposed re-
visions in §7.85(f) provide for a copy of the summary to be given to each re-
spondent and, in §7.85(g), specify that the respondent may comment on, and supplement, the summary dictated by the hearing officer. In order to offer additional comments. The comment

noted that this procedure has "worked well in the past and should be contin-
ued."

The Commissioner agrees that in

most cases this procedure has worked well. However, because the summary is not intended to be a catalog of evi-
dence or a piece of written advocacy, the stay-to-comment procedure has been misunderstood and has resulted in confusion. On more than a few oc-
casions, it has resulted in a time-con-
suming and disruptive effort by re-
spondents and their attorneys to alter the summary. However, both the cur-
rent regulations and the proposed re-
visions in §7.85(f) provide for a copy of the summary to be given to each re-
spondent and, in §7.85(g), specify that the respondent may comment on, and supplement, the summary dictated by the hearing officer. The Commissioner believes that this requirement is reasonable; therefore, the comments proposing an extended time for supplementation and rejected.

Therefore, under the Federal Food,

Drug, and Cosmetic Act (secs. 305,
701(a), 52 Stat. 1045, 1055 (21 U.S.C.
335, 371(a))), and under authority dele-
gated to the Commissioner (21 CFR
511), Part 7 is amended as follows:

1. In §7.3, by revising paragraphs (b) and (e) and by deleting and reserving paragraph (c) as follows:

§7.3 Definitions.

(b) "Citation" or "cite" means a doc-
ument and any attachments thereto

that provide notice to a person against

whom criminal prosecution is contem-
plated.

(c) "Respondent" means a person

named in a notice who presents views

concerning an alleged violation either in person, by designated representa-

tive, or in writing.

2. By revising §§7.84, 7.85, and 7.87 to read as follows:

§7.84 Opportunity for presentation of
views before report of criminal viola-

tion.

(a)(1) Except as provided in para-

graph (a) (2) and (3) of this section, a

person against whom criminal pros-

ecution under the Federal Food, Drug,

and Cosmetic Act is contemplated by

the Commissioner of Food and Drugs

shall be given appropriate notice and

an opportunity to present information

and views to show cause why criminal

prosecution should not be recommend-

e to a United States attorney.

(2) Notice and opportunity need not be

provided if the Commissioner has

reason to believe that they may result

in the alteration or destruction of evi-

dence or in the prospective defend-

ant's fleeing to avoid prosecution.

(3) Notice and opportunity need not be

provided if the Commissioner con-

templates recommending further in-

vestigation by the Department of Jus-

tice.

(b) If a statute enforced by the Com-

missioner does not contain a provi-

sion for an opportunity to present views, the Commissioner need not, but may, in the Commissioner's discretion, pro-

duce notice and an opportunity to pre-

sent views.

(c) If an apparent violation of the

Federal Food, Drug, and Cosmetic Act

is considered. The Commissioner believes
RULES AND REGULATIONS

also 'constitutes a violation of any other Federal Statute(s), and the Commissioner contemplates recommending prosecution under such other statute(s) as well, the notice of opportunity to present views will include all violations.

(d) Notice of an opportunity to present views may be by letter, standard form, or other document(s) identifying the product and or conduct alleged to violate the law. The notice shall—

(1) Be sent by registered or certified mail, telegram, telex, personal delivery, or any other appropriate mode of written communication;

(2) Specify the time and place where those named may present their views;

(3) Summarize the violations that constitute the basis of the contemplated prosecution;

(4) Describe the purpose and procedure of the presentation; and

(5) Furnish a form on which the legal status of any person named in the notice may be designated.

(e) If more than one person is named in a notice, a separate opportunity for presentation of views shall be scheduled on request. Otherwise, the time and place specified in a notice may be changed only upon a showing of reasonable grounds. A request for any change shall be addressed to the Food and Drug Administration office that issued the notice and shall be received in that office at least 3 working days before the date set in the notice.

(f) A person who has received a notice is under no legal obligation to appear or answer in any manner. A person choosing to respond may appear personally, with or without a representative, or may designate a representative to appear for him or her. Alternatively, a person may respond in writing. If a person elects not to respond on or before the time scheduled, the Commissioner will, without further notice, decide whether to recommend criminal prosecution to a United States attorney on the basis of the information available.

(g) If a respondent chooses to appear solely by designated representative, that representative shall present a signed statement of authorization. If a representative appears for more than one respondent, the representative shall submit independent documentation of authority to act for each respondent. If a representative appears without written authorization, the opportunity to present views with respect to that respondent may be provided at that time only if the authenticity of the representative's authority is first verified by telephone or other appropriate means.

§7.85 Conduct of a presentation of views before report of criminal violation.

(a) The presentation of views shall be heard by a designated Food and Drug Administration employee. Other Food and Drug Administration employees may be present.

(b) A presentation of views shall not be open to the public. The agency employee designated to receive views will permit participation of other persons only if they appear with the respondent or the respondent's designated representative, and at the request of, and on behalf of, the respondent.

(c) A respondent may present any information of any kind bearing on the Commissioner's determination to recommend prosecution. Information may include statements of persons appearing on the respondent's behalf, letters, documents, laboratory analyses, if applicable, or other relevant information or argument. Opportunity to present views shall be informal. The rules of evidence shall not apply. Any information given by a respondent, including statements by the respondent, shall become part of the agency's record concerning the matter and may be used for any official purpose. The Food and Drug Administration is under no obligation to present evidence or witnesses.

(d) If the respondent holds a "guaranty or undertaking" as described in section 303(c) of the act (21 U.S.C. 333(c)) that is applicable to the notice, that document, or a verified copy of it, may be presented by the respondent.

(e) A respondent may have an oral presentation recorded and transcribed at his or her expense, in which case a copy of the transcription shall be furnished to the Food and Drug Administration office from which the notice issued. The employee designated to receive views may order a presentation of views recorded and transcribed at agency expense, in which case a copy of such transcription shall be provided to each respondent.

(f) If an oral presentation is not recorded and transcribed, the agency employee designated to receive views shall dictate a written summary of the presentation. A copy of the summary shall be provided to each respondent.

(g) A respondent may comment on the summary or may supplement any response by additional written or documentary evidence. Any comment or addition shall be furnished to the Food and Drug Administration office where the respondent's views were presented. If materials are submitted within 10 calendar days after receipt of the copy of the summary or transcription of the presentation, as applicable, they will be considered before a final decision as to whether or not to recommend prosecution. Any materials received after the supplemental response period generally will be considered only if the final agency decision has not yet been made.

(h)(1) When consideration of a criminal prosecution recommendation involving the same violations is closed by the Commissioner with respect to all persons named in the notice, the Commissioner will so notify each person in writing.

(2) When it is determined that a person named in a notice will not be included in the Commissioner's recommendation for criminal prosecution, the Commissioner will so notify that person, if and when the Commissioner concludes that notification will not prejudice the prosecution of any other person.

(3) When a United States attorney informs the agency that no persons recommended will be prosecuted, the Commissioner will so notify each person in writing, unless the United States attorney has already done so.

(4) When a United States attorney informs the agency of intent to prosecute some, but not all, persons who had been provided an opportunity to present views and were subsequently named in the Commissioner's recommendation for criminal prosecution, the Commissioner, after being advised by the United States attorney that the notification will not prejudice the prosecution of any other person, will, so notify those persons eliminated from further consideration, unless the United States attorney has already done so.

§7.87 Records related to opportunities for presentation of views conducted before report of criminal violation.

(a) Records related to a section 305 opportunity for presentation of views constitute investigatory records for law enforcement purposes and may include inter- and intra-agency memoranda.

(1) Notwithstanding the rule established in §20.21 of this chapter, no record related to a section 305 presentation is available for public disclosure until consideration of criminal prosecution has been closed in accordance with paragraph (b) of this section, except as provided in §20.82 of this chapter. Only very rarely and only under circumstances that demonstrate a compelling public interest will the Commissioner exercise, in accordance
with § 20.32 of this chapter, the authorized discretion to disclose records related to a section 305 presentation before the consideration of criminal prosecution is closed.

(2) After consideration of criminal prosecution is closed, the records are available for public disclosure in response to a request under the Freedom of Information Act, except to the extent that the exemptions from disclosure in Subpart D of Part 20 of this chapter are applicable. No statements obtained through promises of confidentiality shall be available for public disclosure.

(b) Consideration of criminal prosecution based on a particular section 305 notice of opportunity for presentation of views shall be deemed to be closed within the meaning of this section and § 7.85 when a final decision has been made not to recommend criminal prosecution to a United States attorney based on the charges set forth in the notice and considered at the presentation, or when such a recommendation has been finally refused by the United States attorney, or when criminal prosecution has been instituted and the matter and all related appeals have been concluded, or when the statute of limitations has run.

(c) Before disclosure of any record specifically reflecting consideration of a possible recommendation for criminal prosecution of any individual, all names and other information that would identify an individual whose prosecution was considered but not recommended, or who was not prosecuted, shall be deleted, unless the Commissioner concludes that there is a compelling public interest in the disclosure of the names.

(d) Names and other information that would identify a Food and Drug Administration employee shall be deleted from records related to a section 305 presentation of views before public disclosure only under § 20.32 of this chapter.

Effective date. This regulation is effective March 6, 1979.

(Secs. 305, 701(a), 52 Stat. 1045, 1955 (21 U.S.C. 335, 371(a)).

Dated: February 27, 1979.

JOSEPH P. HILE,
Associate Commissioner
For Regulatory Affairs.

[FR Doc. 79-6693 Filed 3-5-79; 8:45 am]
RULES AND REGULATIONS

ADDRESS: Written objections or requests for a formal evidentiary hearing may be submitted to the Hearing Clerk (HFA-305), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, DC 20204, 202-245-3092.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

In the Federal Register of June 21, 1976 (41 FR 24866) and January 4, 1977 (42 FR 806), the Commissioner of Food and Drugs proposed to amend the quality standards for bottled water, §103.35 (21 CFR 103.35) (formerly §11.17) (21 CFR 11.17), pursuant to recodification published in the Federal Register of March 15, 1977 (42 FR 14302), dealing with maximum chemical contamination levels and radioactivity, respectively. Interested persons were invited to submit comments on the proposals by August 20, 1976 and March 7, 1977, respectively. In these proposals, the Commissioner pointed out that under section 410 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 349), the Food and Drug Administration (FDA) is required, whenever EPA "prescribes interim or revised national primary drinking water regulations under section 1412 of the Public Health Service Act," to consult with FDA and within 180 days after EPA promulgates the drinking water regulations to "either promulgate amendments to regulations under this chapter applicable to bottled drinking water or publish in the Federal Register *** reasons for not making such amendments."

The revisions of the quality standards for bottled water published by FDA on June 29, 1976, and January 4, 1977, were proposed in response to the National Interim Primary Drinking Water Regulations published by EPA in the Federal Register of December 24, 1975 (41 FR 55565) and July 9, 1976 (41 FR 28402).

Seven comments were received on the proposed revision of §103.35. These comments were received from consumers, a physician, a Federal agency, a State health agency, and a scientific organization. Several of the comments included discussions on more than one aspect of the proposals.

1. One comment expressed general support for amending the quality standards for bottled water and stated that the quality of drinking water should be maintained beyond question.

2. One comment suggested that the proposed amendment did not place restrictions on enough compounds that are known to be toxic and that may contaminate water. The comment suggested that the quality standards can be revised to provide for specific contaminant limits, such as limit levels for radionuclides, that are based on scientific data and not arbitrarily. One comment also proposed that the new regulations be amended to require the establishment of quality standards for bottled water or publish in the Federal Register a list of approved test procedures for the analysis of pollutants in effluent discharges and set forth provisions for submitting applications for approval of alternative test procedures. Analytical requirements and provisions for utilizing alternative methods for determining contaminant levels in drinking water were set forth by EPA in 40 CFR Part 141. The Commissioner supports the decisions of EPA relative to the use of alternative test procedures, but believes it would be redundant for FDA to pursue a similar endeavor in this regulation for bottled water because EPA has already done so. Nor is it the intent of this regulation to provide for the periodic review of applicable test methods. Because EPA has the responsibility for approving alternative test methods for chemical analyses of water, it would be unnecessary for FDA to provide for a periodic review of these methods in this regulation.

3. One comment proposed that a "zero" tolerance level be established for those chemical substances for which maximum contaminant levels (MCL's) have been established.

4. One comment proposed that after the June 21, 1976 publication of the proposed quality standard amendments recommended that the July 9, 1976 EPA regulations on radionuclides in primary drinking water be incorporated into the final FDA regulation on bottled water.

The Commissioner indicated in the June 21, 1976 publication that when EPA establishes MCL's for radionuclides in primary drinking water, they will review the quality standards for bottled water. The FDA did review the EPA regulations on radionuclides published on July 9, 1976, and subsequently proposed to amend the quality standards by establishing MCL's for radioactivity in bottled water. The final regulation presented in this document incorporates the July 9, 1976 proposal dealing with radionuclides.

5. Two comments suggested that §103.35(d)(1)(i) be revised to include references to other appropriate methods, such as the American Society for Testing and Materials (ASTM) standards for the analysis of bottled water for chemical substances. These comments pointed out that EPA regulations did allow for use of other appropriate test procedures. One of these comments also included a recommendation that the regulation provide for an annual or biennial review of test methods.

The Commissioner wishes to clarify that the analytical procedures cited in the regulations are those that will be used by FDA to determine whether a lot of bottled water is in compliance with the standard. The regulation does not require manufacturers or their consultants laboratories to use these same procedures. The Commissioner advises that the manufacturers or consulting laboratories may use other methods of analysis that comply with the provisions of 21 CFR 123.35(a)(3), 129.80(g)(1), and 129.80(g)(3) and that produce results substantially equivalent to those obtained by methods referenced in this regulation.

The EPA established in 40 CFR Part 136 a list of approved test procedures for the analysis of pollutants in effluent discharges and set forth provisions for submitting applications for approval of alternative test procedures. Analytical requirements and provisions for utilizing alternative methods for determining contaminant levels in drinking water were set forth by EPA in 40 CFR Part 141. The Commissioner supports the decisions of EPA relative to the use of alternative test procedures, but believes it would be redundant for FDA to pursue a similar endeavor in this regulation for bottled water because EPA has already done so. Nor is it the intent of this regulation to provide for the periodic review of applicable test methods. Because EPA has the responsibility for approving alternative test methods for chemical analyses of water, it would be unnecessary for FDA to provide for a periodic review of these methods in this regulation.

The Commissioner is aware that some of the comments included discussions on microbiological contaminants for which no specific tolerance levels are established, FDA can act under authority of appropriate sections of the Federal Food, Drug, and Cosmetic Act to protect public health. The Commissioner rejects this suggestion because establishing zero tolerances level for microbiological contaminants would undoubtedly be established as the drinking water standard is revised; the bottled water quality standard will be reviewed and revised as necessary to maintain consistency with EPA regulations.

6. One comment pointed out that the effective date of a final regulation for the bottled drinking water quality standard was inconsistent with the effective date established by EPA for the bottled drinking water quality standard established in July 1977. The Commissioner indicated in the June 21, 1976 publication that when EPA establishes MCL's for radionuclides in primary drinking water, they will review the quality standards for bottled water.
The National Interim Primary Drinking Water Regulations. The following comments relative to EPA's publication of drinking water and radionuclide regulations and FDA's proposals to amend the quality standard for bottled drinking water has already been discussed in this preamble. As indicated in the definition in §129.3(b) (21 CFR 129.3(b)), which includes bottled mineral water.

The Commissioner advises that because §103.35(a) is a quality standard regulation and §129.3(b) is a good manufacturing practice regulation, the difference in the two bottled water definitions is intentional. Mineral water is excluded in the quality standard definition because it is inherently different from other bottled water products and cannot be regulated by the specifications established for the quality of other bottled water products. Mineral water is included in the current good manufacturing practice regulations because the inherent differences between mineral water and other bottled water products do not preclude development of similar quality control procedures for manufacturing the products.

The Commissioner acknowledges the validity of this comment and advises that FDA currently uses "Interim Radiochemical Methodology for Drinking Water" (Environmental Monitoring and Support Laboratories, EPA 800/475-008, USEPA) to analyze for radium-228. Section 103.35(e)(2) is revised to include this method. (A copy of "Interim Radiochemical Methodology for Drinking Water" is on file in the office of the Hearing Clerk). The Commissioner advises that the word "shall" be changed to "should" in §103.5(d)(2) which establishes allowable fluoride levels for bottled water relative to air temperature should be revised to include annual maximum daily air temperature. "Specific Abstract of the United States: 1976," 9th Ed., (U.S. Bureau of the Census, Washington, DC) indicates that for the period from 1941 to 1970 the average annual maximum temperature for any of the representative cities. Therefore, the temperature range of "50.0–53.7°F" has been changed to "53.7 and below" on Table 1 and Table 2, but the upper limit of 90.5°F remains unchanged. (A copy of the annual average maximum air temperature data from the "Statistical Abstract of the United States: 1976" is on file in the office of the Hearing Clerk). The Commissioner agrees with this suggestion and has revised §103.5(d) to include this reference.

The Commissioner points out that when a proposal is issued to amend a regulation, opportunity is given for any interested person to submit comments. The final regulation is promulgated after all comments are carefully reviewed. Because the proposed amendment may be revised to reflect changes suggested in comments, a hearing on the proposal before publication of the final regulation is usually considered inappropriate. Following promulgation of the final rule, any interest in ree Tai 22 (21 CFR 12.22).
After evaluating the comments received and other relevant materials, the Commissioner concludes that the regulation should be promulgated as set forth below.

1. In §103.5, by revising paragraphs (d) to read as follows:

(d) The food characteristics included in a standard of quality published in this Part relate only to the quality of the food and not to compliance with any of the adulteration provisions of section 402 of the act. Compliance with a standard of quality promulgated under this Part does not excuse failure to observe either the requirements of section 402(a)(4) of the act that food may not be prepared, packed, or held under unsanitary conditions, or the provisions of Parts 110 and 129 of this chapter requiring that food manufacturers observe current good manufacturing practices. For example, evidence obtained through factory inspection showing such a violation renders the food unlawful, even though the food contains levels of microorganisms lower than those prescribed by an applicable standard.

2. In §103.35, by revising paragraphs (b), (c), (d), and (e) to read as follows:

(b) Microbiological quality. Bottled water shall, when a sample consisting of analytical units of equal volume is examined by the methods described in applicable sections of “Standard Methods for the Examination of Water and Wastewater,” 14th Ed., 1975, which is incorporated by reference, meet the following standards of physical quality:

(1) The turbidity shall not exceed 5 units.
(2) The color shall not exceed 15 units.
(3) The odor shall not exceed one coliform organism per 100 milliliters and the arithmetic mean of the coliform density of the sample shall not exceed one coliform organism per 100 milliliters.

(c) Physical quality. Bottled-water shall, when a composite of analytical units of equal volume from a sample is examined by the method described in applicable sections of “Standard Methods for the Examination of Water and Wastewater,” 14th Ed., 1975, which is incorporated by reference, meet the following standards of physical quality:

(1) The turbidity shall not exceed 5 units.
(2) The color shall not exceed 15 units.
(3) The odor shall not exceed one coliform organism per 100 milliliters and the arithmetic mean of the coliform density of the sample shall not exceed one coliform organism per 100 milliliters.

'Copies are available from: American Public Health Association, 1915 18th St. NW, Washington, DC 20036.'
Dated: March 1, 1979.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Regulatory Affairs.

Note: Incorporations by reference were
approved on July 8, 1976 and November 29, 1976, by
the Director of the Office of the
Federal Register and are on file at the
Federal Register Library.

(P) Docket No. 75N-2286

[4110-03-M]

PART 129—PROCESSING AND BOTTLING OF BOTTLED DRINKING WATER

Bottled Water Testing Requirements

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations governing the processing and bottling of drinking water in response to the National Interim Primary Drinking Water Regulations established by the Environmental Protection Agency (EPA). The revised regulations require that source water be tested regularly for chemical, radiological, and microbiological contaminants and that bottled product water be analyzed semianually for chemical, physical, and radiological contaminants. This document also revokes a stay in the existing regulations that temporarily reduced the semianual testing requirements.

EFFECTIVE DATE: July 1, 1979.

Howard M. Pippen, Bureau of Foods
(HFS-312), Food and Drug Administration,
Department of Health, Education,
and Welfare, 200 C St., SW.,

SUPPLEMENTARY INFORMATION: Part 129 of the Code of Federal Regulations (21 CFR Part 129) is being amended in response to National Interim Primary Drinking Water Regulations established by EPA. The Commissioner of Food and Drugs is revising the definition of "approved source" for a manufacturer's product or operations water and is requiring that source water be examined at least once a year for chemical contaminants, at least once every 4 years for radiological contaminants and, if obtained from a source other than a municipal or public water system, at least once a week for microbiological contaminants. The Commissioner is also requiring that final product water be analyzed at least annually for chemical, physical, and radiological contaminants. The stay published in the Federal Register of November 4, 1976 (41 FR 51194) which temporarily reduced the semianual testing requirements under §129.35(a)(3) (21 CFR 129.35(a)(3)) for water from approved sources is revoked.

The Commissioner issued proposed amendments to Part 129. The proposed rule was issued under section 1412 of the Public Health Service Act and was published in the Federal Register of May 26, 1977 (42 FR 13002). Interested persons were invited to submit comments on the proposals by August 20, 1976 and March 7, 1977, respectively.

The Commissioner pointed out that under section 410 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 349), FDA is required to review at least every 5 years regulations governing the processing and bottling of drinking water in order to ascertain that regulations are in the public interest. The Commissioner found that these regulations are no longer in the public interest as a result of regulations that were issued on this matter on December 23, 1977 by the Environmental Protection Agency (EPA). The Commissioner is being consistent with this change by revising the definition of approved source to conform with the definition required under the regulations issued by EPA. The Commissioner also is requiring that source water be examined at least once a year for chemical contaminants, at least once every 4 years for radiological contaminants and, if obtained from a source other than a municipal or public water system, at least once a week for microbiological contaminants.

Any person who will be adversely affected by this final rule may file written objections and may make a written request for a formal evidentiary hearing. Objections to the order and requests for a hearing shall be submitted on or before April 5, 1979 to the Hearing Clerk, Food and Drug Administration, Room 4-55, 5600 Fishers Lane, Rockville, MD 20857. Objections and requests for a hearing shall be submitted in accordance with the requirements of "Standard Methods for the Examination of Water and Wastewater," 14th Ed., 1975, and "Interim Radiochemical Methodology for Drinking Water," Environmental Monitoring and Support Laboratory, EPA-600/4-75-008 (Revised), March 1976, U.S. Environmental Protection Agency, both of which are incorporated by reference.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
3. One comment stated that in §103.35 and Part 129 all references to the "Standard Methods for the Examination of Water and Wastewater" should be changed to cite the 14th edition, instead of the 13th edition, 1971.

The Commissioner agrees that such editorial changes should be made as necessary. The requested change has been made in §103.35 by the final rule amending the CGMPR's for bottled drinking water, which is published elsewhere in this issue of the Federal Register.

However, because Part 129 does not reference standard methods, the requested revision is not applicable to that part.

4. One comment pointed out that the proposed effective dates for the final rule amending the CGMPR's for bottled drinking water were inconsistent with the effective dates established by EPA for the National Interim Primary Drinking Water Regulations.

The sequence of events concerning EPA's publication of drinking water and radionuclide regulations and the FDA proposals to amend the CGMPR's for bottled water was previously discussed in this preamble. The Commissioner believes that even though the two sets of regulations involve related basic principles, it is not critical to establish the same effective dates for bottled water CGMPR's as for regulations for municipal water systems.

The effective date of the EPA regulations was June 24, 1977. Obviously, this should not be the effective date for this final rule. The proposed effective dates of the bottled water CGMPR amendments published in June 1976 and January 1977 were August 20, 1979 and January 1, 1979, respectively. Because of the time lapse between publication of the proposals and this final rule, the Commissioner has extended these effective dates to allow the manufacturers of bottled water to comply with this regulation. Therefore, the Commissioner has set July 1, 1979 as the effective date for this final regulation.

5. One comment said that the definition of bottled water in §103.35(a), which excludes mineral water, is not consistent with the definition in §129.3(b) (21 CFR 129.3(b)), which includes bottled mineral water.

The Commissioner advises that §103.35(a) is a quality standard regulation and §129.3(b) is a good manufacturing practice regulation. The difference in the two bottled water definitions is intentional. Mineral water is excluded in the quality standard definition because it is inherently different from other bottled water products and cannot be regulated by the specific regulations established for the quality of other bottled water products. Mineral water is included in the good manufacturing practice regulation definition of bottled water because the inherent differences between mineral water and other bottled water products do not preclude implementation of similar quality control procedures for manufacturing the products.

6. One comment suggested that the FDA CGMPR's should include provisions similar to those in EPA's primary drinking water regulations (40 CFR 141.21(d) (1), (2), (3) and (4)). These provisions establish criteria for performing check analysis when sampling results indicate excessive coliform counts.

As discussed in the preamble to the June 1976 CGMPR proposal, the sampling procedures established by EPA and FDA are necessarily different because EPA must be concerned with monitoring plant types and sizes of municipal water systems but FDA regulates a relatively uniform industry. The Commissioner concludes, therefore, that for the manufacture of bottled drinking water, the sampling procedures established in Part 129 are sufficient.

7. Two comments suggested that existing §129.35(a)(3)(d) which states that "sampling and analysis shall be by qualified plant personnel," should be revised to delete the word "plant."

The Commissioner agrees that the wording of this statement appears unnecessarily restrictive. However, §129.35(a)(3)(d) provides that competent commercial laboratories may perform the analyses. To clarify the intent of the regulation, the phrase "sampling and analysis shall be by qualified plant personnel" has been deleted from §129.35(a)(3)(d) of this final rule.

8. One comment asserted that the proposed regulation which indicated that quality control checks must be performed by qualified plant personnel or by qualified commercial testing laboratories was inadequate because the analytical qualifications were not specified. The comment also suggested that measurements for radioactivity should be performed by laboratories approved or certified in accordance with 40 CFR 141.23 and that detection limits for these measurements should be those prescribed in 40 CFR 141.25(a).

The Commissioner agrees that these suggestions warrant consideration by any manufacturer of bottled water. However, the Commissioner contends that further statement of this position is unnecessary because §§129.35(a)(3)(d) and 129.80(g)(3) require that methods used must be recognized and approved by the government agency or agencies having jurisdiction. The detection limits of the methods for radiological assays are such that, to ensure that source water and finished product water comply with the standards of quality in §103.35, bottled water manufacturers must rely on highly trained personnel using proper instrumentation.

9. One comment suggested that the requirement to analyze "at least annually a representative sample from a batch or segment of a continuous production run for radiological contaminants," should be sufficient without the additional requirement to examine the source water every 4 years for radionuclides.

The Commissioner does not agree with this comment. For any raw material, monitoring of source water is necessary to ensure that a high quality finished product can be attained. The proposal published June 20, 1976, stated that source water must be analyzed for radionuclides at least once a year. The Commissioner reviewed this requirement and published a revision to reduce the minimum testing for radioactivity in source water to once every 4 years. The Commissioner has again reviewed this aspect of quality control and concludes that the minimum testing of once every 4 years is necessary.

The EPA commented that proposed §129.35(a)(3)(d) would require that source water obtained from other than public water systems be analyzed at least once each week for microbiological contaminants but the proposed regulation did not clearly require any additional testing. The Commissioner has, therefore, clarified §129.35(a)(3)(d) in this final rule to require that all source water be analyzed at least once every year for chemical contaminants and once every 4 years for radiological contaminants. Additionally, source water obtained from other than a public water system is to be sampled and analyzed for microbiological contaminants at least once each week.

Relative to the definition of "approved source," in §129.3(a), EPA noted that it does not have jurisdiction over source water that is not a public water system. EPA suggested that source water from other than public water systems be required to meet the same conditions as community water systems. The Commissioner believes that it would be inappropriate to make the change suggested. The EPA standards for community water systems are subject to a detailed enforcement scheme and variances and exemptions (see 42 U.S.C. 300g-4, 300g-5). If FDA were to make the EPA standards directly applicable to bottled water and mineral water from private sources, FDA would have to es-
establish an adequate system for considering exemptions and variances, FDA believes it is administratively simpler and adequate to continue to regulate the safety of mineral and botted water directly on the basis of the general statutory standards in section 402 of the act (21 U.S.C. 342), as the law applies to particular cases. Moreover, bottled water, other than mineral water, must comply with the quality standards in 21 CFR Part 103, which include standards in addition to and exceeding the EPA standards for community water systems. Any bottled water not meeting the quality standards must be appropriately labeled.

In the Federal Register of November 4, 1975 (40 FR 51184), the Commissioner issued a stay of a portion of the sampling and testing requirements of the CGMPR for bottled water. The stay partially and temporarily rescinded the requirement under §129.35(a)(3) to semianually test water from approved sources. To maintain consistency with EPA's national interim primary drinking water regulations, the stay provided notice that testing of water from approved sources was required only once a year. This stay is hereby revoked. Sampling and analysis of water from approved sources must be performed at least once per year for chemical contaminants and every 4 years for radiological contaminants as established by this final regulation.

After evaluating the comments received and other relevant material, the Commissioner concludes that the regulation should be promulgated as set forth below.

§129.3 Definitions.

(a) "Approved source" when used in reference to a plant's product water or operations water means a source of water and the water therefrom, whether it be from a spring, artesian well, drilled well, municipal water supply, or any other source, that has been inspected and the water sampled, analyzed, and found to be of a safe and sanitary quality according to applicable laws and regulations of State and local government agencies having jurisdiction. The presence in the plant of current certificates or notifications of approval from the government agency or agencies having jurisdiction constitutes approval of the source and the water supply.

2. In Subpart B, §129.35 is amended as follows:

a. The stay published in the Federal Register of November 4, 1975 (40 FR 51184), which reduced the semiannual testing in §129.35(a)(3), is hereby revoked.

b. Section 129.35(a)(3)(i) is revised to read as follows:

§129.35 Sanitary facilities.

(3) Product water and operations water from approved sources. (1) Samples of source water are to be taken and analyzed by the plant as often as necessary, but at a minimum frequency of once each year for chemical contaminants and once every 4 years for radiological contaminants. Additionally, source water obtained from other than public water system is to be sampled and analyzed for microbiological contaminants at least once each week. This sampling is in addition to any performed by government agencies having jurisdiction. Records of approval of the source water by government agencies having jurisdiction and of sampling and analyses for which the plant is responsible are to be maintained on file at the plant.

3. In Subpart E, in §129.60, the introductory text of paragraph (g) and paragraph (g)(2) are revised to read as follows:

§129.60 Processes and controls.

(g) Compliance procedures. A quality standard for bottled drinking water, excluding mineral water, is established in §103.35 of this chapter. To assure that the plant's production of bottled drinking water complies with the applicable standards, laws, and regulations of the government agency or agencies having jurisdiction, the plant will analyze product samples as follows:

(2) For chemical, physical, and radiological purposes, take and analyze at least annually a representative sample from a batch or segment of a continuous production run for each type of bottled drinking water produced during a day's production. The representative sample(s) consists of primary containers of product or unit packages of product.

Effective date. This regulation is effective July 1, 1979.

Dated: March 1, 1979.

William F. Randolph, Acting Associate Commissioner for Regulatory Affairs.

PART 1914—COMMUNITIES ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, phone: (800) 638-6620.

FOR FURTHER INFORMATION CONTACT:

Richard Krimm, Assistant Administrator, Office of Flood Insurance, (202) 785-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, DC 20410.
In addition, the Federal Insurance Administration has identified the special flood hazard areas: in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 1914.5 is amended by adding in alphabetical sequence new entries to the table.

### § 1914.5 List of eligible communities.

Suspension of Community Eligibility

AGENCY: Federal Insurance Administrator, HUD

ACTION: Final rule.

SUMMARY: This rule lists communities where the sale of flood insurance, as authorized under the National Flood Insurance Program (NFIP), will be suspended because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATES: The third date ("Susp.") listed in the fifth column.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street, SW., Washington, DC 20410, (202) 755-6581 or Toll Free Line 800-424-8872.

SUPPLEMENTARY INFORMATION:

The National Flood Insurance Program (NFIP), administered by the Federal Insurance Administration, enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001-4128) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR Part 1009 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date subsidized flood insurance is no longer available in the community.

In addition, the Federal Insurance Administration has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elapsed since publication of a flood insurance map. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedures under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Sanibel, Lee County, Florida

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Sanibel, Lee County, Florida. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to adopt or show evidence of being already in effect in order to qualify for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the City of Sanibel, Florida.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Sanibel, are available for review at City Hall, 2075 Periwinkle Way, Sanibel, Florida.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-785-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of Sanibel, Florida.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding Location Elevation in feet, national geodetic vertical datum

Gulf of Mexico ...... Intersection of Sanibel Captives Road and Wulfert Road.

Source of flooding Location Elevation in feet, national geodetic vertical datum

Intersection of West Gulf Drive and East Rocks Drive.

Intersection of Periwinkle Way and Tarpon Bay Road.

Intersection of Casa Beach Boulevard and Royal Poinciana Drive.

Intersection of Gulf Rocks Drive and Anchor Drive.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the Township of South Versailles, Allegheny County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Township of South Versailles, Allegheny County, Pennsylvania. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Township of South Versailles, Allegheny County, Pennsylvania.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Township of South Versailles, Union County, Pennsylvania, are available for review at the residence of Mr. Harold Bennett, Stein Lane, Winfield, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Township of Union, Union County, Pennsylvania.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 70(k)(4) of the Department of HUD Act, Section 324 of the Housing and Community Amendments of 1977, Pub. L. 95-242, 92 Stat. 2589, this rule has been granted waiver of Congressional review requirements in order to permit it to take effect on the date indicated.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the Borough of Wilmerding, Allegheny County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Borough of Wilmerding, Allegheny County, Pennsylvania. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect. The community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for Hamilton County, Tennessee.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for Hamilton County, Tennessee, are available for review at the Hamilton County Courthouse, Chattanooga, Tennessee.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-785-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION:
The Federal Insurance Administrator gives notice of the final determinations of flood elevations for Hamilton County, Tennessee.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910. The final base (100-year) flood elevations for selected locations are:

Source of flooding Location Elevation in feet, national geodetic vertical datum

Turtle Creek upstream Corporate limits 748
Wabco Bridge upstream limits 748
Side

Supplementary information:
The Federal Insurance Administrator gives notice of the final determinations of flood elevations for Hamilton County, Tennessee.

**RULES AND REGULATIONS**

[Docket No. FI-3855]

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the City of Denton, Denton County, Texas.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Denton, Denton County, Texas. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the final flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the City of Denton, Denton County, Texas.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 6270, 451 Seventh Street SW., Washington, D.C. 20410, 202-765-9811 or toll-free line 800-421-9072.

SUPPLEMENTAL INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of Denton, Denton County, Texas.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.7(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Administrator has resolved the appeals presented by the community.

Gloria M. Jimenez, Federal Insurance Administrator.

[PR Doc. 79-6329 Filed 3-5-79; 8:45 am]

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

**SUMMARY:** Final base (100-year) flood elevations are the basis for floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

**EFFECTIVE DATE:** The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Town of Pownal, Bennington County, Vermont.

**ADDRESS:** Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Pownal, Bennington County, Vermont, are available for review at the Pownal Town Office, Fownal, Vermont.

**FOR FURTHER INFORMATION CONTACT:**

Mr. Richard Kriheim, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW, Washington, D.C. 20410, 202-765-4961 or toll-free line 1-888-424-8972.

**SUPPLEMENTARY INFORMATION:**

The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Town of Pownal, Bennington County, Vermont.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1103 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, effective January 28, 1969 (33 FR 7719), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 10(a)(4) of the Department of HUD Act, Section 324 of the Housing and Community Amendments of 1978, Pub. L. 95-557, 92 Stat. 2080, this rule has been granted waiver of Congressional review requirements in order to permit it to take effect on the date indicated.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

[FR Doc. 79-6330 Filed 3-5-79; 8:45 am]

[Docket No. FI-4580]
Final Flood Elevation Determinations for Henry County, Va., Cancellation
AGENCY: Federal Insurance Administration, HUD.
ACTION: Cancellation of final rule.
SUMMARY: The Federal Insurance Administration has erroneously published at 43 FR 45580 on October 3, 1978, the final flood elevation determination for Henry County, Virginia. This notice will serve as a cancellation of that publication. A new notice of final flood elevation determination will be published in the near future.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Town of Shoreham, Addison County, Vermont.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448, 82 U.S.C. 4001-4126, 44 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979

FLOOD ELEVATION DETERMINATION FOR THE CITY OF NORFOLK, VA.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Norfolk, Virginia. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of already in effect in order to qualify or remain qualified for participation in the National flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the City of Norfolk, Virginia.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Norfolk, Virginia, are available for review at the Norfolk City Hall Building, Norfolk, Virginia.

SUPPLEMENTARY INFORMATION:

The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of Norfolk, Virginia.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-304), 87 Stat. 580, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1219.41(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

(Final Flood Elevation Determination for the Town of Kahlotus, Franklin County, Washington. See FR Doc. 79-6338 Filed 3-5-79; 8:45 am)

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Kahlotus, Franklin County, Washington, are available for review at the Kahlotus Town Hall, Kahlotus, Washington.

FOR FURTHER INFORMATION CONTACT:
Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 461 Seventh Street SW, Washington, D.C. 20410, 202-755-5681 or toll-free line 800-424-8872.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910. The final base (100-year) flood elevations for selected locations are:

PART 1917—APPEALS FROM PROPOSED FLOOD ELEVATION DETERMINATIONS

Final Flood Elevation Determination for the town of Belington, Barbour County, W. Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the town of Belington, Barbour County, West Virginia. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the town of Belington, Barbour County, West Virginia.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the town of Belington, Barbour County, West Virginia, are available for review at the Clerk's office.

Jonathan P. Deacon, Telephone (202) 343-4005.

**SUPPLEMENTARY INFORMATION:**

In the June 14, 1977, Federal Register (42 FR 30362) there was published a notice of final rule on new general regulations governing the operation and maintenance of Indian irrigation projects. The revision consolidated the regulations for all Indian Irrigation Projects in a new Part 221 of Title 25 of the Code of Federal Regulations. The updated provisions provided for the Area Director to publish the annual operation and maintenance rates and related information by general notice document in the Federal Register, and as new rates are announced the corresponding sections in Part 221 of Title 25 of the Code of Federal Regulations would be deleted.

The latest notice of water charges and related information on the Fort Hall Irrigation Project was published in the January 31, 1979, Federal Register, (44 FR 6209); on the Wapato Irrigation Project in the February 1, 1979, Federal Register (44 FR 6521).

**§§ 221.32-221.35 [Deleted]**

Therefore, 25 CFR Part 221 is amended by deleting the following sections:

Fort Hall Indian Irrigation Project, Idaho—§§ 221.32, 221.33, 221.34, and 221.35.

**§§ 221.71-221.5a [Deleted]**

Ahtanum Indian Irrigation Project, Washington—§§ 221.1, 221.2, 221.3, 221.4, 221.5 and 221.5a.

**§§ 221.73-221.76 [Deleted]**

Topeppenish-Siems Indian Irrigation Project, Yakima Indian Reservation, Washington—§§ 221.73, 221.74, 221.75, and 221.76.

**§§ 221.86-221.94 [Deleted]**

Wapato Indian Irrigation Project, Washington—§§ 221.86, 221.87, 221.88, 221.89, 221.90, 221.91, 221.92, 221.93 and 221.94.

Vincent Little, Area Director.

[4310-02-M]
PART 221—OPERATION AND MAINTENANCE CHARGES

Deletion of Needless Regulations

AGENCY: Bureau of Indian Affairs, Department of Interior.

ACTION: Final rule.

SUMMARY: This document removes provisions relating to the operation and maintenance charges on the Klamath Irrigation Project, Modoc Point Unit, Oregon. The amendment is necessary to remove regulations which are no longer in effect as a result of transfer of the Federal irrigation facilities to the Modoc Point Irrigation District.

EFFECTIVE DATE: This action shall become effective April 5, 1979.

FOR FURTHER INFORMATION CONTACT:
Jonathan P. Deason, Department of Interior, Washington, D.C. 20245; Telephone (202) 343-4005.

SUPPLEMENTARY INFORMATION:
The Klamath Termination Act of August 13, 1954 (68 Stat. 718), as amended, provided for the transfer of the Klamath Irrigation Project, Modoc Point Unit, Oregon to the United States Bureau of Indian Affairs. The amendment is necessary to remove regulations which are no longer in effect as a result of transfer of the Federal irrigation facilities to the Modoc Point Irrigation District.

PART 207—NAVIGATION REGULATIONS

Restricted Area, St. Johns River, Florida

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Final Rule.

SUMMARY: This document establishes a restricted area in the waters adjacent to the U.S. Navy Fuel Depot Pier in the St. Johns River, Jacksonville, Florida. The restricted area is necessary to provide adequate safety and security for the fuel depot.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:
Pursuant to the provisions of Section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1) the Department of the Army establishes a restricted area as set forth below. A Notice of Proposed Rulemaking was published in the Federal Register on November 15, 1978 (43 FR 53045) with the comment period ending on December 19, 1978. No comments were received.

§ 207.167 U.S. Navy Fuel Depot Pier, St. Johns River, Jacksonville, Florida; restricted area.

a. The area is described as:
(1) A line running at 238.5° true and paralleling the pier at 100 feet is extended from the eastern edge of the mooring platform #59 to the western edge of platform #63. From these points the boundaries are extended to the shoreline along lines running at 238.5°.
(2) The easterly waterward coordinate being:
30°23'58.0" N 81°37'15.0" W
b. The Regulations:
(1) The use of waters as previously described by private and/or commercial floating craft is prohibited with the exception of vessels that have been specifically authorized to do so by the Officer in Charge of the Navy Fuel Depot.

(2) This regulation shall be enforced by the Officer in Charge, U.S. Navy Fuel Depot, Jacksonville, Florida.

(40 Stat. 266; 33 U.S.C. 1)

Note: The Department of the Army has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order No. 11621 and OMB Circular A-197.

MICHAEL BLUMENFELD,
Deputy Under Secretary of the Army.

[FR Doc. 79-6690 Filed 3-5-79; 8:45 am]

[6560-01-M]
Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FR Doc. 1066-2]

PART 65—DELAYED COMPLIANCE ORDERS

Delayed Compliance Order for Miami County Incinerator

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of U.S. EPA approves a Delayed Compliance Order to Miami County Incinerator. The Order requires Miami County Incinerator to bring its emissions from its Incinerator at Troy, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP). Miami County Incinerator’s compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (the Act) for violations of the SIP regulations covered by the Order.

DATES: March 6, 1979.

FOR FURTHER INFORMATION CONTACT:
Cynthia Colantoni, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604; Telephone (312) 353-2082.

SUPPLEMENTARY INFORMATION:
On December 21, 1978, the Regional Administrator of U.S. EPA’s Region V Office published in the Federal Register (43 FR 59526) a notice setting out the provisions of a proposed State Delayed Compliance Order for Miami County Incinerator. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. No public comments and no request for a public hearing were received.
RULES AND REGULATIONS

hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is approved to Miami County Incinerator by the Administrator of U.S. EPA pursuant to the authority of Section 113(d)(2) of the Act, 42 U.S.C. 7413(d)(2). The Order places Miami County Incinerator on a schedule to bring its incinerator at Troy, Ohio, into compliance as expeditiously as practicable with Regulations OAC 3745-17-09 and 3745-17-17, as a part of the federally approved Ohio State Implementation Plan. Miami County Incinerator is unable to immediately comply with these regulations. The Order also imposes interim requirements which meet Sections 113(d)(1) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit Miami County Incinerator to delay compliance with the SIP regulations covered by the Order until December 31, 1978. Compliance with the Order by Miami County Incinerator will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulations covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulations covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that Miami County Incinerator is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

Dated: February 27, 1979.

DOUGLAS M. COSTLE,
Administrator.

1. In consideration of the foregoing, Chapter X of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

By adding the following entry to the table in § 65.401 to read as follows:

<table>

2. The text of the order reads as follows:

BEFORE THE OHIO ENVIRONMENTAL PROTECTION AGENCY

In the Matter of: Miami County Incinerator, 2200 County Road 25-A, Troy, Ohio 45373.

ORDER

The Director of Environmental Protection, hereinafter "Director," hereby makes the following Findings of Fact and, pursuant to Sections 3704.03(S) and (I) of the Ohio Revised Code and in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., issues the following Orders which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act:

**FINDINGS OF FACT**

1. Miami County (hereinafter "Miami Co."), operates an incinerator which serves its facility located at 2200 County Road 25-A, Troy, Ohio 45373.

2. In the course of operation of said incinerator, air contaminants are emitted in violation of OAC 3745-17-07 (Control of visible air contaminants from stationary sources) and OAC 3745-17-09 (Restriction on emissions from incinerators).

3. Miami Co. is unable to immediately comply with OAC 3745-17-07 and OAC 3745-17-09.

4. Potential emissions of particulates from the incinerator are approximately 240.69 tons per year, whereas Miami Co. constitutes a major stationary source or facility under Section 302(I) of the Clean Air Act, as amended.

5. The compliance schedule set forth in the Orders below requires compliance with OAC 3745-17-07 and OAC 3745-17-09 as expeditiously as practicable.

6. Implementation by Miami Co. of the interim requirements contained in the Orders below will fulfill the requirements of Section 113(d)(7) of the Clean Air Act, as amended.

7. The Director's determination to issue the Orders set forth below is based upon his consideration of reliable, probative, and substantial evidence relating to the technical feasibility and economic reasonableness of compliance with such Orders, and their relation to benefits to the people of the State to be derived from such compliance. Whereupon, after due consideration of the above Findings of Fact, the Director hereby issues the following Orders pursuant to Sections 3704.03(S) and (I) of the Ohio Revised Code in accordance with Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq., which will not take effect until the Administrator of the United States Environmental Protection Agency has approved their issuance under the Clean Air Act.

1. Miami Co. shall bring its incinerator located at 2200 County Road 25-A, Troy, Ohio, into final compliance with OAC 3745-17-07 and OAC 3745-17-09 by converting to a transfer station and thereby ceasing operation of the incinerator no later than December 31, 1978.

2. Compliance with Order (I) above shall be achieved by Miami Co. in accordance with the following schedule on or before the dates specified:

- Submit final control plans—June 29, 1974.
- Award contracts—July 17, 1978.
- Achievement of final compliance with OAC 3745-17-07 and OAC 3745-17-09—December 31, 1978.

*Already accomplished.

3. Pending achievement of compliance with Order (I) above, Miami Co. shall comply with the following interim requirements which are determined to be reasonable and to be the best practicable system of emission reduction, and which are necessary to ensure compliance with OAC 3745-17-07 and OAC 3745-17-09 insofar as Miami Co. is able to comply with them during the period in which Order (I) is in effect in accordance with Section 113(d)(7) of the Clean Air Act, as amended.

*FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979*
RULES AND REGULATIONS

PART 530—INTERPRETATIONS AND STATEMENTS OF POLICY

Compliance With Wage and Price Standards

AGENCY: Federal Maritime Commission.

ACTION: Adoption of statement of policy.

SUMMARY: This statement of policy is to assist ocean common carriers in compliance with the Wage and Price Standards (6 CFR 705) issued by the Council on Wage and Price Stability. Companies which earned more than 75 percent of their total revenues from international trade during the four quarters completed prior to October 2, 1978, need not comply with either the price standard or profit margin limitation. Companies are expected to comply with the reporting requirements and the wage standard.

EFFECTIVE DATE: March 6, 1979.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, 1100 L Street, N.W., Washington, D.C. 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION:

Pursuant to section 43 of the Shipping Act, 1916, (46 U.S.C. 841a) and the provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 553), the Commission hereby adopts the following statement of policy by adding a new §530.11, Ocean Common Carrier Compliance With Wage and Price Standards (6 CFR 705) to Title 46 CFR.

§530.11 Ocean common carrier compliance with wage and price standards.

(a) The President's Council on Wage and Price Stability published on November 7, 1978, voluntary wage and price standards (6 CFR 705) to implement President Carter's program for reducing inflation in the United States. In support of this effort, the Federal Maritime Commission is requesting that all rate or fare increases be accompanied by supporting documentation which demonstrates compliance with the wage and price standards.

(b) However, if a company derives a substantial portion of its revenue from international trade, compliance with the price guidelines, which cover ocean rates or fares, may not be required. Companies which earned more than 75 percent of their total revenues from international trade during the four quarters completed prior to October 2, 1978, need not comply with either the price standard or profit margin limitation enunciated in the President's guidelines. The following schedule illustrates this case with a hypothetical company revenue breakdown.

HYPOTHETICAL COMPANY REVENUE, 10-1-77 THROUGH 9-30-78

<table>
<thead>
<tr>
<th>Total revenue</th>
<th>Revenue from international trade</th>
<th>Revenue from domestic trade</th>
<th>Other company revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>$200</td>
<td>$200</td>
<td>$45</td>
<td>$15</td>
</tr>
</tbody>
</table>

In this example the company derives 80 percent of its revenue from the international sector and, therefore, it is not required to comply with the guidelines.

(c) It should be emphasized that these specific exemptions do not constitute a blanket waiver for the ocean shipping industry from the Council's guidelines. Even those firms which need not adhere to the price standard or profit margin limitation are expected to comply with the company reporting requirements and the wage standard. Companies should promptly obtain a copy of the President's guidelines and associated documents in order to ensure full compliance with 6 CFR 705.

By the Commission February 23, 1979.

FRANCIS C. HURNIEY
Secretary.

SUPPLEMENTARY INFORMATION:

Report and Order—Proceeding Terminated

In the matter of amendment of Part 81 of the rules to delete the provisions which provide for the use of telegraphy by limited coast stations, SS Docket No. 78-351, 43 FR 51047, November 3, 1979.

SUMMARY

1. This Report and Order deletes from Part 81 of the Commission's rules the provisions which authorize the use of radio telegraphy by limited coast stations in the Maritime Mobile Service.

BACKGROUND

2. Since 1951 the Commission's rules have provided for the licensing of limited coast stations which employ telegraphy. However, no authorization for a limited coast radiotelegraph station has ever been granted. This is primarily because of narrow eligibility requirements and the lack of available frequencies for assignments to such stations. Section 81.223(a) of the rules provides that limited coast radiotelegraph stations shall: (1) Not be open to public correspondence; (2) not render a common carrier service; (3) not transmit press material or news items not required to serve a governmental purpose; and (4) be used exclusively to serve governmental purposes, including the transmission of safety communications. In regard to frequency availability, radiotelegraph frequencies are limited by international allocations. We do not expect that additional radiotelegraph frequencies will be available for assignment to limited coast stations in the foreseeable future.

3. Although the frequencies listed in § 81.206 (Assignable frequencies) could be assigned to either public or limited coast stations, they have all in practice been assigned to public coast stations due to the scarcity of radiotelegraph frequencies and the need for adequate public correspondence capabilities in the Maritime Mobile Service. In a Memorandum Opinion and Order in Docket No. 1954 dated February 22, 1978, (43 FR 10346, 67 FCC 2d 790) we affirmed, after an extensive review of public coast radiotelegraph operations, that the view that public coast stations appear to provide the best means for the management of radiotelegraph frequencies on an equitable, disciplined, and reliable basis. Further, as noted above, we have never licensed any limited coast radiotelegraph stations, nor do we have any applications for such stations pending.

4. Therefore, in the Notice of Proposed Rule Making in this proceeding, adopted October 19, 1978, we proposed to amend the provisions authorizing the use of telegraphy by limited coast stations and references thereto.

COMMENTS

5. No comments were received in response to the Notice of Proposed Rule Making issued in this proceeding.

ACTION

6. For the reasons discussed above, and considering that no comments were filed opposing our proposal, we will amend § 81.190 and delete §§ 81.261, 81.217, 81.223(b), 81.224(b), and 81.225 as proposed in the Notice of Proposed Rule Making.

8. Accordingly, it is ordered, That, pursuant to the authority contained in Sections 4(i) and 303 (b), (c) and (g) of the Communications Act of 1934, as amended, the Commission's rules are amended as set forth below, effective April 6, 1979.

9. It is further ordered, That this proceeding is terminated.

SUPPLEMENTARY INFORMATION:

*Public Coast stations render a communications common carrier service. They transmit messages to and receive messages from ships at sea without discrimination. U.S. public coast stations charge a fee for their communications services in accordance with tariffs on file with the Commission.

*FEDERAL COMMUNICATIONS COMMISSION, WILLY J. TRICARICO, Secretary.

Part 81 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. The parenthetical wording "(public and limited)" in the first sentence of paragraph (a) of § 81.190 is deleted and the heading is amended, so that the sentence and heading read as follows:

§ 81.190 Radiotelegraph watch by public coast stations.

(a) All public coast stations licensed to use telegraphy on frequencies within the band 405-535 kHz shall, during their hours of service, take the necessary measures to ensure an efficient safety watch by a duly licensed radiotelegraph operator on the international distress frequency 500 kHz for three minutes twice each hour, beginning at x h. 15 and x h. 45 Greenwich mean time. ** * * * * * * *

2. The heading of Subpart H is amended to read as follows:

Subpart H—Public Coast Stations, Use of Telegraphy

§ 81.216 [Reserved]

§ 81.217 [Reserved]

§ 81.225 [Reserved]

§ 81.223 [Amended]

3. Sections 81.216, 81.217 and 81.225 are revoked and reserved.

§ 81.223 [Amended]

4. Section 81.223(b) is revoked and reserved.

§ 81.224 [Amended]

5. Section 81.224(b) is revoked and reserved.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Seventeenth Rev. S.O. No. 1234]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Seventeenth Revised Service Order No. 1234.
SUMMARY: There are serious shortages of freight cars of the sizes and numbers required to comply with certain tariff provisions. Service Order No. 1234 authorizes the carriers to substitute smaller cars for larger cars required for shipments of specified commodities in order to meet minimum volume requirements but without limitations as to the number of cars to be used by each shipment. Seventeenth Revised Service Order No. 1234 adds beans to the list of commodities for which smaller cars may be substituted for the larger cars customarily used.

DATES: Effective 11:59 p.m., March 1, 1979. Expires when modified or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT:  

SUPPLEMENTARY INFORMATION:  

There is an acute shortage of high capacity freight cars for transporting shipments of alfalfa pellets, barley sulphate (crude barite, ground or not ground), *beans, beans pellets, beet pulp, citrus pellets, citrus pulp, clay, coal, coke, cottonseed hulls, electrode binder pitch, fertilizer, fish meal, grain, grain products, gypsum, gypsum rock, peanuts, peanut hulls, pencil pitch, perlite, phosphate (dried and ground, treated and untreated), salt, soybeans, soybean hulls, soybean products, or sunflower seeds regardless of tariff requirements specifying minimum cubic or weight carrying capacity. (See exceptions (b) and (c)).

(b) Exception. This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more cars per shipment.

(c) Exception. This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(d) Rates and Minimum Weights Applicable. The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by Section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(e) Billing To Be Endorsed. The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

"Car of (—) cu. ft. and of (—) lbs. or greater capacity ordered. Smaller cars furnished authory Seventeenth Revised ICC Service Order No. 1234."

(j) Exceptions. Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(h) Rules and Regulations Suspended. The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(i) Application. The provisions of this order shall apply to intrastate, Interstate and foreign commerce.

(i) Effective Date. This order shall become effective at 11:59 p.m., March 1, 1979.

[7035-01-M]  
[S.O. No. 1363]  
PART 1033—CAR SERVICE

Substitution of Refrigerator Cars for Boxcars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1363).

SUMMARY: There is a substantial shortage of boxcars on Burlington Northern, Inc. for shipments of sugar. BN has an available supply of certain refrigerator cars that may be substituted for this traffic at the ratio of two refrigerator cars for each boxcar. Service Order No. 1363 authorizes BN, with the consent of the shipper, to substitute two refrigerator cars for each boxcar ordered for shipments of sugar.

DATES: Effective 12:01 a.m. February 28, 1979. Expires when modified or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT:  

SUPPLEMENTARY INFORMATION:  

An acute shortage of boxcars for transporting shipments of sugar exists on Burlington Northern Inc. (BN) at
stations on its lines. The BN has an available supply of certain refrigerator cars that may be substituted for this traffic at the ratio of two refrigerator cars for each boxcar, and use of these refrigerator cars for the transportation of sugar is precluded by certain tariff provisions, thus curtailing shipments of sugar. There is a need for the use of these refrigerator cars to supplement the supplies of plain boxcars for transporting shipments of sugar. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure herein are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1363 Substitution of refrigerator cars for boxcars.
(a) Each common carrier by railroad subject to the Interstate commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:
(1) Substitution of Cars. Burlington Northern Inc. (BN) may substitute two refrigerator cars for each boxcar ordered for shipments of sugar from any station on the BN and destined to any other station on the BN subject to the conditions provided in paragraphs (2) through (5) of this order.
(2) Concurrence of Shipper Required. The concurrence of the shipper must be obtained before two refrigerator cars are substituted for each boxcar ordered.
(3) Exclusive BN Movement Required. Shipments of sugar for which two refrigerator cars are substituted for one boxcar must originate and terminate at stations on the BN and must not be routed over any other carrier, except that shipments may originate or terminate in terminal switching service on connecting lines which do not participate in the line-haul.
(4) Minimum weights. The minimum weight per shipment of sugar for which two refrigerator cars have been substituted for one boxcar shall be that specified in the applicable tariff for the car ordered.
(5) Endorsement of Billing. Bills of lading and waybills covering movements authorized by this order shall contain a notation that shipment is moving under authority of Service Order No. 1363.
(b) Rules and regulations suspended. The operation of tariffs or other rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.
(c) Application. The provisions of this order shall apply to intrastate, interstate, and foreign commerce.
(d) Effective date. This order shall become effective at 12:01 a.m., February 28, 1979.
(e) Expiration. The provisions of this order shall remain in effect unless modified or vacated by order of this Commission.
(49 U.S.C. 10304-10305 and 11121-11126.)
This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John Michael. Member Robert S. Turkington not participating.

H. G. Horne, Jr.,
Secretary.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

[1 CFR Chapter III]

USE OF COST-BENEFIT AND OTHER SIMILAR ANALYTICAL METHODS OF REGULATION

Draft Recommendation

AGENCY: Administrative Conference of the United States.

ACTION: Request for public comments.

SUMMARY: The Administrative Conference's Committee on Agency Decisional Processes has under consideration a draft recommendation on the use of cost-benefit and other similar analytical methods in regulation. Interested persons are invited to comment on the draft recommendation.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

The Administrative Conference's Committee on Agency Decisional Processes has under consideration a draft recommendation on the use of cost-benefit and other similar analytical methods in regulation, based on a study prepared by Professor Michael Baran of the Franklin Pierce Law Center.

The draft recommendation is based on a recognition that Federal agencies frequently must make regulatory decisions that require a balancing of a multiplicity of primary and collateral regulatory objectives, including those relating to economic and social interests, and to health, safety, resource management or environmental quality. Statutes prescribing policy objectives and a general framework for such agency decision-making often lack detailed guidance on the analytical methods to be applied to balance costs, risks and benefits. Moreover, an agency may be subject to constraints imposed by multiple statutes with varying goals, as well as Presidential requirements such as Executive Order 12044. As a practical result agencies have a considerable responsibility in deciding how to structure a central feature of their decision-making function, the making of tradeoffs necessary to reach decisions. "Costs-benefit" and similar analytic techniques are sometimes used to give structure to the exercise of this responsibility by organizing available information on alternative courses of action, and thereby displaying possible tradeoff opportunities to the decision-makers. It normally includes identification of the several impacts of the courses of action under consideration, a quantification of each of the impacts where feasible, and an examination of the net effects.

- The recommendation seeks neither to promote nor to discourage the use of cost-benefit analysis as a framework for agency decision-making, but rather to enhance the effectiveness of agency decision-making where either Congress or agencies determine to use such techniques.

The Committee on Agency Decisional Processes will meet at the end of March 1979 to reconsider the proposed recommendation in the light of the comments received.

PROPOSED RECOMMENDATION

USE OF COST-BENEFIT AND SIMILAR ANALYSES IN REGULATION

Introduction

Federal agencies must frequently weigh competing health, safety, resource management, environmental, economic, and other societal interests when seeking to achieve a prescribed statutory objective. Wise decision-making presumes that the potential benefits and costs of the actions under consideration will be identified, will be quantified if feasible, and will be appraised in relation to each other. To give structure to the exercise of this responsibility, agencies sometimes use "cost-benefit" and similar analytic approaches to organize available information to determine the consequences of possible courses of action in terms of their costs, risks and benefits. Such techniques seek to display the project ed net effects of alternative courses of action and, when properly used, can assist the decision-maker in deciding which of the alternatives is most likely to produce the desired result.

The recommendation seeks neither to promote nor to discourage the use of cost-benefit analysis or any other particular kind of analysis as a framework for agency decision-making. Its purpose, rather, is to promote openness in the decision-making process, both to ensure that the agency's analytical methods and assumptions, whatever they may be, are compatible with the conclusions finally reached and to enhance public confidence in the soundness of those conclusions, once they have been announced. The intent of the recommendation will be served by giving the public adequate advance notice of the agency's proposed methodologies, either generally or by means of special notice in a particular proceeding.

Recommendation

1. Each agency planning to use cost-benefit or similar analyses in a particular proceeding should, in its public notice of the proceeding, address the following points:
   a. The statutory or other basis for the agency's conduct of cost-benefit or similar analyses in the proceeding.
   b. The particular analytical approach to be followed by the agency (e.g., cost-benefit analysis, cost-effectiveness analysis, qualitative or non-numerative balancing), with a description of the method.
   c. The agency's methods for evaluating intangible costs and benefits, for discounting future costs and benefits, and for taking account of distributional effects arising under the selected methodology, to the extent such issues are involved in the analyses.
   d. The timing of cost-benefit or similar analyses in the agency's consideration of the conclusions to be reached.
   e. The extent of public participation allowed in the design, conduct, and evaluation of the cost-benefit or similar analyses.
   f. The extent and manner in which the public is to be accorded access to information and assumptions used in the analyses.

The public notice should indicate any assumptions or preliminary findings on which the proceeding is to be based.

2. In the final agency determination, any revisions of assumptions or preliminary findings, and a statement of the weight given the cost-benefit or similar analyses, should be included in the decision record and made available to the public.

3. Each agency using cost-benefit or similar analyses in decision-making should, whenever feasible, adopt procedures to make the record of the proceeding a part of the administrative record.
PROPOSED RULES

12199

March 1, 1979.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

[7 C.F.R. Part 1436]

1979 CROP GUM NAVAL STORES SUPPORT PROGRAM

Proposed Rulemaking

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: The purpose of this notice is to advise that the Commodity Credit Corporation, as authorized by the Agricultural Act of 1949, as amended, is considering whether a price support program for 1979-crop gum naval stores should be established, and, if so, at what level of support.

The support program would stabilize market prices and protect producers, processors and consumers, and would enable producers to obtain price support for 1979-crop gum naval stores.

Written comments are invited from interested persons.

DATE: Written comments must be received on or before April 6, 1979, in order to be sure of consideration.

FOR FURTHER INFORMATION CONTACT:

Dallas R. Smith (ASCS) (202) 447-7413.

SUPPLEMENTARY INFORMATION: The Secretary is granted the authority under Title III ("Other Nonbasic Agricultural Commodities"), Sec. 301, of the Agricultural Act of 1949, as amended, to make available a loan or purchase program "to producers for the purpose of stabilizing the commodity not designated in Title II at a level not in excess of 90 percent of the parity price for the commodity • • • " Sec. 303 provides that "price support shall, if feasible, be made available to producers of any storable nonbasic agricultural commodity for which such a loan program is in effect and who are complying with such program".

Sec. 301 of the Act requires that the Secretary, in determining whether there shall be a program, consider: (1) The supply of the commodity in relation to the demand therefor, (2) the price levels at which other commodities are being supported, (3) availability of funds, (4) perishability and storability of the commodity, (5) importance of the commodity to agriculture and the national economy, (6) ability to dispose of stocks acquired through a support operation, and (7) the ability and willingness of producers to help keep supplies in line with demand.

Executive Order 12044 (43 FR 12661, March 21, 1979) requires at least 60 days for public comments on proposed significant regulations, except where the agency determines this is not possible, or is not in the best interests of the producers. In view of the fact that the producers are at this time preparing the trees for harvest, which begins in mid-March 1979, producers need to know the support level and operating provisions before that time. Therefore, it is hereby found and determined that compliance with the provisions of Executive Order 12044 is impossible and contrary to public interest. Accordingly, comments must be received by April 6, 1979, in order to be considered.

PROPOSED RULE

In view of the interest shown by producers in a support program, the Secretary will consider the alternatives of a loan program for the 1979-crop of gum naval stores, a loan-purchase program, or no program in 1979. The loan program to be considered would be a non-recourse loan program as was in effect for the 1976-crop of gum naval stores.

Before making any determination the Department will give consideration to comments, data, views and recommendations submitted in writing, within the comment period, to the Director, Producer Associations Division.

All submissions received will be made available for inspection from 8:15 a.m. to 4:45 p.m., Monday through Friday, in Room 5750, South Building, 14th and Independence Avenue, SW., Washington, D.C. (7 CFR 1.27(b)).

This regulation has been determined not significant under the USDA criteria implementing Executive Order 12044.

STEWART N. SMITH,
Acting Executive Vice President,
Commodity Credit Corporation.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[8 CFR Part 242]

ARREST AND BOND OF ALIENS

Revisions to Procedures and Criteria

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This is a Notice of Proposed Rule Making proposing amendments to the regulations of the Immigration and Naturalization Service respecting the arrest and release on bond of aliens in the United States. A review of the arrest and bond procedures was made by the Immigration and Naturalization Service and it was concluded that the proposed regulations should be published. These proposed regulations are necessary and intended to set forth criteria for arrest and bond and are intended to assure that determinations regarding such actions will be made in a uniform manner by all Service offices throughout the country.

DATES: Representations must be received on or before May 7, 1979.

ADDRESSES: Please submit written representations, in duplicate, to the Commissioner of Immigration and Naturalization, Room 7100, 425 I Street, NW., Washington, D.C. 20536.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service. Telephone: (202) 633-3048.

SUPPLEMENTARY INFORMATION: This is a Notice of Proposed Rule Making which proposes to amend 8 CFR 242.2(a). The proposed amendments: (1) Provide that a warrant of arrest should not be issued unless the
issuing officer has reason to believe the alien is likely to abscond or will be a threat to public safety or national security; (2) set forth a number of criteria to be considered by Service officers in determining whether or not to issue warrants of arrest and (3) provide for a bond in case of a determination by the regional commissioner where the alien is ordered to be detained without bond or to be held in lieu of a bond in excess of $5,000.

The proposed amendments on arrest are the result of efforts of a team of Service officers chaired by the Deputy Commissioner to set forth specifically the conditions and criteria under which aliens may be arrested. The proposed amendments on bond determination are the result of a review of bond procedures and practices in selected Service offices, from which it was concluded that amendments to the regulations were necessary and would be helpful in making unified decisions in bond cases throughout the Service.

In the light of the foregoing it is proposed to revise Chapter I of Title 8 of the Code of Federal Regulations as set forth below:

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

It is proposed to revise §242.2 as set forth below.

§242.2 Apprehension, custody, and detention.

(a) Warrant of arrest. At the commencement of any proceeding under this part, or at any time thereafter and up to the time the respondent becomes subject to supervision under section 242, the respondent may be arrested and taken into custody under a warrant of arrest. However, such warrant may be issued only by a district director, acting district director, deputy district director, assistant district director for investigations, or officer in charge of an office enumerated in §242.1(a). The warrant should not be issued unless the issuing officer has reason to believe the alien is likely to abscond or will be a threat to public safety or national security. In issuing a warrant of arrest, the issuing officer shall, among other factors, take into consideration the respondent's close family ties; age; fixed address; prior immigration or any law violations; employment history; financial condition; previous attempts to escape or abscond; reasonable cause to believe the respondent will not appear but will evade immigration or naturalization process. If, after the issuance of a warrant of arrest, a determination is made not to serve it, any officer authorized to issue such warrant may order its cancella-

tion. When a warrant of arrest is served under this part, the alien shall have explained to him in reasonable and understandable language (1) the contents of the order to show cause, (2) the reason for his arrest (3) that any statement he makes may be used against him, and (4) his right to be represented by counsel of his own choice at no expense to the Government. He shall also be advised of the availability of free legal services programs qualified under Part 229a of this chapter as organizations recognized pursuant to §292.2 of this chapter, located in the district where his deportation hearing will be held. He shall be furnished with a list of such programs, and a copy of Form 1-618, Written Notice of Appeal Rights. Service of these documents shall be noted on Form I-213. He shall then be advised whether he is to be continued in custody; or released under bond, or on his own recognize and under what conditions. No alien shall be detained without bond or in lieu of a bond in excess of $5,000 and the regional commissioner is unavailable for concurrence; bond may be set immediately and concurrence obtained on the next working day. The regional commissioner's authority to concur in such custody shall not be delegated below the level of the acting regional commissioner. The regional commissioner's decisions shall be recorded on Form I-265A (Information Worksheet for Bond/Custody Determination). A respondent on whom a warrant of arrest has been served may apply to the district director; acting district director, deputy district director, assistant district director for investigations, or officer in charge of an office enumerated in §242.1(a), when serving the warrant. When a warrant of arrest is served under this part, the alien shall be detained without bond; or released on his own recognizance and under what conditions. No alien shall be detained without bond or in lieu of a bond in excess of $5,000 and the regional commissioner is unavailable for concurrence; bond may be set immediately and concurrence obtained on the next working day. The regional commissioner's authority to concur in such custody shall not be delegated below the level of the acting regional commissioner. The regional commissioner's decisions shall be recorded on Form I-265A (Information Worksheet for Bond/Custody Determination). A respondent on whom a warrant of arrest has been served may apply to the district director; acting district director, deputy district director, assistant district director for investigations, or officer in charge of an office enumerated in §242.1(a), when serving the warrant of arrest and when determining any application pertaining thereto, shall furnish the respondent with a notice of decision, which may be on Form I-286, indicating whether custody will be continued or terminated, specifying the conditions, if any, under which release is permitted, and advising the respondent appropriately whether he may apply to an immigration judge pursuant to paragraph (b) of this section for release or modification of the conditions of release or whether he may appeal to the Board. A direct appeal to the Board from a determination by a district director, acting district director, deputy district director, assistant district director for investigations, or officer in charge of an office enumerated in §242.1(a), shall not be allowed except as authorized by paragraph (b) of this section.

(See 103 and 242; 8 U.S.C. 1103 and 1252)

PUBLIC COMMENTS INVITED

In accordance with the provisions of section 553 of Title 5 of the United States Code, interested persons are invited to submit relevant data, views and arguments concerning these proposed rules to the Commissioner of Immigration and Naturalization, Room 7100, 425 I Street, N.W., Washington, D.C. 20536 on or before May 7, 1979. Comments should be submitted in writing, in duplicate.

Dated: March 1, 1979.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

(Sec. 103 and 242; 8 U.S.C. 1103 and 1252)

SMALL BUSINESS ADMINISTRATION

[Federal Register Vol. 44, No. 45—Tuesday, March 6, 1979]

[SMALL BUSINESS ADMINISTRATION

13 CFR Part 121]

SMALL BUSINESS SIZE STANDARDS

Definition of Small Business for the Purpose of SBA Loan Guarantees—Water Supply Industry

AGENCY: Small Business Administration.

ACTION: Proposed rulemaking.

SUMMARY: This rule proposes to establish a size standard for the water supply industry. It is necessary because small firms in the industry are being faced with increased financial obligations to meet Federal water pollution requirements. It is proposed that this new rule will establish the eligibility criterion for small water supply firms for SBA assistance.

DATE: Written comments must be submitted by April 5, 1979.

ADDRESS ALL COMMENTS TO: Kalei C. Skelink, Director, Size Standards Division, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:
The Safe Drinking Water Act (SDWA) was enacted on December 16, 1974, as an amendment to the Public Health Service Act of the purpose of stand-
ardizing the quality of the Nation's water supply. This Act carries with it potential monitoring and treatment requirements which necessitate additional costs to virtually all water systems and ultimately to consumers. Over the last year and a half, a detailed economic impact analysis of this legislation has been initiated by the Environmental Protection Agency (EPA) in a special survey of community water systems. Data from this survey indicate that smaller water systems are more affected by this legislation than are larger systems. The EPA has therefore requested the SBA to provide financial assistance to smaller firms in the industry that have suffered significant additional costs as a result of the 1974 Act.

The size distribution of firms in the industry is very skewed, with only 19 percent of sales. Approximately 50 firms in the $2.0-$2.5 million range could be affected by this new standard. A size standard of $2.5 million in retail sales therefore provides financial support for additional smaller size firms which the EPA has indicated are in need of assistance. Moreover, for firms above the size standard, financial assistance may still be available under §121.3-16, Definition of small business for the purpose of pollution control guarantee assistance under Public Law 94-305.

Accordingly, pursuant to authority contained in section 5(b)(6) of the Small Business Act, as amended, 15 U.S.C. 634, et seq., Section 121.3-10 of Part 121, Chapter I of Title 13, Code of Federal Regulations, is proposed to be amended by adding subparagraph (d)(12) to read as follows:

§121.3-10 Definition of small business for SBA loans.

   (d) * * *

   (12) As small if it is primarily engaged in the water supply industry and its annual receipts do not exceed $2.5 million.

WILLIAM H. MAUK, JR.,
Acting Administrator.

PROPOSED RULES

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 210]

[Release Nos. 33-4028; 34-15582, 35-20934; IC-106001]

OIL AND GAS PRODUCERS

Full Cost Accounting Policies

AGENCY: Securities and Exchange Commission.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: The Commission is withdrawing its proposed rule (43 FR 40724) which would have required oil and gas producers following the full cost method of accounting to make supplemental disclosures of capitalized costs and costs incurred had the successful efforts method of accounting been followed. The Commission has concluded that significant benefit would not be obtained from such a requirement.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: Securities Act Release No. 5968 [43 FR 40724], August 31, 1978, proposed for comment uniform financial accounting and disclosure requirements for oil and gas producers following the full cost method of accounting. Included among the proposed disclosures was the aggregate amount of costs capitalized on the balance sheet that would have been charged to expense and the approximate amount of costs incurred in the current year that would have been expected had the successful efforts method of accounting been followed.

In announcing its final rules for the full cost method in Accounting Series Release No. 253 [43 FR 60413], December 19, 1978, the Commission indicated that it had deferred consideration of this specific proposal. As summarized in that release, many commentators objected to such a requirement as being an unreasonable and unnecessary burden. These persons believed that the proposal was inconsistent with the conclusions in the Commission's preliminary findings and conclusions in Accounting Series Release No. 253 [43 FR 40581], August 31, 1978, that both successful efforts and full cost were severely limited in conveying information that would permit investors and government policy-makers to gain an understanding of the operations of individual companies or to compare the operations of different companies. A small number of commentators did, however, express the view that these supplemental disclosures were essential for a comparison of the financial position and operating results of companies using alternative accounting methods during the period in which reserve recognition accounting is being developed.

The Commission has concluded that relevant information for comparing oil and gas producing companies is provided by its previously adopted disclosure requirements. The reasons for their retention are the quantities and valuations and changes therein, and the proposed supplemental earnings summary. The benefits of additional supplemental disclosures by full cost companies do not appear to outweigh the cost of requiring those companies to compute the information. Accordingly, the disclosure requirements proposed as paragraphs (l)(7)(ii) and (l)(7)(iii) of §210.3-18 are hereby withdrawn.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc. 79-6735 Filed 3-5-79; 8:45 am]

PROPOSED RULES

SUPPLEMENTARY INFORMATION: In enacting the Investment Company Act of 1940 ("Act") (15 U.S.C. 80a-1 et seq.), Congress determined that the national public interest and the interest of investors are adversely affected when investment companies are organized, managed, or their portfolio securities are selected in the interest of, among other persons, brokers. Presumably in part to address that concern, Congress enacted section 17(e) of the Act, which concerns the remuneration that an affiliated person of an investment company and an affiliated person of such person may receive in transactions involving the sale of securities to or for such company or any controlled company thereof, except in the course of such person's business as a dealer in securities.

Section 17(e)(1) of the Act prohibits such an affiliated person acting as agent from accepting any compensation from any source other than a regular salary or wage from an investment company for the purchase or sale of property to or for such company or any controlled company thereof, except in the course of such person's business as a dealer in securities.

Section 17(e)(2) of the Act specifically prohibits such an affiliated person—acting as broker, in connection with the sale of securities to or by such registered investment company or any controlled company thereof—of receiving from any source a commission, fee, or other remuneration for and in connection with such transactions to receive only "the ordinary stock exchange brokerage commission." Thus, in effect, section 17(e)(2) limits the compensation which may be received in reliance on the exemption for the brokerage business from the prohibitions of section 17(e)(1) of the Act. Congress thereby intended an affiliated broker in executing such transactions to receive only "the ordinary stock exchange brokerage commission."**

However, in 1975 the Commission promulgated rule 19b-3 (17 CFR 240.19b-3) under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), which prohibits the fixing of commission rates by national securities exchanges. Consequently with the advent of fully negotiated—and therefore fluctuating—commission rates, it may be impracticable presently to determine the "usual and customary broker's commission" for any particular agency transaction on such a securities exchange.

Accordingly, the Commission proposes adopting rule 17e-2 (17 CFR 270.17e-2) under the Act to define the conditions under which, if satisfied, an affiliated person could receive a commission, fee, or other remuneration as broker in such a securities transaction which would be deemed not to exceed the "usual and customary broker's commission" for purposes of section 17(e)(2)(A) of the Act. As incorporated in proposed rule 17e-2, these conditions would require that the investment company's directors, including a majority of its disinterested directors, establish procedures which are reasonably designed to provide that the commission, fee, or other remuneration received by the affiliated broker is reasonable and fair compared to the commission, fee or other remuneration received by other brokers in connection with similar securities transactions during a comparable period of time. This rule, if adopted as proposed, would provide a method of complying with the statutory limitation on remuneration which is established in section 17(e)(2)(A) of the Act. As rulemaking, it would not, of course, supersede that statutory limitation. Therefore, it is conceivable that some investment companies may determine to rely directly on the language of section 17(e)(2)(A), rather than on the proposed rule, in determining whether specific brokerage transactions comply with the statutory limitations, although that approach may not fully take into account the limits on fluctuating commission rates that may be involved.

Until a rule providing an alternative manner of determining compliance with section 17(e)(2)(A) has been adopted, the Commission will not institute enforcement action against investment companies which pay brokerage commissions to affiliated brokers in good faith in a manner which Congress expected would satisfy the objectives of section 17e-2.

The term "disinterested director" is commonly used as a reference to a director who is not an interested person of the investment company, as defined in section 2(a)(19) of the Act (15 U.S.C. 80a-2(a)(19)).

In establishing those guidelines, directors of investment companies should appreciate fully that section 17(e) of the Act was intended, in part, to prohibit those situations where an affiliated person would operate on behalf of an investment company while under a conflict of interest, such as by receiving gratuities for effecting particular transactions. See, e.g., U.S. v. Deutsch, 451 F2d 12002

[Release No. IC-10605, File No. S7-773]

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Investment Company Act of 1940, in part, prohibits an affiliated person of a registered investment company who is acting as broker in a securities transaction involving that company from receiving a commission, fee or other remuneration exceeding the usual and customary broker's commission if the purchase or sale is effected on a securities exchange. However, the advent of negotiated commission rates may make it impracticable for an investment company to determine whether brokerage commissions paid to affiliated persons satisfy the statutory standard of a usual and customary broker's commission. Accordingly, the Commission is requesting public comment on a proposed rule which, provided that certain conditions are satisfied, would deem a commission which is fair and reasonable (compared to that received by other brokers in comparable transactions for similar portfolio securities on a securities exchange) as not exceeding the usual and customary broker's commission.

Among the conditions is a requirement that the transaction be effected pursuant to procedures, established by the investment company's directors, which are reasonably designed to provide remuneration that is reasonable and fair compared to the remuneration received by other persons in connection with similar transactions on a securities exchange during a comparable time period. This proposed rule was prepared by the Division of Investment Management's Investment Company Act Study Group as part of its re-examination of the regulation of investment companies.

DATE: Comments must be received by April 13, 1979.

ADDRESSES: Send comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 N. Capitol Street, Washington, D.C. 20549. (Refer to File No. S7-773.) All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

FOOTNOTES:

2. Rule 17e-2, if adopted as proposed, would provide a method of complying with the statutory limitation on remuneration which is established in section 17(e)(2)(A) of the Act. As rulemaking, it would not, of course, supersede that statutory limitation. Therefore, it is conceivable that some investment companies may determine to rely directly on the language of section 17(e)(2)(A), rather than on the proposed rule, in determining whether specific brokerage transactions comply with the statutory limitations, although that approach may not fully take into account the limits on fluctuating commission rates that may be involved. Until a rule providing an alternative manner of determining compliance with section 17(e)(2)(A) has been adopted, the Commission will not institute enforcement action against investment companies which pay brokerage commissions to affiliated brokers in good faith in a manner which Congress expected would satisfy the objectives of section 17e-2.

3. The term "disinterested director" is commonly used as a reference to a director who is not an interested person of the investment company, as defined in section 2(a)(19) of the Act (15 U.S.C. 80a-2(a)(19)).

4. In establishing those guidelines, directors of investment companies should appreciate fully that section 17(e) of the Act was intended, in part, to prohibit those situations where an affiliated person would operate on behalf of an investment company while under a conflict of interest, such as by receiving gratuities for effecting particular transactions. See, e.g., U.S. v. Deutsch, 451 F2d 7...
standard would allow an affiliated broker to receive no more than the remuneration which would be expected to be received by an unaffiliated broker in a commensurate arm's-length transaction.8

Because of the difficulties inherent in monitoring continuously the reasonable compensation practices of such unfixed commission rates, the Commission believes that the first line of responsibility for determining compliance with proposed rule 17e-2 must be with each investment company's directors. Therefore, proposed rule 17e-2 would require that, at least quarterly, the investment company's directors, including a majority of its disinterested directors, determine whether the transactions executed pursuant to rule 17e-2 have satisfied the procedures established in the guidelines. These re-

Footnotes continued from last page

8See 58 S. Ct. 984, 92 D. C. 404 U.S. 1019 (1972) (criminal violation of section 17(e)(1) of the Act). Therefore, in determining what constitutes reasonable and fair remuneration, or other compensation, for compliance with proposed rule 17e-2, directors should evaluate carefully any circumstances in which an affiliated broker may receive a commission rate which is different from the independent execution regardless of qualitative considerations.

It should be noted that, in addition to satisfying the standards of the proposed rule, any transaction executed by an affiliated broker must satisfy also the investment company's obligation to obtain best price and execution in each securities transaction. However, the Commission recently has noted that "An obligation to get the cheapest execution regardless of qualitative considerations has been rejected by the Commission and the Congress." Securities Exchange Act Release No. 6919 (Jan. 30, 1979), 49 FR 7864 (1979), regarding the disclosure of brokerage prices by certain registered investment companies and certain other issuers. In this regard, although an investment company under appropriate circumstances may pay-up for research, in the event that "brokerage commissions paid to an affiliate reflect more than normal charges for execution alone, the investment manager would be under a heavy burden to show that such payments were appropriate." Id. Moreover, the proposed rule would not affect, in any manner, any interpretations, rules or other promulgations concerning the prohibitions of section 11(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78a(k)(3)), prohibiting a member of a national securities exchange from effecting transactions on such exchange for its own account or for the account of an associated person of the member or any account as to which the member or one of its associated-persons exercises investment discretion.

In the event that the remuneration was not reasonable and fair,that the directors are unable to make the determination required by subparagraph (b)(3) of the pro-

requisites are analogous to conditions proposed to be incorporated into rule 10F-5 (17 CFR 270.10F-5), which exempts the acquisition of securities from certain underwriting syndicates which would otherwise be prohibited under section 10(f) of the Act (15 U.S.C. 80a-10(f)). Furthermore, they are consistent with the Investment Company Act Study Group's recommendation that enhanced responsibility for management decisions and legal compliance generally be retained by investment companies' directors.

As in the proposed amendments to rule 10F-5, a copy of the director's guidelines and records pertaining to each such transaction effected in reliance on proposed rule 17e-2 must be maintained by the investment company pursuant to section 31(a) of the Act (15 U.S.C. 80a-30(a)), so that the Commission may monitor experience with proposed rule 17e-2 through its inspection program.11 However, unlike the proposed amendments to rule 10F-5, rule 17e-2 would not require that all transactions executed thereunder be indicated in the investment company's quarterly report.12 Information concerning aggregate compensation paid to an investment company to any affiliated person or any affiliated person of such person presently must be disclosed in that investment company's proxy statements and in certain proxy statements pertaining to the election of certain directors.13

TEXT OF PROPOSED RULE

It is proposed to amend Part 270 of Chapter II of Title 17 of the Code of

Federal Regulations by adding §270.17e-2 as follows:

§270.17e-2 Brokerage transactions on a securities exchange.

For purposes of section 17(e)(2)(A) of the Act (15 U.S.C. 80a-17(e)(2)(A)), a commission, fee, or other remuneration shall be deemed as not exceeding the usual and customary broker's commission, if:

(a) The commission, fee, or other remuneration received or to be received is reasonable and fair compared to the commission, fee or other remuneration received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time;

(b) The board of directors, including a majority of the directors of the investment company who are not interested persons thereof, (1) have adopted procedures which are reasonably designed to provide that such commission, fee, or other remuneration is consistent with the standard described in paragraph (a) of this section, (2) review no less frequently than annually such procedures for their continuing appropriateness, and (3) determine frequently that quantity that all transactions executed pursuant to this rule during the preceding quarter were effected in compliance with such procedures and were consistent with the purposes of this section; and

(c) The investment company (1) shall maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modification thereof) described in paragraph (b)(1) of this section, and (2) shall maintain and preserve for a period not less than six years from the end of the fiscal year in which any transactions occurred, the first two years in an easily accessible place, a written record of each such transaction setting forth the amount and source of the commission, fee or other remuneration received or to be received, the identity of the person acting as broker, the terms of the transaction, and the information or materials upon which the findings described in paragraph (b)(3) of this section were made.

(Rule 17e-2 is proposed pursuant to the provisions of section 6(c) (15 U.S.C. 80a-6(c)), section 31(a) (15 U.S.C. 80a-30(a)), and section 38(a) (15 U.S.C. 80a-30(a)) of the Act.)

"The Commission has proposed today the rescission of existing rule 17e-1 (17 CFR 270.17e-1) under the Act. Investment Company Act Release No. 6919 (Jan. 30, 1979), 49 FR 7864 (1979). The Commission proposes that, should that rule be rescinded, rule 17e-2 would be redesignated as a new rule 17e-1 (17 CFR 270.17e-1)."
By the Commission.

GEORGE A. FITZSIMMONS, Secretary.

[FR Doc. 79-6742 Filed 3-5-79; 8:45 am]

PROPOSED RULES

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule rescission.

SUMMARY: The Investment Company Act of 1940, in part, prohibits an affiliated person of a registered investment company who is acting as broker in a securities transaction involving that company from receiving a commission, fee or other remuneration exceeding 1 percent of the purchase or sale price if the purchase or sale is effected otherwise than on a securities exchange or in connection with a secondary distribution of such securities. In 1942, the Commission, by rule, authorized remuneration exceeding 1 percent in over-the-counter transactions if such remuneration generally equals the fixed minimum brokerage commissions prescribed by specified securities exchanges. For almost four years, such exchanges have prohibited the Commission from fixing minimum brokerage commission rates. Consequently, the rule no longer appears to be based on an appropriate standard for the protection of investors. Accordingly, the Commission believes that the rule is obsolete and proposes its rescission.

DATE: Comments must be received by April 13, 1979.

ADDRESSES: Send comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 N. Capitol Street, Washington, D.C. 20549, (refer to File No. ST-774). All comments received will be available for public inspection and copying in the Commission’s Public Reference Room, 1100 L Street, N.W., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

Section 17(e)(1) of the Investment Company Act of 1940 ("Act") (15 U.S.C. 80a-17(e)(1)) prohibits an affiliated person of an investment company or any controlled company thereof, except in the course of such person's business as a writer or broker, from receiving a commission, fee or other remuneration equal to the best price and execution respecting any compensation from any source (other than a regular salary or wages from an investment company) for the purchase or sale of any part of any property to or for such company or any controlled company thereof, except in the course of such person's business as a writer or broker. Section 17(e)(2)(C) of the Act (15 U.S.C. 80a-17(e)(2)(C)) prohibits such an affiliated person acting as agent from accepting any compensation from any source (other than a regular salary or wages from an investment company) for the purchase or sale of any part of any property to or for such company or any controlled company thereof, except in the course of such person's business as a writer or broker. Section 17(e)(2)(C) of the Act (15 U.S.C. 80a-17(e)(2)(C)) prohibits such an affiliated person acting as broker, in connection with the sale of securities to or by such registered company or any controlled company thereof, to receive from any source a commission, fee or other remuneration for effecting such transaction which exceeds 1% of the purchase or sale price of such securities if the sale is effected otherwise than on a securities exchange or in connection with a secondary distribution of such securities unless the Commission shall, by rules and regulations or order in the public interest and consistent with the protection of investors, permit a larger commission.

In 1942, the Commission promulgated rule 17e-1 (17 CFR 270.17e-1) under the Act generally "to permit affiliated brokers in effecting over-the-counter transactions in securities to receive remuneration equal to the minimum commissions prescribed by national securities exchanges with respect to similar transactions effected on such exchanges." However, since 1975, rule 19b-3 (17 CFR 240.19b-3) under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) has prohibited national securities exchanges from prescribing such minimum brokerage commissions.

The Commission notes that for approximately four years rule 17e-1 applied to affiliated brokers in effecting over-the-counter transactions in securities to receive remuneration which may be received by an affiliated broker in effecting over-the-counter transactions.

FEBRUAy 27, 1979.

[FR Doc. 79-6743 Filed 3-5-79; 8:45 am]

Moreover, the payment of such remuneration may raise serious questions regarding whether, by interpositioning the affiliated broker between an investment company and a market maker, an investment company's directors and its investment adviser have fulfilled their obligation to secure the best price and execution respecting that transaction for that company. Accordingly, the Commission believes that rule 17e-1 is obsolete and proposes its rescission. However, it specifically requests comment concerning the circumstances under which it would be appropriate for a rulemaking under the applicable statutory standards to permit an affiliated broker to receive a brokerage commission greater than 1% of the purchase or sale price in such transactions.

By the Commission.

GEORGE A. FITZSIMMONS, Secretary.

[FR Doc. 79-6743 Filed 3-5-79; 8:45 am]

terms of "usual and customary broker's commission" and thus alludes to fixed minimum brokerage commission rates. Investment Company Act Release No. 10065 (Feb. 27, 1979), 44 FR (1979). Absent such a rulemaking, it may be no longer practicable generally for affiliated brokers to effect transactions for investment companies on securities exchanges because they may be unable to comply with that obsolete statutory standard. In contrast, rule 17e-1 does not affect, nor would the proposed rescission affect, the existing statutory ceiling of 1% of the purchase or sale price for over-the-counter transactions. Thus, an affiliated broker may continue in over-the-counter transactions on behalf of the investment company to receive remuneration within the relevant statutory limitation, which is unrelated to fixed brokerage commission rates, provided that such remuneration is consistent with investment company directors' and investment advisers' obligations to shareholders. Infra, n.6.
SUMMARY: HEW plants to rewrite and reorganize its current regulations on computations of cash benefits under Title II of the Social Security Act. The primary purpose of this reorganization is to comply with Executive Order 12044 and to meet the Department's "Operation Common Sense" standards by making these regulations clearer and easier to use. The regulations describe how primary insurance amounts under Title II are computed and recomputed and how they are increased when the cost of living rises. Finding a worker's "primary insurance amount" is the first step in determining the amount of the worker's benefit. The worker's primary insurance amount is the amount payable to the worker, based on the worker's social security earnings, if the worker retires at age 65 or becomes disabled. It is also the amount used to determine the benefit amounts of the worker's dependents or survivors. The proposed changes involve all of Subpart C of 20 CFR, Part 404. The Department has classified these regulations as "policy significant." The regulations will be published with Notice of Proposed Rulemaking.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: In the Federal Register of March 3, 1979 (44 FR 3576), FDA postponed the closing date for the provisional listing of lead acetate as a color additive for use as a component of hair dyes. The new closing date was December 31, 1978. The purpose of the postponement was to allow the continued marketing of lead acetate as a hair color while a short-term study to resolve definitively questions about percutaneous absorption of the hair dye was completed and evaluated. In the Federal Register of January 2, 1979 (44 FR 45), the closing date was further postponed until March 1, 1979 to provide FDA with additional time to complete its evaluation of the absorption study, make a decision on the status of lead acetate, and prepare this Federal Register document.

FDA has now completed its evaluation of the absorption study. Briefly, the Goldberg and Moore lead skin absorption study involved the application of measured amounts of either a prototype hydroalcoholic hair dye formulation or a "cream" oil emulsion formulation to the foreheads of the test subjects. The formulations contained a measured amount of lead acetate in combination with nonradioactive lead acetate. With the isotope technique it would be possible to differentiate between background lead absorption and any lead absorption resulting from dermal exposure to lead hair dyes because of specific radioactive isotope, lead, does not occur in the natural environment. The test conditions occur in greater amounts the types of exposure conditions typical of those expected under a variety of actual conditions of use, coupled with analytical procedures of sufficient sensitivity to establish whether percutaneous absorption would occur. Following exposure, various measurements of the levels of radioactive lead absorption were made.

This absorption study shows that lead acetate in hair dyes is indeed absorbed through human skin, but in a miniscule amount—approximately 1/2 of 1 microgram (0.5 μg) per application. This amount compares to the approximately 35 μg that would be expected to be absorbed into the body from daily adult intake of lead in food (an average of 250 μg) and water up to 100 μg. Additional amounts of lead are absorbed daily from the air. The study also indicated that absorption of lead acetate occurs in greater amounts through abraded skin. As far as the agency is aware, the hair dyes containing lead acetate contain directions that the product should not be used on cut or abraded skin. The agency believes that labeling instructions of this type minimize the likelihood of absorption under actual conditions of use and should continue to appear on these products. Copies of this study and other submissions, as well as the references cited in this document, are on file with the Hearing Clerk, FDA, address above.

The March 3, 1979 Federal Register document described the previous history of use and regulation of lead acetate. In light of that history, the results of the latest absorption study present FDA with three regulatory alternatives: (1) to grant the pending petition for permanent listing filed by the Committee of the Progressive Hair Dye Industry; (2) to deny the petition; or (3) to defer action on the petition and postpone the current March 1, 1979 closing date if the conditions for such action are met. The relevant statutory framework is as follows: Under section 708(b)(4) of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 376(b)(4)), the Commiss-
sioner may not permanently list a color for a proposed use unless the data before him establish that such use, under the conditions of use specified in the regulations, will be safe. "The Color Additive Amendments also include a definition of carcinogenic." (Delaney Clauses). Under the carcinogenicity provisions in the food additive provisions of the Act (section 409(c)(3)(A) (21 U.S.C. 348(c)(3)(A)) and the animal drug provisions (section 512(c)(1)(A) (21 U.S.C. 360(b)(1)(H))), the Delaney Clause is in substance: section 706(b)(5)(B) of the act (21 U.S.C. 376(b)(5)(B)) is divided into two parts. The first part, section 706(b)(5)(B)(i), provides that a color additive:

**shall be deemed unsafe and shall not be listed, for any use which will or may result in ingestion of all or part of such additive, if the additive is found by the Secretary to induce cancer when ingested by man or animal, or by the Commissioner of Food and Drugs (who has delegated this function to the Secretary of Health, Education, and Welfare), and the Secretary agrees that it is high dose unique among confirmed animal carcinogens and that it has drawn from similar studies the conclusion of human carcinogenic risk. Nevertheless, the application of these principles in the specific case of lead raises unique questions. The feeding studies establishing that lead is an animal carcinogen have been in the scientific literature since the 1960's, some were published as early as 1922. Yet, the scientific community at large has not drawn from these studies the conclusion of human carcinogenic risk that it has drawn from similar studies of other substances. Although other Federal agencies, along with FDA, have paid considerable attention to other aspects of lead toxicity, they have not made the potential cancer risk to humans a basis for regulatory action. In its 1972 report on lead salts, the National Academy of Sciences stated that "there is no evidence to suggest that exposure to lead salts causes cancer of any site in man." The view that lead does not present a human cancer risk has both support (Refs. 1, 2, and 3) and opposition (Refs. 4 and 5) in the scientific literature. Moreover, until very recently there has been virtually no expression of concern on the part of the public that lead poses a human cancer risk. The lack of consensus in the scientific community and the relative lack of attention on the part of Federal agencies and the public needs scrutiny in light of the clear and repeated results in the animal feeding studies. It appears that for many reasons or another, those who are concerned about human cancer risks have not been prepared to apply to the lead feeding studies the same principles for cancer risk identification that they apply to other studies. There may be a number of possible reasons. Lead may be unique among confirmed animal carcinogens in that lead induces animal cancers at doses that so greatly exceed, by 200-fold, the acutely toxic (fatally poisonous) level in humans. Thus, humans are at least 200 times more sensitive to the acute effects of lead than were the test animals. This fact may suggest that humans are also more sensitive to the chronic (carcinogenic) effects as well. But it may also suggest that lead may be metabolized differently in humans than in test animals. Lead has been used throughout history, but its acutely toxic effects on humans are well known. It is known from this long experience with lead that humans respond differently to the acutely toxic effects of lead than do
test animals, and this difference gives rise to a question of whether there is also a difference in response to the carcinogenic effect of lead. In addition, although there is substantial human experience with lead and epidemiological data on lead carcinogenicity are, as the March 3, 1978 Federal Register document noted, scant and contradictory. There may be other reasons as well for the apparent absence of widespread concern that lead presents a human cancer risk.

But for these uncertainties about the significance to humans of the lead studies, FDA undoubtedly would have to provide additional time to solicit comments and conclude whether the animal feeding studies showing that lead is an animal carcinogen are appropriate for evaluating the safety of lead when used as a hair dye and when used in other products subject to regulation under the Federal Food, Drug, and Cosmetic Act.

The agency emphasizes that if this Federal Register process for scientific and public comment on the human carcinogenicity of lead leaves the issue unresolved, FDA will apply its standard cancer risk identification policies and conclude that lead acetate hair dye presents a human cancer risk. Appropriate regulatory action would then follow the purpose of this section, if in this judgment such action is consistent with the objective of carrying to completion in good faith, as soon as reasonably practicable, the scientific investigations necessary for making a determination of whether a color additive, or such specified use or uses thereof, under section 706 of the basic Act (Id., sec. 203(a)(2)). This statute authorizes the Commissioner to extend provisional listing for such period or periods as he finds necessary to carry out the purposes of this Act. If, in this judgment such action is consistent with the objective of carrying to completion in good faith, as soon as reasonably practicable, the scientific investigations necessary for making a determination of whether a color additive, or such specified use or uses thereof, under section 706 of the basic Act (Id., sec. 203(a)(2)). This statute authorizes the Commissioner to extend provisional listing for such period or periods as he finds necessary to carry out the purposes of this Act.

The concern about whether lead presents a human cancer risk extends beyond lead acetate to the lead from solder in tin cans that leaches into food from water, air, and other sources. The carcinogenic effects of lead acetate in animal studies appear attributable to the lead present in the compound. Thus, the same question concerning the potential risk to humans from lead acetate also arises in connection with lead in its ionic form. Because the same issue is presented, it is appropriate to examine this question in lead acetate in the context of a single Federal Register proceeding that will also examine the concern about the presence of lead in food. Accordingly, FDA is preparing a general Federal Register document that will seek assistance from the scientific community and the public in resolving this other current concerns about lead. FDA expects to publish the document within 2 months. The document will allow a comment period of 90 days, after which FDA will review the information and data received and publish its conclusions on this matter and take any appropriate further measures. FDA estimates that this process will take approximately 1 year.

FDA emphasizes that in being willing to consider the possibility that its standard cancer risk identification policies may apply to lead acetate hair dye, the agency is not in any way questioning the general validity of these policies, and is not holding out the possibility that they may be inapplicable to any other substance. For the foregoing reasons, FDA concludes that it would not be proper at this time either to grant or to deny the pending petition for permanent listing. Rather, the agency proposes to postpone the closing date for the provisional listing of lead acetate for use in hair dyes until March 1, 1980. The purpose of this postponement is to provide additional time for soliciting comments and concluding whether the animal feeding studies showing that lead is an animal carcinogen are appropriate for evaluating the safety of lead when used as a hair dye and when used in other products subject to regulation under the Federal Food, Drug, and Cosmetic Act.

The purpose of the section authorizes the Commissioner to extend provisional listing "for such period or periods as he finds necessary to carry out the purposes of this section, if in this judgment such action is consistent with the objective of carrying to completion in good faith, as soon as reasonably practicable, the scientific investigations necessary for making a determination of whether a color additive, or such specified use or uses thereof, under section 706 of the basic Act" (Id., sec. 203(a)(2)). This statute authorizes the Commissioner to extend provisional listing for such period or periods as he finds necessary to carry out the purposes of this Act. If, in this judgment such action is consistent with the objective of carrying to completion in good faith, as soon as reasonably practicable, the scientific investigations necessary for making a determination of whether a color additive, or such specified use or uses thereof, under section 706 of the basic Act (Id., sec. 203(a)(2)). This statute authorizes the Commissioner to extend provisional listing for such period or periods as he finds necessary to carry out the purposes of this Act.

The following references are on file with the Hearing Clerk, FDA (address above) and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

Therefore, under the Transitional Provisions of the Color Additive Amendments of 1960 to the Federal Food, Drug, and Cosmetic Act (Title II, Pub. L. 86-618; sec. 203, 74 Stat. 404-407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 81 be amended as follows:
PROPOSED RULES

§ 81.1 [Amended]
1. In § 81.1 Provisional lists of color additives, by revising the entry for the closing date for the color additive "Lead acetate" listed in paragraph (g) to read "March 1, 1980.

§ 81.27 [Amended]
2. In § 81.27 Conditions of provisionalf listing of additives, by revising the closing date for "Lead acetate" in paragraph (b) to read "March 1, 1980.

Interested persons may, on or before May 7, 1979 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and such be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

DONALD KENNEDY,
Commissioner of Food and Drugs.

NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Definitions and General Considerations; Postponement of Final Action

AGENCY: Food and Drug Administration.

ACTION: Postponement of final action on proposed rule.

SUMMARY: The Food and Drug Administration (FDA) announces postponement of final action on its proposal to redefine articles used in the production of medicated animal feeds. Recommendations included in the recently completed Medicated Feed Task Force Report require that the proposal be reconsidered in view of the recommendations to ensure that any final action on the proposal will be consistent with final implementation of the Task Force report.

FOR FURTHER INFORMATION CONTACT:
William B. Bixler, Bureau of Veterinary Medicine (HFV-5), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3460.

SUPPLEMENTARY INFORMATION:
In the Federal Register of January 17, 1978 (43 FR 2526), FDA proposed to redefine articles used in the production of medicated animal feeds and revise certain conditions for their approval.

In the Federal Register of December 15, 1978 (43 FR 58634), the agency announced the availability of an FDA Task Force report entitled "Second Generation of Medicated Feeds." The Task Force report examined FDA's current medicated feed program and made appropriate recommendations to the Commissioner of Food and Drugs for improvement. The report concluded that implementation of these recommendations would lead to a more meaningful medicated feed program with emphasis on the human risks associated with such products. The report suggested that the medicated feed application process be modified to provide this emphasis and generally to streamline it to lessen the paperwork burden on industry and government alike. The notice also stated that the agency's final decision on the recommendations contained in the report would not be made until a detailed manpower assessment and proposed implementation plan could be prepared. This additional information should be available to the agency on or about April 1, 1979.

A final decision on implementation of the Task Force report may require reconsideration of certain aspects of the proposal. Therefore, FDA will hold finalization of the proposal in abeyance pending its decision regarding the Task Force report, an assessment of the full impact of the report on the proposal, and whether to combine the proposed rulemaking with implementation of the report in a comprehensive action.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[21 CFR Part 522]

(Docket No. 78N-0207)

STATUS OF INJECTABLE ANIMAL DRUGS

Extension of Time for Filing Comments on Notice of Intent Regarding Sterility and Pyrogenicity of Injectable Animal Drugs

AGENCY: Food and Drug Administration.

ACTION: Notice of Intent; Extension of Comment Period.

SUMMARY: This document extends for 120 days the comment period on a notice that the agency intends to propose a regulation that would require all injectable animal drugs to be sterile and free of extrinsic pyrogenic material. The extension was requested by the Animal Health Institute.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:
Patricia N. Cushing, Bureau of Veterinary Medicine (HFV-234), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3460.

SUPPLEMENTARY INFORMATION: A notice of intent published in the Federal Register of December 15, 1978 (43 FR 58691) stated that the Food and Drug Administration (FDA) as considering proposing that all injectable drugs for use in animals be sterile and free of extrinsic pyrogenic material. The notice provided interested persons until February 13, 1979 to submit comments. In a letter dated January 29, 1979 (on file with the Hearing Clerk), the Animal Health Institute (AHI), Suite 1009, 1717 K St. NW., Washington DC 20006, requested that the comment period be extended 120 days.

AHI, a national trade association representing the principal manufacturers of animal health and nutrition products, stated that its members would be affected by any change in the status of injectable animal drugs. AHI requested an extension of 120 days so that several surveys could be conducted which would provide the agency with information regarding possible limitations on the proposed requirement and economic impact estimates.
The agency finds that, for good reason appearing, the time for filing comments should be extended until June 13, 1979. Interested persons may, on or before June 13, submit written comments regarding this notice of intent to the Hearing Clerk (TIFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857. Comments should identified with the Hearing Clerk docket number found in brackets in the heading of this document and should be submitted in four copies, except that comments from individuals may be submitted in single copies. Received comments may be seen in the Hearing Clerk's office between 9 a.m. and 4 p.m., Monday through Friday.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Regulatory Affairs.

DEPARTMENT OF STATE

Bureau of Consular Affairs

[22 CFR Part 22]

(Docket No. 141)

CHANGE IN FEE FOR CONSULAR SERVICES

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State proposes to increase the charge for the execution of the application for passports. The present fee is $3. The proposed fee of §4 will enable the Department to recover the current full cost for providing this service. The proposed new fee is consistent with the user charge principle as prescribed by the Congress (31 U.S.C. 483a) and applied by the President.

DATES: Comments must be received on or before March 15, 1979. The proposed effective date is April 1, 1979.

ADDRESS: Send comments to Ronald Somerville, Bureau of Consular Affairs, Department of State, 2201 C Street NW., Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT:

Ronald Somerville. (202) 632-1158.

SUPPLEMENTARY INFORMATION: The Department of State is responsible for providing various consular services to both United States and foreign nationals. These services include: passport and citizenship; visa services for aliens; services relating to vessels and seamen; notarial services and authentications; services relating to taking evidence; and copy and recording services.

The proposed fee to be charged has been adjusted to insure that it is fair and equitable, taking into consideration the services rendered by the U.S. Government, value to the recipient, public policy or interest served, and other pertinent facts.

Accordingly, the proposed rulemaking, 41 FR 42220, discussed a proposed updating of FHWA's regulations dealing with utility relocations and adjustments (23 CFR Part 645, Subpart A).

There are approximately 30,000 utility companies in the United States. Potentially, the facilities of the majority of these utility companies may at some time have to be altered due to conflicts with Federal-aid highway construction projects. States who pay the costs of utility relocations may be eligible for proportional reimbursement by the FHWA under 23 U.S.C. 123.

FHWA has developed policies and procedures in its regulations that prescribe the extent to which Federal funds may be applied to the costs incurred by States for the relocation or adjustment of utility facilities required by construction of Federal-aid highway projects.

The FHWA has recently decided to rewrite and update its regulations dealing with utility relocations and adjustments. The primary purpose in rewriting the regulations will be to simplify them and eliminate unnecessary requirements in accordance with FHWA's emphasis on reducing red tape. Only those requirements considered essential to satisfying the provisions of Title 23, United States Code, or maintaining orderly and uniform administration of FHWA's program will be retained.

Interested persons are invited to comment specifically in regard to the following areas:

1. What requirements of the existing regulations (23 CFR Part 645, Subpart A) should be retained or modified to assure fair, reasonable and uniform administration of the relocation and adjustment of utilities under the Federal-aid highway program?
3. What requirements of the existing regulations are considered not to be essential for compliance with 23 U.S.C. 123 or uniform and reasonable program administration?

4. What additional requirements should be included in the regulations that would result in a more efficient and effective management of the utility relocation and adjustment program?

Those desiring to comment on this advance notice of proposed rulemaking are asked to submit their views in writing. Comments will be available for public inspection both before and after the closing date at the above address. All comments received in response to this advance notice will be considered before further rulemaking action is undertaken.

Note.--The Federal Highway Administration has determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation pursuant to E.O. 12244.

(23 U.S.C. 123, 315 and 49 CFR 1.46(b))

Submitted on February 27, 1979.

KARL S. BOWERS,
Federal Highway Administrator.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[25 CFR Part 35]

ORGANIZATION OF THE YUROK TRIBE--VOTING FOR INTERIM TRIBAL GOVERNING COMMITTEE

Proposed Qualifications and Procedures for Preparing a Voting List

AGENCY: Department of the Interior.

ACTION: Proposed rule.

SUMMARY: The Department of the Interior proposes to add a new Part to its regulations to establish criteria and procedures for developing a list of persons entitled to vote in the election of an interim Yurok tribal governing committee. As indicated in the November 20, 1978, message of the Assistant Secretary-Indian Affairs to the Hoopa and Yurok people, the election of this committee is the first step in the establishment of a governing organization for the Yurok Tribe.

DATES: This is a proposed rule on which comment is invited. Comments on this proposed rule must be received on or before April 5, 1978. Comments received will be carefully reviewed, and changes will be made where appropriate, prior to publication of the final rule.

ADDRESS: Send written comments to: Director, Office of Indian Services, Bureau of Indian Affairs, 1951 Constitution Avenue, NW., Washington, D.C. 20245.

FOR FURTHER INFORMATION CONTACT:

Director, Office of Indian Services, Bureau of Indian Affairs, 1951 Constitution Avenue, NW., Washington, D.C. 20245, (202-343-2111).

Area Director, Bureau of Indian Affairs, 2800 Cottage Way, Sacramento, California (916-484-4682).

SUPPLEMENTARY INFORMATION:

On December 28, 1978, there was published for comment in the Federal Register (43 FR 60370) Proposed Qualifications and Procedures for Preparing a Voting List. The establishment of standards for such a voting list is the first step in the election of an interim governing committee for the Yurok Tribe. The message of November 20, 1978, from the Assistant Secretary of the Interior-Indian Affairs to all the Hoopa and Yurok people of the Hoopa Valley Indian Reservation mentioned the preparation of a Yurok voters list as an essential part of the process of organizing the Yurok Tribe. It is evident from the comments received in response to the December 28, 1978, publication that the use which will be made of these qualifications is not clearly understood. For this reason further explanations as well as modifications and additions to the proposed Qualifications are needed. The modifications and additions have resulted in these new proposed regulations. First of all, it should be understood that the Qualifications being considered are for voters who will elect an interim governing committee for the Yurok Tribe; these votersâ€™ qualifications are not membership qualifications. Membership qualifications will be set when a constitution is adopted by the Yurok voters at a separate election. A principal provision of such tribal constitution, as in every tribal constitution, will be the requirements for tribal membership, in this case for membership in the Yurok Tribe.

Thus the qualifications here being considered are not standards for membership in the Yurok Tribe. All these qualifications are intended to do is to insure that those who vote for the Yurok interim governing committee are a representative-part of the Yurok Indians and have a reasonable expectation of ultimately being determined to be-eligible for membership in the Yurok Tribe. As stated in the November 20, 1978, message from the Assistant Secretary-Indian Affairs it is expected that the Yurok membership roll will be constructed along lines similar to those used during the construction of the membership roll of the Hoopa Valley Tribe. Therefore, the proposed qualifications for Yurok voters are patterned along lines used in the development of the Hoopa Valley Tribe's membership. But this obviously does not mean that either all the voters or only the voters will be eligible for membership in the Yurok Tribe. Eligibility for such membership, instead, will depend upon meeting the membership criteria set out in a duly adopted and approved Yurok tribal constitution. For obvious reasons, including the fact that children do not vote, it never happens that a tribal constitution is adopted as the result of voter participation by all those who the constitution makes eligible for membership. And conversely, not all those who participate in the adoption of a tribal constitution ultimately are found eligible for tribal membership. These results occur because voter qualifications are not membership criteria, which are developed separately at a later date.

Another misunderstanding is the belief that the Department of the Interior's efforts to help organize a tribal government for the Yurok Tribe constitute interference with the court case entitled Short, et al. v. United States, No. 102-63, in the United States Court of Claims. This is not the case. What is involved here is a matter that lies outside that case: the organization of a tribal government for an Indian Tribe, which at present is without one.

What the extent of the interest of the Yurok Tribe is in the Hoopa Valley Indian Reservation is a separate question. How and when that question will be resolved are matters which should have input from the Yurok Tribe. This input depends upon there being a tribal organization. Of course, resolution of what the Yurok Tribe's interests are in the Reservation not only involves the Yurok Tribe but, inescapably, the Hoopa Valley Indian Tribe and the plaintiffs in the Short case. But the question of the Yurok Tribe's interest in the Hoopa Valley Indian Reservation 'exists whether or not the tribe has a tribal government. Without one, the tribe has no way in which to take part in the decision which, at some point, and in some way, must be made on its interest in the Reservation.

In sum, then, all the proposed Qualifications, as modified, will do is result in the selection of voters who will elect an interim Yurok governing committee which can then begin to work on all the issues which confront the Yurok Tribe.
As originally published the notice concerned only the qualifying criteria to be applied to voters participating in an election to select a temporary governing committee for the Yurok Tribe. Several significant changes have been made in the original publication. The first is the addition of a section of definitions. The next is the inclusion in proposed specified categories of Yurok Indians to whom the proposed voters' criteria will be applied. This addition is essential to carry out the procedures for establishing the Yurok voters list which have been added in proposed §§ 55.4 through 55.7.

As noted previously, the Department is anxious to clarify any misunderstanding concerning its effort to assist in the creation of a Yurok tribal governing body. Because the Department wishes maximum Indian participation in the formulation of the final regulations and in order to provide the interested Indians maximum opportunity to ask any questions they wish concerning these proposed regulations, several public meetings will be scheduled on the Hoopa Valley Indian Reservation and in its immediate vicinity. Notices of these meetings will be published in local media and posted in public places at least five days before the meetings.

COMMENTS AND MODIFICATIONS IN PROPOSAL

1. A number of comments were received to the effect that the Secretary of the Interior lacks authority to establish the proposed Yurok voter qualifications. Some of these took the position that the authority is lacking because it involves a matter committed to the jurisdiction of the Court of Claims in *Short, et al. v. United States.* One further argued that if, nevertheless, the Secretary undertook to establish such qualifications, adjudicatory hearings should be afforded since, in effect, the qualifications involve the determination of specific rights of individuals, at least when it comes to the actual preparation of a voters list. Others objected to the proposed qualifications because there was no citation of authority for them in the December 28 publication. Still others said there was a failure to state the time, place, and manner of public rulemaking procedure as required by 5 U.S.C. 553.

The Secretary's authority for establishing the Qualifications is included in the general authority in *Indian Affairs* conferred upon him by 25 U.S.C. 2, 43 U.S.C. 1457, and Reorganization Plan No. 3 of 1950 (64 Stat. 1262). As explained in the Supplementary Information, the proposed voters Qualifications for the Yurok Tribe do not infringe on the jurisdiction of the Court of Claims in the *Short* case. Since only general standards for voters are under consideration at this time, we do not agree that individual rights are at issue which need to be resolved in adjudicatory proceedings. As the proposed qualifications, as modified, with the newly added procedures for the preparation of the voters list clearly constitute rulemaking the applicable provisions of the Administrative Procedure Act, 5 U.S.C. Part 14—Rulemaking, 43 FR 56292, are being followed for these proposed rules.

2. A comment was received objecting to the organization of the Yurok Tribe instead of the Hoopa Tribe as a single tribe for the Hoopa Valley Indian Reservation. Whether a group of Indians exists as an Indian tribe is dependent upon its actual existence as a tribal group. See 28 CFR 55.4. Procedures for Establishing That An American Indian Group Exists As An Indian Tribe, particularly 25 CFR 547.4, 43 FR 39351, 39363. Whereas the Hoopa Valley and Yurok groups of Indians have been acknowledged as Indian tribes, all the Indians of the Hoopa Valley Indian Reservation have never been identified by the Department of Interior as a single tribe. The Yurok or Klamath River Indian Reservation—Allotment—Act of June 17, 1892, 33 L.D. 205, 218-219 (1904). Since the Yuroks are acknowledged to be an Indian tribe by the Department since at least 1904. See Klamath River Indian Reservation—Allotment—Act of June 17, 1892, 33 L.D. 205, 218-219 (1904). Since the Yuroks are acknowledged to be an Indian tribe, they clearly have a single organizational start, with that which is required to be an Indian tribe for the purpose of voting for an interim governing committee (as required by 25 U.S.C. 1949) being that an Indian tribe is dependent upon its actual existence as a tribal group. The Yurok and/or Hoopa, Karok, Tolawa, and other tribes as does the present Hoopa Valley Tribe are being used as a guideline in developing the voters' criteria for the Yurok Tribe for the reasons given in the Supplementary Information.

3. One comment received was that the criteria for the Yurok voters list should be considerably more stringent than the tribal enrollment criteria adopted by the Hoopa Valley tribe. The comments specifically recommended that if the criteria is intended to “track” the Hoopa enrollment standards, the basic date of eligibility should not have been October 1, 1949, but a date 25 years after the submission of the Hoopa Valley allotment schedule in 1918. The comment was that the Hoopa Valley Tribe organized 25 years after the submission of the Mortsel allotment schedule in 1918. The comments went on to say that the proposed criteria did not adhere strictly to the Hoopa enrollment standards. The organization of the Hoopa Valley Tribe 25 years following submission of the Mortsel allotment schedule was a matter of happenstance, not design. The Identification of members of the Hoopa Tribe begins with persons named on a roll of October 1, 1949. On the basis of the comments offered to date we see no reason why the Identification of Yuroks for the purpose of voting for an interim governing committee should not be based on data of a comparable time in the history of the Reservation to that used by the Hoopa Valley Tribe when it began to organize. However, because they are separate tribal entities, it is not possible to “adhere strictly” to identical standards for both tribes.

The proposed voters qualifications of the Hoopa Valley Tribe are being used as a guideline in developing the voters' criteria for the Yurok Tribe for the reasons given in the Supplementary Information.

4. Several comments were submitted regarding the degree of Indian blood required for persons in certain categories. Some believe no minimum Indian blood degree should be required, some believe it should be not less than 1/2, and others believe all persons required to be of 1/4 degree Indian blood or 1/4 degree Yurok and/or Hoopa Indian blood.

Individuals who qualify for inclusion on the Hoopa or Yurok voters list need only meet the standards and requirements set forth in the proposed criteria, as revised, do not have to possess a minimum degree of Indian blood. A notation to that effect has been inserted in the proposed criteria. The individuals who do not meet these standards and requirements for enrollment in the Hoopa Valley Tribe.

5. As the result of several comments, the 15-year residence requirement in §§ 55.3(b)(1), (2) or (3) of the proposed criteria, as revised, do not have to possess a minimum degree of Indian blood. A notation to that effect has been inserted in the proposed criteria. The Individuals who do not meet these standards and requirements for enrollment in the Hoopa Valley Tribe.

6. Several persons commented that the term “Indian blood” was misleading and too inclusive, and others commented that “Yurok Indian blood” would be too restrictive.

While we are aware that the Yurok Tribe will include Indians of the blood of other tribes, as does the present Hoopa Valley Tribe, this was not made clear in the use of “Indian blood" in the proposed criteria. Therefore, we have defined "Indian blood" to include Yurok, Karok, Tolawa, Chilula, Wiyot, and other groups of California Indians affiliated with the Hoopa Valley Indian Reservation, as extended.

7. One comment regarding descendents named in paragraph A(4) of the
proposed criteria was that mere descent from a Hoopa C roll member did not qualify an individual for enrollment at Hoopa, and therefore, mere descent from a person enrolled under A(3) should not qualify a person for the Yurok voters list.

We agree with the comment and the proposed criteria have been revised to provide for a minimum of ¾ degree Indian blood requirement for persons who are descendants of individuals qualified under former paragraph A(3), now § 55.3(b)(3).

8. A number of interested persons expressed the belief that census rolls should be utilized in identifying the eligible voters rather than the allotment rolls.

We have not modified the proposed qualifications to include this provision but have it under consideration and further comment is invited.

9. Many comments were received regarding what constitutes being eligible to receive an allotment.

Instructions for Special Allotting Agent Ambrose H. Hill to make allotments to the Indians located on the former Klamath River Reservation and on the strip of country between that reservation and the Hoopa Valley Reservation specified that “No Indian is entitled to an allotment unless he is located on said reservation on the 17th of June, 1892.” These instructions were to apply also to the allotments on the connecting strip. We have, therefore, defined “eligible to receive allotments” to include persons who resided on the former Klamath River reservation or the connecting strip on June 17, 1892, and persons who resided on the Hoopa Valley Indian Reservation on June 25, 1910, the date of the authorizing Act.

10. One comment received expressed the belief that the minimum blood degree required on the Hoopa Reservation was inconsistent with our November 20, 1978, message.

It does not conflict with the message which, while not specifying criteria for voters, stated to the extent possible the Yurok membership would be constructed along lines similar to those of the Hoopa Valley Tribe. See the Supplementary Information for further explanation of why these qualifications are being proposed.

11. Several persons commented that we should not have omitted as source documents the declarations of the claimants in Jessie Short, et al., v. United States.

It was not our intent to ignore the information reflected in the declarations. On the contrary, that information will be used by the Sacramento Area Director in determining who shall be on the initial voters list prepared pursuant to proposed § 55.4.

12. Many people stated their opinion that we are unreasonable in our statement to the effect that being included on the voting list will not necessarily qualify an individual for future membership.

As discussed in the Supplementary Information the list to be prepared under the proposed criteria will not be a membership roll of the Yurok Tribe. Therefore, being placed on the voters list will not guarantee that a person will ultimately qualify for membership in the Yurok Tribe.

13. Along the same vein, one person commented that enrollment with any other tribe should disqualify a voter.

To date we believe membership in another tribe, except the Hoopa Valley Tribe, should not be a bar to voting for an interim tribal governing committee. Dual enrollment is a matter for the committee to consider when drafting criteria for membership.

14. Several individuals requested that the phrase “descendants of allottees and reservation residents” in paragraph A(4) of the proposed criteria be changed to read “descendants of allottees or reservation residents.”

It is our intent that the criteria specified in proposed paragraph A(4) now § 55.3(b)(3), apply to descendants of allottees and descendants of reservation residents. We believe changing the “and” to “or” might lead someone to interpret the criteria to mean descendants of allottees and the reservation residents, not their descendants. We have, therefore, declined to make the change.

In late January, 1979, the Department concluded its environmental assessment under the National Environmental Policy Act of 1969. Upon review of that assessment it has been concluded that the proposed organization of the Yurok Tribe is not a major federal action which would significantly affect the environment within Section 102(2)(c) of the Act. Accordingly, the preparation of an environmental impact statement is not required. The assessment is available for review at the Sacramento Area Office of the Bureau of Indian Affairs, 2800 Cottage Way, Sacramento, California 95825 (916-484-4682). The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

The primary authors of this document are Theodore C. Krenzke, Director, Office of Indian Services, Bureau of Indian Affairs, Department of the Interior, Washington, D.C. (202-434-2111), Duane R. Barnes, Assistant Solicitor, Division of Indian Affairs, Office of the Solicitor, Department of the Interior, Washington, D.C. (202-343-9405), and Janet L. Parks, Chief, Branch of Tribal Enrollment Services, Bureau of Indian Affairs, Washington, D.C. 20245 (703-435-8270).

Section A of Chapter 1 of Title 25 of the Code of Federal Regulations is amended by the addition of a new Part 55 to read as follows:

PART 55—ORGANIZATION OF THE YUROK TRIBE—VOTING FOR INTERIM GOVERNING COMMITTEE

Sec. 55.1 Definitions.

55.2 Purpose.

55.3 Qualifications for voting.

55.4 Preparation and posting of initial voters list.

55.5 Notice to ineligible adults.

55.6 Appeals.

55.7 Final voters list.

§ 55.1 Definitions.

(a) “Voters” means persons eligible to participate in the nomination and election of an interim Yurok tribal governing committee.

(b) “Interim Yurok tribal governing committee” means a committee of persons nominated from and by the voters and elected by the voters to serve as the temporary governing body of the Yurok Tribe, with special responsibility for drafting a tribal constitution for ratification by the tribe and approval by the Secretary of the Interior.

(c) “Adult” means a person 18 years of age or older.

(d) “Reservation” means the Hoopa Valley Indian Reservation, as extended.

(e) “Indian blood” shall include the blood of the Yurok and/or Hoopa, Karok, Tolowa, Chilula, Wiyot and other groups of California Indians affiliated with the Hoopa Valley Indian Reservation, as extended.

(f) “Living” means born on or prior to and living on the date specified.

(g) “Eligible to receive allotments” means that the individual concerned resided on the original Klamath River Reservation or the connecting strip on June 17, 1892, or on the Hoopa Valley Indian Reservation on June 25, 1910.

(h) “Descendants” means persons who have issued from an ancestor and includes that ancestor's children, grandchildren, etc. It does not include collateral relatives such as siblings, nieces, nephews or cousins.

(i) “Secretary” means the Secretary of the Interior or his authorized representative.

(j) “Director” means the Area Director, Bureau of Indian Affairs, Sacramento Area Office, or his authorized representative.
§ 55.2 Purpose.

The purpose of these regulations is to establish qualifications for voting and procedures for preparing a list of voters to vote in a Secretarial election for an Interim Yurok tribal governing committee.

§ 55.3 Qualifications for voting.

Adults living on the date of the election who meet the following qualifications shall be eligible to participate in the nomination and election of the Yurok tribal governing committee:

(a) Those whose names are included:
(1) As plaintiffs in Jessie Shoat v. United States, No. 102-83, in the United States Court of Claims; or
(2) As plaintiffs in Charlene Ackley, et al. v. United States, No. 460-78, in the United States court of Claims; or
(3) On the list of Allottees and direct descendants of allottees on the Hoopa Extension Reservation, prepared by the Hoopa Area Field Office in August 1976, and who are:
   (b) Persons living on October 1, 1949, who
       (1) Were allotted on the Reservation [no minimum degree of Indian blood required]; or
       (2) Resided on the Reservation and were eligible to receive allotments but were not allotted [no minimum degree of Indian blood required]; or
       (3) Are descendants of allottees and reservation residents who qualify, or if deceased before October 1, 1949, would have qualified under (1) or (2) above [no minimum degree of Indian blood required]; or
       (4) Possess at least ¼ degree Indian blood, resided on the Reservation for a continuous period of 15 years at some time prior to October 1, 1949, and one of whose ancestors was born to parents who resided on the Reservation at the time of the ancestor’s birth; or
       (5) Possess at least ¼ degree Indian blood and are descendants of persons who qualify under (4) above; or
       (c) Persons of at least ¼ degree Indian blood, born between October 2, 1949, and a date 10 years before the date of the election to individuals who qualify under the criteria in paragraphs (b) (1), (2), (3), (4), or (5) above.
       (d) Persons who are enrolled as members of the Hoopa Valley Tribe shall not be entitled to be included on the voting list, regardless of whether they are otherwise qualified.

§ 55.4 Preparation and posting of initial voters list.

The Director shall review the lists specified in § 55.3(a) and compile an initial voters list comprised of the names of all adults found by him to meet the criteria specified in § 55.3 (b) or (c). Initial voters list shall be posted for inspec-
PROPOSED RULES

Approved: STANFORD G. ROSS,
Commissioner of Social Security.

[FR Doc. 79-6740 Filed 3-5-78; 8:45 am]

[7555-01-M]
NATIONAL SCIENCE FOUNDATION
[45 CFR Part 670]
CONSERVATION OF ANTARCTIC ANIMALS AND PLANTS

AGENCY: National Science Foundation.

ACTION: Proposed Regulations.

SUMMARY: The National Science Foundation proposes regulations to conserve and protect animals and plants native to Antarctica, pursuant to the Antarctic Conservation Act of 1978, Public Law 95-541. These regulations would apply to all United States citizens in Antarctica and to everyone importing into or exporting from the United States designated Antarctic animals and certain Antarctic plants or parts of them. The purpose of the regulations is to protect Antarctic ecological systems in accordance with measures which have been internationally established. Civil and criminal penalties for non-compliance are provided in the Act.

These regulations would designate native animals and plants and designate areas where activities are restricted. They would also establish a system of permits to take native animals, to collect certain plants, to import into or export from the United States designated Antarctic animals and certain Antarctic plants, to introduce non-indigenous species into Antarctica, and to restrict entry into certain areas of Antarctica.

Measures to restrict the discharge and disposal of plants in Antarctica will be the subject of separate regulations at a later date.

DATES: Comments must be received by May 7, 1979.

ADDRESS: Submit comments to the Permit Office, Division of Polar Programs, National Science Foundation; Washington, D.C. 20550.

FOR FURTHER INFORMATION CONTACT:
Mr. Edward P. Todd, Division of Polar Programs, National Science Foundation; Washington, D.C. 20550. Telephone: 202-632-4024.

SUPPLEMENTARY INFORMATION:
The primary purpose of the Antarctic Conservation Act is to implement the “Agreed Measures for the Conservation of Antarctic Fauna and Flora”. The Agreed Measures were developed by the Antarctic Treaty Consultative Parties under the Antarctic Treaty of 1959. The Agreed Measures, recommend establishment of a permit system for various activities in Antarctica and designated Antarctic animals and certain geographic areas as requiring special protection. These proposed regulations meet the requirements of the Agreed Measures and related measures recommended under the Treaty.

Subpart A of these proposed regulations sets forth their purpose and scope and defines terms used in these regulations. Prohibited acts and exceptions to them are discussed in Subpart B. The proposed procedures for obtaining a permit and the terms and conditions of such permits are set forth in Subpart C. Subpart D would designate as native mammals or native birds all mammals and birds found in Antarctica, except whales regulated by the International Whaling Commission. Activities involving these designated mammals or birds require a permit. More restrictive requirements for mammals and birds designated as Specially Protected Species are set forth in Subpart E. Areas of outstanding ecological interest would be designated as Specially Protected Areas in Subpart G. No one may enter these areas or collect any native plants in these areas without a permit. Native plants would be designated in Subpart F. Animal and plant fossils are not covered by these regulations. Areas of unique scientific value that need protection from interference would be designated as Sites of Special Scientific Interest in Subpart H. Entry into certain of these areas without a permit is also prohibited. Conditions under which Antarctic animals and birds and certain Antarctic plants may be imported into or exported from the United States are set forth in Subpart I. Finally, Subpart J sets forth conditions where the introduction into Antarctica of non-indigenous plants and animals would be permitted.

The Antarctic Conservation Act does not supersede the requirements of the Marine Mammal Protection Act of 1972, the Endangered Species Act of 1973, or the Migratory Bird Treaty Act. Applications for permits involving native mammals or native birds covered by these acts will be forwarded to the agencies that administer them. If they disapprove the application, no permit will be issued under these regulations. If the permit is approved by the appropriate agency, the Director still must determine whether to issue a permit pursuant to these regulations. Civil and criminal penalties may be imposed not only under the other acts but also under the Antarctic Conservation Act.
The Director has determined that these proposed regulations, when instituted, will not be a major Federal action requiring the preparation of an environmental impact statement. It has been determined further that these proposed regulations do not require a regulatory impact analysis under Executive Order 12044.

It is proposed to amend Title 45 of the Code of Federal Regulations by adding Part 670 which reads as set forth below:

PART 670—CONSERVATION OF ANTARCTIC ANIMALS AND PLANTS

Subpart A—Introduction

§ 670.1 Purpose of regulations.

The purpose of these regulations is to conserve and protect the native mammals, native birds and native plants of Antarctica and the ecosystem upon which they depend and to implement the Antarctic Conservation Act of 1978, Public Law 95-541.

§ 670.2 Scope.

These regulations apply to (a) Taking any mammal or bird native to Antarctica,

(b) Collecting any plant native to Antarctica in a specially protected area,

c) entering any specially protected area or site of special scientific interest,

d) importing into or exporting from the United States any mammal or bird native to Antarctica or any plant collected in a specially protected area, and

e) Introducing into Antarctica any nonindigenous plant or animal.

§ 670.3 Definitions.

In this Part:

"Agreed Measures" means the Agreed Measures for the Conservation of Antarctic Fauna and Flora, as recommended for approval at the Third Antarctic Treaty Consultative Meeting, and as amended in accord with Article IX (1) of the Treaty.

"Antarctica" means the area south of 60 degrees south latitude.

"Collect" means to cut, sever, or move any native plant, or to attempt to engage in any such action.

"Director" means the Director of the National Science Foundation, or an officer or employee of the Foundation designated by the Director.

"Foreign person" means any individual who is a citizen or national of a foreign nation; any corporation, partnership, trust, association or other legal entity existing or organized under the laws of a foreign nation; any department, agency, or other instrumentality of any foreign nation and any office, employee, or agent of any such instrumentality.

"Management plan" means the restrictions applicable to activities in Sites of Special Scientific Interest.

"Native bird" means a member of any species of the class Aves, which is indigenous to Antarctica or occurs there through natural agencies of dispersal that is designated in Subpart D of this Part. It includes any part, product, egg, or offspring of or the dead body or parts thereof excluding fossils.

"Native mammal" means a member of any species of the class Mammalia, except species regulated by the International Whaling Commission, which is indigenous to Antarctica or occurs there through natural agencies of dispersal, that is designated in Subpart D of this Part. It includes any part, product, egg, or offspring of or the dead body or parts excluding fossils.

"Native plant" means any kind of vegetation at any stage of its life cycle indigenous to Antarctica or occurring there through natural agencies of dispersal, including seeds but excluding fossils, that is designated in Subpart F of this Part.

"Site of Special Scientific Interest" means an area of unique value for scientific investigation designated in Subpart H of this Part as needing protection from interference.

"Specially Protected Species" means any species of native mammal or native bird that is approved for special protection under the Agreed Measures and is designated in Subpart E of this Part.

"Treaty" means the Antarctic Treaty signed in Washington, D.C., on December 1, 1959.

"United States" means the several States of the Union, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands, including the Government of the Northern Mariana Islands.

"United States citizen" means any individual who is a citizen or national of the United States, or is a member of a management plan or operation, partnership, trust, association, or other legal entity existing or organized under the laws of any of the United States; any department, agency, or
other instrumentality of the Federal Government or of any State; and any officer, employee, or agent of any such entity or instrumentality.

Subpart B—Prohibited Acts, Exceptions

§ 670.4 Prohibited acts.

Unless a permit has been issued pursuant to Subpart C or unless one of the exceptions stated in § 670.5 through § 670.7 of this title is applicable, it is unlawful to permit holder, person while within the United States or expatriate from the United States to import into the United States any native mammal or native bird.

(b) Collecting native plants—It is unlawful for any United States citizen to collect a native plant in a specially protected area.

(c) Entry into designated area—It is unlawful for any United States citizen to enter any specially protected area or to enter any site of special scientific interest.

(d) Possession and transfer of native mammals, plants or birds—It is unlawful for any United States citizen wherever located or any foreign person while within the United States to possess, offer for sale, deliver, receive, carry, transport, or ship by any means whatever any native plant collected in a specially protected area, or any native mammal or native bird taken in Antarctica.

(e) Import into or export from the United States—It is unlawful for any United States citizen wherever located or any foreign person while within the United States to import into the United States or export from the United States any native mammal or native bird or any native plant collected in a specially protected area.

(f) Introduction of non-indigenous animals and plants into Antarctica—It is unlawful for any United States citizen to introduce into Antarctica any animal or plant that is not indigenous to Antarctica as specified in Subpart J of this Part, except as provided in § 670.7 of this title.

(g) Violation of regulations—It is unlawful for any United States citizen wherever located or any foreign person while within the United States to violate the regulations set forth in this Part.

(h) Violation of permit conditions—It is unlawful for any permit holder, whether or not a United States citizen, to violate any term or condition of any permit issued under Subpart C of this Part.

§ 670.5 Exceptions in extraordinary circumstances.

(a) Human life—No act described in § 670.4 of this title shall be unlawful if committed under emergency circumstances to prevent the loss of human life.

(b) Aiding or salvaging native mammals or native birds—The prohibition on taking shall not apply to taking native mammals or native birds if such action is necessary to:

(1) Aid a sick, injured, or orphaned specimen;

(2) Dispose of a dead specimen; or

(3) Salvage a dead specimen which may be useful for scientific study.

(c) Reporting—Any actions taken under the exceptions in this section shall be reported promptly to the Director.

§ 670.6 Prior possession exception.

(a) Exception—§ 670.4 of this title shall not apply to (1) any native mammal, bird or plant which is held in captivity on or before October 28, 1978, or (2) any offspring of any such mammal, bird, or plant.

(b) Presumption—With respect to any prohibited act set forth in § 670.4 of this title which occurs after April 29, 1979, the Act creates a rebuttable presumption that the native mammal, native bird, or native plant involved in such act was not held in captivity or on or before October 28, 1978, or was not an offspring referred to in paragraph (a) of this section.

§ 670.7 Food exception.

Paragraph (1) of § 670.4 of this title shall not apply to the introduction of animals and plants into Antarctica for use as food so long as animals and plants used for this purpose are kept under controlled conditions. This exception shall not apply to living non-indigenous species of birds.

§ 670.8 [Reserved]

Subpart C—Permits

§ 670.9 Applications for permits.

(a) General content of permit applications—All applications for a permit shall be dated and signed by the applicant and shall contain the following information:

(1) The name and address of the applicant;

(2) Where the applicant is an individual, the business or institutional affiliation of the applicant; and

(ii) Where the applicant is a corporation, firm, partnership, institution, or agency, whether private or public, the name and address of its president or principal officer.

(2) The scientific names and the numbers of native plants or parts of them that are collected in a specially protected area; or the scientific names and the numbers of native mammals or native birds to be taken;

(3) A description of the native mammals, native birds, or native plants to be taken or collected, including as appropriate the age, size, and condition, e.g., whether pregnant or nursing;

(4) A complete description of the location, time periods, and manner of taking or collecting, including the proposed access to the location;

(5) Whether the native mammals, birds, or plants, or parts of them, are to be imported into the United States, and if so, their ultimate disposition;

(6) Where the application is for the introduction of non-indigenous mammals or birds, the scientific name and the number to be introduced;

(7) The names and qualifications of agents referred to in § 670.12 of this section; and

(8) The desired effective date of the permit.

(b) Content of specific permit applications—In addition to the general information required for permit applications set forth in this subpart, the applicant must submit additional information relating to the specific action for which the permit is being sought. These additional requirements are set forth in the sections of this part dealing with the subject matter of the permit applications as follows:

Native Mammals and Native Birds—§ 670.16.
Specially Protected Species—§ 670.21.
Native Plants—§ 670.25.
Sites of Special Scientific Interest—§ 670.33.
Import Into or Export from the U.S.—§ 670.38.
Introduction on Non-Indigenous Plants and Animals—§ 670.42.

(c) Certification—Applications for permits shall include the following certification:

I certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. Any false statement will subject me to the criminal penalties of 18 U.S.C. 1001.

(d) Address to which applications should be sent—Each application shall be in writing, addressed to: Permit Office, Division of Polar Programs, National Science Foundation, Washington, D.C. 20550.

(e) Sufficiency of application—The sufficiency of the application shall be determined by the Director. The Director may waive any requirement for information, or require such additional information as determined to be relevant to the processing of the application.

(f) Withdrawal—An applicant may withdraw the application at any time.
(g) Publication of permit applications—The Director shall publish notice in the Federal Register of each application for a permit. The notice shall invite the submission by interested parties, within 30 days after the date of publication of the notice, of written data, comments, or views with respect to the application. Information received by the Director as a part of any application shall be available to the public as a matter of public record.

§ 670.10 General issuance criteria.

Upon receipt of a complete and properly-executed application for a permit and the expiration of the applicable public comment period, the Director will decide whether to issue the permit. In making this decision, the Director will consider, in addition to the specific criteria set forth in the appropriate subparts of this Part:

(a) Whether the application or denial of the permit, the Director shall publish notice in the Federal Register of each application for a permit. The notice shall invite the submission by interested parties, within 30 days after the date of publication of the notice, of written data, comments, or views with respect to the application. Information received by the Director as a part of any application shall be available to the public as a matter of public record.

(b) The Director may modify, suspend, or revoke the permit.

(c) Notice of application or denial—Within 10 days after the date of issuance or denial of a permit, the Director shall publish notice of the issuance or denial in the Federal Register.

(d) Agents of the permit holder—The Director may authorize the permit holder to designate agents to act on behalf of the permit holder.

(e) Amendment of applications or permits—An applicant or permit holder desiring to have any term or condition of his application or permit modified must submit full justification and supporting information in conformance with the provisions of this subpart and the subpart governing the activities sought to be carried out under the modified permit. Any application for modification of a permit that involves a material change beyond the terms originally requested will normally be subject to the same procedures as a new application.

(f) Notice of issuance or denial—Within 10 days after the date of issuance or denial of a permit, the Director shall publish notice of the issuance or denial in the Federal Register.

§ 670.11 Permit administration.

(a) Issuance of permits—The Director may approve an application in whole or in part. Permits shall be issued in writing and be signed by the Director. Each permit may contain such terms and conditions as are consistent with the Act and this Part.

(b) Denial—The applicant shall be notified in writing of the denial of any permit application and of the reason for such denial. If authorized in the notice of denial, the applicant may submit further information, or reasons why the permit should not be denied. Such further submissions shall not be considered a new application.

(c) Amendment of applications or permits—An applicant or permit holder desiring to have any term or condition of his application or permit modified must submit full justification and supporting information in conformance with the provisions of this subpart and the subpart governing the activities sought to be carried out under the modified permit. Any application for modification of a permit that involves a material change beyond the terms originally requested will normally be subject to the same procedures as a new application.

(d) Notice of application or denial—Within 10 days after the date of issuance or denial of a permit, the Director shall publish notice of the issuance or denial in the Federal Register.

§ 670.12 Conditions of permits.

(a) Possession of permits—Permits issued under these regulations, or copies of them, must be in the possession of persons to whom they are issued and their agents when conducting the authorized action.

(b) Display of permits—Any permit issued shall be displayed for inspection upon request of the Director, designated agents of the Director, or any person with enforcement responsibilities.

(c) Filing of reports—Permit holders may be required to file reports of the activities conducted under a permit. Reports shall be submitted to the Director not later than June 30 for the preceding 12 months.

§ 670.13 Modification, suspension, and revocation.

(a) The Director may modify, suspend, or revoke, in whole or in part, any permit issued under this section:

(1) In order to make the permit consistent with any change to any regulation in this part made after the date of issuance of the permit;

(2) If there is any change in conditions which makes the permit inconsistent with the purpose of the Act and these regulations; or

(3) In any case in which there has been any violation of any term or condition of the permit, any regulation in this part, or any provision of the Act.

(b) Whenever the Director proposes any modifications, suspension, or revocation of a permit under this subsection, the permittee shall be afforded an opportunity for a hearing by the Director with respect to such proposed modification, suspension, or revocation. If a hearing is requested, the action proposed by the Director shall not take effect before a decision is issued by him after the hearing. Unless the proposed action is taken by the Director to meet an emergency situation.

(c) Notice of the modification, suspension, or revocation of any permit by the Director shall be published in the Federal Register within 10 days from the date of the Director's decision.

§ 670.14 [Reserved]

Subpart D—Native Mammals and Native Birds

§ 670.15 Specific issuance criteria.

With the exception of specially protected species of mammals and birds designated in Subpart E of this part, permits to take a mammal or bird in Antarctica designated as a native mammal in § 670.17 or as a native bird in § 670.18 may be issued:

(a) Only for the purpose of providing:

(1) Specimens for scientific study or scientific information; and

(2) Specimens for Museums, zoological gardens, or other educational or cultural institutions or uses;

(b) Shall ensure, as far as possible, that:

(i) No more native mammals or native birds are taken in any year than can normally be replaced by natural reproduction in the following breeding season, and

(ii) The variety of species and the balance of the natural ecological systems within Antarctica are maintained; and

(iii) The authorized taking, transporting, carrying, or shipping of any native mammal or native bird is carried out in a humane manner.

§ 670.16 Contents of permit applications.

In addition to the information required in Subpart C of this part, an applicant seeking a permit to take a native mammal or native bird shall include a complete description of the project including the purpose of the proposed taking, the use to be made of the native mammals or native birds, and the ultimate disposition of the native mammals or native birds. Sufficient information must be provided to establish that the taking, transporting, carrying, or shipping will be humane.
§ 670.17 Designation of native mammals.

The following are designated native mammals:

Dolphin: Hourglass Lagenorhynchus cruciger.
Seal: Crab-eater Lobodon carcinophagus.
Elephant Mirounga leonina.
Kerguelen Fur Arctocephalus gazella.*
Leopard Hydrurga leptonyx.
Ross Ommatophoca rossi.*

§ 670.18 Designation of native birds.

The following are designated native birds:

Albatross:
Black-browed Diomedea melanophris.
Gray-headed Diomedea chrysostoma.
Light-mantled Sooty Phoebetria palpebrata.
Wandering Diomedea exulans.

Pulmar:
Northern Giant Macronectes halli.
Southern Fulmarus glacialisoides.
Southern Giant Macronectes giganteus.

Gull:
Southern Black-bellied Sterna vittata.

Petrel:
Antarctic Thalassemia antarctica.
Black-bellied Storm Fregetta grallaria.
Blue Halobaena caerulea.
Gray Procellaria cinerea.
Great-winged Pterodroma macroptera.
Kerguelen Pterodroma brevirostris.
Mottled Pterodroma inexpectata.
Snow Paphnoda nivea.
Soft-plumaged Pterodroma mollis.
South-Georgia Diving Pelecanoides georgicus.

White-bellied Storm Fregetta grallaria.
White-chinned Procellaria aequinoctialis.
White-headed Pterodroma lessoni.
Wilson’s Storm Oceanites oceanicus.

Pigeon:
Cape Daption capense.

Pintail:
South American Yellow-billed Anas georgica spinicauda.

Prion:
Antarctic Pachyptila desolata.
Narrow-billed Pachyptila belcheri.

Shag:
Blue-eyed Phalacrocorax atriceps.

Shearwater:
Sooty Puffinus gravis.

* Those species of mammals have been designated as specially protected species and are subject to Subpart E of this part.

§ 670.19 [Reserved]

Subpart E—Specially Protected Species of Mammals and Birds

§ 670.20 Specific issuance criteria.

Permits authorizing the taking of mammals or birds designated as a specially protected species of mammals and birds in § 670.22 may only be issued if

(a) There is a compelling scientific purpose for such taking;
(b) The actions allowed under any such permit will not jeopardize the existing natural ecological system, or the survival of that species; and
(c) The authorized taking, transporting, carrying, or shipping of any native mammal or native bird is carried out in a humane manner.

§ 670.21 Content of permit applications.

In addition to the information required in Subpart C of this part, an applicant seeking a permit to collect a specially protected species shall include the following in the application:

(a) A detailed scientific justification of the need for such collecting, including a discussion of alternatives; and
(b) Information demonstrating that the proposed action will not jeopardize the unique natural ecological system existing in that area.

§ 670.22 Designation of specially protected species of mammals and birds.

Skua: Brown Catharacta lonnerupi.
South Polar Catharacta maccormicki.

Swallow: Barn Hirundo rustica.

Shearwater: American Chloephora albala.

Term: Antarctic Sturna vittata.

Penguin: Arctic Sturnus paradisaea.

§ 670.23 [Reserved]

Subpart F—Native Plants

§ 670.24 Specific issuance criteria.

Permits authorizing the collection of any native plant designated in § 670.26 of this title from a specially protected area designated in § 670.30 of this title may be issued only if

(a) There is a compelling scientific purpose for such collection which cannot be served elsewhere, and
(b) The actions allowed under any such permit will not jeopardize the natural ecological system existing in that area.

§ 670.25 Content of permit applications.

In addition to the information required in Subpart C of this part, an applicant seeking a permit to collect a specially protected species shall include the following in the application:

(a) A detailed scientific justification of the need for the collection, including a discussion of alternatives; and
(b) Information demonstrating that the proposed action will not jeopardize the unique natural ecological system existing in that area.

§ 670.26 Designation of native plants.

All plants found in Antarctica are designated native plants, including:

Fungi Lichens
Vascular Plants Marine algae
Bryophytes Freshwater algae

§ 670.27 [Reserved]

Subpart G—Specially Protected Areas

§ 670.28 Specific issuance criteria.

Permits authorizing entry into any specially protected area designated in § 670.30 of this title may be issued only if

(a) There is a compelling scientific purpose for such entry which cannot be served elsewhere, and
(b) The actions allowed under any such permit will not jeopardize the natural ecological system existing in that area.

No permit shall be issued that allows the operation of any surface vehicle in a specially protected area.

§ 670.29 Content of permit applications.

In addition to the information required in Subpart C of this part, an applicant seeking a permit to enter a specially protected area shall include the following in the application:

(a) A detailed scientific justification of the need for such entry, including a discussion of alternatives; and
(b) Information demonstrating that the proposed action will not jeopardize the unique natural ecological system existing in that area.
PROPOSED RULES

§ 670.30 Designation of specially protected areas.

The Act states the Director shall designate as a specially protected area, each area identified under the Agreed measures as needing special protection. The following areas have been so identified and are designated as specially protected areas:

(a) Taylor Rookery, MacRobertson Land situated at Latitude 67° 26' South, Longitude 60° 50' East
(b) Rookery Islands in Holme Bay
(c) Ardery Island and Odbert Island in Victoria Land
(d) Sabrina Island and Balleny Islands in the Ross Sea
(e) Beaufort Island in the Ross Sea
(f) Cape Hallett in Victoria Land
(g) Dion Islands in Marguerite Bay
(h) Green Island in the Berthelot Islands
(i) Cape Shirreff on Livingston Island
(j) Moe Island in the South Orkney Islands
(k) Lynch Island in the South Orkney Islands
(l) Powell Island (southern portion only), Fredriksen Island, Michelsen Island, Christofferson Island, Grey Island and all unnamed islands within one mile of these islands; all of which are part of the South Orkney Islands
(m) Coppermine Peninsula on Robert Island
(n) Litchfield Island in the Palmer Archipelago
Maps specifying these areas in greater detail may be obtained from the Director.

§ 670.31 [Reserved]

Subpart H—Sites of Special Scientific Interest

§ 670.32 Specific issuance criteria.

Sites of Special Scientific Interest, designated in §670.34, are sites where scientific investigations are being conducted or are planned and there is a demonstrable risk of interference which would jeopardize those investigations. Criteria for these sites do not require limitations on entry to protect their unique scientific value of the area; and

(c) A statement demonstrating the consistency of the proposed action with the management plan.

§ 670.34 Designation of sites of special scientific interest and management plans for those sites.

The Act states that the Director shall designate as a site of special scientific interest each area are approved by the United States in accordance with Recommendation VIII-3 of the Eighth Antarctic Treaty Consultative Meeting. The Act also requires the Director to prescribe a management plan for such sites which is consistent with any management plan approved by the United States in accordance with that Recommendation. Accordingly, the following areas are designated as sites of special scientific interest to be managed in accordance with the management plan set forth after each designation:

(a) Sites of Special Scientific Interest requiring a Permit for Entry.

(1) (i) Cape Royds on Ross Island.
(1) (ii) Cape Crozier on Ross Island, and
(1) (iii) Haswell Island Management Plan. Entry by foot only for scientific purposes will be authorized. Pedestrians may not move through areas populated by birds except as necessary in the course of scientific investigations. A compelling scientific purpose must be demonstrated before a permit will be issued to take a native bird from this Site.
(2) Flinders Peninsula on King George Island Management Plan. The operation of surface vehicles and the landing of helicopters are not permitted within the Site except in an emergency. No buildings or other facilities may be erected on this Site. No rock samples may be collected unless authorized in the entry permit. Such authorization shall be given only for compelling scientific purposes.
(3) Byers Peninsula on Livingston Island Management Plan. The operation of surface vehicles is not permitted within the Site except in an emergency. No buildings or other facilities may be erected on this Site. No rock samples may be obtained unless authorized in the entry permit. Such authorization shall be given only for compelling scientific purposes.
(4) Barwick Valley in Victoria Land Management Plan. Entry on foot only will be authorized. Overflight is not permitted. Permanent field camps, landing disposal, and other activities which would introduce new materials or organisms, including microorganisms, into the Site are not permitted. All materials carried into the Site shall be removed.

(b) Sites of Special Scientific Interest not requiring a Permit for Entry.

(1) Arrival Heights on Ross Island Management Plan. Vehicles and pedestrians shall keep to designated tracks. No radio frequency transmitting equipment other than low power transceivers for local essential communications may be installed within the Site.
(b) Maps—Maps identifying the designated Sites of Special Scientific Interest in greater detail are available from the Director.

§ 670.35 [Reserved]

Subpart I—Import Into and Export From the United States

§ 670.36 Specific issuance criteria for imports.

Subject to compliance with other applicable law, any person who takes a native mammal or native bird or collects a native plant under a permit issued under these regulations may import it into the United States unless the Director finds that importation would further the purpose for which it was taken or collected. If the importation is for a purpose other than that for which the native mammal or native bird was taken or the native plant collected, the Director may permit importation upon a finding that importation would be consistent with the purposes of the Act, these regulations, or the permit under which they were taken or collected.

§ 670.37 Specific issuance criteria for exports.

The Director may permit export from the United States of any native plant taken from a specially protected area or of any native mammal or native bird upon a finding that exportation would be consistent with the purposes of the Act, these regulations, or the permit under which they were taken or collected.

§ 670.38 Contents of permit applications.

In addition to the information required in Subpart C of this part, an applicant seeking a permit to import into or export from the United States a native plant taken from a specially protected area, a native mammal, or a native bird shall include the following in the application:

(a) Information demonstrating that the import or export would further the purpose for which the species was taken or collected; or
(b) Information demonstrating that the import or export is consistent with the purposes of the Act or these regulations; and
(c) A statement as to which U.S. port will be used for the import or export application shall also include information describing the intended ultimate disposition of the imported or exported item.
Permits to import or export at non-designated ports may be sought from the Secretary of Interior pursuant to Subpart C, 50 CFR Part 14. The ports presently designated are:
(a) New York, New York
(b) Miami, Florida
(c) Chicago, Illinois
(d) San Francisco, California
(e) New Orleans, Louisiana
(f) Seattle, Washington
(g) Honolulu, Hawaii

[§ 670.40] [Reserved]

Subpart J—Introduction of Non-Indigenous Plants and Animals

§ 670.41 Specific issuance criteria.

For purposes consistent with the Act, only the following plants and animals may be considered for a permit allowing their introduction into Antarctica:
(a) Sledge dogs;
(b) Domestic animals and plants;
(c) Laboratory animals and plants including viruses, bacteria, yeasts, and fungi.

Living non-indigenous species of birds shall not be introduced into Antarctica.

§ 670.42 Content of permit applications.

Applications for the importation of plants and animals into Antarctica must describe:
(a) the need for the plants or animals;
(b) how the applicant will ensure that the plants or animals will not harmfully interfere with the natural system; and
(c) how the plants or animals will be removed from Antarctica or destroyed in a manner that protects the natural system of Antarctica.

§ 670.43 Conditions of permits.

(a) General. All permits allowing the introduction of non-indigenous plants and animals will require that the animal or plant be kept under controlled conditions to prevent harmful interference with the natural system and that after serving its purpose the plant or animal shall be removed from Antarctica or destroyed in a manner that protects the natural system of Antarctica.

(b) Dogs.—In addition to the requirements of paragraph (a), all dogs imported into Antarctica shall be inoculated against the following diseases:
(i) Distemper;
(ii) Contagious canine hepatitis;
(iii) Rabies; and
(iv) Leptospirosis (L. canicola and L. icterohaemorragiae). Each dog shall be inoculated at least two months before importation, and a certificate of inoculation shall accompany each dog. No dog shall be allowed to run free in Antarctica.

§ 670.44 [Reserved]

RICHARD C. ATKINSON,
Director.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 94]

[Dockets No. 20005; RM-1849; RM-1849; RM-2045; FCC 79-92]

PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

Development of Frequency Allocations and Regulations Applicable to the Use of Radio for the Remote Reading of Public Utility Meters

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: The FCC terminates its Notice of Inquiry into the need to develop frequency allocations and regulations for remote reading of public utility meters. At the same time the Commission has expanded the scope of its consideration of automated systems to include distribution automation systems, which include the remote meter reading function, as well as load management and environmental monitoring. All information of record in Docket 20005, which is relevant, will be considered in SS Docket No. 79-18. The Notice of Proposed Rule Making regarding SS Docket No. 78-18 was released March 1, 1979, and is published elsewhere in this issue.

FOR FURTHER INFORMATION CONTACT:
Eugene Thomson, Safety and Special Radio Services Bureau, (202) 632-6497.

REPORT AND ORDER

Released: March 1, 1979.

By the Commission: Commissioner Quello absent.
1. On April 19, 1974, (39 FR 15162, May 1, 1974) the Commission adopted a Notice of Inquiry, in the above captioned matter. Comments were received from various parties, including the two companies which had petitioned the Commission for frequency allocations: Sangamo Electric Company (Sangamo, RM-1849) and Readex Electronics, Inc. (Readex, RM-1836, RM-2045). A complete list of parties filing comments is included in the Appendix.

2. The majority of those filing comments supported the concept of automatic meter reading (AMR). However, some expressed concern about radio AMR, citing possible interference problems and the economics of radio systems compared to non-radio systems. Some typical comments were:

American Gas Association, p. 2—"A.G.A. encourages the development of all new technology such as AMR systems that would facilitate and expedite the operation of A.G.A. member companies. A.G.A. believes that it is important that the Commission act with reasonable dispatch to implement the necessary rule making for specific provisions for allocation of frequencies for use in automatic meter reading and other distribution system operating functions."

Utilities Telecommunications Council, p. 11—"Based on its years of work in the AMR area, UTC is convinced that in order for a utility to be able to service all of its operating area and all of its meters and in order to provide the utility with the necessary flexibility and freedom of choice in communications systems needed to meet the utility's AMR and distribution system load management requirements, a combination of AMR communications systems may be required—telephone, cable TV, electric power line and radio."

Central Committee on Telecommunications of the American Petroleum Institute, p. 8—". . . reject all proposed rule amendments which look toward meeting any demonstrated RF spectrum needs for remote utility meter reading through the displacement of existing communication users or the shared use of presently assigned spectrum which would increase the interference potential to existing communication systems."

Associated Public Safety Communications Officers, Inc., pp. 4-5—"While APCO recognizes the long-term need of utility systems to develop automated meter reading techniques, it is unclear at present whether radio data transmission is necessary for this purpose. Until it is determined that radio metering of data will offer significant advantages over data collection via wire-lines, we believe it is premature to authorize radio-based utility meter reading systems on a regular basis."
Sangamo Electric Company, p. 17—
“Most utility companies figure that the average cost of manually reading a
meter is about $2.00 per meter per
year. At the present time the automat-
ed approach has not been able to sur-
pass that figure. However, as time goes
on, particularly in the face of costs as-
associated with wage increases, remote
meter reading becomes more and more
economically justified.”

3. The weight of evidence gathered
in this inquiry indicates that radio
AMR systems, by themselves, would
not be justified. However, a radio
AMR system which could also perform
load management and other related
utility functions may be justifiable. In
this regard, the U.S. Department of
Energy (DOE) has estimated that
“load management combined with rate
structure reform has the potential for
reducing oil consumption approxi-
mately $48 billion in capital for plant
expansion capacity.”

4. More recently, the Utilities Tele-
communications Council (UTC) has
proposed the Commission (RM-2624,
filed January 17, 1977) to allocate fre-
cuencies in the 900 MHz range for
what it calls “distribution automa-
tion” purposes. Distribution automa-
tion, according to the definition of-
erred by UTC, includes automatic
meter reading as well as load manage-
ment, environmental monitoring, and
other operation functions.

5. In response to the UTC petition,
we are today instituting a new pro-
ceeding (SS Docket No. 79-18) to con-
sider the broader question of radio
distribution automation systems and
have decided to address the issues as-
associated with AMR within the context
of that proceeding. Any information
now on record in Docket No. 20005,
which is relevant to the new proceed-
ing, will be considered therein.

6. Accordingly, IT IS ORDERED,
pursuant to the authority contained in
Sections 4(d), 303(c) and 303(r) of the
Communications Act, as amended,
that the proceedings in Docket No.
20005 are hereby TERMINATED.

FEDERAL COMMUNICATIONS
COMMISSION,
WILLIAM J. THICARICO,
Secretary.

Fixed uses.
between the substation and the customer premise to provide for such operations as automatic meter reading, time-of-day metering, load control and management, capacitor control and monitoring, and load monitoring. The communications between master stations at control centers and remote stations at customer locations, and other points in the distribution network, would be used to allow utilities to meet and to level peak demands for service. Telephone line and power line carrier systems are also under consideration for use along with radio. UTC feels, however, that for reliability and cost reasons, use of radio is essential to a distribution automation system.

4. Several state utility regulatory commissions have advised the Commission of their interest in distribution automation systems as a means to help reduce energy consumption and new capital investments and are encouraging or requiring utilities to incorporate in their utility system distribution automation features. Demonstrations of the one-of-a-day metering systems, for example, are now being conducted in a number of states.

5. The U.S. Department of Energy, many public utilities individually and in conjunction with the Electric Power Research Institute (EPRI), and a number of businesses have been actively promoting and conducting research and development of public utility distribution automation communications systems. Radio systems, power line carrier (PLC) systems, telephone based systems, subcarriers on existing radio systems, and combinations of all of these systems are being investigated. Also, in Contract FCC-0244 to Systems Control, Inc., the Commission has contracted for a study of the costs of alternate communications systems for distribution automation. The preliminary report of various communications systems for distribution automation, and contains information on the alternate systems. Its preliminary conclusion is that only radio and CATV systems can fulfill all the functions required of distribution automation. The report states that it may not be practical and cost effective to extend a CATV network into all residences, substations, and feeder devices solely for distribution automation and load management purposes. It appears, therefore, that radio would be at least one appropriate method for distribution automation and should be provided for.

6. We have considered the UTC petition in the light of the information contained in it, supplements to it, and the light of the background and information summarized above and we feel that sufficient justification exists for us to propose to accommodate the requirements outlined by UTC. However, we believe these requests can be met within the presently allocated fixed service band 952-960 MHz without requiring the reallocation of spectrum presently reserved for land mobile use or allocated for other services.

7. The 952-960 MHz frequencies proposed are available under Part 94 of the Commission's rules for fixed, point-to-point omnidirectional operation. This is roughly the type of operation that UTC requests. UTC seeks 12 MHz (or greater) spacing between transmit and receive frequencies for distribution automation radio systems because, it argues, such spacing will facilitate equipment and system designs, avoid interference problems, and will result in less expensive equipment. However, after reviewing the technologies with industries that probably would be used for building equipment in this band for distribution systems, the cost of radio equipment, even with the narrower spacing proposed here, is likely to be low. Also, equipment designed for the narrower separation proposed here can be expected to be less susceptible to inter-system interference. In our view, the other claimed advantages of the wider spacing have not been shown to be significant enough to require the use of spectrum outside of the 952-960 MHz fixed band.

8. The frequencies 952.1, 952.2, 952.3, 952.4, 952.5, 952.6, and 952.7 MHz and 100 kHz spaced pairs 952.2/955.2, 952.5/955.5, and 952.6/955.6 MHz have long been available for similar types of multiple address operations using 100 kHz bandwidth. Few assignments have been made on these channels in the past. Splitting these channels to 25 kHz, the spacing requested by UTC, makes 64 frequencies available for use. There are several ways to pair these channels. The pairing scheme shown in proposed §94.65(a)(4) provides 10 frequency pairs with 7.75 MHz spacing, 16 pairs with 3.9 MHz spacing and 12 unpamped frequencies. We think these spacings will provide the flexibility needed to accommodate various system designs, but we ask that this matter be addressed specifically in the comments.

8. First Report and Order and Second Notice of Inquiry, Docket 16262 35 FR 8844 (1970); Land Mobile Service, Second Report and Order, Docket 18262, 46 FCC 2nd 752 (1971) and other related factors which need to be considered in order to develop spectrally efficient yet economically feasible automation distribution radio communication systems.

10. Other changes in Part 94 are required. First, we want to provide protection from intolerable levels of interference. UTC proposed interference criteria similar to the "short-haul" analog criteria currently prescribed in §94.63 of the rules and, to achieve this protection, it suggested pre-established distance separations for both co-channel and adjacent channel systems.
number of transmitters communicating with thorization provided that the interfer-
tions would be located. Additions and-Applications to file one application for

M. It is proposed to amend Part 94 of
the Commission's Rules as follows:
1. In §94.3, the following definition
is added and appropriate alphabetical
order:

§94.3 Definitions.

A. Master Station. A station, operating
on frequencies in the 952-960 MHz
band, which controls, interrogates or
activates remote stations.

B. Additions and deletions of response stations would be allowed to be made by the licensee within the previously described service area, without prior Commission authority provided that the interference potential from the system is not increased. This matter of licensing these systems should be addressed in the comments and alternative suggestions are specifically requested.

* A system usually would consist of a number of transmitters communicating with one or more control or master stations.

13. UTC asks that the maximum power for remote stations using omni-
directional antennas be 5 watts output
with an ERP of 47 dBm. We are pro-
posing this limit, with other limits as
currently provided in §94.13 for remote
stations in the 952-960 MHz band with

directional antennas for master stations with omni directional antennas.

14. Other procedural rules needing
change are listed in the Appendix.

15. Comments should be addressed
to the specific proposals contained in
the Appendix to this Notice. Com-
ments should also be addressed to the
following questions.

</tbody>
</table>

(c) Applicants shall request, and authorization for stations in this service will specify, the polarization of each
transmitted signal. When periscope antenna systems or passive repeaters are employed, the applicant shall indicate the expected polarization of the reflected signal. The polarization should be expressed as either horizontal, vertical, or at an angle from vertical. Antenna polarizations of horizontal and vertical should be denoted by the abbreviations (H) and (V), respectively. For antennas using linear polarizations other than horizontal or vertical, the polarization should be stated in degrees measured from the vertical, with angles between 0° and +90° denoting the on-coming electric field vector displacement in a counterclockwise direction, and angles between 0° and -90° denoting the on-coming electric field vector displacement in a clockwise direction. In the event polarization diversity is authorized, the two polarizations must be separated by 90°. Antennas employing other than linearly polarized feed systems will not be authorized except as remote and master stations.

11. In §94.107, the headnote and text are amended to read as follows:

§94.107 Posting of station authorization.
(a) Except as provided in paragraph (b) of this section, the original of each transmitter authorization in this service shall be posted or immediately available at the address at which station records are maintained as named in the authorization.
(b) Except as provided in paragraph (c) of this section, a clear and legible copy of the current transmitter authorization shall be posted or be immediately available at the transmitter location.
(c) The requirements in paragraphs (a) and (b) of this section do not apply to remote stations authorized in the 952–960 MHz band.

OFFICE OF MANAGEMENT AND BUDGET
Office of Federal Procurement Policy
[48 CFR Chapter 1]

DEVELOPMENT OF PROFIT POLICY FOR NEGOTIATED CONTRACTS
Availability and Request for Comment
AGENCY: Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Notice of Availability and Request for Comment on Potential Approach for Determining Profit Negotiation Objectives.

SUMMARY: The Office of Federal Procurement Policy is making available for public and Government agency review and comment an approach for determining profit goals for negotiated contracts. The approach being considered resulted from a research project initiated by this office. The project was performed by the Logistics Management Institute (LMI). Our object is to derive a profit policy which is (i) conceptually sound, (ii) practicable to apply, (iii) equitable to both the government and its suppliers, and (iv) which introduces far more pressure for efficiency than the simple cost-based standard in general use today has heretofore generated. The policy, when established, will be incorporated in the Federal Acquisition Regulation (48 CFR) being developed by this Office.

DATE: Comments must be submitted by May 1, 1979.

ADDRESS: Obtain copies of the approach from and submit comments to LeRoy J. Haugh, Associate Administrator for Regulations and Procedures, Office of Federal Procurement Policy, 726 Jackson Place, N.W., Room 9013, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT:
Conroy Johnson at (202) 395–6166.

SUPPLEMENTARY INFORMATION:
The Commission on Government Procurement and others have recognized the need for a uniform Federal policy for determining equitable profit objectives under negotiated contracts. This void has caused profit levels for similar work to vary from agency to agency. Lacking specific policy guidance, the outcome of profit negotiations often rests with the relative strength of the negotiating parties which is a distinct disadvantage to the uninitiated small business enterprise. Some agencies have effectively precluded meaningful profit negotiations altogether by establishment of arbitrary profit ceilings which, after a while, are also inclined to become the floor.

Another problem concerns the common practice of calculating profits as a percentage of estimated costs. Because higher costs equate to higher profits, there is little if any incentive over the long term for contractors to reduce costs through economical performance or by plant modernization. Although this major fault of cost-based profit policies is widely recognized, agencies either have not adopted or have been timid in adopting other accepted standards for establishing equitable profits under negotiated contracts. The LMI report addresses these shortcomings.

The uniform profit policy suggested by LMI has two formulas: for contracts in the service sector of the economy, a profit formula based upon cost is applied; for contracts in the manufacturing and construction sectors, a profit formula based upon both cost and capital (referred to as a "hybrid") is to be applied.

The following principles are embodied in LMI's recommended policy:
The profit policy should support the primary government acquisition goal of least overall cost to the government;
For service contracts, the government does not materially benefit from increased use of facilities capital (plant and equipment); consequently, a formula in which profit is calculated as a percentage of the incurred cost of performance is recommended;
For manufacturing and construction contracts on which the increased use of facilities capital and the increased utilization of existing facilities can lower total acquisition costs to the government, a profit formula based upon estimated capital employed and estimated cost is recommended;
The target profit rates should be derived from commercial rates and updated annually to incorporate recent commercial experience.

The suggested cost based profit formula for service contracts reflects a commercial equivalent rate of earnings before interest and taxes of 7.2 percent return on cost. Adjustments are suggested for both the cost recoupment risk associated with different types of contracts and the entrepreneurial skill required for complex tasks. Including adjustments the target rate of return on costs varies from 9.7 percent to 9.7 percent.

The "hybrid" profit formula for manufacturing and construction contracts reflects a commercial equivalent rate of earnings before interest and taxes of 14.6 percent. Some agencies have effectively precluded meaningful profit negotiations altogether by establishment of arbitrary profit ceilings which, after a while, are also inclined to become the floor.

Another problem concerns the common practice of calculating profits as a percentage of estimated costs. Because higher costs equate to higher profits, there is little if any incentive over the long term for contractors to reduce costs through economical performance or by plant modernization. Although this major fault of cost-based profit policies is widely recognized, agencies either have not adopt-

DEPARTMENT OF ENERGY
Economic Regulatory Administration
[10 CFR Parts 500, 501, 502, 503, and 505]
[Docket No. ERA-R-78-19]
PROPOSED RULES TO IMPLEMENT THE POWER-PLANT AND INDUSTRIAL FUEL USE ACT OF 1978

Request for Public Comment

AGENCY: Department of Energy, Economic Regulatory Administration.

SUMMARY: On November 9, 1978, the Economic Regulatory Administration (ERA) issued proposed rules for implementation of the Powerplant and Industrial Fuel Use Act of 1978 (FUA) pertaining to new facilities (November 17, 1978, 43 FR 53974) and set a date of February 2, 1979, for submission of comments on the proposed rules. On January 12, 1979, ERA announced an extension of the public comment period with regard to the proposed rules concerning new facilities until March 2, 1979 (January 18, 1979, 44 FR 3721). In response to additional requests for further extension of the public comment period, the deadline date for submission of written comments on the proposed rules is hereby changed to March 12, 1979.

DATES: Comments now delivered not later than March 12, 1979, will be given full consideration.

FOR FURTHER INFORMATION CONTACT:

DOUGLAS G. ROBINSON,
Assistant Administrator, Regulations & Emergency Planning Economic Regulatory Administration.

ACTION

COMPETITIVE NATIONAL VISTA GRANTS

Final Notice

AGENCY: Action.

ACTION: Final notice of competitive national VISTA grants.

SUMMARY: The following final notice sets forth the competitive procedure under which applications for national VISTA grants will be accepted and reviewed. The notice describes the program purpose, applicant eligibility, grant scope, selection criteria, and application review process for national VISTA grants.

In accordance with ACTION's response to Executive Order 12044, "Improving Government Regulations," a working group met on August 25, 1978, and determined that a regulation was not necessary to accomplish the purposes of this notice, but that the alternative of guidelines was sufficient. In addition, because the group determined that the notice affects an important Agency program (VISTA) and imposed substantial compliance and reporting requirements, it was decided that the notice was significant and therefore, should be published in the proposed form for a 60-day period during which written comments would be accepted and regional meetings held for public discussion.

No written or oral comments were received in response to the October 5, 1978 publication of the proposed interim guidelines. Therefore, the guidelines described below are the final notice of the national VISTA grants.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

Notice is given that pursuant to the authority contained in sections 103, 108, and 402(12) of the Domestic Volunteer Service Act of 1973, as amended, Pub. L. 93-113, title I, part A (42 U.S.C. 4953, 4958, 5042(12)), applications for grants to operate VISTA volunteer programs on a national or multi-regional basis will hereafter be accepted and reviewed in accordance with the procedures set forth below.

Applications from current national VISTA grantees for second and third year continuation grants are not subject to these competitive procedures, but those applying for fourth year continuations are subject to the procedures.

A. Program purpose. National VISTA grants are made for the purpose of providing full-time VISTA volunteers to sponsoring organizations which are working to alleviate poverty and poverty-related human, social and environmental problems on a multi-regional or national basis. VISTA Volunteers are assigned to local offices or project affiliates of the national grantee which are joined together by commonality of program purpose. VISTA will use national grants to impact on the basic human needs of the poor.

The national grantee is required to identify, and provide technical assistance to local groups which will serve as project sponsors of the volunteers. The grantee will also provide overall training, technical assistance and management support for the projects' operations.

B. Eligibility. Applicants for national VISTA grants must be public or private nonprofit incorporated organizations with ability to program full-time volunteers in antipoverty efforts. Applicants must have local offices or project affiliates in two or more of the ten Federal regional divisions. Both the applicant organization and its affiliates must have goals that are in accord with VISTA's legislative mission, which is to: strengthen and supplement efforts to eliminate poverty and poverty-related human, social and environmental problems in the United States by encouraging and enabling persons from all walks of life and all age groups, including elderly and retired Americans, to perform meaningful and constructive volunteer service in agencies, institutions and situations where the application of human talent and dedication may assist in the solution of poverty and poverty-related problems and secure and exploit opportunities for self-advancement by persons afflicted with such problems. (Sec. 101, Pub. L. 93-113, 42 U.S.C. Sec. 4951.)

Applicants must be able to demonstrate sufficient administrative and fiscal expertise to manage a national grant as well as the capability of providing adequate training, technical assistance and supervision to the Volunteers and local project affiliates.

C. General criteria for grant selection. Grant applications will be reviewed and evaluated against the general criteria outlined below.

1. The proposed project(s) operating at the local level must:

   (a) Contribute to the creation of more self-reliant communities by developing in and among the poor the capability for leadership, problemsolving and active participation in the decision-making processes which affect their lives;

   (b) Have as a method of attacking poverty-related problems (1) the organization of low-income community residents to bring long-term benefits to the community through their own collective efforts or the establishment of an advocacy system controlled and operated by those to be served; or (2) the support of efforts of low-income citizens participation or grassroots advocacy organization(s);

   (c) Demonstrate that the goals, objectives, and volunteer tasks are attainable within the timeframe during which the volunteers will be working on the project and will produce a measurable result(s);

2. The applicant organization must:

   (a) Provide assignments for volunteers which are consistent with the requirements and restrictions for VISTA volunteer service contained in the Domestic Volunteer Service Act of 1973 (Pub. L. 93-113) and applicable regulations and VISTA policies;

   (b) To the maximum extent practicable, involve the low-income people to be served in the planning, development and implementation of the project(s);

   (c) Identify resources needed and make them available for volunteers to perform their tasks;

   (d) Demonstrate sufficient administrative, supervisory and financial expertise to manage a multiple-unit, geographically-dispersed grant and multi-State volunteer payroll system;

   (e) Demonstrate ability to recruit full-time volunteers into the project as appropriate;

   (f) Demonstrate ability to provide pre- and in-service training and technical assistance appropriate to VISTA Volunteer assignments.
D. Scope of grant. Subject to the availability of funds, new national grants range in size from approximately $200,000 to $400,000. They are awarded for periods of up to fifteen (15) months to allow for preoperational planning and volunteer recruitment prior to the twelve (12) months of volunteer service.

A national VISTA grant covers only the direct costs of operating the project which are: volunteer recruitment, volunteer allowances and stipends, volunteer payroll administration, volunteer transportation, provision of training and technical assistance, project management and supervisory staff salaries, fringe benefits, staff travel, postage, telephone, and duplicating expenses. All other direct costs, as well as indirect costs, must be borne by the grantee. Grant applications must demonstrate ability of applicant organizations to provide these types of support.

Publication of this notice does not obligate ACTION to award any grants. Its purpose is to describe the procedures that will be used to review and award future national VISTA grants.

E. Application review process. When applications are solicited they will be reviewed and rated by an ACTION headquarters rating panel composed of a minimum of five (5) ACTION staff members having expertise in volunteer programs operating within low-income communities. No more than two members of the panel shall be staff of the VISTA program office appointed by the VISTA Director. The remaining panel members shall be appointed by the Associate Director for Domestic and Anti-Poverty Operations.

The panel shall establish a best qualified list which shall consist of the highest rated applicants in rank order. The number of applicants on this list may be less than, but may not exceed, twice the number of grants anticipated. To determine that number, the panel will use $350,000 as the average grant size. The Director of VISTA shall select the grantees from the best qualified list.

Prior to making that final selection, the VISTA Director will transmit to the ten ACTION Regional Directors and appropriate State Directors copies of the best qualified list grant applications along with the evaluation criteria used by the panel. The ACTION Regional and State Directors (or their designees) will review and comment on the grant applications with State Directors assessing local project affiliates within their jurisdictions. Regional and State Directors will submit written recommendations to the Director of VISTA. These recommendations will be considered by the Director of VISTA in making the final selection of grantees as well as in determining the size and actual composition of each national VISTA grant.

The final selection of National VISTA grantees will be made in accordance with the purposes of the Act, ACTION/VISTA policies and regulations, and within the limits of available funds.

The notice of grant award (NGA) will be made by the chief of the Grants Branch, Contracts and Grants Management, ACTION. The NGA will set forth in writing the amount of funds granted, the terms and conditions of the grant award, the effective date of the award, and the budget period for which support is given. It also incorporates the final project narrative submitted by the grantee and all subsequent project narratives and volunteer work plans related to local project sites as specified by the VISTA Grant Project Manager.

Effective Date: February 28, 1979.

San Brown,
Director, ACTION.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

PUBLIC INFORMATION MEETING

Notice is hereby given in accordance with § 800.6(b)(3) of the Council's regulations "Protection of Historic and Cultural Properties (36 CFR Part 800) that on Monday, March 21, 1979, at 7:30 p.m. a public information meeting will be held at Hanalei District Court, Hanalei, Kauai, Hawaii. The purpose of this meeting is to provide an opportunity for representatives of national, State, and local units of government, representatives of public and private organizations and interested citizens to receive information and express their views on the proposed improvements to Federal aid Primary Route 55, Kuhio Highway (Kaula Belt Road) from the vicinity of Kalihiwai Bridge to the terminus of the road near Haena (Kee Beach), an undertaking of the Federal Highway Administration that will adversely affect Hanalei Bridge, the Waloll, and the Wapa Bridge, properties determined by the Secretary of the Interior to be eligible for inclusion in the National Register of Historic Places.

The following is a summary of the agenda of the public information meeting:
I. An explanation of the regulations and purpose of the meeting by a representative of the Executive Director of the Council.
II. A description of the undertaking and an evaluation of its effects on the properties by the Federal Highway Administration.
III. A statement by the Hawaii State Historic Preservation Officer.
IV. Statements from local officials, private organizations, and the public on the effects of the undertaking on the properties.
V. A general question period.

Speakers should limit their statement to 5 minutes. Written statements in furtherance of oral remarks will be accepted by the Council at the time of the meeting. Additional information regarding the meeting is available from the Executive Director, Advisory Council on Historic Preservation, P.O. Box 23083, Denver, Colorado 80225, (303) 234-4945.

Robert M. Utley,
Deputy Executive Director.

DEPARTMENT OF COMMERCE
Office of the Secretary

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
Department Organization

Department Organization Order 25-5A of June 3, 1977, is hereby further amended as shown below. The purpose of this amendment is to delegate to the Administrator of NOAA certain of the Secretary's authorities to act under Public Law 95-372, the Outer Continental Shelf Lands Act Amendments of 1978.

SECTION 3. DELEGATION OF AUTHORITY. A new subparagraph 3.01.Jj. is added to read as follows:

"Jj. The following functions prescribed by the Outer Continental Shelf Lands Act Amendments of 1978 (Public Law 95-372, September 18, 1978):

1. The conduct of environmental studies and monitoring of the Outer Continental Shelf for the Secretary of the Interior as authorized by Section 20 of the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1346).

2. The conduct of studies of underwater diving techniques and equipment suitable for protection of human safety and improvement of diver performance as authorized by Section 21(e) of the Outer Continental Shelf Lands Act, as amended (43 U.S.C. 1347(e)).

3. Title IV of P.L. 95-372, pertaining to the Fishermen's Contingency Fund, except that the Secretary reserves the authority to submit the annual report to Congress required by section 406 (43 U.S.C. 1846)."

GUY W. CHAMBERLIN, Jr.,
Assistant Secretary for Administration.

DEPARTMENT OF DEFENSE

UNITED STATES FIRE ADMINISTRATION
Department Organization

This order effective February 8, 1979 amends the material appearing at 40 FR 29702 of June 18, 1975.

Department Organization Order 25-6A, dated April 28, 1975, is hereby amended as shown below. The purpose of this amendment is to reflect the change in the name of the National Fire Prevention and Control Administration to the United States Fire Administration (P.L. 95-422 of October 14, 1978).

1. All references to the organizational title "National Fire Prevention and Control Administration" (or "NFPCA") appearing in this Order are hereby changed to the "United States Fire Administration" (or "USFA"), as appropriate.

2. SECTION 4. FUNCTIONS. Section 4 is revised to read as follows:

"SECTION 4. FUNCTIONS.

The USFA shall perform the functions set forth in the Act, as amended (copy appended hereto), as provided in this Order, and such other functions as may be prescribed by the Secretary."

GUY W. CHAMBERLIN, Jr.,
Assistant Secretary for Administration.

DEPARTMENT OF DEFENSE

LOUISVILLE-JEFFERSON COUNTY RIVERPORT AUTHORITY

Notice of Intent to Prepare a Draft Environmental Impact Statement

To prepare a Draft Environmental Impact Statement (DEIS) for a proposed port and industrial park along the Ohio River near Louisville, Kentucky.

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: The Louisville-Jefferson County Riverport Authority proposes to construct an Industrial park and riverport along the Ohio River in Jefferson County, Kentucky. The proposed site is located along the left bank, river mile 618 to 619. The Riverport Authority has applied for a Department of the Army Permit under section 10 of the Rivers and Harbors...
NOTICES

ACT OF 1899 and Section 404 of Pub. L. 92-500, the 1972 Amendments of the Federal Water Pollution Control Act.

Notice is hereby given of the assumption of "lead agency" responsibility for Federal action for the proposed facility by the Louisville District, Corps of Engineers. The DEIS will cover a variety of issues including air quality, economics, land use and transportation, in addition to the actual construction and operation of the facility.

A scoping meeting for the DEIS will be held on Tuesday, 17 April 1979, at 7:30 p.m. (E.S.T.) in the cafeteria of the Conway Middle School, 6800 Terry Road, Louisville, Kentucky. The purpose of the meeting is to identify the significant issues to be analyzed in depth in the DEIS. The participation of the public and all interested Government agencies is invited.

DATE: The Louisville District estimates that the DEIS will be released for public review on or before 1 July 1980.

ADDRESS: Questions regarding the DEIS should be addressed to the System Manager identified in the system of records.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

The Department of the Army systems of records notices as prescribed by the Privacy Act of 1974, 5 U.S.C. 552a, Pub. L. 93-579, have been published in the Federal Register as follows:

FR Doc. 78-35523 (43 FR 59895) December 22, 1978

The Department of the Army submitted a new system report for this system on January 29, 1979 under the provisions of 5 U.S.C. 552a(a).

Categories of individuals covered by the system:

All US Army active duty personnel who compete in FORSCOM regional or US Army Shooting Championships, Interservice Shooting Championships or National Rifle Association (NRA) National Shooting Championships.

Categories of records in the system:

File contains name, social security number (SSN), information concerning shooting classifications, levels of participation, in competition, scores fired in such competitions, primary military occupational specialty (PMOS), estimated termination of service (ETS), date of estimated return from overseas (DEROS) or date of return from overseas (DROS), last unit address, phone numbers, and assignment preferences.

Authority for maintenance of the system:

Title 10 U.S.C., Section 3012; US Army Forces Command (FORSCOM)/US Army Training and Doctrine Command (TRADOC) Supplement 1 to Army Regulation (AR) 350-6, "Army-wide Small Arms Competitive Marksmanship."

Routine uses of records maintained in the system:

To monitor the competition status of marksmanship qualified personnel throughout the Army and coordinate the assignment of qualified officers and noncommissioned officers to FORSCOM Marksmanship Units.

To facilitate rankings by demonstrated competitive shooting ability, locating (if not competing in all Army Championships) and attachment, if appropriate, to the US Army Marksmanship Unit for support of the National Trophy Group in the National Matches or for support in the US Army efforts to place individuals on US International Teams.

To assist installation commanders in identifying qualified personnel within their commands to conduct marksmanship programs.

To verify competitive marksmanship qualifications of any individual for Army Marksmanship Unit managers on whose area of responsibility that individual's qualification would have an impact.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Records are stored on magnetic tapes and disks at ODC-SOPS-TAT.

Paper records in file folders may be filed at any of the locations participating in the system.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
Notices

Visitors are registered and escorted when entering a secured lock area.

Safeguards:
- Visitors must register before entering.
- Visitors are escorted and maintained in a locked area.

Retrievability:
- Individual and unit records are retrievable.
- Retrievability is important for accessing records.

Safeguards:
- Vidmarksmanship Unit, Attn: Commander, FORSCOM, Ft Benning, GA 31905, telephone number.
- Notification procedure:
  - Submitting parties of Form EIA-27, Foreign Oil Supply Agreement Report.
  - Form EIA-27 is mandatory for any oil company.
  - Responses to Form EIA-27 are required.
  - Form EIA-27 is filed with the U.S. Department of Energy.

Retention and disposal:
- Paper records containing information pertaining to an individual are destroyed while in the area.
- Locally designed forms completed by individuals on whom data is recorded and official match bulletins are maintained.

Systems exempted from certain provisions of the Act:
- None.

DEPARTMENT OF ENERGY

Energy Information Administration

FOREIGN OIL SUPPLY AGREEMENT REPORT

Reporting Requirement

AGENCY: Department of Energy, Energy Information Administration.

ACTION: Notice of request for publication and submission by interested parties of Form EIA-27, Foreign Oil Supply Agreement Report.

SUMMARY: To implement the foreign oil supply agreement reporting system promulgated by FEDERAL REGISTER notice on September 23, 1977, 42 FR 40228 (Part 215 of Title 10 of the Code of Federal Regulations) the Energy Information Administration has developed Form EIA-27, Foreign Oil Supply Agreement Report. Responses to the form will be used to improve the ability of the Department of Energy (DOE) to assess the state and direction of the International oil market and assure that DOE evaluations and decisions with respect to that market are based on full and complete information. Submission of Form EIA-27 is mandatory for any person having the right to lift for export by virtue of an equity interest, reimbursement for services, exchange or purchase, from any country, from fields actually in production, (1) an average of 150,000 barrels per day or more of crude oil for a period of at least one year, or (2) a total of 55,000,000 barrels of crude oil for a period of less than one year, or (3) a total of 150,000,000 barrels of crude oil for the period specified in the agreement, pursuant to supply arrangements with the host government.

EFFECTIVE DATE: The form EIA-27 must be completed and returned not later than 60 days after the date of this notice. Submissions should be delivered by courier or registered mail to the following address:

SUPPLEMENTARY INFORMATION:
I. Availability of Form. A copy of Form EIA-27 is appended to this notice. You may submit based on the copy provided or you may request a copy of the form from Ms. Bernadette Michalski by calling (202) 633-9364.

II. Background. The U.S. Department of Energy is authorized to collect information on foreign oil supply agreements under the Federal Energy Administration Act (Pub. L. 93-275) Section 13(b). The FOSA Report will be utilized by the DOE Office of International Affairs a basis for informed policy decisions in areas affecting the energy supply interests of the United States.

The FOSA Report will be the first step in reporting of supply agreements between respondents and foreign oil producers. After receipt of the FOSA Report, the DOE may meet with individual company representatives to discuss the information contained in the FOSA Report and other aspects of the supply agreement. If the DOE deems it necessary, it may request respondents to companies to produce documentation concerning the supply agreement.

In addition, the Foreign Oil Supply Agreement Report may be utilized in conjunction with the EIA-67 "Foreign Crude Oil Cost Report" and ERA-51 "Transfer Pricing Report" (upon OMB clearance). The latter two reports will provide the volumes, prices, and costs of crude oil acquired under certain FOSA contracts.

Issued at Washington, D.C., February 27, 1979.

LINCOLN E. MOSES,
Administrator, Energy Information Administration.

NOTICES

FOREIGN OIL SUPPLY AGREEMENT REPORT

GENERAL INSTRUCTIONS—PART A

I. Purpose. The purpose of the Foreign Oil Supply Agreement (FOSA) Report is to improve the ability of the Department of Energy (DOE) to assess the state and direction of the international oil market and assure that DOE evaluations and decisions with respect to that market are based on full and complete information.

The FOSA Report is the first step in the reporting of supply agreements between respondents and foreign oil producers. After receipt of the FOSA Report, the DOE may meet with company representatives to discuss the information contained in the FOSA Report and other aspects of the supply agreement. If the DOE deems it necessary, it may request respondent companies to produce documentation concerning the supply agreement. This last action will generally occur when DOE believes that the information does not adequately describe all of the terms of the supply agreement. Therefore, it will be to the mutual benefit of both the respondent and the DOE for the respondent to provide a detailed description of the supply agreement in the FOSA Report.

The FOSA Report has been designed to allow a respondent flexibility in reporting the terms and conditions under which it acquires crude oil from foreign entities. This design has been used in recognition of the variety of access, including concessionary agreements, participation contracts, and purchases. This Report should convey to the DOE the relationships between the acquirer and the contracting entity for the producer, whatever form those relationships may take.

The Department of Energy has specified the order in which contract terms should be itemized in the Report in order to provide some consistency in reporting form and facilitate analysis of returns. Respondents must provide requested information on terms and conditions wherever relevant. They must also provide any other information needed to describe fully the relationships between the acquirer company and the national entity supplying the company with crude oil.

The DOE encourages respondents to identify those agreements or portions thereof which should be considered for national security classification.

There are three parts to the Report. The first part involves identification of the company reporting. The second part requires information about the details of the agreement. The third part involves information certification. If the instructions do not apply to the agreement or constrain the answer to the questions, explain why; the instructions restrict your ability to fully answer, then give as full an answer as possible. The last part involves the supply agreement and most complete answers that can be given.

II. Who Must Submit. Any person having the right to lift for export by virtue of equity interest, reimbursement for services, exchange of purchase from any country from fields actually in production; (1) an average of 150,000 barrels per day or more of crude for a period of at least 1 year; or (2) a total of 55,000,000 barrels of crude oil for a period less than 1 year; or (3) 150,000,000 barrels of crude oil for the period specified in the agreement, pursuant to arrangements with the host government, must file a Foreign Oil Supply Agreement Report on each such agreement. You must file one identification page for each agreement you report.

III. Where to Submit. The Foreign Oil Supply Agreement Report should be delivered by courier or registered mail to the following address:

Department of Energy, Energy Information Administration, Office of Energy Data and Interpretation, Division of Intertels, Nuclear and Other Energy Sources, Washington, D.C. 20461.

Requests for additional copies of the form, as well as questions relating to the form, may be directed to DOE at the above address or you may telephone 202-236-9364. Additional copies may also be obtained by preparing reproduction copies of the form.

IV. When to Submit. A. Reports must be filed no later than sixty (60) days after final issuance of the reporting forms. Notice of this issuance will be published in the Federal Register.

B. All reports should be made no later than:

1. Thirty (30) days after the date when supply arrangements are entered into; or
2. Thirty (30) days after the initial lifting under an agreement in which the parties have tentatively concurred but not signed, whichever comes first.

B. Any person required to report the terms of access to crude oil must also report to DOE within thirty (30) days of notification by the host country; (a) any change by the host government in official selling prices, royalties, host government taxes, service fees, quality or port differentials or any other payments made directly or indirectly for crude oil; changes in participation ratios; other changes in concessionary arrangements; (b) changes in the timing of collection of payments due by the buyer to the seller; and (c) any changes in restrictions on lifting or disposition.

Reports on changes or modifications of price terms, rebates, discounts or credit terms should be filed only if the method for determining these conditions has been changed. Reports need not be filed for changes in the dollar amount of income unless the changes are the result of a revision to the method for determining them.

V. Definitions. A. “Supply agreement” is any contract, verbal agreement, written communication, letter or written or unwritten agreement between two parties in which one party acquires a product or products from the second party for a price. The price may be agreed upon in the contract, determined by a formula, negotiated periodically, or otherwise determined. The price may involve exchange of cash, services, or other products. These components of the price may be described in the contract, written correspondence, informal discussions and other communications between the parties. The price may also place non-price requirements on the acquirer, e.g., minimum liftings, restrictions on oil movement and disposition.

B. “Contract” is any written document signed by two or more parties which requires or entitles one party to purchase or to offer for sale a product or products from a second party for a price. The price may involve exchange of cash, services or other products. The contract may also place non-price requirements on the purchaser.

C. “Party” for the purpose of this form is any person (as defined below), state-owned oil company, or agency of a host government which is empowered to enter into a supply agreement.

D. “Host governments” means the government of the country in which
crude oil is produced and includes any entity which it controls, directly or indirectly.

E. "Person" means any natural person, corporation, partnership, association, consortium or any other entity doing business or domiciled in the United States and includes: (a) any entity controlled directly or indirectly by such a firm; and (b) the interest of such a firm in a joint venture, consortium or other entity to the extent of entitlement to crude oil by reason of such interest.

F. "Parent and consolidated entities" means a parent and those firms, if any, directly or indirectly controlled by the parent which are consolidated with the parent for purposes of financial statements prepared in accordance with generally accepted accounting principles. An individual shall be deemed to control a firm which is directly or indirectly controlled by him or by his father, mother, spouse, children or grandchildren.

G. "Unconsolidated entity" is any entity directly or indirectly controlled by a parent but not consolidated with the parent for purposes of financial statements prepared in accordance with generally accepted accounting principles. An "unconsolidated entity" includes any entity consolidated with that unconsolidated entity for purposes of financial statements prepared in accordance with generally accepted accounting principles.

Specific Instructions/Identification Data—Part B. This part must be completed for each agreement reported.

Item 1.1: Date Report Prepared

Item 1.2: This report applies to:

Place a check mark in the box that best describes the person submitting this report. Refer to the "Definitions" section to ascertain the type of person.

Item 1.3: If Item 1.2 (b) is checked:

Enter the name of the parent firm and the Employer Identification Number (EIN)

Item 1.4: EIN

Enter the reporting firm's Internal Revenue Service (IRS) Employer Identification Number (EIN). If the EIN is not known, the reporting firm may contact its nearest IRS office for its EIN number.

Item 1.5: Revised Report

Check this box if this is a revised report. Leave blank if this is an original submission. Enter the date on which the revised report is submitted.

Item 1.6: Firm Name

Enter the legal name of the reporting firm.

Item 1.7: Change of address

Check this box if the name or address of the reporting firm changed since the last submission.

Item 1.8: Address

Enter the complete address of the reporting firm, including ZIP code. Enter the state abbreviation and ZIP code in the appropriate boxes, entering one digit or letter per box. Use the official United States Postal Service abbreviations.

Item 1.9: Contact Person

Enter the name, title, and telephone number, including area code, of an individual within the reporting firm who may be consulted for additional information regarding this submission.

Item 2.1: Agreement Serial Number

Each supply agreement negotiated with a host government is to be assigned a unique three-digit serial number by the Reporting Company. Thereafter, this serial number will appear in the serial number field of all reports, as described, and the termination of this agreement.

Item 2.2: Modification Number

Once a report of an agreement has been filed and an agreement serial number has been assigned, each subsequent modification is to be assigned a modification number of the following form:

Item 2.3: Type of Report:

Enter the type of report:

(a) New Agreement
(b) Termination of previously reported agreement
(c) Modification of any existing agreement previously reported.

Item 2.4: Enter the name of the company purchasing or acquiring the crude oil as identified in the supply agreement.

Item 2.5: Supplier (Host Government/State Oil Company)

Enter the name of the host government or state oil company identified as the supplier in the agreement.

Item 2.6: Country

Enter the name of the country from which crude oil will be lifted.

Specific Instructions/Agreement Information—Part C

In order to properly and fully address the following items of information, you are required to submit these details in a narrative format.

1. Type of Agreement

Describe the type of agreement that your firm has entered with the supplier, e.g., concession, participation contract, service contract or purchase agreement.

2. Parties to the Agreement other than those indicated in Sections 2.4 and 2.5

If the agreement is a partnership or joint venture (including a joint venture with the host government), or other wise involves parties other than the respondent and its supplier, identify the nature of other parties' participation and their proportionate interests.

3. Type of Crude Oil

Make as complete and identification as possible of the type or types of crude oil covered by the agreement; the description should cover fields or areas where produced, API gravity, sulfur content.

4. Point of Possession

Specify the geographic location or locations, at which the title to crude oil is obtained. Specify if different from the basing point for the price paid under the agreement and explain if any difference is noted.

5. Dates

Indicate effective date of the agreement; if crude oil is lifted prior to the effective date, give the date of initial lifting; describe dates and conditions under which the agreement can be cancelled, continued or renegotiated in whole or in part and the date or conditions under which the agreement will cease to be effective.

a. For each time period specified by the supply agreement, enter the minimum lifting obligation and the maximum lifting obligation. Each type of crude expressed in barrels per day.

b. If there are any specific lifting options, penalties or incentives, in the supply agreement, describe them and the conditions that will invoke them.

c. If there are any drilling or producing obligations, describe how they are determined.

7. Price Terms

a. Explain in detail the method by which the price of crude oil is determined. Indicate any costs incurred by the acquirer up to the point at which prices are determined. If a formula is used, show the formula and explain how it is applied. Identify all components of the price; if the oil is sold CIF, so indicate and specify the destination. If there are other conditions included in the price terms, such as the terminal to be used, include these in the description of the price terms.

b. Describe details of the credit provisions. Indicate the payment period. If there are optional terms, so identify the options and conditions that will cause them to become effective.

c. Describe the terms of rebates and discounts.

8. Escalation clauses

a. Describe any escalation clauses that are included in the supply agreement and the conditions under which each of them may be invoked. These clauses may include changes resulting from devaluation, revised government payments, price indices, export taxes, etc. Indicate the period of retroactivity.

9. Performance Obligations

Where the acquisition of crude oil under the agreement is in any way associated with the acquirer's performance as an explorer, developer, producer or provider of services related to the production of that oil, describe the nature and terms of that relationship, including as applicable, minimum/maximum allowable producing rates, the
current average rate of production expressed in barrels per day.

10. Payments to Host Government

Describe all payments made to the host government under the terms of the supply agreement. Payments may include such items as royalties, taxes, fees, and rentals. For each type of payment, describe the applicable formulas, rates, terms and how they are applied.

11. Remuneration to the acquirer by the supplier

This question refers to service fees, reimbursements of expenses or any other reverse flows of funds, investments, or other benefits. Describe each in detail, explaining why such payments are being made and the nature of, and if possible the value of, associated costs.

12. Restrictions on the shipping or disposition of crude oil

Describe any restrictions placed on the shipping or disposition of crude oil acquired under the agreement. Provide details on all obligations to use foreign-owned shipping or refinery facilities or to provide goods, services, or technology in return for rights or proprietary protection and for designation, disposal or resale of crude oil.

13. Other material terms

Provide a detailed description of all other material terms. Include all other obligations and restrictions, indicating the conditions under which these terms take effect. Include in this section any requirements for the transfer of technology, participation in development ventures or other conditions which cannot be assigned a price.

14. While DOE will make all decisions as to what national security classification, if any, will be accorded to specific items of EIA-27 information, it encourages respondents to identify which items of information they believe should be accorded national security or proprietary protection and for what period and to give specific reasons for their beliefs in this regard.

Economic Regulatory Administration

PROPOSED FORMS FOR THE PETITIONING FOR EXEMPTIONS FROM THE PROHIBITIONS OF THE POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1976

Request for Public Comment

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Extension of Public Comment Period.

SUMMARY: In ,FEDERAL REGISTER Notice FR Doc. 79-4300, 44 FR 5053, published February 12, 1979, the Economic Regulatory Administration (ERA) promulgated proposed forms for use in petitioning for exemptions from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1976 (Pub. L. 94-455) and set a date of March 2, 1979, for submission of comments on the proposed forms. In response to requests for extension of the public comment period, the deadline date for submission of written comments on the proposed ERA forms is hereby changed to March 26, 1979.

DATES: Comments now received not later than March 26, 1979, will be given full consideration.

Federal Energy Regulatory Commission

(Docket No. RM78-12)

ALASKA NATURAL GAS TRANSPORTATION SYSTEM INCENTIVE RATE OF RETURN

Delegate Report and Order Directing Tariff Filing

Pursuant to the Commission's directive in Order Nos. 17 and 17-A, the Alaskan Delegate has filed a report on the status of the tariff issues for the Alaska Natural Gas Transportation System (ANGTS). The report itemizes and discusses unresolved tariff issues in the context of the risk allocation framework during the operation phase of the Northern Border and Alaskan segments of the project, and addresses the issue of the Operation Phase Rate of Return.

The Delegate's covering memorandum to the Commission makes a procedural recommendation that differs from the procedures contemplated in the earlier orders. It is that all remaining issues associated with the Commission's review and adoption of the project company tariffs and the incentive rate of return (IROR) mechanism, including expected schedules of rates for the Northern Border and Alaska segments, be consolidated and resolved as completely as possible through a single rulemaking proceeding. The Commission agrees and will require the filing by March 12, 1979, of the project company tariffs for the Northern Border and Alaska segments, along with estimates of the debt/equity ratios in the financing plans of the two project segments and an estimate of the cost of debt to each. The Commission also requests that by date expression of any objections to the Delegate's proposed procedures, along with the basis for any such objection.

The Commission has previously, in its September 15, 1978 Notice of Proposed Rulemaking, provided an illustrative IROR schedule for the Alaska segment. At this point, more definitive guidance with respect to IROR parameter values for both the Northern Border and Alaska segments would facilitate financing. It is for that reason that we are requesting the project sponsors to include estimates of debt/equity ratios and costs of debt when they file their tariffs.

A copy of the Delegate's report and covering memorandum is attached to this order. Further copies of the Delegate's report are available through the Commission's Office of Public Information, and have been served on the parties to the proceedings in Dockets No. CP 78-123, et al., and RM-78-12. The project companies should also serve copies of their tariffs on parties to those proceedings.

The Commission orders: 1. The sponsors of the Alaskan and Northern Border segments of ANGTS should file their project company tariffs, as well as estimates of debt/equity ratios and costs of debt, with the Commission on or before March 12, 1979, and serve their filings on all parties to Docket Nos. CP78-123, et al., and RM-78-12.

2. The Alaskan Delegate will serve copies of this Order and of his memorandum and report on all parties to Docket Nos. CP78-123, et al., and RM-78-12, may file comments with the Commission on or before March 12, 1979, with respect to the procedures outlined in the Delegate's memorandum. Copies of the comments should be served on all parties.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
By the Commission.

KENNETH F. PLUMB,
Secretary.

FEDERAL ENERGY REGULATORY COMMISSION,

Memorandum for: The Commission.
From: John B. Adger, Jr., Alaskan Delegate.
Subject: Alaska Natural Gas Transportation System.

Pursuant to the Commission's directive in Order Nos. 17 and 17-A, I am attaching my report on the status of the tariff issues for the Alaska project. In accordance with your directive, the report itemizes and discusses unresolved tariff issues in the context of the risk allocation framework during the operation phase of the Northern Border and Alaskan segments of the project.

My report also addresses the issue of the Operation Phase Rate of Return. In Order No. 17-A you envisioned the conduct of separate proceedings to determine initially the project company tariffs and subsequently the Operation Phase Rate. I believe my report illustrates that the interrelation of those matters warrants their joint consideration. Accordingly, I recommend that you consolidate your consideration of the Operation Phase Rate with that of the project company tariffs.

Regarding your consideration of the project companies' tariffs, my report notes that during the course of the hearings before the Federal Power Commission's (FPC's) Administrative Law Judge Nahum Litit, issues were raised in connection with a number of relatively minor tariff features, which issues are thought to be resolved. Additionally, the President in his Decision and Report to Congress on the Alaska Natural Gas Transportation System (referred to as the Decision) specified that the tariffs should:

- contain a variable rate of return provision,
- not require consumers to bear the risk of non-completion, and
- employ a cost of service formula rather than a stated rate.

The Commission in its "Comments on the Decision" endorsed these conditions and provided some general guidelines which it would follow in exercising its authority to approve the tariffs. I recommend examination by all parties, including the Commission staff, of the tariffs which are to be filed by the project companies to assure that they in fact reflect those resolutions.

In addition to the Operation Phase Rate of Return, there remain for resolution such issues relating to the project companies' tariffs as: the determination of the date on which the project companies shall commence billing their shipper-customers; the necessity of an interim rate to apply during the initial build-up phase of project operation; the adoption of a provision to reduce return on equity in the event of service interruption; and the selection of a period and a basis for determining the various cost elements to be included in the cost of service for the project companies.

The project companies' tariffs will of course have a direct relation to the level of the Operation Phase Rate, and both factors will directly affect the financing of the Alaskan project. The tariffs are to prevent a cost shift among the project companies which the operation of the project is to be conducted. They shall comprehensively specify operation practices, rate forms, billing and audit procedures and all other aspects of the project companies' relations with their customers. Because of this comprehensiveness, the project tariffs will be a major determinant in fixing the risk that will be borne by investors during the operating phase of the project. Accordingly, the prompt submission and review of the project companies' tariffs is critical to the timely determination of the Operation Phase Rate and to the overall financing of the project. I recommend that the Commission order the project companies to file their proposed tariffs on or before March 12, 1979, in order to allow the rate staffs to apprise the rate of RETURN Issues, based on those schedules, a my staff and the Commission to guide further Commission action on these matters:

(1) The Project Risk Premium is not clearly separable from the cost of service for the particular matter or from the IROR Risk Premium;

(2) An appropriate setting of the Center Point could eliminate much of any administrative burden in connection with the Change in Scope procedure; and

(3) There is a tradeoff between the Change in Scope procedure and the IROR Procedure for determining the appropriate project company tariff and the Operation Phase Rate.

I expect to report to you on these issues and interrelationships in early March. Because of the interrelationships, I recommend that consideration of as many of the remaining IROR issues as possible be consolidated into a single "rulemaking" type of proceeding to be initiated as soon as possible after March 1, 1979. As the project company tariffs for Northern Border and the Alaska segment should be filed at about that same time, consideration of the tariffs and their respective Operation Phase Rates could also be considered into one master proceeding to resolve essentially all the remaining IROR issues, based on some basic assumptions about those of the OPPhase rates.

I believe the Commission can and should conduct such a master proceeding through the use of rulemaking procedures. Serious consultation and negotiation with respect to financing the project cannot be made absent further guidance with respect to the IROR parameters. If a proceeding of this type could be conducted, parties could freely utilize the record developed before Judge Litit in articulating their positions. Insofar as there is a need for the submission of additional materials, such materials could be appended to the filed comments and served on all parties.

I believe that disposition of all IROR issues on this basis is necessary and appropriate. A voluminous record was amassed before Judge Litit, which should be utilized to the extent possible. In addition, extensive consideration and discussion of the Commission's role in the Incentive Rate of Return rulemaking in Docket No. RM78-12. Insofar as that record is significant for resolution of these issues, the Commission is obligated by the Alaska Natural Gas Transportation Act of 1976 (Public Law 94-566) to establish procedures to cure such deficiencies in the most expeditious manner possible. The above rulemaking procedures are streamlined and are within the authority of the Commission as established by any of the related Energy Organization Act (Public Law 85-91) (hereafter DOE Act), Sections 402(a)(2) and 406(c) of the DOE Act empower the Commission to utilize rulemaking procedures to determine the setting of transportation rates pursuant to Section 4 of the Natural Gas Act. The sole constraint on the use of these procedures is that they must assure the full consideration of the issues and an opportunity for interested persons to present their views.

It is my belief that, given the circumstances of this proceeding with its extensive prior litigation, the comment procedures outlined herein should be sufficient to permit the Commission to consider the voluminous materials necessary for resolution of the IROR Issues on this basis. I would not anticipate the need for cross-examination of witnesses or for oral argument. If, however, a need for such proceedings is perceived by any party, with respect to any of the particular matters, a request therefor could be made at the time comments are filed. Any such request should specify the particular matters to be discussed, and the reasons that the comment procedures provide inadequate opportunity for presentation and development of those matters.

Finally, the IROR issues report as a framework for review of the project sponsors' tariffs and for setting the Operation Phase Rate.

In accordance with the Public Utilities Regulatory Policies Act of 1978 (Public Law 95-91) I am attaching for the information of interested persons the decision and report on the Tariff and Operation Phase Rate Issues.

In preparation to its decision and report, the Commission is obligated to hold a public hearing. In doing so, the Commission will simultaneously allow the full expression of views by all interested persons.

I should also consider comments on the report itself. Such comments may address the sufficiency of the report, augment its discussion of the remaining issues, and specify any further unresolved issues. Comments on the Delegate's report should be filed concurrently with the comments on the Operation Phase Rate and the proposed tariffs. As my staff and I complete materials affecting other aspects of the IROR mechanism, we will file them with the Commission and distribute them to the public, as we are doing with the Report on The Tariff and Operation Phase Rate Issues. The objective of the process is to enable interested persons to make comments to make them more useful to the Commission in resolving the remaining IROR issues.

REPORT OF THE ALASKAN DELEGATE ON TARIFF AND OPERATION PHASE RATE ISSUES

I. SCOPE OF THE REPORT

In Orders Nos. 17 and 17-A, The Federal Energy Regulatory Commission (Commission) requested the Alaskan Delegate to

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
report on the status of tariff issues for the Alaska gas project. This report should be “in the context of the risk allocation framework during the operation phase” and “should provide a discussion of the manner in which various parties involved in an Alaska gas project include the gas sales contracts between the shippers and the producers of the gas at Prudhoe Bay, and the individual shippers. Shippers are likely to be interstate natural gas companies and are likely to be equity investors in the project.

The key issue concerning the shipper tariffs is the extent to which the shippers will be allowed to automatically pass on changes in the cost of transporting Alaska gas to their own customers. This is a discussion of the approval of the Alaska Natural Gas Sale and Use Tax. Some form of automatic tracking may be necessary to avoid delay and reduce risks to the shippers and investors. However, the issues concerning the gas sales contracts and shipper tariffs are not the subject of this report and will not be discussed further.

This report covers two primary subjects. The first is an analysis of the major issues and alternative provisions in the project company tariffs. The second major subject of this report is the project sponsors' proposed tariff. The issues where there is substantial disagreement are discussed in the various parties presented at the proceeding including the recommendations of the ALJ, a separate hearing officer to the Commission. However, the issues concerning the shipper tariffs are not the subject of this report and will not be discussed further.

The specific procedure followed in the FPC proceeding accepted the need for a cost-of-service form of rate because of the greater assurance it would give to financial investors that the cost of the project would be recovered without delay and that adequate funds would be available to cover operating costs, debt service, and the other fixed obligations of the pipeline. However, there was substantial disagreement about the precise form of this tariff, and these issues are discussed below.

Charges Prior to Completion of the System

During the FPC proceedings, two concepts were advanced that could result in charges to gas consumers prior to completion of the

This report will describe the risks during operation for which the Operation Phase Rate must provide compensation and will compare the magnitude of these risks with the rates borne by investors in regional pipelines in the lower 48 states. The form of the pipeline tariff allowed by the Commission, however, will play a key role in determining the magnitude of these risks.

II. RESOLVED TARIF ISSUE

Cost of Service Tariff

In the FPC proceeding, the sponsors of the three competing gas projects, the Commission Staff, most other interested parties, and the ALJ concurred that the cost-of-service form of project tariff was required for private financing of this project instead of the more conventional fixed rate tariff. Later the Commission, in its Comments on the December Order, concurred in principle that the cost-of-service form of tariff. All tariffs for a regulated utility are based on the cost of rendering service but differ in circumstances and procedures to be used to alter the rates charged for the service when costs increase or decrease.

Under a fixed rate tariff, a regulatory agency allows the utility to charge a schedule of rates based on the estimated cost of rendering service. This schedule of rates is then changed until a new proceeding is conducted before the agency, and the agency allows the schedule to be altered. 1

Under a cost-of-service form of tariff, the costs change the regulatory agency allows the utility to adjust its charges on a periodic basis in accordance with a formula set forth by the agency. The formula specifies the costs that can be recovered under the tariff, the accounting procedures to be followed in determining the schedule of rates, rates or return allowed on the investment, depreciation rates, and other parameters necessary for determining the cost of service. The agency also may audit the costs recovered to assure their reasonableness and prudence.

Many tariffs are in fact a mixture of the fixed rate and cost of service. Interstate gas pipelines generally are required to use a fixed rate tariff, yet can usually pass through automatically changes in the unit cost of purchased gas without filing a major rate change in which a complete cost of service study is submitted and illigated.

In general the various parties in the FPC proceeding accepted the need for a cost-of-service form of rate because of the greater assurance it would give to financial investors that the cost of the project would be recovered without delay and that adequate funds would be available to cover operating costs, debt service, and the other fixed obligations of the pipeline. However, there was substantial disagreement about the precise form of this tariff, and these issues are discussed below.

Costs of Service Tariff

In the FPC proceeding, the sponsors of the three competing gas projects, the Commission Staff, most other interested parties, and the ALJ concurred that the cost-of-service form of project tariff was required for private financing of this project instead of the more conventional fixed rate tariff. Later the Commission, in its Comments on the December Order, concurred in principle that the cost-of-service form of tariff. All tariffs for a regulated utility are based on the cost of rendering service but differ in circumstances and procedures to be used to alter the rates charged for the service when costs increase or decrease.

This report will describe the risks during operation for which the Operation Phase Rate must provide compensation and will compare the magnitude of these risks with the rates borne by investors in regional pipelines in the lower 48 states. The form of the pipeline tariff allowed by the Commission, however, will play a key role in determining the magnitude of these risks.

1 The specific procedure followed by the Commission for gas pipelines is the following. The pipeline files a new schedule, which goes into effect within six months of filing depending on whether and for how long the tariffs exceed the new schedule. The schedule is subject to adjustments during the process of a final Commission order thereon.
project. The first was some form of an "all events" tariff which would require gas consumers to pay a fee, surcharge, or other capital charges to customers adds to financial requirements of the project. In the President's Decision concerning billing commencement date:

1. Shippers may begin when all segments of the project are complete and gas is being transported. (In the event of "prebuilding" the southern segments may begin for these segments in advance of completion of the other segments.)

2. Charges may begin when all segments are capable of rendering service even if, for whatever reason, gas is not being transported. (In the event of "prebuilding" the southern segments to carry Alberta gas, charges may begin for these segments in advance of completion of the other segments.)

3. Charges may begin for each particular segment of the system when that segment is capable of rendering service even if, for whatever reason, other segments are not capable of transporting service or gas is not being transported.

4. Charges may begin at a date certain to be specified by the Commission even if none of the segments is capable of rendering service or gas is not being transported.

The President's Decision seemed to favor definition I (all segments complete and transporting gas). This definition would clearly satisfy the fundamental requirement that the facilities have been tested and the facilities being used in service even if, for whatever reason, they are not being transported.

With respect to definitions I and II, the phrase "completion and commissioning of operation of the system" must be read in conjunction with the predelivery of Alaskan gas using Alberta gas for transportation through the system. The Commission staff seemed to favor definition I (all segments complete and transporting gas) as the one providing a solid foundation to the Alaska natural gas transportation system at any time prior to the completion of all segments of the system. The Commission staff would favor definition I (all segments complete and transporting gas) to the completion and commissioning of operation of the system. (President's Decision, pp. 37-38).

The exact definition of the phrase "completion and commissioning of operation", however, has not yet been specified and is discussed in the next section.

III. CONTROVERSIAL TARIFF ISSUES
Billing Commencement Date

As discussed in the previous section, the President's Decision limits charges to customers for the project prior to the "completion and commissioning of operation of the system." A major issue for the Commission is to define the conditions under which the project will be completed. In the President's Decision, the completion and commissioning of operation of the system will be specified when the system is capable of rendering service even if, for whatever reason, other segments are not capable of transporting service or gas is not being transported. The Commission staff seemed to favor definition I (all segments complete and transporting gas) as the one providing a solid foundation to the Alaska natural gas transportation system at any time prior to the completion of all segments of the system. The Commission staff would favor definition I (all segments complete and transporting gas) as the complete and commissioning of operation of the system. (President's Decision, pp. 37-38).

The exact definition of the phrase "completion and commissioning of operation", however, has not yet been specified and is discussed in the next section.

III. CONTROVERSIAL TARIFF ISSUES
Billing Commencement Date

As discussed in the previous section, the President's Decision limits charges to customers for the project prior to the "completion and commissioning of operation of the system." A major issue for the Commission is to define the conditions under which the project will be completed. In the President's Decision, the completion and commissioning of operation of the system will be specified when the system is capable of rendering service even if, for whatever reason, other segments are not capable of transporting service or gas is not being transported. The Commission staff seemed to favor definition I (all segments complete and transporting gas) as the one providing a solid foundation to the Alaska natural gas transportation system at any time prior to the completion of all segments of the system. The Commission staff would favor definition I (all segments complete and transporting gas) as the complete and commissioning of operation of the system. (President's Decision, pp. 37-38).

The exact definition of the phrase "completion and commissioning of operation", however, has not yet been specified and is discussed in the next section.
expected to pay for their contractual share of the cost of service of the pipeline when the facilities are rendered serviceable. In other words, full charges to shippers would commence when the pipeline was complete even though throughput may be at reduced levels or even if it was not being transported. Also marketability of the gas could be impaired by the high initial cost. However, it must be noted that the pipeline is only a contract carrier for the shippers and is not a purchaser of Alaska gas. If investors in the pipeline are held responsible for the transportation charge and probability is small that they will be able to render service when the pipeline is able to render service, their risk is substantially increased.

A major criticism of Alcan's proposal is that it would assist in financing. The threat of a long period of either no revenue or only partial revenues after construction was complete increases the total financial investment in the project and postpones payment of principal and interest on the debt. Also rate or phase-in charges increase ultimate costs to consumers by increasing financing charges or AFUDC in the rate base and the Operation Phase Rate.

The ALJ found the interim rate proposal superior (Initial Decision, p. 406). However, again his decision was in the context of assumed consumer or government investment guarantees. In light of the much more difficult task of financing this project resulting from the FPC's recent Commission changes, the Commission must examine very carefully the implications for financing in its consideration of this matter.

Penalty for Service Interruption

Almost without exception all parties to the proceedings including the project sponsors agreed to some form of penalty to equity investors. The critics argued that the penalty would reduce the ability of the pipeline to render service is reduced below 100 percent of the contracted quantities, in other words, no levy or cushion should be allowed before the penalty takes effect. Judge Litt compromised on a level of 90 percent between the sponsors request for 95 percent and the staff's recommendation of 100 percent (Initial Decision, p. 408). The ALJ further would restrict the period of make-up transportation to no more than one year as opposed to the sponsors request for an unlimited period for make-up of the deficiency in transportation and return on equity. A much more controversial modification to the project tariff, however, was recommended by the ALJ. Based on his belief that equity investors should be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities, he stated that "... it may be necessary to modify the cost-of-service tariff of the transporter to assure that collection of the depreciation charge does not recover equity capital during periods of prolonged continuous outage. A 'grace period,' not to exceed 30 days, for example, would be appropriate, after which the opportunity to recover equity capital would be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities."

The ALJ recommended accelerating the loss in equity return when the pipeline suffered no loss in return on equity, that the pipeline would be transported first and then the quantities for which the pipeline did suffer a reduction in return on equity. The Commission staff argued that the liability of pipeline operations is such that a penalty to equity return should begin when the ability of the pipeline to render service is reduced below 100 percent of the contracted quantities, in other words, no levy or cushion should be allowed before the penalty takes effect. Judge Litt compromised on a level of 90 percent between the sponsors request for 95 percent and the staff's recommendation of 100 percent (Initial Decision, p. 408). The ALJ further would restrict the period of make-up transportation to no more than one year as opposed to the sponsors request for an unlimited period for make-up of the deficiency in transportation and return on equity. A much more controversial modification to the project tariff, however, was recommended by the ALJ. Based on his belief that equity investors should be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities, he stated that "... it may be necessary to modify the cost-of-service tariff of the transporter to assure that collection of the depreciation charge does not recover equity capital during periods of prolonged continuous outage. A 'grace period,' not to exceed 30 days, for example, would be appropriate, after which the opportunity to recover equity capital would be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities."

The ALJ's recommendation would greatly reduce the loss in equity return when the pipeline suffered no loss in return on equity. However, if the pipeline capacity was reduced to less than 80 percent over a one month period, for example, 70 percent, then the ALJ recommended that the pipeline capacity would be reduced proportionately, for example, reduced to 70 percent of its normal level for that month. After a service interruption, the pipeline would have an unlimited period to try to recover the loss in equity return by transporting more than the contracted quantity if the pipeline were willing to tender excess quantities. The make-up quantities for which the pipeline suffered no loss in return on equity would be transported first and then the quantities for which the pipeline did suffer a reduction in return on equity.

The Commission staff argued that the liability of pipeline operations is such that a penalty to equity return should begin when the ability of the pipeline to render service is reduced below 100 percent of the contracted quantities, in other words, no levy or cushion should be allowed before the penalty takes effect. Judge Litt compromised on a level of 90 percent between the sponsors request for 95 percent and the staff's recommendation of 100 percent (Initial Decision, p. 408). The ALJ further would restrict the period of make-up transportation to no more than one year as opposed to the sponsors request for an unlimited period for make-up of the deficiency in transportation and return on equity.

A much more controversial modification to the project tariff, however, was recommended by the ALJ. Based on his belief that equity investors should be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities, he stated that "... it may be necessary to modify the cost-of-service tariff of the transporter to assure that collection of the depreciation charge does not recover equity capital during periods of prolonged continuous outage. A 'grace period,' not to exceed 30 days, for example, would be appropriate, after which the opportunity to recover equity capital would be subject to the risk of a complete loss of their investment in the event of a prolonged inability of the project to transport gas at the contracted quantities."

The arguments either for or against these alternatives did not seem especially compelling. The arguments either for or against these alternatives did not seem especially compelling. The arguments either for or against these alternatives did not seem especially compelling.
A category of risks is, in effect, a categorization of those events that could cause the realized rate to deviate from the allowed rate above or below the allowed rate for some period of time. Until the Commission action increases pipeline costs as well as other costs, there seems a greater probability that actual costs will be above estimated costs and this would result in rates below the allowed. The cost-of-service tariff for the Alaska gas project provides a high degree of protection against this risk. The variance in rates resulting from fluctuating costs is somewhat less for the Alaska gas pipeline compared to the typical pipeline.

Changes in Throughput

Unanticipated changes in throughput will result in changes in costs of service per unit of throughput and may alter the revenues and earned rates of return depending upon the form of the tariff. The Alaska gas project will differ substantially from lower 48 pipelines both in the events that could cause a fluctuation in throughput and the tariff treatment of the fluctuation.

A pipeline can experience a decline in throughput either from some production problem in the field that temporarily or permanently reduces daily deliverability or from the exhaustion of proven reserves without sufficient new discoveries to offset them. The Alaska gas pipeline derives its supply from a number of different fields and reservoirs, it is not likely that the pipeline would experience a major decline in throughput because of field dryout or field size problems. However, the Alaska gas project will be supplied primarily by the enormous reserves at Prudhoe Bay. There is little production experience for this reservoir, and there is a small probability that the field may not be able to produce at the level of 2.4 BCFD anticipated in the Decision (p. 89). Further, all gas will be processed and conditioned at a single facility which could experience operating problems. A decline in throughput to reserve depletion has a much higher probability of occurring for a lower 48 pipeline than for the Alaska gas project. In recent years the trend for most lower 48 pipelines has been declining production. Prudhoe Bay, on the other hand, has adequate reserves for at least 20 years of production at the rate of 2.4 BCFD.

If a decline in throughput occurs, a lower 48 pipeline could experience a temporary reduction in return on equity while the Commission is reviewing an application for a temporary increase in rates. The lag in applying for and receiving a rate increase, however, the period of suspension for rate increases imposed by the Commission is usually five months or less. On the other hand, pipeline tariffs utilize a demand charge to recover a portion of the fixed costs of the pipeline. This demand charge is not reduced due to a reduction in throughput, thus mitigating the reduction in revenues return on equity. The cost-of-service tariff for the Alaska gas project will eliminate any regulatory lag and thus provide a high degree of protection against the risk of decline in throughput.

Though the Commission will allow rates to increase as throughput declines for both lower 48 pipelines and the Alaska gas project.
... eventually marketability problems may arise. A concern often voiced by lower 48 pipeline companies is the declining revenue to production ratios may result in lower levels of throughput and thus an inability to recover their investment in the given pipeline. The Alaska gas project faces similar problems, and the offshore Alaska gas project has been approved by the Federal Energy Regulatory Commission. The Office of Regulatory Analysis from the Commission's staff has argued that the Commission has increased allowed rates of return by 2.5 percent points in recent years to compensate for this risk (see Comments on the Revised Notice, pp. 5-6).

The Alaska gas project will also face a similar or even larger risk because of the high costs of transportation. If production problems should occur at Prudhoe Bay, the cost-of-service tariff will allow an automatic increase in cost per unit of throughput. However, shippers and distributors may find it difficult to recover the transportation costs for the Alaska gas even at full throughput will be substantially higher than other gas because of the large construction costs.

In conclusion, the risk of declining throughput due to reserve depletion is higher for the conventional lower 48 pipeline, the risk of declining throughput due to production or deliverability problems is greater for the Alaska gas pipeline, the cost-of-service tariff for the Alaska gas project provides greater protection against the risk of declining throughput, but marketability problems resulting from reduced throughput are greater for the Alaska gas. On balance it seems that the risk to investors due to fluctuations in throughput are modestly greater for lower 48 pipelines.

Service Interruption

All pipelines face the possibility that operating difficulties may reduce the capacity of the pipeline to transport gas. For a conventional lower 48 pipeline, the financial penalty for a severe service interruption can be large. A reduction in the amount of gas that can be delivered reduces revenues but less than in proportion to the reduction in throughput due to the demand charge in the typical lower 48 pipeline. If a pipeline is long, the pipeline service interruption could request a rate increase to allow charges on the remaining throughput to cover the cost of service.

This penalty for service interruption seems substantially more severe than contemplated for the Alaska gas pipeline by the project sponsors. As discussed previously, the project sponsors propose a service interruption provision in the tariff that would only reduce equity return proportionately to the service interruption and only for that segment which experienced the service interruption.

On the other hand, the probability of a service interruption on the Alaska gas project seems much higher than for the typical lower 48 pipeline. The Alaska gas pipeline will be traversing a new environment for which there is little operating experience. Problems of frost heave, thaw settlement, weather induced and continual operation of the pipeline could mean a much greater incidence of service interruption. Also the Alaska gas pipeline will be traversing a new environment for which there is little operating experience.

The Alaska gas project seems much higher than for the typical lower 48 pipeline with its built-in redundancy and duplication of components.

In conclusion, the penalty for service interruption is much higher for lower 48 pipeline than for the Alaska gas pipeline. The high operating costs of transportation result in the gas being unmarketable and thus the companies are unable to recover the costs through a cost-of-service tariff approved by the Commission.

Marketability Problems

A basic element of the financing plan for the Alaska gas project is the construction of a chain of contracts and other legal obligations that assures the flow of revenues from the ultimate consumer of natural gas, through the distribution companies and the interstate pipelines who are the shippers of the gas, and back to the project itself. However, there is a risk that events we can only barely imagine now might break that chain and cause a reduction in revenues to the project below that necessary to cover the full cost of service. In such an event, the equity investors would be the first to experience a reduction in return.

The most likely event that could cause a reduction in revenues is if it becomes difficult to market or sell the gas in face of competition from other energy sources. Pipeline depletion reduces this risk but does not eliminate it. Over the next 25 years, a sudden breakthrough in energy technology (e.g., the result of a discovery by the example of an event that could endanger the marketability of the Alaska gas. This is a risk that is substantially greater for the Alaska gas project than for conventional lower 48 pipelines because of the higher transportation costs for Alaska gas.

Equity Capitalization

Though not strictly a risky event that could reduce or increase rates of return, the capital structure of the project plays an important role in determining the risk to equity investors. A small proportion of equity in the capital structure, i.e., a low equity ratio, means that any fluctuations in revenues due to any of the events described above would be multiplied into a large fluctuation in return to equity. Debt service and the interest spread also play a role in determining the equity ratio.

In conclusion, the penalty for service interruption and the risk of marketability problems are greater for the conventional lower 48 pipelines than for the Alaska gas pipeline. The Alaska gas project seems much higher than for the typical lower 48 pipeline with its built-in redundancy and duplication of components.

On balance it seems that the risk to investors due to fluctuations in throughput are modestly greater for lower 48 pipelines.

ENVIRONMENTAL PROTECTION AGENCY

APPLICATION FOR METHYL TERTIARY BUTYL ETHER

Decision of the Administrator

I. INTRODUCTION

Section 211(f) of the Clean Air Act (Act), 42 U.S.C. 7545(f) (1977) contains prohibitions and limitations on the introduction into commerce of controlled fuels and fuel additives.1 Section 211(f) makes it unlawful upon March 31, 1977 * for any manufacturer of any fuel or fuel additive to introduce into commerce, or to increase the concentration in use of any fuel or fuel additive for general use in light duty motor vehicles.

Footnotes continued on next page
tion 211(f)(1) prohibits, after March 31, 1977, any manufacturer from first introducing into commerce or increasing the concentration in use of any fuel or fuel additive. Section 211(f)(3) prohibits any manufacturer which first introduced into commerce or increased the concentration in use of any controlled fuel or fuel additive between January 1, 1974 and March 31, 1977, from distributing such fuel or fuel additive in commerce after September 15, 1978.

Waivers may be obtained for any of the section 211(f) prohibitions or limitations. Section 211(f)(4) provides that the Administrator of the Environmental Protection Agency (EPA), upon application of any manufacturer of a fuel or fuel additive, may grant a waiver if he determines that the applicant has established that the fuel or fuel additive, or a specified concentration thereof, and the emission products of such fuel or fuel additive or specified concentration thereof, will not cause or contribute to the failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. The 180 day review period for the ARCO application expires February 24, 1979.

Although not required, a public hearing \(^2\) on this application was held on September 6, 1978, in Washington, D.C., and the thirty day comment period following the hearing ended on October 6, 1978.

II. SUMMARY OF THE DECISION

I have determined that ARCO has met the burden under section 211(f)(4) necessary to obtain a waiver for MTBE in the concentration range of 0 to 7 volume percent.\(^3\)

ARCO and other interested parties have submitted data on MTBE primarily at concentrations of 3 and 7 volume percent. I find that the data presented on MTBE in the concentration range of 0 to 7 volume percent and the emission products of MTBE when used in this concentration range will not cause or contribute to the failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act.

I, therefore, grant the waiver request allowing the introduction into commerce of MTBE in unleaded gasoline in the concentration range of 0 to 7 volume percent provided the volatility properties of the unleaded gasoline containing MTBE are within the limits of the American Society for Testing and materials (ASTM) unleaded gasoline specifications.\(^4\)

III. METHOD OF REVIEW

In order to obtain a waiver for MTBE in the concentration range of 0 to 7 volume percent, the applicant must establish that MTBE in that concentration range does not cause or contribute to the failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act.

The burden, which Congress has imposed upon the applicant if interpreted literally, is virtually impossible to meet as it requires the proof of a negative proposition, i.e., that no vehicle will fail to meet emission standards with respect to which it has been certified. Taking literally, it was required to test the failure of every vehicle. Recognizing that Congress contemplated a workable waiver provision some mitigation of this stringent burden was deemed necessary. For purposes of the waiver provision, it is recognized that reliable statistical sampling and fleet testing protocols could safely be used to demonstrate that a fuel or fuel additive will not cause or contribute to failure of emission standards by vehicles in the national fleet.

Data submitted with respect to a waiver request are analyzed by appropriate statistical methods in order to characterize the effect that a fuel or fuel additive will have on emissions. The statistical tests applied to the emission data provided in support of this MTBE waiver request are: a Paired Difference Test, Sign of Difference Test, and a test which compares the mean differences. If the result of the statistical tests utilized to characterize the emissions effect of MTBE is interpreted literally, is virtually impossible to meet as it requires the proof of a negative proposition, i.e., that no vehicle will fail to meet emission standards with respect to which it has been certified. Taking literally, it was required to test the failure of every vehicle. Recognizing that Congress contemplated a workable waiver provision some mitigation of this stringent burden was deemed necessary. For purposes of the waiver provision, it is recognized that reliable statistical sampling and fleet testing protocols could safely be used to demonstrate that a fuel or fuel additive will not cause or contribute to failure of emission standards by vehicles in the national fleet.

Data submitted with respect to a waiver request are analyzed by appropriate statistical methods in order to characterize the effect that a fuel or fuel additive will have on emissions. The statistical tests applied to the emission data provided in support of this MTBE waiver request are: a Paired Difference Test, Sign of Difference Test, and a test which compares the mean differences. If the result of the statistical tests utilized to characterize the emissions effect of MTBE is interpreted literally, is virtually impossible to meet as it requires the proof of a negative proposition, i.e., that no vehicle will fail to meet emission standards with respect to which it has been certified. Taking literally, it was required to test the failure of every vehicle. Recognizing that Congress contemplated a workable waiver provision some mitigation of this stringent burden was deemed necessary. For purposes of the waiver provision, it is recognized that reliable statistical sampling and fleet testing protocols could safely be used to demonstrate that a fuel or fuel additive will not cause or contribute to failure of emission standards by vehicles in the national fleet.

The following is a brief description of the statistical tests utilized to characterize the emissions effect of MTBE:

(1) THE PAIRED DIFFERENCE TEST

For each vehicle tested on a base gasoline and an MTBE-containing fuel, the difference between the MTBE fuel emissions and the base fuel emissions was calculated. A 90% confidence interval was constructed for the mean difference. If the confidence interval lies entirely below zero it is indicative of no adverse effect from MTBE. If the interval contains zero, there is arguably no difference between the base fuel and the MTBE containing fuel with regard to emissions provided the confidence interval is small.

Another application for MTBE, for a concentration range of 5 to 15 volume percent, was filed by Petro-Tex Chemical Corporation on June 20, 1978. This waiver request was denied by the Administrator on December 28, 1978. The denial of the waiver request was based on an insufficient amount of data to establish that MTBE in the concentration range of 5 to 15 volume percent did not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standard with which it has been certified. The decision was not made on the effects of MTBE on vehicle emissions. See 44 Fed. Reg. 1447 (1979).

Another application for MTBE, for a concentration range of 5 to 15 volume percent, was filed by Petro-Tex Chemical Corporation on June 20, 1978. This waiver request was denied by the Administrator on December 28, 1978. The denial of the waiver request was based on an insufficient amount of data to establish that MTBE in the concentration range of 5 to 15 volume percent did not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standard with which it has been certified. The decision was not made on the effects of MTBE on vehicle emissions. See 44 Fed. Reg. 1447 (1979).

Footnotes continued from last page manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act.)\(^5\)

\(^2\)Another application for MTBE, for a concentration range of 5 to 15 volume percent, was filed by Petro-Tex Chemical Corporation on June 20, 1978. This waiver request was denied by the Administrator on December 28, 1978. The denial of the waiver request was based on an insufficient amount of data to establish that MTBE in the concentration range of 5 to 15 volume percent did not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standard with which it has been certified. The decision was not made on the effects of MTBE on vehicle emissions. See 44 Fed. Reg. 1447 (1979).

\(^3\)See, "Gasohol and MTBE Waiver Request: Public Hearing." 43 Fed. Reg. 36665 (1978). The public record (record no. MSID-2110-MTBE) is available for public inspection in the Public Information Reference Unit, Environmental Protection Agency, Room 2222, 401 M Street, S.W., Washington, D.C. 20460. This record contains all the information considered in this decision.

\(^4\)In determining whether an applicant has established his burden, the Administrator may look at all of the available data including data provided by persons other than the applicant.

(2) THE SIGN OF DIFFERENCE TEST

For each vehicle tested with a base gasoline and an MTBE containing fuel, the sign of the emission difference between MTBE fuel emissions and base fuel emissions was ascertained. This test is designed to determine whether the number of vehicles demonstrating an increase (+) in emissions with MTBE significantly (at a 90% confidence level) exceeded those showing a decrease (−) in emissions with MTBE.

(3) THE DETERIORATED EMISSIONS TEST

For each vehicle, the effect MTBE had on emissions was determined. This incremental effect, either positive or negative, was added to the 50,000 mile certification emission value for the certification emission vehicle which the test vehicle represented. This incremented 50,000 mile emission value was compared to emissions standards to determine whether the vehicle met the standards. Either a pass or fail was assigned accordingly. The pass/fail results were analyzed using a one-sided sign test.1

The first two methods of analysis are designed to determine whether the fuel or fuel additive has an adverse effect on emissions as compared to the base fuel. Each characterizes a different aspect of adverse effects. The Paired Difference Test determines the mean difference in emissions between the base fuel and the additive containing fuel. The Sign of Difference Test assesses the number of vehicles indicating an increase or decrease in emissions. The two tests are considered together in evaluating whether an adverse effect exists to assure that a mean difference determination is not unduly influenced by very high or very low emission results from only a few vehicles.

The Deteriorated Emissions Test analysis indicates whether the fuel or fuel additive causes a vehicle to fail to meet emission standards. This test examines each vehicle's emission performance as compared to each pollutant standard.2 It is useful to perform this analysis even if the first two analyses indicate the fuel or fuel additive has no adverse effect. The analysis indicates whether the emissions from any particular type of vehicles or specific emission control technologies are uniquely sensitive to the fuel or fuel additive, thus causing vehicles to fail to meet standards. This effect could be masked in the previous analyses which consider the emissions results as a group without distinguishing the emissions impact on subgroups.

An alternative to providing the amount of data necessary to meet the statistical requirements, is to make judgments based upon a reasonable theory regarding emissions effect supported by confirmatory testing. If there exists a reasonable theory which predicts the emission effect of a fuel or fuel additive, an applicant only needs to conduct a sufficient amount of testing to demonstrate the validity of such theory. This theory and confirmatory data are the basis from which the Administrator may exercise his judgment on whether the fuel or fuel additive will cause or contribute to the failure of any vehicle to meet emission standards or a system to achieve compliance by the vehicle with emission standards.

IV. NATURE OF THE TEST DATA

The varying nature of fuels and fuel additives may alter the type of testing required to determine whether such fuels or fuel additives cause or contribute to the failure of vehicles to comply with emission standards. A fuel or fuel additive which is expected to have only an instantaneous emission effect on a vehicle could be judged by comparing back-to-back emission tests on the same vehicle.3

It is possible that a fuel or fuel additive may operate to cause both an instantaneous increase and an increased deterioration of emission control systems or devices. If so, then both durability emissions data and instantaneous emissions data may be required. Upon examination of the available data on material compatibility and the chemistry of MTBE, EPA has concluded that 50,000 mile durability testing data are not essential to this waiver decision.4 A reasonable estimate of a test vehicle's emissions performance on MTBE can be obtained using back-to-back emission test data in lieu of requiring 50,000 mile durability testing.5

V. ANALYSIS

A. EXHAUST EMISSIONS

Exhaust emission data were submitted on 17 vehicles tested on a base fuel and a fuel containing 3% MTBE and 35 vehicles tested on a base fuel and a fuel containing 7% MTBE.6 When vehicles tested on the base fuel meet standards and fail to meet standards when tested on the MTBE containing fuel, MTBE is deemed to cause the failure of vehicles to meet standards. When vehicles fail to meet standards on the base fuel and the MTBE containing fuel, and the MTBE containing fuel is shown to have an adverse effect on emissions as compared to the base fuel, MTBE is deemed to contribute to the failure of vehicles to meet standards.

Summarized below are the results of three statistical tests at concentrations of 3% and 7% MTBE. Tests 1 and 2 are designed to determine whether MTBE has an adverse effect on emission levels. Test 3 is designed to determine whether MTBE causes vehicles to fail to meet standards.

1. The Paired Difference Test

Listed below are the 90% confidence intervals around the mean difference between the base fuel and the MTBE containing fuel emission level.

a. 3% MTBE Fuel

(1) Hydrocarbon (HC) -0.09 to 0.06
(2) Carbon Monoxide (CO) -1.77 to 0.11
(3) Oxides of Nitrogen (NOx) -0.08 to 0.09

b. 7% MTBE Fuel

(1) HC -0.10 to 0.09
(2) CO -2.78 to 0.83
(3) NOx -0.13 to 0.01

2. The Sign of Difference Test

Confidence that an MTBE containing fuel will cause an increase in emissions was determined by a statistical test of material compatibility. The section of the Material Compatibility and the judgment that the emissions effect of MTBE is of an instantaneous, not a deteriorative nature.

ARCO and Texaco, Inc. did provide limited durability test data. The results were supportive of our judgment that 50,000 mile test data should not be required. See, MSED-211(4)-MTBE-3 (ARCO) and MSED-211(0)-MTBE-5 (ARCO). A discussion of these data can be found in the Characterization Report at 10.

See, Table 1 in the Characterization Report for a description of the vehicles utilized in the test programs. One vehicle was tested on a 5% MTBE fuel. One test vehicle is not subject to any conclusions of the effect of MTBE. There were also data submitted at 10% and 15% MTBE, but since these were all concentrations outside of this waiver request they are not included in this decision. All data submitted are discussed in the Characterization Report.
sions over the base fuel based on the observed increases out of the total vehicles tested (in parentheses) are stated below.

a. 3% MTBE Fuel
   (1) HC (5/16) 3.84% confidence of an increase
   (2) CO (6/17) 7.17% confidence of an increase
   (3) NOx (4/17) 0.64% confidence of an increase

b. 7% MTBE Fuel
   (1) HC (10/32) 1.00% confidence of an increase
   (2) CO (7/35) 0.01% confidence of an increase
   (3) NOx (13/34) 6.10% confidence of an increase

3. Deteriorated Emissions Test

Listed below are the number of vehicles whose incremented 50,000 mile emission values exceeded emission standards.

a. 3% MTBE Fuel
   (1) HC none out of 17
   (2) CO none out of 17
   (3) NOx none out of 17

b. 7% MTBE Fuel
   (1) HC 1 out of 35
   (2) CO none out of 35
   (3) NOx

The results of tests 1 and 2 for the 3% MTBE containing fuel indicate that NOx emissions decrease and there is no adverse effect on HC and CO emissions. The results for the 7% MTBE containing fuel indicate that NOx and CO emissions decrease and HC emissions are not adversely affected.

The results of the third test indicate that the 3% MTBE fuel caused no vehicles to exceed emission standards when emissions deterioration for 50,000 miles was included in the analysis. The results for a 7% MTBE fuel show that one vehicle did not comply with emission standards when emissions deterioration for 50,000 miles was included in the analysis.

Because tests 1 and 2 for both the 3% and the 7% MTBE containing fuels show no adverse effect on emissions as a group and test 3 shows that no vehicles exceeded standards for the 3% MTBE fuel and only 1 out of 35 vehicles is caused to exceed standards for the 7% MTBE fuel (6 vehicle failures out of 35 vehicles would be required to fail this test), we conclude that MTBE from 0 to 7% volume percent does not cause or contribute to the failure of vehicles to meet exhaust emission standards.

In accordance with standard procedures, all tied cases are dropped from the analysis and the sample size is correspondingly reduced. See, Siegel, S., Nonparametric Statistics, 1956.

B. EVAPORATIVE EMISSIONS

ARCO theorized that evaporative emissions are directly related to volatility characteristics and that fuels blended with MTBE have final volatility characteristics similar to present commercially available gasoline. ARCO performed a test program to confirm this theory. It tested six fuels with volatility properties within the ASTM unleaded gasoline specifications. The fuels, including two fuels blended with 7% MTBE, were chosen to provide a range of volatility. The test program demonstrated that when the volatility properties of the gasoline containing MTBE are within the ASTM specifications, its evaporative emission performance is no worse than the evaporative emissions of the commercially available fuels of similar volatility. The volatility of commercially available gasoline varies over a substantial range.

It would be discriminatory to require an applicant's fuel or fuel additive to meet a more stringent volatility limit in order to confine evaporative HC emissions than is characteristic of commercially available fuels. Thus, MTBE will not be considered to cause or contribute to the failure of emission control devices or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the evaporative emission standard if its volatility is within the ASTM specifications for automotive gasoline. If the volatility of gasoline were to eventually be regulated, then MTBE or any other fuel or fuel additive would have to comply with the regulatory requirements.

Consequently, unleaded fuel containing MTBE with volatility properties within ASTM gasoline specifications will not cause or contribute to the failure of emission control device or system (over the useful life of any vehicle on which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to Section 206 of the Act.

C. TECHNICAL ISSUES

1. Materials Compatibility

The issue of materials compatibility has been raised by several parties.

Data submitted by ARCO and SunTech, Inc. indicated that MTBE at concentrations of 10% and below does not pose a materials compatibility problem. Texaco reported that after four weeks of submersion of metallic and non-metallic fuel system parts in a 10% MTBE fuel, no incompatibility problems were found. Texaco also reported that no discernable incompatibility of MTBE with non-metallic parts arose during their 20,000 miles mileage accumulation test on six vehicles.

2. Driveability

The issue of driveability was raised by Ford and General Motors (GM). Poor driveability caused by a fuel or fuel additive could impact emissions either through engine malfunction or misadjustment of engine components in an effort to improve driveability.

Significant driveability problems solely attributable to a fuel or fuel additive should not occur if the fuels are manufactured to meet marketing standards. In fact, Ford stated that potential driveability problems could be "offset with blending adjustments." I, therefore, conclude that driveability is not a significant problem with regard to emissions.

VI. FINDINGS AND CONCLUSIONS

I have determined that ARCO has established that MTBE, in a concentration range of 0 to 7 volume percent, and the emission products thereof will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to Section 206 of the Clean Air Act.

The Atlantic Richfield Company requests a waiver of the section 211(d) prohibitions and limitations on the introduction into commerce of MTBE is hereby granted. This waiver allows the introduction into commerce of MTBE in unleaded gasoline in the concentration range of 0 to 7 volume percent.

CHARACTERIZATION REPORT

ANALYSIS OF FUEL CONTAINING METHYL TERTIARY BUTYL ETHER (MTBE) TO CHARACTERIZE THE IMPACT OF 0% TO 7% CONCENTRATION OF MTBE ON EMISSIONS PERFORMANCE

February 1979

Technical Support Branch, Mobile Source Enforcement Division, Office of Mobile Source and Noise Enforcement, U.S. Environmental Protection Agency

Summary

This paper presents a summation and analysis of the data presented in support of an application from the Atlantic Richfield Company for a waiver of the limitation and prohibition from use of methyl tertiary butyl ether (MTBE) in a 0-7% concentration in unleaded fuel. Included are a description of the sources of test data, the statistical analysis of the data, and a discussion of the conclusions drawn.

Sources of Data

EPA has received back-to-back FTP exhaust emissions data on thirty-two oxidation catalyst vehicles (30 Federal, 2 California), and three California three-way catalyst vehicles tested at 0-7% MTBE concentration in gasoline from the following sources: Atlantic Richfield Company (ARCO), Texaco Incorporated, Shell Oil Company, General Motors, and the Mobil Oil Corporation. Additional test data for higher concentrations were received from the above sources and from the Ford Motor Company, and AMOCO Oil Company. A description of each vehicle tested in each program is contained in Table 1.

Atlantic Richfield, in support of its waiver request for the use of up to 7% MTBE has submitted back-to-back FTP data on sixteen 1976 or later model vehicles. Of these, thirteen vehicles (11 Federal, 2 California) were equipped with oxidation catalysts and three California vehicles were equipped with three-way catalysts. The base fuel for all but three of the Federal oxidation catalyst vehicles was unleaded ARCO fuel. The vehicle tested on this base fuel were also tested on a fuel blended with 7% MTBE having characteristics similar to the base fuel. Nine of these vehicles were also tested on a fuel blended with 3% MTBE having characteristics similar to the base fuel.

The remaining three 1976 Federal oxidation catalyst vehicle were tested for evaporative and tailpipe emissions on a low volatility fuel and a low volatility fuel blended with 7% MTBE, and a high volatility base fuel and a high volatility fuel blended with 7% MTBE.

Mobil Oil Corporation submitted exhaust and evaporative emissions data on one 1978 and one 1979 (Federal) oxidation catalyst vehicle. Each car was tested on an unleaded Mobil fuel and a fuel blended with 7% MTBE having characteristics similar to the base fuel.

Texaco has submitted data on eight 1976 and 1979 Federal oxidation catalyst vehicle comparing FTP emissions on an unleaded Texaco base fuel versus fuel with concentrations of 3% MTBE and 7% MTBE, having characteristics similar to the base fuel. In support of an earlier waiver application, Texaco submitted data on three 1976 and 1978 Federal oxidation catalyst vehicles comparing emissions on the unleaded base fuel and a fuel blended with 10% MTBE having similar characteristics to the base fuel.

Shell Oil Company submitted data on nine 1978 and 1979 Federal oxidation catalyst vehicles. The fuels were a Shell unleaded base and a fuel blended with 7% MTBE having similar characteristics to the base fuel. Shell also submitted results on four 1979 or later vehicles—three Federal vehicles equipped with oxidation catalysts and one California vehicle with a three-way catalyst—fuel with a Shell unleaded fuel and a fuel blended with 10% MTBE having similar characteristics to the base fuel.

General Motors has submitted data on four 1976 vehicles: two vehicles (1 Federal, 1 California) equipped with oxidation catalysts and two vehicles (1 California, 1 developmental) equipped with three-way catalysts. The base fuel was indolene. Test data were reported for MTBE concentrations of 5%, 10%, and 15% added to indolene on one vehicle and 15% for three other vehicles. In addition, evaporative results were provided on two vehicles.

AMOCO submitted data on two 1977 Federal vehicles equipped with oxidation catalysts. These vehicles were tested on unleaded AMOCO and a fuel blended with 10% MTBE having characteristics similar to the base fuel.

Ford Motor Company tested eight 1976 or later vehicles on Indolene and indolene with 10% MTBE added. Four test vehicles (1 California, 3 developmental) were equipped with three-way catalysts. The four remaining vehicles (3 Federal, 1 California) were equipped with oxidation catalysts.

NOTICES

Analytic Procedures

This section reviews several procedures designed to examine the effects of MTBE on fuel emissions compared to base fuels. They are:

1. Paired difference test
2. Sign of difference test
3. Comparison of deteriorated emissions with standards

Each test was applied to data for a specific technology group and percent of MTBE contained in the fuel and data source. One technology group consists of oxidation catalyst vehicles and three-way catalyst vehicles designed to meet Federal standards of 1.5, 15, and 2.0 grams per mile for HC, CO and NOx respectively (hereafter, Federal vehicles). The other technology group consists of oxidation catalyst vehicles and three-way catalyst vehicles designed to meet California standards of .41, 9.0 and 15.5 grams per mile for HC, CO and NOx, respectively, and some developmental vehicles designed to similar lower emission levels (hereafter, Future vehicles). Sample sizes, means, variances, standard deviations and a fuel code reference for each vehicle are listed in Appendix.

1. Paired difference test. For each vehicle tested on a base fuel and an MTBE containing fuel (hereafter, MTBE fuel), the differences between the MTBE fuel emissions and the base fuel emissions were calculated. A 90% confidence interval was constructed for each of these differences.

This method of establishing 90% confidence intervals on the mean difference implicitly assumes emissions follow a normal distribution. While this requirement may not be exactly met, the method is robust enough to withstand some deviation from the normality assumption. This interval can be interpreted as: In approximately 90 experiments out of 100, one is confident that the interval so constructed would include the true value of the mean emission difference (i.e., MTBE fuel effect). If the resulting entire interval is below zero it is indicative of a decrease in emissions from MTBE; if the entire interval is above zero, it is indicative of an increase in emissions from MTBE.

If the interval contains zero, there is an additional reason, emissions, between the base fuel and MTBE fuel emission levels provided this interval is reasonably small. Since the length of the confidence interval can be large in the case of a small size, any interval containing zero must be sufficiently small that its upper limit does not exceed 10% of the applicable emission standard.

The one vehicle which was tested on 5% MTBE is not subject to these statistical tests because data cannot be performed on a single data point.

Hydrocarbon, carbon monoxide and nitrogen oxides respectively.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
ard to reasonably content that no increase in emissions has occurred.

In order to assure that intervals covering zero are small enough, sufficient samples must be taken. Since the interval length varies inversely with the sample size, an increase in sample size would decrease the interval length. If the interval length were sufficiently small, one of three possible results could occur.

(i) The entire interval would lie below zero.

(ii) The interval would include zero and the upper limit would be lower than 10% of the applicable emission standard; or

(iii) The entire interval would lie above zero. In general, the result is dependent on the location of the sample mean. Any of the three results would permit a definitive conclusion to be drawn. Hereafter, the situation in which a confidence interval includes zero, but has an upper limit above 10% of the applicable standard will be referred to as having "insufficient data to reach a definitive conclusion".

Therefore, this procedure considers an increase in emissions from MTBE fuel to exist when this confidence interval lies entirely above zero. A lack of an increase in emissions is said to exist if it contains zero while the upper limit does not exceed 10% of the applicable standard. A decrease in emissions is said to exist if the confidence interval is entirely below zero. For the purpose of this procedure, replicate tests on any one vehicle and fuel were averaged to provide a single data point in the analyses. Each vehicle carried an equal weight in the determination of the confidence interval.

The results of this procedure are shown in Table 2. The results for Federal vehicles are summarized below:

(a) All sources with 3% MTBE—HC and CO emissions did not increase; NOx emissions decreased.

(b) All sources with 7% MTBE—HC emissions did not increase; CO and NOx emissions decreased.

(c) All sources with 10% MTBE—HC and CO emissions did not increase; NOx emissions decreased.

(d) All sources with 15% MTBE—insufficient data to construct any interval.

For Future vehicles, the results are summarized by:

(a) All sources with 3% MTBE—HC, CO, and NOx did not increase.

(b) All sources with 7% MTBE—HC and CO emissions did not increase; insufficient data to reach a definitive conclusion for NOx emissions.

(c) All sources with 10% MTBE—insufficient data to reach a definitive conclusion for HC emissions; CO emissions decreased; NOx emissions did not increase.

(d) All sources with 15% MTBE—insufficient data to reach a definitive conclusion.

For a combination of technology groups (Federal and Future vehicles), the results are summarized by:

(a) All sources with 5% MTBE—HC and CO emissions did not increase; NOx emissions decreased.

(b) All sources with 7% MTBE—HC emissions did not increase; CO and NOx emissions decreased.

(c) All sources with 10% MTBE—HC and CO emissions did not increase; CO emissions decreased.

(d) All sources with 15% MTBE—HC emissions did not increase, CO emissions decreased; insufficient data to reach a definitive conclusion for NOx emissions.

Thus, the Federal vehicles on 3% MTBE fuel show no increase in HC and CO emissions while NOx emissions decreased. On 7% MTBE fuel show no increase in HC emissions while CO and NOx emissions decreased.

Future vehicles on 3% MTBE fuel show no increase in HC, CO and NOx emissions. On 7% MTBE fuel show HC and CO emissions did not increase while NOx emissions data was insufficient to draw a conclusion.

The combined Federal and Future vehicles on 5% MTBE show HC and CO emissions decreased; NOX emissions decreased, and on 7% MTBE show HC emissions did not increase while CO and NOx emissions decreased.

(2) Sign of difference tests. For each vehicle tested with a base fuel and an MTBE fuel, the sign of the emission difference between MTBE fuel emissions and base fuel emissions was ascertained. The sign of these differences was considered in a nonparametric test was designed to determine whether the number of cars demonstrating an increase (+) or decrease (−) in emissions with MTBE fuel significantly (at a 95% confidence level) exceeded those showing a decrease (−) in emissions with MTBE fuel.

In each test for each pollutant, the null hypothesis was that the median difference between MTBE fuel emission levels attributable to MTBE fuel, the alternative hypothesis for HC, CO, and NOx was that the median emission level for MTBE fuel was higher than that of the base fuel.

The number of vehicles for which an increase in emissions was observed was calculated for each MTBE fuel concentration and technology group. If there were no real differences in emission levels attributable to MTBE fuel, the expected proportion of instances in which an increase between fuels would occur for any pollutant would be 0.5. Thus, a large proportion of observed increases in emission levels for a pollutant would indicate an increase in emissions from MTBE fuel. Similarly, a small proportion of increases in emission levels would indicate a positive effect of MTBE fuel.

Table 3 shows the results of this procedure. At concentrations of both 3% MTBE and 7% MTBE, HC, CO, and NOx emission levels did not indicate an increase in these pollutants for Federal vehicles, Future vehicles or the combination of both groups.

(3) Comparison of deteriorated emissions with standards. In order to determine whether MTBE fuel would cause the failure of any vehicle to meet emission standards during its useful life, a one-sided sign test to evaluate compliance using projected 50,000 mile emission levels was performed.2 This statistical procedure assumes that the difference in emission levels between the base fuel and MTBE fuel for a particular vehicle either remains constant or becomes larger over the useful life of the vehicle.

Projected 50,000 mile emission levels for each nondevelopmental test vehicle (on which EPA had received sufficient vehicle identification information) were obtained by using average Federal Test Procedure (FTP) results and 50,000 mile emission reductions.

The test was designed such that the risk of failing would be at least 90% if 25% or more of the represented fleet failed to meet Federal emission standards for the particular MTBE fuel considered.24 The risk of failing this procedure is high for small sample sizes but decreases as sample size increases.

2Projected 50,000 mile data were used rather than 50,000 mile durability testing on the judgment that the emissions effect of MTBE is manifest instantaneously. Texaco performed a limited durability test program using six 1978 Chevrolets and six different fuel combinations. Texaco ran these vehicles for 20,000 miles on a dynamometer Road Simulator Test (designed to simulate the average consumer driving environment). Texaco concluded that 10% MTBE versus three non-MTBE fuels did not reduce the catalytic activity of the catalytic converter. See, MSED 2110-3. ARCO also performed a limited durability test on four vehicles. ARCO accumulated 4,000 miles and projected the emissions at 50,000 miles using the EPA certification deterioration factors. The mileage was accumulated using a vehicle containing 5% MTBE. ARCO reported that the projected 50,000 mile emissions were below the applicable standards. However, ARCO used the deterioration factor of a limited number of vehicles determined during certification. These DFs were determined on a mileage accumulation test fuel not containing MTBE. The deterioration test project used mileages projected the emissions indicated no significant difference between MTBE and base fuel. See, MSED 2110-22-5.

The power curves and table of critical values for this test are shown in Appendix 2.
creases when the sample size is increased. Under this procedure, the critical number (the smallest number of projected test failures for a given sample size which would constitute a failure of the criterion) for a sample size of 8 would be one. A sample of less than 8 would be insufficient to apply the procedure.

Thus, for samples of size 8, if one vehicle failed to meet emission standards with its projected 50,000 mile value, the review criterion was a failure.

This procedure was evaluated for each MTBE fuel and technology group. It was applied as follows: For each nondevelopmental vehicle for which EPA had received sufficient vehicle information, the 50,000 mile emissions levels were obtained from the certification test results for its configuration. The difference between average emissions levels for the MTBE fuel and base fuel were added to these levels to obtain projected 50,000 mile levels. These projected levels were then compared to emissions standards to which the vehicle was designed. A failure was recorded when a projected level exceeded the appropriate standard. Table 4 displays the results of this procedure.

This comparison resulted in one California oxidation catalyst vehicle failing HC at 7% MTBE concentration. In all other categories, there were no failing vehicles. For Federal vehicles there were sufficient sample sizes for both 3% MTBE and 7% MTBE concentrations and thus the review criterion was not failed. The number of Future vehicles for any concentration was not sufficient to apply this test.

Combining both Federal and Future vehicles and applying this procedure to the aggregated sample, only one vehicle tested at 7% MTBE failed HC and all other vehicles passed. Thus, the aggregate sample also satisfies the criterion.

Evaporative Emissions

Evaporative emission data on three vehicles tested on several fuels having a range of volatility meeting ASTM-D 439 were provided by ARCO. Two General Motors and two Mobil vehicles were also tested for evaporative emissions on fuels of different volatility meeting ASTM-D 439 requirements.

In theory, evaporative losses from the vehicles are directly related to fuel volatility. Therefore, a linear regression of evaporative losses versus volatility for all fuels (including MTBE fuels) was performed to determine whether the MTBE fuel fits that theory. To the extent that correlation is shown for 7% MTBE fuels, it is expected that fuels containing 0-7% MTBE will have evaporative emission performance within the range of evaporative emission performance of commercially available fuels.

Patterson, D. J., Emissions From Combustion Engines and their Control, 1972, pg. 60.

Hurn, R. W., Effect of Fuel Front-End and Mid-Range Volatility on Automobile Emissions. E17797.

Figure 1 plots the evaporative emission data and shows the results of this procedure. The relationship between evaporative losses and volatility is positive, and agrees with the technical theory.

Conclusions

From the sign of difference test analysis, there is virtually no confidence of an HC, CO, or NOx increase for either 3% MTBE or 7% MTBE.

The paired difference test shows, for 3% MTBE concentrations, that HC and NOx emissions did not increase and NOx emissions decreased. In the case of 7% MTBE concentrations, HC emissions did not increase and CO and NOx emissions decreased. Thus, use of MTBE in concentrations of 3% and 7% appears to have no significant adverse effect on HC, CO and NOx emissions in both Federal and Future vehicles.

The third procedure, comparing deteriorated emissions with the standards, demonstrates that MTBE fuels cause one California oxidation catalyst vehicle in the test sample to exceed applicable emission standards. Further, the regression analysis performed to assess the evaporative emission performance comports with the theory that increasing volatility leads to increasing evaporative losses. The MTBE fuels had similar volatility characteristics and evaporative emissions as the other fuels meeting ASTM-D 439 tested in this program. In addition, vehicle evaporative emissions on both the base fuels and the MTBE fuels were below the evaporative emission standard.

* For purposes of analysis, this test was designed such that the risk of being denied a waiver would be at least 90% if 25% or more of the represented fleet fails to meet emission standards. This approach is related to the approach applied to the vehicle manufacturers under the vehicle assembly line selective enforcement audit procedures. While a more conservative 20% noncompliance rate has been used in some past characterization analyses, 25% is more consistent with the selective enforcement audit procedures.
Legend

\(N\) = Sample Size

\(C\) = Critical Value (fail standard of review if \(C\) or more out of \(N\) observations fail certification standards at projected 50,000 mile emissions levels)

Probability of Failing the Standard of Review for Different Sample Sizes and Critical Values versus the True Proportion in the Fleet Failing Certification Standards

sheet shows current assets of $22,888, including liquid assets of $8,488, these

are offset by current liabilities in the sum of $14,457, leaving only $8,431

available. Moreover, the loan commitment letter from the First National

TOWN AND COUNTRY BROADCASTING COMPANY OF TUPelo, INC.

In re applications of Superior Broadcasting Co., Inc., Baldwyn, Mississippi,

BC Docket No. 79-26, File No. BPH-10,009, Requests: 95.9 MHz, Channel

240; 3 kW (H&E); 300 ft., for construction permits.

1. The Commission, by the Chief of the Broadcast Bureau, acting pursuant
to delegated authority, has before it the above-captioned applications which
are mutually exclusive in that they seek the same facilities in Bald-

3. Superior will require $39,246 to construct and operate its proposed sta-
tion for three months, without reliance on revenues, itemized as follows:

1. To determine with respect to Superior Broadcasting Co., Inc., the other

media interests of Mr. J. Boyd Ingram and Mr. O. T. Robinson, and the
effect, if any, on the applicant’s basic and/or comparative qualifications.

2. To determine with respect to Superior: (a) The source and availability

of additional funds over and above the $8,357 indicated, and (b) in light of the

evidence adduced pursuant to (a) above, whether the applicant is finan-

cially qualified.

3. To determine with respect to Town and Country Interviewed leaders of labor

in connection with its ascertainment effort.

5. To determine which of the proposals would on a comparative basis

better serve the public interest.

6. Data submitted by the applicants indicates that there will be a signifi-
cant difference in the size of the areas and populations which would receive

service from the proposals. Consequently, for the purposes of the Commis-

sion, the areas and populations which would receive FM service of 1 mV/m or

greater intensity, together with the availability of other primary and aux-

ciliary services in such areas, will be consid-

ered under the standard comparative

issue to determine whether a compara-
tive preference should accrue to either

of the applicants.

7. Except as indicated by the issues specified below, the applicants are

qualified to construct and operate as proposed. However, since the propos-

as are mutually exclusive, they must be designated for hearing in a consoli-

dated proceeding on the issues specified

below.

2. To determine with respect to Superior (b) the effect of the

application that representatives of labor were consulted, but our review of

the application reveals no one who can be considered as a leader of this

significant community element. For this reason, a limited ascertainment issue

will be specified.

To meet this requirement, applicant relies on cash on hand of $10,000 and a

loan from a banking institution of $75,000. Although Superior’s balance

sheet shows current assets of $22,888, including liquid assets of $8,488, these

are offset by current liabilities in the sum of $14,457, leaving only $8,431

available. Moreover, the loan commitment letter from the First National

Bank of Clarksdale, has expired by its terms, and Mr. J. Boyd Ingram has

failed to provide evidence of his will-

ingness to assign his stock in the appli-

cant (which is licensee of Station WJLB, Clarksdale, Mississippi), grant a

lien on the assets of the proposed sta-
tion, or personally endorse the loan, as

required by the loan commitment letter. Finally, the equipment credit

line fails, to indicate that a prelimi-

nary credit check has been made. Ac-

cordingly, a limited financial issue will

be required.

3. Town and Country Broadcasting

Company of Tupelo, Inc. (Town and

struct and operate its proposed station

for three months, without reliance on

revenues, itemized as follows:

4. To determine whether the applicant is finan-

cially qualified.

5. Except as indicated by the issues

specified below, the applicants are

qualified to construct and operate as

proposed. However, since the propos-

als are mutually exclusive, they must

be designated for hearing in a consoli-

ified below.

6. Accordingly, it is ordered, That

issues:

1. To determine with respect to Su-

prior to the Chief of the Bureau

on the above-captioned applications

which are mutually exclusive in that

they seek the same facilities in Bald-

wyn, Mississippi.

2. To determine with respect to Su-

1. Superior’s application states that 36,572

persons within an area of 637 square miles

would be encompassed within its 1.0 mV/m

primary service contour, whereas Town and

Country indicates its proposed station

would provide primary service to 52,012

persons within an area of 668 square miles.
to § 1.221(c) of the Commission's rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order,

[6730-01-M]

FEDERAL MARITIME COMMISSION

AGREEMENT FILED

Notice is hereby given, that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 78 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 1043; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by March 16, 1979. Any person desiring a hearing on the proposed agreement shall provide a copy of the agreement, and a statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

A copy of any comments should also be forwarded to the party filing the agreement and the statement should indicate that this has been done.

Summary: Agreement No. T-3759-1.

Filing party: Lyme R. Feldman, Assistant City Attorney, Office of the City Attorney, City of Richmond, California.

Summary: Agreement No. T-3759-1 between the City of Richmond (City) and Canal Industrial Park, Inc. (CIP) modifies the basic agreement to sever the preference for the City on the wharf area for its own use as a container terminal. This modification adjusts certain language in the basic agreement in order that the rights of the City of Richmond are preserved. This basic agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by March 16, 1979. The City of Richmond and Sea-Land have entered into basic agreements which provide for the City's use on the premises and shall charge each vessel a reasonable fee for services performed in its capacity as the terminal operator and stevedore.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

[FPR Doc. 79-5988 Filed 3-5-78; 8:45 am]

[6730-01-M]

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 78 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the statement should set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Summary: Agreement No. 5200-34.

Filing Party: David C. Nolan, Esq., Graham & James, One Maritime Plaza, San Francisco, California 94111.

Summary: Agreement No. 5200-34 amends the basic agreement of the Pacific Coast European Conference by adding specific language (1) which establishes uniform rules for the handling of delinquent lists, and (2) which revises the service requirement for refrigerated carriers.

Summary: Agreement No. 8054-18.

Summary: Agreement No. 8054-18, among the members of the South and East Africa/U.S.A. Conference would extend the conference's intermodal authority indefinitely or for at least two years from its present expiration date of April 5, 1979.

Summary: Agreement No. 10109-2.

Filing party: Marc J. Fink, Esquire, Billig, Sheh, Fink, James, 7 of 7 South Street, 2033 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 10109-2 modifies the basic agreement of the U.S. Atlantic and Gulf Coast Non-Container Carriers Discussion Agreement to extend the duration of the agreement beyond May 2, 1979 until terminated by agreement of the parties or by operation law.

Summary: Agreement No. T-1768-10.

Filing party: Stanley P. Hebert, Port Attorney, Port of Oakland, 66 Jack London Square, Oakland, California 94607.

Summary: Agreement No. T-1768-10, between the City of Oakland and Sea-Land Services, Inc. (Sea-Land), modifies the parties' basic agreement which provides for the preferential assignment of certain marine terminal facilities to Sea-Land. The basic agreement as previously amended by T-1768-8, provides in paragraph 30(b) for the payment to Sea-Land of 35 percent of terminal charges collected by the port from secondary users either when such secondary use is by the port involves cargo passing over the wharf upon the assigned premises in a direct, continuous, and uninterrupted movement without the cargo coming to a point of rest within the assignment premises, or when such use involves cargo coming to a point of rest within the assigned premises within the assignment premises after passing over the wharf upon the assigned premises. Agreement No. T-1768-10 further amends paragraph 30(b) to provide that in the event any such secondary use involves the use of only the ship berth area upon the assigned premises for the berthing of a vessel with the cargo being loaded or discharged through the vessel's

GENERAL SERVICES ADMINISTRATION

[GS Bulletin FPR 36]

FEDERAL PROCUREMENT

To: Heads of Federal agencies.

Subject: List of basic agreements available for use by executive agencies.

1. Purpose. This bulletin lists the current basic agreements of executive agencies which are available for use in the acquisition of research and development from educational institutions and nonprofit organizations in fiscal year 1979.

2. Expiration date. The information contained in this bulletin is of a continuing nature and will remain in effect until canceled.

3. Background.

(a) Recommendation B-11 of the Commission on Government Procurement provided as follows: "Encourage the use of master agreements of the grant and contract types, which when executed should be used on a work order basis by all agencies and for all types of performers." The Commission based this recommendation on the observation that time and effort could be saved by both the Government and the performers of research and development through the use of prenegotiated terms and conditions allowing for new or additional work to be contracted for on a work order basis.

(b) After extensive study of the recommendation, the General Services Administration and the Department of Defense determined that the purposes of the recommendation would best be served by encouraging the use of basic agreements with educational institutions and nonprofit organizations.

(c) Section 1-3.410-2(e) of the FPR now provides for the publication of FPR bulletins listing the basic agreements of executive agencies on a fiscal year basis as reported by those agencies. This is the third listing of such agreements.

4. Guidance. Attachment A indicates a current list of institutions and organizations which have entered into basic agreements with executive agencies. Each institution is listed alphabetically together with a code number which identifies the agency concerned. Attachment B lists agency contact points which may be used to obtain copies of and information concerning the current applicability of the various basic agreements.

DALE R. BABAINE, Assistant Administrator for Acquisition Policy.

BASIC AGREEMENTS WITH EDUCATIONAL INSTITUTIONS AND NONPROFIT ORGANIZATIONS, FISCAL YEAR 1979

NOTE.—Where a specific basic agreement number and/or date is cited, the buying office should verify its current applicability. For a copy of or information concerning a particular basic agreement, identify the contractor and its code number and locate the contact point on Attachment B.

[4110-88-M] DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

BOARD OF SCIENTIFIC COUNSELORS, NIH

Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix 1), the Alcohol, Drug Abuse, and Mental Health Administration announces the renewal by the Secretary of Health, Education, and Welfare, with the concurrence of the General Services Administration Committee Management Secretariat, of the Board of Scientific Counselors, NIH.

Authority for this committee will expire January 4, 1981, unless the Secretary formally determines that continuation is in the public interest.

GERALD L. KLEIEMAN, Administrator, Alcohol, Drug Abuse and Mental Health Administration.

IFR Doc. 79-6514 Filed 3-5-79; 8:45 am

[4110-03-M] Food and Drug Administration

[Docket No. 78N-00182]

MEDICAL DEVICES

Availability of Generic Device Name Index for Classification Regulations

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The agency is announcing the availability of an index of generic names of medical devices used in proposed classification regulations.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
NOTICES

The generic device name index will assist in finding the specific classification regulation for a device classified by more than one classification panel.

ADDRESS: The generic device name index for classification regulations is available from the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Robert S. Kennedy, Bureau of Medical Devices (HFK-401), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7900.

SUPPLEMENTARY INFORMATION: The Medical Device Amendments of 1976 (Pub. L. 94-295, 90 Stat. 539-553), amending the Federal Food, Drug, and Cosmetic Act (52 Stat. 1040 et seq. (21 U.S.C. 301 et seq.)) became law on May 28, 1976. Section 513 of the act (21 U.S.C. 360c) requires the Commissioner of Food and Drugs to classify medical devices into one of three regulatory control classes: class I, general controls; class II, performance standards, and class III, premarket approval. The agency is in the process of publishing in the FEDERAL REGISTER proposed classification regulations along with the recommendations of the various medical device classification panels. This first group of proposed classification regulations will be published in the FEDERAL REGISTER.

The agency is reviewing the classification recommendations of the various device classification panels that are organized by medical specialty areas. This review will determine if a generic device name can be used by several medical specialties under different device brand or descriptive names, causing the device to be reviewed by more than one classification panel. When this is the case, the agency will publish only one proposed classification regulation for the generic name device.

The index that FDA is making available pursuant to this notice is correct as of date of publication. Additional changes in device classification names may still occur before final classification regulations are published. If the need arises, FDA will update the index and publish another notice to announce its availability.

The index shows the device classification and Listing Product Code for each device covered by a classification panel, along with the corresponding generic device name and classification panel with whose classification regulations the classification of that device will be published in the FEDERAL REGISTER. A copy of the index has been placed on public file in the office of the Hearing Clerk (address below) and may be seen in that office from 9 a.m. to 4 p.m., Monday through Friday.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Regulatory Affairs.

[4110-03-M]

TRANSFER OF ADMINISTRATIVE RESPONSIBILITY FOR OPHTHALMIC HARD CONTACT LENS SOLUTIONS. PREVIOUSLY CONSIDERED OVER-THE-COUNTER DRUGS

Implementation

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces that the Food and Drug Administration (FDA) has transferred administrative responsibility for over-the-counter (OTC) ophthalmic hard contact lens solutions to the Bureau of Medical Devices. In addition, all related data and information developed by, or submitted to, the Advisory Review Panel on OTC Ophthalmic Drug Products have been transferred to the Bureau of Medical Devices. This action was taken to implement the Medical Device Amendments of 1976, under which several products previously regarded as drugs now come within the definition of a medical device intended for human use.

FOR FURTHER INFORMATION CONTACT:

Joseph L. Hackett, Bureau of Medical Devices (HFK-403), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7900.

SUPPLEMENTARY INFORMATION: On December 16, 1977 (42 FR 63472), FDA issued a notice of implementation of the transitional provisions of the Medical Device Amendments for articles previously considered new drugs or antibiotic drugs. The notice explained the transitional provisions of the amendments; listed generic types of medical devices previously regarded as drugs, explained which of these types are to be subject to premarket approval requirements, indicated which bureau in FDA regulates the drugs, and explained how manufacturers and importers can petition for changes in the regulatory classification of medical devices intended for human use. In this notice, FDA stated that ophthalmic lens cleaning (sterilizing) solutions and wetting agents for hard contact lenses were previously considered drugs which premarket approval was not required, but now fall within the definition of "device."

This document announces that FDA has transferred the administrative responsibility for OTC hard contact lens solutions from the Bureau of Drugs to the Bureau of Medical Devices. In addition, FDA has transferred to the Bureau of Medical Devices the responsibility of reviewing a summary of the findings of the Advisory Review Panel on OTC Ophthalmic Drug Products on the safety, effectiveness, and labeling of these hard contact lens solutions and wetting agents. The Panel has emphasized that the summary is not a definitive review but is only a compilation of its work papers on the subject through September 16, 1978. This summary has been appended to the minutes of the meetings of the Advisory Review Panel on OTC Ophthalmic Drug Products for the minutes of the meetings held on December 15 and 16, 1978. The summary has been prepared independently of FDA and does not necessarily represent the agency's position. The Bureau of Medical Devices will, however, consider this summary in making decisions about the regulation of hard contact lens solutions and wetting agents.

The data and information on hard contact lens solutions and wetting agents that were submitted to FDA in response to the April 26, 1973 notice have been transferred to the Bureau of Medical Devices. Persons who sub-
mitten data or information on these products to the Panel will be notified by letter of the transfer.

Dated: February 27, 1979,

WILLIAM P. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-6586 Filed 3-5-79; 8:45 am]

[4110-03-M]

TRANSFER OF RESPONSIBILITY FOR REVIEW OF OVER-THE-COUNTER DRUG PRODUCTS FOR THE TREATMENT OR PROPHYLAXIS OF DANDRUFF OR SEBORRHEA

Implementation

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has transferred responsibility for the review of over-the-counter (OTC) drug products for the treatment or prophylaxis of dandruff or seborrhea from the Advisory Review Panel on OTC Antimicrobial (ID) Drug Products to the Advisory Review Panel on OTC Miscellaneous External Drug Products. Data and information developed by, and all submissions to, the Advisory Review Panel on OTC Miscellaneous External Drug Products regarding drug products or active ingredients recommended for this use will be transferred to the Advisory Review Panel on OTC Miscellaneous External Drug Products.

FOR FURTHER INFORMATION CONTACT:

William E. Gilbertson, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION:

In a notice published in the Federal Register of December 16, 1972 (37 FR 26842), FDA requested the submission of data and information on antimicrobial active ingredients for the treatment or prophylaxis (prevention) of specific disorders including dandruff and seborrhea. The data and information received in response to the notice were submitted to the FDA Advisory Review Panel on OTC Antimicrobial (ID) Drug Products for review under the procedures in § 330.10 (21 CFR 330.10) for classifying OTC drugs as generally recognized as safe and effective and not misbranded, and for establishing monographs.

In notices published in the Federal Register of November 16, 1973 (38 FR 31697), and August 27, 1975 (40 FR 38179), FDA requested the submission of data and information on miscellaneous external drug products including those used for hair growers, psoriasis, and sebume hair loss. The August 27, 1975 notice was published because the response to the November 16, 1973 notice was inadequate. The data and information received in response to these two notices were submitted to the FDA Advisory Review Panel on OTC Miscellaneous External Drug Products for review under the procedures in § 330.10 (21 CFR 330.10). Because there is a considerable amount of overlapping of ingredients and data between the two panels in their review and consideration of agents for the treatment or prophylaxis of dandruff, seborrhea, and psoriasis, a reviewer of all ingredients by one panel would save much time and effort.

Therefore, FDA has concluded that it would greatly facilitate the review of these drug products if active ingredients for the treatment or prophylaxis of dandruff, seborrhea, and psoriasis reviewed by the same advisory review panel. After carefully considering the schedules, workloads, and available expertise of both panels, the agency has determined that this review should be the responsibility of the Advisory Review Panel on OTC Miscellaneous External Drug Products. Members of the Advisory Review Panel on OTC Antimicrobial (ID) Drug Products may be invited to serve as consultants to the Advisory Review Panel on OTC Miscellaneous External Drug Products if their assistance is needed for those overlapping ingredients that have an antimicrobial action.

This notice therefore announces that FDA has transferred the review responsibility for drug active ingredients for the treatment or prophylaxis of dandruff and seborrhea from the Advisory Review Panel on OTC Antimicrobial (ID) Drug Products to the Advisory Review Panel on OTC Miscellaneous External Drug Products. All data and information on drug active ingredients for the treatment or prophylaxis of dandruff and seborrhea submitted in response to the December 16, 1972 notice that were submitted to the Advisory Review Panel on OTC Miscellaneous External Drug Products are being transferred and need not be resubmitted.

Persons who submitted data and information on these products and ingredients will be notified by letter of the transfer to the Advisory Review Panel on OTC Miscellaneous External Drug Products.

WILLIAM P. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

Health Care Financing Administration

PHARMACEUTICAL REIMBURSEMENT BOARD

Maximum Allowable Cost Limits For Certain Drugs: Closing of the Record

AGENCY: Health Care Financing Administration (HCFA), HEW.

ACTION: Notice.

SUMMARY: The comment periods for the following drugs will close on 15 days after the date of publication: (1) amoxicillin 250 and 500 mg capsules and amoxicillin oral solution 125 and 250 mg/5cc; (2) hydrochlorothiazide 25 and 50 mg tablets; and (3) erythromycin (base) 250 tablets.

FOR FURTHER INFORMATION CONTACT:

Peter Rodler Executive Secretary, Pharmaceutical Reimbursement Board, 3076 Switzer Building, 330 C Street S.W., Washington, D.C. 20201 202-472-3620.

SUPPLEMENTARY INFORMATION:

1. On August 21, 1978 the Pharmaceutical Reimbursement Board (Board) announced proposed MAC limits and a public hearing on October 18 and 19, for amoxicillin 250 and 500 mg capsules and amoxicillin oral solution 125 and 250 mg/5cc. (See 43 FR 40547-8). We later extended the comment period in order to review claims of patent infringement with regard to amoxicillin (See 43 FR 58102-3). We now find it necessary to reopen the record and extend the comment period until (15 days from date of publication) in order to include in the record the FDA response to a drug quality issue raised during the comment period. The purpose of this notice is to inform interested persons that the FDA analysis has been received and is now available for inspection in the Office of Pharmaceutical Reimbursement, Room 3076 Switzer Building, 330 C Street, S.W., Washington, D.C. 20201. Those who wish to have their comments on the FDA analysis included in the record must submit them by March 21, 1979.

2. In reference to hydrochlorothiazide and erythromycin, the Board announced proposed MAC limits and a public hearing (See 43 FR 40547-8 and 43 FR 38941). On October 27, 1978 FDA informed us that "in light of the data we have recently received through the Board from Upjohn and directly from Merck regarding the quality of marketed hydrochlorothiazide and erythromycin products, we

NOTICE

Notice is hereby given that the National Park Service has prepared an assessment of alternatives on the request to withdraw 0.75 million gallons of water per day from within Cape Cod National Seashore between April 1 and November 30, 1979.

The assessment document is available from or may be inspected at the Superintendent's Office, Cape Cod National Seashore, South Wellfleet, MA 02663 or the North Atlantic Regional Office, 15 State Street, Boston, MA 02109.

The assessment presents the two courses of action available to the National Park Service; namely, either to grant or to deny Provincetown's request to withdraw up to 0.75 million gallons of water a day from a test well located within Cape Cod National Seashore in the Town of Truro, Massachusetts. Both of the alternatives are evaluated in terms of the various impacts each would create upon the resource values of the national seashore and its immediate environs.

Written statements regarding the assessment of alternatives are invited and should be addressed to the Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663.

The official record for writing comments will close on April 7, 1979.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
Dated: March 1, 1979.

DANIEL J. TOBIN, Jr., Associate Director, Management and Operations.

National Park Service

[Order No. 77, Amendment No. 81]

REGIONAL DIRECTORS

Delegation of Authority

Order No. 77, approved February 27, 1973, and published in the Federal Register of March 22, 1973 (39 FR 7478), as amended, set forth in Section 1 the exceptions on delegations of authority, and in Section 2 certain limitations on redelegation of authority.

Section 1, paragraph (7) is hereby amended to read as follows:

Section 1. **(7)** Authority to substantively modify approved standard language of concession contracts and other concession related contracting documents. Section 2 is hereby amended by adding paragraph (6) as follows:

Section 2. Delegation. **(a)** Authority to execute, amend, approve assignment of, or terminate concession contracts may not be redelegated.

**(b)** Authority to execute, amend, approve assignment of sales, or terminate concession permits of five (5) years duration or more, or when anticipated annual gross receipts will amount to $100,000 or more, may not be redelegated.

**(c)** Authority to execute concession contracts or concession permits of five (5) years duration or longer, or when anticipated annual gross receipts will amount to $100,000 or more, shall be exercised only after the proposed contracts and/or permits are submitted to the Director for transmittal to the Committee on Interior and Insular Affairs sixty (60) days prior to award.

**(d)** Authority to execute, amend, approve assignments or sales, or terminate concession permits of under five (5) years duration, or when anticipated annual gross receipts will amount to less than $100,000, may be redelegated only to Superintendents.

This Amendment becomes effective March 6, 1979.

DANIEL J. TOBIN, Jr.,
Acting Director.

MARCH 2, 1979.

[FR Doc. 79-6698 Filed 3-5-79; 8:45 am]

NOTICES

[4310-84-M]

Office of the Secretary

ALASKA REGIONAL TECHNICAL WORKING GROUP COMMITTEE

Notification of Advisory Committee Vacancy (Discretionary Secretary Appointment)

Committee: Alaska Regional Technical Working Group Committee, Outer Continental Shelf Advisory Board.

Purpose: To advise the Secretary, through the Director, Bureau of Land Management, on technical matters of regional concern relating to the Outer Continental Shelf (OCS) oil and gas leasing programs in the Alaska region.

Specifically, the Committee will provide recommendations and information regarding pre-lease sale activities, including tract selection, environmental statement preparation, stipulation development, oil and gas Applicant studies, and transportation management plans.

Number of Vacancies: 17.

Date of Vacancy: March 6, 1979.

Total Number of Advisory Committee Members: 4.

Length of Term: 2 years.

Compensation: $500 travel per diem for attendance at meetings.

Qualifications: Appointees will be selected to achieve a balance in terms of points of view, and on the basis of technical or other expertise relevant to OCS-related activities. Applicants for membership should have a familiarity with the OCS oil and gas programs including leasing, the OCS Lands Act, as amended, the Coastal Zone Management Act, as amended, and should be capable of dealing with specific technical problems of production and transportation of offshore oil and gas. Appointees should also have experience in or a working understanding of interagency coordination at the Federal or State level and should possess competence in one or more of the following disciplines:

- Geology
- Oceanography
- Transportation Planning
- Land-use Planning
- Economics
- Outdoor Recreation
- Terrestrial-Wildlife
- Fisheries Biology
- Engineering
- Marine Biology

Remarks: The Regional Technical Working Groups (RTWG's) represent one of three types of committees of the OCS Advisory Board which has been restructured under a new charter. The restructured Board includes, in addition to the RTWG's, a National Scientific Committee, and a National Policy Committee. The RTWG's are being established in each of the six OCS leasing regions and are the forum which will be used in the operation of the Intergovernmental Planning Program for OCS Oil and Gas Leasing, Transportation and Related Facilities (IPF). The IPF is a new program of technical level coordination and planning to be administered by the Bureau of Land Management. The RTWG's will be the focus of the IPF and will be comprised of representatives from the States within the leasing region; regional representatives from the Bureau of Land Management, U.S. Geological Survey, U.S. Fish and Wildlife Service, Environmental Protection Agency, and the National Oceanic and Atmospheric Administration; representatives from the petroleum industry, and other private and special interests.

Note: This vacancy announcement is for recruitment of private sector members only. State and Federal agency members will be nominated by the Governors of the respective States and affected Federal agency heads.

Letters of recommendation should be accompanied by resumes and should be directed to Mr. Frank Gregg, Director, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240. The final date for receipt of applications will be April 1, 1979. For additional information with regard to this committee vacancy, contact Mr. Bert Rodgers, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240. Telephone: A/C 202-343-6264.

We encourage the identification of female and minority candidates.

FRANK GREGG,
Director, Bureau of Land Management.

Approved: March 1, 1979.

GUY R. MARTIN,
Assistant Secretary of the Interior.

MID- ATLANTIC REGIONAL TECHNICAL WORKING GROUP COMMITTEE

NOTIFICATION OF ADVISORY COMMITTEE VACANCY,
(DISCRETIONARY SECRETARIAL APPOINTMENT)

Committee: Mid-Atlantic Regional Technical Working Group Committee, Outer Continental Shelf Advisory Board.

Purpose: To advise the Secretary, through the Director, Bureau of Land Management, on technical matters of regional concern relating to the Outer Continental Shelf (OCS) oil and gas leasing program in the Mid-Atlantic region (including the States of New York, New Jersey, Pennsylvania, Delaware, Maryland, and Virginia).

Specifically, the Committee will provide recommendations and information regarding pre-lease sale activities, including tract selection, environmental statement preparation, stipulation development, regional environmental studies, and transportation management plans.

Number of Vacancies: 16.

Date of Vacancy: March 6, 1979.

Total Number of Discretionary Secretarial Appointments: 4.

Length of Term: 2 years.

Compensation: Travel/per diem for attendance at meetings.

Qualifications: Appointees will be selected to effect a balance in terms of point of view, and on the basis of technical or other expertise relevant to OCS-related activities. Applicants for membership should have a familiarity with the OCS oil and gas program, including the leasing process, the OCS Lands Act, as amended, the Coastal Zone Management Act, as amended, and should be capable of dealing with specific technical problems of production and transportation of offshore oil and gas. Applicants should also have experience in or a working understanding of interagency coordination at the Federal or State level and should possess competence in one or more of the following disciplines:

a. Geology
b. Oceanography
c. Transportation Planning
d. Land-Use Planning
e. Economics
f. Outdoor Recreation

Remarks: The Regional Technical Working Groups (RTWG's) represent one of three types of committees of the OCS Advisory Board which has been restructured under a new charter. The restructured Board includes, in addition to the RTWG's, a national Scientific Committee, and a national Policy Committee. The RTWG's are being established in each of the six OCS leasing regions and are the forum which will be used in the operation of the Intergovernmental Planning Program for OCS Oil and Gas Leasing, Transportation and Related Facilities (IPP). The IPP is a new program of technical level coordination and planning to be administered by the Bureau of Land Management. The RTWG's will be the focus of the IPP and will be comprised of representatives from the States within the leasing region; regional representatives from the Bureau of Land Management, U.S. Geological Survey, State, and Federal agency members will be nominated by the Governors of the respective States and affected Federal agency heads.

Letters of recommendation should be accompanied by resumes and should be directed to Mr. Frank Gregg, Director, Bureau of Land Management.

NORTH ATLANTIC REGIONAL TECHNICAL WORKING GROUP COMMITTEE

Notification of Advisory Committee Vacancy (Discretionary Secretarial Appointment)

Committee: North Atlantic Regional Technical Working Group Committee, Outer Continental Shelf Advisory Board.

Purpose: To advise the Secretary, through the Director, Bureau of Land Management, on technical matters of regional concern relating to the Outer Continental Shelf (OCS) oil and gas leasing program in the North Atlantic region (including the States of Maine, New Hampshire, Rhode Island, Massachusetts, Connecticut, New York, and New Jersey).

Specifically, the Committee will provide recommendations and information regarding pre-lease sale activities, including tract selection, environmental statement preparation, stipulation development, regional environmental studies, and transportation management plans.

Number of Vacancies: 17.

Date of Vacancy: March 6, 1979.

Total Number of Discretionary Secretarial Appointments: 4.

Length of Term: 2 years.

Compensation: Travel/per diem for attendance at meetings.

Qualifications: Appointees will be selected to effect a balance in terms of points of view, and on the basis of technical or other expertise relevant to OCS-related activities. Applicants for membership should have a familiarity with the OCS oil and gas program, including the leasing process, the OCS Lands Act, as amended, the Coastal Zone Management Act, as amended, and should be capable of dealing with specific technical problems of production and transportation of offshore oil and gas. Applicants should also have experience in or a working understanding of interagency coordination at the Federal or State level and should possess competence in one or more of the following disciplines:

- Geology
- Oceanography
- Transportation Planning
- Land-Use planning
- Economics
- Outdoor Recreation
- Terrestrial Wildlife
- Fisheries Biology
- Engineering
- Marine Biology

Remarks: The Regional Working Groups (RTWG's) represent one of three types of committees of the OCS Advisory Board which has been restructured under a new charter. The restructured Board includes, in addition to the RTWG's a national Scientific Committee, and a National Policy Committee. The RTWG's are being established in each of the six OCS leasing regions and are the forum which will be used in the operation of the Intergovernmental Planning Program for OCS Oil and Gas Leasing, Transportation, and Related Facilities (IPF). The IPP is a new program of technical level coordination and planning to be administered by the Bureau of Land Management. The RTWG's will be the focus of the IPP and will be comprised of representatives from the States within the leasing region; regional representatives from the Bureau of Land Management, U.S. Geological Survey, U.S. Fish and Wildlife Service, Environmental Protection Agency, and the National Oceanic and Atmospheric Administration; representatives from the petroleum industry, and other private and special interests.

Notice: This vacancy announcement is for recruitment of private sector members only. State and federal agency members will be nominated by the Governors of their respective States and affected Federal agency heads.

Letters of recommendation should be accompanied by resumes and should be directed to Mr. Frank Gregg, Director, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240. The final date for receipt of applications will be April 1, 1979. For additional information with regard to this committee vacancy, contact Mr. Bert Rogers, Bureau of Land Management, 18th and C Streets, NW., Washington, D.C. 20240. Telephone: A/C 202-343-6244.

We encourage the identification of female and minority candidates.

Approved: March 1, 1979.

Frank Gregg, Director, Bureau of Land Management.

SCIENTIFIC COMMITTEE OF THE OUTER CONTINENTAL SHELF ADVISORY BOARD

Notification of Advisory Committee Vacancy (Discretionary Secretarial Appointment)

Committee: Scientific Committee of the Outer Continental Shelf Advisory Board.

Purpose: To advise the Secretary, through the Assistant Secretary, Land and Water Resources, on the feasibility, appropriateness, and scientific value of the Bureau of Land Management's OCS studies program. The committee may recommend changes in both scope and direction of the program and applicability of the data being produced.

Number of Vacancies: 10-15.

Date of Vacancy: March 1, 1979.

Total Number of Committee Members: 10-15.

Total Number of Discretionary Secretarial Appointments: 10-15.

Length of Term: 2 years.

Compensation: Travel/per diem for attendance at meetings.

Qualifications: Appointees to the committee will be selected based on scientific background and reputation within particular fields of expertise relevant to the OCS studies program. Examples of disciplines relevant to the program are: fisheries biology, seabird and marine mammal ecology, marine benthic ecology, toxicology, marine chemistry, marine geology, geophysics, physical oceanography, meteorology, and socioeconomics.

Remarks: The Outer Continental Shelf (OCS) environmental studies program is a major undertaking by the Bureau of Land Management (BLM) to collect and analyze environmental and socioeconomics information that will be useful to decisionmaking in the Nation's OCS oil and gas leasing program. Members of the Scientific Committee will work closely with the Director of the BLM and with his staff which includes the environmental studies personnel. Membership will represent six OCS regions: North Atlantic, South Atlantic, Mid-Atlantic, Gulf of Mexico, Pacific, and Alaska.

NOTE: Letters of recommendation should be accompanied by resumes and should be directed to Mr. Guy Martin, Assistant Secretary, Land and Water Resources, 18th & C Streets, N.W., Washington, D.C. 20240. The final date for receipt of applications is April 1, 1979. For additional information with regard to this committee vacancy, contact Mr. Sandy Selm, Office of the Assistant Secretary, Land and Water Resources, Room 4560, Department of the Interior Washington, D.C. 20240. Telephone: A/C 202-345-7697.

We encourage the identification of female and minority candidates.

PROPOSED 500 KV TRANSMISSION LINE FROM PALO VERDE, ARIZONA TO DEVERS, CALIFORNIA; YUMA DISTRICT, ARIZONA

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement concerning a proposed 500 kv electrical transmission line from Palo Verde Nuclear Generating Station, Arizona to Southern California Edison's Substation at Devers, California. The proposal involves the selection of a route most environmentally suitable consistent with the Bureau of Land Management concept of multiple-use management.

The Department of the Interior invites written comments on the final environmental statement within 30 days of this notice (April 5, 1979). Comments are solicited from public agencies, and interested individuals and entities. Comments should be sent to the Yuma District Office, Bureau of Land Management, Post Office Box 5800, Yuma, Arizona 85364.

A limited number of copies of the final environmental statement are available upon request at the following offices:

- Phoenix District Office, Bureau of Land Management, 2299 West Clarendon Avenue, Phoenix, Arizona 85017 (602) 261-4321.
- Yuma District Office, Bureau of Land Management, 2450 South Fourth Avenue, Yuma, Arizona 85364 (602) 920-2681.
- Riverside District Office, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507 (714) 789-1462.

Final environmental statement copies will be available for public reading and review at most libraries near the study area and at the following locations:

- Phoenix District Office, Bureau of Land Management, 2299 West Clarendon Avenue, Phoenix, Arizona 85017 (602) 261-4321.
- Riverside District Office, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507 (714) 789-1462.
- Yuma District Office, Bureau of Land Management, 2450 South Fourth Avenue, Yuma, Arizona 85364 (602) 920-2681.

Dated: March 1, 1979.

LARRY E. MEIEROTTO
Deputy Assistant Secretary of the Interior.

SPRING CREEK MINE, BIG HORN COUNTY, MONTANA

Availability of Final Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, and section 65-504 R.C.M. 1947 of the Montana Environmental Policy Act of 1971, the Department of the Interior, in cooperation with the State of Montana, has prepared a final environmental impact statement on the proposed Spring Creek surface coal mining operation by the Northern Energy Resources Company in Big Horn County, Montana. The final statement assesses the environmental impacts of the lessee's plan for the surface mining of 10 million tons annually of Federal- and State-owned coal, and the concurrent reclamation and revegetation of surface lands. The proposed action is on Federal coal lease M-059782 and State coal lease C-533-65, T. 8 S., R. 39 E., Principal meridian.

The mine plan contained in this final environmental impact statement was submitted prior to the promulgation of interim regulations by the U.S. Office of Surface Mining, pursuant to the Surface Mining Control and Reclamation Act of 1977. The mine plan is currently under review by Federal and State regulatory authorities for compliance with those requirements. It has not yet been determined whether the plan is adequate and in full conformance with applicable requirements of the Act. Once the mine plan is conformed to meet those regulations, the Department will evaluate whether this final environmental impact statement is adequate for the mine plan approval action or whether a supplement to this impact statement needs to be prepared and distributed.

Comments received on the draft environmental statement during the comment period were considered in the preparation of the final environ-

Office of Surface Mining, Reclamation and Enforcement

[Federal. Coal Leases No. D-044240, C-076713]

NORTHERN COAL COMPANY—RIENAU NO. 2 MINE, RIO BLANCO AND MOFFAT COUNTY, COLORADO

Availability of Proposed Decision To Approve, With Stipulations, Major Modification of Coal Mining and Reclamation Plan for Public Review

AGENCY: Office of Surface Mining Reclamation and Enforcement.

ACTION: Availability, for Public Review, of Proposed Coal Mining and Reclamation Plan.

SUMMARY: Pursuant to 211.5 of Title 30, Code of Federal Regulations, notice is hereby given that the Office of Surface Mining has received sufficient information to constitute a mining and reclamation plan. The proposed coal mining operation is described below.

LOCATION OF LANDS TO BE AFFECTED BY MODIFICATION

Applicant: Northern Coal Company
Mine Name: Rienau No. 2
State: Colorado
County, Rio Blanco and Moffat

Township, Range, Section: T2N, R93W; 29, 32; T2N, R92W; 1.

Office of Surface Mining Reference No: CO-0008.

The mine is located approximately 40 miles south of Craig, Colorado and about eight miles north of Meecher. The proposed operation involves underground mining and subsequent reclamation on about 123 acres of the total lease area of 490 acres. The mine is presently under OSM enforcement orders to obtain approval of the mine plan. The operation includes a coal load-out facility located immediately south of Craig, Colorado. The proposed addresses single seam room and pillar mining on the advance (designed to protect overlying coal seams), surface operations, and surface drainage control at both the mine and at the coal load-out facility.

This notice is issued at this time for the convenience of the public. The Office of Surface Mining has not yet determined whether the proposed plan is technically adequate. Any additional information obtained during the course of the review will also be available for public review.

No action with respect to approval of any such plan shall be taken by the Regional Director for a period of 30 days after publication in the Federal Register, (April 5, 1979). At the time of recommending a final decision regarding the proposed mining and reclamation, the Office of Surface Mining will issue a Notice of Pending Decision, pursuant to § 211.5(c)(2) of Title 30, Code of Federal Regulations.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-48]

ALTERNATING PRESSURE PADS

Termination of Investigation

BACKGROUND

The United States International Trade Commission, acting under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), instituted this investigation on February 17, 1978, on the basis of a complaint filed by Gamma Industries, Inc., and Medisearch FR, Inc. (complainants). Named as respondents in the Commission's notice of investigation were Flowtron Aire, Ltd., and the Huntleigh Group, Inc. (respondents). The notice of investigation listed two practices allegedly engaged in by respondents as (1) the importation of alternating pressure pads which were allegedly covered by claims 1 and 3-5 of U.S. Letters Patent 3,701,173 (the '73 patent) and (2) the alleged unlawful use of promotional and advertising material pertaining to alternating pressure pads (43 FR 7483, Feb. 23, 1976).

On August 7, 1978, complainants filed, pursuant to § 210.51 of the Commission's Rules of Practice and Procedure (19 CFR 210.51), a motion to terminate this investigation as to all issues and with respect to all respondents.

The motion to terminate is based on the discovery by respondents of a prior West German patent reference, which was previously unknown to the parties. Complainants stated that this prior art was not before the patent examiner while the above patent was pending, and that the discovery of the West German patent reference places in question the validity of one or more of the claims in the patent. Complainants stated in their motion to terminate that respondents have withdrawn the promotional literature from circulation and that prior activities connected therewith were de minimis. Complainants indicated an intention to surrender the patent and to file a reissue application with the Patent and Trademark Office, which complainants subsequently did. On August 16, 1978, complainants filed a supplemental memorandum containing a settlement agreement whereby complainants agreed not to assert the patent claims against respondents or those in privity with respondents (settlement agreement).

The presiding officer, acting in accordance with §§ 210.51(c) and 210.53 of the Commission Rules (19 CFR 210.51(c) and 210.53), concluded that (1) the issue of the promotional literature published by respondents now moot owing to respondents' discontinuing distribution of such literature, and (2) because complainants have voluntarily moved to terminate the investigation and have entered into a settlement agreement with respondents, there is no present violation of section 337. The presiding officer recommended that the Commission (1) determine that there is no present violation of section 337 in the importation or sale of alternating pressure pads, and (2) terminate the investigation as to all issues and parties, contingent upon complainants' filling with the Commission a copy of their reissue application with proof of filing with the Patent and Trademark Office. The copy of the reissue application with proof of
Notices

Filing has been properly filed with the Commission. Copies of the presiding officer's recommended determination may be obtained from the Office of the Secretary to the Commission, 701 E Street N.W., Washington, D.C. 20436, telephone (202) 232-0161.

The Commission, in considering the recommended determination, invited public comment on whether there are any potential adverse effects of this settlement agreement on the public interest, and more specifically, whether the agreement is anticompetitive. (44 FR 3790, January 18, 1979). The presently active parties to the investigation, including the investigative attorney, submitted comments to the effect that the settlement agreement is not anticompetitive and that it will have no adverse effect on the public interest. No other comments were received.

Commission order. Having considered complainants' motion to terminate this investigation, the recommendation of the presiding officer, the subsequent submission of additional documentation and the entire administrative record, the Commission grants complainants' motion to terminate and hereby terminates this investigation. The Commission terminates this investigation determines that the respondents have ceased distributing allegedly unfair promotional and advertising material, and the complainant has agreed not to assert the claims of the '173 patent against the respondents. It is further ordered that the Secretary to the Commission file a copy of this notice with the Patent and Trademark Office.

Discussion

It has been Commission practice in investigations under section 337 of the Tariff Act of 1930, when settlement agreements or other agreements are entered into among the parties, to make a determination of no present violation in light of the language of section 337(c) and Commission rule 210.53. This practice has been adopted by the Commission because section 337(c) provides that the Commission is to determine in each investigation whether there is or is not a violation of section 337.

We are of the opinion now, however, that a distinction should be drawn between settlements entered into by the parties and other kinds of termination prior to a hearing, so that in the case of settlements, only an order of termination is required, and no finding as to the issue of violation is necessary.

The Administrative Procedure Act, which is incorporated in section 337(c) of the Tariff Act of 1930, as amended, provides in subsection 5 that agencies must "give all interested parties opportunity to settle cases." The provision to do so. Therefore, he suggests if the majority wishes to distort the clear intent of the language of the general rule, as expressed in this case, that it do so specifically by incorporating such language into the Commission's Rules of Practice and Procedure.

1Commissioner Moore in voting to terminate this investigation determines that there is no violation of Section 337 of the Tariff Act of 1930, as amended. In this case, he observes that the complainants moved to terminate after respondents submitted information prior to a prior patent which placed the validity of complainants' patent in question and that it is doubtful whether the so-called settlement agreement is binding on the parties.

Commissioner Moore agrees with the recommendation of the Presiding Officer that (1) there is no present violation of Section 337 in connection with the importation of alternating pressure pads or in their sale in the United States and (2) the investigation should be terminated. (See footnote 1, page 5, quoting an opinion in a case similar to this which the CCPA affirmed in Rohin & Haas Co. v. International Trade Commission, 554 F.2d 462.) It is Commissioner Moore's view that the Commission's statutory obligations, and particularly the public interest requirements, as set forth in Subsection (b)(2) of Section 337 of the Tariff Act of 1930 outweigh any blind adherence to the Administrative Procedure Act which is incorporated in section 337(c). He believes that it is possible to make certain that parties to an administrative proceeding have their rights protected. Since this document is a Commission notice in a specific case, Commissioner Moore believes it may not be the proper place to develop each and every reason why conforming to the Administrative Procedure Act requires the Commission to ignore the clear mandate of Section 337 that "the Commission shall determine with respect to each investigation conducted by it, under this section, whether or not there is a violation of this section".

However, Commissioner Moore takes particular exception to the charge by the majority that such compliance with Section 337 in settlement cases will cause more expense to the government and to the parties. Further, Commissioner Moore observes that only in rare instances since its enactment has the Commission failed to make a determination of violation in Section 337 cases and that neither the language of Section 337(c) nor Commission's Rule 210.53 admonishes the Commission not

Employment and Training Administration

NATIVE AMERICAN PRIVATE SECTOR INITIATIVES PROGRAM

Allocation of Funds

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice provides the plans of the Employment and Training Administration for allocating funds for the Native American Private Sector Initiatives Program.

FOR FURTHER INFORMATION CONTACT:

Mr. Alexander S. McNabb, Director, Division of Indian and Native American Programs, Room 6402, 601 D Street, N.W., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION:

Pursuant to the 1978 Amendments to the Comprehensive Employment and Training Act (CETA), the Division of Indian and Native American Programs (DINAP) announces a program authorized under Title VII of CETA to demonstrate the effectiveness of a variety of approaches to tie private industry closer to employment and training programs, and the private sector. Based on the Administration's budget request for this program a minimum of $8 million will be available through this solicitation to Native American grantees who are eligible under Section 302(c)(1) (A) and (B) of CETA. Award of grants under this program is contingent upon the availability of funds. A "Solicitation for Grant Application" (SGA) that will describe application procedures and items necessary for a proposal will be issued immediately to all eligible Native American grantees.

Selection of proposals will be done on a competitive basis. DINAP will select a non-profit institution to evaluate, rank and make funding recommendations to the Director, DINAP, who will make the grant awards. Criteria on which proposals will be evaluated are contained in the SGA. Regulations for the Native American Private Sector Initiatives Program (NAPSIP) are being developed, and will be issued as soon as possible. The SGA contains enough regulatory guidance for eligible Native American grantees to begin development of their proposals. Submission of proposals is not mandatory, but is the only mechanism by which NAPSIP funds will be awarded.

All eligible Native American grantees desiring NAPSIP funds must establish the Private Industry Council (PIC) to assist in the development of the proposal and the implementation of the program if award is made. The PIC must be made up of representatives from private industry, organized labor, community based organizations, and educational institutions. A majority of the membership must be from private industry. Details on the PIC are contained in the SGA.

DINAP will make available to each eligible prime sponsor a planning grant. Planning grant funds are to be used to develop the PIC and the proposal. The planning grant will be for a minimum of $2,000, with all eligible Native American grantees receiving the same amount.

All NAPSIP proposals from eligible Native American grantees must be received by 4:45 p.m. on April 17, 1979. The address to which they must be forwarded is:

Room 6402, Patrick Henry Building, 601 D Street, N.W., Washington, D.C. 20215.

LAMOND GODWIN,
Administrator,
Office of National Programs.

Mine Safety and Health Administration

(Docket No. M-79-8-C)

EASTOVER MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Eastover Mining Company, Brookside, Kentucky 40801, has filed a petition to modify the application of 30 CFR 75.1710 (canopies) to its High-split and Brookside Mines in Harlan County, Kentucky and its Arjay Mine in Bell County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164. The substance of the petition follows:

1. The petitioner is mining in heights averaging 42 inches with a present minimum of 30 inches. The coal seams are very erratic and traveling clearances vary considerably due to abnormal geological conditions.

2. An operator with his head near a low canopy suffers from shadows, blank spots and blind areas in his vision due to lighting required on the equipment.

3. To improve his vision and comfort, the operator in a cramped cab or canopy tends to hang his head and part of his body outside the confines of the equipment cab. While leaning out, the operator can be crushed, thrown from the equipment, hit by another piece of equipment or lose his balance and topple from his normal position.

4. From the strained body position in the confines of a cab or canopy, the operator can suffer muscle spasms or other physical impairments that could result in loss of control of the equipment, endangering other miners in the area.

5. In the confines of a cab or canopy, an operator must completely leave his machine to reposition himself to travel in the opposite direction. When leaving the operator's compartment, the power should be de-energized and the brakes locked. However, many operators fail to follow the prescribed procedures and accidents occur.

6. For these reasons, the petitioner states that the installation of cans or canopies of the face equipment listed in its petition would result in a diminution of safety for the miners involved.

REQUEST FOR COMMENTS

Persons interested in this petition may furnish written comments on or before April 5, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

Occupational Safety and Health Administration

(Docket No. 79-6705)

INTERLAKE STAMPING CORP.

"Experimental Variance Extension"

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grant of Extension of Variance.

SUMMARY: This notice announces the grant of an extension of an experimental variance to Interlake Stamping Corporation from the standards prescribed in 29 CFR 1910.217 concerning mechanical power presses.

DATES: The effective date of the extension is March 6, 1979.

FOR FURTHER INFORMATION CONTACT:

James J. Concannon, Director, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Ave., N.W., Room N-3603.
Washington, D.C. 20210, Telephone: (202) 523-7121 or the following Regional and Area Offices:
U.S. Department of Labor—OSHA, Federal Office Building—Room 847, 1240 East Ninth Street, Cleveland, Ohio 44119.

I. BACKGROUND

The Secretary of Labor has proposed to extend the experimental variance granted to Interlake Stamping Corporation under section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970 (84 Stat. 1594; 29 U.S.C. 655). The experimental variance was originally granted on August 31, 1976 (41 FR 36702) from the standards prescribed in §1910.217(c)(6)(ii)(B), which prohibits the use of a presence sensing device for tripping a mechanical power press. The experiment was extended for six months on September 9, 1977 (42 FR 49398). The facility affected by this application is Interlake Stamping Corporation, 4732 East 35th Street, Willoughby, Ohio 44094.

Notice of the proposed extension, and of the granting of an interim extension order, was published in the Federal Register on March 17, 1978 (43 FR 11275). The notice invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the denial of the extension of the variance. In addition, affected employers and employees were notified of their right to request a hearing on the proposed extension. No requests for a hearing have been received. Letters were received in response to the notice. Two asked for information on the system, and one contained substantive comments on the notice which will be addressed below.

II. FACTS

The experimental variance authorizes the use of Erwin Sick electronic light curtains as a tripping means as well as a point of operation device on five Bliss-OBI mechanical power presses.

Five additional Bliss-OBI mechanical power presses are used as a control group with conventional tripping means in order to compare the safety, worker acceptance and productivity of the two methods.

The notice also stated that "This system has been used in Sweden and West Germany with excellent safety records, but has not been permitted in this country." A comment letter from Sick Optik Elektronik, Inc. correctly pointed out that this sentence is subject to misinterpretation in several ways. First, the word "system" here was meant to apply to the entire press control system, not only the light curtain. The system in use involves not only the light curtain, but also the special control design, supplemental guarding, and must be used on a press of acceptable design. Second, the light curtain is legally used in this country as a means of guarding presses. In addition, the prohibition contained in §1910.217(c)(6)(ii)(B) applies only to mechanical power presses.

The initial purpose of this experiment was to collect information to aid in determining whether the OSHA standard should be modified to permit the tripping of mechanical power presses with presence sensing devices.

To date, the comparison record for malfunctions and for productivity between the presses using automatic tripping and those using conventional tripping means shows fewer malfunctions and higher productivity on those with automatic tripping.

As information has been collected from Interlake and other sources during this experimental period, it has become apparent that additional information is needed before a final decision can be made on whether to modify the standard and, if so, what requirements and/or restrictions should be included in the new standard.

III. DECISION

It has been determined that the extension of this experiment, for a period not to exceed two years, is an appropriate part of the process of seeking more information in order to make a decision on whether to modify the standard. No objections to this extension were received in the comment letters. The continuing use of the presses in an automatic trip mode will provide continuing comparison data on different methods of actuating presses. This information provides a base against which to evaluate other information obtained through other means.

In addition, while the experiment may later be expanded to include other worksites, it is valuable to have a location in which to observe the system in use.

IV. ORDER

Pursuant to authority in section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970, and in Secretary of Labor's Order No. 8-76 (41 FR 25059) it is ordered that Interlake Stamping Corporation be, and it is hereby, authorized to continue its extension for up to two more years under the terms of the order granting the experimental variance of August 31, 1976 (41 FR 36702). In addition, Interlake shall obtain, within two weeks of the date of this extension, new statements from all operators as required under item 5(b) of the original order granting the variance. In addition, item 17 of the original order shall be modified to read:

17. This variance shall continue in effect for a period not to exceed two years.

As soon as possible Interlake Stamping Corporation shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date. This order shall become effective on March 6, 1979, and shall remain in effect until modified or revoked in accordance with section 6(b)(6)(C) of the Occupational Safety and Health Act of 1970.

EULA BINGHAM,
Assistant Secretary of Labor.

ITA-W-44511

ACME LEATHER SPORTSWEAR, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of ITA-W-44511: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1976 on a worker petition received on November 27, 1978 which was filed by the Amalgamated Cotton Garment and Allied Industries (a division of the Amalgamated Clothing and Textile Workers Union) on behalf of workers and former workers producing men's suede and leather sportswear and outerwear at Acme Leather Sportswear, Inc., Elizabeth, New Jersey. The investigation revealed that the plant primarily produces men's leather, split cow, suede, and fabric outerwear.

The Notice of Investigation was published in the Federal Register on December 8, 1978 (43 FR 57682-57693). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Acme Leather Sportswear Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of leather coats and jackets—men's, boy's, women's, misses', juniors', and children's—increased absolutely in 1977 compared to 1976 and in the first nine months of 1978 compared to the same period in 1977.

Imports of men's and boys' non-tailored outer jackets increased absolutely and relative to domestic production in 1977 compared to 1976 and increased absolutely in the first nine months of 1978 compared to the first nine months of 1977.

A survey of customers of Acme revealed that customers had decreased purchases from Acme and increased purchases of imported leather and fabric coats.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's leather, suede, split cow, and fabric coats produced by Acme Leather Sportswear, Inc., Elizabeth, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Acme Leather Sportswear, Inc., Elizabeth, New Jersey who became totally or partially separated from employment on or after September 8, 1978 are eligible to apply for adjustment assistance under reduced purchases of men's and boys' knit sport shirts at the Pueblo, Colorado plant of Aspen Skiwear, Denver, Colorado.

The Notice of Investigation was published in the FEDERAL REGISTER on November 13, 1978 (43 FR 52564). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Aspen Skiwear and of Richton Sportswear, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

The Department's investigation revealed that imports of finished ski jackets by Aspen Skiwear increased in January-September 1978 compared to the like period in 1977. A Departmental survey revealed that customers had reduced purchases of men's and boys' knit sport shirts from the subject firm and had increased purchases of imported knit sport shirts in the first eleven months of 1978 compared to the first eleven months of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ski jackets and men's and boys' knit sport shirts at the Pueblo, Colorado plant of Aspen Skiwear, Denver, Colorado which was filed on behalf of workers and former workers producing ski jackets and men's and boys' knit sport shirts at the Pueblo, Colorado plant of Aspen Skiwear, Denver, Colorado. as provided in the Act.

 Frederick M. Hebert, Commissioner.

Signed at Washington, D.C. this 27th day of February 1979.

HARRY J. GILMAN,

[TA-W-4453]

BRUNSWICK WORSTED MILLS, INC.

Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4453: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1978 in response to a worker petition received on November 6, 1978 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers distributing textiles (arts and crafts) to customers at Brunswick Worsted Mills, Incorporated, Moosup, Connecticut. The investigation revealed that the workers warehouse and distribute needlepoint, latch-hook rug and hand knitting yarns.

The Notice of Investigation was published in the FEDERAL REGISTER on December 8, 1978 (43 FR 57692-3). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Brunswick Worsted Mills, Incorporated, its customers, Textile Economics Bureau, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Results of a survey of customers of Brunswick Worsted Mills indicates little impact of imports on Brunswick's sales. Customers of Brunswick which decreased purchases from Brunswick...
and increased purchases of imports represented an insignificant portion of Brunswick's decline in sales.

U.S. imports of yarn increased in 1977 from 1976 and increased in the first 9 months of 1978 compared to the first 9 months of 1977. Imports as a percentage of U.S. production were 1.6 percent in 1976 and 1.7 percent in 1978.

CONCLUSION

After careful review, I determine that all workers of Brunswick Worsted Mills, Incorporated, Moosup, Connecticut are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of February 1979.

C. MICHAEL AHO,
Director, Office of Foreign Economic Research.

[ITA-W-4545]

CAPEHART CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4545: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 21, 1978 in response to a worker petition received on December 20, 1978 which was filed on behalf of workers and former workers producing A.M. and F.M. stereo chassis at the City of Industry, California plant of the Capehart Corporation. The investigation revealed that the plant produces stereo consoles and stereo modular systems.

The Notice of Investigation was published in the Federal Register on January 9, 1979 (44 FR 2033-2034). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of the Capehart Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of radio-phonograph-tape combinations increased absolute-ly and relative to domestic production in 1977 compared to 1976 and in the first nine months of 1978 compared to the first nine months of 1977.

A survey of customers of Capehart revealed that several surveyed customers were decreasing purchases from Capehart which increases purchases of imported stereo consoles and stereo modular systems.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with stereo consoles and stereo modular systems produced by the City of Industry, California plant of the Capehart Corporation contributed importantly to the decline in sales or production and to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the City of Industry, California plant of Capehart Corporation who became totally or partially separated from employment (or on or after December 6, 1977) are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of February 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[ITA-W-4489]

COOKEVILLE SHIRT CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4489: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 8, 1978 in response to a worker petition received on November 27, 1978 which was filed on behalf of workers and former workers producing men's and boys' sport and dress shirts at Cookeville Shirt Company, Cookeville, Tennessee.

The Notice of Investigation was published in the Federal Register on December 19, 1978 (43 FR 59179-80). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Cookeville Shirt Company, their customers, the National Cotton Council of America, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of men's and boys' woven dress and business shirts increased from 64,283 thousand units in 1976 to 64,446 thousand units in 1977, and from 48,918 thousand units in the period from January to September, 1977 to 55,446 thousand units in the same period in 1978. The ratio of imports to domestic production increased from 70.4 percent in 1976 to 72.6 percent in 1977. U.S. imports of men's and boys' woven sport shirts decreased slightly from 79,820 thousand units in 1976 to 75,574 thousand units in 1977, and increased from 55,784 thousand units in the period from January to September, 1977 to 72,259 thousand units in the same period in 1978. The ratio of imports to domestic production increased from 44.9 percent in 1976 to 47.1 percent in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's and boys' sport and dress shirts produced at Cookeville Shirt Company, Cookeville, Tennessee contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Cookeville Shirt Company, Cookeville, Tennessee, who became totally or partially separated from employment on or after November 20, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.
In order to make an affirmative determination and issue a certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Dunwell Bra Accessories produces brassieres and girdles. Imports of brassieres, bralettes and bandeaux increased from 8,751,000 dozen in 1976 to 9,507,000 dozen in 1977 and increased from 7,067,000 dozen in the first nine months of 1977 to 7,918,000 dozen in the first nine months of 1978. Imports of corsets and girdles increased from 231,000 dozen in 1976 to 269,000 dozen in 1977 and increased from 188,000 dozen in the first nine months of 1977 to 292,000 dozen in the first nine months of 1978. The ratio of imports to domestic production for brassieres increased from 81.7 percent in 1976 to 59.3 percent in 1977. The bulk of imports of brassieres and girdles enter the country under Tariff Provision 807.00.

A Department survey of Dunwell Bra Accessories' customers in conjunction with the import data above indicated that customers had decreased their purchases of brassieres and girdles from Dunwell Bra Accessories and had increased their purchases of import articles.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-4525: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1978, in response to a worker petition received on December 14, 1978, which was filed by the International Molders' and Allied Workers' Union on behalf of workers and former workers performing casting and foundry work at Cooper Alloy Corporation, Hillside, New Jersey. The investigation revealed that the name of the subject firm is Cooper Alloy Corporation and the products manufactured at the Hillside, New Jersey, plant were high alloy steel castings.

The Notice of Investigation was published in the Federal Register on December 29, 1978, (43 FR 61038-39). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Cooper Alloy Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for worker adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of steel castings, which include high alloy steel castings, although extremely small did increase both absolutely and relative to domestic production in 1977 compared to 1976. The imports to domestic production ratio increased from 1.1 percent in 1976 to 1.3 percent in 1977 and remained constant at 1.3 percent in the first nine months of 1978 compared to the same period in 1977.

The Department conducted a survey of major customers which represented over 90 percent of Cooper Alloy's 1977 sales. Only one of the customers who reduced purchases from Cooper Alloy eligibility to apply for worker adjustment assistance with that customer represented a de minimus percent of Cooper Alloy's decline in sales.

**CONCLUSION**

After careful review, I determine that all workers of Cooper Alloy Corporation, Hillside, New Jersey, are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of February 1979.

HARRY F. TAYLOR, Director, Office of International Trade, Administration and Planning.

FLORSHEIM SHOE CO., CAPE GIRARDEAU, MO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4528: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of Act.

The investigation was initiated on December 15, 1978 in response to a worker petition received on December 13, 1978 which was filed by the United Shoe Workers of America on behalf of workers and former workers producing men's footwear at the Cape Girardeau, Missouri plant of the Florsheim Shoe Company.

The Notice of Investigation was published in the Federal Register on December 29, 1978 (43 FR 61033). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Florsheim Shoe Company, major footwear retailers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files. In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Total Florsheim Shoe Company imports of men's footwear increased in 1977 compared to 1976 and in 1978 compared to 1977. A survey revealed that major retail stores throughout the country are increasing purchases of imported men's and boys' non-athletic footwear.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's footwear produced at the Cape Girardeau, Missouri plant of the Florsheim Shoe Company contributed importantly to the decline in sales and production and to the total or partial separation of workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers of the Cape Girardeau, Missouri plant of the Florsheim Shoe Company who became totally or partially separated from employment on or after October 1, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 28th day of February 1979.

JAMES P. TAYLOR, Director, Office of Management, Administration, and Planning.

[FR Doc. 79-6717 Filed 3-5-78; 8:45 am] [4510-28-M]

GOPHER MINING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4606, 4607, and 4609: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 8, 1979 in response to a worker petition received on January 2, 1979 which was filed by the United Mine Workers of America, District 29, in part on behalf of workers and former workers producing metallurgical coal at the Springdale, West Virginia mine; Springdale, West Virginia cleaning facility; and Hump Mountain, West Virginia mine of the Gopher Mining Company.

The Notice of Investigation was published in the Federal Register on January 19, 1979 (44 FR 4029-30). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of the Gopher Mining Compa-
ny, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Gopher Mining Company began to produce metallurgical coal at the Springdale mine and cleaning facility and at the Hump Mountain mine in August and September 1978 and ceased in December 1978. Gopher Mining Company sold its metallurgical coal in about equal proportions to both foreign and domestic customers. One major customer, representing most of Gopher's domestic sales, owns metallurgical coal mines that were affected by the U.M.W.A. strike in the first quarter of 1978. Its coal inventories were drawn down considerably because of the strike and to replenish dwindly coal supplies, "spot" purchases were made from several small domestic mining companies. A "one-time only" order was placed with Gopher Mining Company in August 1978. No further orders were placed after delivery of that order in December 1978.

CONCLUSION

After careful review, I determine that all workers at the Springdale, West Virginia mine; Springdale, West Virginia cleaning facility; and Hump Mountain, West Virginia mine of the Gopher Mining Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of February 1979.

HARRY J. GILMAN,

DISTRIBUTION OF METALLURGICAL COAL

HARBISON WALKER REFRACTORIES GROUP
DRESSER INDUSTRIES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4549: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 21, in response to a worker petition received on December 18, 1978 which was filed by the United Steelworkers of America on behalf of workers and former workers producing silica refractory brick at the Mount Union, Pennsylvania plant of Harbison Walker Refractories Group, Dresser Industries, Incorporated.

The Notice of Investigation was published in the FEDERAL REGISTER on January 9, 1979 (44 FR 2033). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Harbison Walker Refractories Group, Dresser Industries, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the absolute decline in sales or production.

Refractory products are produced according to contracts awarded by customers on a competitive bid basis. Evidence developed during the course of the investigation revealed that Harbison Walker Refractories Group, Dresser Industries, Incorporated lost no bids for silica refractory brick for foreign competitors in 1978.

CONCLUSION

After careful review, I determine that all workers of the Mount Union, Pennsylvania plant of Harbison Walker Refractories Group, Dresser Industries, Incorporated are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 28th day of February 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

[FEDERAL REGISTER: Volume 44, Number 45, Tuesday, March 6, 1979]

DISTRIBUTION OF METALLURGICAL COAL

HUNTLEY OF YORK, LTD.

Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4472: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 6, 1978 in response to a worker petition received on December 4, 1978 which was filed on behalf of workers and former workers producing full-fashioned shirts and sweaters at Huntley of York, Ltd., York, South Carolina. The investigation revealed that knit fabric is also produced at Huntley of York, Ltd.

The Notice of Investigation was published in the FEDERAL REGISTER on December 19, 1978 (43 FR 59165-59166). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Huntley of York, Ltd., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. With respect to workers producing knit fabric and without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely

Sales of knit fabric by Huntley increased in 1977 compared to 1976 and in 1978 compared to 1977.

Production of knit fabric by Huntley increased in 1977 compared to 1976 and in 1978 compared to 1977.

With respect to workers producing knit sweaters and shirts all of the group eligibility requirements of Section 222 of the Act have been met.

Imports of both men's knit sweaters and shirts increased absolutely in 1977 compared to 1976 and in the first nine months of 1978 compared to the first nine months of 1977.
A customer survey revealed that a primary customer of Huntley of York increased purchases of imported knit sweaters and shirts in 1978 while decreasing purchases from Huntley of York.

CONCLUSION
After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with men's knit sweaters and shirts produced at Huntley of York, Ltd., York, South Carolina, contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Huntley of York, Ltd., York, South Carolina, engaged in employment related to the production of men's knit sweaters and shirts, who became totally or partially separated from employment on or after June 5, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that workers engaged in employment related to the production of knit fabric at Huntley of York, Ltd., York, South Carolina are denied eligibility to apply for adjustment assistance.

Signed at Washington, D.C. this 28th day of February 1979.

JAMES F. TAYLOR
Director, Office of Management Administration and Planning.

[4510-28-M]

INTERNATIONAL SHOE CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-4450: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 28, 1978, in response to a worker petition received on December 26, 1978, which was filed on behalf of workers and former workers producing men's dress and casual shoes at the West Plains, Missouri plant of International Shoe Company.

The Notice of Investigation was published in the Federal Register on January 5, 1979 (44 FR 1465). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of International Shoe Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination, I must find a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

Imports of men's dress and casual footwear, except athletic, increased both absolutely and relative to domestic production from 1976 to 1977. While decreasing slightly during the first three quarters of 1978 compared to the same period of 1977, the ratio of imported men's dress and casual footwear to domestic production exceeded 75 percent during 1976, 1977 and the first three quarters of 1978.

A survey of the major U.S. retail outlets conducted by the Department of Labor revealed that imported men's and boys' non-athletic footwear increased their share of total demand for non-athletic footwear by those retail outlets during the first three quarters of 1978 compared to the same period of 1977.

CONCLUSION
After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with men's shoes produced at the West Plains, Missouri plant of International Shoe Company contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the West Plains, Missouri plant of International Shoe Company who became totally or partially separated from employment on or after December 28, 1978 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of February 1979.

HARRY J. GILMAN

ITMANN COAL CO.

Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on January 8, 1979 in response to a worker petition received on December 18, 1978 which was filed by the United Mine Workers of America, in part on behalf of workers and former workers producing metallurgical coal at Itmann Coal Company, Itmann, West Virginia.

The Notice of Investigation was published in the Federal Register on January 19, 1979 (44 FR 4599-50). No public hearing was requested and none was held.

The attorney for the petitioners requested termination of the investigation regarding Itmann Coal Company. On the basis of this request, continuing the investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 27th day of February, 1979.

MARVIN M. FOOKS
Director, Office of Trade Adjustment Assistance.

[ITA-W-4450]

LOUIS WALTER CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4450: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 29, 1978 in response to a worker petition received on November 27, 1978 which was filed by the International Ladies' Garment Workers Union, on behalf of workers and former workers producing women's coats at Louis Walter Company, Incorporated, Los Angeles, California.

The Notice of Investigation was published in the Federal Register on December 5, 1978 (43 FR 56953). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of the Louis Walter Company, the U.S. Department of Commerce, the U.S. International Trade Commission, the National Cotton Council, Industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criterion has not been met:

That sales or production, or both, of the firm or subdivision have decreased absolutely.

FEDERAL REGISTER, VOL 44, NO. 45--TUESDAY, MARCH 6, 1979
Sales and production of domestically produced women's coats at Louis Walter Company increased in quantity and value in 1978 compared to 1977. Sales of domestically produced women's coats at Louis Walter increased in value in every quarter of 1978 compared to the same quarter of the previous year.

CONCLUSION
After careful review, I determine that all workers of the Louis Walter Company, Incorporated, Los Angeles, California, and its customers, are entitled to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of February 1979.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc. 79-6723 Filed 3-5-79; 8:45 am]

Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of the Department's investigation, therefore, has been expanded to cover Marco Electric Manufacturing Corporation, Womelsdorf, Pennsylvania.

The Notice of Investigation was published in the Federal Register on September 1, 1978 (43 FR 39193-94). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Marco Electric Manufacturing Corporation, Merit Enterprises, Incorporated, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Act must be met. Without regard to whether any of the other criteria have been met, the following criteria has not been met:

That increases of imports of articles like or directly competitive with articles produced by the firm or subdivision have contributed importantly to the total or partial separation, or threat thereof, and to the absolute decline in sales or production.

The Department conducted a survey of customers of Masland. Those customers that reduced purchases from Masland and increased purchases of imported vinyl coated fabric and film represented an insignificant proportion of the subject firms sales decline in the first eleven months of 1978 compared to the same period in 1977. Customers that reduced purchases in 1977 compared to 1976 did not increase purchases of imports in this period.

CONCLUSION
After careful review, I determine that all workers of the Philadelphia, Pennsylvania plant of The Masland Duraleather Company are denied eligibility to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974. Signed at Washington, D.C. this 28th day of February 1979.

NOTICES

first six months of 1978 compared with the same period of 1977.

Sales of fans produced by Merit decreased from 1976 to 1977 and in the first half of 1978 compared with the same period of 1977. Sales of company
produced electric appliances decreased in the first half of 1978 compared with the same period of 1977.

The Department conducted a survey of customers of electric appliances of Merit Enterprises. The survey indicated that most customers did not pur-
chase imported portable electric kitchen appliances.

Employment of production workers at Merco Electric decreased in 1977 compared with 1976. Employment de-
clines can be attributed to declines in the production of hair dryer motors. Employment of production workers in-
creased in the first nine months of 1978 compared with the same period of 1977. Increases in employment can be attributed to increases in production of electric appliances and electric motors.

CONCLUSION

After careful review of the facts ob-
tained in the investigation, I conclude that imports of articles like or directly competitive with the hair dryers produced at Merit Enter-
prises, Incorporated, Newark, New Jersey contributed importantly to the decline in sales or production and to the total or partial separation of work-
ers of that firm and of Marco Electric Manufac-
turing Corporation, Womelsdorf, Pennsylvania.

In accordance with the provisions of
the Act, I make the following certifica-
tions:

All workers of Merit Enterprises, Incorpor-
ated, Newark, New Jersey engaged in em-
ployment related to the production of hair-
dryers who became totally or partially sepa-
rated from employment on or after December 15, 1977 are eligible to apply for adjust-
ment assistance under Title II, Chapter 2 of the

All workers of Marco Electric Manufac-
turing Corporation, Womelsdorf, Pennsylvania, engaged in employment related to the pro-
duction of hair dryer motors who became totally or partially separated from employment on or after August 15, 1977 and before December 1, 1977 are eligible to apply for adjust-
ment assistance under Title II, Chapter 2 of the
Trade Act of 1974. Workers sepa-
rated after December 1, 1977 are denied program benefits.

I further conclude that all workers of Merit Enterprises, Incorporated, Newark, New Jersey, engaged in em-
ployment related to the production of fans and electric appliances and all workers of Marco Electric Manufac-
turing Corporation, Womelsdorf, Pennsylvania, engaged in employment related to the production of electric appliances and appliance motors, other than hair dryer motors, are
denied eligibility to apply for adjust-
ment assistance.

Signed at Washington, D.C. this 22nd day of February 1979.

NOTICES

TA-W-4510
MISTER HERBERT OF CALIFORNIA, INC.
Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4510: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 28, 1978 in response to a worker petition received on December 20, 1978 which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's coats at Mister Herbert of California, Incorporated, Los Angeles, California.

The investigation revealed that the plant primarily produces women's coats, raincoats and jackets.

The Notice of Investigation was published in the Federal Register on January 5, 1979 (44 FR 1485). No public hearing was requested and none was held.

The determination was based upon information obtained principally from officials of Mister Herbert of California, Incorporated, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative de-
termination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Act must be met. It is concluded that all of the requirements have been met.

U.S. imports of women's, misses' and children's coats and jackets increased both absolutely and relative to domes-
tic production in 1977 compared to 1976. Imports of women's, misses' and children's coats and jackets increased absolutely in 1978 compared to the average level of imports during the period 1974 through 1977.

U.S. imports of women's, girls', and infants' raincoats decreased both absolu-	ely and relative to domestic produc-

The Department conducted a survey of a sample of customers that reduced purchases from Mister Herbert in 1978 compared to 1977. A significant propor-
tion of those customers surveyed increased their purchases of imported women's coats (including winter coats, raincoats and jackets) in 1978 com-
pared to 1977.

CONCLUSION

After careful review of the facts ob-
tained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's coats, raincoats and jackets produced at Mister Herbert of California, Incorporated contributed importantly to the decline in sales or production and to the total or partial separa-
tion of workers of that firm. In ac-

[4510-28-M]

U & I, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of its investigation of sugar beets and sugar cane. The investigation revealed that sugar beets and sugar cane were imported into the United States in quantities sufficient to impair the ability of sugar beet producers to reach an all-time high in the United States.

Imports of sugar into the United States were subject to quotas from 1935 to December 31, 1974. Since December 31, 1974, when the Sugar Act expired, imported sugar has entered the U.S. At an increased price. Removal of quotas occurred at the time per capita sugar consumption declined in the U.S.

The price of raw sugar peaked at 65 cents per pound in the week of November 13, 1974. Since then, sugar prices have been in a state of decline. World prices fell to 11.5 cents per pound in 1977 and fell to less than 8 cents per pound in 1978.

In September 1977, the U.S. Department of Agriculture (U.S.D.A.), considering depressed conditions in the domestic sugar market, instituted a support program in an effort to maintain a floor price level paid to sugar producers. Costs of production at U & I, Inc. have exceeded the market price for sugar in the 1977-1978 period.

The U.S. International Trade Commission conducted an investigation under Section 201 of the Trade Act of 1974 and in March 1977 issued a finding that sugar was being imported into the United States in such increased quantities as to be a substantial cause of the threat of serious injury to the domestic sugar industry. The Commission also conducted an investigation under Section 221 of the Agricultural Adjustment Act and in April 1978 issued a finding that sugar is being imported in such quantities as to render, or tend to render, ineffective the price support program conducted by the U.S. Department of Agriculture for sugar cane and sugar under the Agricultural Adjustment Act.

U & I, Incorporated, citing losses on the manufacture and sale of sugar, has announced its intention to terminate sugar operations following processing and sale of the 1978 sugar beet crop. All facilities engaged in the production, sale, and distribution of sugar will be closed by U & I, Incorporated in January, 1979 as the result of the termination of sugar operations.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with the refined sugar produced, sold, and distributed by U & I, Incorporated at West Jordan, Utah; Idaho Falls, Idaho; Toppensh, Washington; Moses Lake, Washington; Salt Lake City, Utah; Orange, Nebraska; Kansas City, Missouri; Seattle, Washington; and Portland, Oregon contributed importantly to the decline in sales or production and to the total or partial separation of workers of that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of U & I, Incorporated, including those at the above-mentioned facilities, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 26th day of February 1979.

Harry J. Gillman,
Superintendent, Office of Foreign Economic Research.

[Application No. D-988]

EMPLOYEES’ PROFIT SHARING PLAN
Proposed Exemption for Certain Transactions Involving ABC Freight Corp.

AGENCY: Department of Labor.

ACTION: Notice of proposed exemption.

SUMMARY: This document contains a notice of activity in the Department of Labor (the Department) of a proposed exemption from the prohibited transaction section of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt the sale by the ABC Freight Forwarding Corporation Employees Profit Sharing Plan and Trust (the Plan) of the stock of Paramount Freight Handling, Inc. and Paramount Freight Handling of North Carolina, Inc. to the ABC Freight Forwarding Corporation (the Employer). The proposed exemption, if granted, would affect participants and beneficiaries of the Plan, the Employer, and other persons participating in the proposed transaction.

DATES: Written comments and requests for a public hearing must be received by the Department of Labor on or before April 13, 1979.

ADDRESS: All written comments and requests for a hearing (at least six copies) should be sent to: Office of Prications, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:
Frederic G. Burke of the Department of Labor, (202) 523-8195. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:
Notice is hereby given of the pendence before the Department of a proposed exemption from the prohibitions of section 408(a) and 408(b)(1) and 408(b)(2) of the Code. The proposed exemption was requested by the Plan, pursuant to section 408(a) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 47713, April 26, 1975). This application was filed with both the Department and the Internal Revenue Service. However, under Reorganization Plan No. 4 of 1978 (43 FR 27713, October 17, 1978) effective December 31, 1978, the authority of the Secretary of the Treasury to issue rulings and exemptions under section 4075 of the Code has been, with certain exceptions not here relevant, transferred to the Secretary of Labor.

SUMMARY OF FACTS AND REPRESENTATIONS
The application contains facts and representations with regard to the proposed exemption which are summarized and other notices are referred to the application on file with the Department for the complete representations of the applicants.

1. The Plan is a profit sharing plan qualified under Section 401(a) of the Code. The Employer permanently discontinued all contributions to the Plan as of December 11, 1973. A favorable determination letter from the Internal Revenue Service was issued with respect to such termination on August 27, 1974. The Plan’s trust fund is being liquidated by distributions made to employees upon their retirement, death or termination.

2. In 1956, a major shareholder of the Employer sold to the Plan all of the issued and outstanding stock of Paramount Freight Handling, Inc. (Paramount) for a purchase price of $200,000. Paramount is a shipper's agent operating in the New York City area. In 1974, Paramount decided to expand its operations into North Carolina and was organized as a wholly owned subsidiary of the Plan. Paramount paid a cash dividend to the Plan that was used for the purpose of organizing Paramount of North Carolina.

3. The major portion of the earnings of Paramount and Paramount of North Carolina results from the services of two employees. These employees, the key employees of the Employer, have been employed by the Employer continuously greater than the appraised value of $400,000 given to the two key employees.

4. During the period 1956 through 1976, inclusive, Paramount earned $918,813.65 of which $484,913.65 was distributed as dividends.

5. As of December 31, 1977, the value on the books of the Plan of the Paramount stock was $516,255.72, constituting 36.53% of the total Plan assets of $1,397,945.84.

6. The initiative for the proposed sale came from the nonshareholder Plan trustees. The price that the nonshareholder trustees have negotiated is $500,895.58 plus any increases in the net worth of the two Paramount corporations after June 30, 1977 is substantially greater than the appraised value of $400,000 given by an independent appraisal company.

7. The Plan trustees believe that there is a likelihood that Paramount will lose substantial business, to a point that Paramount potentially would be unable to continue its profitable business operations. If the stock was offered to the open market. The trustees also fear that if the two key employees terminated their positions at Paramount as a result of outsiders acquiring it's business that the profitability of Paramount and Paramount of North Carolina would be diminished.

8. The non-shareholder trustees of the Plan have concluded that the need.

* An addendum to the appraisal indicates that the $400,000 appraisal value would not be higher if the Paramount stock were purchased by the Employer.
NOTICES

The attention of interested persons is directed to the following:

(1) The fact that a transaction is subject to an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest from the duty to discharge his duties respecting the transaction in accordance with the procedures set forth in ERISA Procedure 75-1. If the exemption is granted, the restrictions of sections 406(c)(1)(A) and 406(c)(1)(B) of the Act shall not apply to the sale of Paramount stock by the Employer maintaining the plan and their beneficiaries.

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 408(b)(3) of the Act and section 4975(c)(1)(B) of the Code.

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries, and protective of the rights of participants and beneficiaries of the plan.

(4) The proposed exemption, if granted, will be supplemental to and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

All interested persons are invited to submit written comments or requests for a hearing on the proposed exemption to the address set forth above. All comments will be a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the proposed exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1. If the exemption is granted, the restrictions of section 406(c)(1)(A) and 406(c)(1)(B) of the Act and the taxes imposed by section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale of Paramount stock by the Plan to the Employer for an amount not less than the greater of either $16,255 or the fair market value at the time of sale. The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 21st day of February, 1979.

(FR Doc. 79-6597 Filed 3-5-79; 8:45 a.m.)

[7536-01-M]

NATIONAL FOUNDATION FOR THE ARTS AND HUMANITIES

HUMANITIES PANEL

Meeting

March 1, 1979.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 82-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 805 15th Street, N.W., Washington, D.C. 20506:

1. Date: March 21 and 22, 1979. Time: 9 a.m. to 5:30 p.m. Room: 707.

2. Date: March 25 and 27, 1979. Time: 9 a.m. to 5:30 p.m. Room: 707.

3. Date: March 28 and 29, 1979. Time: 9 a.m. to 5:30 p.m. Room: 707.

4. Date: March 29 and 30, 1979. Time: 9 a.m. to 5:30 p.m. Room: 707.

5. Date: April 3 and 4, 1979. Time: 9 a.m. to 5:30 p.m. Room: 707.

6. Date: April 5 and 6, 1979. Time: 8 a.m. to 6 a.m. Room: 707.

Purpose: To review Youth Projects applications submitted to the National Endowment for the Humanities for projects beginning after August 1, 1979.

Because the proposed meetings will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 18, 1978, I have determined that the meetings would fall within exemptions (4) and (6) of 5 U.S.C. 552(b) and that it is essential to close these meetings to protect the free exchange of internal views and to avoid interference with operation of the Committee.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000. The Western Union operator should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 and to John W. Rowe, Esquire, Isham, Lincoln and Beale, Counselors at Law, One First National Plaza, 42nd Floor, Chicago, Illinois 60603, attorney for the licensee.

Nontimely filing of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner or representative for the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated January 15, 1979, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Morris Public Library, 504 Liberty Street, Morris, Illinois 60451.

Dated at Bethesda, Md., this 26th day of February, 1979.

For the Nuclear Regulatory Commission.

(Docket Nos. 50-265, 50-270 and 50-287)

DUKE POWER CO.

Proposed Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-35, DPR-47 and DPR-55 issued to Duke Power Company (the licensee), for operation of the Oconee Nuclear Station, Units Nos. 1, 2 and 3 (the facility), located in Oconee County, South Carolina.

The amendments would revise the provisions in the Station's common Technical Specifications to permit the expansion of the spent fuel storage capacity at the Oconee Units 1 and 2 common pool from 336 to 750 storage locations, in accordance with the licensee's application for amendments dated February 15, 1979.

Prior to issuance of the proposed license amendments, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations.

By April 5, 1979, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic License Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition. The Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall be filed within ten (10) days of the above date by the person who wishes to intervene. Any person who wishes to intervene shall set forth in the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to the matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert Reid: (petitioner's name and telephone number); (date petition was mailed); (Oconee); and (publication date and page number of this Federal Register Notice). A copy of the petition should also be sent to the Executive Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to William L. Potter, Duke Power Company, P.O. Box 2178, 422 South
NOTICES

Church Street, Charlotte, North Carolina, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated February 2, 1979, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Oconee County Library, 201 South Spring Street, Walhalla, South Carolina.

Dated at Bethesda, Md. this 16th day of February 1979.

[7590-01-M]

MISSISSIPPI STATE UNIVERSITY

Proposed Issuance of Orders Authorizing Disposition of Component Parts and Termination of Provisional Construction Permit

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of orders authorizing Mississippi State University (the licensee) to dispose of the stored component parts of a 100 watt homogeneous research reactor, formerly possessed and operated by North Carolina State University, in accordance with the plan set out in the licensee's application dated February 6, 1976, and to terminate the construction permit. These components are possessed and stored by the licensee on its campus at Mississippi State, Mississippi, Under Provisional Construction Permit No. CPRR-91.

Prior to issuance of any orders, the Commission will have made the findings, required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By March 21, 1979, the licensee may file a request for a hearing with respect to issuance of the subject orders and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend his petition, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, the petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555.

Attention: Docketing and Service Section, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert Reid: (petitioner's name and telephone number). (date petition was mailed); (Mississippi State University); and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated March 2, 1979, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. by the date above. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Robert Reid: (petitioner's name and telephone number). (date petition was mailed); (Mississippi State University); and (publication date and page number of this Federal Register notice). A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dated at Bethesda, Md. this 16th day of February 1979.

DRAFT REGULATORY GUIDE
Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulate accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, RS 807-5, is entitled "Personnel Selection and Training," and is intended for Division 1, "Power Reactors." It is a proposed Revision 2 to Regulatory Guide 1.8, and describes a method for complying with the Commission's regulations with regard to the qualifications of nuclear power plant personnel. The proposed revision will endorse ANSI/ANS 3.1-1978, "Selection and Training of Nuclear Power Plant Personnel."

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review, have not been reviewed by the NRC Regulatory Requirements Review Committee, and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft, value/impact statement. Comments on the draft, value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by April 23, 1979.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides or the latest revision of published guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides or draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

ROCHESTER GAS & ELECTRIC CORP.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 24 to Provisional Operating License No. DPR-13, issued to Rochester Gas and Electric Corporation (the licensee), which amended the license and its appended Technical Specifications for operation of the R. E. Ginna Nuclear Power Plant (the facility) located in Wayne County, New York. The amendment is effective as of its date of issuance.

The amendment adds license conditions relating to the completion of facility modifications for fire protection and the implementation of administrative controls, and modifies the Technical Specifications to require additional fire hose stations to be operable in the turbine building, a yard hydrant loop to be operable, and surveillance for the diesel fire pump. The Commission has made appropriate findings as required by the Act and the Commission’s rules and regulations in 10 CFR Chapter I, which are
set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the license's submittals dated February 24, 1977, May 15, 1978, June 9, 1978, June 28, 1978, September 1, 1978, September 22, 1978, October 18, 1978 and October 31, 1978, (2) Amendment No. 24 to License No. DFR-18, including the Commission's letter of transmittal, and (3) the Commission's related Safety Evaluation. All of these items are available for public Inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14627. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 14th day of February 1979.

[FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979  

SECURITIES AND EXCHANGE COMMISSION  

[Sec. 10b-5; (10-14-78)  

ALLIANCE CAPITAL RESERVES, INC.  

Filing of Application Pursuant to Sections 6(c) and 13 of the Act for Order of Exemption From Rules 2a-4 and 22-1 Under the Act.  

Notice is hereby given that Alliance Capital Reserves, Inc. ("Applicant") 140 Broadway, New York, New York 10005, February 26, 1979, registered under the Investment Company Act of 1940 ("Act") as an open end, diversified management investment company, filed an application on January 12, 1979, and an amendment thereto on February 26, 1979, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Rules 2a-4 and 22-1 under the Act to the extent necessary to permit Applicant to compute its net asset value per share, for the purpose of effecting sales, redemptions and repurchases of its shares, to the nearest one cent on a share value of one dollar. Applicant represents that in all respects, its portfolio securities will be valued in accordance with the views of the Commission set forth in Investment Company Act Release No. 9786 (May 31, 1977) ("IC-9786"). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a "money market fund," designed as an investment vehicle for investors with temporary cash balances or cash reserves, and that its investment objectives are, in the following order of priority, safety of principal, excellent liquidity and maximum current income to the extent consistent with the first two objectives. Applicant states that Alliance Capital Management Corporation, a wholly-owned subsidiary of Donaldson, Lufkin & Jenrette, Inc., acts as investment adviser to Applicant and that at December 31, 1978, Applicant had net assets of $90,439,892.

Applicant represents that its investments and related management policies have the following characteristics:

1. Applicant may not purchase any security which has a maturity date more than one year from the date of Applicant's purchase.

2. Applicant's portfolio may be invested in the following money market instruments: (i) obligations of or guaranteed by the United States of America, its agencies or instrumentalities; (ii) certificates of deposit, bankers' acceptances and interest-bearing savings deposits of banks having total assets of more than $1 billion and which are members of the Federal Deposit Insurance Corporation; (iii) commercial paper, including variable amount master demand notes, rated A-1 by Standard & Poor's Corporation or Prime-1 by Moody's Investors Service, Inc. or, if not rated, then issued by companies which have an outstanding short-term debt rating of AA or Aa by Standard & Poor's, or A-1 or Aa by Moody's; and (iv) repurchase agreements pertaining to the foregoing securities provided that such agreements are limited to transactions with financial institutions believed by the investment adviser to present minimal credit risk.

3. Portfolio instruments with 60 days or less remaining to maturity are valued on an amortized cost basis; other instruments are valued by "marking to market".

4. Applicant's net income, which is determined and declared as a dividend each day, includes unrealized gains and losses on portfolio instruments. Applicant's price per share for purposes of sales and redemptions remains constant at $1.00.

Applicant represents that it expects that if the exemption requested is granted permitting Applicant to round off its net asset value to the nearest one cent on a one dollar value per share, it would immediately change its policy as to calculation of net income so as to exclude unrealized gains and losses from net income. Applicant states that by so doing, the amounts
NOTICES
12307

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979

of its daily net income dividends to shareholders would become relatively steady and consistent because they would be unaffected by fluctuations in the market prices of portfolio securities. Applicant states that while unrealized gains and losses would then be reflected in the determination of net asset value, Applicant's price per share for purposes of sales and redemptions should continue to remain constant at $1.00 because of the rounding off of its net asset value to the nearest one cent on a per share value of one dollar.

Applicant asserts that such valuation practices will benefit Applicant and its shareholders. Applicant is designed for institutional and individual investors who seek safety of principal, excellent liquidity, a stable value of $1.00 per share and a steady flow of current income. Applicant states that its Board of Directors has determined in good faith that the stable per share and the steady flow of investment income resulting from the foregoing policies will be of benefit to existing shareholders and in attracting new shareholders to Applicant. All such investors, Applicant states, will continue to have the convenience of readily determining the aggregate value of their holdings simply knowing the prices of shares they own at the $1.00 per share value and the convenience of maintaining investment records that do not require periodic adjustments for nominal capital gains and losses. In addition, Applicant states that its Board of Directors has determined that investment decisions by many of the investors for which Applicant is designed, principally fiduciaries, will be facilitated by Applicant's steady flow of current income.

Rule 22c-1 under the Act provides, in part, that no registered investment company issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security by the holders of such security.
NOTICES

12308

9786). All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it proposes to operate as a "money market fund" investing in marketable obligations of the United States, its agencies and instrumentalities and repurchase agreements admitted for their ratification. Applicant states that it is designed as an investment vehicle for investors with temporary cash balances or cash reserves, and that its investment objectives, in the following order of priority, are: safety of principal, excepted credit risks, and maximum current income to the extent consistent with the first two objectives. It also states that Manufacturers Hanover Trust Company will act as investment adviser to Applicant and that Alliance Capital Management ("Management"), a wholly-owned subsidiary of Donaldson, Lufkin & Jenrette, Inc., will act as Applicant's administrator and distributor.

Applicant states that at the present time it has only one director, who is affiliated with Management, and that when the full board of directors has been elected, including a majority of persons who are not "interested persons" of Applicant, the application, including the representations and undertakings contained therein, will be submitted for their ratification.

According to the application, Applicant's investment and related management policies will have the following characteristics:

1. Applicant's portfolio will be invested exclusively in marketable obligations of, or guaranteed by, the Government of the United States, its agencies or instrumentalities and repurchase agreements pertaining to such securities limited to transactions with financial institutions believed by the adviser to present minimum credit risks.
2. Investments will be made only in instruments having a remaining maturity of one year or less.
3. Applicant may seek to improve portfolio income by selling portfolio securities prior to maturity in order to take advantage of yield disparities that occur in money markets.
4. Contingent upon the granting of the exemption requested, net asset value per share will be computed, for purposes of daily pricing, to the nearest one percent (one cent on a per share basis) of one dollar.

Applicant states that in all other respects, its portfolio securities will be valued in accordance with the views of the Commission as set forth in IC-9786.

Applicant asserts that Management has determined from its experience that these policies will benefit Applicant and its shareholders. Applicant is designed for institutional and individual investors seeking safety of principal, excellent liquidity and a steady flow of current income. Applicant argues that these investors believe that the daily income declared by the money market funds in which they are invested is earned by them, and that the sales and redemption prices should not change. Applicant represents that its sole director has determined in good faith that the stability of capital and steady flow of investment income resulting from the foregoing policies will be helpful in attracting potential investors in Applicant and will provide such investors substantial benefit. Applicant states that such investors will have the convenience of being able to determine the aggregate value of their holdings simply by knowing the number of shares they own at the $1.00 per share value and the task of maintaining an investment record will be made easier than if nominal capital gains and losses were realized upon redemption. The application also states that the making of investment decisions by many of the investors for which Applicant is designed, principally fiduciaries, will be facilitated by virtue of Applicant's steady flow of current income.

Rule 22c-1 under the Act provides, in part, that no investment company issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security. Rule 2a-4 under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution and redemption shall be determined with reference to (1) current market value for portfolio securities subject to which market quotations are readily available and (2) for other securities and assets fair value as determined in good faith by the board of directors of the registered investment company. In IC-9786 the Commission issued an interpretation of Rule 2a-4 expressing its view that it was inconsistent with Rule 2a-4 for certain money market funds to "round off" calculations of their net asset value per share to the nearest one cent on a share value of $1.00, because such a calculation might have that effect of masking the impact of changing values of portfolio securities and therefore might not "reflect" the portfolio valuation as required by Rule 2a-4.

Section 6(c) of the Act provides, in part, that the Commission may, upon application, exempt any person, security or transaction or any class or classes of persons, securities or transactions, from any provision or provisions of the Act and rules thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant submits that the request for exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicant asserts that a substantial number of money market funds now offer the public a steady $1.00 price for their shares and experience has shown that such funds provide a useful investment vehicle for the investors they serve. Applicant states that its request for exemption is based upon its policies, and Applicant has agreed that, in order to attempt to assure the stability of its price per share, the order it seeks may be conditioned upon the following:

1. Applicant's Board of Directors, in supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, undertakes—as a particular responsibility within its overall duty of care owed to the shareholders of Applicant—to assure to the extent reasonably practicable, taking into account current market conditions affecting Applicant's investment objectives, that Applicant's price per share as computed for the purpose of sales and redemptions, rounded to the nearest cent, will not deviate from one dollar.
2. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per share. Applicant will not purchase a portfolio security with a remaining maturity of greater than one year, nor will it maintain a dollar-weighted average portfolio maturity in excess of 120 days.
3. Applicant will hold in a portfolio of money market instruments consisting exclusively of marketable securities issued or guaranteed by the Government of the United States or its agencies or instrumentalities and repurchase agreements pertaining to such securities limited to transactions with financial institutions believed by the adviser to present minimum credit risks.

NOTICE IS FURTHER GIVEN that any interested person may, not later than March 23, 1979, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanying a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request may be served by personal delivery to Applicant or by mail upon Applicant at the address stated above. Proof of such serv-

[8010-01-M]

COLUMBIA GAS SYSTEM, INC., ET AL

Supplemental Order Relating to Allocation of Consolidated Tax Liability for Taxable Year 1978 by Method Other Than Prescribed by Rule 45(b)(6).

By order dated February 2, 1979 in this proceeding, the Commission authorized the Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its subsidiary com-
panies named above, to allocate the system’s consolidated federal income tax liability for 1978 by a method other than prescribed in Rule 45(b)(6), promulgated under Section 12 of the Public Utility Holding Company Act of 1935 (“Act”). That order stated that the tax loss for 1978 for Development U.S. and Development Canada was estimated to be $8,796,799 and $4,583,940, respectively.

The companies have filed a post-effective amendment in this proceeding informing the Commission that Development U.S. Inc. has submitted to the Public Utility Holding Company Act of 1935 (“Act”) a plan for the resolution of the tax liability of Development U.S. Inc. for the year ended December 31, 1978.

We have amended, several times, the date upon which PRI’s withdrawal from listing and registration on the PSE becomes effective; the last such date is the effective date was February 2, 1979.

We found that the initial delay in the effective date of the delisting and the extension until February 2, 1979 were necessary principally because a temporary disruption in trading in PRI stock on the PSE would result in a lessening of potential competition among dealers and between exchange markets and markets other than exchange markets during any interim period after delisting, but before unlisted trading privileges are (if at all) granted.

Our ultimate determination on the PSE application for unlisted trading privileges in PRI stock involves the consideration of several major policy issues including, among others, whether sufficient progress has been made toward the development of a national market system to satisfy the standards of Section 12(f)(2), whether the progress contemplated by Congress in adopting that Section is met by PRI’s application for unlisted trading privileges, and whether the statutory goals of eliminating unnecessary burdens on competition are satisfied by existing communications facilities and other means for access between the PSE and over-the-counter (“OTC”) markets, and whether last sale reporting of all PRI stock transactions would be appropriated should unlisted trading privileges be granted.

We have not yet resolved these issues insofar as they arise with respect to our consideration of the PSE application for unlisted trading privileges and, accordingly, have been unable to complete our deliberations concerning the hearing on that application. We believe, however, that the purposes of the Act, particularly those

which encourage competition among dealers acting as market makers in a security and between markets in that security, make it appropriate for us to permit the existing competition in PRI stock to continue during any interim period necessary for us to conclude our deliberations. Accordingly, for the principal reason enunciated in the June 22 delisting order, and as stated above, we find it necessary to extend until August 2, 1979 the effective date of removal of PRI stock from listing and registration on the PSE.

PRI stock has been traded both on the PSE and OTC since issuance of our June 22 order. At that time we also exempted, for a period of up to 120 days, the National Association of Securities Dealers, Inc. (“NASD”) and all brokers and dealers from the reporting requirements of Rule 17a-15 under the Securities Exchange Act of 1934 relating to last sale reports of OTC transactions in the common stock of PRI. The exemption was amended in our extension order we February 2, 1979. Until we make a determination of the PSE’s application for unlisted trading privileges in PRI stock, we believe that there will be uncertainty as to whether real-time reporting in PRI stock will be required as a general matter and that a continued exemption from 17a-15 is appropriate.

We continue to believe that it is not necessary in the public interest or for the protection of investors to require members of the PSE, who may trade PRI stock in the OTC market and other brokers and dealers to develop and implement reporting procedures for transactions in this single security during the time before we make a determination as to the PSE’s application. Accordingly, we have determined to, and hereby exempt, until August 2, 1979, the NASD and all brokers and dealers from the requirements of Rule 17a-15 relating to last sale reports of OTC transactions in the common stock of PRI.

Through inadvertence, the Commission failed to consider this matter before the previous extension of the

---

Amending Effective Date of Withdrawal

Order Amending Effective Date of Withdrawal

From Listing and Registration and Extending the Exemption of Certain Persons and Securities From the Provisions of Rule 17a-15

February 27, 1979.

On June 22, 1977 we approved the application of Pacific Resources, Inc. ("PRI") to withdraw its securities from listing and registration on the Pacific Stock Exchange Incorporated ("PSE"). 1 We prescribed a term of that delisting that it not become effective until the time of our determination with respect to the PSE's application for unlisted trading privileges in PRI common stock, but in event

---

1 The PSE filed an application, pursuant to Section 12(f)(1)(C)(lll) of the Securities Exchange Act of 1934, for unlisted trading privileges in PRI stock on March 29, 1977 in response to PRI's application to withdraw that security from listing and registration on the PSE (filed March 23, 1977). The application was granted.

2 The PSE has exempted from its off-broker trading restrictions securities, such as PRI stock, which are both the subject of a delisting application and in which the PSE has applied for unlisted trading privileges. See Securities Exchange Act Release No. 15030 (August 3, 1978).

3 In addition, we had noted that if delisting were effective immediately, new extension of margin credit would be prohibited until the security was admitted to the List of Public Utility Holding Companies Inc. by the Board of Governors of the Federal Reserve System. PRI common stock was so admitted on October 2, 1978.

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 08/06-0211]

ENERGY ASSETS, INC.
Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1978)), under the name of Energy Assets, Inc., 1800 South Tower, Pennzoll Place, Houston, Texas 77002, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders are as follows:

Matthew R. Simmons, 2240 Sunset Blvd., Houston, Texas 77005, President, Director. Laurence E. Simmons, 3711 San Felipe, Houston, Texas 77027, Executive Vice President, Director. Nicholas L. Spykta, 1930 Addison, Houston, Texas 77030, Secretary, Treasurer, Director. Simmons & Company International 1800 South Tower, Pennzoll Place, Houston, Texas 77002, 100 percent, Shareholder.

There is to be only one class of stock with 1,000,000 shares of common stock authorized. Simmons & Company International (SCI) will own initially all the issued and outstanding stock. SCI is a closely held corporation. The persons owning ten percent or more of SCI and their respective ownership interests are: Matthew R. Simmons (42 percent), Laurence E. Simmons (33 percent) and R. Michael Huffington (13 percent).

The Applicant proposes to conduct its operations principally in the State of Texas.

The Applicant intends to emphasize, as much as is practicable, equity investments in companies which provide support services, supplies and equipment to the energy related industry.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

OFFICE OF THE CHIEF COUNSEL FOR ADVOCACY

Hearing

Pursuant to statutory authority set forth in Section 603(d) of Title 15, United States Code, the Chief Counsel for Advocacy of the Small Business Administration, Milton D. Stewart, Esq., with the approval of the Administrator A. Vernon Weaver, will conduct public hearings in Boston, Massachusetts, on March 14, 1979, on Small Fuel Oil Dealers' Price and Supply Problems. The hearings will convene at 10:00 a.m. (EST) at Faneuil Hall in Boston.

The Office of the Chief Counsel for Advocacy will consider the adequacy of current Federal assistance and regulations to small fuel oil dealers and Federal policy to promote competition in this field and assure the public of adequate fuel supplies.

Participants will include small fuel oil dealers, pertinent trade association representatives, executives of major oil companies, and concerned government officials.

The hearing is open to the public. Any member of the public may make a verbal statement, but must file a written statement prior to the hearing. Any member of the public may file a written statement with the Office of the Chief Counsel for Advocacy before, during or after the hearings. All communications or inquiries regarding these hearings should be addressed to:

Jere W. Glover, Office of the Chief Counsel for Advocacy, U.S. Small Business Administration, 1441 L Street, N.W., Room 210, Washington, D.C. 20416 (202) 653-6393, or John McNally, Small Business Administration, 69 Batterymarch Street, Boston, Massachusetts 02110, (617) 223-4465.

MILTON D. STEWART,
Chief Counsel for Advocacy.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FR A Emergency Order No. 11-Notice 3]

EMERGENCY ORDER LIMITING MOVEMENT OF HAZARDOUS MATERIALS

On February 7, 1979, the Federal Railroad Administration (FRA) issued Emergency Order No. 11 placing certain restrictions on the movement of railroad freight cars containing materials required to be placarded in accordance with DOT regulations, 49 CFR Parts 170-189 (placarded hazardous materials cars), by the Louisville and Nashville Railroad Company (L&N), and by other railroads over L&N owned or leased track (44 FR 8402). That Order was subsequently amended on February 16, 1979 (44 FR 10559).

Under the authority of 45 U.S.C. 432 and 49 CFR 211-47, the L&N has requested an administrative hearing on Emergency Order No. 11, and has further requested a prehearing conference before the Administrative Law Judge assigned to hear this matter.

A prehearing conference on this matter will be held on March 7, 1979, at 9:30 a.m., in a hearing room to be announced, at the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20462. Administrative Law Judge Samuel Kanell will preside at the prehearing conference and at the administrative hearing on Emergency Order No. 11, which will commence on March 14, 1979, at 1:00 p.m., in a hearing room to be announced, at the Federal Energy Regulatory Commission.

Further information concerning this matter may be obtained by contacting Kenneth Gradia, Office of Chief Counsel, Federal Railroad Administration 202-224-6220 or Judge Kanell (202-224-3994).

DEPARTMENT OF THE TREASURY

Customs Service

FERROALLOYS FROM SPAIN

Receipt of Countervailing Duty Petition and Initiation of Investigation

AGENCY: United States Customs Service, Treasury Department.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: A satisfactory petition has been received and a countervailing duty investigation has been started to determine if benefits are paid by the government of Spain to exporters of certain ferroalloys which constitute the payment of a bounty or grant within the meaning of the U.S. countervailing duty law. A preliminary determination will be made not later than June 12, 1979, and a final determination not later than December 12, 1979.

EFFECTIVE DATE: March 6, 1979.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: A petition in satisfactory form was received on December 12, 1978, from counsel for the Ferroalloys Association, alleging that benefits conferred by the Government of Spain upon the exportation of certain ferroalloys from Spain constitute the payment or bestowed of a bounty or grant within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

The ferroalloys specified in the petition and subject to this investigation, along with their appropriate item number in the Tariff Schedules of the United States Annotated (TSUSA), include Ferrochrome (over 3 percent carbon), TSUSA 607.3100; ferromanganese (1-4 percent carbon), TSUSA 607.3600; ferromanganese (over 4 percent carbon), TSUSA 607.3700; and ferronilicon (80-90 percent silicon) TSUSA 607.5100. All of these products are dutiable.

The petitioners have requested that said products be determined as dutiable for purposes of the investigation.

NOTICES

PRIVACY ACT OF 1974
Personnel Verification System

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Proposed new system of records.

SUMMARY: This notice is an advisory to the public that the United States Customs Service proposes to establish a new system of records on individuals called the Personnel Verification System which is subject to reporting and notice requirements of the Privacy Act of 1974 (5 U.S.C. 552a). The purpose of this notice is to give the public 30 days to comment on the proposed use of the system described.

The Personnel Verification System is designed to protect against any unauthorized usage of the service provided by Regional Communication Centers (RCC’s). The system contains the names and other individual identifiers of all Customs and non-Customs personnel authorized usage of the RCC’s. RCC personnel will use the Personnel Verification System to establish positive identity of the requester.

The Personnel Verification System is effective after the 30-day comment period required for the new system. The proposed date is April 23, 1979, to include the 60 day advance notice for the Office of Management and Budget.

ADDRESS: Comments should be addressed to the Assistant Commissioner (Enforcement Support), U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:
Linda Hartford, Entry Procedures and Penalties Division, Office of Regulations and Rulings, United States Customs Service. However, personnel from other offices of the United States Customs Service participated in its development, both on matters of substance and style.

W. J. MCDONALD, Acting Assistant Secretary (Administration).

Treasury/Customs 00.224

System name: Personnel Verification System (PVS).

System location: Office of Enforcement Support, U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C. 20229, and Regional Offices of the U.S. Customs Service. See Customs Appendix A.

Categories of individuals covered by the system:
Authorized Customs personnel and non-Customs personnel who have received authorization to use the Regional Communications Centers.

Categories of records in the system:
Individual identifiers including but not limited to name, office address, home address, office telephone number, home telephone number, badge number, social security number, radio call sign, page number, organization, and unit.

2. Tax-free export investment reserve. Exporters may transfer as much as 50 percent of the export profits to a tax-free investment reserve, which may be used to invest in export-related assets in Spain or to support export offices and promotion activities abroad.

3. Regional development tax incentives. Special tax incentives and cash subsidies are granted for undertaking industrial projects in certain designated areas.

4. Several preferential credit programs available for a variety of purposes, such as construction loans, operating capital loans, short-term prefinancing loans, deferred payment loans, commercial services loans, exporter's card and foreign buyer loans.

Pursuant to section 303(a)(4) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(4)), the Secretary of the Treasury is required to issue a preliminary determination as to whether or not any bounty or grant is being paid or bestowed within the meaning of that statute within 6 months of receipt, in satisfactory form, of a petition alleging the payment or bestowal of a bounty or grant. A final determination must be issued within 12 months of the receipt of such a petition.

Therefore, a preliminary determination on this petition will be made no later than June 12, 1979, as to whether or not the alleged payments or bestowals conferred by the Government of Spain upon the exportation of the merchandise described above constitute a bounty or grant within the meaning of section 303 of the Tariff Act of 1930, as amended. A final determination will be issued no later than December 12, 1979.

This notice is published pursuant to section 303(a)(3) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)(3)), and section 159.47(c)(5), Customs Regulations (19 CFR 159.47(c)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, the provisions of Treasury Department Order 165, Revised, November 2, 1954, and section 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the initiation of a countervailing duty investigation by the Commissioner of Customs, are hereby waived.

HENRY C. SZOGKEZ, Jr., Acting General Counsel of the Treasury.

[4880-01-M] Internal Revenue Service

TAX BASE FOR EXCISE TAX—TRUCK PARTS OR ACCESSORIES, SPORTING GOODS, FIREARMS INDUSTRIES

Determination of Constructive Sale Price on Retail Sales

AGENCY: Internal Revenue Service, Department of the Treasury.

ACTION: Notice of proposal to publish constructive sale price percentages for automotive parts or accessories, sporting goods, and firearms industries.

SUMMARY: For the guidance of taxpayers and others, the Internal Revenue Service proposes to publish percentage retail sale prices to be used as constructive sale prices where manufacturers, producers, and importers sell retail automotive parts or accessories, sporting goods, and firearms. Therefore, the Internal Revenue Service would appreciate information comparing prices at which taxable automotive parts or accessories, fishing equipment, bows and arrows and firearms are sold at retail with the highest prices of such articles sold to wholesale distributors in the ordinary course of trade. Where no sales to wholesale distributors are made then the comparison at retail would be with the lowest price to dealers in the ordinary course of trade.

DATE: Written comments should be mailed or delivered by April 30, 1979.

ADDRESS: Written comments should be mailed or delivered to Chief, Wage, Excise and Administrative Provisions Branch (T:I:WEA), Internal Revenue Service, room 5202, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Baer, room 5202, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

[4810-25-M] Office of the Secretary

CLASS’ LIFE ASSET DEPRECIATION RANGE SYSTEM: NOTICE OF STUDY OF TELECOMMUNICATIONS ASSETS

The Office of Industrial Economics (OIE), of the office of the Secretary of the Treasury, has initiated a study of guideline depreciation periods and repair allowance percentages for telecommunications assets currently covered by asset guideline classes 48.11 through 48.45. (Revenue Procedure 77-10, I.R.B. 1977-12 (3/21/77)), under the Class Life Asset Depreciation Range System (Secs. 167(m) and 283(e)), Internal Revenue Code of 1954.

All persons interested in this study may submit comments in writing to OIE. Persons who are interested in submitting relevant information are invited to attend a meeting in Washington, D.C., on March 29, 1979 at which information needs and procedures for obtaining and analyzing the requisite information will be discussed. The agenda for the meeting and exact time and place may be obtained by writing to OIE.

All communication concerning this study should be addressed to:
Office of Industrial Economics, Project 48, P.O. Box 28018, Washington, D.C. 20005.

Dated: March 1, 1979.

Approved by:

KARL RUHE
Director, Office of Industrial Economics.

[7035-01-M] INTERSTATE COMMERCE COMMISSION

ASSIGNMENT OF HEARINGS

[Notice No. 34]

March 1, 1979.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

CHESSIE SYSTEM

Amended System Diagram Map

Notice is hereby given that, pursuant 
to the requirements contained in 
Title 49 of the Code of Federal Regu-
lations, Part 1121.23, that the Chessie 
System, has filed with the Commission 
its color-coded system diagram map 
in docket No. AB 18 (SDM). The map 
reproduced here in black and white 
are reasonable reproductions of that 
amended system diagram map and the 
Commission on January 24, 1979, 
received a certificate of publication as 
required by said regulation which is 
considered the effective date on which 
the system diagram map was filed.

Color-coded copies of the map have 
been served on the Governor of each 
state.

1AB 18 (SDM), The Chessie System includes 
AB 19 (SDM), The Baltimore and 
Ohio Railroad Company and AB 69 (SDM), 
The Western Maryland Railway Company.
state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the office of the Commission, Section of Dockets by requesting docket No. AB 18 (SDM).

H. G. Homme, Jr.,
Secretary.

THE CHESAPEAKE AND OHIO RAILWAY COMPANY
SYSTEM DIAGRAM MAP

In accordance with regulations of the Interstate Commerce Commission (49 CFR Part 1121), the following is a description of a line of railroad located in this county, as classified and depicted on the above map, which The Chesapeake and Ohio Railway Company anticipates will be the subject of an abandonment or discontinuance application to be filed within 3 years (Category 1):

KENTUCKY
Map Code [22]

(a) Preston Street Yard.
(b) Located in Commonwealth of Kentucky.
(c) Located in Jefferson County, City of Louisville.
(d) Station 4+20 to Station 32+32 in Louisville, a distance of 0.53 mile and within the limits of Preston Street Yard.
(e) No agency station located on line.

(f) Comments: C&O will abandon operations at ConRail's Preston Street Yard and operate into and out of L&N's South Louisville and Strawberry Yards under trackage rights agreement.

A copy of the complete System Diagram Map will be made available, upon request and payment in advance of a check or money order in the amount of $5.00. Make check or money order payable to The Chesapeake and Ohio Railway Company. If requested, a copy of the above description and portion of the Chesapeake System Diagram Map will also be made available at no cost. Requests should be made to: The Chesapeake and Ohio Railway Company, Director of Regulatory Economics (314), One Charles Center, Baltimore, Maryland 21201.

THE CHESAPEAKE AND OHIO RAILWAY COMPANY

MISSISSIPPIAN RAILWAY

System Diagram Map

Notice is hereby given that, pursuant to the requirement contained in Title 49 of the Code of Federal Regulations, Part 1121.32, that the Mississippian Railway, has filed with the Commission its color-coded system diagram map in docket No. AB 203 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on January 16, 1979, received a certificate of publication as required by said regulations which is considered the effective date on which the system diagram was filed.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 203 (SDM).

H. G. Horne, Jr., Secretary.

**DESCRIPTION OF LINE CATEGORY**

1121.20(b)(1)

The systems diagram map of the Mississippian Railway attached hereto indicates the rail line which the carrier anticipates will be subject to abandonment.

The line which is designated as the Mississippian Railway Main Line is located in Monroe and Itawamba Counties of the State of Mississippi. The portion included is from the beginning of the line at Mile Post 0 to end of line at Mile Post 24. Agencies or terminal stations located on this portion of line include Amory, Mississippi at Mile Post 0 and Fulton, Mississippi at Mile Post 24.

WESTERN PACIFIC RAILROAD CO.

Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in
Title 49 of the Code of Federal Regulations, Part 1121.23, that the Western
Pacific Railroad Company has filed with the Commission its color-coded
system diagram map in docket No. AB 105 (SDM). The maps reproduced here
in black and white are reasonable reproductions of that amended system
diagram map and the Commission on January 26, 1979, received a certificate
of publication as required by said regulation which is considered the effec-
tive date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each
state in which the railroad operates and the Public Service Commission or
similar agency and the State designated agency. Copies of the map may also
be requested from the railroad at a nominal charge. The maps also may be
examined at the office of the Commission, Section of Dockets, by requesting
docket No. AB 105 (SDM).

H. G. HOMME, JR.,
Secretary.

THE WESTERN PACIFIC RAILROAD
SYSTEM MAP (FIRST AMENDMENT)

DESCRIPTION OF LINES IN CATEGORY 1 (49 CFR
1121.21 AND 1121.23)

In compliance with requirements of 49
CFR 1121.23, the Western Pacific Railroad
Company herein amends its system diagram
map and provides a description of the line
identified on its system diagram map as
being placed within category 1 (49 CFR
1121.20(b)(1)). This is Western Pacific's only
such line and it falls within category 1 (49
CFR 1121.20(b)(1)), a description thereof is
as follows:

1. The line is designated as the Bieber-
Hamboine Line.

2. The line is located within the State of
California.

3. The line is located within the Counties of
Lassen, Modoc, and Siskiyou.

4. The line extends in a northwesterly di-
rection from Milepost 111.808 at Engineer's
Station 4868+22 on the center line of the
Northern California Extension of the Western
Pacific Railroad Company at Station
Bieber, in the County of Lassen, for a dis-
tance of 9.035 miles along the main track of
Burlington Northern to Station Lookout, in
the County of Modoc, and continues along
the branch line track of Burlington Northern
33.19 miles to point of connection with
McCloud River Railroad 2,100 feet east of
Railroad Station Hamboine, in the County of
Siskiyou.

5. There are no agency or terminal sta-
tions on the line.

As indicated by its category designation,
an application for authority to abandon this
line is proposed to be filed with the Inter-
state Commerce Commission within three
years from the date hereof and will be as-
signed Docket No. AB-105 (Sub No. 1F).

Dated: December 1, 1978.

EUGENE J. TOLE, ATTORNEY FOR THE WESTERN PACIFIC
RAILROAD COMPANY.

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 10 a.m., Thursday, March 25, 1979.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Portions open to the public:

1. Agenda.
2. Minutes.
3. Ratifications.
4. Petitions and complaints, if necessary:
   a. Resistor chips (Docket No. 561).
   b. High-voltage circuit interrupters (Docket No. 551).
5. Certain cigarette holders (Inv. 337-TA-51)—vote.
6. Any items left over from previous agenda.

Portions closed to the public:

7. Status report on investigation 332-101 (MTN Study), if necessary.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161.

6

NUCLEAR REGULATORY COMMISSION.

PLACE: Commissioners' Conference Room, 1717 H St., N.W., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

THURSDAY, MARCH 8, 9:30 A.M.

1. Discussion of Legislative Proposals. (Approximately 2 hours—public meeting)
2. Affirmation Session. (Approximately 10 minutes—public meeting)

Effective Amendments to 10 CFR Parts 30, 40 and 70 Timely Notification of Discontinued License Programs (Proposed)
Order in ALAB-592 (Rochester Gas & Elec)

Order in ALAB-523, Skagit Contractor Conflicts of Interest

THURSDAY, MARCH 8, 1:30 P.M.

1. Discussion of Proposed Civil Penalties Legislation. (Approximately 1 hour—public meeting)
2. Time Reserved for Possible Continuation of Discussion of Legislative Proposals. (Approximately 2 hours—public meeting)

CONTACT PERSON FOR MORE INFORMATION:

Walter Magee, 202-634-1410.

ADDITIONAL INFORMATION: The meetings scheduled for March 1, 1979 (Discussion of Legislative Proposals and Affirmation Session) were postponed.

Dated: March 1, 1979.

WALTER MAGEE,
Office of the Secretary.

[S-441-79 Filed 3-2-79; 3:26 pm]

[4410-01-M]
SUNSHINE ACT MEETINGS

STATUS: Closed, pursuant to a vote to be taken at the beginning of the meeting.

MATTER TO BE CONSIDERED: Referrals from Regional Commissioners of approximately 15 cases in which inmates of Federal Prisons have applied for parole or are contesting revocation of parole or mandatory release.

CONTACT PERSON FOR MORE INFORMATION:

A. Ronald Peterson, Analyst, 202-724-3094.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

Tax Exemption of Obligations of Public Housing Agencies

Final Rule
RULING AND REGULATIONS

TITLE 24—HOUSING AND URBAN DEVELOPMENT

CHAPTER VIII—LOW-INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[DOCKET NO. R-79-558]

PART 811—TAX EXEMPTION OF OBLIGATIONS OF PUBLIC HOUSING AGENCIES AND RELATED AMENDMENTS

Final Rule

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: The August 3, 1977 final rule (24 CFR Part 811, Subpart A) with respect to tax-exempt obligations issued to finance Section 8 projects is being amended for the purpose of providing low-income housing at the lowest possible costs and rents consistent with expeditious processing. The revision is intended:

1. To clarify and strengthen other provisions of the Section 8 program regulations (24 CFR Parts 800, 881 and 883).
2. To provide guidelines for approving the amount of the obligations and the interest rate;
3. To clarify and strengthen other requirements.

EFFECTIVE DATE: April 5, 1979. These regulations are effective with respect to projects for which the Section 8 notification of selection of the preliminary proposal is issued on or after the effective date of these regulations; however, upon the owner’s request, HUD field offices may process proposals for which the notification of selection was issued prior to such effective date in accordance with these regulations provided that there is full compliance with the amended regulations and related instructions.

FOR FURTHER INFORMATION CONTACT:

Michael Smilow, Acting Director, Bond Financed Division, Department of Housing and Urban Development, Washington, D.C. 20410, 202-755-5945 (not a toll free number).

SUPPLEMENTARY INFORMATION: The Department gave notice on July 14, 1978, at 43 FR 30498, proposing to amend Title 24 of the Code of Federal Regulations by revising Subpart A of Part 811. The comment period closed August 16, 1978. The Department received approximately 80 comments from private parties and offices within the Department. All comments, including those received after the deadline, were considered and significant changes were made as a result of the comments. The discussion below explains the reasons why certain changes were made and some recommendations were not adopted.

A major criticism of the proposed regulations was based on Section 817 of the HCD Act of 1974 and Section 8(e)(2) of the U.S. Housing Act of 1937. These provisions state that assistance shall not be withheld or made subject to conditions or preferences by reason of the tax-exempt status of the obligations issued to provide financing for a project, except for otherwise expressly provided or authorized by law. Commentors pointed out that a number of the changes proposed in the July 14, 1978 proposed rule, as compared to the August 3, 1977 final rule, were Section 8 matters that should not be imposed only on Section 8 projects financed with tax-exempt obligations.

The Department recognized this during the draft proposed regulations, and has been working on a general redrafting of the Section 8 program regulations (24 CFR Parts 800, 881 and 883). These requirements were included in the July 14, 1978 publication for purposes of inviting public comment because it was the Department’s intention to consider their inclusion to the extent appropriate in the Section 8 program regulations. We have now deleted from this subpart those requirements that are Section 8 program matters not directly related to tax-exempt financing. Among the items deleted are: profit restrictions and control of project finances; operating deficit escrows; HUD reviews of plans and specifications; restrictions on term of contract; and changes in FHA processing. To the extent considered appropriate, these will be included in the amended Section 8 program regulations and will apply only to all projects subject to this Subpart, since all such projects are subject to the applicable Section 8 regulations.

We have retained requirements directly related to tax-exempt financing that provide what we believe are necessary controls over the use of the Federal subsidy that is provided by tax-exempt financing. These requirements are not new, since, with a few exceptions, they were included in the August 3, 1977 final rule. The Subpart now provides guidelines to HUD field offices as to how they are to determine development cost, cost of issuance, servicing fee and yield (“interest rate” previously). Other provisions are restatements and clarifications of what was previously required by Part 811 or the applicable Section 8 program regulations for all tax-exempt financing. The provisions that were not included in the August 3, 1977 final rule, such as the FHA as contract administrator, verification of estimates at completion and inspections during construction, were included in the proposed rule and are directly related to this method of financing.

We have included a specific reference (§ 811.101(d)) to the waiver authority, provided in 24 CFR Part 899, that may be exercised by the Assistant Secretary for Housing where good cause for an exception can be shown. The regulations impose limits that may be inappropriate for a particular project, and where it can be shown that an exception will serve the overall objective of a successful project within reasonable cost limits, a request for waiver will be considered. Such requests should be addressed to the field office with the appropriate documentation.

A discussion of the major changes from the proposed rule is set forth below.

1. Changes in Definitions (§ 811.102).
   Ancillary cost of servicing and expenses of issuance were changed to servicing fee and cost of issuance; definitions of capitalized interest, construction, and HCD Act of 1974 and Section 8(e)(2).

2. Changes in Definitions (§ 811.103).
   The definition of yield is in accordance with the true interest cost method. The definition of yield is in accordance with the true interest cost method. With respect to tax-exempt financing, the definition of yield is in accordance with the true interest cost method.

3. Section 811.103(a) includes two provisions previously included in the definitions. The requirement that all units be Section 8 units has been retained to assure that the subsidy provided in the form of tax exemption results in units available to low-income families. Commercial space has been permitted within stated limits.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
4. Section 811.103(b) requires that a public entity PHA either own the project or agree to administer the contract pursuant to an ACC with HUD. Because the public entity PHA has the major responsibility for initiating a Part 811 financing (either by issuing the obligations itself or by establishing the relationship that permits the agency or instrumentality PHA to issue such obligations), the Department expects that the public entity PHA will accept a continuing responsibility for assuring that the project continues to be operated in compliance with the contract. Section 811.103(b), as amended to provide a more detailed explanation, requires the public entity PHA, if it does not own the project, to agree to administer the contract pursuant to an ACC with HUD and to agree that in the event there is a default under the contract, to pursue further remedies to achieve compliance with the contract, including operation and possession of the project. If the field office finds that the PHA does not have the capacity to perform these functions, the Assistant Secretary for Housing may approve alternative contractual arrangements for performing these functions. We believe that this provides for the assumption by the public entity PHA of appropriate responsibilities while allowing necessary flexibility in HUD to permit alternative methods of accomplishing the same goals where this is shown to be necessary.

5. The requirement that the counsel for the PHA be "acceptable to the field office" has been deleted from §§811.104 and 811.105. HUD field office counsel will be instructed to require that these opinions address all necessary points, but that field counsel must independently conclude that all requirements under this Subpart have been met. A corresponding change was made in §811.107(a)(4) with regard to the legal opinions required with regard to the legality of the financing documents.

6. There were objections to the requirements in §§811.104 and 811.105 that the PHA have at the time of its application the administrative capability to perform its responsibilities. This language has been changed to require that the applicant "has or will have" the capability. This showing could be made by submitting a staffing plan demonstrating that the PHA will be adequately staffed for the particular functions it proposes to assume. Where the entity's functions are limited to assisting in financing a project, the capability could be similarly limited.

7. The restriction to a 30 year term for the contract for elderly projects has been deleted since it is a Section 8 program matter. The term of the contract for FHA-insured projects will be for a maximum of 20 years in accordance with previously published instructions from the Assistant Secretary for Housing; it has been deleted from this Subpart as unnecessary.

8. The ceiling that has to be for the total number of years approved by the field office rather than the 5 year term with an option to renew permitted by the Section 8 program regulations. In addition to suspension or termination of the subsidy, the default provisions of the contract will explicitly provide that HUD and the PHA may apply to a court for specific performance of the contract or may pursue other remedies to obtain correction of any default. The field office will notify the trustee of a default and provide an opportunity for the trustee to correct the problem before action is taken to suspend or terminate the contract.

9. Section 811.103 of the proposed rule would have changed requirements for FHA-insured projects. This is inappropriate for this Subpart. Accordingly, we have deleted: (a) The calculation of market income (§811.108(a)(1)); (b) the increased expenses of issuing that can be included in the FHA-insured mortgage beyond the usual 3 1/2% (§811.108(a)(2)); and (c) the operating deficits escrow (§811.108(a)(4)). An explicit reference to the percentage amount (currently 3 1/2%) that may be included in the FHA-insured mortgage for the cost of issuance has been added. We believe that the additional cost of issuance or capitalization interest during construction on escrowed permanent obligations may not be included in the mortgage or in the obligations for which funds are released.

10. We have continued to restrict to six months the debt service reserve for FHA-insured projects. The reserve will be used to protect the bondholders from loss during the time period from default by the owner under the mortgage until payment of the insurance claim. A six month reserve should be adequate for this purpose.

11. Several changes were made in the wording of §811.108(b), with respect to non-FHA-insured projects, to clarify the meaning and to permit greater flexibility. The allowance for vacancies will be determined by the field office, based on the judgment of actual anticipated vacancies. The percentage limits on the cost of issuance were revised slightly in response to comments and to exclude any underwriter/issuer fee.

12. Section 811.108(a)(3) and 811.108(b)(4) were added to explain how the interest rate on the mortgage is related to the required debt service payments on the obligations. The proposed rule was different for FHA-insured and non-FHA-insured projects because of the different treatment of the debt service reserve for these two types of projects.

13. Section 811.108(b)(1) limits the amount of the obligations, except for the debt service reserve and discount, if any, to an amount set by capitalization of project net income at the projected debt service rate, adjusted to provide for the servicing fee, and §811.108(b)(2)(iii) limits development cost to an amount determined to be reasonable by the field office. The field office will review and approve development cost based on the itemized list of costs, rents and expenses submitted by the owner as part of the final proposal, using the FHA Form 2013, which is in part already required by the applicable Section 8 program regulations. The field office will not accept the full review based on owner estimates, as is done for FHA-insured projects, but will examine the owner's estimates to determine if they are reasonably related to the costs of similar projects in the area.

14. Section 811.109 uses the term yield as the basis for determining the obligations are sold by the issuer within the limitations of this Subpart. The ceiling based on the Tandem Plan Index. Competitive bidding is one option. It is not required but is available as an alternative. We have retained the general scheme of relating yield to the 20 Bond Index; comments did not suggest any better way to relate yield to an established nationally known statement of market yields. Criticism was directed more at the basis point differentials. We believe that administrative necessity requires us to relate the decision made by field offices to a known standard. However, to increase flexibility in applying this standard, the basis point differentials will be set quarterly or more frequently by the Assistant Secretary for Housing. This will permit adjustments as needed to reflect market conditions while providing the field office with a clear standard of what is acceptable.

15. There were objections to the requirement in §811.109 that there be either competitive bidding or a yield related to a stated number of basis points above the Bond Buyer 20 Bond Index. Competitive bidding is one option. It is not required but is available as an alternative. We have retained the general scheme of relating yield to the 20 Bond Index; comments did not suggest any better way to relate yield to an established nationally known statement of market yields. Criticism was directed more at the basis point differentials. We believe that administrative necessity requires us to relate the decision made by field offices to a known standard. However, to increase flexibility in applying this standard, the basis point differentials will be set quarterly or more frequently by the Assistant Secretary for Housing. This will permit adjustments as needed to reflect market conditions while providing the field office with a clear standard of what is acceptable.

16. Section 811.110(b)(2) limits the interest rate on tax-exempt interim financing to what the field office determines to be reasonable within a maximum set quarterly or more frequently by the Assistant Secretary for Housing. This is consistent with the limitation for permanent financing and should be more easily administered.
than the Treasury rate in the proposed rule. Where there is an escrow of the interim obligation, investment income which is realized because of the tax-exempt status of the funds is to be used for development cost.

17. Section 811.111 of the proposed rule provided for HUD review of plans and specifications. This is a Section 8 program matter and has been deleted.

18. Section 811.113 now includes the provisions of (b) of the proposed rule which established the certifica-

19. Since we have provided, for non-FHA-insured projects, an expedited means of initially determining the amount of obligations, which includes amounts for development cost and cost of issuance, a check on the accuracy of these estimates is necessary. The regulations do not impose either the full scale cost estimates or the cost certification required of FHA-insured projects. We believe the Government’s interest in the best use of both the Section 8 subsidy and the tax exemption is adequately protected by a simpler and quicker procedure that provides a reasonable assurance that the amounts represented to HUD, as the estimated costs of the project, have been expended for that purpose. The regulations have been amended to make it clear that what is required is a certified statement from the financing agency and a certified statement, audited by an independent public accountant, from the owner as to actual expenditures. The standard of review stated in §811.113(d) is that used in HUD review of certifications by state agencies under 24 CFR Part 883. We believe this standard will permit prompt execution of the contract while affording the Department the required degree of protection against abuses.

20. Section 811.114 and 811.115 of the proposed rule included detailed provisions for the use of project revenues. These have been deleted because they are FHA or Section 8 program matters. The deleted items include: (1) The restriction to non-profit and limited dividend owners (§§ 811.114(a) and 811.115(c)(3)); (2) the prohibition of a gross revenue pledge for FHA-insured projects §811.114(b)); (3) the provision with regard to use of project revenues for non-FHA-insured projects (§811.115(c)); (4) the requirement for an audit of the owner (§811.115(d)). Other provisions of §§811.114 and 811.115 have been incorporated into a single §811.113.

21. Section 811.114(b) explains the required treatment of reserves and accounts for (a) “all project requirements” and (b) “all required payments to the holders of the obligations.” Excess funds in any of the accounts in the second category are not to be disbursed to the owner or financing agency and are therefore to be added to the debt service reserve. Since accounts in the first category are not funded from the obligations or required debt service payments, but rather from project revenues, there is no similar restriction.

22. Section 811.114(c) combines §§811.115(g) and (h) of the proposed rule.

23. Section 811.115(c) reverses the policy stated in the proposed rule (§811.115(c)) to permit state agencies to use the special development proceeds provided in Part 883 in requesting tax exemption under this subpart. They will be required to submit the additional certifications required by this subpart.

A finding of inapplicability regarding the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Office of the General Counsel, Room 20410, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Accordingly, 24 CFR Part 811 is amended as follows:

Subpart A—Tax Exemption, Under Section 11(b) of the Act, of Obligations Issued by Public Housing Agencies to Finance Section 8 Projects

§811.101 Purpose and scope.

(a) Section 11(b) of the Act provides that: “Except as provided in section 5(g), obligations, including interest thereon, issued by public housing agencies in connection with low-income housing projects shall be exempt from all taxation now or hereafter imposed by the United States whether paid by such agencies or by the Secretary. The income derived by such agencies from such projects shall be exempt from all taxation now or hereafter imposed by the United States.”

(b) The purpose of this subpart is to provide a basis for determining tax exemption of obligations issued by public housing agencies pursuant to Section 11(b) or the United States Housing Act of 1937 for Section 8 new construction or substantial rehabilitation projects (24 CFR Parts 880, 881 and 883).

(c) This subpart does not apply to tax exemption pursuant to Section 11(b) for low-income housing projects developed pursuant to 24 CFR Parts 805 and 841.

(1) Where good cause, supported by documentation of the pertinent facts and grounds, is shown, provisions of this subpart, subject to statutory limitations, may be waived pursuant to 24 CFR Part 899.

§811.102 Definitions.

(a) Act. The United States Housing Act of 1937 (42 U.S.C. 1437, et seq.).

(b) Agency or Instrumentality PHA. A not-for-profit private or public organization that is authorized to engage in or assist in the development or operation of low-income housing and that has the relationship to a parent entity PHA required by this subpart.

(c) Agreement. An Agreement to Enter Into Housing Assistance Pay-
ments Contract as defined in the applicable Section 8 regulations. The form of agreement for projects financed with tax-exempt obligations shall be amended in accordance with this subpart.

(d) Annual Contributions Contract (ACC). An Annual Contributions Contract as defined in the applicable Section 8 regulations. The form of ACC for projects financed with tax-exempt obligations shall be amended in accordance with this subpart.

(e) Applicable Section 8 Regulations. The provisions of 24 CFR Parts 880, 881, or 883 that apply to the project.

(f) Capitalized Interest During Construction. The amount necessary for debt service payments on the permanent obligations, less anticipated investment income, during the anticipated escrow period.

(g) Contract. A Housing Assistance Payments Contract as defined in the applicable Section 8 regulations. The form of contract for projects financed with tax-exempt obligations shall be amended in accordance with this subpart.

(h) Cost of Issuance. Ordinary, necessary, and reasonable costs in connection with the issuance of obligations. These costs shall include attorney fees, rating agency fees, trustee fees, printing costs, bond counsel fees, feasibility studies (for non-FHA-insured projects only), consultant fees and other fees or expenses approved by HUD.

(i) Debt Service Reserve. A fund maintained by the trustee as a supplemental source of money for the payment of debt service on the obligations.

(j) Development Cost. Ordinary, necessary, and reasonable costs for planning, land acquisition, demolition, construction or rehabilitation, equipment, and other items necessary for the development or acquisition of a low-income housing project, costs of the interim financing and inspections.

(k) Financing Agency. The PHA (parent entity PHA or agency or Instrumentality PHA) that issues the tax-exempt obligations for financing of the project.

(l) HUD. The Department of Housing and Urban Development.

(m) Low-Income Housing Project. Housing for families and persons of lower income developed, acquired or assisted by a PHA under Section 8 of the Act and the improvement of any such housing.

(n) Obligations. Bonds, notes or other evidence of indebtedness that are issued to provide interim or permanent financing of a low-income housing project. Pursuant to Section 315(b) of the Housing and Community Development Act of 1974, the term obligations shall not include any obligation secured by a mortgage insured under Section 221(d)(3) of the National Housing Act and issued by a public agency as mortgagee in connection with the financing of a project assisted under Section 8 of the Act. This exclusion does not apply to a public agency as mortgagee.

(o) Owner. An owner as defined in the applicable Section 8 regulations.

(p) Parent Entity PHA. Any state, county, municipality or other governmental entity or public body that is authorized to engage in or assist in the development or operation of low-income housing and that has the relationship to an agency or Instrumentality PHA required by this subpart.

(q) Public Housing Agency (PHA). Any state, county, municipality, or other governmental entity or public body (or agency or Instrumentality thereof) that is authorized to engage in or assist in the development or operation of low-income housing.

(r) Servicing Fees. The annual costs of servicing the obligations (including any debt service reserves), including trustee fees, mortgage servicing fees, PHA expenses in connection with annual reviews, maintenance of books and accounts, audit expenses, agent fees and other costs of servicing the obligations.

(s) Trust Indenture. A contract setting forth the rights and obligations of the owner, owner and trustee in connection with the tax-exempt obligations. The trust Indenture may also include provisions regarding the loan to the owner or these may be set forth in a separate mortgage.

(t) Trustee. The entity that has legal responsibility under the trust Indenture for disposition of the proceeds of a bond issuance and servicing of the debt represented by the obligations. The trustee must be a bank or other financial institution that is legally qualified and experienced in performing fiduciary responsibilities with respect to the care and investment of funds of a magnitude comparable to those involved in the financing.

(u) Yield. That percentage rate at which the present worth of all payments of principal and interest to be paid on the obligations is equal to the purchase price.

§ 811.163 General.

(a) In order for obligations to be tax-exempt under this Subpart the obligations must be issued by a PHA in connection with a low-income housing project approved by HUD under the Act and the applicable Section 8 regulations.

(b) Except as needed for a resident manager or similar requirement, all dwelling units in a low-income housing project that is to be financed with obligations issued pursuant to this subpart must be Section 8 contract units.

(2) Low-income housing projects that are to be financed with obligations issued pursuant to this subpart may include necessary appurtenances. Such appurtenances may include commercial space not to exceed 10% of the total net rentable area.

(b) Where the parent entity PHA is not the owner of the project, the parent entity PHA or other PHA approved under § 811.104 must agree to administer the contract pursuant to an ACC with HUD, and such a PHA must agree that in the event there is a default under the contract it will pursue all remedies available to the owner. Any default under the contract may be referred to HUD for resolution.

§ 811.104 Approval of Public Housing Agencies (other than Agency or Instrumentality PHAs).

(a) An application to the field office for approval as a Public Housing Agency, other than an agency or Instrumentality PHA, for purposes of this subpart shall be supported by evidence satisfactory to HUD to establish that:

(i) The applicant is a PHA as defined in this subpart, and has the legal authority to meet the requirements of this subpart and applicable Section 8 regulations, as described in its application. This evidence shall be supported by the opinion of counsel for the applicant.

(ii) The applicant has or will have the administrative capability to carry out the responsibilities described in its application.

(2) The evidence shall include any facts or documents relevant to the determinations required by § 811.104(a)(1), including identification of any pending application the applicant has submitted under the Act. In the absence of evidence indicating the applicant may not be qualified, the field office may accept as satisfactory evidence:

(i) Identification of any previous HUD approval of the applicant as a PHA pursuant to this § 811.104;

(ii) Identification of any prior ACC with the applicant under the Act or
(iii) A statement, where applicable, that the applicant is an approved participating agency under 24 CFR Part 883 (State Housing Finance and Development Agencies).

(b) The applicant shall receive no compensation in connection with the financing of a project, except for its expenses. Such expenses shall be subject to approval by HUD in determining the development cost, cost of issuance and servicing fee, as appropriate. Should the applicant receive any compensation in excess of such expenses, the excess is to be placed in the debt service reserve.

(c) The information submitted by the applicant shall include the following with respect to the relationship between the parent entity PHA and the agency or instrumentality PHA:

(1) Provisions requiring approval by the parent entity PHA of the charter or other organic instrument and of the bylaws of the applicant, which organic instrument and bylaws shall specify that any amendments are subject to approval by the parent entity PHA and by HUD.

(2) Provisions requiring approval by the parent entity PHA of each project and of the program and expenditures of the applicant.

(d) Any subsequent amendments to the documents submitted to HUD pursuant to this § 811.104 must be approved by HUD.

§811.105 Approval of agency or instrumentality PHA.

(a) An application to the field-office for approval as an agency or instrumentality PHA for purposes of this subpart shall:

(1) Identify the parent entity PHA.

(2) Establish by evidence satisfactory to HUD that:

(i) The parent entity PHA meets the requirements of § 811.104.

(ii) The applicant was properly created pursuant to state law as a not-for-profit entity; is an agency or instrumentality PHA, as defined in this subpart; has authority to perform all the requirements of this subpart and applicable Section 8 regulations, as described in its application; and the activities are required to establish the legal relationship with the parent entity PHA prescribed by § 811.105(c) have been taken and are not prohibited by State law. This evidence shall be supported by the opinion of counsel for the applicant and counsel for the parent entity PHA.

(iii) The applicant has, or will have, the administrative capability to carry out the responsibilities described in its application.

(b) The charter or other organic document establishing the applicant shall limit the activities to be performed by the applicant, and funds and assets connected therewith, to carrying out or assisting in carrying out Section 8 projects. Such organic documents shall provide that the applicant shall receive no compensation in connection with the financing of a project, except for its expenses. Such expenses shall be subject to approval by HUD in determining the development cost, cost of issuance and servicing fee, as appropriate. Should the applicant receive any compensation in excess of such expenses, the excess is to be placed in the debt service reserve.

(c) The information submitted by the applicant shall include the following with respect to the relationship between the parent entity PHA and the agency or instrumentality PHA:

(1) Provisions requiring approval by the parent entity PHA of the charter or other organic instrument and of the bylaws of the applicant, which organic instrument and bylaws shall specify that any amendments are subject to approval by the parent entity PHA and by HUD.

(2) Provisions requiring approval by the parent entity PHA of each project and of the program and expenditures of the applicant.

(3) Provisions requiring approval by the parent entity PHA of each issue of obligations by the applicant not more than 60 days prior to the date of issue and approval of any substantive changes to the terms and conditions of the issuance prior to date of issue.

(d) Provisions requiring the applicant to furnish an audit of all its books and records by an independent public accountant to the parent entity PHA within 90 days after execution of the contract or final endorsement and at least biennial thereafter, and provisions requiring the parent entity PHA to perform an annual review of the applicant's performance and to provide HUD with a copy of such review together with any audits performed during the reporting period.

(e) Provisions giving the parent entity PHA right of access at any time to all books and records of the applicant.

(f) Provisions that upon dissolution of the applicant, title to or other interest in any real or personal property that is owned by such applicant at the time of dissolution shall be transferred to the parent entity PHA or to another PHA or to another not-for-profit entity as determined by the parent entity PHA and approved by HUD, to be used only for purposes approved by HUD.

(7) Evidence of agreement by the parent entity PHA, or other entity as may be provided for in the above, for purposes of the contract and scheduled to extend beyond the term of the obligations.

(b) Certifications by the financing agency:

(1) A certification that the yield on the obligations will not exceed the ceiling imposed by this subpart.

(2) A certification that the amount of debt service payable by the owner will not exceed the amount required for the debt service payments on the total obligations, excluding the debt service reserve, plus the servicing fee.

(3) A certification that the terms of the financing and the use of the obli-
Igations will be in accordance with this Subpart.
(3) An explanation of all reserves or accounts to be established or maintained, the funding of funds and the flow of funds. The explanation should be in sufficient detail to facilitate field office review.
(4) An opinion from counsel for the financing agency as to the legality of all documents relating to the method of financing the project. Where this opinion relies on other legal opinions such as those of counsel for the underwriter or the purchaser of tax-exempt interim and permanent obligations, copies of these opinions shall be included.
(5) Financial data:
(i) For FHA-insured projects, in addition to the financial data required for FHA insurance, an itemized statement of the cost of issuance, debt service reserve and total amount of obligations, and a statement of the projected yield, interest rate and term of tax-exempt interim and permanent obligations. If it is later determined to change any of the above, amended documents shall be submitted.
(ii) For non-FHA-insured projects, an itemized statement of development cost, cost of issuance, capitalized interest during construction, debt service reserve, and total amount of obligations and, for the purposes of the HUD determination of the approved amount of the obligations required by § 811.108(b), an estimate of annual income and expenses, and a statement of the projected yield, interest rate and term of tax-exempt interim and permanent obligations. If it is later decided to change any of the above, amended documents shall be submitted.
(b) The counsel for the financing agency shall, prior to the issuance of the obligation, furnish to the field office a certification that any official statement or prospectus or other disclosure statement prepared in connection with the financing includes on the first page the following statement:

"(A) In addition to any other security cited in the statement, the obligations are to be secured by a pledge of an Annual Contributions Contract, if applicable, an Agreement to Enter Into Housing Assistance Payments Contract and a Housing Assistance Payments Contract, all to be executed or approved by the United States Department of Housing and Urban Development (HUD);

(B) The faith of the United States is solemnly pledged to the payment of annual contributions pursuant to the Annual Contributions Contract or to the payment of housing assistance payments pursuant to the Housing Assistance Payments Contract, and funds have been obligated by HUD for such payments;

(C) Except as provide in any contract of mortgage insurance, the obligations are not insured by HUD;

(D) The obligations are not to be construed as a debt or indebtedness of HUD or of the United States, and payment of the obligations is not guaranteed by the United States;

(E) Nothing in the text of this disclosure statement is to be in conflict with (A), (B), (C) and (D) above and

(F) HUD has not reviewed or approved and bears no responsibility for the content of this disclosure statement."

(c) The financing agency shall retain in its files the documentation relating to the financing. A copy of this documentation shall be furnished to the field office upon request.
(d) In the event a financing agency which has obtained HUD approval of the documents submitted pursuant to this Section 811.107 proposes substantive changes in the documents, whether by way of amendment, replacement or supplementation, such changes shall be submitted to the field office for prior approval.
§ 811.108 Amount of permanent obligations, debt service reserve and mortgage debt service.
(a) FHA-insured projects.
(1) The amount of the obligations shall not exceed the amount of the FHA-insured mortgage, plus the amount of any debt service reserve. The maximum cost of issuance that may be included in the mortgage (or in the obligations) shall not exceed the percentage of the mortgage amount otherwise available for the financing fee and the FNMA/GNMA fee. All individual items of the cost of issuance shall be shown to be necessary for the issuance of the obligations and the amount of each shall be shown to be reasonable in relation to prevailing costs of issuing comparable obligations, taking into account any differences between the types of obligations.
(2) The amount of the debt service reserve which may be included in the obligations shall not exceed the amount necessary to pay anticipated debt service on the obligations for six months.
(i) The debt service reserve shall be invested and the income used to pay principal and interest on that portion of the obligations which is attributable to the funding of the debt service reserve. Any excess investment income shall be added to the debt service reserve. In the event such investment income is insufficient, surplus cash or residual receipts to the extent approved by the field office may be used to pay such principal and interest costs.
(ii) The debt service reserve and its investment income shall be available only for the purpose of paying principal or interest on the obligations. The use of the debt service reserve for this purpose shall not be a cure for any failure by the owner to make required payments.
(iii) Upon full payment of the principal and interest on the obligations (including that portion of the obligations attributable to the funding of the debt service reserve), any funds remaining in the debt service reserve shall be remitted to HUD.
(b) The interest rate on the mortgage shall not exceed the rate at which the debt service payments on the mortgage will provide sufficient funds for the debt service payments on the obligations (excluding the debt service reserve) and for payment of the servicing fee.
(c) Notwithstanding HUD approval of the terms and conditions of the tax-exempt permanent financing of the project, the interim mortgagee is required to agree to review provisions of the interim mortgage to hold the mortgage as the permanent lender if the tax-exempt permanent financing is not available at final endorsement. If the tax exempt permanent financing is not available at final endorsement, HUD will approve tax exemption for subsequent financing of the project, provided that all requirements under this subpart are met and the subsequent financing does not exceed the interest rate and is on the same terms and conditions as the original tax-exempt permanent financing.
(b) Non-FHA-insured projects.
(1) The amount of the obligations and commitment, if any, excluding the amount of any debt service reserve (see subparagraph (3) of this paragraph), shall not exceed:
(i) For profit-motivated owners, the total derived by capitalizing the project net income, less an allowance for return on equity, at a debt service rate based on projected term and interest rate of the obligations, adjusted to provide for the servicing fee.
(ii) For non-profit owners, the total derived by capitalizing 95% of the project net income at a debt service rate based on projected term and interest rate of the obligations, adjusted to provide for the servicing fee.
(iii) The project net income for the above calculations shall be determined by the following calculation: (A) Contract rent and other project income as approved by HUD, (B) less HUD approved allowance for vacancies, (C) less HUD approved operating expenses, (D) equals project net income.
(2) The amounts which may be included in the amount of the obligations, for capitalized interest during construction, cost of issuance and development cost shall be subject to the following limits:
(i) If the proceeds of the permanent obligations are to be placed in escrow until completion of construction
The mortgage will provide sufficient funds for the debt service payments on the obligations including the debt service reserve and for payment of the servicing fee. Contract rents shall be determined based on the debt service payments necessary to support the obligations excluding the debt service reserve. The debt service reserve is assumed to be self-supporting and HUD has no obligation to increase contract rents in the event the debt service reserve is not self-supporting.

Notwithstanding the other provisions of this section, in the case of a mortgage transaction that does not involve the sale of bonds, whether FHA insured or non-FHA insured, no debt service reserve shall be included in the obligations and the cost of issuance shall be reduced to exclude costs associated with bond financing.

§ 811.109 Yield and servicing fee.

(a) The yield on the obligations shall not exceed a yield approved by the field office in accordance with either subparagraph (1) or (2) of this paragraph.

(1) The financing agency may issue obligations to be offered for public sale under competitive bidding procedures involving the solicitation of sealed bids. Bids shall be solicited through an advertisement which shall include advertisement in a newspaper of national circulation, such as the Daily Bond Buyer. The yield on the low bid received under this procedure may be approved by the field office: Provided, That at least two responsive bids are received. If only one responsive bid is received, the yield may be approved by the field office only if acceptable under subparagraph (2) of this paragraph.

(2) The financing agency may issue the obligations at a yield that it certifies is reasonable in relation to prevailing costs in the tax-exempt market for comparable obligations: Provided, That the field office has no substantial reason to object to the accuracy of this certification and the yield does not exceed the Bond Index published by the Daily Bond Buyer for the week immediately preceding the sale of the obligations by more than the number of basis points set quarterly or more frequently by the Assistant Secretary for HUD.

§ 811.110 Interim financing.

(a) The terms and conditions of any interim financing shall be consistent with the terms and conditions of the permanent obligations which are proposed or committed for issuance. The risk of completion of the project is upon the owner and the interim lender.

(b) The financing agency may request a determination by the field office that obligations to be issued by the financing agency for interim financing are tax exempt pursuant to this subpart, but only where tax exemption has also been requested for the permanent obligations.

(1) The amount of interim obligations shall not exceed the amount of permanent obligations, less the debt service reserve.

(2) The yield on tax-exempt interim obligations shall not exceed the maximum yield set quarterly or more frequently by the Assistant Secretary for Housing. Subject to this maximum, the field office may approve a yield determined to be reasonable.

(3) If tax-exempt interim obligations are issued prior to the date they are to be advanced for development cost or cost of issuance, the funds shall be reduced to exclude costs associated with § 811.114(b)(3) to earn interest. Any investment income shall be used to pay debt service on the interim obligations or to reduce the amount to be disbursed from the escrow of the permanent obligations.

(4) Tax exemption of interim obligations shall be limited to a term not unreasonably beyond the stated date by which completion is required under the agreement or the anticipated date of final endorsement, including any extensions approved by HUD.

§ 811.111 Construction inspections.

(a) For FHA-insured projects, the standard FHA procedures shall be followed.

(b) For non-FHA-insured projects:

(1) The entity providing the interim financing shall provide for such inspection during construction, either di-
guarantee that there will be sufficient cash or an unconditional letter of writing to such extended date, and HUD specified date in the event:

from investment of the escrowed from the funds in escrow plus income FHA-insured projects, the anticipated under the applicable agreement or, for FHA-insured projects, at final endorsement and only for the purpose and to the extent of the amounts approved by the field office.

§ 811.112 Issuance of permanent obligations and escrow.

(a) If the permanent obligations are issued before execution of the contract or final endorsement, the obligations shall, upon receipt, be placed in escrow with the trustee pursuant to the trust indenture. Disbursements may be made from the escrow only for the cost of issuance, if not paid from the obligations, and for debt service payments. Disbursements may also be made from the escrow for construction financing. Provided, That (1) there is an unconditional guarantee by a State or by a county, city, or other unit of general local government that in the event of a default prior to execution of the contract the obligations will be fully redeemed or (2) construction advances are insured pursuant to the National Housing Act, then the escrow shall be invested in accordance with § 811.114(b)(3) to earn interest.

(b) In the event that the contract is not executed within 90 days after the date by which completion is required under the applicable agreement or, for FHA-insured projects, the anticipated date of final endorsement, the permanent obligations shall be redeemed from the funds in escrow plus income from investment of the escrowed funds and less any debt service payments or disbursements for cost of issuance. However, such date for redemption may be extended to a later specified date in the event:

(1) The parties to the agreement, HUD and the trustee have agreed in writing to such extended date, and

(2) Additional funds, in the form of cash or an unconditional letter of credit, are added to the escrow to guarantee that there will be sufficient funds in the escrow on the extended date to pay all amounts that are then required to be paid from the escrow on at least as favorable a basis as if there had been no extension.

(c) The agreement may contain a provision that in the event of foreclosure by the interim lender due to noncompliance with any condition precedent to execution of the project, or in the event of assignment or sale by reason of such a default to the interim lender or other party agreed to by the interim lender and approved by HUD, the parties to the agreement (other than the defaulted owner) shall agree to a reasonable extension of the completion date upon request of the interim lender where:

(1) The trustee has agreed to the extension, and

(2) The interim lender has agreed in writing to assure acceptable completion of the project by the extended date, and

(3) Additional funds, in the form of cash or an unconditional letter of credit, are added to the escrow to guarantee that there will be sufficient funds on the extended date to pay all amounts that are then required to be paid from the escrow on at least as favorable a basis as if there had been no extension.

(d) The escrowed funds, including any investment income, less approved prior disbursements, shall be disbursed from the escrow for construction financing, or, for FHA-insured projects, at final endorsement and only for the purpose and to the extent of the amounts approved by the field office.

§ 811.113 Execution of contract.

(a) If the field office finds that the evidence of completion is acceptable with respect to the physical completion of the project, including the certificate of occupancy and/or other final approvals required for occupancy, but the evidence of completion in other respects is not acceptable, the field office shall, upon request by the owner, execute or approve the execution of the contract in such case, however, until the remaining evidence of completion is submitted to and found acceptable by the field office:

(1) The contract rent for the purpose of computing housing assistance payments with respect to any unit shall be the monthly amount of the debt service on the permanent obligations attributable to the unit, and

(2) Rent-up and occupancy shall be subject to such conditions as the field office may require.

(b) The effective date of the contract shall be 30 working days after the notification of project completion to the field office, or the date of the FHA endorsement, whichever is later. Provided, That the owner’s and architect’s certification and other evidence of completion required by the applicable Section 8 regulations are found by the field office to be acceptable as of that date. If the certifications and other evidence of completion are found not to be acceptable as of that date, the effective date of the contract shall be the latest date subsequent to the date at which the evidence of completion is found by the field office to be acceptable.

(c) To support the estimates on which the field office determined the amount of the obligations and to assure that the proceeds of the obligations are used for the approved purposes, the evidence of completion to be submitted in accordance with the agreement or, for FHA-insured projects, to be submitted at final endorsement to supplement the documentation required to meet FHA requirements shall include:

(1) A certified statement by the financing agency as to amounts actually expended or to be expended for development cost, cost of issuance, capitalized interest during construction and debt service reserve, supported by (for non-FHA-insured projects) a certified statement by an independent public accountant, as to the development cost. Records of this cost data shall be available to HUD for inspection upon request. To the extent these amounts are less than those approved by the field office under § 811.108 or there has been an addition to the escrow because of investment income, the financing agency shall state whether the excess funds are to be used to prepay the obligations or to be added to the debt service reserve.

(2) A certified statement by the financing agency as to the yield and interest rate on tax-exempt interim and permanent obligations, the debt service reserve, and the other terms of the financing.

(d) In reviewing the certifications submitted by the financing agency under paragraph (c) of this section, the field office shall generally accept the certifications as correct. However, if the field office has substantial reason to question the correctness of any element, the field office shall promptly bring the matter to the attention of the financing agency and ask that the financing agency review its findings. After such review, the field office will act in accordance with the judgment or evaluation of the financing agency, unless the field office determines that the certifications are not supported by the evidence.

(1) Based on its review, the field office shall approve the amounts to be disbursed from the escrow for development cost, cost of issuance, capitalized interest during construction and the
debtservice reserve, including the proposed use of excess funds, if any.

(2) The field office shall amend the contract to reduce the contract rents to the extent that:

(i) For FHA-insured projects, the debt service amount to be paid by the owner is less than the amounts projected in processing the project, or

(ii) For non-FHA-insured projects, the debt service payments necessary to support the obligations, excluding the revised amount of debt service reserve, is lower than the amounts projected in processing the project.

(c) Additional tax-exempt obligations may be issued to finance additional development cost, whether for increased costs during construction or for project improvements after execution of the contract or final endorsement that are shown to be reasonable and are approved by HUD pursuant to this subpart and by the trustee, provided that HUD approves an increase in the mortgage amount (for FHA-insured projects) and, pursuant to the applicable Section 8 regulations, an increase in the contract rents to the extent required to pay debt service on the additional obligations. Such additional obligations, if issued, shall be issued without the refinancing of any outstanding obligations.

(d) Obligations shall be prepaid only under such conditions as HUD shall require, including reduction of contract rents and continued operation of the project for the housing of low-income families.

§811.115 Other requirements.

(a) If a project has an executed agreement based on a final proposal that did not include tax-exempt financing under this subpart, conversion to tax-exempt financing under this subpart shall require the prior authorization of the Assistant Secretary for Housing.

(b) Issuance of obligations pursuant to this subpart to refund outstanding permanent obligations issued pursuant to this subpart is prohibited.

(c) The special procedures in 24 CFR Part 833, subpart C otherwise available to a participating agency may be used in connection with projects financed with obligations issued pursuant to this subpart: Provided, That the participating agency submits the additional certifications necessary to comply with this subpart.

§811.116 Approval of obligations as tax-exempt.

(a) The field office director shall send the financing agency a notification of approval of obligations as tax-exempt if the field office finds that:

(1) Obligations proposed to be issued for the financing of a low-income housing project comply with this subpart.

(2) The terms and conditions of the financing (not including the official statement prospectus or other disclosure statement) have been approved pursuant to this subpart and the applicable Section 8 regulations.

(3) The agreement has been executed and, where applicable, approved in writing by HUD.

(b) The notification shall include a statement that:

(1) Pursuant to this subpart and the Act, HUD has found the financing agency to be an eligible PHA.

(2) The obligations, including interest thereon, when issued in accordance with the approved application, shall be exempt from all taxation now or hereafter imposed by the United States.

(3) The income derived by the PHA from the low-income housing project shall be exempt from all taxation now or hereafter imposed by the United States.

(c) If the application included tax-exempt interim financing, the notification shall include a statement with regard to such interim financing, including and explicit statement that tax exemption of such obligations is limited to a term not unreasonably beyond the stated date by which completion is required under the agreement or the anticipated date of final endorsement, including any extensions approved by HUD.

(d) This notification of approval of tax exemption shall not be subject to revocation by HUD.

§811.117 Applicability to tax exemption.

As a condition of obtaining HUD approval of the terms of financing required by Section 8(c)(4) of the Act, all issuers of tax-exempt obligations purporting to be exempt from federal taxation under any other provision of law or governmental regulation (other than an issuer which is a qualified participating agency pursuant to 24 CFR 833.105) shall submit all documents required by §§811.107, 811.108, 811.109 and 811.110 to the field office for review and approval. The terms and use of such obligations and the operation of the project shall comply with the requirements of this Subpart.

Issued at Washington, D.C., February 27, 1979.

Lawrence B. Simons, Assistant Secretary for Housing, Federal Housing Commissioner.

Federal Register, Vol. 44, No. 45—Tuesday, March 6, 1979
OFFICE OF MANAGEMENT AND BUDGET

CIRCULAR A-21
Cost Principles For Educational Institutions
NOTICES

OFFICE OF MANAGEMENT AND BUDGET
CIRCULAR A-21—COST PRINCIPLES FOR EDUCATIONAL INSTITUTIONS

This notice revises Federal Management Circular 73-8. It will be renumbered OMB Circular No. A-21. The revision originated from recommendations made by the Department of Health, Education, and Welfare after urging by the House and Senate Appropriations Committees.

On March 10, 1978, the Office of Management and Budget published a proposed revision in the Federal Register for comment. In response to the publication, we received approximately 300 letters from Members of Congress, Federal agencies, university administrators, faculty members, professional associations, and members of the public.

There follows a summary of the major comments grouped by subject, and a response to each, including a description of any changes made as a result of the comment. In addition to the changes described specifically, other changes have been made to improve clarity, readability, and precision; and to reduce the burden of compliance as much as possible.

For further information, contact Mr. John J. Lordan, Chief, Financial Management Branch, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, N.W., Washington, D.C. 20503. (202) 395-6923.

PURPOSE

Comment. Several commentators pointed out that the proposed revision contained too much detail, and that it seemed to establish cost accounting procedures and instructions, rather than cost accounting principles.

Response. In our opinion, the revision does not change the fundamental nature of the Circular. It provided for more consistent treatment of costs, and clarifies many provisions that were considered too vague and which left the way open to widely varying interpretations.

Comment. Several commentators had a favorable reaction to the provision which says that agencies are not expected to place additional restrictions on individual items of cost.

Response. This provision remains in the Circular.

APPLICABILITY

Comment. Several commentators agreed with the provision which extends regulations of the Cost Accounting Standards Board to federally funded research and development centers operated by universities. This was a coordinated action with the CASB, which has exempted other work at universities from coverage.

Response. This provision remains in the Circular.

EFFECTIVE DATE

Comment. Several commentators pointed out the need for adequate time for implementation. Some suggested a two-year transition period.

Response. This Circular now establishes an effective date of October 1, 1979, and says that implementation will begin in the institution's first fiscal year beginning after that date. This can be speeded up or extended with the agreement of the cognizant Federal agency. We would expect this provision to be used to assure an orderly phase in of new provisions such as the accounting for tuition remission and specialized service facilities.

DEFINITION OF TERMS

Comment. Many commentators stated that "other sponsored activities" should not include agricultural extension programs, which had been cited as an example.

Response. This example has been removed from the Circular and we are now studying a request to exempt this program from coverage by the Circular.

INDIRECT COSTS

Comment. Many commentators objected to the inclusion of a standard allocation method to be used for each of the categories of indirect cost.

Response. The Circular has been revised to more clearly state that the standard allocation method is used only in the absence of a cost analysis study, or a mutually agreed between the institution and the cognizant agency on use of a different method.

Comment. Several commentators argued that it was inequitable to allocate depreciation on certain capital improvements on a standard base of unweighted headcount of students and employees.

Response. The unweighted headcount base has been replaced by a full-time equivalent base.

Comment. As proposed, the modified total direct cost base consisted of salaries and wages, fringe benefits, materials and supplies, travel, and subcontracts up to $5,000 each. Several commentators proposed an increase in the dollar level of subgrants and subcontracts. Suggestions ranged from $10,000 to $50,000.

Response. The amount has been raised to $25,000.

Comment. A number of commentators objected to the use of the number of sponsored agreements as the standard base for allocating the costs of sponsored projects administration.

Response. The standard allocation base has been changed to modified total direct costs.

LIBRARY EXPENSES

Comment. Many commentators objected to the unweighted headcount base for allocating library expenses.

Response. The unweighted headcount base has been changed to the full-time equivalent base.

STUDENT ADMINISTRATION AND SERVICES

Comment. Several commentators objected that the Circular would not recognize student administration and service costs as applicable to the sponsored agreements. They contended that these services benefit all students, including those employed by the institution.

Response. The standard base for allocating student service costs would call for allocation to the instruction function, and subsequently to any sponsored agreement in that function.

DETERMINATION AND APPLICATION OF INDIRECT COSTS OR RATES

Comment. Several commentators objected to the use of modified total direct cost as the standard base for allocating indirect costs to sponsored agreements.

Response. The definition has been modified to include all subgrants and subcontracts up to $25,000 each.

COMPENSATION FOR PERSONAL SERVICES

Comment. Several commentators objected to the frequency of personnel activity reports.

Response. Compared to present requirements, frequency has been reduced from monthly to once an academic term. Also, the Circular has been clarified to explain that employees whose salaries and wages are not charged direct, or not involved in the distribution of indirect costs would not be included in the reporting system.

Comment. Several commentators criticized applying the monitored workload system only to professional employees.

Response. Introducing the monitored workload concept for professional employees recognizes that their activities cannot be measured with the same degree of accuracy as nonprofessional. We believe that the monitored workload alternative represents a good balance between reducing paperwork and achieving an acceptable level of accountability.

DEPRECIATION AND USE ALLOWANCES

Comment. Several commentators stated that the requirement for a
physical equipment inventory every two years was burdensome.
Response. The two-year inventory requirement remains. However, it has been clarified to recognize that statistical sampling techniques may be used in making the inventory. We believe an institution wishing to recover depreciation or use allowances on equipment must take the normal business precaution of assuring by physical inventory that the equipment is still on hand.

EQUIPMENT AND OTHER CAPITAL EXPENDITURES

Comment. Many commentators recommended that the definition of equipment be changed from an acquisition cost of $300 and a useful life of more than one year. The most common suggestion was $500 and a useful life of more than two years.
Response. The Circular has been amended to define equipment as tangible personal property having a useful life of more than two years and an acquisition cost of $500 or more per unit.

SCHOLARSHIPS AND STUDENT AID COSTS

Comment. Some commentators objected to the provision that tuition remission for student employees be treated as a direct charge to sponsored agreements.
Response. The Circular would not prohibit tuition remission as an indirect cost in all cases. It would require that tuition remission be treated as a direct or indirect cost in accordance with the actual work being performed. This is consistent with the general rules stated earlier in the Circular and with basic principles of cost accounting.

Specialized Service Facilities

Comment. Many commentators objected to the inclusion of "animal resource centers" as a specialized service facility.
Response. "Animal resource centers" has been deleted as an example, but may be treated as a specialized service facility as circumstances dictate at each institution.

Comment. Many commentators cited the possibility that including indirect costs in the charges for specialized service facilities might raise the apparent cost of the services to such a high level that research faculty would decline to use them. They also cited unique situations where it might be appropriate to recover less than the full cost of a specialized service facility.
Response. The Circular provides that normally charges for these services should include both direct and indirect costs. It allows for exclusion of indirect costs where not material in amount.

VELMA N. BALDWIN, Assistant to the Director for Administration.

(Circular No. A-21, Revised)

To the Heads of Executive Departments and Establishments:

Subject: Cost principles for educational institutions.

1. Purpose. This circular establishes principles for determining costs applicable to grants, contracts, and other agreements with educational institutions. The principles deal with the subject of cost determination, and make no attempt to identify the circumstances or dictate the extent of agency and institutional participation in the financing of a particular project. The principles are designed to provide that the Federal Government bear its fair share of total costs, determined in accordance with generally accepted accounting principles, except where restricted or prohibited by law. Agencies are not expected to place additional restrictions on individual items of cost. Provision for profit or other increment above cost is outside the scope of this Circular.

3. Application. a. All Federal agencies that sponsor research and development, training, and other work at educational institutions shall apply the provisions of this Circular in determining the costs incurred for such work. The principles shall also be used as a guide in the pricing of fixed price or lump sum agreements.

b. In addition, Federally Funded Research and Development Centers associated with educational institutions shall be required to comply with the Cost Accounting Standards, rules and regulations issued by the Cost Accounting Standards Board, and set forth in 4 CFR Ch. III: provided, that they are subject thereto under defense related contracts.

4. Responsibilities. The successful application of cost accounting principles requires development of mutual understanding between representatives of educational institutions and of the Federal Government as to their scope, implementation, and interpretation.

5. Attachment. The principles and related policy guides are set forth in the Attachment, "Principles for determining costs applicable to grants, contracts, and other agreements with educational institutions."

6. Effective date. The provisions of this Circular shall be effective October 1, 1979.

The provisions shall be implemented by institutions as of the start of their first fiscal year beginning after that date. Earlier implementation, or a delay in implementation of individual provisions, is permitted by mutual agreement between an institution and the cognizant Federal agency.

4. Inquiries. Further information concerning this Circular may be obtained by contacting the Financial Management Branch, Budget Review Division, Office of Management and Budget, Washington, D.C. 20503, telephone (202) 395-6823.

JAMES T. MCFINTYRE, JR., Director.

43. Travel costs.
44. Termination costs applicable to sponsored agreements.

K. CERTIFICATION OF CHARGES

Principles for Determining Costs Applicable to Grants, Contracts, and Other Agreements With Educational Institutions

A. PURPOSE AND SCOPE

1. Objective. This Attachment provides principles for determining the costs applicable to research and development, training, and other sponsored work performed by colleges and universities under grants, contracts, and other agreements with the Federal Government. These agreements are referred to as sponsored agreements.

2. Policy guides. The successful application of these cost accounting principles requires development of mutual understanding between representatives of universities and of the Federal Government as to their scope, implementation, and interpretation.

It is recognized that-

a. The arrangements for Federal agency and institution responsibility mean all research and development activities that are not organized research and, consequently, are not separately budgeted and accounted for. Departmental research, however, of which this document, is not considered as a major function of an institution but as a part of the instruction function of the institution.

b. Organized research activities that are supported by Federal and non-Federal agencies and organizations, as well as those that are separately budgeted and accounted for. This term includes research and development activities of an institution that are separately budgeted and accounted for. It is recognized that-

1. The dual role of students engaged in research and training activities of an institution. Except for research training as provided in Section J, means any grant, contract, or other agreement between the institution and the Federal Government.

3. Allocation means the process of assigning a cost, or a group of costs, to one or more cost objectives. In reasonable and realistic proportion to the benefit provided or other equitable relationship. A cost objective may be a major function of an institution, a particular service or project, a sponsored agreement, or an indirect cost activity, as described in Section F. The process may entail assigning a cost(s) directly to a final cost objective or through one or more intermediate cost objectives.

4. Basic considerations

1. Composition of total costs. The cost of a sponsored agreement is comprised of the allowable direct costs incident to its performance, plus the allocable portion of the allow-
NOTICES

1. General. Direct costs are those costs that can be identified specifically with a particular sponsored project, and instructional activity, or any other institutional activity; or that can be directly assigned to such activities relatively easily with a high degree of accuracy.

2. Application to sponsored agreements. Identification with the sponsored work rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect costs. Direct costs are those costs charged directly to a sponsored agreement, the compensation of employees for personal services performed, and costs incurred as a direct result of the performance of the sponsored agreement, including related fringe benefits.

3. Base period. A base period for distribution of indirect costs is the period during which the costs are incurred. The base period selected should be consistent with the fiscal year established by the institution, but in any event the base period should be so selected as to avoid inequities in the distribution of costs.

b. Need for cost groupings. The overall objective of the indirect cost allocation process is to distribute the indirect costs described in Section F to the major functions of the institution in proportions reasonably consistent with the nature and extent of their use of and institutional services. In order to achieve this objective, it may be necessary to provide for selective distribution by establishing separate groupings of cost within one or more of the indirect cost categories referred to in E1 above. In general, the cost groupings established within a category should constitute, in each case, a pool of those items of expense that are clearly and explicitly identified as a gift or chargeable or assignable to such cost objective.

4. Allocable costs. a. Costs allocable to a particular cost objective (i.e., a specific function, project, sponsored agreement, department, or the like) if the goods or services involved are chargeable or assignable to such cost objective in accordance with relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to the operation of the institution or the performance of the sponsored agreement; (b) the restraint on or limitations imposed by such factors as market conditions, Federal and State laws and regulations, sponsored agreement terms and conditions; (c) whether or not the individuals concerned acted with due diligence, in the circumstances, considering their responsibilities to the institution, to its employees, to students, the governmental agency at which they are employed, and (d) the extent to which the actions taken with respect to the incurrence of the cost are consistent with established institutional policies and procedures applicable to the work of the institution generally, including sponsored agreements.

5. Applicable credits. a. The term applicable credits refers to those receipts or negative expenditures that operate to offset or reduce direct or indirect cost items. Typical examples of such transactions are: purchase discounts, rebates, or allowances; recoveries or refunds on overcharges or losses; and adjustments of overpayments or erroneous charges. This term also includes credits for services provided specifically to educational institutions, such as discounts on computer equipment, except where the arrangement is clearly and explicitly identified as a gift by the vendor.

b. In some instances, the amounts received from the Federal Government to finance institutional activities or operations should be treated as applicable credits. Specifically, the concept of netting such credit items against related expenditures should be applied by the institution in determining the rates or amounts to be charged to sponsored agreements for services rendered whenever the facilities or other resources used in providing such services have been financed directly, in whole or in part, by Federal funds. (See Sections F3, F5a, and F5b).

6. Costs incurred by State and local governments. Costs incurred or paid by State or local governments for the general administrative purposes of their colleges and universities for fringe benefit programs such as pension costs and FICA and any other costs specifically charged on behalf of, and in direct benefit of, the institutions are allowable costs of such institutions. Whether or not these costs are recorded in the accounting records of the institutions, subject to the following:

a. The costs meet the requirements of Cl through 5 above.

b. The costs are properly supported by cost allocation plans in accordance with applicable Federal accounting principles.

c. The costs are not otherwise borne directly or indirectly by the Federal Government.

7. Limitations on allocations of costs. Sponsored agreements may be subject to statutory requirements that limit the allowable costs. When the maximum amount allowable under a limitation is less than the total amount determined in accordance with the principles in this Circular, the amount not recoverable under a sponsored agreement may not be charged to other sponsored agreements.

D. DIRECT COSTS

1. General. Direct costs are those costs that can be identified specifically with a particular sponsored project, and instructional activity, or any other institutional activity; or that can be directly assigned to such activities relatively easily with a high degree of accuracy.

2. Application to sponsored agreements. Identification with the sponsored work rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect costs. Direct costs are those costs charged directly to a sponsored agreement, the compensation of employees for personal services performed, and costs incurred as a direct result of the performance of the sponsored agreement, including related fringe benefits.

3. Base period. A base period for distribution of indirect costs is the period during which the costs are incurred. The base period selected should be consistent with the fiscal year established by the institution, but in any event the base period should be so selected as to avoid inequities in the distribution of costs.

b. Need for cost groupings. The overall objective of the indirect cost allocation process is to distribute the indirect costs described in Section F to the major functions of the institution in proportions reasonably consistent with the nature and extent of their use of and institutional services. In order to achieve this objective, it may be necessary to provide for selective distribution by establishing separate groupings of cost within one or more of the indirect cost categories referred to in E1 above. In general, the cost groupings established within a category should constitute, in each case, a pool of those items of expense that are clearly and explicitly identified as a gift or chargeable or assignable to such cost objective.

4. Allocable costs. a. Costs allocable to a particular cost objective (i.e., a specific function, project, sponsored agreement, department, or the like) if the goods or services involved are chargeable or assignable to such cost objective in accordance with relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to the operation of the institution or the performance of the sponsored agreement; (b) the restraint on or limitations imposed by such factors as market conditions, Federal and State laws and regulations, sponsored agreement terms and conditions; (c) whether or not the individuals concerned acted with due diligence, in the circumstances, considering their responsibilities to the institution, to its employees, to students, the governmental agency at which they are employed, and (d) the extent to which the actions taken with respect to the incurrence of the cost are consistent with established institutional policies and procedures applicable to the work of the institution generally, including sponsored agreements.

5. Applicable credits. a. The term applicable credits refers to those receipts or negative expenditures that operate to offset or reduce direct or indirect cost items. Typical examples of such transactions are: purchase discounts, rebates, or allowances; recoveries or refunds on overcharges or losses; and adjustments of overpayments or erroneous charges. This term also includes credits for services provided specifically to educational institutions, such as discounts on computer equipment, except where the arrangement is clearly and explicitly identified as a gift by the vendor.

b. In some instances, the amounts received from the Federal Government to finance institutional activities or operations should be treated as applicable credits. Specifically, the concept of netting such credit items against related expenditures should be applied by the institution in determining the rates or amounts to be charged to sponsored agreements for services rendered whenever the facilities or other resources used in providing such services have been financed directly, in whole or in part, by Federal funds. (See Sections F3, F5a, and F5b).

6. Costs incurred by State and local governments. Costs incurred or paid by State or local governments for the general administrative purposes of their colleges and universities for fringe benefit programs such as pension costs and FICA and any other costs specifically charged on behalf of, and in direct benefit of, the institutions are allowable costs of such institutions. Whether or not these costs are recorded in the accounting records of the institutions, subject to the following:

a. The costs meet the requirements of Cl through 5 above.

b. The costs are properly supported by cost allocation plans in accordance with applicable Federal accounting principles.

c. The costs are not otherwise borne directly or indirectly by the Federal Government.

7. Limitations on allocations of costs. Sponsored agreements may be subject to statutory requirements that limit the allowable costs. When the maximum amount allowable under a limitation is less than the total amount determined in accordance with the principles in this Circular, the amount not recoverable under a sponsored agreement may not be charged to other sponsored agreements.

D. DIRECT COSTS

1. General. Direct costs are those costs that can be identified specifically with a particular sponsored project, and instructional activity, or any other institutional activity; or that can be directly assigned to such activities relatively easily with a high degree of accuracy.

2. Application to sponsored agreements. Identification with the sponsored work rather than the nature of the goods and services involved is the determining factor in distinguishing direct from indirect costs. Direct costs are those costs charged directly to a sponsored agreement, the compensation of employees for personal services performed, and costs incurred as a direct result of the performance of the sponsored agreement, including related fringe benefits.

3. Base period. A base period for distribution of indirect costs is the period during which the costs are incurred. The base period selected should be consistent with the fiscal year established by the institution, but in any event the base period should be so selected as to avoid inequities in the distribution of costs.

b. Need for cost groupings. The overall objective of the indirect cost allocation process is to distribute the indirect costs described in Section F to the major functions of the institution in proportions reasonably consistent with the nature and extent of their use of and institutional services. In order to achieve this objective, it may be necessary to provide for selective distribution by establishing separate groupings of cost within one or more of the indirect cost categories referred to in E1 above. In general, the cost groupings established within a category should constitute, in each case, a pool of those items of expense that are clearly and explicitly identified as a gift or chargeable or assignable to such cost objective.

4. Allocable costs. a. Costs allocable to a particular cost objective (i.e., a specific function, project, sponsored agreement, department, or the like) if the goods or services involved are chargeable or assignable to such cost objective in accordance with relative benefits received or other equitable relationship. Subject to the foregoing, a cost is allocable to the operation of the institution or the performance of the sponsored agreement; (b) the restraint on or limitations imposed by such factors as market conditions, Federal and State laws and regulations, sponsored agreement terms and conditions; (c) whether or not the individuals concerned acted with due diligence, in the circumstances, considering their responsibilities to the institution, to its employees, to students, the governmental agency at which they are employed, and (d) the extent to which the actions taken with respect to the incurrence of the cost are consistent with established institutional policies and procedures applicable to the work of the institution generally, including sponsored agreements.

5. Applicable credits. a. The term applicable credits refers to those receipts or negative expenditures that operate to offset or reduce direct or indirect cost items. Typical examples of such transactions are: purchase discounts, rebates, or allowances; recoveries or refunds on overcharges or losses; and adjustments of overpayments or erroneous charges. This term also includes credits for services provided specifically to educational institutions, such as discounts on computer equipment, except where the arrangement is clearly and explicitly identified as a gift by the vendor.

b. In some instances, the amounts received from the Federal Government to finance institutional activities or operations should be treated as applicable credits. Specifically, the concept of netting such credit items against related expenditures should be applied by the institution in determining the rates or amounts to be charged to sponsored agreements for services rendered whenever the facilities or other resources used in providing such services have been financed directly, in whole or in part, by Federal funds. (See Sections F3, F5a, and F5b).

6. Costs incurred by State and local governments. Costs incurred or paid by State or local governments for the general administrative purposes of their colleges and universities for fringe benefit programs such as pension costs and FICA and any other costs specifically charged on behalf of, and in direct benefit of, the institutions are allowable costs of such institutions. Whether or not these costs are recorded in the accounting records of the institutions, subject to the following:

a. The costs meet the requirements of Cl through 5 above.

b. The costs are properly supported by cost allocation plans in accordance with applicable Federal accounting principles.

c. The costs are not otherwise borne directly or indirectly by the Federal Government.

7. Limitations on allocations of costs. Sponsored agreements may be subject to statutory requirements that limit the allowable costs. When the maximum amount allowable under a limitation is less than the total amount determined in accordance with the principles in this Circular, the amount not recoverable under a sponsored agreement may not be charged to other sponsored agreements.

F. INDIRECT COSTS

1. General. Indirect costs are those that are incurred for common or joint objectives and therefore cannot be identified readily and specifically with a particular sponsored project, and instructional activity, or any other institutional activity. At educational institutions such costs normally are classified under the following indirect cost categories: depreciation and use allowances, general administration and general expenses, sponsored projects administration expenses, operation and maintenance expenses, library expenses, departmental administration expenses, and student administration and services.
NOTICES

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979

(2) Where any types of expense ordinarily treated as general administration or departmental administration are charged to sponsored agreements, on an equitable basis, that portion of such expenses which are applicable to other activities of the institution when incurred for the same purposes in like circumstances must, through separate cost groupings, be determined and included in the direct cost of other activities for cost allocation purposes.

(3) Where it is determined that certain expenses are for the support of a service unit or facility whose output is susceptible of measurement on a workload or other quantitative basis, such expenses should be set aside as a separate cost grouping for distribution on such basis to organized research, instructional, and other activities at the institution or within the department.

(4) Where activities provide their own purchasing, personnel administration, maintenance, and operation and maintenance expenses, or operation and maintenance expenses are incurred by the institution and not allocable to any specific cost objective, the expenses should be distributed through cost groupings which include only that portion of central indirect costs (such as for overall management) which are properly allocable to such activities.

(5) Where the institution elects to treat fringe benefits as indirect charges, such costs should be set aside as a separate cost grouping for selective distribution to related cost objectives.

The number of separate cost groupings within a category should be held within practical limits, after taking into consideration the materiality of the amounts involved and the degree of precision attainable through less selective methods of distribution.

D. Selection of distribution method.

(1) Actual conditions must be taken into account in selecting the method to be used in distributing individual cost groupings. The essential consideration in selecting a base is that it be the one best suited for assigning the pool of costs to cost objectives in accordance with benefits derived; a traceable cause and effect relationship; or least amount of expense, or benefit as cause and effect relationship is determinable.

(2) Where a cost grouping can be identified directly and objective benefit is derived, it should be assigned to that cost objective.

(3) Where the expenses in a cost grouping are more general in nature, the distribution may be based on a cost analysis study which results in an equitable distribution of the costs. Such cost analysis studies may take into consideration weighting factors, population, or space occupied if appropriate.

Cost studies, however, must be (a) appropriately documented in sufficient detail for subsequent review by the cognizant Federal agency, (b) distribute the costs to the related cost objectives in accordance with the recognized costs, (c) be statistically sound, (d) be performed specifically for the institution at which the results are to be used, and (e) be reviewed periodically, but not less frequently than every two years, updated if necessary, and used consistently. Any assumptions made in the study must be stated and explained. The use of cost analysis studies and periodic changes in the method of cost distribution must be fully justified.

(4) If a cost analysis study is not performed, or if the study does not result in an equitable distribution of the costs, the distribution shall be made in accordance with the appropriate base cited in Section P, unless one of the following conditions is met: (a) it can be demonstrated that the use of a different base would result in a more equitable allocation of the costs, or that a more uniform and equitable cost distribution would not increase the costs charged to sponsored agreements, or (b) the institution qualifies for, and elects to use, the simplified method for computing indirect cost rates described in Section H.

E. Order of Distribution.

(1) Indirect cost categories consist of depreciation and use allowances, operation and maintenance, general administration and general expenses, departmental administration, sponsored projects, administration, library, and student administration and services, as described in Section P.

(2) Depreciation and use allowances, operating and maintenance, general administration and general expenses, and general administrative and general expenses should be allocated in that order to the other cost objectives in a manner, as defined in Section F, to be appropriate by the institution. When cross allocation of costs is made as provided in (3) below, this order of allocation does not apply.

(3) Normally an indirect cost category will be considered closed once it has been allocated to other cost objectives, and costs may be excluded from it. However, a cross allocation of costs between two or more indirect cost categories may be used if such allocation will result in a more equitable allocation of costs. If a cross allocation is used, an appropriate modification to the composition of the indirect cost categories described in Section P is required.

F. IDENTIFICATION AND ASSIGNMENT OF INDIRECT COSTS

1. Depreciation and use allowances.

a. The expenses in this category are the portion of the costs of the institution's buildings, capital improvements to land and buildings, and equipment which are computed in accordance with applicable methods.

b. In the absence of the alternatives provided for in Section E2d, the expenses included in this category shall be allocated in the same manner as described in Section P1b for depreciation and use allowances.

2. General administration and general expenses.

a. The expenses under this heading are those that have been incurred for the general executive and administrative offices of educational institutions and other expenses of a general character which do not relate solely to any major function of the institution; i.e., solely to (1) instruction, (2) organized research, (3) other sponsored activities, or (4) other institutional activities. The general administration and general expenses in this category should also include any fringe benefit costs applicable to the salaries and wages included in the share of operation and maintenance expenses, and depreciation and use allowances.

b. In the absence of the alternatives provided for in Section E2d, the expenses included in this category shall be grouped first according to common major functions of the institution to which they render services or provide benefits. The aggregate expenses of each group shall then be allocated to services or benefits functions on the modified total cost basis. Modified total costs consist of salaries and wages, fringe benefits, materials and supplies, services, travel, and subgrants and subcontracts up to $25,000 each. When an activity is included in this indirect cost category provides a service to another institution or organization, an appropriate adjustment must be made to other the method of allocation or both, to assure a proper allocation of costs.

3. Departmental administration expenses.

a. The expenses under this heading are those that have been incurred for administrative and supporting services that benefit common or joint departmental activities or...
NPTICES

objectives in academic dean's offices, academic deans' offices and divisions, and organized research institutes, study centers, and research centers. Departmental administration expenses are subject to the following limitations:

1. Academic dean's offices. Salaries and operating expenses incurred within academic deans' offices shall be allocable to administrative functions.

(a) The salaries of the heads of academic departments and their assistants, the salaries of administrative officers and assistants, travel, office supplies, rooms, and the like.

(b) Other administrative and supporting expenses incurred within academic deans' offices are allowable provided they are treated consistently in like circumstances. This would include expenses such as the salaries of secretaries, and clerical staffs, the salaries of administrative officers and assistants, travel, office supplies, stockrooms, and the like.

(c) Other fringe benefits costs applicable to the salaries and wages included in (1) and (2) above are allowable, as well as an appropriate share of general administration and general expenses applicable to the salaries and wages included therein, an appropriate share of general administration and general expense, operation and maintenance expenses, and depreciation and use allowances. Costs incurred in the purchases of rare books (museum-type books) with no value to sponsored agreements should not be allocated to them. The administrative expenses of the dean's office of each college and school shall be allocated to the academic departments within that college or school on the modified total cost basis.

2. The administrative expenses of each academic department, and the department's share of the expenses included in (1) above shall be allocated to the appropriate functions of the department on the modified total cost basis.

3. Sponsored projects administration. The items to be accumulated under this section shall consist of all faculty members and other professional employees of the institution, regardless of whether they earn credits toward a degree or certificate.

4. The student category shall consist of all faculty members and other professional employees of the institution, a separate indirect cost rate would be established for each of the major functions described in Section 21 under which sponsored agreements are carried out.

5. Student administration and services. The expenses under this heading are those that have been incurred for the administration of student affairs and for services to students, including expenses of such activities as deans of students, admissions, registrar, student services, student advisers, student health and infirmary services, catalogues, and commencement activities. The salaries and wages of academic staff whose administrative functions are subject to the extent that the portion so charged is supported pursuant to Section J6. This category also includes the fringe benefit costs applicable to the salaries and wages applicable to the salaries and wages included therein, an appropriate share of general administration and general expenses, and depreciation and use allowances. Appropriate adjustments should be made for services provided to other functions or organizations.

(b) In the absence of the alternatives provided for in Section E2, the expenses included in this category shall be allocated to the major functions of the institution under which sponsored agreements shall be allocated to the extent that the portion so charged is allocable to administrative functions.

(c) An appropriate adjustment shall be made for the portion of sponsored agreements in that category that is allocable to administrative functions that are the level of the administrative support required, the nature of the facilities or other resources employed, the special discipline and technical skills involved, the organizational arrangements used, or any combination thereof. Where a particular segment of a sponsored agreement is performed within an environment which appears to generate a significantly different level of indirect costs, provisions should be made to allocate the appropriate costs to such work. The separate indirect cost pool should be developed during the negotiation of the sponsored agreements and the separate indirect cost rate used thereon should be utilized: provided it is determined that (1) such indirect cost rate differs significantly from that which would have been obtained under a, and (2) the volume of work to which such rate would apply is material; in relation to the volume of work performed under the sponsored agreement.
NOTICES

J. GENERAL PROVISIONS FOR SELECTED ITEMS OF COST

Sections 1 through 44 below provide principles to be applied in establishing the allocable costs of certain items involved in determining cost. These principles should apply irrespective of whether a particular item of cost is properly treated as direct cost or an indirect cost.

1. Advertising costs. The only advertising costs allowable are those which are solicited for (1) the recruitment of personnel required for the performance by the institution of obligations arising under the sponsored agreement, when considered to contribute to the performance of the sponsored agreement; (2) the procurement of goods and services for the performance of the sponsored agreement. If the dissemination of materials acquired in the performance of the sponsored agreement except when institutional reimbursement is made is not sufficient to warrant the use of a predetermined amount in accordance with Attachment N, OMB Circular No. A-110; or (4) other specific purposes necessary to meet the requirements of the sponsored agreement.

c. Costs of this nature, if incurred for more than one sponsored agreement or for both sponsored work and other work of the institution, are allowable to the extent that the principles in Sections D and E are observed.

2. Bad debts. Any losses, whether actual or estimated, arising from uncollectible accounts and other claims, related collections costs, and related legal costs, are unallowable.

3. Civil defense costs. Civil defense costs are those incurred in planning for, and the protection of life and property against. the possible effects of enemy attack. Reasonable costs of civil defense measures (including costs in excess of normal plant protection costs, first-aid training and supplies, firefighting training, posting of additional exit notices and directions, and other approved civil defense measures undertaken to protect the institution's premises pursuant to suggestions or requirements of civil defense authorities) are allowable when distributed to all activities of the institution. Capital expenditures for civil defense purposes will not be allowable, but a use allowance or delimitation may be permitted in accordance with provisions set forth in Section J9. Costs of local civil defense projects not on the institution's premises are unallowable.

4. Commencement and connection costs. Costs incurred for commencements and connections are unallowable, except as provided for in Section P7.

5. Communication costs. Costs incurred for telephone services, local and long distance telephone calls, telegrams, radiograms, postage and the like, are allowable.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
when expressed in measurable units, such as contact-hours in teaching, the system will total activity constituting a full workload—institution. Because practices vary among fulfillment of the employee's obligations to the workload of employees, accounting for 100 percent of the activity for which the employee is compensated and which is required in fulfillment of the employee's obligations to the institution. The report will reasonably reflect the percentage applicable to each sponsored agreement, each indirect cost category, and each major function of the institution.

4. The system will utilize workload categories reflecting activity which is applicable to each sponsored agreement, each indirect cost activity, and each major function of the institution.

5. At least annually a statement will be submitted by the employee, principal investigator, or responsible official, having first hand knowledge of the work stating that salaries and wages charged to sponsored agreements as direct charges, or that salaries and wages charged to both direct and indirect cost categories, or to more than one indirect cost category are reasonable.

6. The system will provide for independent internal evaluations to insure that it is working effectively.

7. In the event this method an institution shall not be required to provide additional support or documentation for the effort actually performed, but is responsible for assuring that the system meets the above standards.

d. Personnel activity reports. Under this system the distribution of salaries and wages will be based on personal activity reports as prescribed below.

1. Personnel activity reports will reflect the distribution of activity extended by each employee covered by the system.

2. The reports will reflect an after-the-fact reporting of the percentage of activity of each employee. Charges may be made initially on the basis of estimates made before the services are performed, provided that such charges are promptly adjusted if significant differences are indicated by activity reports.

3. Each report will account for 100 percent of the activity for which the employee is compensated and which is required in fulfillment of the employee's obligations to the institution. The report will reasonably reflect the percentage applicable to each sponsored agreement, each indirect cost category, and each major function of the institution.

4. To ensure that the distribution of activity represents a reasonable estimate of the work performed by the employee during the period, each report will be signed by the employee or by a responsible official having first hand knowledge of the work performed.

5. For professional and professional staff, compensation for personal services covers all amounts paid currently or areswarded for services performed by the employees rendered during the period of performance under sponsored agreements. Such amounts are paid currently in the form of salary, wages, and fringe benefits (See Section J15.). These costs are allowable to the extent that the total compensation to individual employees conform to the general policies of the institution, consistently applied, and provided that the charges for work performed directly on sponsored agreements and for other work are allocable as either direct or indirect and supported as provided below.

Charges to sponsored agreements may include reasonable amounts for activities contributed to the normal academic mission of the institution under institutional policy, need not be included in, or charged to, any system described below, provided such work and compensation are separately identified and documented in the financial management system of the institution.

b. Payroll distribution. For each organizational unit of an institution, the distribution of salaries and wages is applied to each member of the professional staff (whether charged direct or required to be charged to the system described below, provided such work and compensation are separately identified and documented in the financial management system of the institution.)

(1) Salary rates for academic year. Charges for work performed on sponsored agreements by faculty members during the academic year will be based on the individual faculty member's regular compensation for the continuous period which, under the policy of the institution concerned, constitutes the basis of his salary. Charges for work performed on sponsored agreements during all or any portion of such period are allowable at the base salary rate. In no case will charges to sponsored agreements during the summer months or other period not included in the base salary period be considered as long as the distribution of salaries and wages is reasonable over the longer term such as an academic period, for assuring that a change in the employee's workload or the change in the employee's workload or the treatment of indirect costs under the simplified method for small institutions.)

(2) The reports will reflect an after-the-fact reporting of the percentage of activity of each employee. Charges may be made initially on the basis of estimates made before the services are performed, provided that such charges are promptly adjusted if significant differences are indicated by activity reports.

(3) Each report will account for 100 percent of the activity for which the employee is compensated and which is required in fulfillment of the employee's obligations to the institution. The report will reasonably reflect the percentage applicable to each sponsored agreement, each indirect cost category, and each major function of the institution.

(4) To ensure that the distribution of activity represents a reasonable estimate of the work performed by the employee during the period, each report will be signed by the employee or by a responsible official having first hand knowledge of the work performed.

(5) For professional and professional staff, compensation for personal services covers all amounts paid currently or accrued by the institution for services of professional staff (whether charged direct or required to be charged to the system described below, provided such work and compensation are separately identified and documented in the financial management system of the institution.)

(6) Charges for teaching activity performed by faculty members on sponsored agreements during the summer months or other periods not included in the base salary period will be considered for each faculty member at a rate not in excess of the base salary divided by the period to which the base salary relates, and will be limited to charges made in accordance with other parts of this section. The base salary period used in computing charges for work performed during the summer months will be the number of months covered by the faculty member's official academic year.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
sponsored agreement. Thus, his additional

shall be considered as the acquisition cost.'
located; and
buildings and equipment contributed
ings and equipment borne
the cost of build-
allowances shall be based on the acquisition
tion shall be made in accordance with Sec-
other equivalent costs are not computed.
Use allowances are the means of providing
stitutional professional effort excessive, _ap-
i(1)
sponsored-agreements be allocated between
the effort of professional staff
in the particular area, and the renewal and
replacement policies followed for the indi-
individual items or classes of assets involved.
(2) The straight-line method used to charge the cost of an asset (or group of assets) to accounting periods shall reflect the pattern of consumption of the asset and condições of clear evidence indicating that the expected con-
sumption of the asset will be significantly greater in the early portions than in the later portions of its useful life, the straight-
line method shall be presumed to be the ap-
propriate method. Depreciation methods once used shall not be changed unless ap-
proved in advance by the cognizant Federal agency.
(3) Where the depreciation method is in-
troduced for capital asset or for which use allowance was previously charged, the aggregate amount of use allowances and de-
preciation applicable to such assets must not exceed the total acquisition cost of the assets.
(4) When the depreciation method is used for the efforts of faculty and staff working under a Federal sponsoring agency agreement, the said depreciation method may be used separately from other building com-
ponents, such as plumbing system and heating
and air conditioning system. Each com-
mponent of the building may be treated over
its estimated useful life. On the other hand, the entire building, including the shell and all components, may be treated as a single asset and depreciated over a single useful life.
(5) Where the depreciation method is used for the use allowances method, the following shall be observed:
(1) The use allowance for buildings and im-
provements (including improvements such as, fences, and sidewalks) will be computed at an annual rate not exceeding two percent of acqui-
sition cost. The use allowance for equipment will be computed at an annual rate not ex-
ceeding six and two-thirds percent of acqui-
sition cost.
(2) In contrast to the depreciation method, the entire building must be treated as a single asset without separating its "shell" from other building components under the use allowance method. The entire building must be treated as a single asset, and the two-percent use allowance limita-
tion must be applied to all parts of the building. The two percent limitation, however,
need not be applied to equipment or other assets that are merely attached or fas-
tened to the building but not permanently fixed and are used as furnishings, decora-
tions or for specialized purposes (e.g., den-
tist chairs and dental treatment units, counters, laboratory benches bolted to the
floor, dishwashers, and carpeting). Such equipment and assets will be considered as not being permanently fixed to the building. If the equipment or apparatus is needed for costs or expensive alterations or repairs to the building to make the space usable for other purposes. Equipment and assets which meet these criteria will be subject to the six and two-thirds percent equipment use allowance.
(3) A reasonable use allowance may be ne-
gotiated for any assets that are considered to be fully depreciated, after taking into consideration the amount of depreciation
previously charged to the Government, the estimated useful life remaining at the time of negotiation, the effect of any increased
maintenance charges, decreased efficiency due to age, and any other factors pertinent to the utilization of the asset - for the pur-
pose contemplated.
d. Except as otherwise provided in (a) and (b) above, depreciation methods and use allowances may not be used, in like circumstances, for a single class of assets (e.g., buildings, office equipment, and computer equipment).
e. Charges for use allowances or deprec-
iation must be supported by adequate prop-
erty records, and physical inventories must be taken at least once every two years to ensure that the assets exist and are usable, used, and needed. Statistical sampling tech-
niques may be used in taking these inven-
tories.
(1) The straight-line method of depreciation used, adequate depreciation rec-
dords showing the amount of depreciation
charged for any period must also be maintained.
10. Donated services and property. The value of donated services and property are not allowable either as a direct or indirect cost, except that the cost of any use allowances on donated assets are permitted in accordance with Section 59a. The value of donated services and property may be used to meet cost sharing institutional re-
quirements, in accordance with OMB Circular No. A-110.
11. Employee morale, health, and welfare costs and credits. The costs of house publi-
cations, health or first-aid clinics and/or in-
firmaries, recreational activities, employees,
counseling services, and other expenses in-
curred in accordance with the Institution's established practice or custom for the im-
provement of working conditions, employer-
employee relations, employee morale, and
employee performance, are allowable. Income generated from any of these activi-
ties will be credited to the cost thereof unless such income has been irrevocably set over to employee welfare organizations.
12. Entertainment costs. Costs incurred for amusement, social activities, entertain-
ment, and any items relating thereto, such as meals, lodging, rentals, transportation, and
gratuities, are unallowable.
13. Equipment and other capital expen-
situres.
a. For purposes of this paragraph, the fol-
lowing definitions apply:
(1) Equipment means an article of non-
copper value, tangible personal property having a useful life of more than two years, and an acquisition cost of $500 or more. However, consistent with institutional policy, lower limits may be established.
(2) Capital expenditure means the cost of the asset including the cost to put it in place. Capital expenditure for equipment, for example, means the net invoice cost of the equipment, including the cost of any modifications, attachments, accessories, or aux-
iliaries necessary to make the equipment usable for the purpose for which it is ac-
quired. Ancillary charges, such as taxes, duty, protective intrastate insurance, freight, and installation may be included in, or ex-
cluded from, capital expenditure cost in ac-
cordance with the institution's regular ac-
counting practices.
7. Contingency provisions. Contributions to a contingency reserve or any similar provision, made by an entity for the particular project, which cannot be foretold with certainty as to time, intensity, or with an assurance of their happening, are unallowable. (But see also Section 34c).
8. Deans of faculty and graduate schools. The salaries and expenses of deans of facul-
ty and graduate schools, or their equiv-
alents, are not allowable. (But see also Section 35).
9. Depreciation and use allowances. Insti-
tutions may be compensated for the use of
their buildings, capital improvements, and
equipment, provided that they are used,
needed in the institutions' activities, and properly allocable to sponsored agreements. Such compensation may be made by allowing either depreciation or use allowance.
Use allowances are the means of providing such compensation when depreciation or other equivalent costs are not computed. The allocation for depreciation or use allow-
ance shall be made in accordance with Sec-
ction 59a. Depreciation and use allowances are computed applying the following rules:
a. The computation of depreciation or use
allowances shall be based on the acquisition
cost of the assets involved. For purposes of this provision, the acquisition cost will exclude (1) the cost of land; (2) any portion of the cost of build-
ings and equipment borne by or donated by the Government, institutions, or other entities; (3) any portion of the cost of buildings and equipment contributed by or for the use of the institution before receipt of receipt or title, or on which the institution has no right to prohibit recovery. For an asset donated to the institution by a third party, its fair market value at the time of the donation shall be considered as the acquisition cost.
b. In the use of the depreciation method, the following shall be observed:
(1) The straight-line method of depre-
ciation used shall be

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
NOTICES

12377

Treatment of tuition remission provided to.

Activities in proportion to the relative lowable, provided (a) such policies meet the established policies of the institution are allowable, provided (b) such policies are generally accepted by the sponsoring agency.

Capital expenditures for improvements to land, buildings, or equipment which materially increase their value or useful life are unallowable, except where approved in advance by the sponsoring agency.

Capital expenditures for special purpose equipment are allowable as direct charges, provided that the acquisition of items having a unit cost of $1,000 or more is approved in advance by the sponsoring agency.

Fines and penalties. Costs resulting from violations of, or failure of the institution to comply with, Federal, State, and local laws and regulations are unallowable, except where incurred as a result of compliance with specific provisions of the sponsored agreement, or instructions in writing from the contracting officer or equivalent.

Insurance and indemnification.

a. Costs of insurance required or approve, and maintain insurance or otherwise. The Government is entitled to proceed with (a) such insurance is part of an employee plan which is not unduly restricted.

Contributions to a reserve for a self-insurance plan are allowable, except to the extent that the types of coverage, extent of coverage, and the rates and premiums would have been allowed had insurance been purchased directly.

Actual losses which could have been covered by permissible insurance (whether through purchased insurance or self-insurance) are unallowable, unless expressly provided for in the sponsored agreement, except that costs incurred because of losses not covered under existing deductible clauses for insurance coverage provided in keeping with sound management practice as well as minor losses not covered by insurance, such as spillage, breakage and disappearance of small hand tools, which occur in the ordinary course of operations, are allowable.

Indemnification includes securing the institution against liabilities to third persons and other losses not compensated by insurance or otherwise. The Government is obligated to indemnify the institution only to the extent expressly provided for in the sponsored agreement, except as provided in a above.

Interest, fund raising, and investment management costs.

a. Costs for interest on borrowed capital or temporary use of endowment funds, however represented, are unallowable.

b. Costs of organized fund raising, including financial campaigns, endowment drives, solicitation of gifts and bequests, and similar expenses incurred solely to raise capital or obtain contributions, are unallowable.

c. Costs of investment counsel and staff and similar expenses incurred solely to enhance income from investments are unallowable.

d. Costs related to the physical custody and control of monies and securities are allowable.

18. Labor relations costs. Costs incurred in maintaining satisfactory relations between the institution and its employees, including costs incurred for representation of employees' publications, and other related activities, are allowable.

19. Losses on other sponsored agreements or contracts. Any excess of costs over income under any other sponsored agreement or contract of any nature is unallowable. This includes, but is not limited to, the cost-sharing agreements or any under-recoveries through negotiation of flat amounts for indirect costs.

20. Maintenance and repair costs. Costs incurred for necessary maintenance, repair or upkeep of property (including Government-owned property unless otherwise provided for) which neither add to the permanent value of the property nor appreciably prolong its intended life but keep it in an efficient working condition, are allowable.

21. Material costs. Costs incurred for purchased materials, supplies, and fabricated parts directly or indirectly related to the sponsored agreement, are allowable. Purchases made specifically for the sponsored agreement should be charged thereto at their actual prices after deducting all discounts, trade discounts, rebates, and allowances received by the institution. Withdrawals from general stores or stockrooms should be charged at their cost under any recognized method of pricing stores withdrawals conforming to sound accounting practices consistently followed by the institution. Incoming transportation and handling are a proper part of material cost. Direct material cost should include only the materials and supplies actually used for the performance of the sponsored agreement, and due credit should be given for any excess materials retained, or returned to vendors. Due credit should be given for all proceeds or value received for any scrap resulting from work under the sponsored agreement. Where Government-donated or furnished material is used in performing the sponsored agreement, such material will be used without charge.

22. Memberships, subscriptions and professional activity costs.

a. Costs of the institution's membership in civic, business, technical, and professional organizations are allowable.

b. Costs of the institution's subscriptions to civic, business, professional, and technical periodicals are allowable.

c. Costs of meetings, conventions, and conferences, when the primary purpose is the dissemination of technical information, are allowable.

d. Costs of amortization, rental of facilities, and other items incidental to such meetings or conferences.

23. Patent costs. Costs of preparing disclosure reports, and other costs required by the sponsored agreement, and of
searching the art to the extent necessary to make such invention disclosures, are allowable. In accordance with the clauses of the sponsored agreement relating to patents, costs of preparing and filing patent applications and other patent costs, in connection with the filing of a patent application where title is conveyed to the Government, are allowable. (See also Section 124.)

24. Plant security costs. Necessary expenses incurred to comply with security requirements of sponsored agreements, whether or not they would have been allowable thereunder if incurred after such date, are unallowable unless approved by the sponsoring agency.

25. Preagreement costs. Costs incurred prior to the effective date of a sponsored agreement, whether or not they would have been allowable thereunder if incurred after such date, are unallowable unless otherwise provided against the Government, are unallowable.

26. Professional services costs. Costs of professional services rendered by the members of a particular profession who are not employees of the institution are allowable, subject to b and c below, when reasonable in relation to the services rendered and the initial understanding of the costs of the Government. Retainer fees to be allowable must be reasonably supported by evidence of services rendered rendering.

b. Factors to be considered in determining the allowability of costs in a particular case include: (1) the nature and scope of the professional services expected of the institution's own organizations; and (4) whether the proportion of Government work to the total activities of the firm is reasonable.

c. Costs incurred in rendering assistance to the institution in favor of incurring the cost, particularly where the services rendered are not of a continuing nature and have little relationship to work under sponsored agreements.

d. Costs of legal, accounting, and consulting services, and related costs, incurred in connection with the prosecution of claims against the Government, are unallowable. Costs of legal, accounting and consulting services, and related costs, incurred in connection with patent infringement litigation, are unallowable unless otherwise provided for in the sponsoring agreement.

27. Profits and losses on disposition of plant equipment or other capital assets. Profits or losses arising from the sale or exchange of plant equipment, or other capital assets, including sale or exchange of either short-term or long-term investments, shall not be considered in computing the costs of sponsored agreements except for pension plans as provided in Section J1Sc. Where assets acquired with Federal funds, in part or wholly, are disposed of, the distribution of the proceeds shall be made in accordance with Attachment N, OMB Circular No. A-110.

28. Proprietary costs. Costs are the costs of preparing bids or proposals on potential Government and nongovernment sponsored agreements or projects, including the development necessary to support the institution's bids or proposals. Proposal costs of the current accounting period of both successful and unsuccessful bids and proposals normally should be treated as indirect costs and allocated currently to all activities of the institution, and no proposal costs of past accounting periods will be allowable to the current period. However, the institution's established practices may be to treat proposal costs by some other recognized method. Regardless of the method selected, costs are allowable only if found to be reasonable and equitable.

29. Public information services costs. Cost of news releases pertaining to specific research or scientific accomplishment are allowable, when they result from performance of the sponsored agreement.

30. Rearrangement and alteration costs. Costs incurred for ordinary or normal rearrangement and alteration of facilities are allowable. Special rearrangement and alteration costs incurred specifically for the project are allowable when such work has been approved in advance by the sponsoring agency.

31. Recapitalization costs. Costs incurred in the restoration or rehabilitation of the institution's facilities to approximately the same condition, or in excess in size prior to commencement of a sponsored agreement, fail wear and tear excepted, are allowable.

32. Recruiting costs. a. Subject to b and d below, and provided that the size of the staff recruited and maintained is in keeping with workload requirements, costs of "help wanted" advertisements, operating or recruitment office expenses necessary to secure and maintain an adequate staff, costs of operating an aptitude testing program, travel and transportation costs of employees while engaged in recruiting personnel, travel costs of applicants for interviews for prospective employment, and relocation costs incurred in connection with recruitment of new employees, are allowable to the extent that such costs are incurred pursuant to a well managed recruitment program. Costs of the institution's employment agencies, costs not in excess of standard commercial rates for such services are allowable.

b. In publications, costs of help wanted advertising that includes color, includes advertising material for other than recruitment purposes, or is excessive in size prior to commencement of a sponsored agreement, fail wear and tear excepted, are allowable.

c. Costs of newspaper advertising that includes color, includes advertising material for other than recruitment purposes, or is excessive in size prior to commencement of a sponsored agreement, fail wear and tear excepted, are allowable.

d. Where relocation costs incurred incidental to recruitment of a new employee have been allowed either as an allocable direct or indirect cost, and the newly hired employee resigns for reasons within his control within twelve months after hire, the institution will be required to refund or credit such relocation costs to the Government.

33. Rental cost of buildings and equipment. a. Costs of buildings or equipment are allowable to the extent that the decision to rent or lease is in accord with Section C-3. Rental arrangements should be reviewed periodically to determine if circumstances have changed and other options are available.

b. Rental costs under "sale and lease back" arrangements are allowable only up to the amount that would be allowed if the institution continued to own the property.

c. Rental costs under "less-than-arms-length" leases are allowable only up to the amount that would be allowed if the institution owned the property.

34. Royalties and other costs for use of patents. Royalties on a patent or amortization of the cost of acquiring a patent or inventions held for the purpose of acquiring a patent are unallowable, subject to c, below, and provided that the property is limited to the extent that such costs are incurred pursuant to a well managed recruitment program.

c. Costs considered to be unenforceable, or the use of the patent, the patent has been adjudicated to be invalid or has been administratively determined to be invalid, the patent has been considered to be unenforceable, or the patent has expired.

35. Sabbatical leave costs. Costs of leave of absence by employees for performance of graduate work or sabbatical study, travel, or research are allowable provided the institution has a uniform policy on sabbatical leave for persons engaged in instruction and research. Such costs will be allocated on an equitable basis among all related activities of the institution. Where sabbatical leave is included in fringe benefits for which a cost is determined for assessment as a direct charge, the aggregate amount of such assessments applicable to all work of the institution during the base period must be reasonable in relation to the institution's actual experience under its sabbatical leave policy.

36. Scholarships and student aid costs. a. Costs of scholarships, fellowships, and other programs of student aid are allowable only when the purpose of the sponsored agreement is to provide training to selected participants and the charge is approved by the sponsoring agency. However, tuition re-
mission and other forms of compensation paid as, or in lieu of, wages to students performing necessary work are allowable provided that such compensation shall be direct or indirect compensation to students classified as employees in accordance with the employee relationship between the student and the institution for the work performed. Furthermore, severance payments to students are allowable only to the extent that such payments are required by law, by an employer-employee agreement, by a collective bargaining agreement, or in order to compensate students in nonsponsored as well as sponsored activities.

b. Charges for tuition remission and other forms of compensation paid to students as, or in lieu of, salaries and wages shall be subject to the reporting requirements stipulated in Section 50, and shall be treated as direct or indirect compensation to students classified as employees in accordance with the employee relationship between the student and the institution for the work being performed. Tuition remission may be charged on an average rate basis.

37. Severance pay. a. Severance pay is compensation in addition to regular salary and wages which is paid by the institution when the employment relationship of an employee is terminated. Costs of severance pay are allowable only to the extent that such payments are required by law, by an employer-employee agreement, by a collective bargaining agreement, or in order to compensate students in nonsponsored as well as sponsored activities.

b. Severance payments that are due to normal recurring turnover and which otherwise meet the conditions set forth in section 3.43 (5) are allowable provided the actual costs of such severance payments are regarded as expenses applicable to the current fiscal year and are chargeable to the institution's activities during that period. However, the Government recognizes its obligation to participate, to the extent of its fair share, in any specific payment.

38. Specialized service facilities. a. The costs of institutional services involving the use of highly complex or specialized facilities such as electronic computers, wind tunnels, and reactors are allowable, provided the charge for the service meets the conditions set forth in section 3.39. b. The cost of each service normally shall consist of both its direct costs and its allowable share of indirect costs with deductions for appropriate income or Federal financing as described in Section C5. c. The cost of such institutional services when material in amounts will be charged directly to users, including sponsored agreements based on actual use of the services and a schedule of rates that does not discriminate between federally and nonfederally supported activities of the institution, including used by the institution for internal purposes. Charges for the use of specialized facilities are allowable provided the rates charged for services per unit of product or service are not based on the aggregate cost of the services over a long-term period and agreed to by the institution and the cognizant Federal agency. Accordingly, it is not necessary that the rates charged for services be equal to the cost of providing those services during any one fiscal year. Rates are reviewed periodically for consistency with the long-term plan and adjusted if necessary.

d. Where the costs incurred for such institutional services are not material, they may be allocated as indirect costs. Such arrangements must be agreed to by the institution and the cognizant Federal agency.

e. Tuition or other payments are allowable only to the extent that the charging party and the student mutually agree on a long-term agreement and the cognizant Federal agency.

39. Severance pay. a. Severance pay is compensation in addition to regular salary and wages which is paid by the institution when the employment relationship of an employee is terminated. Costs of severance pay are allowable only to the extent that such payments are required by law, by an employer-employee agreement, by a collective bargaining agreement, or in order to compensate students in nonsponsored as well as sponsored activities.

b. Severance payments that are due to normal recurring turnover and which otherwise meet the conditions set forth in section 3.43 (5) are allowable provided the actual costs of such severance payments are regarded as expenses applicable to the current fiscal year and are chargeable to the institution's activities during that period. However, the Government recognizes its obligation to participate, to the extent of its fair share, in any specific payment.

38. Specialized service facilities. a. The costs of institutional services involving the use of highly complex or specialized facilities such as electronic computers, wind tunnels, and reactors are allowable, provided the charge for the service meets the conditions set forth in section 3.39. b. The cost of each service normally shall consist of both its direct costs and its allowable share of indirect costs with deductions for appropriate income or Federal financing as described in Section C5. c. The cost of such institutional services when material in amounts will be charged directly to users, including sponsored agreements based on actual use of the services and a schedule of rates that does not discriminate between federally and nonfederally supported activities of the institution, including used by the institution for internal purposes. Charges for the use of specialized facilities are allowable provided the rates charged for services per unit of product or service are not based on the aggregate cost of the services over a long-term period and agreed to by the institution and the cognizant Federal agency. Accordingly, it is not necessary that the rates charged for services be equal to the cost of providing those services during any one fiscal year. Rates are reviewed periodically for consistency with the long-term plan and adjusted if necessary.

d. Where the costs incurred for such institutional services are not material, they may be allocated as indirect costs. Such arrangements must be agreed to by the institution and the cognizant Federal agency.

e. Tuition or other payments are allowable only to the extent that the charging party and the student mutually agree on a long-term agreement and the cognizant Federal agency.

f. Domestic travel costs are allowable when permitted by the sponsored agreement. Expenditures for such travel will not be allowable if they exceed the amounts specified by more than 25% or $500, whichever is greater, except with an advanced approval of the sponsoring agency.

44. Termination costs applicable to sponsored agreements. a. Termination of sponsored agreements generally gives rise to the incurrence of costs or to the need for special treatment of costs, which would not have arisen had the agreement not been terminated. Items peculiar to termination are set forth below. They are to be used in conjunction with all other provisions of this Circular in the case of termination.

b. The cost of common items of material reasonably usable on the institution's other work will not be allowable unless the institution submits evidence that it could not retain such items at cost without sustaining a loss. In deciding whether such items are reasonably usable on other work of the institution, consideration should be given to the institution's plans and orders for current and scheduled work. Contemporaneous purchases of common items by the institution will be regarded as evidence that such items are reasonably usable on the institution's other work. Any acceptance of common items as allowable to the terminated portion of the agreement should be limited to the extent that the quantities of such items on hand, in transit, and on order are in excess of the reasonable quantitative requirements of other work.

c. If in a particular case, despite all reasonable efforts by the institution, certain costs cannot be discontinued immediately after the effective date of termination, such costs are generally allowable within the limitations set forth in this Circular, except that any such costs continuing after termination due to the negligent or willful failure
NOTICES

of the institution to discontinue such costs will be considered unacceptable.

d. Loss of useful value of special tooling, and special machinery and equipment is generally allowable, provided (1) such special tooling, machinery, or equipment is not reasonably capable of use in the other work of the institution; (2) the interest of the Government is protected by transfer of title or by other means deemed appropriate by the contracting officer or equivalent; and (3) the loss of useful value as to any one terminated agreement is limited to that portion of the acquisition cost which bears the same ratio to the total acquisition cost as the terminated portion of the agreement bears to the entire terminated agreement and other Government agreements for which the special tooling, special machinery, or equipment was acquired.

e. Rental costs under unexpired leases are generally allowable where clearly shown to have been reasonably necessary for the performance of the terminated agreement, less the residual value of such leases, if (1) the amount of such rental claimed does not exceed the reasonable use value of the property leased for the period of the agreement and such further period as may be reasonable; and (2) the institution makes all reasonable efforts to terminate, assign, settle, or otherwise reduce the cost of such lease. There also may be included the cost of alterations of such leased property, provided such alterations were necessary for the performance of the agreement, and of reasonable restoration required by the provisions of the lease.

f. Settlement expenses including the following are generally allowable: (1) accounting, legal, clerical, and similar costs reasonably necessary for the preparation and presentation to contracting officers or equivalent of settlement claims and supporting data with respect to the terminated portion of the agreement, and the termination and settlement of subagreements; and (2) reasonable costs for the storage, transportation, protection, and disposition of property provided by the Government or acquired or produced by the institution for the agreement, except when the institution is reimbursed for disposals at a predetermined amount in accordance with the provisions of Circular No. A-110.

g. Claims under subagreements, including the allocable portion of claims which are common to the agreement and to other work of the institution, are generally allowable.

K. CERTIFICATION OF CHARGES

To assure that expenditures for sponsored agreements are proper and in accordance with the agreement documents and approved project budgets, the annual and/or final fiscal reports or vouchers requesting payment under the agreements will include a certification, signed by an authorized official of the university, which reads essentially as follows: "I certify that all expenditures reported (or payment requested) are for appropriate purposes and in accordance with the provisions of the application and award documents."

REQUIREMENT TO WITHDRAW OR SUPPLEMENT PROPOSALS TO DETERMINE VARIOUS U.S. TAXA OF PLANTS AND WILDLIFE AS ENDANGERED OR THREATENED OR TO DETERMINE CRITICAL HABITAT FOR SUCH SPECIES
PROPOSED RULES

[4310-55-M]

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Requirement to withdraw or supplement proposals to determine various U.S. taxa of plants and wildlife as Endangered or Threatened or to determine Critical Habitat for such species.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The Service provides notice that proposals to list certain species of plants and wildlife as Endangered or Threatened or to determine Critical Habitat for such species pursuant to the Endangered Species Act of 1973 do not meet requirements set forth in the Endangered Species Act Amendments of 1978 (Public Law 95-632, 92 Stat. 3751). Proposals to list species will require supplementation prior to the issuance of final rules.

Specifically, the Service will determine whether critical habitat should be proposed for these species. Proposals to determine Critical Habitat are withdrawn and will require re-proposal if appropriate.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

BACKGROUND
The Service has made a number of proposals to list species of plants and wildlife as Endangered or Threatened or to determine Critical Habitat for such species pursuant to the Endangered Species Act of 1973. These proposals, made before the Endangered Species Act Amendments of 1978 (hereinafter, Amendments) became effective, do not fulfill certain requirements set forth in that legislation. Specifically, the Amendments require that:

1. A proposal to list a species as Endangered or Threatened be accompanied, to the maximum extent prudent, by a specification of Critical Habitat for the species to be listed, and that notice of any proposal which specifies Critical Habitat be published in a newspaper of general circulation in or adjacent to such habitat.

2. The substance of the Federal Register notice of any proposal to determine a species as Endangered or Threatened or specify its Critical Habitat be offered for publication in appropriate scientific journals.

3. All general local governments located within or adjacent to a proposed Critical Habitat be notified of the proposed regulation at least 60 days before its effective date.

4. A public meeting (and if requested, a public hearing) be held on any proposed regulation which specifies Critical Habitat within the area in which such habitat is located in each State, and, if requested in each such State.

5. A public meeting be held on a proposed regulation which does not specify Critical Habitat if such a meeting is requested by any person within 45 days of the date of publication of the notice of proposal.

6. Any proposed regulation which includes a specification of Critical Habitat be accompanied by a brief description and evaluation of those activities which may adversely modify such habitat or may be impacted by such specification.

7. In determining the Critical Habitat of any Endangered or Threatened species, consideration be made of the economic impact, and any other relevant impacts, of specifying any particular area as Critical Habitat and that any such area may be excluded from a Critical Habitat if the benefits of such exclusion are found to outweigh the benefits of specifying the area as part of the Critical Habitat and if the exclusion would not result in the extinction of the species.

Actions affected by these requirements include:

1. Proposals to list species. These now require supplementation, to the maximum extent prudent, by proposals of Critical Habitat as a result, the Service will propose critical habitat for these species if appropriate. The public will be afforded full opportunity to comment on any such proposal;

2. Proposals to determine Critical Habitat. These are withdrawn, and

3. Proposals to list species and determine Critical Habitat. These are withdrawn only to the extent that they propose Critical Habitat and otherwise require supplementation by proposal of Critical Habitat in the manner discussed above.

All withdrawals made pursuant to this notice are conducted voluntarily by the Service to comply with the provisions of the Endangered Species Act Amendments of 1978 set out above. Because the withdrawals are not required by section 11(5) of the Amendments, the Service need not comply with the requirements of that section prior to reproposal.

Affected proposals are listed below, referenced by publication of notice in the Federal Register:

1 Requires supplementation only if as it applies to the species listed below. The remaining taxa affected by this proposal have already been the subjects of a final rulemaking.

Molluscs:
- Lamellia satura—plain pocketbook mussel.

2 Requires supplementation except if as it applies to the species listed below, which have already been the subject of a final rulemaking.

- Snails:
  - Anaspis picta—painted snake called forest snail.
  - Discus maccini —Iowa Plethoene snail.
  - Mesodon clarke nantahala—nontahala snail.
  - Orthocetus rose—block Island tree snail.
  - Polyphytis virginianus—Virginia fringed mountain snail.
  - Suceina chiflenanoma—Chiflenananga snail.
  - Trisapinus platysoides—flat-spined three-toothed snail.

3 Requires supplementation only as it applies to the species listed below. The remaining taxa affected by this proposal have either been previously withdrawn or have already been the subjects of a final rulemaking.

Insects:
- Coenocephyla eburnea—San Clemente coenocephyla beetle.

Plants:
- Betula alba—Virginia round-leaf birch.
- Rubus occidentalis—McDonald’s rock rose.
- Erythronium capitatum var. angustatum—Contra Costa wallflower.
- Dodecaphyllum—San Joaquin Valley buckwheat.
- Elymus menziesii—Hawaiian wild wheat.
- Hydrophyllum—Waterleaf family.
- Phacelia antirrhinoides—unnamed phacelia.
- Lupinus, Mint family.
- Papaver oregana—Oregon poppy.
- Liliaceae, Lily family.
- Trillium columbianum—persistent trillium.
- Maianthemum, Tassel family.
- Penstemon, Penstemon family.
- Oenothera deltoidea—Anza Dunes evening primrose.

FEDERAL REGISTER, VOL. 44, NO. 45—TUESDAY, MARCH 6, 1979
PROPOSED RULES

Poaceae, Grass family:
- *Orcuttia mucronata*—Crampton's Orcutt grass.
- *Scaevola alexandrinus*—Eureka dune grass.
- *Zizania texana*—Texas wild-rice.

Ranunculaceae, Buttercup family:
- *Aconitum noveboracense*—northern wild monkshood.
- *Delphinium kennicottii*—San Clemente Island larkspur.

Scrophulariaceae, Snapdragon family:
- *Castilleja grisea*—San Clemente Island Indian paintbrush.
- *Cordylanthus maritimus* sp. *maritimus*—salt marsh bird's beak.
- *Pedicularis furciblada*—Furciblada lousewort.

Requires supplementation except insofar as it applies to the following species, which have already been the subjects of a final rulemaking.

Fishes:
- *Etheostoma boschungi*—Slackwater darter.
- *Hybopsis cahni*—Slender chub.
- *Hybopsis modesta*—Spotfin chub.
- *Noturus flavipinnis*—Yellowfin madtom.
- *Speoplatyrhinus poscinus*—Alabama cave fish.

Withdrawn except insofar as it applies to the following species, which have already been the subject of a final rulemaking.

Plants:
- *Erysimum capitatum* var. *angustatum*—Contra Costa wallflower.
- *Oenothera deltoides* sp. *howellii*—Antioch Dunes evening-primrose.

Withdrawn insofar as it applies to areas C, D(3), D(4), D(5), and D(6). The other proposed areas have either been previously withdrawn or have been subjects of a final rulemaking.

Comments received from the public concerning the proposals will be considered in the formulation of supplements to meet the requirements of the Amendments. In addition, comments concerning supplemented proposals will be solicited by letter from all persons who have made substantive comments on the original proposals.

LYNN A. GREENWALD,
Director, Fish and Wildlife Service.

Rhesus Macaque in Bangladesh; Removal of Consideration for Listing as an Endangered or Threatened Species
DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
[50 CFR Part 17]
ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Rhesus Macaque in Bangladesh; Removal of Consideration for Listing as an Endangered or Threatened Species

AGENCY: Fish and Wildlife Service, Interior.

SUMMARY: Under petition, the Service has been reviewing the status of the Rhesus macaque (Macaca mulatta) in Bangladesh to determine whether it qualifies for listing as an Endangered or Threatened species pursuant to the Endangered Species Act of 1973, 16 U.S.C. 1531-1543. The petitioner submitted in support of the petition a report entitled Primates of Bangladesh: A Preliminary Survey of Population and Habitat. The Service considered this report to be sufficient to warrant a review of the status of this species as authorized by Sec. 4(c)(2) of the Act, and on April 13, 1978, published a Notice of Review to that effect in the Federal Register, 43 FR 15463. Subsequently, the Service contacted knowledgeable agencies and individuals, as well as the Government of Bangladesh, to determine if a proposed rulemaking to list the Rhesus macaque in Bangladesh was warranted. This review has now been completed, and it is the Service's view that such a proposal is not justified.

The Rhesus macaque is one of the most widely distributed members of the genus Macaca. Ellerman and Morrison-Scott (Palaearctic and Indian Primates, 1966) give its distribution as eastern Assam and Burma, south approximately to the Tapti River (Khandesh) and the Godavari in Northern Peninsular India, Siam, Indo-China, Szechuan, and Yunnan, eastward to Fukien and adjacent states in southeastern China, Hainan, Tibet, and the neighborhood of Peking. Thus, the species is distributed in an area of well over 5,000,000 square miles, where it inhabits forests, cultivation areas, and riverbanks. Habitat disruption in this region has not had a particularly adverse effect upon it since it adapts readily to man's civilization; Southwick reported that in the north Indian village of Uttar Pradesh, 48 percent of all local monkeys occupied the villages, 30 percent the cities, and others were found along roads or in temples. In India, love of animals is part of the religion and the protection thus afforded has resulted in over-population at some times and places. Mass captures and exports in recent years, however, have decreased the numbers of rhesus monkeys in many areas, but India has now imposed an effective export ban which should improve the outlook for the species in that country.

Bangladesh, with an area of about 55,000 sq. mi. comprises approximately 1 percent of the overall range of the Rhesus macaque. The subspecies occurring in this country is the nominate race which comprises about 90 to 95 percent of the population of the entire species, including those populations that occur in most of India and China. Thus, the Bangladesh population is not a unique form or subspecies which is different from adjacent populations; it is indistinguishable from the vast majority of Rhesus macaques occurring from western India to eastern China.

With regard to this population in Bangladesh, the Service feels that the biological data submitted by the petitioner are insufficient to proceed with a proposal for its listing. When the Notice of Review was published in April, 1978, the Service contacted the Government of Bangladesh as well as all knowledgeable and concerned agencies and individuals in an attempt to gather more information on the status of the species. No response was forthcoming from the Government of Bangladesh, but nine letters were received from agencies and individuals commenting on the notice. None of these letters contained any substantial information or data on the status of this monkey in Bangladesh and hence the Service is required to depend entirely upon the data provided by the petitioner in order to make a decision in the matter. The Service now feels that these data, although substantial enough to call for a Notice of Review, are not sufficient to proceed further with a proposed rulemaking. The basic flaw in the data provided by the petitioner is that it is based upon a very limited survey, and that he was unable to enter the two major forest regions of Bangladesh, the Sundarbans and Chitragong Hill Tracts. In fact, the petitioner himself admits that the effectiveness of his survey was reduced because of this. Even so, the petitioner's estimate of 35,000 rhesus macaques in Bangladesh would seem like a fairly substantial number of animals considering the meager amount of habitat in the country, and the tremendous havoc that has been wrought on Bangladeshi wildlife in general in recent years.

Because the data submitted to support a listing are based upon a limited survey, and no additional data became available during the notice of review to support a proposal for listing, the Service does not feel that it is justified in proposing the Bangladesh population of the Rhesus macaque as either Endangered or Threatened at this time. If evidence in the future becomes available which indicates the species should be listed under the Act, the Service will reconsider the matter in light of the new evidence.

This notice was prepared by John L. Paradiso, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240. Phone (202) 343-7814.

REVIEW OF THE STATUS OF THE SAN ESTEBAN ISLAND CHUCKWALLA
DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
[50 CFR Part 17]
ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Review of the Status of the San Esteban Island Chuckwalla

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Review of the status of the San Esteban Island Chuckwalla.

SUMMARY: The Service will review the status of the San Esteban Island chuckwalla (Sauromalus varius) to determine if it should be listed as Endangered or Threatened. This status review is being conducted because this species has a very limited range and is subject to exploitation by the pet industry.

DATES: Information regarding the status of this species should be submitted on or before June 4, 1979.

ADDRESS: Comments on this notice of review should be submitted to the Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

BACKGROUND.

On December 20, 1978, the Fish and Wildlife Service was petitioned by Dr. Ted Case of the University of California—San Diego to list the San Esteban Island chuckwalla, Sauromalus varius, as either endangered or threatened under provisions of the Endangered Species Act of 1973. Aside from the unique biological attributes of this species, including limited range, uncommonness within its habitat, very low reproductive rates, and low predation rates, Dr. Case believes the chuckwalla should be listed because the lizard is subject to human predation for the pet trade. Because of the life history characteristics of this species, Dr. Case feels that collection for the pet trade could seriously harm the species' survival in the wild.

The genus Sauromalus, contains eight species, many of which are known only from an island or series of islands in the Gulf of California. All are vegetarians; S. varius feeds primarily on cactus fruit. Little work has been conducted on the San Esteban Island chuckwalla and Dr. Case's studies, as yet unpublished, are the first to examine its life history in detail. These lizards are the largest in North America outside the tropics and are morphologically, genetically, and ecologically distinct from their relatives on the mainland. Individuals are usually found in small groups suggesting a unique social organization.

S. varius occurs only on 43 km² San Esteban Island where its major habitat is a single arroyo that runs along the southeast corner of the island. Dr. Case has estimated that the density of lizards is about nine animals per acre in choice habitat. He therefore estimates the population at about 4500 animals.

Reproductive rates appear extremely low. Of 500 animals that Dr. Case observed in the field or in museums, only two were juveniles. During the 10 years of his study, most adult females did not breed although some became gravid during 2 years when sufficient rainfall occurred during which cactus fruit became abundant. Therefore, population recruitment may be dependent on food supply (and therefore, rainfall), which is quite sporadic. Reproductive maturity is not reached until the age of 5 or 6 years.

Predation rates are low on the chuckwallas and, until recently, man has not seriously threatened them. Dr. Case believes they have exceptional longevity. A species such as this would therefore appear to be a K-selected species, and thus seriously prone to disturbances affecting population structure. Such disturbance has recently come in the form of the pet trade; 100 animals were collected recently and sold to a supply house in California. The large size and rarity of the lizards has made them attractive to those interested in exotic pets. If this trend continues or accelerates, as Dr. Case fears, then the unique San Esteban Island chuckwalla could be seriously threatened in its limited and unprotected habitat. For these reasons, the Service believes the threats to, and status of, this species should be carefully reviewed.

The Director of the Service is hereby seeking the views of all persons who have information on the status of his species, as well as the views of the government of Mexico, to determine if sufficient biological data exist to warrant a proposal as either Endangered or Threatened under provisions of the Act. All interested persons are invited to submit any factual information, especially publications and written reports, which is germane to this status review.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.
DEPARTMENT OF LABOR

Employment and Training Administration

SUMMER YOUTH EMPLOYMENT PROGRAM

Implementation Regulations for Summer
PART 680—YOUTH PROGRAMS OPERATED BY PRIME SPONSORS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Subpart C—Summer Youth Employment Program

AGENCY: Employment and Training Administration, Labor.

ACTION: Final rules.

SUMMARY: This document contains final rules for the Summer Youth Employment Program (SYEP) under the Comprehensive Employment and Training Act. The purpose of this document is to implement the Summer Youth Employment program for the summer of 1979.

DATES: Effective date of these rules is April 1, 1979. Comments on the final rules are requested by April 6, 1979.

ADDRESS: Comments should be addressed to the Assistant Secretary for Employment and Training, U.S. Department of Labor, 601 D Street, N.W., Washington, D.C. 20213, Attention: Robert Taggart, Administrator, Office of Youth Programs.

FOR FURTHER INFORMATION CONTACT:
Mr. Robert Taggart, Telephone: 202-376-2646.

SUPPLEMENTARY INFORMATION:

The Summer Youth Employment Program (SYEP) is authorized by Title IV, Part C of the Comprehensive Employment and Training Act (CETA). Prior to this year, that is, before the reauthorization of CETA in October, 1978, the summer youth program was authorized by Section 304(c)(3) of the Comprehensive Employment and Training Act of 1973; it was known as the Summer Program for Economically Disadvantaged Youths (SPEDY). Regulations for the 1978 SPEDY program were published in the Federal Register on May 19, 1978, and may be found at 29 CFR Part 97, subpart A. The regulations issued in this document will govern the summer youth program, now known as the Summer Youth Employment Program (SYEP) for 1979.

RULING AND REGULATIONS

Last year, the SYEP regulations were rewritten to strengthen management and monitoring procedures and to prevent program abuse. The regulations being issued for SYEP in this document incorporate these safeguards and continue the kinds of procedures which were implemented in 1978. They are being published for title 20 of the Code of Federal Regulations, rather than for title 29, since title 20, Chapter V is reserved for the use of the Department’s Employment and Training Administration, which administers all programs under CETA, including SYEP. Editorial and organizational changes have been made in the regulations in keeping with the Employment and Training Administration’s current efforts to recodify all of the CETA regulations in title 20 to simplify the CETA regulations, and to eliminate unnecessary duplication.

The Department of Labor’s regulation at 29 CFR 2.7 states that it is the policy of the Department of Labor to use proposed rulemaking procedures when issuing regulations for grant programs. The Secretary, however, in signing this document, is waiving the regulation at 29 CFR 2.7 for the following reasons: (1) These regulations, including the monitoring and management safeguards, continue the policies of last year’s regulations; (2) Section 4(a)(2) of the CETA Amendments Act of 1978 requires that CETA, as reauthorized, be implemented by April 1, 1979; and (3) it is important that prime sponsors begin planning their 1979 summer programs as soon as possible to ensure, to the maximum extent possible, the effective and successful operation of this year’s programs.

Nevertheless, even though this document contains final rules, the Department, in keeping with the spirit of 29 CFR 2.7, is requesting comments on these final rules. Changes in these rules may be made at a later date, depending upon the extent and nature of any comments.

Accordingly, title 20 of the Code of Federal Regulations, Chapter V, is amended as follows:

1. By adding a new Part 680 to read as follows:

PART 680—YOUTH PROGRAMS OPERATED BY PRIME SPONSORS UNDER THE COMPREHENSIVE EMPLOYMENT AND TRAINING ACT

Subparts A and B—[Reserved]

Subpart C—Summer Youth Employment Program

Sec.
680.200 Purpose.
680.201 Eligibility for SYEP funds.
680.202 Allocation of funds.
680.203 Unexpended previous year funds.
680.204 Startup of program.

680.205 Program planning; planning and youth councils.
680.206 Basic program design provisions.
680.207 Description of the SYEP annual plan subpart.
680.208 Activities and services.
680.209 Program management provisions.
680.210 Worksite standards.
680.211 Eligibility for participation.
680.212 Participants compensation, benefits and working conditions.
680.213 Reallocation procedures.
680.214 Modifications.
680.215 Reporting requirements.
680.216 Termination date for the summer program.
680.217 Alternative remedies.

Authority: Sec. 120 of the Comprehensive Employment and Training Act (U.S.C. 801 et seq.), unless otherwise noted.

Subpart C—Summer Youth Employment Program

§680.200 Purpose.

(a) This subpart contains the regulations for that part of the Summer Youth Employment Program (SYEP) under Title IV, Part C of the Act which is operated by prime sponsors designated under §676.5 of this Chapter. The introductory and general provisions at Parts 675 and 676 and the YETP regulations at subpart A of this Part also apply to the SYEP program.

To the extent, however, that the regulations in this subpart conflict with other regulations promulgated under the Act, the requirements contained in this subpart shall prevail (sec. 484).

(b) The Summer Youth Employment Program shall provide eligible youth with useful work and sufficient basic education and institutional or on-the-job training to assist these youths to develop their maximum occupational potential and to obtain employment not subsidized under the Act. The programs shall be designed to meet the diverse individual needs of each participant. Among these are: (1) Structured and well supervised work; (2) opportunities to explore vocational interest; (3) job rotations to expose youth to different work settings; (4) vocational counseling and occupational information; (5) providing income to participants who without assistance would be unable to attend school; (6) meeting special employability needs; (7) services to induce and aid dropouts to return to school; and (8) placement into short-term unsubsidized employment for youth where return-to-school is not expected.

§680.201 Eligibility for SYEP funds.

Prime sponsors designated under §676.5 are eligible to receive funds under SYEP (see. 482).
§ 680.202 Allocation of funds.

Allocation of funds under SYEP shall be in accordance with section 463 of the Act.

§ 680.203 Unexpended previous year funds.

Unexpended summer program funds as of September 30 of each year shall be used in planning and designing the next year’s summer program as described in § 680.204.

§ 680.204 Startup of program.

(a) During the planning and design phase of the program and prior to the close of the school year, only those activities outlined in paragraph (b) below are permissible. Youth may not be compensated for participation in the program prior to the close of school.

(b) Upon approval by the RA, the following planning and design activities shall be allowable beginning October 1 of each year:

(1) Development of the SYEP annual plan subpart;

(2) Hiring of staff (planners, worksite developers, intake specialists, etc.);

(3) Publication and clearance;

(4) Worksite development;

(5) Recruitment, intake and selection of participants;

(6) Arrangements for supportive services;

(7) Dissemination of program information, including orientation;

(8) Development of coordination between schools and other services;

(9) Staff training; and

(10) Other activities, with the approval of the RA, that may be characterized as planning and design but not program operation.

§ 680.205 Program planning: planning and youth councils.

(a) Each prime sponsor shall utilize the planning process and planning council, as described in §§ 676.6 and 676.7, and the youth council established under subpart A of this part.

(b) In developing the SYEP annual plan subpart, the prime sponsor shall coordinate SYEP activities with programs for youth under Part 677 and subparts A and B of this part (sec. 483(c)).

§ 680.206 Basic program design provisions.

Each prime sponsor shall:

(a) Provide services to those individuals most in need among its economically disadvantaged youth population, taking into account any priorities identified by the Secretary. Such services shall be provided on an equitable basis considering the geographic distribution of economically disadvantaged youth within the prime sponsor’s jurisdiction;

(b) Design programs which are, to the maximum extent feasible, consistent with every participant’s fullest capabilities;

(c) Develop outreach and recruitment techniques aimed at all segments of the economically disadvantaged youth population, especially school dropouts, youth likely to return-to-school without assistance from the summer program, and youth who remain in school but are likely to be confronted with significant employment barriers relating to work attitude, aptitude, social adjustment, and other such factors;

(d) Provide labor market orientation to all participants either on a group or individual basis;

(e) Make maximum efforts to develop cooperative relationships with other community resources so that SYEP activities, including worksite supervision, are provided in the summer program at a minimum cost, to the summer program; and

(f) Make appropriate efforts to encourage local educational agencies and post-secondary institutions to award academic credit for the competencies participants gain from their participation in the summer program.

§ 680.207 Description of the SYEP annual plan subpart.

(a) Each prime sponsor shall submit a SYEP subpart by a date established by the RA which, when approved, shall become part of the annual plan.

(b) The RA shall review, and approve or disapprove the SYEP subpart using the procedures in § 676.14.

(c) The SYEP subpart shall consist of the following items:

(1) Approval Request Letter;

(2) Application for Federal Assistance (Standard Form 424); and

(3) Narrative description. The narrative description shall contain:

(I) Objectives and needs for assistance. Using the requirements for the YETP narrative, provide a description of the purposes of the SYEP program and the target groups that will be served by the program.

(II) Results and benefits. Using the requirements for the YETP narrative, describe the participant benefits that will result from the program.

(3) Approach.

(i) Program activities and services. Provide a description of the program activities and services and indicate the delivery methods, target for each, the duration for each, and the target groups to be served by each activity.

(ii) Program coordination and linkage. If the linkages, including the Job Corps agreement, differ from those described in the YETP narrative, provide a description of these unique SYEP linkages.

(III) Worksites.

(A) Attach a copy of a worksite agreement which is representative of the worksite agreements used for SYEP.

(B) Describe the training for worksite supervisors, and other worksite personnel with respect to their responsibilities toward the SYEP. Indicate who will provide such training.

(iv) Participant recruitment and selection. (A) Describe the methods(s) for recruiting youth, including out-of-school youth, if different than that described elsewhere in the Comprehensive Employment and Training Plan.

(B) Describe the method(s) that will be used to verify eligibility, if not described in the Comprehensive Employment and Training Plan, and attach a copy of, or list, the criteria that will be used to select the youth that are most in need.

(v) Program orientation. Attach appropriate materials or describe the methods that will be used to inform the summer participants of their rights and responsibilities under the SYEP and include the information to be covered and the service provider.

(vi) Special components. (A) Describe the labor market orientation component and indicate who will conduct the orientation.

(B) If a vocational exploration program (VEP) is to be funded under the SYEP, describe the program and indicate the number of participants and planned expenditures for the program, the organizations with which agreements have been made, the arrangements covered by these agreements, the occupations to which participants will be exposed, provide evidence of the approval by the affected collective bargaining agent(s), and if a nationally funded VEP is operating in the prime sponsor’s area, identify the functions or activities the prime sponsor will perform for the nationally funded program.

(C) If an Entitlement project under subpart C of this Part is being funded and operated with SYEP funds, describe the project, number to be served, planned expenditures, and primary program activities.

(4) Management and administration.

(D) Describe any significant differences in the administrative, operation, and management (including organizational structure) of the SYEP program from the information provided elsewhere in the Comprehensive Employment and Training Plan.

(II) Describe the results of or attach copies of any evaluation/assessment reports conducted on the last year’s SYEP program, which were used to set the priorities and/or determine the programmatic goals for purpose of SYEP.
(iii) Attach copies, if any, of comments and recommendations received on the SYEP plan from the appropriate labor organizations, the youth council, the planning council, CBO's and LEA's.

(iv) If not elsewhere included in the Comprehensive Employment and Training Plan, describe the monitoring and evaluation process that will be used for the program.

(v) List any property items to be purchased which cost $1,000 or more, indicating the item, the quantity, and price.

(vi) Attach a copy of the Youth Program Planning Summary and Youth Budget Information Summary on the SYEP program.

(5) Assurances and certifications. The SYEP assurances and certifications and detailed instructions for completing the requirements of the SYEP annual plan subpart are contained in the Forms Preparation Handbook.

§ 680.208 Activities and services.

(a) Programs may include any employment and training activity or service specified in § 676.25 except public service employment. The provisions of § 676.25(c)(3) restricting outstationing at worksites shall not apply to SYEP.

(b) Prime sponsors operating Youth Incentive Entitlement Pilot Projects (YIEPP) under subpart C of this Part may use SYEP funds for their YIEPP program. The provisions of subpart C of this Part shall apply to SYEP funds used for this purpose.

§ 680.209 Program management provisions.

Each prime sponsor shall:

(a) Provide adequate skilled supervisors to perform at each worksite;

(b) Closely monitor the performance of service deliverers in compliance with the provisions of the regulations governing the summer program, particularly the provisions of paragraph (h) of this section. Specifically, prime sponsors shall have sufficient technical and managerial personnel to monitor performance and to measure program outcomes against prime sponsor established goals;

(c) Ensure that enrollee applications are widely available and that jobs are awarded among the most severely disadvantaged in an equitable fashion. Each prime sponsor shall inform each participant of the purposes of the program, the conditions and standards (including such items as hours of work, pay provisions and complaint procedures) for work activities in the program and require a signature of the applicable minor (or in the case of minors) the parent, responsible adult, or guardian attesting to the accuracy of the information, especially income data, provided on the application;

(d) When using contractors or subrecipients, enter into contracts or subcontracts with § 676.37. Prime sponsors may enter into contracts or subcontracts for those allowable activities or operations of the summer program only with organizations that have demonstrated sufficient program capability and shall have reasonable assurances that such organizations:

(1) Have sufficient capability to operate the program;

(2) Have the financial management capability required by § 676.34;

(3) Assure in their applications that all proposed worksites meet the requirements of this subpart, and that such worksites will meet the standards of § 680.210;

(4) Assure in their applications that they will have available for review and monitoring the names and qualifications of their officers, directors, and managing personnel, including the names and qualifications of officers, directors and managing personnel of any affiliate, subsidiary, etc., who have operational or fiscal responsibilities for the summer program;

(5) Assure in their applications that they will have available a list of all Department of Labor; Department of Health, Education, and Welfare; and Department of Agriculture programs under which they have received financial assistance during the last three years and provide in their applications a statement that to the best of their knowledge, they have substantially complied with the requirements, procedures and objectives of such programs;

(6) Assure in their applications that there is no information available to them showing substantial non-compliance with the Act and regulations in operation during the terms of the previous year's summer program, or if there is, they shall include in their applications a copy of an acceptable plan to correct such deficiencies and

(7) Assure in their applications that all of their personnel will have basic training in the program and regulations before the summer program begins;

(e) Consider in selecting contractors or subrecipients the capability of such organizations to:

(1) Provide worthwhile work to participants (i.e., work that is appropriate in terms of participants needs and local market demands);

(2) Provide the specific services contracted for;

(3) Restrict expenditures to allowable costs only;

(4) Submit timely and accurate reports;

(5) Authorize payment only for time worked by a participant or an employee of the project sponsor; and

(f) Provide such public information regarding the program worksites and its administrators as may be requested;

(g) Require their contractors or subrecipients to:

(1) Have supervisory and operational personnel for monitoring each site to which participants are assigned;

(2) Assure that all sites, where participants will be assigned, have the capability and facilities to provide services to summer youth in a sanitary and safe environment; and

(3) Assure that all personnel and worksite personnel with regard to the duties and responsibilities, including monitoring;

(h) Compile and continually update a list of worksites divided by contractor and subrecipient on a sample basis during the first half of the summer program to determine whether:

(1) The activities on the site are those described in the worksite agreement;

(2) There is sufficient meaningful work to occupy all the youth assigned during the hours they are at the site;

(3) Attendance records are being maintained and accurately record time worked by each enrollee; and

(4) The requirements of the Act and this subpart are being met;

(1) Promptly review the reports written by its own and Federal monitors; and

(k) Close worksites where it finds severe or continual violations of the Act, the regulations or conditions of the contract or subgrant, and which are not likely to be remedied by quick remedial action.

§ 680.210 Worksites standards.

(a) No participants under 18 years of age shall be employed in any occupation which the Secretary has found, pursuant to the Fair Labor Standards Act, to be particularly hazardous for persons between 16 and 18 years of age (see Subpart E of Part 570 of Title 29)

(b) Participants who are 14 and 15 years of age shall participate only in accordance with the limitations imposed by §§ 576.31 and 576.33 of subpart C of Part 570 of Title 29.

(c) Each prime sponsor shall develop a written financial or non-financial agreement with each worksite employer or host of an outstationed worksite which assures

(1) adequate supervision of each participant;
RULES AND REGULATIONS

(ii) adequate accountability for participant time and attendance, and
(iii) adherence to the rules and regulations governing STEP.

(2) Such written agreements may be memoranda of understanding, simple work statements or other documents which indicate an estimate of the number of participants at the worksite and any operational conditions to which the worksite is expected to adhere.

(d) Each prime sponsor shall establish procedures for the monitoring and evaluation of each worksite to insure compliance with the worksite agreements and the terms and conditions of subgrants and contracts.

(e) No participant shall be required to work, or be compensated for work with CETA funds, for more than 40 hours per week. While the Department uses a 5-week, 20-hour a week job as the basis for estimating the number of youth to be served, it is not intended to take away the flexibility of the prime sponsor to establish job slots in keeping with the needs of the area and the youth to be served.

§ 680.211 Eligibility for participation.
Each person shall be:
(a) At the time of application, economically disadvantaged; and
(b) At the time of enrollment, 14 through 21 years of age inclusive (sec. 402(a)).

§ 680.212 Participants’ compensation, benefits, and working conditions.

(a) Prime sponsors shall provide participants benefits, wages, and allowances as provided in §§ 676.26 and 676.27 except: Unemployment insurance shall be an allowable cost only if required by State law.

(b) Participants enrolled in vocational exploration activities shall be compensated as described in § 676.26 except: participants receiving public assistance, or whose needs or income are taken into account in determining such public assistance payments to others, may receive a stipend in addition to their incentive allowance for participation in vocational exploration program activities; Provided, That the participant’s total allowances (the incentive allowance plus any stipend) do not exceed the basic allowances paid to other participants. This stipend is available to provide for the exception-
al expenses incurred by these participants which might otherwise prevent the individuals from participating in a VEP activity. The first $30 of such total allowance payment shall be disregarded in determining the amount of public assistance payments under Federal or federally assisted public assistance programs. In prescribing the total allowance payment for each participant, the prime sponsor shall insure that no individual shall receive an amount in allowances which would result in a net loss to the youth or the youth’s family in the amount of public assistance benefits.

§ 680.213 Reallocation procedures.
The reallocation provisions of § 676.47 apply to SYEP except that a reallocation may occur immediately after completion of the notice and comment procedure. Priority shall be given in reallocation of such funds to other areas within the same State.

§ 680.214 Modifications.
(a) The procedures specified in § 676.16 shall apply to the modifying of the SYEP subpart; however, the provisions concerning A-95 clearance shall not apply.
(b) The RA shall notify the prime sponsor of approval or disapproval within 10 days of receipt of the proposed modification.

§ 680.215 Reporting requirements.
Each prime sponsor shall submit the following reports to the RA:
(a) A Youth Program Status Summary, as of June 30 and September 30 (separate reporting of the vocational exploration program component shall be included in this report);
(b) A Youth Financial Status Report, as of June 30 and September 30 (separate reporting of the Vocational exploration program component shall be included in this report);
(c) Separate Quarterly Summary of Youth Characteristics reports as of September 30, based on the participant records for (1) this program and (2) any Part 677 summer youth program;
(d) Selected information required on the above reports shall be submitted for informational purposes for participants and expenditures in summer programs funded with monies in the Part 677 annual plan subparts as applicable.

(e) Selected information required on the above reports shall also be submitted for reporting purposes, for participants and expenditures in entitlement projects funded with funds provided under this subpart, as well as in the required entitlement reports; and

(f) The reports in this section shall be submitted to the RA no later than 30 days after the end of the report period.

§ 680.216 Termination date for the summer program.
Participants shall not be enrolled in program activities beyond September 30. However, in no event may a participant work full time after the beginning of his or her school year.

§ 680.217 Alternative remedies.
(a) The Secretary, for good cause, may order a subgrant or contract suspended or terminated in whole or in part effective on the date of the Secretary’s order or on such other date as the Secretary determines. In cases of termination, the Secretary may allow the subgrantee or contractor to expend further funds only for purposes of closing out the subgrant or contract, including the transfer of participants into another prime sponsor’s summer program in accordance with the Secretary’s directions. Whenever the Secretary orders a termination or suspension of a contractor or subrecipient under this paragraph, the Secretary may take whatever action is necessary including direct legal action against the contractor or subrecipient or issue an order to the prime sponsor that it take such legal action, to reclaim misspent funds or to otherwise protect the integrity of the funds or ensure the proper operation of the summer program.
(b) All subgrants and contracts under the summer program shall contain the provisions of paragraph (a) of this section.
(c) Where a subgrant or contract is suspended or terminated in whole or in part, the Secretary shall offer the contractor or subrecipient an opportunity for a hearing.

Signed at Washington, D.C. this 1st day of March 1979.

RAY MARSHALL,
Secretary of Labor.
