FEDERAL REGISTER Published daily, Monday through Friday, 
(not published on Saturdays, Sundays, or on official holidays), 
by the Office of the Federal Register, National Archives and 
Records Service, General Services Administration, Washington, 
D.C. 20408, under the Federal Register Act (49 Stat. 500, as 
amended; 44 U.S.C. Ch. 15) and the regulations of the 
Administrative Committee of the Federal Register (1 CFR Ch. I). 
Distribution is made only by the Superintendent of Documents, 

The Federal Register provides a uniform system for making 
available to the public regulations and legal notices issued by 
Federal agencies. These include Presidential proclamations and 
Executive Orders and Federal agency documents having general 
applicability and legal effect, documents required to be 
published by Act of Congress and other Federal agency 
documents of public interest. Documents are on file for public 
inspection in the Office of the Federal Register the day before 
they are published, unless earlier filing is requested by the 
issuing agency.

The Federal Register will be furnished by mail to subscribers, 
free of postage, for $300.00 per year, or $150.00 for six months, 
payable in advance. The charge for individual copies is $1.50 
for each issue, or $1.50 for each group of pages as actually 
bound. Remit check or money order, made payable to the 
Superintendent of Documents, U.S. Government Printing Office, 
Washington, D.C. 20402.

There are no restrictions on the republication of material 
appearing in the Federal Register.

Questions and requests for specific information may be directed 
to the telephone numbers listed under INFORMATION AND 
ASSISTANCE in the READER AIDS section of this issue.

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 890

Federal Employees Health Benefits Program; Benefits for Medically Underserved Areas

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is amending its regulations pertaining to benefits under the Federal Employees Health Benefits (FEHB) Program for individuals in medically underserved areas. These regulations are necessary to implement the FEHB law, as amended, which mandates special consideration for enrollees of certain FEHB plans who receive covered health service in States with critical shortages of primary care physicians.

EFFECTIVE DATE: January 1, 1982.

FOR FURTHER INFORMATION CONTACT: Lauretta Hall, Issuances and Instructions staff, (202) 632–4664.

SUPPLEMENTARY INFORMATION: On September 18, 1981, the Office of Personnel Management published in the Federal Register (46 FR 43332) an update to Subpart G under 5 CFR Part 890, as proposed regulations with a 60-day period for comments from interested parties before publication of final regulations. Subpart G pertains to administration of 5 U.S.C. 8902(m)(2), as added to the Federal Employees Health Benefits Law by Pub. L. 95–368, approved September 17, 1978, and amended by Pub. L. 96–179, approved January 2, 1980. The law provides that effective January 1, 1980, and continuing through December 31, 1984, FEHB plans (except comprehensive prepaid medical plans) whose contracts specify payment or reimbursement for care or treatment of a particular health condition, must also provide benefits up to the limits of their contracts in return for health services, when the health service is provided to a plan member "in a State where 25 percent or more of the population is located in primary medical care manpower shortage areas designated under section 332 of the Public Health Service Act." Interested persons were invited to submit written comments concerning the proposed regulations by November 17, 1981.

We received three written responses on the proposed regulations during the 60-day comment period. Two were favorable and the other suggested that because of the significant number of physician assistants serving as providers of care in rural communities, the current definition of "credentialed" be inserted in lieu of "licensed". While OPM recognizes the significant contribution physician assistants are making in health care, the suggestion cannot be adopted in view of the present statutory language in 5 U.S.C. 8902(m)(2). That section reads, in part, as follows: "* * * the carrier shall provide, pay, or reimburse up to the limits of its contract for any such health service properly provided by any person licensed under State law to provide such service * * *

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule for the purposes of E.O. 12291, Federal Regulation, because it will not result in:

1. An annual effect on the economy of $100 million or more;
2. A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or
3. Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.
CFR 210.20) by providing the advisory council with the options of (1) determining both the method and scope of gathering information required for the food preference survey and (2) using the format determined to be most appropriate for the collection of food preference survey information. While these provisions were effective upon publication, comments were solicited for a 90-day period after publication of this document to ensure public response.

This final action provides an analysis of the comments received and defines changes in the regulations, as based upon responses.

**EFFECTIVE DATE:** April 23, 1982.

**FOR FURTHER INFORMATION CONTACT:** Gwendy Kay Tidbits, Chief, Program Monitoring and Policy Development Branch, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, Alexandria, Virginia 22303, (703) 756-3660.

**SUPPLEMENTARY INFORMATION:** In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting and recordkeeping provisions that are contained in this interim rule have been approved by the Office of Management and Budget through September 30, 1983. OMB No. 0584-0278.

This final action has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512-1 and has been classified “nonmajor” because it meets none of the 3 criteria listed in the definition of “major rule” in the Executive Order; the action will not have an annual effect on the economy of $100 million or more, will not cause a major increase in costs, and will not have a significant impact on competition, employment, productivity, innovation or on the ability of U.S. enterprises to compete.

The action has also been reviewed with regard to the requirements of Pub. L. 96–354, the Regulatory Flexibility Act of 1980. Samuel J. Cornelius, Administrator, Food and Nutrition Service (FNS) has determined that this action will not have a significant economic impact on a substantial number of small entities. The primary purpose of this final rule is to decrease the paperwork burden associated with gathering and compiling the food preference survey information. This requirement impacts both on SFD Advisory Councils and school food authorities and will cause decreases in paperwork to the recipient agencies.

**Introduction**

Section 6 of Pub. L. 95–166, enacted November 10, 1977, amended section 14 of the National School Lunch Act, 42 U.S.C. 1755. This amendment required each State education agency (SEA) to establish an SFD Advisory Council to advise the SEA with respect to the needs of schools relating to the manner of selection and distribution of food assistance for the school lunch program.

Accordingly, Amendment 35, published on January 4, 1980, included a new § 210.20 of the National School Lunch Program regulations which required each SEA to establish the SFD Advisory Council and defined the responsibilities of the advisory council. The responsibilities, in regard to implementation of the food preference report survey are: The SFD Advisory Council shall obtain information on the most desired foods, least desired foods and recommendations for new products through a survey of all the school food authorities in the State. The advisory council’s findings and recommendations are submitted to the SEA which, in turn submits the council’s recommendations to FNSRO. FNS, through a state-by-state analysis of these recommendations, develops a national food preference report for the Department to use in the purchase of certain foods for distribution to schools.

Upon implementation of Amendment 35, FNS was informed that several provisions were found to be overly burdensome and needlessly complicated the information gathering process related to the food preference survey. To ensure validity of the food preference survey results, yet decrease the cost and paperwork burden. Amendment 43 was published and implemented on December 16, 1980 as an emergency final rule (45 FR 82888–82889). This rule amended § 210.20 by eliminating the requirement to survey all school food authorities and by giving the advisory council discretion in determining the scope and the method of the food preference survey as well as the survey format. As long as the required food preference survey information is collected and submitted in a timely manner, the SFD Advisory Council may determine the method and scope of the survey as seeming to be most appropriate in that State.

While these provisions were effective upon publication, a comment period was also placed in effect to ensure that FNS received public comments prior to making these provisions permanent components of the regulations.

**Analysis of Comments**

Interested persons and groups were given 90 days in which to submit written comments, suggestions or objections regarding the emergency final rule. A total of 3 comments were received, all concurring with the changes made in this rule. Two of the comments, both from State agencies responsible for school food distribution, made no additional suggestions. The third comment, received from an FNS Regional Office (FNSRO), supports the changes but believes additional guidance should be provided to the FNSRO for their use in reviewing the State’s implementation of these provisions.

**FNSRO Reviews**

The FNSRO comment expressed the need for additional guidance in monitoring the SFD Advisory Council food preference survey for validity of data and effectiveness. FNSRO’s monitoring function will encompass a review of the records maintained at SEA, thus ensuring the advisory council’s survey scope and method of implementation were in conformance with these regulations. Additional guidance will be provided to the FNSRO’s as a part of the management evaluation guidance.

**Other Issues**

This final rulemaking is not significantly different from the emergency rule issued on December 16. The single change made is aimed at clarifying the process by which the SFD Advisory Council’s findings and recommendations are submitted through appropriate FNS channels.

**List of Subjects in 7 CFR Part 210**

Food assistance programs, Children, Nutrition, National School Lunch Program, Grant programs-social programs, Reporting and recordkeeping requirements, Surplus agricultural commodities.

**PART 210—NATIONAL SCHOOL LUNCH PROGRAM**

Accordingly, § 210.20 of Part 210 of Title 7 CFR is amended by revising the last sentence of paragraph (a) as follows:

§ 210.20 State food distribution advisory councils.

(a) * * * * * The State agency shall inform FNSRO of the SFD Advisory Council’s recommendations no later than February 15 of each year after the school year beginning July 1, 1980. * * * * * (Catalog of Federal Domestic Assistance No. 10.555) (Sec. 6, Pub. L. 95–166 (42 U.S.C. 1771 note))
Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 356; Lemon Reg. 355, Amdt. 1]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of California-Arizona lemons that may be shipped to the fresh market during the period April 25-May 1, 1982, and increases the quantity of lemons that may be shipped during the period April 16-24, 1982. Such action is needed to provide for orderly marketing of fresh lemons for the periods specified due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: The regulation becomes effective April 25, 1982 and the amendment is effective for the period April 19-24, 1982.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512-1 and Executive Order 12201 and has been designated a "non-major" rule. This regulation and amendment are issued under the marketing agreement, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act. This action is consistent with the marketing policy for 1981-82. The marketing policy was recommended by the committee following discussion at a public meeting on July 7, 1981. The committee met again publicly on April 20, 1982, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified weeks. The committee reports the demand for lemons is very active.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieve restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective times.

List of Subjects in 7 CFR Part 910

Agricultural marketing service, Marketing agreements and orders, California, Arizona, lemons.

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. Section 910.656 is added as follows:

§ 910.656 Lemon Regulation 356.

The quantity of lemons grown in California and Arizona which may be handled during the period April 25, 1982, through May 1, 1982, is established at 285,000 cartons.

2. Section 910.655 Lemon Regulation 355 (47 FR 16315) is revised to read as follows:

§ 910.655 Lemon Regulation 355.

The quantity of lemons grown in California and Arizona which may be handled during the period April 18, 1982, through April 24, 1982, is established at 305,000 cartons.

(Secs. 1-10, 46 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: April 21, 1982.

D. S. Kurylowski,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart B—Section 502 Rural Housing Weatherization Loans

Exhibit A to Subpart B [Amended]

1. Item number 5 appearing in the third column of page 61990 is revised to read as follows:

Paragraph A2. is amended by changing the reference from "the moderate-income limit for the State, as set forth in Exhibit D of Subpart A of this part" to "the maximum moderate-income limit for the area as set forth in Exhibit C of Subpart A of Part 1944."
PART 1872—REAL ESTATE SECURITY

Subpart A—Servicing and Liquidation of Real Estate Security for Loans to Individuals and Certain Note-Only Cases

§ 1872.23 [Amended]
2. Item number 10 appearing in the third column of page 61989 is revised to read as follows:

§ 1872.23 is amended by changing the reference to “§ 1822.3(e)” to “§ 1944.2(d) of Subpart A of Part 1944.”

PART 1930—GENERAL

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

Exhibit B to Subpart C [Amended]
3. Item number 20 appearing in the second column of page 61990 is revised to read as follows:

Paragraph II Q is amended by changing the reference from “the maximum limit stated in Exhibit C of Subpart A of Part 1944” to “the maximum low-income limit for the area as set forth in Exhibits C of Subpart A of Part 1944.”

4. Item number 21, appearing in the second column of page 61990 is revised to read as follows:

Paragraph II R is amended by changing the reference from “the maximum moderate-income limit for the area as set forth in Exhibit C of Subpart A of Part 1944.”

PART 1944—HOUSING

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

§ 1944.4 [Corrected]
5. On page 61993, column one, in the first sentence of § 1944.4(b) the reference to “Subpart G of Part 1951 of this chapter” is corrected to read “Subpart A of Part 1955 of this chapter.”

Exhibit C [Corrected]
6. On page 63027, under “Maximum adjusted incomes for rural housing programs in Guam,” the low-income amount “13,500” is corrected to read “14,000,” and the moderate-income amount, “19,000,” is corrected to read “19,500.”

FR Doc. 81-38871 appearing on page 61986 in the issue of December 21, 1981, is corrected by adding reference changes numbers 7, 8, 9, 11, 12, 13 and 14 below and removing references changes indicated in number 10 below as follows:

Subpart E—Rental Housing Loan Policies, Procedures, and Authorizations

Exhibit C to Subpart E [Amended]
7. Paragraph II A is amended by changing the reference from “§ 1822.3(n) of Part 1822 Subpart A (paragraph III N of FmHA Instruction 444.1)” to “1944.2(c) of Subpart A of Part 1944.”

8. Paragraph II C is amended by changing the reference from “the limit established for the State as indicated in Exhibit C to Part 1822 Subpart A (FmHA Instruction 444.1)” to “the maximum low-income limit for the area as set forth in Exhibit C of Subpart A of Part 1944.”

9. Paragraph VI B is amended by changing the reference from “the limits established for the State as indicated in Exhibit C to Part 1822 Subpart A (FmHA Instruction 444.1)” to “the maximum low-income limit for the area as set forth in Exhibit C of Subpart A of Part 1944.”

PART 1951—SERVICING AND COLLECTIONS

Subpart A—Account Servicing Policies
10. Items numbers 38, 39, and 40 appearing in the first column of page 61991 are removed.

Subpart G—Borrower Supervision, Servicing and Collection of Single Family Housing Loan Accounts

§ 1951.312 [Amended]
11. § 1951.312(b) is amended by changing the reference from “Exhibit E of Subpart A of Part 1822 of this Chapter (FmHA Instruction 444.1)” to “§ 1944.34 of Subpart A of Part 1944.”

§ 1951.313 [Amended]
12. § 1951.313(e) [i][i] is amended by changing the reference from “§ 1822.3(n) of Subpart A of Part 1822 of this Chapter (FmHA Instruction 444.1)” to “§ 1944.2 of Subpart A of Part 1944.”

13. § 1951.313(b) [i][i] is amended by changing the reference from “§ 1822.11(c) of this Chapter (FmHA Instruction 444.1)” to “§ 1944.28(c) of Subpart A of Part 1944.”

14. § 1951.313(b) [i] is amended by changing the reference from “Exhibit E of Subpart A of Part 1822 of this Chapter (FmHA Instruction 444.1)” to “§ 1944.34 of Subpart A of Part 1944.”

BILLING CODE 3410-07-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 545

[No. 62-266]

Correspondent Activities of Federal Associations

Dated: April 15, 1982.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board is amending its regulations to authorize federally chartered savings and loan associations and mutual savings banks (both referred to as "federal associations") to provide correspondent services primarily to other depository institutions and to establish accounts at other thrift institutions. These amendments will grant federal associations greater flexibility in providing services to other depository institutions and will broaden the field of potential suppliers of correspondent services to savings and loan associations.

EFFECTIVE DATE: May 21, 1982.

SUPPLEMENTARY INFORMATION: On November 25, 1981, the Board proposed to amend its regulations to facilitate correspondent activities of federal associations (Resolution No. 81-722; 46 FR 59253, December 4, 1981). The Board received thirty responses to its request for comments: twenty-one from federal associations, five from state-chartered savings and loan associations insured by the Federal Savings and Loan Insurance Corporation (“FSLIC”), three from thrift industry trade associations, and one from a provider of data processing services. The details of the proposal, the comments received, and the Board’s final action are explained below.

Provision of Correspondent Services

The Board’s regulations do not specifically address the general authority of federal associations to provide correspondent services to other...
institutions. Furthermore, those regulations that deal with activities traditionally considered a part of correspondent banking do not implement a uniform policy. For example, one traditional correspondent service, participation lending, is expressly authorized in certain circumstances (see 12 CFR 545.6), but another regulation prohibits the provision of data processing services on a for-profit basis (12 CFR 545.16-1).

In its November 1981 proposal, the Board cited the benefits that can result from the provision of correspondent services by federal associations. The Board proposed to eliminate existing regulatory obstacles and to affirmatively authorize federal associations to offer correspondent services. Comments received in response to the proposal were overwhelmingly favorable.

The Board is adopting new 12 CFR 545.30(a), as proposed, which will expressly authorize federal associations to "provide correspondent services primarily to other depository institutions to the extent such activity is consistent with the purposes set forth in the (Home Owners' Loan) Act and does not violate other (Board) regulations * * * or any other provisions of law." Some commenters raised questions regarding the scope of this regulatory authorization. Generally, this provision permits a federal association to provide to other services that it would be authorized to generate in-house for itself in the course of its regular business. The Supreme Court has summarized correspondent banking as follows:

Among the services typically provided within a conventional correspondent arrangement are check clearing, help with bill collection, data processing offices, large loans, legal advice, help in building securities portfolios, counseling as to personnel policies, staff training, help in site selection, auditing, and the provision of electronic data processing. United States v. Citizens & Southern National Bank, 422 U.S. 66, 115 (1975).

No exclusive list of correspondent services for financial institutions can be created, because the activities and needs of financial institutions are constantly changing in response to the demands of the public they serve. By explicitly authorizing correspondent activities, the Board hopes to promote economies of scale within the thrift industry.

The concept of correspondent banking activities does not include dealings with the general public; rather, in its broadest sense it encompasses only relationships between institutions that engage in the business of financial intermediation. Section 545.30(a) restricts the scope of a federal association's correspondent services primarily to serving other depository institutions. As used in this context, the term "depository institutions" means: savings and loan associations, mutual savings banks, commercial banks, credit unions, and other institutions with deposit-taking and lending functions. Correspondent authority is focused on this group of entities because their day-to-day business is more similar to that of federal associations than are the operations of other financial intermediaries such as insurance companies and money market mutual funds. However, the Board also recognizes that it may be mutually beneficial for federal associations to provide correspondent services to financial intermediaries other than depository institutions. This is especially true now that the differences between services offered by depository institutions and other financial intermediaries are rapidly disappearing, and cooperative relationships between these types of institutions are becoming increasingly common. Accordingly, by requiring federal associations to restrict the provision of correspondent services "primarily" to depository institutions, the Board is implicitly permitting the provision of services to other financial intermediaries as long as such business does not constitute more than fifty percent of an association's correspondent services business.

The authority to engage in correspondent activities, like all implied powers of federal associations, is limited by the purposes set forth in the Home Owners' Loan Act of 1933 (12 U.S.C. 1461 et seq.). Thus, federal associations may not avoid express restrictions set forth in the 1933 Act, such as limitations on investment authority, on the basis that the activity in question is integral to a correspondent relationship. The provision of correspondent services is also limited by other regulations of the Board, and other provisions of state and federal law. Examples of such legal restrictions are found at 12 CFR 545.8-4 (loan servicing) and 12 U.S.C. 378 (dealing in securities).

In addition to providing explicit general authorization for correspondent services, the Board is also eliminating an existing regulatory obstacle relating to data processing services. The Board's regulations at 12 CFR 545.16-1 currently authorize federal associations to establish data processing offices, either as solely-owned facilities or as cooperative ventures with other financial institutions; but § 545.10-1 prohibits the provision of data processing services through such an office on a for-profit basis. In its proposed rule, the Board noted that this section effectively prevents federal associations from providing correspondent services, such as check collection and processing, that involve data processing. The Board proposed to revise § 545.16-1 to permit the establishment of data processing offices as profit-making ventures, provided that (1) data processing services may be provided only to other financial institutions, (2) a partner or joint venture in the establishment or maintenance of the office must be a financial institution, and (3) such a partner or joint venture that controls the office and is not a federally regulated financial institution must agree to examination of the office by the Board.

The final amendment adopted by the Board permits federal associations to provide data processing on a for-profit basis if it is a correspondent service authorized by new § 545.30(a). Thus, federal associations will be permitted to offer check processing, electronic funds transfer services, account maintenance, and other services that involve data processing. However, revised § 545.16-1 does not authorize the provision of data processing on a for-profit basis to the general public.

Upon the suggestion of commenters, the Board has not adopted its proposed requirement that a federal association's partner or joint venturer in operating a data processing office must be a financial institution. As long as the provision of data processing is limited to correspondent services, there is no apparent reason to prevent a federal association from combining its expertise with that of a data processing company; the comments pointed out that such a combination could result in better service to the financial institutions industry. The Board's supervisory interests will be adequately protected by its ability to examine such a data processing office.

Correspondent Accounts

In its November proposal, the Board recognized that the correspondent account traditionally has been the cornerstone of correspondent banking relationships. Many correspondent services cannot be performed unless the...
user institution maintains an account with the provider institution for settlement purposes. In addition, a compensating balance is a form of payment for services that may in some cases be preferable to fee compensation.

In the interest of facilitating correspondent relationships, the Board proposed to eliminate the prohibition in § 545.9-2 of its regulations (12 CFR 545.9-2) against investment by federal associations in the accounts of thrift institutions. The Board noted that this section is based on the limited investment authority of federal associations, as set forth in section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1494(c)). Since promulgation of that regulation, Congress has enacted section 409 of the National Housing Act (12 U.S.C. 1730b), which provides that, notwithstanding any provision of law but subject to any regulatory authority otherwise applicable, the accounts of institutions insured by the FDIC shall be lawful investments "for the funds of all corporations organized under the laws of the United States," including federal associations. Accordingly, the Board requested comments regarding (1) whether the prohibition in § 545.9-2 should be modified to permit federal associations to maintain non-interest-bearing correspondent accounts at thrift institutions, and (2) whether the prohibition should be further lifted to permit investment in any account at an FDIC-insured institution.

In light of the strongly favorable comments received, the Board has decided to adopt both aspects of its proposal. This will permit, first, the investment by a federal association in any account at an FDIC or FSLIC-insured institution, to the extent such account is insured. Secondly, a federal association will be permitted to maintain a non-interest-bearing account at any depository institution whose accounts are insured by the FSLIC or FDIC. Thirdly, a federal association will be able to maintain a non-interest-bearing correspondent account at an institution whose accounts are insured pursuant to a state deposit insurance program if such account is necessary or incidental to a correspondent relationship.

The Board also proposed to authorize federal associations to receive non-interest-bearing correspondent deposits from correspondent institutions. Such deposits could, at the option of the association, be payable on demand and subject to withdrawal by check, as such features may be necessary to the usefulness of such deposits as a correspondent account. For example, the correspondent service being provided may include, as an integral part, the drawing of drafts by a user institution against its account at a provider federal association. Furthermore, notice-of-withdrawal requirements, which were fashioned to distinguish savings accounts held for thrift purposes from transaction accounts, served no meaningful purpose in the context of correspondent accounts used for settlement of collected items or similar purposes. In light of the overwhelmingly supportive comments received, the Board is adopting new § 545.30(b) as proposed.

It should be noted that the correspondent accounts authorized by new § 545.30(b) are "insured accounts" for purposes of the Board's regulations relating to FSLIC insurance. If, at the option of the association, a correspondent account is subject to withdrawal by check, it would be an insured "checking account" described in 12 CFR 561.11(a); otherwise, it would be an insured withdrawalable deposit within the scope of 12 CFR 561.11.

Regulatory Flexibility Act Certification

Pursuant to section 3 of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Board certifies that this final rule will not have a significant economic impact on a substantial number of small entities. By broadening the field of potential suppliers of correspondent services to small institutions, however, the amendments are expected to benefit such institutions. This final rule does not impose any new restrictions that might have an adverse economic impact on small institutions.

List of Subjects in 12 CFR Part 545

Savings and loan associations. Accordingly, the Board hereby amends Part 545, Subchapter C, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

PART 545—OPERATIONS

1. Revise § 545.9-2 to read as follows:

§ 545.9-2 Investment in insured accounts.

A Federal association may invest in an interest-bearing account at a savings and loan association, building and loan association, homestead association, cooperative bank, or savings bank if, and to the extent that, such account is insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation. A Federal association may maintain a non-interest-bearing account at any institution whose accounts are insured by the Federal Savings and Loan Insurance Corporation or the Federal Deposit Insurance Corporation; and a Federal association may maintain such an account at an institution whose accounts are insured pursuant to a state deposit insurance program if such account is necessary or incidental to a correspondent relationship.

2. Remove paragraph (c) of § 545.16.1, and revise paragraph (b) to read as follows:

§ 545.16-1 Data processing services.

(b) Data processing office. (1) An association may establish or maintain a data processing office with functions limited to providing data processing services for its own use and/or primarily for other depository institutions without observing the application and approval procedures for branch offices set forth in this part. Data processing services may be provided to others on a for-profit basis only if they are authorized by § 545.30(a) of this part.

(2) An association may participate with others in establishing or maintaining a data processing office: Provided, That the association may participate in establishing or maintaining a data processing office controlled by an entity not subject to examination by a Federal agency regulating financial institutions only if such entity has agreed in writing with the Board that it will permit and pay for such examination of the office as the Board deems necessary, and that it will make available for such purposes any records in its possession relating to the operation of the office.

3. Add a new heading and new § 545.30, to read as follows:
Correspondent Activities

§ 545.30 Correspondent services and accounts.

(a) General. A Federal association may provide correspondent services primarily to other depository institutions to the extent such activity is consistent with the purposes set forth in the Act and does not violate other regulations in this Chapter or any other provisions of law.

(b) Correspondent accounts. An association may receive non-interest-bearing deposits from correspondent institutions for use as compensating balances, for settlement purposes, or for other purposes incidental to a correspondent relationship. Such deposits may be payable on demand and subject to withdrawal by negotiable or transferable instrument, order, or authorization. Such deposits shall not give rise to voting rights or other rights of membership in a Federal mutual association.

By the Federal Home Loan Bank Board.

J. J. Finn,
Secretary.

ACTION: Final rule.

SUMMARY: The Board is amending its regulations pertaining to employment contracts so that federal and state-chartered insured institutions will be subject to the same rules governing employment contracts entered into by institutions and their officers. As a result of these amendments, the board of directors of institutions will retain greater flexibility to terminate employment contracts and the Board and the Federal Savings and Loan Insurance Corporation ("FSLIC") will have greater flexibility to reject abusive or excessive long-term employment and fringe benefit contracts executed by institutions that subsequently go into default, enter into an assistance agreement with the FSLIC, or are the subject of a supervisory merger.

EFFECTIVE DATE: April 15, 1982.

FOR FURTHER INFORMATION CONTACT: Peter M. Barnett (202-377-6445), Associate General Counsel, or Cynthia Farmer (202-377-7021), Legal Assistant, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: On January 16, 1981, the Federal Home Loan Bank Board adopted amendments to its regulation (12 CFR § 545.25-1) relating to the permissible length of employment contracts made between federal associations and their officers. FHlBB Resolution No. 81-18 (January 16, 1981); 46 FR 9017 (January 30, 1981). These amendments removed limitations on the length of employment contracts that could be offered to the officers of a federal association, leaving the terms and conditions of employment contracts to the discretion of an institution's management. To protect against potential abuses, the Board required inclusion in such contracts of clauses providing for termination if the association removes the officer for cause; the association is in default; the FSLIC enters into a financial assistance agreement with the association; the association is subject to § 563.39 of the Insurance Regulations, which prohibits institutions from entering into employment contracts with officers or employees if the contract would constitute an unsafe or unsound practice. Section 563.39 specifies that an employment contract may be deemed an unsafe or unsound practice when it either may lead to material financial loss or damage or could interfere materially with the exercise by directors of their duty or discretion with respect to employment or termination of officers. To deter other possible abuses, the Board revised its policy statement on mergers (12 CFR § 571.5) to indicate that longer-term employment contracts may raise questions as to sale of control of the disappearing association and will be scrutinized carefully. The Board also amended the merger approval delegation to the Principal Supervisory Agent in §§ 546.2(h) of the Federal Regulations and 563.22(e) of the Insurance Regulations to require that any merger involving an employment contract with a term greater than five years must be submitted to the Board.

More recently, it has come to the Board's attention that some institutions in financial difficulty have executed long-term employment contracts and fringe benefit contracts for their officers. These contracts have limited the flexibility of the institution's board of directors, the Board and the FSLIC in resolving the difficulties being experienced by the institution. Such contracts could be terminated pursuant to § 545.25-1 if entered into by a federal association; however, no similarly explicit authority exists for contracts entered into by state-chartered insured institutions. The Board has determined that safe and sound financial policies and management require that the employment contracts of all insured institutions be subject to termination in the instances currently set forth in § 545.25-1. These provisions define certain safe and sound practices with regard to employment contracts. Therefore, in order to remedy abusive practices and in order to provide the same treatment for both federal associations and other insured institutions, the Board is incorporating the mandatory employment contract provisions set forth in § 545.25-1 and § 563.39.

The Board also is continuing to study alternative approaches for addressing problems being encountered with employment contracts entered into by insured institutions, and anticipates proposing further amendments to its regulations in the near future.

Because immediate implementation serves the public interest by facilitating the supervisory activities of the Board and the FSLIC, the Board finds that public notice and procedure under 5 U.S.C. 553(b) and 12 CFR 508.11 and a 30-day delay of effective date under 5 U.S.C. 553(d) and 12 CFR 508.14 are unnecessary.

List of Subjects in 12 CFR Parts 545, 563, and 571

Savings and loan associations. According to the Board hereby amends Part 545 of Subchapter C and Parts 563 and 571 of Subchapter D, Chapter V, Title 12, Code of Federal Regulations, as set forth below.

PART 545—OPERATIONS

1. Revise § 545.25-1 to read as follows:

§ 545.25-1 Employment contracts.

(a) General. A Federal association with bylaws amended under § 544.6(k) or a Charter S association, upon specific
approval of its board of directors, may enter into employment contracts with its officers and other employees in accordance with § 563.39 of this Chapter.

(b) Contracts with other entities or persons. An officer of an association shall have no other written or oral agreement concerning employment as an officer of the association with any entity or person other than the association.

PART 563—OPERATIONS

2. Revise § 563.39 to read as follows:

§ 563.39 Employment contracts.

(a) General. An insured institution may enter into an employment contract with its officers and other employees only in accordance with the requirements of this section. All employment contracts shall be in writing and shall be approved specifically by an institution's board of directors. An institution shall not enter into an employment contract with any of its officers or other employees if such contract would constitute an unsafe or unsound practice. The making of such an employment contract would be an unsafe or unsound practice if such contract could lead to material financial loss or damage to the institution or could interfere materially with the exercise by the members of its board of directors of their duty or discretion provided by law, charter, bylaw or regulation as to the employment or termination of employment of an officer or employee of the institution. This may occur, depending upon the circumstances of the case, where an employment contract provides for an excessive term.

(b) Required provisions. Each employment contract shall provide that:

(1) The institution's board of directors may terminate the officer or employee's employment at any time, but any termination by the institution's board of directors other than termination for cause, shall not prejudice the officer or employee's right to compensation or other benefits under the contract. The officer or employee shall have no right to receive compensation or other benefits for any period after termination for cause. Termination for cause shall include termination because of the officer or employee's personal dishonesty, incompetence, willful misconduct, breach of fiduciary duty involving personal profit, intentional failure to perform stated duties, willful violation of any law, rule, or regulation (other than traffic violations or similar offenses) or final cease-and-desist order, or material breach of any provision of the contract.

(2) If the officer or employee is suspended and/or temporarily prohibited from participating in the conduct of the institution's affairs by a notice served under section 5(d)(4)(C) or section 5(d)(5)(A) of the Home Owners’ Loan Act (12 U.S.C. 1464(d)(4)(C) and (d)(5)(A)) or under section 407(g)(3) or section 407(h) of the National Housing Act (12 U.S.C. 1730(g)(3) and (h)), the institution's obligations under the contract shall be suspended as of the date of service, unless stayed by appropriate proceedings. If the charges in the notice are dismissed, the institution may in its discretion (i) pay the officer or employee all or part of the compensation withheld while its contract obligations were suspended and (ii) reinstate (in whole or in part) any of its obligations which were suspended.

(3) If the officer or employee is removed and/or permanently prohibited from participating in the conduct of the institution's affairs by an order issued under section 5(d)(4)(D) or section 5(d)(5)(A) of the Home Owners’ Loan Act (12 U.S.C. 1464(d)(4)(D) and (d)(5)(A)) or under section 407(g)(3) or section 407(h) of the National Housing Act (12 U.S.C. 1730(g)(3) and (h)), all obligations of the institution under the contract shall terminate as of the effective date of the order, but vested rights of the contracting parties shall not be affected.

(4) If the institution is in default (as defined in section 401(d) of the National Housing Act), all obligations under the contract shall terminate as of the date of default, but this paragraph shall not affect any vested rights of the contracting parties.

(5) All obligations under the contract shall be terminated, except to the extent determined that continuation of the contract is necessary for the continued operation of the institution, (i) by the Corporation, at the time the Corporation enters into an agreement to provide assistance to or on behalf of the association under the authority contained in section 406(f) of the National Housing Act or (ii) by the Federal Home Loan Bank Board, at the time the Board or its principal Supervisory Agent (as defined in § 561.35 of this Subchapter) approves a supervisory merger to resolve problems related to operation of the association or when the association is determined by the Board to be in an unsafe or unsound condition. Any rights of the parties that have already vested, however, shall not be affected by such action.

PART 571—STATEMENTS OF POLICY

3. Amend § 571.5(e)(4) to read as follows:

§ 571.5 Mergers.

(e) Factors relating to fairness and disclosure of the plan.

(4) Employment contracts. Any employment contracts should conform with § 563.39 of this Subchapter.

(3) If an insured institution is in default (as defined in section 401(d) of the National Housing Act), all obligations under the contract shall terminate as of the date of default, but this paragraph shall not affect any vested rights of the contracting parties.

(4) If the institution is in default (as defined in section 401(d) of the National Housing Act), all obligations under the contract shall terminate as of the date of default, but this paragraph shall not affect any vested rights of the contracting parties.

(5) All obligations under the contract shall be terminated, except to the extent determined that continuation of the contract is necessary for the continued operation of the institution, (i) by the Corporation, at the time the Corporation enters into an agreement to provide assistance to or on behalf of the association under the authority contained in section 406(f) of the National Housing Act or (ii) by the Federal Home Loan Bank Board, at the time the Board or its principal Supervisory Agent (as defined in § 561.35 of this Subchapter) approves a supervisory merger to resolve problems related to operation of the association or when the association is determined by the Board to be in an unsafe or unsound condition. Any rights of the parties that have already vested, however, shall not be affected by such action.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. C-1794]

Hercules Inc., et al: Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens the proceeding and modifies the Commission's order issued on September 23, 1970, 77 FTC 1242, 35 FR 16396, by deleting Paragraphs IV and VIII from the order, so as to allow the company to acquire domestic rope producers without prior Commission approval and to relieve respondent of the obligation of notifying the Commission of any change in the corporate organization.

The Order Reopening Proceeding and Modifying Order is as follows:
By petition filed December 1, 1981, respondent Columbian Rope Company ("Columbian") requests, pursuant to Section 5 (b) of the Federal Trade Commission Act (15 U.S.C. Sec. 45(b)), that Paragraphs IV and VIII of the Commission’s Order issued in this matter on September 23, 1970, be modified so that Columbian no longer requires the Commission’s prior approval to acquire, directly or indirectly, the whole or any part of the stock share capital or assets of any company involved in the manufacture and sale of rope in the United States. Columbian also sought to delete the only paragraph requiring notice of changes in corporate structure.

Pursuant to § 2.51 of the Commission’s rules of practice and procedure, the petition was placed on the public record for thirty days. No comments were received.

Upon consideration of the petition and its supporting materials the Commission finds that elimination of Paragraphs IV and VIII is in the public interest.

Accordingly, it is ordered that, the proceeding be and it hereby is, reopened for the purpose of modifying the Order entered therein:

It is further ordered that, the Paragraph IV and Paragraph VIII shall terminate upon service of this order.

By direction of the Commission.

Carol M. Thomas,
Secretary.

Food and Drug Administration

21 CFR Part 448

[Docket No. 78-0341]

Peptide Antibiotic Drugs: Polymyxin B Sulfate-Acetic Acid-Propylene Glycol Otic Solution; Polymyxin B Sulfate-Lidocaine Hydrochloride-Propylene Glycol Otic Solution; Final Order on Objections and Requests for a Hearing Revoking Provisions for Certification or Release

AGENCY: Food and Drug Administration.

ACTION: Final rule; notice of effective date.

SUMMARY: The Commissioner of Food and Drugs denies a request for hearing, terminates the postponement of the effective date for the withdrawal of certification of Aerosporin Otic Solution, and revokes the provisions for release of Lidosporin Otic Solution. These two products are fixed-combination antibiotic preparations offered to treat various types of ear infections.

**EFFECTIVE DATE:** April 23, 1982.

**FOR FURTHER INFORMATION CONTACT:**

Douglas L. Ellsworth, Bureau of Drugs (HFD-32), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

**SUPPLEMENTARY INFORMATION:**

In several Federal Register notices, cited in the paragraphs below, the Food and Drug Administration (FDA) announced its evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group (NAS-NRC) on various fixed-combination otic products containing antibiotics. These products are antibiotic drugs subject to section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357). A certification regulation exists for Aerosporin Otic Solution, while Lidosporin Otic Solution has been released on a batch by batch basis, without a certification regulation, pending a final determination on its effectiveness.

In a notice (DESI 8426) published on October 23, 1971 (36 FR 20546), Aerosporin Otic Solution (NDA 60-756, held by Burroughs Wellcome & Co., Inc., 3020 Cornwallis Rd., Research Triangle Park, NC 27709) was classified as possibly effective for "the prevention of exacerbations or treatment" of various types of ear infections. Aerosporin is certified under 21 CFR 448.430.

In a separate notice (DESI 50171) published on August 19, 1971 (36 FR 16129), Lidosporin Otic Solution (NDA 50-171, held by Burroughs Wellcome & Co., Inc.) was also classified as possibly effective for "the prevention of exacerbations and for the treatment of infection, pain, and itching associated with otitis and furunculosis."

These notices allowed Burroughs Wellcome six months to submit data providing substantial evidence of effectiveness of Aerosporin and Lidosporin for their possibly effective indications.

On December 14, 1972, a notice was published (37 FR 26023) temporarily exempting combination otic solutions and suspensions containing one or more anti-infective agents from the timetable established for implementing the Drug Efficacy Study. The purpose of this exemption was to allow manufacturers to complete adequate and well-controlled investigations to determine whether their products were effective for the uses for which they were labeled.

However, in support of Aerosporin and Lidosporin, Burroughs Wellcome submitted only testimonial letters. Accordingly, in a notice published on January 30, 1979 (44 FR 5942), the temporary exemption for these otic combinations was revoked. In a concurrently published notice (44 FR 5869), the Director of the Bureau of Drugs reclassified these drugs as lacking substantial evidence of effectiveness, revoked the provisions for certification and release, and offered an opportunity for a hearing.

On February 28, 1979, Burroughs Wellcome filed a hearing request for Aerosporin and Lidosporin. In a notice published on March 16, 1979 (44 FR 16006), the Director postponed the effective date of the January 30, 1979 revocation of certification and release for the two drugs, pending review of the data submitted in support of the hearing request. That review is now completed.

The Commissioner of Food and Drugs has considered the arguments and data submitted and concludes that they are insubstantial and present no genuine issue of material fact requiring a hearing. The arguments and data are discussed below.

I. The Drugs

A. Aerosporin Otic Solution contains, in each milliliter, 10,000 units of polymyxin B sulfate and 1 percent w/v glacial acetic acid in a purified water propylene glycol solution.

B. Lidosporin Otic Solution contains, in each milliliter, 10,000 units of polymyxin B sulfate and 5 milligrams of lidocaine hydrochloride in a purified water propylene glycol solution.

II. Recommended Uses and Dosage

A. Current labeling offers Aerosporin Otic Solution for the prevention of exacerbations and for the treatment of acute and chronic otitis externa, including "swimmer’s ear": for the treatment of otitis media (if the tympanic membrane is perforated) and postoperative aural cavities; and otomycosis. The package insert states that:

Polymyxin B attacks gram-negative bacilli

Propylene glycol, in the concentration present in the product, is a potent antibacterial agent; this widens the antimicrobial spectrum, including gram positive organisms.

The recommended dosage for the product is, for adults, 3 or 4 drops instilled in the infected ear 3 or 4 times daily; for children, 2 or 3 drops.
B. Current labeling recommends Lidosporin Otic Solution for the prevention of exacerbations and for the treatment of infection, pain, and itching associated with otitis and furunculosis. The labeling contains the same claims for the polymyxin and propylene glycol ingredients as Aerospotin. Lidosporin's labeling also states that lidocaine hydrochloride "acts quickly to relieve the pain and itching so often associated with otitis externa."

The recommended dosage for the product is, for adults 3 or 4 drops instilled in the infected ear 3 or 4 times daily; for children, 2 or 3 drops.

III. Data Submitted to Support Claims of Effectiveness

Aerospotin and Lidosporin are fixed-combination antibiotic drugs. Accordingly, material submitted in support of a hearing request for these products includes the results of adequate and well-controlled clinical studies which demonstrate not only that the products as a whole are effective for their claimed uses, but also that each of the drugs' components contributes to the effects claimed for the products for a significant patient population requiring such concurrent therapy. 21 U.S.C. 355(d); 21 CFR 314.111(a)(5); 21 CFR 430.20(b)(6); 21 CFR 300.50.

In support of its hearing request Burroughs Wellcome submitted two reports (the Senturia study and the Farrar study) which it contends constitute controlled studies demonstrating the clinical effectiveness of polymyxin, as used in Aerospotin and Lidosporin. Burroughs Wellcome also submitted an excerpt from the National Academy of Sciences (NAS) report on topical anesthetics, excerpts from medical textbooks, and statements by medical experts in support of both Aerospotin and Lidosporin.

1. Articles Published in Medical Journals

   This paper describes a clinical study performed with patients known in each of six groups. The treatments of a total of 339 infected ears were compared. On the initial visit, the incidence of symptoms was recorded. On each return visit, the presence or absence of symptoms and other findings were recorded on a follow-up form. Initial recorded data included age, sex, occupation, number of previous ear infections, dates of swimming, presence of excess wax, itching, and fullness of the ear canal. Otologists examined all patients and those ready for discharge and supervised the taking of cultures, irrigation of ear canals, and the dispensing of medications. The degree of severity of particular symptoms or findings was indicated by a score ranging from a minimum of one to a maximum of ten. The otologists supervised the examinations and severity ratings. At the conclusion of the initial visit, the over-all picture of the disease was evaluated as mild, moderate, or severe. The evaluations were not necessarily made by the same otologist; nor were any definitions provided for the numerical evaluation system, or for the terms "mild," "moderate," or "severe."

   On the patient's initial visit, at three day intervals thereafter, and on the day of discharge, cultures were taken from both external auditory canals. The criteria for discharge of a patient were absence of pain, no edema of the external canal, and slight erythema. However, a negative bacteriologic culture was not considered necessary for discharge, because some patients continued to have gram-negative bacilli in their external auditory canals after all symptoms and physical findings had disappeared.

   Following entry into the study, the patients were divided into six treatment groups. Twenty of the groups were treated with five different antimicrobial ear drops; the fifth group was treated with two types of control ear drops. Preparation of one of the antimicrobial agents was polymyxin B sulfate dissolved in an isotonic saline to form a 0.1 percent solution (10,000 units/mL). Another test agent consisted of oxycycline HCL and polymyxin B sulfate, 10,000 units, obviously not pertinent to the effectiveness of polymyxin alone or as formulated in Aerospotin or Lidosporin. None of the other test agents contained polymyxin as an ingredient. The two controls were normal (0.4%) saline drops and fatty acids in a lanolin solution.

   The only relevant comparison of polymyxin B sulfate and the control groups. The polymyxin group was reported as having less pain and tenderness, less likelihood of needing a change in medications, a greater clinical cure rate at the end of therapy, and a greater bacteriological cure rate at the end of therapy than the control groups. These results were not analyzed statistically.

   The study, even if it provided support for otic use of polymyxin B sulfate, does not contribute to a finding that Aerospotin and Lidosporin fulfill the requirements for fixed combination drugs, as set forth in 21 CFR 430.20(b)(6) and 21 CFR 300.50. The polymyxin product under study had a different formulation than either Aerospotin or Lidosporin. 21 CFR 314.111(a)(5)(ii)(b).

   One of the test drugs contained only 10,000 units per mL of polymyxin B, whereas the products at issue contain, in addition to 10,000 units per mL of polymyxin B, other agents, including propylene glycol, and in the case of Aerospotin, 1 percent acetic acid.

   Conclusions based on the saline solution are not necessary to applicable to the formulations in question. The report does not discuss the contribution of the acetic acid and the propylene glycol found in Aerospotin; nor does it address the contributions of the lidocaine hydrochloride and propylene glycol in Lidosporin. Thus, the study does not provide evidence of the contributions of the ingredients comprising Aerospotin and Lidosporin.

   Moreover, this study was not adequate and well-controlled for a number of reasons. First, neither the observers nor analysts of the data were blinded to treatment. Blinding is a common means of minimizing possible bias in the reporting or observation of results, as is called for by 21 CFR 314.111(a)(5)(ii)(b), and is particularly important where critical measurements are subjective, as in this study (e.g., the need to avoid therapy, severity scores, and presence of a cure).

   Although the hearing request describes patient assignment as "random," assignment of patients to treatment or control groups does not in fact appear to have been random. Instead, the investigators seem to have had control over whether a particular patient received the assigned drug. This is apparent from the authors' observations that extremely severe cases were segregated for a different treatment and that cases in the control group tended to be milder, perhaps because the more severe cases were rejected for this treatment. The regulations require a method of assignment to treatment groups that minimizes bias. 21 CFR 314.111(a)(5)(ii)(c)(2)(ii). Also, the numbers of patients receiving each treatment are quite different, ranging from 32 to 95, suggesting non-random assignment of patients to the treatment groups. Furthermore, random assignment would have helped to assure group comparability with respect to known pertinent variables, as required by 21 CFR 314.111(a)(5)(ii)(c)(2)(ii). The authors attempted to compare the
treatment groups with respect to some pertinent variables, and for several variables, the polymyxin group seemed less seriously ill than the control group, including a lesser likelihood of excessive wax in the ear, less pain, and less likelihood of culturing Pseudomonas.

Some aspects of the observation and recording of results are unclear. 21 CFR 314.111(a)(5)(ii)(e)(5). An important endpoint, for example, was the need to switch therapy, yet there is no explanation of the precise criteria used to make such a change. It is stated that patients "not uncommonly" did not return after making favorable progress and that such patients were considered cured as of their last clinic visit. It is not clear, however, whether these patients actually met the criteria for cure at that visit or were simply "considered" cured, nor is it obvious that cure was the only reason for not returning.

Finally, no statistical analysis was performed by the investigators or the sponsor. 21 CFR 314.111(a)(5)(ii)(e)(6). The authors recognize some limitations in their ability to analyze data because of incomplete follow-up.

This one page paper describes the treatment of ear infections (otitis externa and infected radical mastoidectomy cavities) with the antibiotic polymyxin B. The cases chosen were those in which the infecting organisms were found to be one of three types of gram-negative bacteria: pseudomonas pyocyanea, proteus vulgaris, or bacterium coli. The study involved sixty ears, twenty of each type of bacterial infection. The infections were treated with a solution of 10% polymyxin B sulfate in propylene glycol with acetic acid. The solution was administered to the infected ear by each patient who was instructed to fill the infected ear with the solution morning and evening. Cultures were taken from the infected ear before treatment was begun and seven days after treatment. In eight cases the infections were bilateral and the infecting organisms were the same on both sides. In these cases the polymyxin solution was instilled in one ear and a control solution, consisting of "solvent, only" (exactly what was meant is not clear) was instilled in the other ear.

This study is deficient for several reasons. There are two possible "control" groups, both defective. The investigators utilized the small number of patients (8) with bilateral infections to carry out a small controlled trial, comparing results in one ear with the other. They did not randomize assignment of treatment, 21 CFR 314.111(a)(5)(ii)(a)(2)(ii), an important step if the severity of infection was different in the two ears. More important, however, they do not state the results in the eight patients with bilateral infections, so that although we know none of the control ears responded, we do not know whether treated ears did any better. There is thus no comparison of the results of treatment with a control. 21 CFR 314.111(a)(5)(ii)(a)(4).

The sponsor suggests that patients with Proteus infections, who did not respond well to treatment, and whose organisms were known to be insensitive to polymyxin B, can be considered a control group and can be compared with patients with Pseudomonas or E coli infections. Unfortunately, such a group is not an appropriate comparison, as there is no assurance they are comparable to the Pseudomonas and E coli groups in the natural history of their infection. Thus the poorer response could simply reflect the different organism and the kind of infection it causes. We also do not know the characteristics of the groups (duration of infection, response to other therapy, history of recurrence, etc.) to assess their comparability. 21 CFR 314.111(a)(5)(ii)(a)(2)(iii).

The study does not indicate whether the amounts of propylene glycol and acetic acid in the test solution were identical to the dosages of those ingredients in Aerosporin, and it does not in any event compare the effectiveness of these Ingredients with Aerosporin, and it does not in any event compare the effectiveness of these Ingredients with the composition product. Moreover, it is not clear whether the control solution given to the eight bilateral ear infection cases contained propylene glycol and acetic acid, propylene glycol alone or acetic acid alone, or some other ingredients. Therefore, the study does not contribute to a determination that Aerosporin is effective or that each of the components of Aerosporin contribute to the claimed effects. 21 CFR 314.111(a)(5)(ii)(b); 21 CFR 430.20(b)(6); 21 CFR 300.50.

For similar reasons, the study offers no proof of the effectiveness of Lidosporin; nor does the study provide any evidence of the contribution of each of the ingredients in Lidosporin. 21 CFR 430.20(b)(6); 21 CFR 300.50.

2. Corroborative Evidence

a. Burroughs Wellcome also submitted a number of articles which it acknowledged did not constitute adequate and well-controlled studies. These were offered as corroborative evidence of polymyxin's antibacterial effect on pseudomonas. However, the issue is whether polymyxin has an antibacterial effect, an effect that is freely acknowledged. Rather, it is whether the polymyxin and the other ingredients in Aerosporin and Lidosporin are effective for each of their claimed purposes. 21 CFR 314.111(a)(5)(ii); 21 CFR 430.20(b)(6); 21 CFR 300.50. Without adequate and well-controlled studies, corroborative studies would not warrant a hearing. Nevertheless, they are briefly reviewed below.

This article describe the treatment of severe burn wounds with either a 0.1 percent solution of polymyxin E or a 0.1 percent polymyxin E cream. The article concerns only treatment of burn patients. No ear infections were considered. Moreover, the tested antibiotic was polymyxin E, not polymyxin B sulfate in combination with the other ingredients in Aerosporin or Lidosporin. Because the ingredients of a combination drug must each contribute to the claimed effect of the medication, this article could not assess the effectiveness of any of the active components of either Aerosporin or Lidosporin. 21 CFR 300.50. The fact that the investigators found polymyxin E helpful in treating burns is not useful in assessing the effectiveness of combinations containing polymyxin B in treating ear infections.

This article reports on the use of polymyxin B sulfate over a two year period in the treatment of 35 selected patients with pseudomonas bacterial infections. The locations of the bacterial infections were greatly varied. There were no control treatments to compare with each reported successful treatment. 21 CFR 314.111(a)(5)(ii)(a)(4).

Furthermore, in the different treatments, polymyxin B was mixed in varied quantities with many other substances to form solutions or creams. Sometimes the treatment required injections of the polymyxin solution. In other reported cases, a polymyxin mixture was applied topically, or topically along with injections.

No case descriptions involved the use of polymyxin B in treating ear infections. However, in a table showing the total number of treated patients, five were reported as treated for chronic otitis
medications were not clearly stated, 21 CFR 314.111(a)(5)(ii)(b); (2) no controls were utilized to compare the drug with no treatment or placebo, 21 CFR 314.111[a](5)(ii)(c); and (3) there are not enough details provided to permit scientific evaluation, 21 CFR 314.111(a)[5](ii)(c).

This paper describes the treatment of various types of bacterial infections with several different antibiotics, including polymyxin B hydrochloride. Several of the reported studies were designed to measure the toxicity of polymyxin B and the other test antibiotics. These studies were not designed to assess the effectiveness of polymyxin B in treating ear infection, for only two of the 36 patients studied had an ear infection. One of the test cases involved a four-month-old infant who suffered from both septicemia and bilateral ear infections. She had been given other antibiotics before receiving polymyxin B. Cultures of the drainage from the infected ears revealed pseudomonas bacteria. Following treatment, apparently by injection of polymyxin B, the ear infections improved.

In another case, an adult with pseudomonas ear infections received four doses of polymyxin but showed no change in the infection. The ingredients and dosage of the polymyxin solution and the method of administration were not reported, nor is it stated whether polymyxin B or E was used. 21 CFR 314.111(a)[5](ii)(b).

The brief report of the effect of polymyxin B on the infant’s ear infections is not relevant because the polymyxin B utilized in the infant’s ears was ‘of a different dosage and mixed with different ingredients than the components of Aerosporin and Lidosporin.” 21 CFR 314.111(a)[6][ii][b]. The report also is deficient because no control treatment was used. 21 CFR 314.111[a](5)(ii)[c][d]. The other ear infection case lacks sufficient details to permit scientific evaluation and it does not describe a control treatment. 21 CFR 314.111[a][5][ii][c]. These reports constitute random cases and are not useful in assessing the effectiveness of Aerosporin and Lidosporin for their intended uses.

This paper briefly describes case reports of patients treated with either polymyxin B or polymyxin E for urinary tract infections or infected wounds. The patients treated for urinary tract infections had their medications administered by injection of polymyxin in solution with other unidentified ingredients. To assess toxicity the concentrations of the polymyxin was varied in different patients and during the course of treatment. The report of these treatments fails to disclose with what other ingredients the polymyxin B or E was dissolved.

This report does not clearly describe which patients showed improvement in their urinary tract infections following treatment with polymyxin B as distinguished from polymyxin E treatment. Moreover, out of 20 treated patients, only 10 were considered benefited by treatment.

Likewise, the description of orally administered polymyxin for use as an intestinal antiseptic does not specify whether polymyxin B or E was taken by the 14 subjects tested.

In the report of the topical application of polymyxin cream it is stated that a 1 percent polymyxin in salt solution or carbowax was applied topically to several wounds infected with pseudomonas organisms. There is no mention of whether polymyxin B or E was used, with what it was dissolved, the number of patients tested, or how the results of treatment were assessed.

Inasmuch as none of the patients treated suffered from ear infections, no controlled tests were performed, and the test drugs differed from Aerosporin and Lidosporin, this article provides no evidence of the efficacy of these drugs for their labeled uses. 21 CFR 314.111[a](5)[ii][(a)[2], (4) and (b). e. Jewetz, E. and Coleman V.R., “Laboratory and Clinical Observations on Aerosporin (Polymyxin B),” *Journal of Laboratory and Clinical Medicine*, 34:751, June 1949.

This paper describes the use of polymyxin B hydrochloride, dissolved in a solution of sodium chloride, in treating urinary tract infections. The study focused upon the toxicity and antibacterial effects of this preparation. No patients with ear infections were included. 21 CFR 314.111[a][6][ii][c][2]. The polymyxin mixture was injected into the subjects, rather than administered topically as are Aerosporin and Lidosporin. 21 CFR 314.111[a][5][ii][b]. No controls were utilized. 21 CFR 314.111[a][5][ii][a][4].

This paper reports upon the *in vitro* sensitivity of one hundred different strains of pseudomonas bacteria isolated from patients with various types of infections. Among the antibiotics tested on the different cultures was polymyxin B sulfate. In the report of these studies the investigators state:

It is difficult to compare directly the results of *in vitro* tests to the effectiveness of the antibiotic in the patient. Many factors may influence the effectiveness of the antibiotic *in vitro* other than the sensitivity of the organism to the antibiotic being administered. These include the dose of the drug; its absorption, distribution, rate of excretion; the blood and tissue levels, the presence of interfering substances, the mechanism of action of the drug, the resistance of the host, and the concentration of the drug actually coming into contact with the causative organisms. 1d. at 715.

The investigators in this study did not attempt to measure the efficacy of polymyxin B sulfate *in vivo*. In light of their own admission that it is unreliable to draw parallels from laboratory tests to actual patients, these culture sensitivity studies are not useful in assessing the efficacy of Aerosporin and Lidosporin. 21 CFR 430.20(b)[6].

The tests described in this article did not involve patients with ear infections. Instead, the experiments concerned the effects of *in vitro* of several antibiotics, including polymyxin B, upon various strains of pseudomonas bacteria. The experimenter concluded that polymyxin B was among the two most active agents in combating the pseudomonas bacteria. This investigation is not a clinical study and, for the reasons stated by the authors in the previous study, does not constitute relevant evidence. 21 CFR 430.20(b)[6].

This paper describes laboratory tests of the sensitivity of 110 strains of pseudomonas bacteria to various...
antibiotics, including polymyxin B. One of the many sources of the various strains of pseudomonas used in these tests came from patients with infected ears. However, this study concerned only in vitro analysis of bacterial reactions to various drugs administered in laboratory cultures. No patients were directly involved. For the reasons stated above, these culture sensitivity studies are of no value in assessing the efficacy of Aerosporin and Lidosporin. 21 CFR 430.20(b)(6).

This paper describes the chemical structure and other properties of various strains of polymyxins. The article reports that the polymyxins A, B, C, D, and E all have similar antibacterial activity. The authors report upon the results of injection of various doses of the different strains of polymyxin in mice, rabbits, dogs, and man. The focus of the experiments was measurement of the toxicity of polymyxin E as distinguished from the toxicity of polymyxin A and B.

The article briefly mentions experiments with oral administration to adult men of dosages of polymyxin B and E. There is no suggestion that these oral dosages contained the same ingredients as Aerosporin or Lidosporin. 21 CFR 314.111(a)(5)(ii)(b). Moreover, it appears that the tested medications were administered for intestinal infections and not to treat ear infections. 21 CFR 314.111(a)(5)(ii)(c)(2). No control drugs were given to comparable patients. 21 CFR 314.111(a)(5)(ii)(i)(d).

This paper presents information on the in vitro susceptibility of various microorganisms to polymyxin, on the protection afforded to experimentally infected mice by subcutaneous injections of that antibiotic, and on the pharmacology of that substance. There are no controlled clinical investigations reported, and it is not possible to determine whether polymyxin A, B, C, D, or E was tested, nor with what other ingredients, if any, it may have been combined. Thus, this submission provides no relevant evidence of the efficacy of Aerosporin or Lidosporin. 21 CFR 430.20(b)(6).

Burroughs Wellcome also submitted a number of articles as corroborative evidence to demonstrate that pseudomonas is the most prevalent infecting agent in otitis externa. In the absence of substantial evidence that Aerosporin and Lidosporin are effective against the pseudomonas found in ear infections, this fact is irrelevant. Thus, there is no need to review the studies showing the relationship between pseudomonas and otitis externa.

3. Excerpt in Support of Lidosporin

The National Academy of Sciences. Drug Efficacy Study Report, excerpt regarding Lidocaine (July 1969) was submitted in support of the efficacy of the lidocaine hydrochloride component of Lidosporin. The NAS review did not describe any clinical studies of lidocaine hydrochloride in the treatment of ear infections, or even discuss lidocaine at all specifically, but did assert that local anesthetics are effective against pain when skin is abraded or damaged. This is certainly a reasonable rationale for studying use of lidocaine in this setting, but does not provide evidence of effectiveness. None of the materials submitted by the sponsor described a study of lidocaine’s effectiveness, although some of the testimonial letters did claim that lidocaine was indeed effective for relief of painful otitis externa.

4. Excerpts from Medical Textbooks

Burroughs Wellcome submitted several excerpts from textbooks. These excerpts provide specific pharmacologic information on all or some of the individual components of Aerosporin and Lidosporin, but do not describe controlled clinical investigations. Indeed, Burroughs Wellcome does not contend that these materials provide corroborative evidence.

This excerpt describes the chemical structure of polymyxin B. It summarizes findings on the antibacterial activity of this substance and describes some of the effects of various amounts of polymyxin B when administered by injection, tablet, or topically. No clinical studies are cited to support the authors' conclusions that a topical ointment of polymyxin B caused by pseudomonas may be cured by the topical use of polymyxin B in solution.

The excerpt does not discuss the efficacy of the other ingredients in Aerosporin or Lidosporin in treating ear infections. 21 CFR 300.50. Moreover, the discussion of the efficacy of polymyxin B in various dosages for administration by injection, orally or topically, to combat gram negative bacteria, including pseudomonas, is too brief to permit scientific evaluation.

The second excerpt from this text provides a summary of the chemical composition and effects of administration of various dosages of selected anesthetics, including lidocaine hydrochloride. This excerpt cites no adequate and well-controlled clinical studies showing the effectiveness of this substance in treating ear infections either as a single entity or when mixed with the other ingredients in Lidosporin. 21 CFR 300.50; 21 CFR 314.111(a)(5)(ii) (c).

d. Krantz and Carr, Pharmacologic Principles of Medical Practice, 6th Ed. p. 236, "Lidocaine Hydrochloride." This excerpt is a brief description of the chemical structure and other properties of lidocaine hydrochloride. Without reference to clinical tests, the text states that lidocaine is an active surface anesthetic.

This submission contains no description of the use of lidocaine hydrochloride in treating ear infections. 21 CFR 314.111(a)(5)(ii)(i)(c) (i) and (iii). In addition, there is no mention of the effectiveness of the quantity of that compound found in Lidosporin, nor of its effect when combined with the other ingredients in Lidosporin. 21 CFR 300.50.

This article describes the chemical and pharmacological properties and effects of various anesthetics. Its references to lidocaine focus upon toxicity. The excerpt does not describe results derived from well-controlled clinical studies of lidocaine's effectiveness in treating symptoms associated with ear infections. Moreover, no mention is made of the effectiveness of the dosage of lidocaine hydrochloride in Lidosporin when combined with the other ingredients in that drug. 21 CFR 300.50.

d. Lea & Febiger, "Local and Regional Anesthetics." 1965 pp. 458–481 (further publication details not provided).

This submission presents a general description of the advantages and disadvantages of a variety of anesthetics and reviews their chemical structure, pharmacology, methods of administration, and therapeutic effects. Lidocaine is described as "an effective topical anesthetic." Id. at 477. This conclusion is not supported by descriptions of the results of any clinical investigations. In addition, this excerpt does not mention what therapeutic effect, if any, lidocaine hydrochloride has when used in treatment of ear infection in the dosage found in Lidosporin. 21 CFR 300.50.

This short excerpt mentions lidocaine only as a topical anesthetic for use with bronchoscopy and for treatment of lesions of the mouth, pharynx, or esophagus. It remains a component of treatment of ear infections, the author states, "[T]here is no good topical anesthetic for the eardrum." No solution of cocaine, tetracaine, dibucaine or any other topical anesthetic is effective on the eardrum." *Id.* at 660.

The author recommends a combination of ingredients that does not include lidocaine hydrochloride for the treatment of pain associated with an inflamed tympanic membrane. Although the author does recommend the "common topical anesthetics" for some ear infections (*id.*), he does not support the recommendation with any citation to well-controlled clinical studies. Moreover, he does not mention specifically the use of lidocaine hydrochloride, nor refer to the dosage found in Lidosporin.

This section outlines the chemical structure and pharmacologic properties of various compounds containing lidocaine as the primary anesthetic ingredient. Lidocaine hydrochloride is described as an active topical anesthetic. Nevertheless, this excerpt cites no adequate and well-controlled clinical studies to support this conclusion. Moreover, the excerpt does not discuss the use of lidocaine hydrochloride in the dosage found in Lidosporin; nor does the excerpt describe the effect of combining lidocaine hydrochloride with the other ingredients in Lidosporin. 21 CFR 300.50; 21 CFR 314.111(a)(5)(ii)(c).

2. Statements by Medical Experts

Burroughs Wellcome also submitted testimonial letters from four physicians. The letters do not reference any adequate and well-controlled clinical investigations but are based instead upon the observation and experience of their authors. This type of material does not constitute substantial evidence within the meaning of the statute. 21 U.S.C. 355(d).

3. Summary of Submissions

Burroughs Wellcome has submitted only two studies which it contends constitute substantial evidence in support of the efficacy of Aerosporin or Lidosporin for their labeled uses: the Senturia study and the Farrar study. As shown above, neither of these were adequate and well-controlled clinical investigations which comply with the requirements of 21 CFR 314.111(a)(5)(ii) and 21 CFR 300.50.

The Senturia study did not involve either Aerosporin or Lidosporin and did not demonstrate a synergistic contribution of each of the ingredients in these combination drugs. The study (1) failed to minimize potential bias of observers, e.g., by binding them to treatment, even though the assessments made were subjective, for the most part; 21 CFR 314.111(e)(9)(ii)(a); (3) failed to utilize as a system for assignment of patients to treatment and control groups that would minimize bias, e.g., randomization, 21 CFR 314.111(a)(5)(ii)(a); (4) failed to perform approximate statistical analyses, 21 CFR 314.111(a)(5)(ii)(b); (5) failed to demonstrate the contributions of the acetic acid and propylene glycol in Aerosporin or the contributions of lidocaine hydrochloride and propylene glycol in Lidosporin, 21 CFR 300.50.

The Farrar study lacks such essential elements as: (1) binding of patients and investigator, or other attempts to minimize bias in observation and analysis of results, 21 CFR 314.111(a)(5)(ii)(e) and (f); (2) randomized assignment of patients to test and control groups, 21 CFR 314.111(a)(5)(ii)(e); (3) assurance of comparability of subjects with respect to pertinent variables, 21 CFR 314.111(a)(5)(ii)(e); (4) a comparison of results of treatment with a control in a fashion which permits quantitative evaluation, 21 CFR 314.111(a)(5)(ii)(e); (5) elucidation of the exact formulation of the test drug or indication it contained the identical ingredients of Aerosporin, 21 CFR 314.111(a)(5)(ii)(e). Moreover, the Farrar study did not consider the contribution of the acetic acid or propylene glycol to the effectiveness of Aerosporin, nor did it involve the non-antibiotic ingredients in Lidosporin. Therefore, it does not provide the evidence required for a combination drug. 21 CFR 300.50.

The corroborative studies, at best, demonstrate that there is a body of scientific opinion which holds that pseudomonas organisms are often the most prevalent infecting agent in otitis externa and that polymyxin is active against various infections, including some Pseudomonas infections. The relevant issue, however, is whether polymyxin B, as formulated in Aerosporin and Lidosporin, is an effective antibacterial agent against the Pseudomonas organism in the human ear. This question is not answered by the corroborative submissions.

Moreover, the question of the effectiveness of Aerosporin and Lidosporin as fixed combinations and the role of the other ingredients in these combination products is unanswered. In any event, in the absence of adequate and well-controlled clinical investigations showing that these drugs act against Pseudomonas bacteria when present in ear infections, the corroborative studies are unhelpful.

In short, Burroughs Wellcome has not met the burden of proof necessary to obtain a hearing. 21 CFR 314.111(a)(5)(i); 21 CFR 300.50.

IV. Legal Arguments

Burroughs Wellcome first argues that the efficacy of Lidosporin was previously established in a letter dated June 28, 1966 from James L. Goddard, M.D., Commissioner of Food and Drugs, in which he concluded that there was acceptable evidence of the drug's safety and efficacy. The firm contends that this letter also supports the efficacy of Aerosporin.

Commissioner Goddard's letter reflects an early attempt by the FDA to assess the efficacy of certain drugs marketed prior to October 10, 1962. As noted above, FDA subsequently re-evaluated these drugs and published its evaluations in the Federal Register. The evaluations, based on the NAS–NRC reports, superseded the conclusions tendered in the Commissioner's letter. 21 CFR 310.100(d). It is now settled that these letters have no binding effect on the agency. See e.g., Bentex Pharmaceuticals, Inc. v. Richardson, 483 F. 2d 363, 368 n. 17 (4th Cir. 1972), reversed on other grounds, 412 U.S. 645 (1973); SmithKline Corp. v. Food and Drug Administration, 587 F. 2d 1107, 1115 n. 15 (D.C. Cir. 1978); 21 CFR 310.100(d).

Burroughs Wellcome next argues that a finding of efficacy for Aerosporin and Lidosporin as fixed combinations and the role of the other ingredients in these combination products is required because FDA's regulations provide for release of otic solutions containing a combination of polymyxin and hydrocortisone. 21 CFR 448.430.

This argument is without merit. The efficacy conclusions applied to one combination product cannot automatically be applied to a different combination product. The precise mixture of ingredients in Aerosporin and Lidosporin have not been shown to produce the same therapeutic effects as
the approved combination of polymyxin and hydrocortisone. In addition to polymyxin, Aerosporin contains acetic acid and propylene glycol, while Lidosporin contains lidocaine hydrochloride and propylene glycol. The combination drug policy states:

Two or more drugs may be combined in a single dosage form when each component makes a contribution to the claimed effects and the dosage of each component (amount, frequency, duration) is such that the combination is safe and effective for a significant patient population requiring such concurrent therapy as defined in the labeling for the drug.

21 CFR 300.50(a). As previously discussed, Burroughs Wellcome has not demonstrated the contribution of each component to the total claimed effects for either Aerosporin or Lidosporin: nor may it rely on the certification of other antibiotic ear drops for such proof.

Burroughs Wellcome raises a general objection to the combination drug policy (21 CFR 300.50). The firm contends that the policy fails to recognize the benefits of fixed combinations for the treatment of conditions affected by each of the active ingredients in the fixed combination and that the policy fails to recognize the convenience to both the physician and the patient in having available fixed-combination products. It further complains of a lack of qualified research personnel willing to undertake "defensive research" to support the efficacy of a combination product having well-known ingredients.

FDA developed the combination drug policy in consultation with leaders in clinical pharmacology and medicine. The policy was adopted only after broad input from the medical profession, scientific societies, the pharmaceutical industry, and the public. The policy takes into account both the advantages and disadvantages of fixed-combination drugs. FDA recognizes that a fixed combination drug may bring to patient care greater convenience, improved patient compliance, the potential for reduced cost of medication, and sometimes, greater safety. However, these advantages are realized only when the patient benefits from each component of the combination and when the components can be administered in amounts, at intervals, and over periods of time that are appropriate to each patient's needs.

Burroughs Wellcome's assertion that there is a lack of qualified personnel willing to undertake research on Aerosporin and Lidosporin is not plausible. Burroughs Wellcome has been on notice of the less-than-effective classifications of Aerosporin and Lidosporin for more than ten years. More than sufficient time has been allowed the firm to obtain the expertise necessary to design and conduct appropriate studies to determine the effectiveness of these drugs.

Burroughs Wellcome further contends that "because of the unique nature and application of otic products, FDA's general policy against fixed-combination prescription drugs is particularly inappropriate as applied to these products."

This argument is unfounded. The principles established in the combination drug policy in no sense reflect a bias against combination drugs or failure to recognize their potential advantages in particular therapeutic settings, but rather provide a reasonable application of the statutory requirements to combination drug products. The policy requires that each component be shown to have an effect, in order for a product to be considered effective as a fixed combination. This requirement is as applicable to otic combination drugs as to other combination drugs, and not more difficult to satisfy.

Burroughs Wellcome next contends that otic products should be exempt from the requirements of the combination drug policy. The company argues that the testimonial of Dr. Maxwell Finland provides adequate grounds for exempting otic drops from the combination drug policy. Dr. Finland maintains that because ear drops are used topically and in small quantities, they can safely be formulated with a higher concentration of relatively toxic ingredients such as polymyxin.

Moreover, because the antibiotics are in almost direct contact with the infecting organism, topical use resembles the test tube activity of the antibiotics against the bacteria. These propositions, which seem reasonable, provide a sound rationale for use of otic antibiotics, but do not constitute a showing of effectiveness of the combinations.

Burroughs Wellcome also asserts that Aerosporin is not a fixed-combination drug and that polymyxin B is the only component whose efficacy needs to be established. The firm points out that it has sought approval from FDA to delete the references to the action of propylene glycol in current labeling of Aerosporin (See Section II A above). In short, the firm seeks to abandon its long-standing reliance upon the effect of propylene glycol in Aerosporin and Lidosporin.

Similarly, Burroughs Wellcome's claim that the antibiotics comprising the two combinatorial products are mere vehicles, and that polymyxin B is the only active ingredient, is without merit. FDA's requirement that at least a single component be shown to have an effect, in order for a product to be considered effective as a fixed combination, is not so restricted. Propylene glycol, included for its solubilizing or moisturizing properties, may be considered inactive, but it is still necessary to show that the drug product containing polymyxin is more effective than that vehicle, and to compare Aerosporin with the vehicle alone in treating ear infections. Thus, whether the correct study is Aerosporin versus its complete components as to other possible combinations of polymyxin, acetic acid, and propylene glycol.

Burroughs Wellcome has not done the study. Instead of submitting the needed studies, Burroughs Wellcome has sought to avoid the requirements by proposing labeling changes. But modification of labeling to eliminate claims for ingredients does not eliminate the need for further study. Burroughs Wellcome has not offered any evidence contradicting FDA's application of the combination drug policy to Aerosporin, and it still appears that propylene glycol and acetic acid should be considered active, but in any case, the contribution of polymyxin needs to be explored.

Burroughs Wellcome contends that Lidosporin complies with FDA's fixed-combination drug requirements. It argues that the polymyxin component provides the claimed antibacterial effect against susceptible gram-negative organisms, while the lidocaine (through its anesthetic action upon abraded or broken skin) acts to relieve the pain associated with otitis externa.

Burroughs Wellcome also contends that there exists a significant patient population requiring such concurrent therapy, because many cases of otitis externa involve abraded or broken skin, and patients in such cases often complain of pain which can be relieved by lidocaine.
The data and information submitted in support of Lidosporin do not meet the requirements of the fixed-combination drug policy. 21 CFR 300.50. Burroughs Wellcome has not provided substantial evidence, i.e., results of adequate and well-controlled clinical investigations, in support of the combination of polymyxin B, lidocaine, and propylene glycol to the total claimed effects of Lidosporin. The testimonials submitted by Burroughs Wellcome, claiming the existence of a significant patient population requiring the concurrent otic therapy of polymyxin B, lidocaine, and propylene glycol, is insufficient. 21 CFR 300.50; Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 619. As described above, even if propylene glycol is deemed an excipient, the polymyxin-propylene glycol combination needs to be tested against propylene glycol, a vehicle with possible activity.

Burroughs Wellcome also contends that if Lidosporin were not available commercially, extemporaneously prepared mixtures of polymyxin and lidocaine might be sought. The firm points out that allowing pharmacies to make their own combinations introduces hazards such as possible non-sterility, uncertain potency, pH and stability problems, as well as greater cost and patient inconvenience.

FDA recognized the possibility of these problems and the perceived usefulness of otic combinations when Lidosporin initially was classified as less-than-effective. These concerns were one of the justifications for allowing certain combination otic products, including Lidosporin, to remain on the market beyond the time limits established for implementing the Drug Policy. (37 CFR 26623). But the extension of time granted to these products was not unlimited. The extension was granted so that sponsors could conduct clinical studies to determine effectiveness of the combinations. The Commissioner concludes that more than sufficient time has been allowed Burroughs Wellcome to gather appropriate data and information to demonstrate Lidosporin's effectiveness, and that the continued marketing of Lidosporin can no longer be justified by this argument.

Alternatively, Burroughs Wellcome argues that withdrawal of approval of Aerosporin and Lidosporin is unfair in light of the FDA's prior actions regarding these products. Burroughs Wellcome argues that for nearly eight years the firm has made submissions and sought advice for upgrading their products' effectiveness classifications, but that the FDA has not responded in a helpful way.

Previous meetings and correspondence with the FDA with respect to a product's efficacy do not compel the agency to recategorize the product to effective or to grant a hearing. The statute places the burden of demonstrating the effectiveness of a drug upon the manufacturer. That Burroughs Wellcome contacted the FDA about Aerosporin and Lidosporin does not relieve the firm of this burden of proof; nor, during the course of these meetings, was the firm unfairly treated by the agency or misled into believing that the statutory burden had been met.

Burroughs Wellcome objects to the requirements of 21 CFR 430.20(b)(6). The firm complains that it is improper to require analysis of a clinical study in the terms and format desired by the FDA, and that the requirement for the submission of raw data is unreasonable.

It is a well-recognized principle, applied by the courts and by administrative agencies, that requests for a hearing or other applications and pleadings may be required to be submitted in a standard format and to contain specific types of information. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 622; United States v. Storer Broadcasting Co., 351 U.S. 192, 203 (1956); Dyestuffs & Chemicals, Inc. v. Fleming, 271 F. 2d 281, 286 (8th Cir. 1960); cert. denied, 362 U.S. 911 (1960). The Federal Food, Drug, and Cosmetic Act authorizes the issuance of regulations that promote the efficient enforcement of the statute. 21 U.S.C. 371(a). The format requirements for hearing requests are a reasonable exercise of that authority. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 622; Cooper Laboratories, Inc. v. Commissioner, Federal Food and Drug Administration, 501 F. 2d 772, 774 (D.C. Cir. 1974).

The FDA has found that the determination that a study is adequate and well-controlled can only be made by carefully analyzing the study in light of each of the criteria defined in 21 CFR 314.111(a)(3)(ii). It is not, as Burroughs Wellcome suggests, necessary that a person seeking a hearing "prove his entire case in detail" to obtain a hearing. However, the sponsor of a drug must submit evidence of adequate and well-controlled clinical studies meeting all the requirements of 21 CFR 314.111(a)(3)(ii), and for a combination product, 21 CFR 314.111(a)(3)(iii). The Commissioner concludes that, for the reasons previously stated, the Burroughs Wellcome submission fails on its face to comply with the requirements for adequate and well-controlled clinical studies. Finally, the Commissioner's findings are not based upon Burroughs Wellcome's failure to submit raw data, nor upon any defect in format. Rather, the agency's action is based upon the substantive deficiencies in the evidence submitted.

Burroughs Wellcome also argues that there is no reasonable justification for requiring that the request for a hearing be completed and submitted within 60 days. The agency's experience demonstrates otherwise. FDA has found that without such a policy, drug sponsors requesting hearings have often supplemented their requests with multiple submissions which were available at the time the original request was filed. The 60-day filing period enables the Commissioner to avoid the lengthy delays caused by late submissions. For more than ten years, Burroughs Wellcome has been aware that the administrative process would ultimately lead to the withdrawal of its products unless substantial evidence of effectiveness were submitted. Burroughs Wellcome's failure to submit such evidence within this period of time defeats its argument with respect to the 60-day time limit.

Alternatively, Burroughs Wellcome contends that it has not had adequate notice of the deficiencies in its submissions and is being improperly denied an opportunity to respond to the FDA's criticisms before a final decision of the Commissioner.

This argument is unsustainable in light of the Supreme Court's explicit approval of FDA's procedure in matters such as this. In Weinberger v. Hynson, Westcott & Dunning, Inc., supra, the Court explained:

Section 505(e) directs FDA to withdraw approval of an NDA if the manufacturer fails to carry the burden of showing there is "substantial evidence" respecting the efficacy of the drug * * * The Act and the Regulations, in their reduction of that standard to detailed guidelines, make FDA's * * * administrative summary judgment procedure appropriate. 412 U.S. at 617 (footnotes omitted).

The Court further held:

The drug manufacturers have full and precise notice of the evidence they must present to sustain their NDA's, and under these circumstances we find FDA hearing regulations unexceptional, or any statutory or constitutional ground. Id. at 622.

It is unreasonable for Burroughs Wellcome to argue that it has not been adequately informed of its responsibilities if it fails to comply with those regulations. The pharmaceutical industry has been on notice of the
requirements of proof of effectiveness since the regulations were first published on September 19, 1969 (34 FR 14596) and finalized on May 8, 1970 (35 FR 7250).

Similarly, the regulation setting out the requirements for combination drugs was first proposed on February 18, 1971 (36 FR 3128) and finalized on October 15, 1971 (36 FR 20038). Thus, the precise requirements of 21 CFR 314.111(a)(5)(ii) and 21 CFR 300.50 provide sufficient notice "to prepare an informed response which places all the relevant data before the agency." Hess & Clark, Div. of Rhodia, Inc. v. FDA, 495 F. 2d 975, 983 (D.C. Cir. 1974); Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 622. This is particularly so where, as here, Burroughs Wellcome has had meetings and written communications with the agency concerning the design of adequate and well-controlled clinical studies to demonstrate the efficacy of Aerosporin and Lidosporin. In short, there is no merit in the firm's attack on the adequacy of the notice it has received.

Equally incorrect is Burroughs Wellcome's assertion that its submissions raise a genuine issue of fact requiring a hearing. The firm has not tendered evidence which meets the criteria for adequate and well-controlled clinical studies, or which complies with the requirements for a fixed-combination drug. 21 CFR 314.111(a)(5)(ii); 21 CFR 300.50. Because the data and information submitted by Burroughs Wellcome fail to meet the standards for proof of efficacy, a hearing on these submissions would be fruitless. Only adequate and well-controlled studies require a hearing. Cooper Laboratories, Inc. v. Commissioner, Federal Food & Drug Administration, supra. Under these circumstances, denial of a hearing does not constitute a denial of due process, but instead promotes expeditious enforcement of the statute. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 621.

Burroughs Wellcome additionally argues that denial of a hearing is improper because it has submitted expert opinion evidence in support of the efficacy of Aerosporin and Lidosporin. Burroughs Wellcome contends that these submissions raise a factual dispute that must be resolved by a trier of fact. This contention was rejected by the Supreme Court when it held that testimonial evidence is not to be considered proof of drug efficacy which warrants an evidentiary hearing. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 619, 630.

Burroughs Wellcome argues that a drug can be found effective if "a responsible body of qualified opinion" agrees that it is effective, "even if the preponderance of qualified opinion, including that of the bureau, is to the contrary." Burroughs Wellcome cites no legislative history or case law to support this position. The Drug Amendments of 1962 require substantial evidence of effectiveness including evidence from adequate and well-controlled clinical studies, as subsequently defined by the FDA's regulations. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 617. Evidence of effectiveness based solely on the unsupported opinion of experts was expressly rejected by Congress. 21 U.S.C. 355(d), 357 (a) and (b). See also Hearings on S. 1552 before the Subcommittee on Anti-trust and Monopoly of the Senate Committee on the Judiciary, 87th Cong., 1st Sess., pt. 1, pp. 195, 262, 411-12 (1962).

Burroughs Wellcome argues that it has not had an opportunity to respond to the agency's criticisms of its submissions. The precise requirements of 21 CFR 314.111(a)(5)(ii) and 21 CFR 300.50 provide ample detail of what Burroughs Wellcome had to produce to prove the effectiveness of its products. No further opportunities for response are required. Weinberger v. Hynson, Westcott & Dunning, Inc., supra, 412 U.S. at 620.

Burroughs Wellcome also contends that the agency did not follow the appropriate administrative procedures in publishing the January 30, 1979 notice (44 FR 5679) which revoked the provisions for certification or release of certain otic combinations, including Aerosporin and Lidosporin. The firm argues that the FDA was required first to publish a proposed rule. This argument reflects a misunderstanding of the statutory procedure and regulation applicable to antibiotics.

The antibiotic regulation (21 CFR 430.20) sets forth the procedure for the issuance, amendment, or repeal of regulations under which antibiotic drug products may be marketed. The regulation provides for a three-step procedure, consisting of a notice of proposed rulemaking with an opportunity to comment on the proposal, publication of an order acting on the proposal (with an opportunity to file objections and request a hearing), and promulgation of an order ruling on the hearing request. With respect to products subject to the Drug Efficacy Study, the regulation provides that an opportunity to protest and request an informal conference, after announcement of the FDA's evaluation of the NAS-NRC reports, constitutes the notice of proposed rulemaking. 21 CFR 430.20(b)(2).

In 1971, the FDA published two notices announcing its evaluation of reports received from the NAS-NRC concerning Lidosporin (36 FR 16129) and Aerosporin (36 FR 20546). These notices classified these drugs as possibly effective for their labeled indications and provided Burroughs Wellcome with an opportunity to comment and to submit substantial evidence of effectiveness. Furthermore, Burroughs Wellcome was given copies of the NAS-NRC reports, to assist the firm in preparing an informed response to those findings. The NAS-NRC evaluation notices, together with the regulations, 21 CFR 314.111(a)(5)(ii) and 21 CFR 300.50, defined clearly the standard of proof of efficacy Burroughs Wellcome was required to meet to continue marketing Aerosporin and Lidosporin.

The notices published on January 30, 1979 (44 FR 5942 and 44 FR 5679) announced FDA's decision to revoke the extension of time during which Burroughs Wellcome could submit substantial evidence of effectiveness in support of Aerosporin and Lidosporin. These notices cited the deficiencies in the evidence previously submitted by Burroughs Wellcome and advised the firm that certification of Aerosporin was revoked and the provision for release of Lidosporin was terminated. These notices constituted compliance with the second step in the procedure for withdrawal of antibiotic drugs.

The fact that the notice revoking the provision for certification of Aerosporin and release of Lidosporin (44 FR 5679) was captioned "final rule" has not impaired Burroughs Wellcome's ability to support its hearing request with substantial evidence of effectiveness. The revocation notice merely set forth the decision of the Bureau of Drugs and provided Burroughs Wellcome with the opportunity to request a hearing. It is Burroughs Wellcome's failure to support its hearing request with adequate and well-controlled studies which has led to the issuance of this third and final notice. In short, the FDA has correctly followed the administrative procedure applicable to revocation of certification and release of antibiotic drug products. 21 CFR 430.20.

Burroughs Wellcome argues that no action should be taken with respect to Aerosporin and Lidosporin until the firm completes new studies that it has proposed to undertake. Burroughs Wellcome's argument is untenable. For more than ten years Burroughs Wellcome has been on notice that it is
required to substantiate the effectiveness of Aerosporin and Lidosporin. There is no reasonable justification for further extensions. The continued marketing of the drugs can no longer be squared with the purpose of the 1982 amendments to the Federal Food, Drug, and Cosmetic Act. On the other hand, Burroughs Wellcome is not precluded from applying for an exemption, pursuant to 21 U.S.C. 555(j), through which it may study its product under an approved Investigational New Drug Application.

V. Findings
On the basis of the foregoing, the Commissioner finds that there is a lack of substantial evidence that Aerosporin Otic Solution and Lidosporin Otic Solution have the effects they are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling, and a lack of evidence that each ingredient in these products contributes to the claimed effects. 21 CFR 430.20(b)(6); 21 CFR 300.50. Furthermore, Burroughs Wellcome has failed to show that there is a genuine and substantial issue of fact requiring a hearing. Accordingly, the request for hearing is denied, and new drug applications 50-171 and 60-756 are withdrawn by revoking the provisions for certification and release of the drugs. Certificates of safety and effectiveness previously issued for Aerosporin for human use are revoked and no new certificates will be issued. All provisions for the release of Lidosporin are revoked.

PART 448—PEPTIDE ANTIBIOTIC DRUGS

Therefore, under the Federal Food, Drug, and Cosmetic Act (sections 502, 507, 52 Stat. 1050-1051, as amended, 59 Stat. 483 as amended (21 U.S.C. 352, 357)) and under authority delegated to the Commissioner (21 CFR 5.10), 21 CFR 448.430, published at 44 FR 357), is amended by removing the following:

On page 14148, third column, the EFFECTIVE DATE now reading “April 12, 1982” should have read “April 2, 1982.”

BILLING CODE 1505-01-M

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject To Certification; Dichlorophene and Toluene Capsules

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Medico Industries, Inc., providing for safe and effective use of dichlorophene-toluene capsules for treating dogs and cats for certain helminth infections.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffin, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, 5000 Fischers Lane, Rockville, MD 20857, 301-443-3430.

SUPPLEMENTARY INFORMATION: Medico Industries, Inc., P.O. Box 336, Elwood, KS 66024, filed NADA 126-476 providing for use of D&T Worm Capsules (dichlorophene and toluene capsules) for treating dogs and cats for infections of certain ascarids, hookworms, and tapeworms. This product is the generic equivalent of a product that was the subject of a National Academy of Sciences/National Research Council (NAS/NRC) Drug Efficacy Study Group evaluation published in the Federal Register of February 1, 1969 (34 FR 1613) and reflected in § 520.580 (21 CFR 520.580). Because this product is manufactured for Medico Industries by the firm currently manufacturing the NAS/NRC reviewed product, approval of this product does not require submission of data to demonstrate bioequivalency. The approval is issued and the regulations are amended to identify Medico Industries, Inc., as a sponsor for dichlorophene and toluene capsules.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(iii) (21 CFR 514.11(e)(2)(iii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m. Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(ii) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

List of Subjects in 21 CFR Part 520

Animal drugs, Oral use.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10 (formerly 5.1; see 46 FR 20532; May 11, 1981)) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520.580 is amended by revising § 520.580(b)(2) to read as follows:

§ 520.580 Dichlorophene and toluene capsules.

• • • • •

(b) • • •

(2) For single and multiple dose, see 000063, 000859, 011716, 015562, and 038782 in § 510.600(c) of this chapter.

• • • • •

Effective date. This amendment is effective April 23, 1982.

Sec. 512(i). 82 Stat. 347 (21 U.S.C. 360b(i))

Dated: April 14, 1982.

Gerald B. Guest,
Acting Director, Bureau of Veterinary Medicine.
[FR Doc. 82-10936 Filed 4-22-82; 0:45 am]
BILLING CODE 4160-01-M

21 CFR Part 524

Ophthalmic and Topical Dosage Form New Animal Drugs Not Subject To Certification; Nitrofurazone Ointment

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug.
application (NADA) filed by Medico Industries, Inc., providing for use of nitrofurazone ointment as a topical antibacterial on dogs, cats, and horses. The application provides labeling that reflects the conclusions of the National Academy of Sciences/National Research Council (NAS/NRC) review of such products.

**EFFECTIVE DATE:** April 23, 1982.

**FOR FURTHER INFORMATION CONTACT:**
Sandra K. Woods, Bureau of Veterinary Medicine [H/FV–114], Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

**SUPPLEMENTARY INFORMATION:** Medico Industries, Inc., P.O. Box 338, Elwood, KS 66024, is sponsor of an NADA (125–797) providing for use of an ointment containing 0.2 percent nitrofurazone (2 milligrams per gram) as a topical antibacterial on dogs, cats, and horses. This product is the generic equivalent of one codified for animal use in 21 CFR 524.1580b. The regulation provides that because the conditions of use are NAS/NRC reviewed and found effective, applications for these uses need not include certain effectiveness data as specified by 21 CFR 514.111.

Bioavailability studies are not required because the product is an ointment intended solely for topical administration (21 CFR 320.22(b)(2)). Therefore, NADA 125–797 is approved on the basis of generic equivalence to an approved, NAS/NRC reviewed product. The regulations are amended to reflect this approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24[d][1][i] [proposed December 11, 1979; 44 FR 71742] that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

This action is governed by the provisions of 5 U.S.C. 556 and 557 and is therefore excluded from Executive Order 12291 by section 1(a)(1) of the Order.

List of Subjects in 21 CFR Part 524

Animal drugs, Topical.

**PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION**

Therefore, under the Federal Food, Drug, and Cosmetic Act (Secs. 512[i], 82 Stat. 347 [21 U.S.C. 360b(i)]) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 510 (formerly 5:1; see 40 FR 20052; May 11, 1981)) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 524 is amended by revising § 524.1500b(b) to read as follows:

§ 524.1500b Nitrofurazone ointment.

* * * * *

(b) Sponsor. For use in dogs, cats, and horses see Nos. 000149, 000864, 012516, 015562, 015579, and 023851 in § 510.600(c) of this chapter. For use in dogs and horses see No. 017135 in § 510.600(c) of this chapter.

* * * * *

Effective date. This amendment is effective April 23, 1982.

(Sec. 512[i], 82 Stat. 347 [21 U.S.C. 360b[i]])

Dated: April 15, 1982.

Gerald B. Guest,
Acting Director, Bureau of Veterinary Medicine.

BILLING CODE 4160–01–M

**ENVIRONMENTAL PROTECTION AGENCY**

40 CFR Part 52

[4–FRL–2089–6]

Arizona State Implementation Plan Revision

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of final rulemaking.

**SUMMARY:** The Environmental Protection Agency (EPA) takes final action to approve changes to the Arizona Department of Health Services (ADHS) rules and regulations for air pollution control submitted by the Director of the ADHS as revisions to the Arizona State Implementation Plan (SIP). These revisions generally are administrative and retain equivalent emission control requirements. EPA reviewed these rules with respect to the Clean Air Act and determined that they should be approved.

**DATE:** This action is effective June 22, 1982.

**ADRESSES:** Copies of the revisions and the technical support documents are available for public inspection during normal business hours at the EPA Region 9 office and at the following locations:

Public Information Reference Unit, Environmental Protection Agency, Library, 401 M Street, SW., Room 2404, Washington, D.C.. 20460

Library, Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C., 20460

Arizona Department of Health Services, 1740 West Adams Street, Phoenix, AZ 85007

**FOR FURTHER INFORMATION CONTACT:**

Douglas Grano, Chief, State Implementation Plan Section, Air Programs Branch, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105, (415) 974–8222.

**SUPPLEMENTARY INFORMATION:** The ADHS submitted as SIP revisions the following rules on the indicated dates:

August 5, 1981

Appendix 11—Allowable Particulate Emission Computations

Under Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove these regulations as State Implementation Plan revisions. All rules submitted have been evaluated and found to be in accordance with EPA policy and 40 CFR Part 51. EPA's detailed evaluation of the submitted rules is available at the EPA Library in Washington, D.C., and the Region 9 office. It is the purpose of this notice to approve all the rule revisions listed above and to incorporate them into the Arizona SIP. This is being done without prior approval because the revisions are noncontroversial, have limited impact, and no comments are anticipated. The public should be advised that this action will be effective May 24, 1982. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, the approval will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will indefinitely postpone the effective date, modify the final action to a proposed action, and establish a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under the Clean Air Act, any petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceeding to enforce its requirements.

Note.—Incorporation by reference of the State Implementation Plan for the State of Arizona was approved by the Director of the Federal Register on July 1, 1981.

(Secs. 110, 172 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410, 7502 and 7601(a)))

List of Subjects in 40 CFR Part 52
Air pollution control, Oxzone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.
Dated: April 9, 1982.
Anne M. Gorsuch, Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Subpart D of Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart D—Arizona
1. Section 52.120, paragraph (c) is amended by adding subparagraphs (27)(i)(B), (29), (40)(i)(B), (45)(i)(B), (47), (50), and (52) as follows:

§ 52.120 Identification of plan.

40 CFR Part 52
[A-9-FRL-2056-3]
California State Implementation Plan
Revision for Three Air Pollution
Control Districts
AGENCY: Environmental Protection Agency.
ACTION: Final rulemaking.

SUMMARY: Revisions to rules of the
Placer County, Plumas County, and
Sierra County Air Pollution Control Districts (APCDs) were forwarded to EPA by the California Air Resources Board. These revisions generally are administrative and retain equivalent emission control requirements. EPA reviewed these rules with respect to the Clean Air Act and determined that they should be approved.

EFFECTIVE DATE: June 22, 1982.

ADRESSES: Copies of the revisions and support documents are available for public inspection during normal business hours at the following locations:

Public Information Reference Unit, Environmental Protection Agency, Library, 401 "M" Street, S.W., Room 2040, Washington, D.C. 20460
Library, Office of the Federal Register, 1100 "L" Street, N.W., Room 6401, Washington, D.C. 20408
California Air Resources Board, 1102 "Q" Street, Sacramento, CA 95812
Placer County Health and Medical Services, 11491 B Ave., Auburn, CA 95603
Plumas County Air Pollution Control District, Courthouse Annex, Quincy, CA 95971
Sierra County Air Pollution Control District, County Courthouse, Downieville, CA 95936

FOR FURTHER INFORMATION CONTACT:
Douglas Grano, Chief, State Implementation Plan Section, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont St., San Francisco, CA 94105, (415) 874-8222.

SUPPLEMENTARY INFORMATION: The California Air Resources Board submitted the following rules and regulations on the indicated dates:

Placer County (Mountain Air Basin portion)
May 23, 1979
Rule
604 Renewal Fee (deletion).
605 Exception to Rule 604 (deletion).

BILLING CODE 6560-50-M

40 CFR Part 123

[W-6-FRC 2109-3]

Louisiana Department of Natural Resources Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The State of Louisiana has submitted an application under Sections 1422 and 1423 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Classes I, II, III, IV, and V injection wells. After careful review of the application and comments received from the public, the Agency has determined that the State's injection well program for Classes I, III, IV, and V wells meets the requirements of Section 1422 of the Act, and that the State's injection well program for Class II oil and natural gas related wells meets the requirements of Section 1425 of the Act. Therefore, this application covering Classes I-V injections is approved.

EFFECTIVE DATE: This approval is effective April 23, 1982.

FOR FURTHER INFORMATION CONTACT: Erlece Allen, Ground Water Protection Section, U.S. Environmental Protection Agency, 1201 Elm Street, Dallas, Texas 75270, [214] 767-2774. Copies of the responsiveness summary are available from the above address.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the Federal Register each State for which in his judgment a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, an UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable notice of public hearing, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The SDWA was amended on December 5, 1980, to include Section 1425, which establishes an alternative method by which a State may obtain primary enforcement responsibility for those portions of its UIC program related to the recovery and production of oil and natural gas (Class II wells). Specifically, instead of meeting the Consolidated Permits Regulations (40 CFR Parts 122, 123 and 124) and related Technical Criteria and Standards (40 CFR 148), a State may demonstrate that its program meets the more general statutory requirements of Section 1421(b)(1)-(A) through (D) and represents an effective program to prevent endangerment of underground sources of drinking water.

The State of Louisiana was listed as needing an UIC program on September
25, 1979 (43 FR 43420). The State of Louisiana submitted an application under Sections 1422 and 1425 on January 15, 1982, for the approval of an UIC program governing Classes I, II, III, IV and V injection wells to be administered by the Louisiana Department of Natural Resources (LDNR). On February 4, 1982, EPA published notice of its receipt of the application, requested public comments, and scheduled a public hearing on the Louisiana UIC program submitted by the LDNR (47 FR 5262). A public hearing was held on March 8, 1982 in Baton Rouge, Louisiana. After careful review of the application and comments received from the public, I have determined that the Louisiana UIC program submitted by the LDNR meets the requirements established by Federal regulations pursuant to Section 1421 of the SDWA, and the provisions of Section 1425 of the SDWA and hereby approve it.

In this application, Louisiana chose not to assert jurisdiction over Indian lands or reservations for purposes of its UIC program. Therefore, the Environmental Protection Agency will, at a future date, prescribe an UIC program governing injection wells on any Indian lands or reservations in Louisiana.

EPA is publishing this approval effective immediately so that Louisiana can begin issuing UIC permits for Classes I–V wells under the UIC program.

The radioactive tracer survey, as described in the Louisiana application and further justification, is approved as a mechanical integrity test under the provisions of 40 CFR 146.08(d) for use in Louisiana.

List of Subjects in 40 CFR Part 123

- Hazardous materials, Indian—lands, reporting and recordkeeping requirements, waste treatment and disposal, water pollution control, water supply, Intergovernmental relations, penalties, Confidential business information.

OMB Approval

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under Section 1422 of the Safe Drinking Water Act of an application by a State, including the optional demonstration relating to oil or natural gas provided for under Section 1425 of such Act, will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

Dated: April 19, 1982.

Anne M. Gorsuch, Administrator.

[FR Doc. 82-11180 Filed 4-22-82; 8:45 am]
BILLING CODE 6560-50-M

40 CFR Part 123

(W-6-FRL 2109-2)

Texas Railroad Commission
Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The State of Texas has submitted an application under Sections 1422 and 1425 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing injection wells related to the production of oil or natural gas (Class II wells, as defined by EPA) and wells used for in situ combustion of fossil fuels or for recovery of geothermal energy, and geothermal wells used for heating or aquaculture to be administered by the Texas Railroad Commission (TRC).

Specifically, instead of meeting the statutory requirements of Section 1421(b)(1) (A) through (D) and representing an effective program to prevent endangerment of underground sources of drinking water, the State of Texas submitted an application under Sections 1422 and 1425 on January 26, 1982, for the approval of a UIC program governing Class II injection wells and wells used for in situ combustion of fossil fuels or for recovery of geothermal energy, and geothermal wells used for heating or aquaculture to be administered by the Texas Railroad Commission (TRC). The State of Texas submitted an application under Sections 1422 and 1425 on January 26, 1982, for the approval of a UIC program governing Class II injection wells and wells used for in situ combustion of fossil fuels or for recovery of geothermal energy, and geothermal wells used for heating or aquaculture to be administered by the Texas Railroad Commission (TRC).

The Texas program for the regulation of all other classes and types of injection wells was approved on January 7, 1982. After careful review of the application and comments received from the public, the Agency has determined that this application meets the requirements of Sections 1422 and 1425 of the Act, and hereby approves it. The State of Texas now has primary enforcement responsibility over all injection wells in the State.

EFFECTIVE DATE: This approval is effective April 23, 1982.

FOR FURTHER INFORMATION CONTACT: Ronald Van Wyk, Ground Water Protection Section, U.S. Environmental Protection Agency, 1201 Elm Street, Dallas, Texas 75270, (214) 767-2774. Copies of the responsiveness summary are available from the above address.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SWDA or Act) establishes a national program to protect underground sources of drinking water from endangerment by underground injections through wells. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State underground injection control (UIC) programs. Section 1422 requires that each State submit an application to administer a UIC program, which must meet the requirements of regulations under Section 1421 to gain EPA approval.

The SDWA was amended on December 5, 1980, to include Section 1425, which establishes an alternative method by which a State may obtain primary enforcement responsibility for those portions of its UIC program related to the recovery and production of oil and natural gas (Class II wells).

EPA is publishing this approval effective immediately so that the Texas Railroad Commission can begin issuing UIC permits for those injection wells under its jurisdiction.

BILLING CODE 6560-50-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

41 CFR Ch. 18, Part 3

[Procurement Notice 82-3]

Regulatory Coverage for the Uniform Contract Format

Dated: March 8, 1982.

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: This document, NASA Procurement Notice No. 82-3, is a clarification of NASA's position regarding post-selection increases in the apparent successful offeror's proposed estimated cost. It revises NASA Procurement Regulation 3.501(b)(3), Uniform Contract Format.

SUPPLEMENTARY INFORMATION: After selection of the apparent successful offeror, it is common practice for the Government negotiator to identify any proposal weakness that must be corrected as a condition of contracting. Historically, some negotiators have viewed the solicitation provision as prohibiting them from recognizing any increases in the contractors' estimated costs resulting from correction of such weaknesses. Since it is not intended that the solicitation provision in NASA Procurement Regulation, Part 3.501(b)(3), Uniform Contract Format, Part I, Section C(30), be viewed in that light, NASA Procurement Notice 82-3 is being issued to revise and clarify the provision accordingly.

List of Subjects in 41 CFR Ch. 18, Part 3

Government procurement.

PART 3—PROCUREMENT BY NEGOTIATION

NASA Procurement Regulation, 41 CFR Ch. 18, Part 3, § 3.501(b)(3), Uniform Contract Format, Part I, Section C(30) is revised to read as follows:

§ 3.501 [Amended]

* * * * *

(b) * * *

(3) * * *

* * * * *

(30) The following provision shall be included in all requests for proposals to be evaluated pursuant to NASA Source Evaluation Board procedures, when award of a cost-reimbursement type contract (with or without incentive arrangements) is contemplated. The purpose of this provision is to advise the offeror(s) selected for final negotiation that they may not unilaterally increase their estimated costs for the reasons cited therein. Government negotiators are cautioned that in those cases where the second exception applies, there may be instances where such costs do not warrant additional fee:

Once the apparent successful offeror has been selected, offeror may not unilaterally increase the estimated costs submitted with its proposal except for:

(a) Changes resulting from updating of the certified cost or pricing data submitted with its proposal;

(b) Costs resulting from the Government's directed correction of identified weaknesses in the offeror's proposal which must be corrected as a condition of contracting; or

(c) Minor changes in the requirements of the requests for proposals. In such cases, the Government will consider only those increases arising from those requirements that are actually affected by the changes (irrespective of whether the changes result in an increase or decrease in the requirements or are initiated by the Government or the offeror) and then only to the extent such changes are identified and justified.

(42 U.S.C. 2473(c)(1))

L. E. Hopkins,
Deputy Assistant Administrator for Procurement.

[FR Doc. 82-11189 Filed 4-22-82; 8:45 am]
BILLING CODE 2510-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 124

Revision of Income Criteria for Eligibility for Uncompensated Services

AGENCY: Health Resources Administration, PHS, HHS.

ACTION: Rule-related notice.

SUMMARY: This notice announces the applicability of the recent revision of the poverty income guidelines to uncompensated services programs administered by health care facilities pursuant to Titles VI and XVI of the Public Health Service Act.

DATE: The revision of the guidelines must be implemented by affected facilities by May 10, 1982.

FOR FURTHER INFORMATION CONTACT: Martin J. Frankel, Director, Division of Facilities Compliance, BHF/HRA, Room 5-22, 3700 East-West Highway, Hyattsville, Maryland 20782; (301)436-7795.

SUPPLEMENTARY INFORMATION: On April 9, 1982, the annual revision of the "Poverty Income Guidelines" was issued, effective upon publication (47 FR 15417). That revision affects, among others, health care facilities that have received construction assistance under Title VI or Title XVI of the Public Health Service Act, 42 U.S.C. 291, et seq., and 42 U.S.C. 300q, et seq., respectively. The regulations applicable to those facilities provide that the eligibility of persons for uncompensated services is to be determined in accordance with the current poverty income guidelines of the Community Services Administration (CSA). See 42 CFR 124.506(a). The recently enacted statute which gave this Department authority to revise the guidelines also provides that any reference in law to the CSA guidelines constitutes a reference to, in this case, the present revision. Pub. L. 97-35, 683(c)(1).

The present uncompensated services regulations were issued based on the CSA statutory framework. That framework provided for a 30-day delay in effective date, which assured the assisted facilities adequate time to revise their uncompensated services procedures to accommodate revisions of the guidelines. Therefore, we are interpreting the regulation as permitting a 30-day delay in the effective date of the poverty income guidelines with respect to their implementation by assisted facilities pursuant to § 124.506(a). Subsequent to May 9, 1982, all assisted facilities to whom that regulation applies must determine eligibility for uncompensated services using the revised income criteria published on April 9.

Robert Graham,
Acting Administrator, Health Resources Administration.

April 21, 1982.

[FR Doc. 82-11285 Filed 4-22-82; 8:45 am]
BILLING CODE 4160-17-M
Cost Allocation Plans for Public Participation under Title XIX of the Social Security Act. It also reflects the transfer of responsibility for review and approval of the plans to the Division of Cost Allocation (DCA) in the Department's regional offices. This responsibility was previously assigned to the Social and Rehabilitation Service which was abolished by Secretarial Order published on March 9, 1977 (42 FR 13282). The current rule has been rewritten so that it is clearer, easier to understand and more specific.

Although these regulations are final, the Department has decided to invite public comments for the reasons described in the preamble to Subpart E. Cost allocation plans, of 45 CFR Part 95, General Administration—grant programs (public assistance and medical assistance), located elsewhere in this issue. Comments may be submitted in the manner described below. If changes are needed as a result of the comments received, those changes will be published in the Federal Register along with the comments received and the Department's responses to those comments.

DATES: Effective date: May 24, 1982. Comment Date: To assure consideration, comments should be mailed by June 22, 1982.

ADDRESS: Address comments in writing to: Director, Office of Procurement and Assistance Policy, Office of Procurement Assistance and Logistics, Office of the Assistant Secretary for Management and Budget, U.S. Department of Health and Human Services, Room 513D, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Comments will be available for public inspection at the above address Monday through Friday from 9:00 a.m. to 5:30 p.m.

FOR FURTHER INFORMATION CONTACT: Edward M. Tracy (202) 245-7411.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was published in the Federal Register on January 22, 1981, at 46 FR 7011, inviting comments on a proposed revision to the Department's regulations on the preparation, submission and approval of State cost allocation plans for public assistance programs. The regulation, Subpart E of 45 CFR Part 95, consolidates on a Department-wide basis all cost allocation requirements for public assistance agencies into a single regulation. Public comments were invited for 45 days ending March 9, 1981. Comments were received from nine State agencies and one association and are discussed in the preamble to Subpart E of 45 CFR Part 95 located elsewhere in this issue.

The Department has determined that this rule is not a "major rule" as defined under Executive Order 12291. Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. The reporting and recordkeeping requirements contained in this regulation have been approved by The Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (Pub. L. 95-551).

The OMB Number for these requirements is 0990-0073. Accordingly, 42 CFR Parts 432 and 433 are amended as set forth below.

Dated: April 1, 1982.

Richard S. Schweiker,
Secretary of Health and Human Services.

PART 432—STATE PERSONNEL ADMINISTRATION
§ 432.60 [Amended]
A. 42 CFR 432.60(c) is removed.

PART 433—STATE FISCAL ADMINISTRATION
B. 42 CFR 433.34 is revised to read as follows:

§ 433.34 Cost allocation.
A State plan under Title XIX of the Social Security Act must provide that the single or appropriate Agency will have an approved cost allocation plan on file with the Department in accordance with the requirements contained in Subpart E of 45 CFR Part 95. Subpart E also sets forth the effect on FFP if the requirements contained in that Subpart are not met.

FR Doc. 82-11111 Filed 4-22-82; 8:45 am]
BILLING CODE 4150-04-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations; Arizona, et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the nation.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1988 (Title XIII of the Housing and Urban Development Act of 1988 [Pub. L. 96-448]), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal this determination is provided through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom
authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1383 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribed how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

BILLING CODE 0718-02-M
FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1986 (Title XIII of the Housing and Urban Development Act of 1986 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided, and the Agency has resolved the appeals presented by the community.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60. Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not prescribe development. Thus, this action only forms the bases for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67
Flood insurance, Floodplains.

The final base (100-year) flood elevations for selected locations are:

AGENCY: Office of the Secretary, HHS.

ACTION: Final rule.

SUMMARY: The "Ethics in Government Act of 1978" (Act), as amended, provides that if the head of a department finds that a former officer or employee of the department has violated provisions of the Act relating to post-employment conflicts of interest, he may prohibit that person from appearing before that department, or from communicating with that department with the intent to influence, on behalf of any person (except the United States) for a period of not more than five years, or to take other appropriate debarment or disqualification action. This regulation establishes procedures to be used by this Department in determining whether debarment or disqualification action is appropriate. The procedures provide for notice and a hearing prior to final action on allegations of misconduct.

FOR FURTHER INFORMATION CONTACT: Darrel J. Grinstead, Assistant General Counsel, Business and Administrative Law Division (202-245-7752).

SUPPLEMENTARY INFORMATION: The Office of Government Ethics has published a general regulation dealing with such administrative enforcement proceedings, 5 CFR 737.27.

Publication of this rule as a proposed rule is not required. 5 U.S.C. 553(b)(3)(A).

List of Subjects in 45 CFR Part 73b
Administrative practice and procedure, conflict of interests.

Title 45 CFR is amended by adding a new Part 73b to read as follows:

PART 73b—DEBARMENT OR SUSPENSION OF FORMER EMPLOYEES

Sec.
73b.1 Scope.
73b.2 Rules and regulations.
73b.3 Reports of violations.
73b.4 Proceedings.
73b.5 Hearings.

§ 73b.1 Scope.
This part contains rules governing debarment or disqualification action against a former officer or employee of the Department, including former and retired officers of the commissioned corps of the Public Health Service, because of violation of the post-employment restrictions of the conflict of interest laws and regulations.

§ 73b.2 Rules and regulations.
This part will be applied in conformance with the standards established by the Office of Government Ethics in its regulations, 5 CFR Part 737, and interpretations thereof. Former officers and employees of the Department may request advice and assistance in compliance with those regulations from the Assistant General Counsel, Business and Administrative Law Division, Department of Health and Human Services.

§ 73b.3 Reports of violations.
(a) If an officer or employee of the Department has reason to believe that a former officer or employee of the Department has violated any provision of 18 U.S.C. 207(a), (b) or (c) or any such officer or employee receives information to that effect, he/she shall promptly make a written report thereof which shall be forwarded to the Inspector General. If any other person has information of such violations, he/she may make a report thereof to the Inspector General or to any officer or employee of the Department.
(b) The Inspector General shall coordinate proceedings under this part with the Department of Justice in cases where it appears criminal prosecution is warranted.

§ 73b.4 Proceedings.
(a) Upon a determination by the Assistant General Counsel, Business and Administrative Law Division, or his/her designee, after investigation by the Inspector General, that there is reasonable cause to believe that a former officer or employee, including a former special Government employee, of the Department of Health and Human Services (former departmental employee) has violated 18 U.S.C. 207(a), (b) or (c), the Assistant General Counsel, or his/her designee, shall cause a copy of written charges of the violation(s) to be served upon such individual, either personally or by registered mail. The charges shall be accompanied by a notice to the former departmental employee to show cause within a specified time of not less than 30 days after receipt of the notice why he/she should not be prohibited from engaging in representational activities in relation to matters pending in the Department, as authorized by 18 U.S.C. 207(j), or subjected to other appropriate debarment or disqualification action under that statute. The notice to show cause shall include:
(1) A statement of allegations, and their bases, sufficiently detailed to enable the former departmental employee to prepare an adequate defense;
(2) Notification of the right to a hearing, and that failure to answer shall constitute a waiver of defense; and
(3) An explanation of the method by which a hearing may be requested.
(b) If a former departmental employee who submits an answer to the notice to show cause does not request a hearing or if the Assistant General Counsel does not receive an answer within the time prescribed by the notice, the Assistant General Counsel shall forward the record, including the report(s) of investigation, to the Assistant Secretary for Personnel Administration (Assistant Secretary). In the case of a failure to answer, such failure shall constitute a waiver of defense.
(c) Upon receipt of a former departmental employee’s request for a hearing, the Assistant General Counsel shall notify him/her of the time and place thereof, giving due regard both to such person’s need for an adequate period to prepare a suitable defense and an expeditious resolution of allegations that may be damaging to his or her reputation.
(d) The presiding officer at the hearing and any related proceedings shall be a federal administrative law judge. He/she shall ensure that the former departmental employee has the following rights:
(1) To self-representation or representation by counsel,
(2) To introduce and examine witnesses and submit physical evidence,
(3) To confront and cross-examine adverse witnesses,
(4) To present oral argument, and
(5) To a transcript or recording of the proceedings, upon request.
(e) The Assistant General Counsel shall designate one or more officers or employees of the Department to present the evidence against the former departmental employee and perform other functions incident to the proceedings.
(f) A decision adverse to the former departmental employee must be sustained by substantial evidence that he/she violated 18 U.S.C. 207(a), (b) or (c). If a judgment of conviction has been entered by a Federal district court
against the former departmental employee for violation of 18 U.S.C. 207 (a), (b) or (c), regardless of whether the judgment is based upon a verdict or a plea of guilty, such judgment of conviction shall be conclusive evidence of a violation of 18 U.S.C. 207 (a), (b) or (c), unless and until the judgment is vacated or reversed on appeal.

(g) The administrative law judge shall issue an initial decision based exclusively on the transcript of testimony and exhibits, together with all papers and requests filed in the proceeding, and shall set forth in the decision findings and conclusions, supported by reasons, on the material issues of fact and law presented on the record.

(h) Within 30 days after issuance of the initial decision, either party may appeal in writing to the Assistant Secretary who in that event shall issue the final decision based on the record of the proceeding or those portions thereof cited by the parties to limit the issues. If the final decision modifies or reverses the initial decision, the Assistant Secretary shall specify the findings of fact and conclusions of law that vary from those of the presiding officer.

(i) If a former departmental employee fails to appear at an adverse initial decision within the prescribed period of time, the administrative law judge shall forward the record of the proceeding to the Assistant Secretary.

(j) In the case of a former departmental employee who filed an answer to the notice to show cause but did not request a hearing, the Assistant Secretary shall make the final decision on the record submitted to him by the Assistant General Counsel pursuant to subsection (b) of this section.

§ 73b.5 Hearings.

(a) Hearings shall be stenographically recorded and transcribed and the testimony of witnesses shall be taken under oath or affirmation. Hearings will be closed unless an open hearing is requested by the respondent, except that if classified information or protected information of third parties is likely to be adduced at the hearing, it will remain closed. If either party to the proceeding fails to appear at the hearing, after due notice thereof has been sent to him/her, he/she shall be deemed to have waived the right to a hearing and the administrative law judge may make a decision on the basis of the record before him/her at that time.

(b) The rules of evidence prevailing in courts of law and equity are not controlling in hearings under this part. However, the administrative law judge shall exclude evidence which is irrelevant, immaterial, or unduly repetitious.

(c) Depositions for use at a hearing may, with the consent of the parties in writing or the written approval of the administrative law judge be taken by the Assistant General Counsel or the respondent or their duly authorized representatives. Depositions may be taken upon oral or written interrogatories. There shall be at least 10 days written notice to the other party. The requirement of a 10-day written notice may be waived by the parties in writing. When a deposition is taken upon written interrogatories, any cross-examination shall be upon written interrogatories. Copies of such written interrogatories shall be served upon the other party with the notice, and copies of any written cross-interrogation shall be mailed or delivered to the opposing party at least 3 days before the date of taking the depositions, unless the parties mutually agree otherwise. Expenses in the reporting of depositions shall be borne by the party at whose instance the deposition is taken.

Richard S. Schweiker,
Secretary.
Comments should be mailed by June 22, 1982.

ADDRESS: Address comments in writing to: Director, Office of Procurement and Assistance Policy, Office of Procurement and Assistance Policy, Office of the Assistant Secretary for Management and Budget, U.S. Department of Health and Human Services, Room 513D, Hubert H. Humphrey Building, 200 Independence Avenue, SW, Washington, D.C. 20201.

Comments will be available for public inspection at the above address Monday through Friday from 8:00 a.m. to 5:30 p.m.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rule Making was published in the Federal Register on January 22, 1981 at 46 FR 7011, inviting comments on a proposed revision to the Department's current regulations on the preparation, submission and approval of State cost allocation plans for public assistance programs. The regulation, Subpart E of 45 CFR Part 95, consolidates on a Department-wide basis all cost allocation requirements for public assistance agencies into a single regulation. Public comments were invited for 45 days ending March 9, 1981. Comments were received from nine State agencies and one association and were considered in the development of the final regulation.

In the intervening period of time, however, a number of changes have been introduced that have necessitated revisions to the Notice of Proposed Rulemaking. In addition, a Guide designed to assist States in the preparation and implementation of cost allocation plans for public assistance agencies has been developed with the assistance of a number of States and is being circulated for comment to all States. We believe it appropriate, therefore, that this regulation be issued as interim final to give the public an opportunity to comment and recommend additional changes. Commentators may also wish to address the General Accounting Office findings in their Report HRD–81–51 issued May 18, 1981 recommending that more detailed standards be included in the regulation. Comments are also solicited regarding the flexibility provided in this regulation that allows for a variety of State organization alignments, program configurations and accounting structures currently in existence that are adequate or inadequate. Comments or changes that should be made to assist States in preparing and obtaining approved cost allocation plans, while assuring the necessary documentation as required for audit purposes, are desirable. The suggested areas of consideration for comment should not be construed as restricting comments to those areas; all comments will be considered.

The Notice of Proposed Rulemaking was published before the Administration proposed or Congress established seven block grant programs in the Omnibus Budget Reconciliation Act of 1981 [Pub. L. 97–35]. The Notice of Proposed Rulemaking included Title XX of the Social Security Act which is now a part of the Social Services Block Grant. Since the block grant regulations deleted all regulations in 45 CFR Part 1395 and Part 1396, the references to Title XX are removed from this rule. The Social Services Block Grant will be treated as a State operated program for cost allocation purposes and the State need only separate the Title XX Block Grant costs from those incurred under other programs. In addition, 45 CFR 1392.64 contains a cross reference to 45 CFR 1395.2 in establishing cost allocation requirements for Service Programs for Families and Children under Parts A and B of Title IV of the Social Security Act. Since Part 1395 has been removed as of October 1, 1981, 45 CFR 1392.64 has been revised to reference Subpart E of 45 CFR Part 95.

The comments to the Notice of Proposed Rulemaking were generally favorable, especially with respect to consolidating the cost allocation requirements in one location, strengthening and simplifying the cost allocation plan approval process and in simplifying the cost disallowance and appeal process. The following summarizes and discusses the public comments and the major changes made in the regulation in consideration of these comments:

1. Scope

Comment: The regulations do not indicate whether the approval of a cost allocation plan by the Department's regional Divisions of Cost Allocation (DCAs) also applies to programs of other Federal Agencies.

Response: The Office of Management and Budget Circular A–87 requires that a single Federal agency (referred to as the "cognizant agency") be designated to approve a State agency's cost allocation plan on behalf of all Federal agencies. A list of cognizant agencies was published in the Federal Register on February 28, 1980 at 45 FR 13395. Since this subject is adequately covered in these documents, it is not necessary that it also be addressed in this regulation.

2. Definitions

Comment: The definition of "administrative costs" is too broad since it would include the direct delivery of social services by State agency staffs. These costs are a direct program cost and should therefore be excluded from the definition of administrative costs so that there is not a distortion of the true administrative costs of the Title XX program.

Response: Pub. L. 97–35 has since established the Title XX Social Services Block Grant. Also, the term "administrative costs" has been changed in the interim final rule to clarify the intended meaning and to eliminate any possible confusion. "State agency costs" include all costs normally identified as "indirect" as well as costs incurred by the State agency in the direct delivery of services. The Department continues to require the inclusion of all State agency costs in the cost allocation plan in order to ensure that they are properly distributed to the appropriate programs on a consistent basis as required by the cost principles published by OMB.

Comment: The definition of a "State agency" should be clarified to indicate how it applies in situations where there is one large department (i.e., an "umbrella department") that has several operating components or agencies, each of which may administer one or more of the programs identified in § 95.503. Specifically, is the "State agency" defined to be the overall department or is it defined as the individual component or agency.

Response: In those States where this form of organizational arrangement exists, the term "State agency" for purposes of this regulation, is defined to mean the individual component or agency that is directly responsible for the administration of, or supervising the administration of, a program noted in § 95.503. This point has been clarified in the rule.

We recognize, though, that this is a narrow definition but believe that it will simplify the overall cost allocation plan preparation process. For instance, the development of a cost allocation plan will not be required for those components or agencies of a overall department that do not have any direct Federal awards. In addition, in those situations where a cost allocation plan is required for more than one component or agency within the State department, we encourage the consolidation of individual plans into one overall submission wherever possible. We also encourage that the Director, DCA be
consulted during the plan preparation process. Further, where an action is required, the term "State" has been substituted for the term "State agency." This has been done to allow States flexibility in the preparation and submission of required plans and amendments. As stated in the NPRM, the "State agency" would have had to submit its plan directly to the DCA, without clearly allowing the Governor or umbrella agency a role. While we believe that most States will continue to write and submit plans from the agency directly responsible for the administration of the program, this revision will allow alternative processes to be used at State option. In all cases, we would expect the expertise of the State agency administering each program to be reflected in the plan.

3. Cost Allocation Plan Requirements

Comment: Official organizational charts are developed and issued once a year. The requirement of submitting organizational charts with every cost allocation plan submission is therefore an unnecessary additional administrative burden.

Response: The submission of an organizational chart is only required in those instances where a plan or plan amendment is being proposed because of an organizational change that materially affects the distribution of costs (see § 95.509). The submission of an organizational chart depicting the change being proposed to a currently approved plan is necessary to allow for an adequate evaluation of the proposal. In those situations where "official" organizational charts are prepared on an annual basis, the plan or plan amendment submitted should, as a minimum, include an interim chart that clearly reflects the organizational relationships and responsibilities of the units being described in the proposal. The accuracy of the interim chart should be certified by the Director of the State agency.

Comment: The requirement for including the "**estimated cost impact resulting from a proposed change **" should be eliminated or significantly revised. Determining the actual impact would be difficult to predict in a number of cases and, where obtainable, would be prejudicial and only hinder the approval process.

Response: The requirement for the "**estimated cost impact resulting from a proposed change **" was suggested by a Task Force of State finance officers that worked with the Department in developing the regulation. This provision was proposed as a means of simplifying the current procedure that requires the "**estimated costs for an annual period by cost centers or pools which include the costs of all organizational units **". While we agree that the acceptance of the proposed cost allocation procedure should be governed primarily by the equity of the procedure, an indication of the dollar effect of the procedure is useful in determining the scope of the Department's review of the procedure. In all situations it may not be practical to obtain this data without incurring significant additional costs and therefore we have modified the language contained in the Notice. Where it is not practical to obtain this information, the revised language requires that the State agency reach agreement with the DCA on an alternative approach, prior to submitting a cost allocation proposal.

Comment: The regulation should address the submission of cost allocation plans for local government agencies who operate public assistance programs under a "State supervised" system.

Response: We agree with this comment and have modified the regulation by adding a new paragraph § 95.507(b)(7). The current requirements allow for the submission of a cost allocation plan for local public assistance agencies as part of a State agency's cost allocation plan. However, this has generally been limited to one plan for all local agencies within the State. The revised regulation specifically suggests that the affected State agency consult with the DCA on this matter during the development of the cost allocation plan.

Other Matters

The Department's Informal Grant Appeals Procedures (Part 75 of this Title) have also been updated and amended to make them consistent with Subpart E of Part 95 and Part 16 of this Title. Part 75 has been amended to reflect current organizational identifications of various components of the Department and incorporates the cost disallowance/appeal procedure previously addressed in the Notice of Proposed Rulemaking for Subpart E of Part 95 (46 FR 7011). Consequently, proposed rulemaking procedures were considered unnecessary with respect to Part 75. Part 75 with the above modifications will be published in its entirety to facilitate reading.

The Department has determined that this is not a "major rule" as defined in Executive Order 12291. Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities. The reporting and recordkeeping requirements contained in this regulation have been approved by OMB in accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511). The OMB number for these requirements is 0990-0073.

Accordingly, a new Subpart E is added to 45 CFR Part 95 and 45 CFR Parts 75, 205, 232, 302, 304 and 1392 are amended as follows.

Dated: April 1, 1982.
Richard S. Schweiker, Secretary of Health and Human Services.

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

A. 45 CFR 205.150 is revised to read as follows:

§ 205.150 Cost allocation.

A State plan under Title I, IV-A, X, XIV, or XVI (AABD) of the Social Security Act must provide that the State agency will have an approved cost allocation plan on file with the Department in accordance with the requirements contained in Subpart E of 45 CFR Part 95. Subpart E also sets forth the effect on FFP if the requirements contained in that Subpart are not met.

PART 1392—SERVICE PROGRAMS FOR FAMILIES AND CHILDREN: TITLE IV PARTS A AND B OF THE SOCIAL SECURITY ACT

B. 45 CFR 1392.64 is revised to read as follows:

§ 1392.64 Cost allocation.

A State plan for the Child Welfare Services Program and the services program in the territories under Title IV Parts A and B of the Social Security Act must provide that the State agency will have an approved cost allocation plan on file with the Department in accordance with the requirements contained in Subpart E of 45 CFR Part 95. Subpart E also sets forth the effect on FFP if the requirements contained in that Subpart are not met.

PART 232—SPECIAL PROVISIONS APPLICABLE TO TITLE IV-A OF THE SOCIAL SECURITY ACT

§ 232.30 [Amended]

C. The title to § 232.30 is revised as follows:

§ 232.30 Cost of staff of special administrative units.
In addition, 45 CFR 232.30 paragraph (a) is removed, and the (b) preceding the second paragraph is also removed.

PART 302—STATE PLAN REQUIREMENTS

§ 302.16 [Redesignated as § 304.15 and Revised]

D. 45 CFR 302.16 is redesignated as § 304.15 and is revised to read as follows:

A State agency in support of its claims under Title IV-D of the Social Security Act must have an approved cost allocation plan on file with the Department in accordance with the requirements contained in Subpart E of 45 CFR Part 95. Subpart E also sets forth the effect on FFP if the requirements contained in that subpart are not met.

PART 95—GENERAL ADMINISTRATION—GRANT PROGRAMS PUBLIC ASSISTANCE AND MEDICAL ASSISTANCE

E. 45 CFR Part 95 is amended by adding a new Subpart E to read as follows:

Subpart E—Cost Allocation Plans

Sec.
95.501 Purpose.
95.503 Scope.
95.505 Definitions.
95.507 Plan requirements.
95.509 Cost allocation plan amendments and certifications.
95.511 Approval of the cost allocation plan or plan amendment.
95.513 Disapproval of the cost allocation plan or plan amendment.
95.515 Effective date of a cost allocation plan or plan amendment.
95.517 Claims for Federal financial participation.
95.519 Cost disallowance.

Authority: Sec. 1102, 42 U.S.C. 304.15 and is revised to read as

Subpart E—Cost Allocation Plans

§ 95.501 Purpose.

This subpart establishes requirements for:

(a) Preparation, submission, and approval of State agency cost allocation plans for public assistance programs; and

(b) Adherence to approved cost allocation plans in computing claims for Federal financial participation.

§ 95.503 Scope.

This subpart applies to all State agency costs applicable to awards made under Title I, IV-A, IV-B, IV-C, IV-D, IV-E, X, XIV, XVI (AABD), and XIX, of the Social Security Act, and under the Refugee Act of 1980, Title IV, Chapter 2 of the Immigration and Nationality Act (8 U.S.C. 1321 et seq.), and under Title V of Pub. L. 96–422, the Refugee Education Assistance Act of 1980.

§ 95.505 Definitions.

As used in this subpart:

“State agency costs” include all costs incurred by or allocable to the State agency except expenditures for financial assistance, medical vendor payments, and payments for services and goods provided directly to program recipients such as day care services, family planning services or household items as provided for under the approved State program plan.

“Cost allocation plan” means a narrative description of the procedures that the State agency will use in identifying, measuring, and allocating all State agency costs incurred in support of all programs administered or supervised by the State agency.

“FFP” or “Federal financial participation” means the Federal Government’s share of expenditures made by a State agency under any of the programs cited in § 95.503.

“Operating Divisions” means The Department of Health and Human Services (HHS) organizational components responsible for administering public assistance programs. These components are the Social Security Administration, Office of Human Development Services, Office of Child Support Enforcement, Health Care Financing Administration, and Office of Refugee Resettlement.

“Public assistance programs” means the programs cited in § 95.503.

“State” means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam.

“State agency” means the State agency administering or supervising the administration of the State plan for any program cited in § 95.503. A State agency may be an organizational part of a larger State department that also contains other components and agencies. Where that occurs, the expression “State agency” refers to the specific component or agency within the State department that is directly responsible for the administration of, or supervising the administration of, one or more programs identified in § 95.503.

“State Plan” means a comprehensive written commitment by the State agency to administer or supervise the administration of any of the public assistance programs cited in § 95.503 in accordance with all Federal requirements.

§ 95.507 Cost allocation plan requirements.

(a) The State shall submit a cost allocation plan for the State agency as required below to the Director, Division of Cost Allocation (DCA), in the appropriate HHS Regional Office. The plan shall:

(1) Describe the procedures used to identify, measure, and allocate all costs to each of the programs operated by the State agency;

(2) Conform to the accounting principles and standards prescribed in Office of Management and Budget Circular A-67, and other pertinent Department regulations and instructions;

(3) Be compatible with the State plan for public Assistance Programs described in 45 CFR Chapters II, III and XIII, and 42 CFR Chapter IV Subchapter C; and

(4) Contain sufficient information in such detail to permit the Director, Division of Cost Allocation, after consulting with the Operating Divisions, to make an informed judgment on the correctness and fairness of the State’s procedures for identifying, measuring, and allocating all costs to each of the programs operated by the State agency.

(b) The cost allocation plan shall contain the following information:

(1) An organizational chart showing the placement of each unit whose costs are charged to the programs operated by the State agency;

(2) A listing of all Federal and all non-Federal programs performed, administered, or serviced by these organizational units.

(3) A description of the activities performed by each organizational unit and, where not self-explanatory an explanation of the benefits provided to Federal programs.

(4) The procedures used to identify, measure, and allocate all costs to each benefit program and activity (including activities subject to different rates of FFP).

(5) The estimated cost impact resulting from the proposed changes to a previously approved plan. These estimated costs are required solely to permit an evaluation of the procedures used for identifying, measuring, and allocating costs. Therefore, approval of the cost allocation plan shall not constitute approval of these estimated costs for use in calculating claims for FFP. Where it is impractical to obtain this data, an alternative approach should then be negotiated with the Director, DCA, prior to submission of the cost allocation plan.
§ 95.509 Cost allocation plan amending or amendments.

(a) The State shall promptly amend the cost allocation plan and submit the amended plan to the Director, DCA if any of the following events occur:

(1) The procedures shown in the existing cost allocation plan become outdated because of organizational changes, changes in Federal law or regulations, or significant changes in program levels, affecting the validity of the approved cost allocation procedures.

(2) A material defect is discovered in the cost allocation plan by the Director, DCA or the State.

(3) The State plan for public assistance programs is amended so as to affect the allocation of costs.

(4) Other changes occur which make the allocation basis or procedures in the approval cost allocation plan invalid.

(b) If a State has not submitted a plan or plan amendment during a given State fiscal year, an annual statement shall be submitted to the Director, DCA certifying that its approved cost allocation plan is not outdated. This statement shall be submitted within 60 days after the end of that fiscal year.

§ 95.511 Approval of the cost allocation plan or plan amendment.

(a) The Director, DCA, after consulting with the affected Operating Divisions, shall notify the State in writing of his/her findings. This notification will be made within 60 days after receipt of the proposed plan or amendment and shall either: (1) Advise the State that the plan or plan amendment is approved or disapproved, (2) advise the State of the changes required to make the plan or amendment acceptable, or (3) request the State to provide additional information needed to evaluate the proposed plan or amendment. If the DCA cannot make a determination within the 60-day period, it shall so advise the State.

(5) For purpose of this subpart, State agency cost allocation plans which have been approved by an authorized official of the Department of HHS prior to the effective date of this regulation are considered approved until such time as a new plan or plan amendment is required by § 95.509(a).

§ 95.513 Disapproval of the cost allocation plan or plan amendment.

(a) The Director, DCA, shall notify a State in writing of the disapproval of its cost allocation plan or plan amendment. The notification will set forth the reasons for the disapproval and the basic changes required in sufficient detail to enable the State to respond and will inform the State of its opportunity for reconsideration of the determination under 45 CFR Part 75.

(b) If the State in accordance with 45 CFR Part 75, wishes to request a reconsideration of the DCA's determination, the application for reconsideration must be postmarked no later than 30 days after receipt of the DCA's determination letter.

§ 95.515 Effective date of a cost allocation plan amendment.

As a general rule, the effective date of a cost allocation plan amendment shall be the first day of the calendar quarter following the date of the event that required the amendment (See § 95.509). However, the effective date of the amendment may be earlier or later under the following conditions:

(a) An earlier date is needed to avoid a significant inequity to either the State or the Federal Government.

(b) The information provided by the State which was used to approve a previous plan or plan amendment is later found to be materially incomplete or inaccurate, or the previously approved plan is later found to violate a Federal statute or regulation. In either situation, the effective date of any required modification to the plan will be the same as the effective date of the plan or plan amendment that contained the defect.

(c) It is impractical for the State to implement the amendment on the first day of the next calendar quarter. In these instances, a later date may be established by agreement between the State and the DCA.

§ 95.517 Claims for Federal financial participation.

(a) A State must claim FFP for costs associated with a program only in accordance with its approved cost allocation plan. However, if a State has submitted a plan or plan amendment for a State agency, it may, at its option, claim FFP based on the proposed plan or plan amendment, unless otherwise advised by the DCA. However, where a State has claimed costs based on a proposed plan or plan amendment the State, if necessary, shall retroactively adjust its claims in accordance with the plan or amendment as subsequently approved by the Director, DCA. The State may also continue to claim FFP under its existing approved cost allocation plan for all costs not affected by the proposed amendment.

§ 95.519 Cost disallowance.

If costs under a Public Assistance program are not claimed in accordance with the approved cost allocation plan (except as otherwise provided in § 95.517), or if the State failed to submit an amended cost allocation plan as required by § 95.509, the costs improperly claimed will be disallowed.

(a) If the issue affects the program(s) of only one Operating
Division and does not affect the programs of other Operating Divisions or Federal departments, that Operating Division will determine the amount of the disallowance and will also inform the State of its opportunity for reconsideration of the determination in accordance with the Operating Division’s procedures. Prior to issuing the notification, however, the Operating Division shall consult with the DCA to ensure that the issue does not affect the programs of other Operating Divisions or Federal departments.

(2) If the State wishes to request a reconsideration of the Operating Division’s determination, it must submit the request in accordance with the Operating Division’s procedures.

(b)(1) If the issue affects the programs of more than one Operating Division, or Federal department or the State, the Director, DCA, after consulting with the Operating Divisions, shall determine the amount inappropriately claimed under each program. The Director, DCA, will notify the State of this determination, of the dollar amount of the determination on the claims made under each program, and will inform the State of its opportunity for reconsideration of the determination under 45 CFR Part 75. The State will subsequently be notified by the appropriate Operating Division as to the disposition of the funds in question.

(2) If the State, in accordance with 45 CFR Part 75, wishes to request a reconsideration of the DCA’s determination, the application for reconsideration must be postmarked not later than 30 days after receipt of the DCA’s determination letter. In considering an appeal under this process, the Regional Director shall consult with HHS Operating and Staff Divisions as appropriate.

F. 45 CFR Part 75 is revised to read as follows:

PART 75—INFORMAL GRANT APPEALS PROCEDURES

Subpart A—Indirect Cost Appeals

Sec.
75.1 Purpose.
75.2 Scope.

Subpart A—Indirect Cost Appeals

§ 75.1 Purpose.

This subpart establishes informal procedures for resolving disputes arising in the negotiation of indirect cost rates and certain other cost allocations (as set forth in § 75.2) that are used in determining amounts to be reimbursed under grants awarded by the Operating Divisions of the Department of Health and Human Services. A grantee must exhaust the procedures set forth in this subpart prior to appealing a disputed issue(s) to the Departmental Grants Appeals Board under Part 16 of this subtitle.

§ 75.2 Scope.

(a) This subpart applies to all disputes arising from determinations made by a Director, Division of Cost Allocation (DCA), in the Department’s regional offices including, but not limited to:

(1) Indirect cost rates negotiated with colleges and universities, State and local government agencies, hospitals, and non-profit institutions.

(2) Patient care rates and amounts associated with the care of patients participating in research programs supported by the Department.

(3) Cost allocation plans negotiated with State and local units of government other than plans provided for under paragraph (a)(5) of this section.

(4) Fringe benefit rates, computer rates or costing methodologies and other special rates negotiated with colleges and universities, State and local government agencies, hospitals, and non-profit institutions.

(5) Cost allocation plans with State public assistance agencies as described in Subpart E of 45 CFR Part 95.

(6) Disallowances by the Director, DCA, of costs as described in Subpart E of 45 CFR Part 95.

(b) Notwithstanding paragraph (a) of this section, this subpart shall not be applicable to disputed issues which are appealed to the Armed Services Board of Contract Appeals under a contract with the Department.

§ 75.3 Definitions.

For purposes of this subpart:

(a) "Grantee" means the agency institution or organization named as grantee in a grant award document issued by an Operating Division of the Department. For disputes involving cost allocation plans, this term also includes a State or local unit of government which includes an agency that is named as grantee in a grant award document and a State agency as defined in Subpart E of 45 CFR Part 95.

(b) Other terms shall have the meaning set forth in Part 74 of this title, unless the context below indicates otherwise.

§ 75.4 Notification.

Where an agreement cannot be reached between the Director, DCA, and the grantee, the Director, DCA will promptly notify the grantee in writing of the Director’s determination. This notification will set forth the reasons for the determination in sufficient detail to enable the grantee to respond and will inform the grantee of its opportunity for reconsideration under this subpart.

§ 75.5 Submission to the Regional Director.

If the grantee wishes to request reconsideration of the Director’s determination, it may submit an application for such reconsideration to the Regional Director. The grantee’s application must be postmarked or hand delivered no later than 30 days after receipt of the notification described in § 75.4. The Regional Director, however, may grant an extension of time for submission of the application if the extension is requested and justified by the grantee. Although the application need not follow any prescribed format, it must clearly identify the issue(s) in dispute and must contain a full statement of the grantee’s position on such issue(s) along with pertinent facts and reasons in support of its position.

§ 75.6 Action by the Regional Director.

(a) Upon receipt of an application for reconsideration, the Regional Director will immediately notify the grantee that its application has been received and will be acted upon as soon as possible.

(b) The Regional Director will review all background material on the issue(s). Within 30 days after receipt of the grantee’s application, and with at least 10 days’ written notice, the grantee will be provided the opportunity to meet with the Regional Director to discuss the issue(s) and to submit additional information in support of its position. The Regional Director may consult the DCA, other regional officials, Departmental central office officials, and other individuals in conducting the review.

(c) Within 45 days after the meeting described in § 75.6(b) or 45 days after submission of any supplemental information provided by the grantee) the Regional Director will notify the grantee in writing of the decision, in accordance with the provisions of § 74.304 of this title. If the Regional Director’s decision is adverse to the grantee’s position, this notification will state the basis of the decision and will inform the grantee of its right to appeal the decision to the Departmental Grants Appeals Board under Part 16 of this title.

(d) The Regional Director may delegate the responsibilities described in this section to another senior

47 CFR Part 90
Interconnection of Private Land Mobile
Radio Systems With the Public
Switched Telephone Network in
Certain MHz Bands
AGENCY: Federal Communications
Commission.
ACTION: Final rule.

SUMMARY: This document adopts new
rules to enable private radio
communication systems licensed under
part 90 in the 800 MHz bands to
interconnect with the facilities of the
public switched telephone network.
These rules are necessary to enable
private licensees to better utilize their
radio systems by allowing
interconnected operation under certain
conditions. An accompanying petition for
rulemaking is dismissed as moot.
DATES: Effective May 17, 1982.

In the matter of amendment of Part 90
of the Commission's rules to prescribe
policies and regulations to govern the
interconnection of Private Land Mobile
Radio Systems with the Public Switched
Telephone Network in the Bands 806-
821 and 851-866 MHz, Docket No.
20846.
Second Report and Order
Adopted: March 18, 1982.
Released: April 8, 1982.

I. Introduction
1. We initiated this proceeding to
develop new regulations to govern the
interconnection (I/C) of private land
mobile radio systems (PLMRS) licensed under Part 90 of our rules with the
facilities of the public switched
telephone network (PSTN), Notice of
Inquiry and Notice of Proposed Rule
Making, Docket No. 20846, 41 FR 28540
(July 12, 1976). In our First Report and
Order we adopted new policies and
rules to govern the I/C of private
systems authorized in the bands below
512 MHz. We decided, however, to
to postpone a decision on I/C of private
systems licensed in the 800 MHz bands.

2. On reconsideration of the First
Report and Order, we modified and
clarified some of the policies and rules
we first adopted. However, we left
undisturbed our decision to inquire
further before amending the regulations
to govern I/C at 800 MHz. For
that purpose we issued a Further Notice
of Proposed Rule Making. We have
considered the issues outlined in the
Further Notice and our conclusions
concerning I/C for private systems at
800 MHz are specified in this Second
Report and Order.

II. Background
3. In Docket No. 18262 we adopted the
allocation plan for the 800 MHz bands.
This plan sought to optimize spectrum
usage by allocating spectrum according
to the type of land mobile technology
(i.e., "system") employed. This systems
approach was chosen over the "block"
allocation approach, which allocates
frequencies according to categories of
usage. Block allocation was employed to
divide the spectrum among private users
operating below 512 MHz, e.g., Police
Radio Services, Fire Radio Service,
Special Emergency Radio Service,
Power Radio Service, etc.
4. Docket No. 18262 envisioned that
"dispatch" was to be the primary mode
of communication for 800 MHz
conventional and trunked systems
operated by private users. To provide
for the development of mobile
telephone capability for the general
public, 40 MHz of spectrum was
allocated to common carriers for the
development of cellular systems.
However, recognizing that private radio
systems needed some radiotelephone
capability, we decided to permit I/C
capability with the PSTN on an ancillary
basis. In light of the history of Docket
No. 18262 and the I/C rules already
adopted for below 512 MHz, we devised
the following issues in the Further
Notice to explore the permissible
options for I/C at 800 MHz:
(a) The needs and requirements of eligibles
and licensees in the Public Safety, Industrial,
and Land Transportation Radio Services for
interconnected systems licensed in the 806-
811 MHz and 885-866 MHz bands, including
conventional and trunked systems.
(b) The impact, if any, of this proposal on
the Commission's overall regulatory program
for the 800-847 MHz band. We are
particularly interested in comments on the
potential impact of interconnection as now
allowed in the bands below 800 MHz on the
Commission's spectrum efficiency and
service objectives which formed the bases for
our decision in Docket No. 18262.
(c) Whether the geographic limitations on
interconnection we have adopted for the
Automobile Emergency, Business, Special
Emergency, Special Industrial, and Taxicab
Radio Services for the lower bands should
also be made to apply at 800 MHz, since the
frequency shortage constraints above 800
MHz are not as severe as in the bands below
800 MHz.

5. Comments and replies were filed and
have been considered. Now we resolve
the issues concerning I/C at 800
MHz and amend our rules to reflect the
decisions we have reached.

6. The parties filing comments and replies
are listed at Appendix A. In referring to these
to our decision, we will use the abbreviated titles also
set out at Appendix A.

7. The rules as amended are set out at Appendix B.
In their comments, API and UTC incorporate
requests seeking, in effect, reconsideration of
actions taken in our First Report and Order in
Docket No. 20846. We disposed of their
demands on reconsideration in our November 23, 1979,
Memorandum Opinion and Order, Docket No.
20846, supra n.3. Accordingly, except where
appropriate, we will not address these points
further. Additionally, UTC and the California
Mobile Radio Association (now the National Mobile
Radio Association, herein CMRA) in separate
pleadings, ask for reconsideration or clarification of
Continued
III. I/C Options

A. Status Quo

6. One option for interconnected service at 800 MHz is the status quo. This would mean essentially that the rules and policies presently in force would govern I/C for 800 MHz operations. The principal rule provision, § 90.477(c), 47 CFR 90.477(c), permits I/C. It may be accomplished “automatically,” but only at the licensee’s “principal office of place of business” and at a “fixed point” in the licensee’s system of communication where “a person directly responsible for the operation of the base station or stations is on duty” and applicable transmitter control requirements are met. I/C under supervision of mobile operators is not allowed. Finally, there are no geographic limitations on I/C service, such as those that apply in the bands below 512 MHz.

B. Same as Below 512 MHz

7. Another option is to follow the 512 MHz I/C plan. This permits I/C in manual and automatic modes and also allows I/C in specially designed systems where transmitter control is under the supervision of the licensee’s mobile operators. Furthermore, I/C at common points is allowed in systems that are “cost shared.” Common point I/C is not permitted, however, where third parties provide the interface and the telephone facilities on a for-profit basis.

Furthermore, I/C in certain licensee categories and in some urbanized areas is barred. In certain instances there are certain related rules and policies. To the degree appropriate, we will dispose of these requests in this decision. We also have pending several waiver requests that are resolved by the decisions we reach herein.

Section 90.389 reads as follows:

§ 90.389 Restriction on Interconnection. Radio systems licensed under this subpart may be interconnected with wire line facilities of any telephone company; Provided, however, Such interconnection is accomplished at a control point or control station which is situated at a fixed location (not in a mobile unit), licensed to the user, where a person directly responsible for the operation of the base station or stations is on duty, and where all of the applicable requirements set out at §§ 90.461-90.467 are met. Such interconnection may not be accomplished at the base station site or sites; nor may it be accomplished at any location other than the licensee’s principal office or place of business. This shall be construed to bar interconnection at a common location, used for dispatching or for control, by the licensee together with other licensees or users, such as a telephone answering service. Provided further, however, This provision shall not be interpreted to preclude common dispatching from such a location nor the relaying of messages through to mobiles of the licensee by such a dispatcher.

Section 90.461 of the Commission’s rules, 47 CFR 90.461.

Section 90.463 of the rules, 47 CFR 90.463(a), (b), and (c).

Section 90.461 of the rules, 47 CFR 90.461.

requirements to use equipment with special design features.

8. Alternative plans for interconnected service were contemplated. Thus, we inquired as to whether the same geographic limitations applicable to I/C systems below 512 MHz should be used. We noted that the frequency shortage constraints below 512 MHz were not the same as those above 800 MHz. Therefore, the need to employ geographic restrictions might not be applicable at 800 MHz. Comments on these subjects were invited and the parties responded with their own plans and recommendations which we consider in reaching our decision herein.

IV. Discussion of Views of Parties

A. Issue (a): The Need for I/C Service

9. Under Issue (a) the parties explored the needs and requirements of eligibles and licensees in the private land mobile radio services (PLMRS) for I/C service. API, CMS, Metronet, Millicom, S.T.A.R., and UTC say that these needs and requirements are substantial. They point out that generally neither the telephone company nor the FCC’s offer a dispatch-radiotelephone capability that is suitable to their communication needs. They add that in remote areas and rural areas, common carrier service does not even exist. API and Metronet.

10. They state that even in those instances in which carriers offer some form of I/C service to the public, this is generally great demand for it, with “waiting times” in terms of years.” Millicom. Moreover, they conclude, it would be contrary to the public interest to require eligibles in the PLMRS to arrange and pay for separate systems of communication, one for “dispatch” and another for I/C service. This would be the inevitable result if I/C were barred or were limited so as to make it impractical. AG-COM/CM/Commerce and S.T.A.R.

11. Other private users contend that it was erroneous to classify their need for I/C service as “ancillary” or “incidental” to their “dispatch” requirements. Although that may be so in some instances, in most cases the need for I/C service is essential to PLMRS users and users. APCO, API, CMRA, and UTC. Furthermore, they say that while cellular systems may offer the best promise for future radiotelephone service, this alternative means of communication is not available at present and will not be a viable option in most areas for some time to come. S.T.A.R.

12. Notwithstanding these views, TNA contends that the Commission cannot, as a matter of law, allow greater flexibility to the PLMRS licensees or users in I/C arrangements. This follows, TNA argues, from the nature of the 800 MHz allocation plan under which cellular systems were developed for radiotelephone-type service and under which conventional and trunked systems were perfected for “dispatch” operations. In such circumstances, TNA concludes, “need” as a decisional consideration can have little weight— it may be considered, but not unless the 800 MHz allocations are reviewed de novo. The private users do not agree with TNA’s views. They note that there is a recognized balance between the I/C needs of users and of licensees in the PLMRS, and the 800 MHz allocation objectives stated in Docket No. 18262. They point out that we specifically authorized I/C modes of operation for private systems in Docket No. 18262. They contend that neither law nor policy precludes us from exercising reasonable discretion in working out this balance in favor of a more liberal approach to I/C in the private services. APCO, API, CMRA, CMS, Metronet, Millicom an UTC.

B. Issue (b): Impact

1. In General

13. Under Issue (b) the parties addressed the effect of I/C service on our overall 800 MHz regulatory plan that developed in the proceedings in Docket No. 18262. In so doing, they commented specifically on the impact of I/C on the allocation scheme itself, on the systems approach to spectrum management, on spectrum efficiency goals, and on quality of service potential inherent in the plan.

2. Impact on Allocation Scheme

14. AMST, AT&T and TNA point out that the 600 MHz allocation plan envisages a systems approach to spectrum management, with efficient cellular systems designated to serve the needs of the public for nationwide, compatible radiotelephone communications and with conventional and trunked systems designed to meet the requirements of eligibles and licensees in the PLMRS for “dispatch” communications. They say, is the essence of the allocation scheme adopted in Docket No. 18262 and it is the controlling consideration. Furthermore,
AMST states, it was understood that there would be no further reallocation of spectrum from television broadcasting to the land mobile services and this assurance requires that the radio channels already assigned be used efficiently. AMST fears that if permissive I/C operation is allowed it will lead to further demands by PLMRS eligibles for spectrum now allocated to the broadcast services. AMST sees this possibility as a potential inconsistency with the allocation scheme and urges us to reject it.

15. In contrast, licensees and users in the PLMRS see no basic inconsistency between the objectives of the 800 MHz plan and their requests for permissive I/C. They say that the common carriers' position is too narrow. The overruling purpose of the proceedings in Docket No. 18262, they argue, was to provide spectrum resources to permit eligibles in the private services to meet their communication requirements, "whatever they are." API and Millicom. Such requirements, they contend, simply are not limited to "dispatch" transmissions, but legitimately encompass both "dispatch" and I/C modes of operation. This was recognized at the beginning of the Docket No. 18262 proceeding. API. If present restrictions are such as to inhibit licensees and users in the PLMRS from satisfying their communication requirements, this denial is inconsistent with ultimate 800 MHz goals and objectives. There must be, they reason, sufficient flexibility in our administrative processes to allow relief when it is manifestly just and proper and where it clearly advances the public interest. APCO, API, CMRA, CMS, Metronet, Millicom and UTC. Accordingly these parties see no legal bar to permissive I/C in the PLMRS.

3. Impact on Systems Approach

16. AT&T and TNA point out that our 800 MHz plan envisages a systems approach. Thus, cellular systems were especially designed to meet the needs of the public for mobile radiotelephone service. Furthermore, they say that conventional and trunked systems were developed to meet the needs of eligibles in the PLMRS for "dispatch" service. From this they reason that any plan that promotes the I/C mode using 800 MHz conventional or trunked systems detracts from the high degree of spectrum efficiency built into the 800 MHz plan, which was the objective of the systems approach.

17. Private users concede that the 800 MHz plan does embody a systems approach to spectrum management, with cellular systems essentially proposed for radiotelephone traffic and conventional and trunked systems for "dispatch" communications. However, the systems approach never contemplated the exclusion of I/C capability from private systems. In Docket No. 18262, the Commission specifically recognized the need for interconnection of private 800 MHz systems, although certain design limitations were imposed on the implementation of interconnection of private systems (i.e., restrictions on where and how such interconnection might be accomplished). A similar approach of maximizing choices available to users was implicit in the Commission's finding that common carrier cellular operators could provide dispatch services, Second Report and Order, Docket No. 18262, supra, at 761. The private users state that even with interconnection of private systems, conventional and trunked system facilities will remain intact, and that no adverse consequences have obtained from use of the interconnection option under present design limitations. They argue that it is mere speculation to say that adverse consequences could flow from greater design flexibility in implementing interconnection of private systems.

18. Furthermore, Millicom stresses that cellular systems will never be in all geographic locations. Therefore, they conclude that it is unlikely that conflicts will arise that would require denial of permissive I/C for the PLMRS.

4. Impact on Spectrum Efficiency

19. Those opposed to liberalized I/C at 800 MHz argue that such liberalization will have a negative effect on spectrum efficiency. They reason as follows: A major objective of the Commission in working out the details of the 800 MHz allocation plan was to promote spectrum efficiency. The Commission sought to accomplish this objective through a functional approach to spectrum management, with cellular systems designed for radiotelephone operations and conventional and trunked facilities for "dispatch" usages. Permissive I/C upsets in a fundamental way this working predicate of the plan, since it reverses the role that conventional and trunked systems were to play, preventing achievement of the stated spectrum efficiency goal. AMST, AT&T, Bingham and TNA. This would certainly be so, it is contended, because of the nature of radiotelephone-type communications. TNA.

20. They add that the Commission's own studies demonstrate the adverse impact permissive I/C in the PLMRS would have on "dispatch" operations. This mode of operation necessarily involves "dialing" and "hold" times. Delays are also incurred by "switching" through the PSTN. This adds to message length and lessens the air time available to accommodate users. TNA. Furthermore, radiotelephone communication is different from normal "dispatch" traffic because radiotelephone communication is usually longer in duration. Radiotelephone communications are not directed to or from a licensee's dispatcher and associated mobile units, rather these communications are with some third party who is unfamiliar with radio operations and the need for brevity in transmitting. These factors cause "inefficiencies" in spectrum use not present in normal "dispatch" operations and, consequently, such an operational mode would impact adversely on the spectrum efficiency goals set by the Commission in Docket No. 18262. Motorola and TNA.

21. It is further argued that I/C cannot be justified by saying that 800 MHz channels have the capacity to accommodate both "dispatch" and I/C traffic. If there is excess capacity then the prescribed loading levels should be increased and not new types of service added. AMST, AT&T and TNA. They say that it is foolish to argue that trunked systems can be employed to accommodate I/C traffic without adverse impact on spectrum efficiency. Neither trunked nor conventional systems can operate in the I/C mode without decreasing the air time available for "dispatch" messages. This leads to spectrum inefficiencies, in terms of the types of needs conventional and trunked systems were designed to meet.

\[13\] The reference here is to Report No. SMD 77-01, Land Mobile Spectrum Utilization, prepared by Reed, Larson and Tranavitch. That report, in essence, reflects measurements of a particular spectrum sample and gives the percentage of time certain land mobile radio channels were utilized by licensees in the PLMRS. We can agree with TNA's general thesis that the longer an average message length is, the less the number of transmissions that will be possible. However, we do not believe that one may conclude from this or from the report that operation in the I/C mode at 800 MHz would necessarily result in spectrum inefficiency. That conclusion depends on the definition of "efficiency." In the private services "efficiency" is not necessarily equivalent to "channel occupancy." For example, in the Police Radio Service a channel assignment may be "efficiently" used even though there are few messages exchanged during a given time segment. This same usage might be considered "inefficient" in the Business Radio Service. We find nothing in the referenced report that conflicts with the decision we reach here as to the I/C policies in the Part 90 services at 800 MHz.
22. They disagree that uncongested channels in rural areas can be used for I/C operations without adverse impact on spectrum efficiency. Those channels are as much subject to the guiding principles of the Commission’s 800 MHz plan as the ones allocated and assigned in urban areas. If there is excess capacity in rural areas, because the 800 MHz channels are lightly loaded there, that spectrum should be reallocated to services where it is needed. AMST, AT&T and TNA.

23. In contrast, those parties favoring permissive I/C assert that the Commission can permit greater flexibility in the design requirements for I/C systems and that this can be done without any adverse impact on spectrum efficiency. Thus, licensees can be allowed to I/C at their base stations or at any other point as long as they maintain supervision of and control over the use of their facilities. Such design options do not effect efficiency in any way. Metronet and S.T.A.R.

24. They state that at 800 MHz a new class of licensee was created called the Specialized Mobile Radio System (SMRS) licensee. As the entity controlling the base station and the use to which it is put, the SMRS licensee is in a position to eliminate any inefficiencies that might result from operation in the I/C mode. Furthermore, as private carriers, they are free to deny service to any customer whose method of operation results in inefficiencies. In the event I/C is first allowed but later found to conflict with “dispatch” usage, then the offending customer can be “dropped,” thereby eliminating the inefficiency claimed by AT&T and TNA. The Commission could confine I/C service to SMRS’s. If it chose to do this there would be no basis for denial of permissive I/C on the grounds of spectrum efficiency considerations. Metronet and Millicom.

25. Furthermore, they continue, SMRS’s usually have exclusive channel assignments. Therefore, any adverse effect on the capacity of the assignments to support the loading is not pronounced (or those that might be prescribed in the future) can be adjusted among the customers of the SMRS’s. Only customers of the SMRS licensee would be affected because co-channel licensees in adjacent areas are protected by the Commission’s reuse standards. Thus, whatever the impact in terms of spectrum efficiency might be, it can be confined and remedied. Metronet and Millicom. Moreover, it is well established that persons served by private radio facilities have a need to communicate with persons served by the telephone company. If such a need exists and I/C is barred or restricted substantially, it must be assumed that these messages will still have to go through somehow, perhaps relayed by a dispatcher. This method of operation does not promote efficiency. It involves more, not less, air time. It is a consequence the Commission should weigh in deciding this issue on I/C service. AG-COMM/Merced and Metronet.

26. API and UTC point out that in the Petroleum and Power Radio Services, the nature and time of messages transmitted are almost the same for interconnected and non-interconnected radio systems. Therefore, there will be no inevitable adverse impact in terms of spectrum efficiency flowing out of operation in the I/C mode. Moreover, the Commission should not look at spectrum efficiency as an abstract concept. Rather, it should consider it as just one factor to be weighed in determining whether licensees of private systems should be permitted to I/C their facilities. The public interest should be the ultimate test and if it is clear that the public interest would be served best by permissive I/C rules and policies, then that is the proper result.

27. Overall, those favoring permissive I/C conclude that there will be no adverse impact on the spectrum efficiency goals developed by the Commission in Docket No. 18262. To the degree that such an impact may be forecast, the Commission is free to guard against it by suitable measures. These measures do not necessarily include ones as strict as those presently limiting I/C at 800 MHz. APCO, API, Metronet, Millicom and UTC.

5. Impact on Quality or Grade of Service

28. Motorola contends that one of the promises of Docket No. 18262 was a better grade of service for PLMRs operations. Thus, in the bands below 470 MHz there are no formal loading or reuse standards and in many areas the frequencies available are intensively used. At 800 MHz this was to be improved through specific loading and reuse criteria and by limiting licensees to operation in the “dispatch” mode. I/C was to be as an ancillary function. While the loading and reuse criteria will remain in place, Motorola feels that mixing “dispatch” and radiotelephone communications will degrade the quality of service available. These two modes of operation, Motorola says, are incompatible. Therefore, it concludes, to maintain grade of service expectations, extensive use of the available channels for interconnected communications should not be allowed.

29. Other parties say that this is only speculation. They claim that it does not necessarily follow that I/C will impair quality of service expectations. Moreover, they say, quality of service is a subjective concept. If licensees cannot employ authorized radio facilities to meet what they perceive to be their urgent needs and requirements, then the quality of service is very low. Furthermore, if alternative means of meeting I/C requirements do not exist, or if they do but are too costly or ill-suited for operations in the PLMRs, then the result is also unsatisfactory service. APCO, API, CMS, Metronet, Millicom and UTC.

C. Issue (c): Decision Alternatives

1. Status Quo

30. No private user or group supported maintaining the status quo. Some modification of the status quo by liberalizing present practices and policies was thought desirable. APCO, API, Metronet, Millicom and UTC were in favor of giving licensees greater flexibility in the design of their systems, possibly eliminating the requirement to locate the “patch” or “switch” at the “licensee’s principal office or place of business,” and permitting supervision and control of radio operations by mobile operators. On the other hand, there was no great opposition to the status quo from AT&T, Motorola or TNA. In their view, no liberalization of current I/C rules and policies should be allowed since that would be in derogation of the controlling features of the Commission’s allocation plan. They argue that the status quo preserves the “dispatch” character of the 800 MHz plan for private systems yet gives licensees the right to I/C when that mode of operation is important to them. AT&T and TNA.

2. Same as Below 512 MHz

31. We asked whether we should apply at 800 MHz the same geographic limitations imposed on I/C for private systems operating below 512 MHz in particular radio services in the congested urban regions. Motorola stated that it would be impractical to employ these same limitations since at 800 MHz there are no “service blocks.” Other parties thought these measures too restrictive because they deprive eligibles of essential communication capabilities and would prevent use of I/C circuits over trunked systems. They added that most trunked systems are situated in the urban areas where I/C would be barred. Metronet and Millicom.
32. TNA reasons, however, if congestion is a valid ground for barring I/C in the bands below, then it should be applied similarly to bar I/C at 800 MHz. This is so because there is congestion in the same geographic areas for systems operating below 512 MHz and those operating above 800 MHz. Furthermore, it says, there is no basis for following the 512 MHz I/C plan even in suburban (less congested) areas, because the cellular concept is nationwide, i.e., the 800 MHz plan calls for radiotelephone needs to be met in all areas through the use of cellular system technology. Permitting intrusions into the nationwide market for cellular service will frustrate that objective.

33. On the other hand, it was argued that if there is a need for I/C below 512 MHz, then there is a need for such service at 800 MHz because the need for I/C service is not a function of frequency band. TNA counters that what was done for I/C service below 512 MHz does not provide a proper rationale for permitting I/C at 800 MHz because of the significant policy differences underlying the two allocation schemes.

3. Alternative Plans and Recommendations

34. AT&T and TNA recommend that we not take a more liberal approach to I/C service for PLMRS systems at 800 MHz. Private users, however, favor a more liberal approach. They feel that a plan like that followed below 512 MHz might be acceptable, but that it should be modified to accommodate their particular operating requirements at 800 MHz. APCO, API, Millicom and UTC. 35. Others believe that there is no merit in restricting facility design for I/C service to AC-COMM/Merced, CMRA, CMS, Metronet and S.T.A.R. Their basic recommendation is to allow full freedom to design I/C facilities. They feel that if some restrictions are deemed necessary, then they should be made specific, e.g., “time limits” on I/C traffic. However, they say, such limitations should be employed only where the channel assignments are shared by disparate users. They claim that there is no need for such limitations when service is provided by SMRS licensees, where the channel assignment is “exclusive,” and where channel congestion does not exist, e.g., in rural or remote areas. Also, these parties advocate greater flexibility for I/C for trunked systems and in those instances in which the system’s design will accommodate I/C without service degradation, such as, where channels are preselected for use in the I/C mode.

API, CMS, CMRA, Metronet, Millicom, Motorola and UTC.

36. Of particular concern to those favoring permissive I/C are the rather severe restrictions that flow out of the provisions of § 90.389 of the rules, 47 CFR § 90.389. They recommend that we eliminate the ban on mobile operator supervision, and that we drop the requirement that allows I/C only at the “principal office or place of business” of the licensee. Finally, they say that we should not bar I/C completely in any geographic area. However, if we do, they ask us to “grandfather” existing systems to permit recovery of invested capital.

V. Decision

A. Summary of Conclusions and Rationale

37. We have concluded that the public interest would be served by adopting less rigid rules and policies to govern I/C of private systems operating at 800 MHz. Eligibles in the private services should have freedom to use state-of-the-art equipment and system designs and not have them fettered unnecessarily by artificial limitations and restrictions.

38. However, we are placing I/C service on a secondary basis to “dispatch” operations in circumstances in which there is a likelihood that I/C operation could impede the dispatch requirements of co-channel users. Thus, in any instance where there is a serious conflict between operation in the I/C mode and “dispatch” operations of the traditional type, the former must give way to the latter. We feel that this may occur when frequencies are shared with co-channel users. However, where frequencies are assigned for the exclusive use of a single licensee and in trunked systems where a number of frequencies are available to end-users, we do not believe that there is a significant likelihood that dispatch operation will be impeded by I/C. Therefore, in these situations we will permit I/C on a primary basis. Furthermore, this limitation on co-channel users eliminates any concern as to possible negative impacts on the 80 MHz allocation scheme.

39. An interconnection capability permits licensees and users to increase the utility of their private radio systems by facilitating the passage of information from a telephone user to the radio user and vice versa. Electrical interconnection diminishes the possibility of error that exists when an intermediary relays information. It also reduces the time necessary for communication. Therefore, we are permitting I/C at any location with the public network.

40. In some instances, it may also be economically beneficial for a group of licensees or users to share a common means of interconnecting. We will permit such sharing arrangements. However, the rules being adopted expect licensees, either individually or collectively on a non-profit, cost-shared basis, to make arrangements for the telephone service directly with the local telephone company in accordance with any exchange tariff restrictions. Users in a cooperative cost-sharing arrangement may qualify for single customer treatment under such tariffs, and if so, they may as a group employ common interconnected telephone lines. Similarly, if non-profit sharing of telephone lines is permitted under the telephone company’s tariffs, licensees in multiple licensed systems or users in cooperative systems may as a group employ common interconnected telephone lines, provided that no person engaged in the shared use of the common telephone lines profits from the arrangement. However, in a cooperative, cost-shared system, the licensee, under whose license the users are operating and who is responsible for the system, must make all telephone arrangements. With regard to persons employing SMRs, we will permit each licensee to either make an individual arrangement for telephone service or to make arrangements collectively with other licensees on a non-profit cost-shared basis, provided all telephone arrangements are made pursuant to local tariffs. In the case of SMRs, however, we are specifically prohibiting the base station licensee from arranging for the telephone service. In all events, we shall require that no licensee or user may profit from the telephone service. 

41. To meet the need for I/C at 800 MHz the basic I/C plan for private systems operating below 512 MHz will be followed. We will allow three options for operation in the I/C mode: manual interface, automatic I/C under supervision and control of a licensee’s transmitter control operator, and automatic I/C under supervision of mobile operators. However, we have

14 To the extent that exchange tariffs might unreasonably restrict licensees’ and users’ interconnection rights, we retain jurisdiction to address such restrictions on complaint or on our own motion.

15 Under present FCC policies, were such profit to be taken, this party might be classifiable as a resale common carrier. By avoiding earning a profit on the telephone service, licensees will assure the Commission that the private radio services involved are not directly or indirectly involved in common carriage.
modified the below 512 MHz I/C plan somewhat. Thus, at 800 MHz there will be no "geographic" or "service" limitations since as are in force in the lower bands. There is no need for such restrictions because I/C service is placed on a secondary basis to "dispatch" in situations of co-channel sharing. Additionally, at 800 MHz the reuse and loading standards protect against undue impairment of quality of service. Furthermore, we have decided not to impose strict "time limits" on messages. Again, there is no need to do so with I/C on a secondary basis in those situations in which I/C would most likely present a problem.

B. Issue (a): Need

42. Modern society could not function as it does without telephone communications, and information transmitted over private radio facilities often originates from a telephone and vice versa. Without interconnection, transfer of such information between radio and telephone facilities can only be accomplished orally through a third party, with the possibility of errors. For this reason, we concluded in Carterfone, 13 FCC 2d. 420 (1968), that interconnection of private radio and telephone facilities is in the public interest, and it increases the utility both of radio facilities and of the telephone facilities involved. Even parties opposing permissive interconnection herein do not deny this. Their main concern, rather, relates to the way in which interconnection of private systems to telephone facilities should be accomplished i.e., the means and the location of accomplishing interconnection. In sum, the need for interconnection at 800 MHz is clear.

43. We conclude, on the basis of the record herein, that this need for efficient interconnection is not now fully being met, in view of the present interconnection restrictions at 800 MHz. Users and licensees at 800 MHz should have the same range of options and choices available as do users and licensees at other frequencies, including the option of efficient interconnected service. Finally, we reject the notion that interconnected service should only be available in common carrier 800 MHz systems and not in private 800 MHz systems. Such a result would be inconsistent with our treatment of similar issues at other frequencies and it would be inconsistent with our public interest objective of maximizing consumer choice.

C. Issue (b): Impact

44. Opponents of permissive I/C argue that such policies would be inconsistent with the 800 MHz plan adopted in Docket No. 18282. They say that it would adversely impact on the systems approach to spectrum efficiency and result in a loss in quality of service. In contrast, those favoring more liberal I/C believe that the public interest is the standard. They argue that to the degree the record demonstrates that the public interest would be better served by more liberal I/C, we should adopt rules allowing it.

45. We agree that the plan adopted in Docket No. 18282 was designed to meet the needs of users of private services and of common carrier radio services. While dispatch services were primarily identified with the private systems, and interconnected services were primarily identified with common carrier systems, Docket No. 18282 recognized that cross-over of these primary attributes would be permitted; interconnection of private systems would be permitted (under certain limitations which we are addressing herein) and dispatch would be permitted in common carrier radio systems. This latter conclusion was recently affirmed in the Report and Order in CC Docket No. 79–318, 86 FCC 2d 469 (1981). In this order, we affirm the first conclusion, that interconnection will be permitted for private systems.

46. Additionally, we disagree that the use of either conventional or trunked systems to meet the I/C requirements of private users will result in inefficiencies that will destroy the effectiveness of our allocations to the private services for "dispatch" communications. Correlations between operations at 800 MHz in a permissive "I/C-dispatch" mode and the length of air time used is mere speculation. What is not speculative is that permissive I/C at 800 MHz will not undermine our goals and objectives if I/C is properly subordinated to private "dispatch" operations.

47. I/C is already allowed in the 800 MHz bands and it has not adversely affected either our overall allocation scheme or our spectrum efficiency goals. Nor is there any evidence in this rulemaking record that more permissive I/C would lead to such results.

48. We conclude that there are no serious negative impacts on the 800 MHz plan that flow out of permissive I/C. Nevertheless, as a precaution, I/C operation will remain on a secondary basis to "dispatch" in situations in which I/C is likely to result in serious disruption to efficient "dispatch" operation.

D. Issue (c): I/C Plan

1. Selection of Plan

49. We will follow the below 512 MHz I/C plan, but with appropriate modifications. This modified plan is sufficiently flexible to meet demonstrated requirements in the private services at 800 MHz. We reject the status quo approach because it unduly impedes licensees and users in the operation of authorized systems of radio communication. Thus, we reject continuation of the present restriction of 800 MHz interconnection to the licensees' premises, and not at common locations, as unnecessarily inefficient and as denying private radio licensees and users of alternatives which may be economically more desirable. Also, we reject alternative plans advanced by the parties because such plans, like the present restrictions, are inconsistent with our statutory mandate to promote "rapid" and "efficient" communications, 47 U.S.C. 151, and to "encourage the larger and more effective use of radio in the public interest," 47 U.S.C. 303(g).

2. Description of Plan Adopted

50. The adopted plan calls for three design options for I/C systems. I/C may be manual, automatic under the supervision of a transmitter control operator stationed at fixed position, or automatic under the supervision of mobile operators. There will be no geographic or service limitations. Nor will there be any time limit on calls. Finally, there will be no requirement for specially designed monitoring equipment.

51. Additionally, we will eliminate the requirement to I/C only at "the licensee's office or principal place of business." Licensees will be free to I/C their systems anywhere, including offices of telephone answering services, subject to the limitations specified in our new rules. The definition of "interconnection" will be clarified in amended § 90.483, Appendix B. Furthermore, the rules governing transmitter control and those applicable to internal communication systems and to paging systems will continue to apply to operations at 800 MHz. The special provisions governing fixed stations and certain mobile stations, will remain in effect.
effect for 800 MHz operations. To aid in the clarification of our I/C rules, Sections 40.476 and 40.481, 47 CFR 90.479 and 90.481, have been eliminated. The content of these rules is now included in amended §§ 90.477 and 90.483, Appendix B.

52. A new provision is added setting forth the secondary nature of I/C operation at 800 MHz where it applies. Also, we have adopted a rule to make clear under what conditions I/C at the same location by more than one licensee or user is permitted.

3. Specifics of Plan

(a) I/C Secondary to “Dispatch” Operations.

53. A key element for the new plan is our policy decision to place operation in the I/C mode at 800 MHz on a secondary basis to “dispatch” operations in situations in which we believe there is a substantial likelihood that I/C will impede the dispatch requirements of co-channel users. This policy is in harmony with our decisions in Docket No. 18262, and it parallels our discussion in the Further Notice as to the ancillary or incidental nature of I/C systems at 800 MHz. Moreover, this limitation resolves the potential conflicts that AT&T, Motorola and TNA have advanced regarding permissive I/C. Thus, we are creating a mechanism for addressing any adverse impact on the systems approach, on spectrum efficiency goals and objectives, and on service quality expectations, should the need therefor arise. See Amended § 90.477, Appendix B.

54. Under this new policy, a licensee’s I/C operation may not adversely affect another co-channel licensee’s “dispatch” usages. The former must give way to the latter when conflict results. Moreover, if loading levels are increased in a particular area due to modification of our loading standards, then even though I/C operation under prior loading standards may have resulted in satisfactory communications for all, it must be abandoned if the same condition does not result under the revised standard. The same would apply if we reduce mileage separations required for co-channel stations.

55. The technology of trunked systems eliminates the likelihood of conflict because of the availability of multiple frequencies to accommodate user demand. Therefore, there is no need to place I/C on a secondary basis for these systems because it is not likely to impede dispatch use. For stations in adjacent operating areas, current co-channel separation criteria will prevent conflict. Additionally, any conflicts that may arise for licensees sharing a trunked facility are controllable.

56. In sum, our restrictions on the use of interconnected 800 MHz service will assure that there is no adverse impact on the efficiency of private 800 MHz communications. A related argument raised by AT&T and TNA is that the availability to consumers of alternative common carrier and private radio systems which are interconnected with the telephone network might adversely affect the economics of common carrier systems. Such claims are speculative and have not been documented in the record of this proceeding. As was noted earlier, interconnection has long been permitted in both private and common carrier systems, and has given consumers the ability to choose which type of system is better suited to their needs. No evidence has been presented herein to warrant a departure from this established policy. Finally, the end result of these parties’ arguments could be a need for users to maintain dual radio systems, i.e., private systems tailored to their private radio communications needs, and common carrier systems which also employ interconnected radio communications. Such a result would manifestly be inefficient, and inconsistent with the efficiency and effectiveness mandates of this Commission. See, 47 U.S.C. 151 and 303(g).

(b) Design Features.

57. Three design options will be allowed. First, I/C will be permitted manually, where the radio facility is “patched” through to the wire line telephone system by a control operator. In such cases, the control operator must be able to monitor the transmissions and take appropriate steps to remedy unlawful use of the system. This is in accordance with the existing § 90.483(a) 47 CFR 90.483(a), for I/C below 512 MHz.

58. The second option is automatic I/C under supervision of a transmitter control operator, and is in accordance with the existing § 90.483(b) option for below 512 MHz systems. 47 CFR 90.483(b). At 800 MHz, however, will be no requirement for automatic monitoring equipment and the new rules reflect this. This requirement is being eliminated because at 800 MHz I/C service is on a secondary basis to co-channel “dispatch” operations.

59. The third option is automatic I/C under supervision of mobile operators. Once again, because our policy is to accord I/C secondary status to “dispatch” operations, we have greater flexibility in prescribing design specifications, and, therefore, we can eliminate the requirement for special monitoring equipment. See amended § 90.483(b)(2), Appendix B. We also find no need for “alerting signals” for calls originating in the telephone network and no need for “time limits” on I/C transmission. Accordingly, these requirements will be eliminated.

60. There are other reasons for eliminating these requirements. At 800 MHz the operating characteristics of trunked systems are such that they make some of the design features followed below 512 MHz redundant. For example, trunked systems always operate on exclusive channel assignments and there are always electronic means of “alerting” a person that he or she is being called. In these circumstances a prescribed “alerting signal” would serve no useful purpose. Furthermore, conventional systems operated by SMRS’s are “managed” systems, and this makes doubtful the need for time limits other than those imposed by the licensee of the base station. This plan will simplify the design requirements for 800 MHz I/C operations, leaving it to licensees and users to work out the most effective and efficient way to use the assigned channels.

61. Finally, present rules and policies for I/C at 800 MHz require that the interface (“patch” or “switch”) between the private radio systems and public telephone facilities be located at a fixed control point or control station at the licensee’s “principal place of business.” This is a very restrictive measure. For example, it precludes I/C at the base station although there are clear advantages to such I/C. One advantage is that I/C is less costly when it is accomplished at the base station. Furthermore, I/C accomplished at the base station permits duplex operation to be more easily achieved and affords more reliable I/C service. To prevent inhibiting unnecessarily the technological potential of I/C, we will permit it to be accomplished at any location. However, the licensee must make arrangements for the telephone service directly with the telephone company. See Amended § 90.477(a)(2), Appendix B.

(c) Same Location I/C.

62. In some situations, it may be cost efficient for a group of licensees or users to share the means of effectuating interconnection (i.e., a “patch”). Such interconnection will be permitted at any
location, but only under the conditions discussed previously in para. 39. See Amended § 90.477(a)(2), Appendix B.

VI. Miscellaneous Matters

63. In its "Petition for Reconsideration and Clarification," UTC asks that we add language to § 90.475(a)(2) clarifying this rule. They ask us to better define the design requirement for I/C service where mobile and fixed systems are employed with one another. Section 90.475(a)(2), 47 CFR 90.475(a)(2). While this matter does not pertain directly to the issues now under consideration, we feel that the relief asked for can be granted because it falls within the general purview of Docket No. 20846. Furthermore, UTC correctly expresses our intent concerning the meaning of the rule as adopted, and we agree that clarification is needed. Accordingly, the rule provision will be clarified to read as follows:

An internal transmitter control system may be used in conjunction with other approved methods of transmitter control and interconnection so long as the internal transmitter control system, itself, is neither accessed from telephone positions in the public switched telephone network, nor uses dial-up circuits in the public switched telephone network. Licensees with complex communications systems involving fixed systems whose base stations are controlled by such systems may automatically access these base stations through the microwave or operational fixed systems from positions in the PSTN, so long as the base stations and mobile units meet the requirements of Section 90.483 and if a separate circuit is provided for each mode of transmitter operation (i.e., conventional dial-up or internal).

64. In addition, in its "Petition for Clarification," CMRA asks that the provisions of § 90.487(c) be clarified. 47 CFR 90.487(c). This section deals with paging operations. Once again, the subject is not directly related to 800 MHz I/C. For that reason, CMRA's petition was assigned a separate rulemaking number, RM-3633. However, CMRA's request does relate to the general body of rules adopted in Docket No. 20846, and we will address the matter here.

65. CMRA says the rule as drawn leads to confusion because many telephone-type instruments serve dual purposes. For example, the same instrument used to access positions in the PSTN might also be used to connect points in an internal system of communication, although through different electrical circuits. A further example is where the instrument serves both as a regular telephone and as a part of a dial-up transmitter control point, although again through different electrical circuits and using different codes and tones. CMRA suggests that the situations in which the rule's prohibitions apply is unclear. CMRA seeks clarification by adding language to § 90.487(c) so that it would read:

(c) Paging signals may not be transmitted from telephone positions in the public switched telephone network which do not fall under one of the special provisions set forth at paragraphs (a)(2) or (b) above.

66. Our intention was to prohibit paging transmitters from being accessed directly from telephone positions in the PSTN. Although that was allowed under prior policies (telephone positions were treated as dispatch points), the rules adopted in Docket No. 20846 limited the access of paging transmitters to control points in the licensee's system of communication (§ 90.487(a)(1), 47 CFR 90.487(a)(1)); operating positions within an internal system of communication (§ 90.487(a)(2), 47 CFR 90.487(a)(2)); dispatch points within the licensee's system of communication (§ 90.487(a)(3), 47 CFR 90.487(a)(3)); and "dial-up circuits" (§ 90.487(b), 47 CFR 90.487(b)). What CMRA requests would further confuse the matter. Their proposed rule change broadens the term "telephone positions" to include dial-up circuits, operating positions in internal systems of communication, and "dispatch points." This was not our intent.

67. Nevertheless, we feel the rule may be clarified to achieve CMRA's ultimate purpose. Accordingly, we will adopt revised language to read as follows:

(c) Paging signals (tone only as well as tone and voice) may not be transmitted from telephone positions in the public switched telephone network. This limitation, however, shall not be interpreted to bar access to paging transmitters through radio or wireline circuits provided under tariff by the telephone company or any other common carrier or equipped as a transmitter control circuit. This includes, among others, circuits which are integral parts of internal systems of communication; dial-up transmitter control circuits; and dispatch point circuits used in private radio systems. Paging signals may be originated from all such operating positions.

In light of this action, we will by separate order dismiss CMRA's petition in RM-3633 as moot.

VII. Summary and Conclusion
A. I/C Plan

68. The plan adopted for I/C of private 800 MHz systems is a flexible one. It allows system control by either mobile operators or a transmitter control operator stationed at fixed positions. It provides latitude in the choice of interface. It places operation in the I/C mode on a secondary basis to traditional "dispatch" operations in those situations in which there is the greatest potential for conflict. The plan strikes a balance between the objectives of the 800 MHz allocation plan and the I/C needs of licensees and users in the private services.

B. Miscellaneous Matters

69. The petition filed by UTC on December 28, 1979, asking for reconsideration and clarification is being granted. Section 90.475(a)(2), 47 CFR 90.475(a)(2), is hereby amended and clarified. The request of CMRA for clarification of § 90.487(c), 47 CFR 90.487(c), is also being granted. However, its "Petition for Clarification," filed March 13, 1980 will be dismissed in the RM-3633 proceeding.

70. There is no need for certification under the Regulatory Flexibility Act of 1980 because that Act does not apply to rules adopted after July 1, 1981, where the underlying notice of proposed rulemaking, as here, was adopted before that date. See 5 U.S.C. 601.

VIII. Ordering Clauses

71. Accordingly, it is ordered, effective May 17, 1982, That Part 90, 47 CFR Part 90, is amended as shown in Appendix B, attached hereto. The authority for this action is found in Sections 4(i) and 303 of the Communications Act of 1934, as amended. 47 U.S.C. 4(i) 303.

72. It is further ordered, That the Petition for Reconsideration and Clarification filed herein on December 26, 1979, by the Utilities Telecommunications Council is granted. 73. It is further ordered, That this proceeding is terminated.

(Secs. 4. 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303 )

Federal Communications Commission.

§ 90.385 [Amended]
2. Section 90.385(a)(4) is removed.

§ 90.389 [Removed]
3. Section 90.389 is removed.
4. Section 90.477 is revised to read as follows:

§ 90.477 Restrictions on interconnected systems.
(a) In the frequency ranges 806-821 MHz and 851-869 MHz, interconnection with the public switched telephone network is authorized under the following conditions:

(1) Operation in the interconnected mode will be on a secondary basis to dispatch operation. Upon a sufficient showing, the Commission may impose specific or general constraints upon a licensee's privilege of interconnecting a particular system. This restriction will not apply to trunked systems, or on any channel assigned exclusively to one licensee.

(2) Interconnection may be accomplished at any location, through a separate or shared interconnect device. Arrangements for telephone service must be made by each licensee directly with the telephone company either individually, or collectively with other licensees on a non-profit, cost-shared basis. However, arrangements for telephone service may not be made by the base station licensee of a Specialized Mobile Radio System. In all cases, arrangements with the telephone company must disclose the number of licensees and users and the nature of the use.

(b) Interconnection of facilities in the Radiolocation Service (Subpart F) shall not be permitted.

(c) In the frequency ranges below 800 MHz, interconnection with the public switched telephone network is authorized under the following conditions:

(1) Interconnection may be accomplished at any location. However, there may not be interconnection at a common point when the radio equipment is provided by a third party, except where systems are cost-shared on a non-profit basis with costs prorated among the users and third party involvement is limited to sale or lease of radio equipment and to incidental maintenance.

(2) Arrangements for the telephone service must be made by the licensee of the radio facility directly with the telephone company.

(3) In the Special Emergency Radio Service (Subpart C of this part), except for medical emergency systems in the 450-470 MHz band, the Business and Special Industrial Radio Services (Subpart D of this part) and the Automobile Emergency and Taxicab Radio Services (Subpart E of this part), interconnection will be permitted only where the base station site or sites of proposed stations are located 75 miles or more from the designated centers of the following urbanized areas:

(d) Additional frequencies shall not be assigned to enable any licensee to employ a preferred interconnection capability.

§ 90.479 [Removed]
5. Section 90.479 is removed. The substance of the section is contained in amended § 90.477.

§ 90.481 [Removed]
6. Section 90.481 is removed. The substance of the section is contained in amended §§ 90.477 and 90.483.

§ 90.483 Permissible methods and requirements of interconnecting private and public systems of communications.

Interconnection may be accomplished either manually or automatically under the supervision and control of a transmitter control operator at a fixed position in the authorized system of communications or it may be accomplished under the supervision and control of mobile operators.

(a) Where the system is interconnected manually, all transmissions, regardless of their point of origin, must be capable of being audibly monitored at the control point to assure that all communications are permissible.

*The comments of Syntonic Technology, Inc., and Montclair Company were not timely filed.
(b) When the system is interconnected automatically it may be supervised at the control point or in mobile units.

(1) For control point supervision, the following is required:

(i) All transmissions must be capable of being aurally monitored at the control point to assure compliance with rules governing permissible communications.

(ii) When a frequency is shared by more than one system, automatic monitoring equipment shall be installed at the base station to prevent activation of the transmitter when signals of co-channel stations are present and such activation would interfere with communications in progress. Systems on frequencies above 800 MHz are exempt from this requirement.

(ii) For mobile unit supervision, the following is required:

(i) When a frequency is shared by more than one system, automatic monitoring equipment shall be installed at each base station to prevent its activation when signals of other co-channel stations are present and activation would interfere with communications in progress. Systems on frequencies above 800 MHz are exempt from this requirement.

(ii) Initial access from points within the public switched telephone network shall be limited to transmission of a 3 second tone, after which time the transmitter shall close down. No additional signals shall be transmitted until acknowledgment from a mobile station of the licensee is received.

(c) In single frequency systems, equipment shall be installed at the base station(s) which will limit any single transmission from within the public switched telephone network to 30 seconds duration and which in turn will activate the base station receiver(s) to monitor the frequency for a period of not less than three (3) seconds. The mobile station shall be capable of terminating the communications during the three (3) seconds, if necessary.

(d) A timer shall be installed at the base station transmitter(s) which shall limit communications to three (3) minutes. After the three (3) minutes, the system shall close down, with all circuits between the base station and the public switched telephone network disconnected. This provision will not apply to systems licensed in the Police, Fire, Local Government, Special Emergency, Power, Petroleum, Railroad Radio Services, and all systems above 800 MHz. However, systems not using a timer to limit communications to three minutes shall be equipped with one that will close down the transmitters within three minutes of the last transmission.

8. Section 90.475(a)(2) is revised as follows:

§90.475 Operation of internal transmitter control systems in specially equipped systems.

(a) • • •

(1) An internal transmitter control system may be used in conjunction with other approved methods of transmitter control and interconnection so long as the internal transmitter control system, itself, is neither accessed from telephone positions in the public switched telephone network, nor used dial-up circuits in the public switched telephone network. Licensees with complex communications systems involving fixed systems whose base stations are controlled by such systems may automatically access these base stations through the microwave or operational fixed systems from positions in the PSTN, so long as the base stations and mobile units meet the requirements of §90.435 and if a separate circuit is provided for each mode of transmitter operation (i.e., conventional, dial-up or internal).

9. Section 90.487(c) is revised as follows:

§90.487 One-way paging operations in the bands below 512 MHz.

(c) Paging signals (tone only as well as tone and voice) may not be transmitted from telephone positions in the public switched telephone network. This limitation, however, shall not be interpreted to bar access to paging transmitters through radio or wireline circuits provided under tariff by the telephone company or any other common carrier and equipped as a transmitter control circuit. This includes, among others, circuits which are integral parts of internal systems of communication; dial-up transmitter control circuits; and dispatch point circuits used in private radio systems. Paging signals may be originated from all such operating positions.

10. Contents—Part 90 is amended by revising section references as follows:

Reference § 90.399 is removed.

Reference § 90.479 is removed.

Reference § 90.481 is removed.

BILLING CODE 6712–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 12 and 22

Disposal of Forfeited or Abandoned Property

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service amends 50 CFR Part 12 by including a procedure for disposing of property forfeited or abandoned to the United States as a result of the Service's enforcement of a number of Federal wildlife or plant conservation laws. This property, which includes wildlife, plants, vehicles, vessels, aircraft, cargo, guns, nets, traps, and other equipment, is separated into two categories with an appropriate disposal procedure for each. Existing Service procedures based on current Federal Property Management Regulations and Interior Property Management Regulations are used to dispose of all property except wildlife and plants. Wildlife and plants, however, are subject to disposal at the discretion of the Director by one of the following means: return to the wild, use by the Service or transfer to another government agency for official use, donation or loan, sale, or destruction.

This action enables the Service to assure that wildlife and plants are disposed of in accordance with the conservation aims of the statute under which they were obtained while establishing a timely, orderly, and cost efficient disposal procedure. This procedure is needed to eliminate unnecessary expense and overcrowding at government storage facilities and to provide a uniform means of satisfying the needs of a variety of possible users of wildlife and plants upon disposal.

EFFECTIVE DATE: May 24, 1982.

SUPPLEMENTARY INFORMATION:

Background

The U.S. Fish and Wildlife Service is responsible for enforcing a number of wildlife or plant protection laws. Generally, these laws provide for the forfeiture of wildlife, plants, or other property which is involved in a violation. For example, the Endangered species Act of 1973 (ESA) authorizes the

Federal Register / Vol. 47, No. 79 / Friday, April 23, 1982 / Rules and Regulations 17521

(b) When the system is interconnected automatically it may be supervised at the control point or in mobile units.

(1) For control point supervision, the following is required:

(i) All transmissions must be capable of being aurally monitored at the control point to assure compliance with rules governing permissible communications.

(ii) When a frequency is shared by more than one system, automatic monitoring equipment shall be installed at the base station to prevent activation of the transmitter when signals of co-channel stations are present and such activation would interfere with communications in progress. Systems on frequencies above 800 MHz are exempt from this requirement.

(ii) For mobile unit supervision, the following is required:

(i) When a frequency is shared by more than one system, automatic monitoring equipment shall be installed at each base station to prevent its activation when signals of other co-channel stations are present and activation would interfere with communications in progress. Systems on frequencies above 800 MHz are exempt from this requirement.

(ii) Initial access from points within the public switched telephone network shall be limited to transmission of a 3 second tone, after which time the transmitter shall close down. No additional signals shall be transmitted until acknowledgment from a mobile station of the licensee is received.

(c) In single frequency systems, equipment shall be installed at the base station(s) which will limit any single transmission from within the public switched telephone network to 30 seconds duration and which in turn will activate the base station receiver(s) to monitor the frequency for a period of not less than three (3) seconds. The mobile station shall be capable of terminating the communications during the three (3) seconds, if necessary.

(d) A timer shall be installed at the base station transmitter(s) which shall limit communications to three (3) minutes. After the three (3) minutes, the system shall close down, with all circuits between the base station and the public switched telephone network disconnected. This provision will not apply to systems licensed in the Police, Fire, Local Government, Special Emergency, Power, Petroleum, Railroad Radio Services, and all systems above 800 MHz. However, systems not using a timer to limit communications to three minutes shall be equipped with one that will close down the transmitters within three minutes of the last transmission.

8. Section 90.475(a)(2) is revised as follows:

§90.475 Operation of internal transmitter control systems in specially equipped systems.

(a) • • •

(1) An internal transmitter control system may be used in conjunction with other approved methods of transmitter control and interconnection so long as the internal transmitter control system, itself, is neither accessed from telephone positions in the public switched telephone network, nor used dial-up circuits in the public switched telephone network. Licensees with complex communications systems involving fixed systems whose base stations are controlled by such systems may automatically access these base stations through the microwave or operational fixed systems from positions in the PSTN, so long as the base stations and mobile units meet the requirements of §90.435 and if a separate circuit is provided for each mode of transmitter operation (i.e., conventional, dial-up or internal).

9. Section 90.487(c) is revised as follows:

§90.487 One-way paging operations in the bands below 512 MHz.

(c) Paging signals (tone only as well as tone and voice) may not be transmitted from telephone positions in the public switched telephone network. This limitation, however, shall not be interpreted to bar access to paging transmitters through radio or wireline circuits provided under tariff by the telephone company or any other common carrier and equipped as a transmitter control circuit. This includes, among others, circuits which are integral parts of internal systems of communication; dial-up transmitter control circuits; and dispatch point circuits used in private radio systems. Paging signals may be originated from all such operating positions.

10. Contents—Part 90 is amended by revising section references as follows:

Reference § 90.399 is removed.

Reference § 90.479 is removed.

Reference § 90.481 is removed.

The heading for §90.483 is revised to read:

§90.483 Permissible methods and requirements of interconnecting private and public systems of communications.
forefeiture of unlawfully imported endangered wildlife, wildlife products, and plants (16 U.S.C. 1540(e)(4)(A)). In addition, some of the laws provide for the forfeiture of guns and equipment used in committing a violation (e.g., the Eagle Protection Act, 16 U.S.C. 666(b)[b] or for the forfeiture of the cargo of a vessel involved in taking wildlife illegally [e.g., the Marine Mammal Protection Act of 1972, 16 U.S.C. 1376(a)].

Wildlife parts, wildlife products, and plants forfeited under these laws for the most part have been stored at Service facilities throughout the United States. Until 1976, there was a patchwork of statutory authority providing for the disposition of forfeited property, usually requiring disposal under the excess and surplus property statutes administered by the General Services Administration (GSA). Property management regulations issued by GSA and the Department were the only rules regarding the methods of disposal. Because most of the property held by the Service was wildlife, almost all of the provisions of both the Federal Property Management Regulations (41 CFR Chapter 101) and Interior Property Management Regulations (41 CFR Chapter 114) were inappropriate for use by the Service. These provisions would have compelled the Service to transfer property to GSA for sale or to allocate property in excess of the Service's needs to other agencies in situations where such action may have been in conflict with existing Service policy.

The Service authority for disposal, however, was consolidated and broadened in 1976 with passage of the Fish and Wildlife Improvement Act of 1978 (FWIA), which states, in relevant part:

(c) Disposal of Abandoned or Forfeited Property. Notwithstanding any other provisions of law, all fish, wildlife, plants, or any other items abandoned or forfeited to the United States under any laws administered by the Secretary of the Interior or the Secretary of Commerce relating to fish, wildlife, or plants, shall be disposed of by the Secretary in such a manner as he deems appropriate (including, but not limited to, loan, gift, sale or destruction). 16 U.S.C. 742(c) (emphasis added).

The FWIA provides the Service with the authority and flexibility to dispose of forfeited or abandoned property, which now totals at least several million dollars, without following any existing GSA procedures or being restricted by limitations found in the statute under which the property was seized.

In a July 21, 1981 (46 FR 4605), the Service proposed a disposal procedure under authority of the FWIA to meet the needs addressed above. The proposed rule invited comments for 30 days ending October 2, 1981.

Summary and Analysis of Comments

The Service received 14 comments on the proposal. The following is a summary of the comments arranged by topic; a discussion of those issues raised under the topic; and the Service's response to those issues, including changes from the proposed rule, except corrections to typographical errors or minor technical or editorial changes.

Because the comments addressed only the disposal of wildlife and plants under the proposal, and not the disposal of other property, the discussion of the comments and the final rule is for the most part similarly restricted.

Definitions

One commenter requested that the Service include definitions of the terms "loan" and "donation." No definition of either term has been included in the final rule because the common meaning of each is intended. The two can be distinguished by the fact that a donation involves the transfer of title. The transfer document that the Service will use to make a loan or donation is explicit on a recipient's rights and responsibilities.

Disposal (generally)

The general impression of the commenters is that the Service has established a suitable procedure for disposing of wildlife and plants. This impression is reinforced by the specificity of the comments, which for the most part address specific issues raised by a particular disposal method, and not with general issues raised by the overall procedure.

One commenter queried, "What is available and where?" The Service currently is completing a final inventory of property subject to disposal. The property now is held at field offices throughout the country. From these locations the Service will initiate disposal. As a result, a new section has been added, § 12.39, which identifies the Service official to contact for additional information. The alternative would be to establish a central repository. However, such a plan may substantially increase the costs a recipient must bear. An item may be shipped from a field office to the central repository and back to a recipient near the field office when it might have been shipped directly from the field office. In the near future, each field office will have computer access to the inventory of all field offices, so that an inquiry made to one will not be restricted to the inventory on hand in that office. A central repository only would increase shipping costs without creating savings or improving service.

The order in which the disposal methods appear is the order the Service will follow generally in determining which method has priority. Return to the wild is the most favored; destruction is the least favored. The other methods, for purposes of priority, are nearly interchangeable. The Service will attempt to avoid destroying items, but as the higher priority uses for an item are exhausted, of necessity, the Service will resort to destruction.

The final rule clarifies the period of time the Service must wait from the date of forfeiture or abandonment before disposal may begin. Live wildlife and plants and any other wildlife or plant that the Director determines is liable to perish, deteriorate, decay, waste, or greatly decrease in value by keeping, or that the expense of keeping is disproportionate to its value may be disposed of immediately. All other property must be held for 60 days before disposal. These are not time periods during which disposal must be completed, as one commenter erroneously assumed, but time periods which designate when disposal may begin. The actual disposal of an item may not be accomplished until a much later date.

Each of the methods of disposing of wildlife and plants is discussed in more detail below. One premise underlies these methods which is stated in § 12.32. The effect of any prior illegality on the subsequent use of wildlife or plants is terminated once they are forfeited or abandoned to the U.S. Prohibitions which rely upon a prior unlawful act, such as the Endangered Species Act's prohibition on the possession of unlawfully taken endangered species, would not apply. Therefore, for example, wildlife that was seized and forfeited or abandoned because it was unlawfully taken would not be subject to prohibitions based on that fact alone (i.e., unlawful taking) upon disposal.

Simply, forfeiture or abandonment eliminates the taint of any prior illegality for the purpose of establishing a violation by the subsequent holder based on that prior illegality.

Upon disposal, however, prohibitions, restrictions, conditions, or requirements imposed by law which apply to a particular species of wildlife or plant remain in effect.

Therefore, for instance, upon disposal a recipient of a specimen listed as "Applicable" in 50 CFR 23.23 under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) which was unlawfully
taken and imported could lawfully possess the item, but must be able to satisfy the requirements of CITES to obtain any necessary documentation.

Return to the Wild (§ 12.34)

At the urging of one commenter, the Service has included a provision to restrict the release of live members of native species of wildlife and the transplantation of native species of plants to suitable habitat within the historical range of the species. (Emphasis added.) One of the legal authorities under which this section is promulgated is Executive Order 11987 (42 FR 26949) entitled "Exotic Organisms," which directs Executive agencies to restrict the introduction of exotic species into natural ecosystems of the U.S. As defined by the Executive Order an exotic species "means all species of plants and animals not naturally occurring, either presently or historically, in any ecosystem of the United States." The intent of E.O. 11987 is clear and a species’ return to the wild in the U.S. should be limited to its historic range.

The same commenter also urged the Service to enlarge the scope of foreign countries in which an exotic species may be returned to the wild. The Service proposed to implement that portion of Article VIII 4(b) of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) which states that, "Where a living specimen is confiscated * * * the Management Authority (i.e., Service) shall, after consultation with the State of export, return the specimen to that State at the expense of that State * * *" That same article of the CITES also authorizes return to "such other place as the Management Authority deems appropriate." Therefore, a provision also has been included to allow return to a country within the historic range of the species which is party to the CITES after consultation with and at the expense of such country.

One commenter wanted the Service to obtain the permission of the appropriate State agency before releasing wildlife. The provision on releasing wildlife and transplanting plants in the U.S. has been changed so that each requires "the permission of the landowner." This limitation in many cases will result in the Service obtaining the approval of a State or Federal agency before a species is returned to the wild. Further, under 43 CFR 24.3 the Service must consult with the State and comply with State permit requirements in connection with programs involving the introduction of wildlife.

Use by the Service or Transfer to Another Agency for Official Use (§ 12.35)

This section has been slightly reworded to allow the Service to transfer items to another agency for the official use of that agency. A list of expected uses is included, that it is not intended to be exhaustive or to preclude an official use not listed.

Several commenters identified what they considered top priority uses within this section. The uses that are listed are not placed in any order and the Service believes it is inappropriate to do so.

First, the priority would depend upon a number of variables, such as the species of wildlife or plant, whether it is alive or dead, whether it is a product or not, etc. Second, because of these variables the potential transference are not likely to be competing for the same items.

Donation or Loan (§ 12.36)

By far the most detailed comments were received on this section. Most objected to restricting a loan or donation to "noncommercial" purposes. First, the Service failed to define the term and several commenters assumed that the recipient would have to qualify as a non-profit organization under Federal tax law. Many organizations which in the past have supported the Service’s efforts to conserve wildlife and plants would not qualify. The Service does not want to discourage their efforts and seeks their continued support and cooperation. Second, the Department of Justice has been working on a Memorandum of Understanding (MOU) to be effective among the Departments of Justice, Interior, Agriculture, and Treasury, concerning the disposition of certain live wildlife illegally exported. One provision of the MOU would enable institutions accredited by the American Association of Zoological Parks and Aquariums (AAZPA) which care for seized wildlife to have the right to receive the wildlife upon forfeiture or abandonment. AAZPA members have been working with the Service for many years to provide care for sick or injured wildlife, frequently at considerable cost to themselves. The care of seized wildlife also is of great concern to the Service and competent, professional care must be assured. The MOU takes a large step in providing such assurance. To prevent any conflicts between the MOU and the disposal regulations, the term "noncommercial" has been deleted from the final rule.

One commenter felt that the procedure for donating or loaning items is susceptible to abuse by the recipients. The Service believes that the transfer document and the Service’s rights under it significantly reduce the likelihood of abuse. Any abuse which may occur should be greatly offset by the benefit of making items generally available for scientific, educational, or public display purposes.

Any item may be donated or loaned for a proper purpose if the recipient can satisfy the requirements of law which may apply to the particular species of wildlife or plant. If the donee/borrower must obtain a permit to possess the item, an application for such a permit must be made when the loan or donation is sought. Contrary to the concerns of one commenter, the distinction between a donation and a loan was not made to restrict the availability of certain wildlife to loans only.

One commenter suggested that systematic zoologists employed by natural history museums, research institutes, universities, and other non-profit organizations be given the first opportunity to receive items from the Service. Other commenters looked at this section and the preceding one and identified other priority users or uses. For the reasons noted earlier, a number of variables affect which method will be used to dispose of a particular item making it inappropriate for the Service to establish rigid priorities. However, the applicant’s purpose for requesting a loan or donation is a factor the Service will take into consideration in choosing among several applicants requesting the same item.

One commenter wanted the Service to include instructions on how to care for items provided to recipients. Where necessary such instructions can be included in the transfer documents, including the identification of experts if they are known. Such instructions would supplement the applicant’s demonstration that adequate care and security for the item can be provided.

Sale (§ 12.37)

Several commenters objected either to the sale of wildlife or plants generally or to the sale of particular species, arguing that sales stimulate demand which increases the pressure on wild populations, resulting in a detrimental effect on the conservation of wildlife or plants. Other commenters recognized that sales generate proceeds which may be used to promote conservation efforts, resulting in a net beneficial effect on the Service’s conservation programs. Some elements of each of these positions the Service believes are correct and they appear in the final rule.
In the Service's opinion, the balance has been reached which Congress sought when granting the Service disposal authority under the FWIA. The Service will sell only wildlife or plants which may be lawfully traded by private individuals in interstate commerce. Therefore, any demand for a particular item also may be met by existing lawful trade apart from sale by the Service. The Service will not be selling any species for which it would be the only source.

The Service is prohibiting disposal by sale of the following wildlife or plants: (1) Migratory birds, (2) bald or golden eagles, and (3) CITES Appendix I specimens. Sale of migratory birds and bald or golden eagles is prohibited because the Service believes that sale is inappropriate when possession and sale of these birds is highly regulated or prohibited by the Migratory Bird Treaty or Eagle Protection Acts in order to conserve them. Disposal of CITES Appendix I specimens was the subject of Resolution 3.14 entitled "Disposal of Confiscated or Accumulated Specimens of Appendix I Species" passed at the third meeting of the Conference of the Parties. That resolution recommended that Parties to the Convention dispose of Appendix I specimens without selling them. Other recommendations on the disposal of Appendix I specimens found in the resolution have generally been adopted in the final rule as well.

Two categories of wildlife would be disposed of by sale in very limited circumstances. One category is species of wildlife or plants listed as "endangered" or "threatened" in 50 CFR 17.11 under the ESA would only be sold if the species or part from the species may be lawfully traded in interstate commerce. This provision would allow the sale of those few species whose entire population is not listed as endangered or threatened and certain threatened species when the species may be sold lawfully in interstate commerce. It would also allow the sale of the parts from certain species, if those parts may be lawfully sold in interstate commerce. The second is wildlife protected by the Marine Mammal Protection Act. The Marine Mammal Protection Act Amendments of 1981 (Pub. L. 97-58, 95 Stat. 979) greatly restricted interstate sale of marine mammals. Again, the final rule allows sale only if the item or species may be lawfully traded in interstate commerce.

By limiting the categories of wildlife and plants subject to sale, the Service believes that pressure will be placed on those species which would be harmed by the Service's entry into the market. For those species not harmed by trade, where forfeiture or abandonment was obtained only as a deterrent, and where demand may be satisfied lawfully in interstate commerce, the Service believes that sale is proper.

For clarity, the final rule states that the proceeds of sale must be used to either reimburse the Service for any costs which by law it is authorized to recover or pay any rewards which by law may be paid from sums the Service receives. Any excess must be deposited in the general fund of the U.S. Treasury. For instance, conservation laws enforced by the Service which incorporate provisions of customs laws relating to the seizure, forfeiture, and condemnation of property for violation of customs' laws, such as the Endangered Species Act, provide limited authority for reimbursement. The customs laws made applicable to the ESA specify the following rules for disbursing proceeds (19 U.S.C. 1613):

The proceeds of sale shall be disposed of as follows:

1. For the payment of all proper expenses of the proceedings of forfeiture and sale, including expenses of seizure, maintaining the custody of the property, advertising and sale, and if condemned by a decree of a district court and a bond for such costs was not given, the costs as taxed by the court.

2. The residue shall be deposited with the Treasurer of the United States as a customs or navigation fine.

The Service expects sales initially to result in substantial reimbursement, allowing the Service to recycle funds into its enforcement program. Once the inventory of stockpiled items is exhausted, sales should be intermittent and the number of items offered should be relatively few.

The agency which will actually conduct the sales has not been determined. However, the Director has been given authority to sell immediately any wildlife or plant for its fair market value after determining that it is liable to perish, deteriorate, decay, waste, or greatly decrease in value by keeping, or that the expense of keeping it is disproportionate to its value. In instances where the Service has seized and immediately obtained forfeiture or abandonment of highly perishable items, such as fresh fish, any undue delay in selling them may cause a rapid decrease in their value. Procedures which will preserve perishables often are expensive and ineffective in preventing a substantial reduction in their market value. While resort to immediate sale should be infrequent, the Lacey Act Amendments of 1981, Pub. L. 97-79, (16 U.S.C. 3371-3378) have increased the penalties for violations involving fish and enforcement is likely to be more vigorous.

Destruction (§ 12.38)

The destruction if items which are not otherwise disposed of remains mandatory. However, no time period has been established during which disposal must be completed. As long as an item has the potential to be disposed of by another method, the Service will be reluctant to destroy the item. Even so, a partial list of items likely to be destroyed include the following: the carcasses of common migratory birds, stuffed iguanas from Mexico (where the iguana is a game species), tainted meat, spoiled fish, etc. The purpose of destruction is not to clear out the Service’s storage facilities, but to eliminate storage costs for items which are not fit for any other method of disposal.

Determinations of Effects of the Rule

The Department of the Interior has determined that this is not a major rule under Executive Order 12291. The Department has also determined that the rules will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act. These determinations are discussed in more detail in a Determinations of Effects which has been prepared by the Service. A copy of that document may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT.”

National Environmental Policy Act

The Service also solicited comments on the draft environmental assessment prepared in conjunction with the proposal. No comments were received. The final assessment is on file in the Service's Division of Law Enforcement, 1375 K Street, N.W., Washington, D.C., and may be examined during regular business hours. This assessment forms the basis for the decision that this final rule is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

List of Subjects in 50 CFR

Part 12

Administrative practice and procedure, Fish, Penalties, Plants (agriculture), Seizures and forfeitures, and Wildlife.
Part 22
Wildlife.

Regulation Promulgation
For the reasons set out in the preamble, Subchapter B, Chapter I of Title 50, Code of Federal Regulations is amended as follows:

PART 12—SEIZURE AND FORFEITURE PROCEDURES

1. The authority citation for Part 12 is revised to read as follows:

2. The table of contents for Part 12 is amended by adding the following entry in sequence:

Subpart D—Disposal of Forfeited or Abandoned Property

Sec.
12.30 Purpose.
12.31 Accountability.
12.32 Effect of prior illegality.
12.33 Disposal.
12.34 Return to the wild.
12.35 Use by the service or transfer to another government agency for official use.
12.36 Donation or loan.
12.37 Sale.
12.38 Destruction.
12.39 Information on property available for disposal.

3. Amend §12.30 by adding the following definition in alphabetical order:

§12.3 Definitions.
“Disposal includes, but is not limited to, remission, return to the wild, use by the Service or transfer to another government agency for official use, donation or loan, sale, or destruction.

4. A new Subpart D is added to read as follows:

Subpart D—Disposal of Forfeited or Abandoned Property

§12.30 Purpose.
Upon forfeiture or abandonment of any property to the United States under this part the Director shall dispose of such property under the provisions of this Subpart D.

§12.31 Accountability.
All property forfeited or abandoned under this part must be accounted for in official records. These records must include the following information:

(a) A description of the item.
(b) The date and place of the item’s seizure (if any) and forfeiture or abandonment.
(c) The investigative case file number with which the item was associated.
(d) The name of any person known to have or to have had an interest in the item.
(e) The date, place, and manner of the item’s initial disposal.
(f) Name of the official responsible for the initial disposal.
(g) Domestic value of the property.

§12.32 Effect of prior illegality.
The effect of any prior illegality on a subsequent holder of any wildlife or plant disposed of or subject to disposal is terminated upon forfeiture or abandonment, but the prohibitions, restrictions, conditions, or requirements which apply to a particular species of wildlife or plant under the laws or regulations of the United States or any State, including any applicable conservation, health, quarantine, agricultural, or Customs laws or regulations remain in effect as to the conduct of such holder.

§12.33 Disposal.
(a) The Director shall dispose of any wildlife or plant forfeited or abandoned under the authority of this part, subject to the restrictions provided in this subpart, by one of the following means, unless the item is the subject of a petition for remission of forfeiture under §12.24 of this part, or disposed of by court order:

(1) Return to the wild;
(2) Use by the Service or transfer to another government agency for official use;
(3) Donation or loan;
(4) Sale; or
(5) Destruction.

In the exercise of the disposal authority, the Director ordinarily must dispose of any wildlife or plant in the order in which the disposal methods appear in this paragraph (a) of this section.

(b) The Director shall dispose of any other property forfeited or abandoned under the authority of this part (including vehicles, vessels, aircraft, cargo, guns, nets, traps, and other equipment), except wildlife or plants, in accordance with current Federal Property Management Regulations (41 CFR Chapter 101) and Interior Property Management Regulations (41 CFR Chapter 114), unless the item is the subject of a petition for remission of forfeiture under §12.24 of this part, or disposed of by court order.

(c) The Director shall dispose of property according to the following schedule, unless the property is the subject of a petition for remission of forfeiture under §12.24 of this part:

(1) Any live wildlife or plant and any wildlife or plant that the Director determines is liable to perish, deteriorate, decay, waste, or greatly decrease in value by keeping, or that the expense of keeping is disproportionate to its value may be disposed of immediately after forfeiture or abandonment; and

(2) All other property may be disposed of no sooner than 60 days after forfeiture or abandonment.

(d) If the property is the subject of a petition for remission of forfeiture under §12.24 of this part, the Director may not dispose of the property until the Solicitor or Attorney General makes a final decision not to grant relief.

§12.34 Return to the wild.
(a) Any live member of a native species of wildlife which is capable of surviving may be released to the wild in suitable habitat within the historical range of the species in the United States with the permission of the landowner, unless release poses an imminent danger to public health or safety.

(b) Any live member of a native species of plant which is capable of surviving may be transplanted in suitable habitat on Federal or other protected lands within the historical range of the species in the United States with the permission of the landowner.

(c) Any live member of an exotic species of wildlife (including injurious wildlife) or plant may not be returned to the wild in the U.S., but may be returned to one of the following countries for return to suitable habitat in accordance with the provisions of §12.35 of this part if it is capable of surviving:

(1) The country of export (if known) after consultation with and at the expense of the country of export, or

(2) A country within the historic range of the species which is party to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (TIA's 8565) after consultation with and at the expense of such country.
§ 12.35 Use by the Service or transfer to another government agency for official use.

(a) Wildlife and plants may be used by the Service or transferred to another government agency (including foreign agencies) for official use including, but not limited to, one or more of the following purposes:

(1) Training government officials to perform their official duties;
(2) Identifying protected wildlife or plants, including forensic identification or research;
(3) Educating the public concerning the conservation of wildlife or plants;
(4) Conducting law enforcement operations in performance of official duties;
(5) Enhancing the propagation or survival of a species or other scientific purposes;
(6) Presenting as evidence in a legal proceeding involving the wildlife or plant; or
(7) Returning to the wild in accordance with § 12.34 of this part.

(b) Each transfer and the terms of the transfer must be documented.

(c) The agency receiving the wildlife or plants may be required to bear all costs of care, storage, and transportation in connection with the transfer from the date of seizure to the date of delivery.

§ 12.36 Donation or loan.

(a) Except as otherwise provided in this section, wildlife and plants may be donated or loaned for scientific, educational, or public display purposes to any person who demonstrates the ability to provide adequate care and security for the item.

(b) Any donation or loan may be made only after execution of a transfer document between the Director and the donee/borrower, which is subject to the following conditions:

(1) The purpose for which the wildlife or plants are to be used must be stated on the transfer document;
(2) Any attempt by the donee/borrower to use the donation or loan for any other purpose except that stated on the transfer document entitles the Director to immediate repossession of the wildlife or plants;
(3) The donee/borrower must pay all costs associated with the transfer, including the costs of care, storage, transportation, and return to the Service (if applicable);
(4) The donee/borrower may be required to account periodically for the donation or loan;
(5) The donee/borrower is not relieved from the prohibitions, restrictions, conditions, or requirements which may apply to a particular species of wildlife or plant imposed by the laws or regulations of the United States or any State, including any applicable health, quarantine, agricultural, or Customs laws or regulations.

(6) Any attempt by a donee to retransfer the donation during the time period specified in the transfer document within which the donee may not retransfer the donation without the prior authorization of the Director entitles the Director to immediate repossession of the wildlife or plants;

(7) Any attempt by a donee to retransfer the loan without the prior authorization of the Director entitles the Director to immediate repossession of the wildlife or plants;

(8) Subject to applicable limitations of law, duly authorized Service officers at all reasonable times shall, upon notice, be afforded access to the place where the donation or loan is kept and an opportunity to inspect it;

(9) Any donation is subject to conditions specified in the transfer document, the violation of which causes the property to revert to the United States;

(10) Any loan is for an indefinite period of time unless a date on which the loan must be returned to the Service is stated on the transfer document; and

(11) Any loan remains the property of the United States, and the Director may demand its return at any time.

(c) Wildlife and plants may be donated to individual American Indians for the practice of traditional American Indian religions. Any donation of parts of bald or golden eagles to American Indians may only be made to individuals authorized by permit issued in accordance with § 22.22 of this title to possess such items.

(d) Edible wildlife, fit for human consumption, may be donated to a non-profit, tax-exempt charitable organization for use as food, but not for barter or sale.

(e) Wildlife and plants may be loaned to government agencies (including foreign agencies) for official use. Each transfer and the terms of the transfer must be documented.

§ 12.37 Sale.

(a) Wildlife and plants may be sold or offered for sale, except any species which at the time it is to be sold or offered for sale falls into one of the following categories:

(1) Listed in § 10.13 of this title as a migratory bird protected by the Migratory Bird Treaty Act (16 U.S.C. 703-712);

(2) Protected under the Eagle Protection Act (16 U.S.C. 666-668d);

(3) Listed in § 23.33 of this title as “Appendix I” under the Convention on International Trade in Endangered Species of Wild Fauna and Flora;

(4) Listed in § 17.11 of this title as “endangered” or “threatened” under the Endangered Species Act of 1973 (16 U.S.C. 1533), unless the item or species may be lawfully traded in interstate commerce; and

(5) Protected under the Marine Mammal Protection Act (16 U.S.C. 1361–1407), unless the item or species may be lawfully traded in interstate commerce.

(b) Wildlife and plants must be sold in accordance with current Federal Property Management Regulations (41 CFR Chapter 101) and Interior Property Management Regulations (41 CFR Chapter 114) or U.S. Customs laws and regulations, except the Director may sell any wildlife or plant immediately for its fair market value if the Director determines that it is liable to perish, deteriorate, decay, waste, or greatly decrease in value by keeping, or that the expense of keeping it is disproportionate to its value.

(c) Wildlife or plants which may not be possessed lawfully by purchasers under the laws of the State where held may be moved to a State where possession is lawful and may be sold.

(d) Wildlife or plants purchased at sale are subject to the prohibitions, restrictions, conditions, or requirements which apply to a particular species of wildlife or plant imposed by the laws or regulations of the United States or any State, including any applicable conservation, health, quarantine, agricultural, or Customs laws or regulations, except as provided by § 12.32 of this part.

(e) The Director may use the proceeds of sale to reimburse the Service for any costs which by law the Service is authorized to recover or to pay any rewards which by law may be paid from sums the Service receives.
§ 12.38 Destruction.

(a) Wildlife and plants not otherwise disposed of must be destroyed.

(b) When destroyed, the fact, manner, and date of destruction and the type and quantity destroyed must be certified by the official actually destroying the items.

§ 12.39 Information on property available for disposal.

Persons interested in obtaining information on property which is available for disposal should contact the appropriate Special Agent in Charge listed in § 10.22 of this title.

PART 22—EAGLE PERMITS

5. The authority citation for Part 22 is revised to read as follows:

§ 22.13 [Reserved]

Dated: March 24, 1982.

P. Craig Potter,
Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 82-11197 Filed 4-22-82; 8:45 am]

BILLING CODE 4310-55-M
This section of the Federal Register contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 351

Reduction in Force

AGENCY: Office of Personnel Management.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Office of Personnel Management is initiating a study of the reduction-in-force (RIF) procedures and their effects with a view toward making regulatory changes where needed. This advance notice invites written comments from all interested parties.

DATE: Written comments must be received on or before May 21, 1982.

ADDRESS: Send or deliver written comments to Richard B. Post, Associate Director, Staffing Group, Office of Personnel Management, Room 6F08, 1900 E Street, NW., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT: Morton I. Horvitz, (202) 632-6817.

SUPPLEMENTARY INFORMATION: Recent agency experience with RIF has raised concerns over RIF procedures and results. These concerns have been voiced by agency management, employees, unions, Congress, and other interested groups.

This notice is to invite recommendations for change from all interested parties. Among areas to be reviewed are competitive levels, tenure groups, bump and retreat, and weight of performance appraisals. However, comments are invited on all aspects of Part 351 and related regulations and Federal Personnel Manual instructions. Information gained during this study will be used to develop proposals for regulatory changes. Such proposals will be issued for public comment in the Federal Register.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 953

Irish Potatoes Grown in the Southeastern States; Proposed Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed continuing rule.

SUMMARY: This proposed continuing rule would require fresh market shipments of potatoes grown in designated counties of Virginia and North Carolina to be inspected and meet minimum grade and size requirements. The regulation should promote orderly marketing of such potatoes and keep less desirable qualities and sizes from being shipped to consumers.

DATES: Comments due May 10, 1982.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077-S, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written comments shall be submitted, and they will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, F&A, AMS, USDA, Washington, D.C. 20250; (202) 477-2615. The Draft Impact Analysis relating to this proposed rule is available upon request from Mr. Porter.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

Information collection requirements contained in this regulation (7 CFR Part 953) have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #0581-0084.

This proposed rule has been reviewed under Secretary's Memorandum 1512-1 and Executive Order 12291 and has been designated a "nonmajor" rule. William T. Manley, Acting Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it would not measurably affect costs for the directly regulated handlers.

Marketing Agreement No. 104 and Order No. 953, both as amended, regulate the handling of potatoes grown in designated counties of Virginia and North Carolina. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) and the Marketing Agreement Act of 1937, as amended (7 U.S.C. 953), and is controlled and operated by the Southeastern Potato Committee, established under the order, is responsible for its local administration.

This proposed continuing regulation is based upon recommendations made by the committee at its public meeting in Norfolk, Virginia, on April 1, 1982.

The proposed grade and size requirements are the same as those which have been issued during past seasons. They are necessary to prevent potatoes of poor quality or undesirable sizes from being distributed to fresh market outlets. The proposal would benefit consumers and producers by standardizing and improving the quality of the potatoes shipped from the production area.

Again the minimum quantity exemption is proposed to be five hundred-weight. This should relieve the burden on handling noncommercial quantities of potatoes and allow direct marketing outlets to operate in greater freedom.

Exceptions are proposed to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

Shipment would be allowed to certain special purpose outlets without regard to the grade, size, and inspection requirements, provided that safeguards were met to prevent such potatoes from reaching unauthorized outlets.

Shipment for use as livestock feed would be so exempt because requirements for this outlet differ greatly from those for fresh market. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments also would be exempt. Also, potatoes for most processing used are exempt under the legislative authority for this part.
These standardization and marketing efficiency types of regulation would have no measurable effect on the quantity of potatoes shipped from Virginia and North Carolina, nor will there be discernable effect on U.S. retail potato prices. This regulation should enable the Southeastern potato industry to better compete with other potato producing areas in the U.S., by ensuring the use of grades and sizes acceptable to buyers.

It is proposed that requirements contained in this proposed handling regulation, effective June 5, 1982, would continue in effect from marketing season to marketing season indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the committee or other information available to the Secretary. Interested persons are invited to comment through May 10, 1982, with regard to the proposed handling regulation. Heretofore, regulations issued under the marketing order were made effective for a single marketing season. However, the same requirements have been imposed each season since 1969. The proposed change to issue regulations which would continue in effect from marketing season to marketing season reflects the fact that regulations would probably continue to change infrequently from season to season and it is believed unnecessary to issue them for only a single season. In addition, the proposed change could result in a reduction in operational costs to the committee and the government. Although the final regulation would be effective for an indefinite period, the committee would continue to meet prior to or during each season to consider recommendations for modification, suspension, or termination of the regulation. Prior to making any such recommendations, the committee would submit to the Secretary a marketing policy for the season in accordance with § 953.40 of the order, including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings or may file comments with the Hearing Clerk until May 20 each year. The Department will evaluate committee recommendations and information submitted by the committee, comments filed, and other available information, and determine whether modification, suspension, or termination of the regulations on shipments of Southeastern potatoes would tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 953
Marketing agreements and orders, potatoes, Virginia, North Carolina.

PART 953—IRISH POTATOES GROWN IN SOUTHEASTERN STATES

§ 953.321 [Removed]
It is proposed that § 953.321 (46 FR 29453, June 2, 1981, and 46 FR 30487, June 9, 1981) be removed and a new § 953.322 be added as follows:

§ 953.322 Handling regulation.
During the period beginning June 5 and ending July 31 each season no person shall ship any lot of potatoes produced in the production area unless such potatoes meet the requirements of paragraphs (a) and (b) of this section or unless such potatoes are handled in accordance with paragraphs (c) and (d) or (e) of this section.
(a) Minimum grade and size requirements. All varieties U.S. No. 2, or better grade, 1 1/2 inches (38.1 mm) minimum diameter.
(b) Inspection. Except as provided in paragraphs (c) and (e), no handler shall ship any potatoes unless an appropriate inspection certificate covering them has been issued by the Federal-State Inspection Service and the certificate is valid at the time of shipment.
(c) Special purpose shipments. The grade, size, and inspection requirements set forth in paragraphs (a) and (b) of this section shall not apply to potatoes shipped for canning, freezing, “other processing” as hereinafter defined, livestock feed or charity, except that the handler of them shall comply with the safeguard requirements of paragraph (d) of this section.
(d) Safeguards. Each handler making shipments of potatoes for canning, freezing, “other processing,” livestock feed, or charity in accordance with paragraph (c) of this section shall:
(1) Notify the committee of the handler’s intent to ship potatoes pursuant to paragraph (c) of this section by applying on forms furnished by the committee for a Certificate of Privilege applicable to such special purpose shipments;
(2) Obtain an approved Certificate of Privilege;
(3) Prepare on forms furnished by the committee a special purpose shipment report for each such individual shipment; and
(4) Forward copies of such special purpose shipment report to the committee office and to the receiver with instructions to sign and return a copy to the committee’s office. Failure of the handler or receiver to report such shipments by promptly signing and returning the applicable special purpose shipment report to the committee office shall be cause for suspension of such handler’s Certificate of Privilege applicable to such special purpose shipments.
(e) Minimum quantity exemption. Each handler may ship up to, but not to exceed, five hundredweight of potatoes any day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any portion of a shipment that exceeds five hundredweight of potatoes.
(f) Definitions. The term “U.S. No. 2” shall have the same meaning as when used in the U.S. Standards for Grades of Potatoes as amended (7 CFR 2851.1540–2851.1568), including the tolerances set forth in it. The term “other processing” has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, dicing, or applying material to prevent oxidation does not constitute “other processing.” All other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 104 and this part, both as amended.
(g) Applicability to imports. Pursuant to section 8e of the act and § 980.1 “Import regulations” (7 CFR 980.1), Irish potatoes of the round white type imported during the effective period of this section shall meet the grade, size, quality, and maturity requirements specified in paragraph (a) of this section.

§ 953.324 [Removed]
It is proposed that § 953.324 (46 FR 30487, June 9, 1981) be removed and a new § 953.325 be added as follows:

§ 953.325 Inspection records.
Each handler shall keep records of all potatoes shipped in accordance with this section and shall maintain those records for a period of one year from the date of billing. Any person violating this section shall be subject to the penalties prescribed in paragraph 953.345 of this part.

Dated: April 19, 1982.
D. S. Kurylofski,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision adopts on an emergency basis proposed amendments to the Georgia, Middle Atlantic, Upper Florida, Tennessee Valley, Tampa Bay, and Louisville-Lexington-Evansville orders. The order changes would provide handlers with limited transportation credits from the marketwide pool for certain Class II and Class III milk transferred or diverted to unusually distant outlets for surplus disposal. The changes, which would apply only through June 30, 1982, were considered at a public hearing held on March 10-17, 1982, in East Point, Georgia. The order changes were requested by cooperative associations that represent dairy farmers who supply milk to the nine markets.

The adopted order changes are necessary to reflect current marketing conditions and to insure that all producers in affected markets share more equitably in the costs of disposing of unusually large supplies of surplus milk that are expected this spring. Marketing conditions are such that prompt amendatory action is required. For this reason, a recommended decision and the opportunity to file exceptions thereto have been omitted. The adopted amendments for each order are as follows:

- For the New Orleans-Mississippi, Greater Louisiana, and Nashville, Tennessee, orders are denied. The marketing problems that warrant order changes in the other six markets under consideration were not found to exist in these three areas.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 559 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

This action will not have a significant economic impact on a substantial number of small entities. The amendments will promote orderly marketing of milk by producers and regulated handlers.

Preliminary Statement

A public hearing was held upon proposed amendments to the marketing agreements and the orders regulating the handling of milk in the aforesaid marketing areas. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at East Point, Georgia, on March 10-17, 1982. Notice of such hearing was issued on March 4, 1982, and published on March 10, 1982 (47 FR 10230).

Interested parties were given until March 24, 1982, to file post-hearing briefs on the proposals as published in the notice of hearing and on whether these proposals should be considered on an expedited basis.

The material issues on the record of the hearing relate to:

1. Whether nine orders should be amended to provide handlers with a transportation credit from the marketwide pool on certain shipments of surplus milk during April, May, and June 1982.

2. Whether emergency marketing conditions in the nine regulated areas warrant the omission of a recommended decision and the opportunity to file written exceptions thereto.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. Transportation credits on surplus milk shipments. The Middle Atlantic, Tampa Bay, Upper Florida, Georgia, Tennessee Valley, and Louisville-Lexington-Evansville orders should be amended to provide handlers with limited transportation credits from the pool on movements of milk to distant manufacturing plants. The credits should be made available as soon as possible and should continue through June 1982. The New Orleans-Mississippi, Greater Louisiana, and Nashville, Tennessee, orders should not be amended. Such credits are not now provided in any of the orders.

Dairymen, Inc. (DI), a dairy farmer cooperative association, proposed amendments to the Middle Atlantic, Georgia, Tennessee Valley, Louisville-Lexington-Evansville, New Orleans-Mississippi, Greater Louisiana, and Nashville orders. The cooperative represents producers whose milk is pooled under each of these orders.

The proposals would provide a transportation credit of 3.6 cents per hundredweight per 10 miles to handlers for Class II and Class III milk moved to nonpool plants outside a specified surplus disposition area for each market. The credit would be deducted from the value of milk in the monthly marketwide pool, which would result in a reduction in the returns to be distributed to those producers whose milk participates in the pool.

The proposed credits would be applicable only for the months of April, May and June 1982.

The proposals would specify for each order an area within which movements of milk to nonpool plants for Class II or Class III uses would not be eligible for a transportation credit. Thus, the credit would apply only to that portion of the hauling that is involved in moving milk from the border of the no-credit area to the nonpool plant. These limitations on credits would vary from order to order.

As proposed for the Middle Atlantic order, transportation credits would apply only on surplus milk moved to nonpool plants located more than 180 miles from Philadelphia, and also more than 200 miles from the nearer of Washington, D.C., or Baltimore, Maryland.

For each of the other orders included in the proposal, credits would apply only on surplus dispositions to nonpool plants located outside a specified area and more than a specified distance from the pool plant from which the milk was transferred. For diverted milk, the distance limitation would apply from the location of the pool plant where the diverted milk was last received. The area-distance combinations proposed for each order are as follows:

Georgia—Outside the States of Alabama, Georgia, Tennessee and South Carolina and more than 225 miles.

Tennessee Valley—Outside the State of Tennessee and more than 125 miles.

Louisville-Lexington-Evansville—Outside the State of Kentucky and the Indiana counties included in the
marketing area of the order and more than 100 miles. 

New Orleans-Mississippi—Outside the marketing area and more than 150 miles.

Greater Louisiana—Outside the States of Louisiana and Mississippi and more than 150 miles.

Nashville—Outside the State of Tennessee and more than 100 miles.

At the hearing, DI modified its proposals contained in the hearing notice to specify that the distance limitation for diverted milk be measured from the pool plant where the milk was last received, or from the county courthouse in the county where the largest portion of the diverted load of milk was produced, whichever was nearer to the nonpool plant where the milk was received for surplus use. Also, DI requested in its post-hearing brief that milk eligible for the proposed transportation credit in a particular market be limited to the milk of dairy farmers who were "producers" on that market during at least one of the preceding months of September through December 1981.

Two dairy farmer cooperatives in Florida—Upper Florida Milk Producers Association and Tampa Independent Dairy Farmers Association, Inc.—proposed similar amendments for the Upper Florida and Tampa Bay orders. Under their proposals, the transportation credits would apply only to shipments to nonpool plants located outside the States of Florida, Louisiana, Mississippi, North Carolina, South Carolina, Alabama, Georgia, Tennessee, and Kentucky. No credit would be applicable for the first 225 miles the milk was shipped.

A spokesman for DI testified that its proposed credits would help ensure that all producers supplying a market would share in the cost of handling unusually large surplus milk supplies this spring. According to the witness, increasing milk production and declining sales of Class I milk in the Southeast will result in more milk having to be moved to distant manufacturing outlets during April, May and June of this year. He stated that the hauling problem is also due in part to the closing of several manufacturing plants over the last several years, which has reduced the capacity to handle surplus milk in the Southeast. DI also held that increased production and reduced fluid milk sales also have produced a serious surplus milk handling problem in the Middle Atlantic market.

In DI's view, the increase in production is due to a general increase in milk output as dairy farmers attempt to maintain their cash flow during a time of economic difficulties. The cooperative's spokesman said he believed that production is up because suitable alternatives to dairy farming are not available under current economic conditions, and that dairy farmers are doing well relative to those engaged in other agricultural enterprises. Thus, he maintained, increased production results not because any particular group of farmers has decided to produce more milk, but rather because almost all dairy farmers are producing more milk.

DI's spokesman introduced an exhibit showing annual milk production for selected states in 1980 and 1981, as well as monthly production data for January 1981 and 1982, and showing the percentage change from the same period a year earlier. The states included are Alabama, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Pennsylvania, Tennessee, and Virginia. He noted that for the 10-state area total milk production in 1981 was up 3.2 percent from 1980, although output was lower in 1981 in Alabama and Louisiana.

In January 1982, combined milk output was up 2.1 percent from a year earlier. Although data for February were not included in the exhibit, the witness stated that February 1982 production in the 10-state area was 2.5 percent above a year earlier. He explained that these 10 states make up the primary supply area for the orders under consideration in this proceeding. He also noted that milk production is up in North Carolina and South Carolina, which also supply some milk for these regulated areas.

DI's spokesman also introduced an exhibit showing total producer milk receipts and producer milk allocated to Class I and Class III (Class II in the Middle Atlantic order) in December 1980 and 1981 for the seven orders that DI proposed to amend. He noted that these data show that producer milk receipts were up 3.2 percent in December 1981 over a year earlier. He indicated that although producer milk assigned to Class I in the seven markets was up 2.1 percent, Class III producer milk was up 4.2 percent from December 1980. He pointed out that this increase in Class I sales was attributable solely to the Georgia order, which he believed was due to the recent pooling of a large, new plant at Murfreesboro, Tennessee, under the Georgia order. Producer milk assigned to Class I uses was below December 1980 in the other six markets.

He also introduced similar data for April 1980 and 1981 for the same purpose, i.e., to demonstrate the production was up and sales were down.

The DI witness stated that in the spring months of 1981 the cooperative had moved some milk to unusually distant outlets for surplus disposal. He indicated that the cooperative did not believe at that time that the problem would recur in 1982 because of expectations that the general trend of production increases would peak during the 1981 full months and then flatten out somewhat at about year earlier levels, and that a reversal of the decline in Class I sales would occur. The witness claimed that although these expectations did not materialize, it was not until after data reflecting the disposition of surplus milk during the 1981 Christmas holidays had been collected that the cooperative concluded there would be an unusually large volume of surplus milk to dispose of during April, May and June 1982. He stated that the cooperative then decided that it should propose changes in the seven orders.

DI contended that absent the proposed changes some handlers (primarily DI) would carry the full burden of disposing of the larger than normal milk supplies in the seven markets this spring. The cooperative's witness stated that DI is a major supplier of milk to fluid milk plants in six of the seven markets (all but Middle Atlantic) and is responsible for handling more than its share of these markets' surplus milk dispositions. He noted that DI balances the daily, weekly, and seasonal fluid milk needs of many plants that receive a portion of their supplies from independent producers. He stated that such plants generally rely on the cooperative to dispose of any surplus milk associated with their operations. He also indicated that some plants call on the cooperative only for "spot" loads of milk when they need it in addition to their regular supplies.

DI maintained that a substantial amount of the extra milk supplies that will need to be handled this year will have to move to outlets that are much more distant from the markets than those that usually can accommodate the markets' surplus dispositions. These would include outlets in Ohio, Indiana, Illinois, Iowa, New York, Minnesota, and Wisconsin. The cooperative's witness noted that during the week ending January 1, 1982, DI had moved milk to several of these states because there was not adequate manufacturing capacity in the Southeast to handle the additional milk. He estimated that DI would have to handle 11 million pounds more surplus milk in April 1982 than in April 1981 and 35.7 million pounds more in May, based on his estimate of the extent to which April production
The cooperative proposed the transportation credits to help offset some of the costs DI expects to incur in moving these excess supplies to distant outlets to clear the markets. The cooperative's spokesman presented data showing that during December 1981 DI paid an average of 3.58 cents per hundredweight per 10 loaded miles to contract haulers to move 426 loads of milk. He further stated that DI's cost to haul comparable loads of milk similar distances in the cooperative's own equipment currently is 3.58 cents per hundredweight per 10 loaded miles. Based on these data, the spokesman claimed that 3.6 cents per hundredweight per 10 loaded miles is a reasonable reflection of the actual costs incurred to haul milk to distant plants and thus would be an appropriate rate for the proposed credit.

The DI spokesman identified the manufacturing plants and their locations that normally are used as outlets for surplus milk by fully regulated handlers in each of the seven markets. He also presented estimates of the capacities of each such plant available for manufacturing surplus Grade A milk, noting that some of the plants have regular supplies of non-Grade A milk. The locations of these plants provided the basis for the proposed provisions that would allow handlers a pool credit for transportation of milk to manufacturing plants more distant than those indicated as the normal outlets.

To summarize, DI contends that because of a widespread imbalance between the supply and demand for milk, the orders should be amended so that all producers in each market will share equitably in the costs of disposing of the unusually large surplus milk supplies that will be associated with these markets this April, May and June. The credits would be available to any handler that incurred such costs. The cooperative also contends that, because of the unusual supply-demand situation, the current marketwide pooling arrangement is unable to provide such equity during this 3-month period. DI also held that the problem is regional and that the proposals must be adopted for each of the seven orders. DI claimed that otherwise inequities will occur which could lead to disorderly marketing conditions. It is the cooperative's view that the proposed credits will provide an orderly process for handling the surplus milk, thus providing marketing conditions that would benefit all producers. DI urged the Secretary to adopt the proposals on an emergency basis in order that they could be made applicable to surplus milk handled during the three months.

A representative of Upper Florida Milk Producers Association testified on behalf of the two cooperatives proposing amendments to the Upper Florida and Tampa Bay orders. He indicated that he also was a member of Independent Dairy Farmers Association, which supports adoption of the proposed amendments, but was not one of the proponents. The witness stated that the three cooperatives furnish a majority of the producer milk for both orders.

In support of the proposals to amend the two Florida orders, the proponents' witness indicated that Florida had recently experienced large production increases. He pointed out that for the two orders combined (to eliminate the effects of plants shifting from one order to the other) producer milk receipts in January 1982 were up 11 percent from a year earlier, and for February 1982 were up 10 percent. Further, the witness indicated that Class I sales had remained essentially flat, and, thus, the problem of surplus milk was due mainly to increased production. We also pointed out that Florida does not have any manufacturing plants, although some plants there do produce cottage cheese and ice cream, a relatively limited outlet for surplus milk.

The cooperatives' spokesman introduced data showing transfers and/or diversions of Class II milk (the Florida orders provide for only two classes) by the state of destination for milk moved off the two Florida markets by the cooperatives. He noted that ordinarily the cooperatives would move milk first to outlets in Florida, then to outlets elsewhere in the Southeast, and finally, as a last resort, to plants outside the Southeast. The witness pointed out, for example, that in January 1982 milk was moved from the Tampa Bay market to plants in Minnesota and Wisconsin for surplus disposal. He further stated that the cooperatives expect to move a considerable amount of milk outside the Southeast during April, May and June of this year.

The cooperatives' witness supported the credit rate of 3.6 cents per hundredweight per 10 miles proposed by DI. He noted that on milk imported into Florida from Wisconsin in the fall months of 1981, the average cost was about $1.65 per loaded mile, which he indicated was comparable to DI's proposed rate. He urged the Secretary to adopt the cooperatives' proposals on an expedited basis so that the cooperatives he represented could receive the transportation credit on long-distance hails to dispose of surplus milk during April, May and June.

A representative of Penmarva Dairymen's Federation, Inc., presented two statements with respect to the proposed amendment of the Middle Atlantic order. The Federation's membership is comprised of five producer cooperatives, including the Middle Atlantic Division of Dairymen, Inc.

The first statement was presented on behalf of the entire Federation and also the Valley of Virginia Cooperative Milk Producers Association, which together market over 85 percent of the milk pooled under the Middle Atlantic order. The spokesman indicated that these cooperatives agree that the marketing conditions throughout the Southeast as described by DI are quite similar to the problems being experienced by the various cooperatives in the Middle Atlantic market. Because of this, the group proposed at the hearing that the Middle Atlantic order be amended on an emergency basis and that the changes apply for the months of April, May and June 1982. The spokesman stated, however, that the other cooperatives in the group differed with DI on the changes that should be made and were proposing that the Middle Atlantic order be amended by eliminating the location differentials applicable to base milk diverted for Class II use to nonpool plants more than 180 miles from Philadelphia, Pennsylvania, or more than 200 miles from Washington, D.C., or Baltimore, Maryland.

The spokesman for the cooperatives testified that milk now being moved to plants more distant than the 180 or 200 miles proposed is first delivered to pool plants, reloaded, and then moved to the nonpool plants by transfer. He indicated that while the milk could be diverted, with less hauling involved, this practice is not followed by Interstate Milk Producers' Cooperative or the Middle Atlantic Division of Dairymen, Inc. In order to avoid the reduction in the base price to members that results from application of location adjustments to diverted milk, the group proposed at the hearing that the Middle Atlantic order be amended by eliminating the location differentials applicable to base milk diverted for Class II use to nonpool plants more than 180 miles from Philadelphia, Pennsylvania, or more than 200 miles from Washington, D.C., or Baltimore, Maryland.

The spokesman further indicated that a temporary elimination of location adjustments on base milk would allow cooperatives to recoup the expense of disposing of surplus milk this spring without reducing the price of base milk to other producers on the market who will not have to haul their milk.
unusually long distances for surplus disposal. He also maintained that adoption of Pennmarva's proposal would reduce the number of tank trucks to be reloaded at pool plants, which would allow more efficient receiving operations for milk that would be processed at such pool plants.

The second statement was presented on behalf of the same group of cooperatives except the Middle Atlantic Division of DI, which together market about 70 percent of the market's milk. In this statement, the witness for these cooperatives noted that certain evidence contained in the record indicated that DI's proposal would have reduced the base milk prices from 3 cents to 6 cents per hundredweight if it had been in effect during April, May and June 1981.

He went on to say that several of the cooperatives have made substantial investments to expend their individual facilities or have made arrangements to handle additional volumes of milk this year compared with previous years. These associations, he stated, therefore believe that the additional burden of handling excess milk should not be shared by all of the market's producers by the system that would be provided if DI's proposal is adopted.

During cross-examination, Pennmarva's witness expressed his opinion that it would be necessary this spring to move some milk for surplus disposal to outlets more distant than the normal surplus outlets for the Middle Atlantic market. He estimated that compared to last year about 20 million additional pounds of milk per month would have to be handled on the Middle Atlantic market this year. Also, he acknowledged that the location adjustment rate of 1.5 cents per hundredweight per 10 miles (which would apply under Pennmarva's proposal) would not equal the cost of hauling milk to distant outlets. Moreover, he expressed the view that it would be preferable that any credit adopted as a result of this hearing be applicable just to "excess" milk as defined in the order's base and excess plan for paying producers. Further questioning of the Pennmarva witness revealed that he believed the distances specified in DI's proposal reasonably defines the area where milk normally moves to nonpool plants for surplus disposition from the Middle Atlantic market.

A witness for Gulf Dairy Association, which represents about 30 percent of the milk pooled under the New Orleans-Mississippi order, supports the concept that all producers should share in the movement or excess milk that is an uncommon burden to the market. The witness expressed concern, however, that local producers could possibly find their milk being displaced at local manufacturing plants by surplus milk associated with other Federal order markets.

The cooperative's spokesman also claimed that an emergency situation does not exist with respect to the handling of surplus milk associated with the New Orleans-Mississippi market. He indicated that although Class I sales in the market were down and that his association's Class I sales to pool plants had declined, production in January had been about the same as a year earlier for member producers. In his view, the production pattern of the cooperative's members was representative of the general production pattern for the entire market. Moreover, he indicated that Gulf Dairy Association did not expect to move any milk unusual distances this spring since the association operates a manufacturing plant of sufficient capacity to handle members' milk that will not be needed for fluid uses at pool plants.

One cooperative association not already mentioned and three proprietary handlers opposed the adoption of DI's proposals to amend the orders. A spokesman for Mayfield Dairy Farms, Inc., which operates a plant fully regulated under the Tennessee Valley order, stated that the handler was opposed to granting any transportation credits as long as the plant is paying service charges and/or premiums for milk. He pointed out that the plant receives about 30 percent of its milk from independent producers and the balance is supplied by DI. He indicated that an over-order charge of 97 cents per hundredweight was paid on all milk in February 1982, and that this included a charge of about 53 cents per hundredweight on Class II milk. He pointed out that the handler had discontinued operating facilities to condense milk for use in ice cream, partly because it could not get milk for that operation from DI at order prices. The witness contended that if the plant could get milk over the long run at minimum order prices, it could operate a condensing unit and thus handle more of the market's surplus milk.

Kinnett Dairies, which operates a plant pooled under the Georgia order, opposed any change to that order. The handler's spokesman listed several reasons for their opposition: [1] The notice for the hearing was inadequate in that at least 15 days' notice was not provided; [2] the proposed changes are discriminatory and unfair because they would benefit DI but would not help small, independent processors; [3] the proposed changes would penalize small, independent dairy farmers, particularly those that supply milk to Kinnett Dairies; and [4] the over-order premiums that DI charges independent processors are sufficient to cover the hauling costs that DI wants to recover through the proposed transportation credit.

The witness for the handler indicated that about 60 percent of its milk is obtained from independent producers and the remainder is supplied by two cooperative associations. He further stated that the two cooperatives dispose of the surplus milk when production exceeds the handler's needs. In his view, the over-order charges paid to the cooperatives on a year-round basis adequately compensates them for the balancing services they provide.

Kraft, Inc., which operates plants in the Tennessee Valley, Louisville, Nashville, and Georgia markets, opposed the adoption of DI's proposals. Kraft's witness related several major concerns that in Kraft's opinion could create inequities between handlers and producers if DI's regional approach is adopted. One concern was the difference between DI's proposed rate for the transportation credit and the differential rate of 1.5 cents per ten miles, which is applicable in establishing order prices to attract Class I milk to pool plants. Kraft claimed that this would establish a preference for moving milk to distant manufacturing plants rather than to Class I outlets because suppliers could recover all or nearly all of the costs of moving the milk to distant manufacturing plants. Another concern voiced by Kraft was that handlers would be indifferent to the length of the haul and could move surplus milk to a more distant outlet at the expense of the pool if they were able to gain a slightly higher price for the milk, since any price gain would be retained by the handlers.

Kraft's witness also alleged that the proposals would result in non-uniform prices to handlers because the effect of the credits would be to establish varying surplus milk prices at a given location. This would occur, in Kraft's view, because the applicable credits would depend on which market the milk originated from and how far it was moved. Kraft also contended that the proposal would place handlers in Ohio, Indiana, and elsewhere at a
competitive disadvantage in competing for outlets for surplus milk because handlers in the Southeast who obtain a transportation credit presumably then could afford to accept a lower price for their distressed milk. According to Kraft, this would result in the local milk supplies being displaced by milk from the Southeast if DI's proposals are adopted.

Kraft expressed concern also that while DI views the problem as a regional problem there is nothing in the proposals to prevent the surplus milk that needs to be moved to distant outlets from being pooled on only one or two markets. The handler claimed that the result would be a significant drop in the pay prices to producers in these markets.

The Kraft spokesman stated that its Grade A producer patrons in Kentucky, Tennessee, and Georgia had reduced milk out of January 1982 compared to a year earlier. He reported that their production was down by 0.7 percent. He questioned why those producers who have moderated their production should bear the transportation burden for others who have not. Moreover, the witness contended that adoption of the proposals could provide an incentive to pool surplus milk from unregulated areas in Alabama, Virginia, and the Carolinas, which would result in pool producers subsidizing the handling of surplus milk that is not regularly associated with a Federal order market.

The National Farmers' Organization (NFO), a cooperative that markets milk for its members in the Middle Atlantic, Louisville-Lexington-Evansville, and Nashville markets, opposed the adoption of the DI proposals. The NFO spokesman noted that members' milk is also marketed on the Ohio Valley, Eastern Ohio-Western Pennsylvania and New York-New Jersey Federal order markets, which are adjacent to certain of the markets that would be amended if DI's proposals are adopted.

The NFO spokesman stated several reasons for opposing adoption of the proposals. One was that NFO members would have their pool returns lowered if the proposals were adopted, even though some milk of NFO members would have to be moved to outlets where transportation credits would be applicable. Also, it was NFO's view that subsidizing Class II and Class III shipments would have unsettling and adverse impacts on some markets adjacent to those included in this proceeding. The concern was that surplus milk from the Southeast would be made available to manufacturing plants in Ohio at prices below those normally prevailing in Ohio. NFO held that such milk would displace local milk at Ohio manufacturing plants and that the Ohio milk then would have to seek distant outlets without the benefit of a transportation credit. The witness contended that such a situation could displace milk into other markets, thus creating disorderly marketing conditions. NFO's witness also indicated that the proposed amendments depart from traditional Federal order pricing methods and may not be in accord with the Agricultural Marketing Agreement Act. He also stated that such provisions should not be adopted in an expedited proceeding because, in his view, there had not been sufficient time to fully analyze the impact of the proposals to identify all possible abuses that could occur if the proposals were to be adopted.

Most of the parties in this proceeding, whether they supported order amendments or opposed them, generally agreed that surplus milk supplies will be much larger this spring than a year ago. They also recognized that milk production is generally up throughout the Southeast and the Middle Atlantic area, and that Class I sales generally have been declining. This common perception is supported by data presented at the hearing.

Milk production in the United States has been increasing steadily since 1979, when production was 1.6 percent larger than in 1978. Compared to a year earlier, production in 1980 was up 4.1 percent, and was up another 3.2 percent in 1981. Total U.S. milk production in January 1982 was up 2.4 percent from January 1981.

In the 12 states (Alabama, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Pennsylvania, South Carolina, Tennessee, and Virginia) that supply most of the milk pooled under the nine orders involved in this proceeding, total production in 1981 also was up about 3 percent from 1980. For individual states within that group, production in 1981 compared to 1980 varied from a 5 percent decline in Alabama to a 6 percent increase in Pennsylvania. Production in 1981 was up from a year earlier in 10 of the 12 States.

Similarly, total producer milk pooled under the nine orders in 1981 was up 4.2 percent over a year earlier. Thus, the general increase in production that is being experienced in the Nation and in the Southeast and the Middle Atlantic area also is reflected in producer milk receipts in the regulated areas, as would be expected.

At the same time, sales of Class I milk (fluid milk products) in Federal order areas have been declining. For all Federal orders combined, such sales have declined steadily each year since 1977, with the years 1978 and 1979 each recording declines of .1 percent from a year earlier. In 1980, the decline from 1979 was .2 percent, and for January through November 1981, such sales were down from the same period in 1980 by .5 percent.

With respect to the nine orders in this proceeding, the record contains sales data only for 1980 and 1981. These data show that total Class I sales in the nine marketing areas declined by .7 percent from 1980 to 1981. Thus, the decline over the last year appears to be slightly greater in the nine-market area than the decline experienced in all Federal order areas combined.

It is clear that in the Southeast and the Middle Atlantic area milk production is increasing while at the same time Class I milk sales are declining. As a result, it is concluded that there will be greater quantities of milk not needed for fluid use than a year ago that will need to be disposed of to manufacturing outlets during the spring months of 1982, which is the time of seasonally high production. In view of this, it is necessary to determine whether the over-supply situation will cause marketing problems that should be dealt with through changes in one or more of the Federal orders involved, as proposed by certain cooperatives.

Based on the evidence presented at the hearing, the most likely marketing problem will be the disposition in the next few weeks of the additional surplus milk to manufacturing outlets. If local manufacturing capacities are adequate to handle the milk, no unusual problems would be expected. However, the record indicates that there is not likely to be adequate manufacturing capacity in the normal surplus disposal area for some of these markets.

Exhibits were introduced at the hearing listing the major manufacturing plants that process surplus Grade A milk supplies associated with the nine orders under normal supply and demand conditions. One exhibit lists such plants in the Southeast, with an estimate of the volume of Grade A milk that each plant can handle. The total Grade A capacity...
of these plants was estimated at about 255 million pounds per month. Such data cannot be used alone, however, for determining whether this manufacturing capacity is inadequate to handle all the milk. For example, in December 1981 total Class II and Class III producers milk for the eight southeastern markets amounted to about 210 million pounds, which obviously is less than the total manufacturing capacity shown in the exhibit. Moreover, while the details are not available, it is presumed that not all of that milk would have needed to move to such outlets, such as milk in Class II uses.

There are several reasons why such a comparison is inconclusive. One is that many of these same manufacturing plants also serve as outlets for surplus milk from unregulated areas in North Carolina, South Carolina, Virginia, and Alabama, as well as for other nearby and adjacent Federal order markets. Also, excess milk supplies are not evenly distributed throughout the month. Instead, such supplies may be particularly heavy during peak weeks and on weekends, with the surges of surplus milk being far more than can be handled by local manufacturing plants during the short time periods. For the same reasons, similar information presented for the Middle Atlantic market also is inconclusive to demonstrate an adequacy of manufacturing capacity.

It also should be noted that some of the manufacturing plants in the Southeast also receive and process non-Grade A milk, with such milk being their regular supply of milk. To the extent that production of non-Grade A dairy farms also may be increasing, as would be expected, more of the manufacturing capacity would be utilized for such milk, which would decrease the capacity available for surplus Grade A milk.

The best available approach to establishing whether or not surplus milk must be moved unusually long distances to manufacturing plants from the markets involved is to look at what has happened in the past. Data were provided at the hearing for 1-week periods during the recent December holiday season and during April 1981, times when surplus milk supplies were much longer than usual. During the week ending January 1, 1982, DI shipped more than 9 million pounds of milk from six southeastern markets to plants that ordinarily do not handle surplus milk for these markets. The distant outlets included plants in Ohio, Indiana, Wisconsin, Iowa, New York, Illinois, and Missouri. During the same week two years earlier, DI moved less than 2 million pounds in this manner, of which only 192,000 pounds went to a location in Ohio, the most distant outlet utilized for the six markets. During the same week ending January 1, 1982, DI also shipped about 2 million pounds of milk from the Middle Atlantic Market to manufacturing plants that the record identifies as being more distant than other plants regularly handling the surplus milk supplies of that market. Such data are not available for the same week two years earlier.

During the week ending April 17, 1981, DI moved about 5.2 million pounds of pooled surplus milk to manufacturing plants outside the range of regular outlets for the six southeastern markets, including some milk that moved to Ohio, Wisconsin and Iowa. During the same week in 1980, DI did not move any pooled surplus milk to manufacturing plants outside the Southeast. Similar data were not provided for the Middle Atlantic market.

With respect to the two Florida markets involved in this proceeding, the record indicates that at times surplus milk must be moved considerable distances. Normally, the Florida cooperatives can dispose of their excess milk supplies to manufacturing plants located in the Southeast. The record shows, however, that cooperatives there moved surplus milk to Wisconsin, Iowa, and Illinois during 1981 and to Minnesota and Wisconsin in January 1982.

For the markets in this proceeding, it is well established that surplus milk disposal is handled primarily by cooperative associations. This stems in part merely from the fact that cooperatives are the major suppliers of milk for fluid distribution. For example, almost all of the milk marketed under the Florida orders is supplied by cooperatives. In the Middle Atlantic market, the cooperatives that comprise the Pennmarva Federation supply about 85 percent of the market, with DI supplying an estimated 14 percent. In a number of the markets involved, DI itself is the major supplier in the market. Its share of the market in December 1981, in terms of milk pooled, was as follows: Georgia, 65 percent; Tennessee Valley, 80 percent; Louisville-Lexington-Evansville, 61 percent; New Orleans-Mississippi, 51 percent; and Nashville, 60 percent. Its share of the Greater Louisiana market was limited to 20 percent.

The evidence supports DI’s claims that it is not only the major balancer of milk supplies in much of the Southeast but that indirectly it is balancing the surplus milk of nonmember producers. This was acknowledged in specific cases by the representatives of two proprietary handlers who testified. The record discloses that in five of these markets there are pool distributing plants that receive only part of their supplies from DI. In the Greater Louisiana market, DI indicated that it regularly supplies milk to 18 pool distributing plants, six of which receive from one-third to about four-fifths of their supplies from DI. Four of these plants also receive milk from independent producers and one has own-farm production. Another two plants receive milk from DI on a “spot,” or irregular shipment, basis. In the Tennessee Valley market, DI supplies nine pool distributing plants. Three of these are only partially supplied by DI, and each of these receives milk from independent producers. In the Louisville market, two of the eight plants that regularly receive milk from DI also are supplied by independent producers. In this supply DI supplies about 85 percent of the Greater Louisiana markets, DI also supplies only part of the milk requirements for some plants, but the record does not disclose whether or not those plants also receive milk from independent producers or other cooperatives. DI also supplies a few plants in these markets with spot milk shipments.

The handling of a market’s surplus milk can fall unevenly on different groups of producers. As just indicated, DI supplies a number of distributing plants only on a partial basis. A handler may have a group of independent producers, or perhaps a particular group of producers who are members of a cooperative, from whom he receives milk on a regular basis throughout the year. As the milk production of these producers declines during the seasonal short-production months, the handler may need supplemental supplies and will buy milk from a cooperative such as DI. Then, during the spring, when milk production increases, the milk from the handler’s regular producers may be sufficient, or nearly so, to cover his needs and he cuts back his supplemental purchases from DI. In this situation, the producers who are the handler’s regular suppliers do not share in the costs of balancing the handler’s fluid needs. Instead, these costs fall, in this example, solely on DI. If the surplus milk must be hauled unusually long distances, the cost burden can be particularly heavy on the cooperative.

Other factors may contribute to the uneven distribution of the surplus burden. Either by virtue of operating their own manufacturing facilities or through special or continuing milk
handling arrangements, both proprietary and cooperative association handlers may have access to local manufacturing outlets that can fully accommodate the surplus milk that they must dispose of. Other handlers may not have the same access to local plants and thus have little alternative but to ship the milk long distances for surplus disposal, with the attendant high hauling costs. To avoid such costs, these handlers could attempt to make price concessions at local plants on the sale of their surplus milk and thereby displace the surplus milk of other handlers. This, of course, could lead to disruptive marketing conditions.

Although the cost impact of handling surplus milk normally falls largely on members of cooperatives, nonmember producers are not necessarily immune to adverse impacts of the heavy supply situation. Proprietary handlers who do their own balancing may experience difficulties in disposing of the excess milk supplies of their independent producers. Any long-distance milk shipments must be borne by the handlers since they are required to pay producers the minimum Class III (or Class II) price for the milk. Their alternative is to refuse to accept all the milk produced by these dairy farmers. If the latter situation occurred, the impact would fall entirely on those dairy farmers. Any widespread occurrence of this situation could lead to disorderly marketing conditions.

Under normal conditions of supply and demand for fluid milk, the Federal order marketwide pools serve to assure that all producers supplying each market share in both the Class I and surplus values of the milk that is pooled in their market. Such pooling is normally adequate to achieve reasonable equity among all the market’s producers. However, in the unusual circumstances that currently exist in much of the Southeast and the Middle Atlantic area, the orders do not provide a mechanism for ensuring that unusually high costs incurred in handling a market’s surplus milk are shared equitably by all producers on that market. In those markets where the record indicates that such movements of milk most likely will occur in substantial quantities, the orders should be amended along the lines proposed to maintain the degree of producer equity that otherwise is obtained through the operation of marketwide pools.

Although the record indicates a general problem of handling surplus milk throughout much of the area under consideration, the pool credits should not be adopted for all the orders for which they were proposed. Such credits are not warranted in the New Orleans-Mississippi, Greater Louisiana, and Nashville orders.

For the Greater Louisiana market, the record does not indicate that market conditions will result in greatly increased quantities of surplus milk to be disposed of this spring. Production was below year earlier levels during the last 10 months of 1981, while total in-area Class I sales generally were higher than a year earlier. For this reason, transportation credits are not shown to be necessary.

In the case of the New Orleans-Mississippi market, it is clear that 1981 sales were down from the levels of a year earlier, but the production situation is more difficult to assess. For the entire year, production was up 0.9 percent. However, during the last 6 months of 1981, producer milk receipts were down by 7 percent, due in part to the shifting of one plant to regulated status under another order. In this case, the testimony by Gulf Dairy Association’s witness concerning production must be recognized, along with his view that there is no substantial problem of surplus milk in that order.

A similar situation exists with the Nashville order. Production and plant shifts that occurred in that market during the last half of 1981 resulted in a mixed picture. For the entire year of 1981, producer milk receipts were up 8.1 percent from 1980. However, during the last three months of 1981, producer milk receipts were substantially below a year earlier. This occurred mainly because milk previously associated with the Nashville order is now pooled on the Georgia order. There is no question that Class I in-area sales are below year earlier levels.

The production and sales patterns are only two of the factors involved in deciding whether transportation credits are warranted for a particular order, however. Another factor for the New Orleans and Nashville markets, is that, in each case, a large manufacturing plant that is a pool plant is located in the heart of the production area for the market. These plants are the largest such plants in the Southeast, and they both serve as outlets not only for local milk but for large quantities of surplus milk associated with other markets. Thus, it would be possible for the local surplus milk in these two markets to be displaced by milk from other markets. In such situations, a credit from the pool to move the local milk to other distant outlets would result in producers in the New Orleans and Nashville markets bearing the burden of surplus disposal for producers in other markets, which is contrary to the basic purpose of the credits.

Still another consideration is the extent to which surplus milk had to be moved to distant outlets during recent periods when excessive supplies existed throughout much of the Southeast. During the weeks ending January 1, 1982, and April 17, 1981, no milk was moved from these three markets to distant outlets.

For these reasons, the proposals to amend these three orders should not be adopted.

A number of proprietary handlers and cooperative associations objected to the adoption of pool credits on surplus milk movements. The points discussed below were raised at the hearing and/or in their post-hearing briefs.

Kraft maintained that DI’s proposals would not allocate the burden of credits equitably between markets and that producers in some markets would be burdened with the transportation of surplus milk associated with another market. Kraft indicated that DI handles not only its own surplus milk but also the surplus of cooperatives in Florida and Alabama. Kraft alleged that through “steal-stepping” the milk of its own producers, and that of others, surplus milk in Tennessee and Kentucky would be displaced with the more southern milk and the local milk would be forced to move north and west for surplus disposition with substantial pool subsidies. Kraft also noted that surplus milk associated with unregulated plants in Alabama is pooled under the Tennessee and Kentucky orders and that blend prices in those markets already are reduced as a result. Kraft further claimed that transportation credits from these pools would exaggerate an existing inequity by further lowering blend prices.

NFO raised a similar point in noting that only about two-thirds of the production of Grade A milk by DI’s members is pooled under the seven orders that DI proposes to amend. NFO claimed that adoption of the proposals would give DI an economic incentive to pool additional milk of its members under these orders.

The record does disclose that DI works with other cooperatives in Florida, and elsewhere in the Southeast, to coordinate the disposition of surplus milk to manufacturing outlets. Also, it is recognized that DI operates throughout the Southeast, and therefore has the potential opportunity to move milk in the manner described by Kraft and NFO. These concerns were considered in reaching a decision to adopt the amendments to certain orders. Although
it is possible that abuses could occur, the need for a more equitable sharing of the surplus disposal costs outweighs not taking any action because of possible abuses. It should be noted that the pool credits could be suspended promptly if it is found that the provisions are being misused.

Kraft also contended that the record does not support an assumption that all producers are contributing to the overproduction of milk and that all producers therefore should bear the burden of surplus disposal costs. Kraft stated at the hearing that production by its patrons was down 0.7 percent in January 1982 compared to January 1981. However, it should be noted that Kraft also stated that its total producer milk receipts were up due to the fact that it was receiving milk from additional producers who had converted from non-Grade A to Grade A status since January 1981. In terms of a market's total supply of milk available for fluid use and the amount of surplus milk that must be handled, there is little difference between excess supplies generated because output per producer is up and excess supplies on the market that stem from having more producers on the market.

In opposing the pool credits, NFO contended that the credits would create inequity between the compensation granted from the pool in hauling milk to the market for Class I purposes versus hauling milk from the market for surplus uses. The concern was that there would be more incentive for distant milk to move off the market for surplus uses, given the 3.6 cents per 10 miles per hundredweight credit, rather than to the market for fluid use since the location adjustment rate generally used to attract milk to a market for Class I purposes is only 1.5 cents.

In view of the very limited time that the pool credits would be effective, and because of the surplus problem that has prompted their need, this concern has little relevance. There presumably will be little need to move milk long distances for Class I use in the Southeast or Middle Atlantic area. These areas will not face a shortage of transportation credits are in effect.

In other arguments against amending the orders, NFO contended "that producer equity cannot fairly be viewed by the Secretary simply with respect to one set of costs for a three-month period in one geographic area. Instead, NFO maintained, the matter should be analyzed over a longer period of time and take into account impacts between markets and production areas. In support of these views, NFO noted that other cooperatives in the Middle Atlantic area opposed DI's proposal on the basis that their producers should not share the additional burdens of handling excess milk. NFO also pointed out that DI divested itself of manufacturing capacity in the Middle Atlantic market, implying that consideration of DI's proposal thus was not warranted.

With regard to a broader analysis of the surplus problem over a longer period of time, such an approach obviously would preclude any action by the Secretary in time to deal with the problem at hand. Timeliness is an issue here because the proposed remedies would be applicable for only a limited period this spring.

With respect to the views concerning DI's divestiture of manufacturing capacity, the record indicates that the manufacturing capacity remains available to DI for surplus disposal. DI has an agreement whereby substantial quantities of its milk, up to 22 million pounds per month, will have access to that capacity this year.

NFO also argued that the hauling cost for milk where a backhaul is involved would be less than 3.6 cents per 10 miles per hundredweight and that the rate of credit proposed by DI was too high. There is no basis in the record for concluding that any substantial volumes of milk that might move to distant outlets this spring would be moved at rates based on backhauls. It is noted that the data DI offered to support the 3.6-cent rate show that 128 of the 426 loads hauled by contract haulers moved at rates less than 3.6 cents per hundredweight per 10 miles. On the other hand, at least 242 of the 426 loads moved at rates above 3.6 cents. The lowest rate indicated was 1.44 cents per hundredweight per 10 miles, while the highest rate shown was 9.23 cents. The average rate for the 426 loads was 3.73 cents per hundredweight per 10 miles, yet DI's proposed rate was 3.6 cents, which is lower than the average. The evidence in this case supports 3.6 cents per hundredweight per 10 miles as a reasonable rate to reflect the cost of hauling milk in large tank trucks.

Kraft, NFO and Dean Foods expressed concern that pool credits proposed by the cooperatives could disrupt the marketing of milk in such areas as Minnesota, Wisconsin, Illinois, Indiana, Ohio, and New York. They indicated that the distressed milk supplies in the Southeast would be moved to manufacturing plants in these areas, and they contended that the pool credits would, in effect, subsidize the disposal of surplus milk in the northern areas. They claimed that this would make it possible for the milk to be offered to the northern plants at prices below those prevailing locally for surplus milk. These parties argued that the "subsidized" surplus milk from the southeastern markets could displace local milk at the northern plants, with the local milk then having to be moved to other distant outlets at considerable expense to producers in the northern areas.

It is recognized that with the pool credits on long-distance milk shipments there could possibly be a limited displacement of local milk at manufacturing plants in the northern areas. At least two factors, however, would tend to cause this not to happen. The pool credits adopted herein would not cover all of the cost of hauling the milk. As discussed later, no-credit zones would extend anywhere from 250 miles to 700 miles from basing points in the local markets. Milk would have to be moved beyond the no-credit zone before a credit would start to apply. Thus, handlers moving the milk would have a strong incentive to find the highest possible price for their surplus milk.

Additionally, once milk is moved beyond the no-credit zone, the incentive to move the milk to the nearest manufacturing plant would tend to be minimal since the 3.6-cent credit rate would cover most of the hauling to any point beyond the no-credit zone. This would tend to lessen the likelihood of southeastern handlers offering surplus milk at distress prices for the purpose of finding a closer outlet.

In this regard, it might be argued that the pool credit arrangement should provide some kind of incentive to move milk to the closest plant. However, in view of the concerns expressed about the possibility of "displaced" milk, it is concluded that this should not be done so that handlers will have the flexibility in seeking surplus milk outlets in the northern areas.

Kraft and NFO contended that the pool credits proposed by the cooperatives are not authorized by the Agricultural Marketing Agreement Act. They noted that the pool credits presumably were proposed on the basis that they were authorized by § 608c(f)(5)(A) of the Act, which requires class prices under an order to be uniform among all handlers except for certain adjustments, including an adjustment for the location of the plant at which the milk is received. These parties argued, however, that the pool credits would be inconsistent with this provision of the Act. They claimed that the pool credits would be, in effect, an adjustment to the Class III (or Class II) price. In this regard, they pointed out that the credits could vary from handler
to handler, by virtue of different points of origin, even though all the handlers may have delivered the surplus milk to the same distant plant. It was argued that under this circumstance the credits would result in Class III prices that are not uniform among all handlers.

In a related but somewhat different vein, NFO also claimed that the pool credits appeared to result, in effect, in the establishment of a sub-classification of Class III milk based on the distance that the surplus milk is transported. It was argued that this would contravene the principles of Inter-state Milk Producers’ Cooperative v. Butz, 372 F.Supp. 1105 (E.D. Pa. 1974), a case that dealt with the classification of milk on the basis of distance. Also, NFO argued that within this sub-classification different handlers would be charged different class prices.

The pool credits adopted herein do not represent an establishment of a sub-Class III classification for milk, nor do they represent adjustments to the Class III (or Class II) price for the location of the receiving plant. Instead, such credits represent an additional mechanism in the order for maintaining a reasonable degree of equity among all producers whose milk is pooled and priced under the order. The authority for such a provision is section 606c (7)(D) of the Act, which provides that an order may contain terms and conditions incidental to, and not inconsistent with, other provisions of the Act if such terms and conditions are necessary to effectuate the other provisions of the order.

One of the underlying purposes of the Act is to establish orderly marketing conditions for dairy farmers. The Act authorizes a number of specific means for achieving this, including the pooling of milk on a nationwide basis. Through this pooling procedure, all producers in the market share equitably in both the market’s higher-valued fluid sales and their reserve milk supplies that necessarily must be available in the fluid market but which return only the lower manufacturing value. History has demonstrated that in the absence of nationwide pooling the burden of the lower-valued reserved supplies falls unevenly on various groups of producers. This tends to result in various disorderly conditions in the market that are harmful not only to producers but to handlers and consumers as well. Producers have found it in their long-run interest to share uniformly in the burden of the reserve milk supplies.

The pool credits adopted herein are an extension of this nationwide sharing concept. As already described, unusual supply-demand conditions are resulting in certain producers bearing an inequitable share of the costs of handling excess milk supplies associated with the fluid markets. The pool credits represent a reasonable means of maintaining orderly marketing conditions for dairy farmers. The Act, which provides that an order may provide a sufficient basis for distinguishing these credits from those found unlawful in Brannan. The record strongly demonstrates that several of the markets under consideration will be faced this spring with a severe and abnormal problem of disposing of surplus milk. It also indicates that the burden of moving much of this milk unusually long distances will fall unevenly on various producers in the market even though the surplus problem can be attributed essentially to all producers. Moreover, all handlers in the market, whether proprietary handlers or cooperative associations, would be eligible for a pool credit on the surplus milk shipments. In addition, the credits would apply only when the distant milk shipment actually occurs. In Brannan, the pool credits in question accrued routinely to cooperatives irrespective of the extent to which marketwide services may have been performed.

Kraft and others also argued that the pool credits proposed by Dairymen, Inc., should not be adopted in view of the over-order charges that the cooperative is charging handlers for milk which they purchase. These handlers claimed that such charges are contrary to the cooperative’s policy of balancing the fluid milk needs of the handlers that it supplies. Moreover, Kraft argued that a credit from the pool for the surplus milk movements without a corresponding reduction in over-order charges would provide the cooperative an "unconscionable" windfall. This party contends that if the pool credits are adopted the Secretary must determine that the over-order charges are necessary to insure an adequate supply of milk for the fluid market, that the current over-order charges are inadequate to cover the cost of handling the abnormal milk movements, and that such charges are not contributing to the existing surplus milk problem by encouraging over-production milk.

There is insufficient information in this record to make any determination concerning the over-order charges that prevail in these markets. Such charges are basically outside the scope of the order program since Federal orders establish only the minimum prices that regulated handlers must pay to producers. It is recognized that the existence of over-order charges, their amount, their purpose, and whether they result in over-order blend prices to producers are all factors that have relevance in the market. Nevertheless, over-order charges are outside the order program’s authority. For this reason, information on over-order charges is seldom sought or made available at public hearings.

The lack of such information is not critical to deciding the appropriateness of the pool credits adopted herein. It is evident that several of the markets are faced with the problem of inadequate manufacturing capacity in the normal surplus disposal area. Substantial quantities of milk will have to be moved to distant plants at considerable cost. Such costs were not contemplated in establishing the Class III (Class II) price level for these markets. Thus, it is evident that the current order provisions are not in line with the present marketing conditions. This determination is not contingent upon the existence or level of over-order charges in these markets.

In opposing the proposed transportation credits on surplus milk shipments, certain parties argued that the hearings was called on unusually short notice. They claimed that this deprived them of the opportunity to prepare adequately for the hearing. It was argued that the proponent cooperatives presumably were aware well in advance of the deteriorating marketing conditions that prompted the hearing and that any petition for a hearing should have been submitted in time to permit normal amendatory procedures. It was argued also that notification of the hearing was inadequate in that the hearing notice was not sent to industry members in markets not specifically listed in the notice but which, nevertheless, could be affected by order changes in the listed markets.

The procedures followed in issuing the notice of hearing for this proceeding
were in accordance with the Agricultural Marketing Agreement Act, the Administrative Procedure Act, and the Department's rules for formulating milk orders. In all cases, a hearing may not be held less than three days after the date of publication of the notice in the Federal Register. Under normal circumstances, at least 15 days' notice must be provided. The rules provide, however, that a shorter notice may be given when the Department determines that an emergency exists. The Department concluded after receiving the request for a hearing that there was a reasonable indication of an emergency situation and that less than 15 days notice was warranted. As noted earlier, the hearing notice was published in the Federal Register on March 10 and the hearing was convened six days later.

It is recognized that the amount of notice provided the industry was relatively short. The record of this hearing, however, substantiates the Department's pre-hearing determination that emergency conditions appeared to exist in the area under consideration. It is clearly evident that the order changes sought by proponents could not be made in time to be helpful if the proceeding is not handled on an expedited basis. In this circumstance, the short notice regarding the hearing was consistent with the marketing conditions at hand.

In keeping with the Department's rules, copies of the hearing notice were mailed to interested parties by the market administrators for the nine orders that cooperatives wanted to amend. As is the customary practice, the hearing notice was not sent to parties in other markets except as they may have been on the interested party list of these market administrators by previous arrangement. Legal notification requirements were met, however, through the publication of the hearing notice in the Federal Register. Accordingly, the allegations that the notification procedures for this proceeding were inadequate are unfounded.

The order changes adopted herein for the Middle Atlantic, Upper Florida, Tampa Bay, Georgia, Tennessee Valley and Louisville-Lexington-Evansville orders carry out the basic concept of the proposals submitted by the proponent cooperatives. They differ somewhat from the proposals in terms of defining the milk shipments that would be eligible for a pool credit. While the approach would be uniform among the orders, the actual provisions would vary from order to order to reflect specific conditions in each affected market.

As noted earlier, the proposed credit rate of 3.6 cents per hundredweight per 10 miles should be adopted for each of the orders amended.

Each order should specify an initial distance for which hauling credits would not apply on surplus milk movements, and then the distance where a credit would be applicable to the balance of the haul. In this regard, the evidence supports a procedure whereby the distance to each nonpool manufacturing plant would be measured from the nearer of the basing points now specified in the order for the purpose of determining location adjustments to handlers and producers, the location of the pool plant from which the milk was transferred, or, if the milk is diverted, the location of the pool plant where the milk was last received or the location of the county courthouse in the production area where the diverted milk was produced. Since the milk of those producers who are associated with a particular load of diverted milk may have been delivered to more than one pool plant just prior to being diverted, the pool plant that received the largest portion of such milk should serve as the point from which the mileage to the nonpool plant is measured.

Similarly, since a load of diverted milk may include the milk of several producers, the courthouse of the county where the largest portion of the load was produced should be the basing point for that load when the production area is the closest measuring point on the surplus milk movement.

Under the proposals submitted by cooperatives, each of the orders except the Middle Atlantic order would specify an area within which surplus milk would move without a credit, plus a distance beyond that area that the milk would have to move before a credit would apply. For milk orders except the Middle Atlantic order, a geographic area was specified as a no-credit area (such as one or more states or the marketing area), plus a certain distance beyond the geographic area. Thus, milk would have to move outside the geographic area to a nonpool plant which tends to de-

A similar problem, applicable to both transferred milk and diverted milk, is inherent in the procedure for determining transportation credits under the DI proposal for the Middle Atlantic order. In that case, the distance to the nonpool plant would be based solely on the basing points specified in the location adjustment provisions of the order, with the credit being based on that total distance less approximately 200 miles. Under this approach, a transportation credit would be available to cover virtually all of the haul to the nonpool plant in the case of milk transferred or diverted from locations approximately 200 miles from the basing points. For milk moved to nonpool plants from locations beyond the 200-mile area, the credit would be based on a mileage determination that would exceed the distance the milk actually moved.

Unless a different approach is taken to avoid these problems, credits could be applied to an unwarranted extent in certain cases. The result would be, in essence, a windfall gain to the transferring handler, which clearly is not the basic intent of the proposals. DI's suggested modification regarding the distance determination for establishing credits on diverted milk will take care of some of the problems. Other differences from the proposals are incorporated into the provisions adopted herein to provide additional safeguards against granting credits in other possible situations that would not be in keeping with the basic intent of the proposals.

Another difference between the cooperative's proposals and the provisions adopted herein is the approach taken to identify the area where no credit would apply to surplus milk movements. For all orders except the Middle Atlantic order, a geographic area was specified as a no-credit area, and then the distance where a credit would apply. The purpose of defining such "no-credit" areas was to exclude the application of credits to movements of milk to nonpool plants that regularly handle each market's surplus under usual supply-demand conditions.

A problem exists with this approach, however, because the principal criterion used to define the no-credit areas is the location of the manufacturing plants that serve as a market's regular outlets for surplus milk, which tends to de-
emphasize the distance that milk may regularly move to reach those outlets. Thus, it could be more advantageous to DI, for example, to transfer milk from its pool plant at Bristol, VA/TN, to a nonpool plant outside Tennessee and more than 125 miles from Bristol, which was the no-credit area under the DI proposal. In this example, a hauling credit would be available for the distance the milk actually moved in excess of 125 miles. On the other hand, if DI transferred the milk from Bristol to its manufacturing plant at Lewisburg, Tennessee, no credit would be available, even though the distance of the haul would be over 300 miles. Nevertheless, the evidence indicates that the Lewisburg plant is a regular outlet for the Tennessee Valley market's surplus milk.

A more consistent approach, therefore, is to look at each market situation and base the “no-credit” area entirely on the distance that milk normally moves for surplus disposition. The provisions adopted herein for each order being amended are established on this basis.

Also, it is appropriate to try to preclude a handler from choosing to transfer or divert surplus milk from a location purely to obtain a larger credit than if the milk were moved from some other location in the same market. A reasonable approach to achieve this is to have the basing points now specified in the order for determining location adjustments included among the locations that would be used in establishing that portion of any haul that will be covered by the transportation credit from the pool.

In addition, the orders should not provide for a credit on any of a handler's milk transferred or diverted to a nonpool plant during the month if any portion of the milk is assigned to Class I. Such a safeguard is necessary to ensure that the pool credits will be available only to cover transportation costs incurred to move milk to outlets for surplus use. For movements to nonpool plants that are other order plants, the order language adopted restricts the credits to milk for which Class II or Class III uses are requested by both the shipping and receiving plants. However, for such movements to nonpool plants that are not other order plants, credits should be applicable only if all of the milk is assigned to Class II and/or Class III. This is intended to preclude the granting of credits on movements of milk to nonpool plants that are primarily fluid milk bottling plants.

It is recognized that under the adopted provisions transportation credits would be available on a much smaller portion of the surplus milk that is moved unusually long distances than would have been available under the cooperatives' proposals. The provisions adopted, however, will provide some recovery of hauling costs to the handlers that move the milk while at the same time ensuring that producers not involved in such movements will share in the burden of handling the unusually large supplies of surplus milk that will move to distant manufacturing outlets through June 1982. The provisions adopted also should encourage handlers to move such milk to the surplus outlets in the most efficient manner, thus minimizing possible abuses that various parties to this proceeding expressed concern about.

The specific provisions adopted for the six orders are described in the paragraphs that follow.

Middle Atlantic order. In the Middle Atlantic market, transportation credits from the pool should be available to the extent that the distance to the nonpool plant from the nearest of the several locations specified exceeds 200 miles. The 200-mile no-credit area appears to be appropriate based on the location of the plants that normally handle the usual supplies of surplus milk associated with that market and the location of pool plants that serve the market. Thus, no credit would be received for any milk that moved 200 miles or less.

As noted earlier in this decision, an alternative to DI's proposal for the Middle Atlantic market was introduced at the hearing by the members of Pennmarva Dairymen’s Federation, Inc., (excluding DI) and Valley of Virginia Cooperative Milk Producers Association. The alternative proposal would minimize the 15 cents per hundredweight per 10 miles location adjustment that is now applicable to the uniform price for base milk diverted as Class II milk to nonpool plants located more than 180 miles from the city hall in Philadelphia or more than 200 miles from the zero milestone in Washington, D.C., or the courthouse in Baltimore, Maryland. In their brief, the cooperatives requested that the location adjustment on base milk not be eliminated for milk diverted to a nonpool plant for Class II use from a pool plant located more than the distances specified from the basing points. The alternative proposal would apply during the same period covered by DI’s proposal. The alternative proposal should not be adopted. One reason is that relief from the costs of disposing of surplus milk to unusually distant outlets would not be available to handlers who moved the milk by way of interplant transfers. The alternative proposal would apply only to milk that is diverted to surplus outlets. Thus, the proposal would not provide handlers with the flexibility needed in the handling of surplus milk. The record indicates, for example, that in the past DI has handled surplus milk through interplant transfers.

A second reason is that all the producers on the market would not share in the burden of such dispositions. These cooperatives expressed the view that cooperatives that had made substantial investments to expand their manufacturing facilities to handle additional surplus milk should not have to share the burden of other handlers or cooperatives that do not have adequate manufacturing capacity and therefore must move their milk to other distant outlets for surplus disposition. This view, however, is not consistent with other testimony presented by the same cooperatives, that is, that the current situation constitutes an emergency and that the over-supply situation does not result from the production patterns of any particular group of producers. There is little question that the market, as a whole, is oversupplied with milk. While some handlers may have adequate local manufacturing capacity to handle their own milk, and maybe some milk of others, someone’s milk will have to be moved to distant outlets. If DI, for example, could make arrangements with manufacturers for handling all of its milk locally, then other surplus milk presumably would have to be moved to distant outlets.

The Georgia order. The provisions adopted for the Georgia order would not provide a transportation differential for any movements of surplus milk that moved less than 350 miles. The basis for such distance is that the normal outlets for surplus milk associated with pool plants located in the Georgia marketing area generally lie within about 300 miles from Atlanta. The normal range of surplus outlets handling milk from the Murfreesboro area, which is outside the Georgia marketing area and where a distributing plant pooled under the Georgia order is located, is somewhat less. Thus, a distance of 350 miles from the nearer of the locations specified should serve to effectively preclude the application of transportation credits on movements of surplus milk associated with the Georgia order that moves within the normal distance of regular surplus dispositions for that market.

The Tennessee Valley order: Surplus milk regularly associated with the Tennessee Valley market is commonly moved to DI’s plant at Lewisburg, Tennessee. During December 1981, for
example, milk was hauled from Bristol, Virginia, to Lewisburg, Tennessee, which is in excess of 300 miles. DI's proposal specified that transportation credits would not be applicable for shipments to any location in Tennessee. Thus, it is inappropriate to disallow credits on any shipment of surplus milk that moves to a nonpool plant that is less than 350 miles from the nearer of the locations specified. The distance also is adequate to cover regular outlets for surplus milk associated with DI's plant at London, Kentucky, which is outside the Tennessee Valley marketing area and which at times is regulated under that order.

The Louisville-Lexington-Evansville order: The order for the Louisville market should specify that surplus milk must move more than 250 miles before a transportation credit would be allowed. This distance is sufficient to cover regular surplus milk dispositions from this market to outlets in southern Indiana, and would include such movements from DI's plant at London, Kentucky, which is normally pooled either on the Louisville order or on the Tennessee Valley order.

The Upper Florida and Tampa Bay orders: The same criteria applied in determining the distances for the other orders should be followed for these two orders. The evidence in the record does not provide a list of nonpool manufacturing plants that regularly handle the surplus milk for the two Florida orders. However, the cooperatives' proposals would have excluded from credits any movements of milk to nonpool plants located in nine states, as described earlier. For shipments to plants outside the nine states, credits would apply to all but 225 miles of the total distance the milk moved. The cooperatives' spokesman indicated that the primary outlets for surplus milk associated with the Florida markets are DI's large manufacturing plants in Franklinton, Louisiana, and in Lewisburg, Tennessee. Moreover, exhibits introduced by the cooperatives indicated that from 1977 through 1981 virtually all of the surplus milk that the proponent cooperatives shipped to nonpool manufacturing plants within the nine-state area went to such plants in Alabama, Louisiana, Mississippi, and Tennessee.

Accordingly, the distances involved in moving surplus milk from a pool plant in the Tampa area under the Tampa Bay order, or from Jacksonville or Tallahassee under the Upper Florida order, to the nonpool plants at Franklinton or Lewisburg should be used to establish the minimum distance such milk should move without the handler being given a transportation credit. These distances are 700 miles for the Tampa order and 850 miles for the Upper Florida order.

The distances specified for each of the orders, as discussed in the preceding paragraphs, appropriately defines the range over which milk associated with these markets ordinarily moves to nonpool plants for surplus disposition under normal supply and demand conditions. Under current market conditions, where milk will have to move to more distant outlets, such movements over greater distances than those specified for the no-credit area would qualify a handler to receive the transportation credit from the pool.

To assure the proper application of the amendments adopted herein, it is desirable to set forth some examples of how the credit on long distance surplus milk shipments would be determined. Using hypothetical distances, assume that surplus milk under the Georgia order is transferred from a pool plant in southern Georgia to a nonpool plant in Wisconsin. Assume also that the distance between the two plants is 1,000 miles, and that the nonpool plant is 850 miles from Atlanta and 975 miles from Augusta, which are the two basing points to be used for measurement purposes. Under the amendments, the mileage to be used in the computation is the mileage from the nonpool plant to the nearest of the basing points and the pool plant from which the milk was transferred. In this case, the nearest measuring point is Atlanta, with an applicable distance of 850 miles. Since no pool credit would apply for the first 350 miles of whatever distance is used, the credit would be applicable to only 500 miles. At 3.6 cents per hundredweight per 10 miles, the credit to the transferring handler would be $1.80 for each 100 pounds of milk transferred.

Another example would illustrate the pool credit computation for diverted milk. The same mileages described above may be assumed. Additionally, it should be assumed that milk is diverted from the southern Georgia pool plant to the nonpool plant in Wisconsin and that the milk was produced in a county just south of Atlanta. Also, assume that the distance from the courthouse of this county to the nonpool plant is 900 miles. Under the amendments, the mileage to be used in the computation is the mileage from the nonpool plant to the nearest of Atlanta (850 miles), Augusta (975 miles), the county courthouse (900 miles), and the pool plant from which the milk was diverted (1,000 miles). The nearest measuring point in this case is Atlanta. Again, no pool credit would apply for the first 350 miles of the 850-mile distance, and the pool credit would be $1.80 for each 100 pounds of milk diverted.

In its brief, DI proposed that transportation credits for each order be allowed only on milk from producers who were producers under that order during any of the months of September through December 1983. Although the brief did not indicate why this particular modification would be appropriate, it presumably was directed towards the concern of some parties that milk not regularly associated with a market could be pooled under an order solely for the purpose of having it become eligible for a pool credit. Such a modification for this reason would appear to have merit. However, the modification is somewhat unworkable since the restriction could be applicable only to diverted milk, not to transfers as well. Once milk is received at a plant and commingled with other milk, the identity of producers whose milk might be included in loads of milk transferred from that plant could not be established.

A spokesman for Dean Foods Company, which operates a pool plant on the Louisville order, proposed that the no-credit area for all of the orders under consideration, except the Middle Atlantic order, include the same nine-state area specified in the proposals for the Florida orders, plus the Indiana counties that are within the marketing area of the Louisville order. The stated purpose of this proposed modification was to prevent the hauling of milk from north to south and vice versa within the Southeast in order to obtain hauling credits. The practical effect would be to exclude any application of credits on movements of surplus milk to any manufacturing outlets in the Southeast.

Adoption of this proposal would unnecessarily restrict the flexibility of DI and others to utilize manufacturing outlets that might be available at a given time. For example, if capacity were available in the manufacturing plant at Franklinton, Louisiana, and that plant represented a better alternative for surplus milk associated with the Louisville order, there is no reason why a credit should not be allowed on the milk moved to the Franklinton plant rather than to a plant in Iowa, for example. Thus, the modification is not appropriate.

Another modification advanced by the Dean Foods spokesman would limit the application of credits essentially to Class III milk. This was to avoid the displacement of local milk in other areas
that is going into Class II uses with surplus milk from the markets involved in this proceeding. This restriction should not be interpreted. Handlers usually make long-term arrangements for milk supplies for both their Class I and Class II needs. It would seem very unlikely that handlers would substitute distress milk for their local supplies to gain a limited benefit for a very short-run period.

In its brief, NFO contended that under DI's proposals it would be possible for a handler to haul milk back and forth between locations where credits would be applicable and make a profit on the transportation credits from the pool because of lower backhaul rates. In this regard, the adopted transportation credit would allow less recovery of hauling costs from the pool than would have been recovered under DI's proposal, which should lessen the concern regarding this point. Moreover, though, the profits alleged by NFO are unlikely to materialize even if backhaul rates could be obtained. An example will illustrate this.

Assume that surplus milk is moved from a plant at Mt. Holly Springs, Pennsylvania, to a plant in Louisville, Kentucky, a distance of 586 miles. The hauling cost (at 3.6 cents per hundredweight per 10 miles) would be $2.13 per hundredweight each way. Under the adopted amendments, the pool credit would be $1.31 for the Mt. Holly to Louisville haul, and $.61 per hundredweight for the haul from Louisville to Mt. Holly. The pool credit for the return trip would be based on the 520-mile distance from Lexington, Kentucky (a haul point) to Mt. Holly. Thus, the net round-trip hauling cost to the handler would be $2.34 per hundredweight ($4.28 per hundredweight hauling cost less $1.92 per hundredweight pool credit). Such movements of milk would not be profitable even if there was no hauling cost in one direction. Even then, the handler would still have a net cost of $.21 per hundredweight.

2. Omission of a recommended decision and the opportunity to file exceptions thereto.

The evidence in the record of this proceeding strongly indicates that surplus milk supplies in the affected markets will be substantially larger than usual during April, May, and June of this year. The amendments adopted herein are in response to these marketing conditions and are for the purpose of accommodating the handling of surplus milk under unusual circumstances. Unless amendatory action is taken on an emergency basis, the opportunity to assure producer equity in these markets will be lost. The normal procedure of issuing the recommended decision and providing time to file exceptions thereto will not permit the implementation of the amendments in time for them to serve their intended purpose.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

Determination

The findings and conclusions of this decision do not require any change in the regulatory provisions of the orders regulating the handling of milk in the New Orleans-Mississippi, Greater Louisiana and Nashville, Tennessee, marketing areas. It is hereby determined that this proceeding shall have no further applicability to these three orders.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the Georgia, Middle Atlantic, Upper Florida, Tennessee Valley, Tampa Bay and Louisville-Lexington-Evansville orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

The following findings are hereby made with respect to each of the aforesaid tentative marketing agreements and orders:

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents, a marketing agreement regulating the handling of milk, and an order amending the orders regulating the handling of milk in the aforesaid specified marketing areas, which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusion.

It is hereby ordered, That this entire decision, except the attached marketing agreement, be published in the Federal Register. The regulatory provisions of the marketing agreement are identical with those contained in the orders as hereby proposed to be amended by the attached order which is published with this decision.

Determination of Producer Approval and Representative Period

January 1982 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the orders, as amended and as hereby proposed to be amended, regulating the handling of milk in the aforesaid specified marketing areas, is approved or favored by producers, as defined under the terms of each of the orders (as amended and as hereby proposed to be amended), who during such representative period were engaged in the production of milk for sale within the respective marketing areas.

Milk marketing orders, Milk, Dairy Products.
Orders amending the orders, regulating the handling of milk in certain specified marketing areas:

7 CFR Part and Marketing Area
1007 Georgia
1004 Middle Atlantic
1006 Upper Florida
1011 Tennessee Valley
1012 Tampa Bay
1046 Louisville-Lexington-Evansville

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of each of the aforesaid orders and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein. The following findings and determinations are hereby made with respect to each of the aforesaid orders:

(a) Findings. A public hearing was held upon certain proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in each of the aforesaid specified marketing areas. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereby made it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insuring a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in each of the specified marketing areas shall be in conformity to and in compliance with the terms and conditions of each of the orders, as amended, and as hereby amended, as follows:

PART 1007—MILK IN THE GEORGIA MARKETING AREA

1. In § 1007.60, paragraph (g) is added to read as follows:

§ 1007.60 Handler’s value of milk for computing uniform price.

*(g) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II or Class III milk pursuant to § 1007.42(b) (3) or § 1007.42(d) (2) by a rate for each truckload of milk so moved that is equal to 3.8 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 350 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Atlanta, Georgia; the city hall in Augusta, Georgia; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1006—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

1. In § 1006.60, paragraph (h) is added to read as follows:

§ 1006.60 Handler’s value of milk for computing uniform price.

*(h) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II milk pursuant to § 1006.42(b) or § 1006.42(c) (3) by a rate for each truckload of milk so moved that is equal to 3.8 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 500 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Jacksonville, Florida; the city hall in Tallahassee, Florida; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1004—MILK IN THE MIDDLE ATLANTIC MARKETING AREA

1. In § 1004.60, paragraph (f) is added to read as follows:

§ 1004.60 Pool obligation of each pool handler.

*(f) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II milk pursuant to § 1004.42(d) or § 1004.42(e) (3) by a rate for each truckload of milk so moved that is equal to 3.8 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 200 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Philadelphia, Pennsylvania; the zero milestone in Washington, D.C.; the city hall in Baltimore, Maryland; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1011—MILK IN THE TENNESSEE VALLEY MARKETING AREA

1. In § 1011.60, paragraph (g) is added to read as follows:

§ 1011.60 Handler’s value of milk for computing uniform price.

* * * * *
(g) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II of Class III milk pursuant to § 1011.42(b)(3) or § 1011.42(d)(2) by a rate for each truckload of milk so moved that is equal to 3.6 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 350 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Bristol, Tennessee; the city hall in Knoxville, Tennessee; the city hall in Chattanooga, Tennessee; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

PART 1012—MILK IN THE TAMPA BAY MARKETING AREA

1. In § 1012.60, paragraph (h) is added to read as follows:

§ 1012.60 Handler's value of milk for computing uniform price.

(h) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II milk pursuant to § 1046.60, paragraph (g) is added to read as follows:

§ 1046.60 Handler's value of milk for computing uniform price.

(g) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II milk pursuant to § 1046.60, paragraph (g) is added to read as follows:

§ 1046.60 Handler's value of milk for computing uniform price.

PART 1046—MILK IN THE LOUISVILLE-LEXINGTON-EVANSTON MARKETING AREA

1. In § 1046.60, paragraph (g) is added to read as follows:

§ 1046.60 Handler's value of milk for computing uniform price.

(g) With respect to milk marketed on and after the effective date hereof through June 1982, subtract the amount obtained by multiplying the pounds of bulk fluid milk products that were transferred or diverted from a pool plant to a nonpool plant and classified as Class II or Class III milk pursuant to § 1046.60 or § 1046.60(d)(2) by a rate for each truckload of milk so moved that is equal to 33 cents per hundredweight for each 10 miles or fraction thereof that the nonpool plant is located more than 250 miles (as determined by the market administrator) from the nearest of the following locations: the city hall in Louisville, Kentucky; the city hall in Lexington, Kentucky; the city hall in Evansville, Indiana; the transferor plant; or, for diversions, the pool plant of last receipt for the major portion of the milk on the load or the courthouse of the county where the major portion of the milk so diverted was produced. No credit shall apply to the total quantity of milk so moved to a given nonpool plant by a handler during the month if any portion of the milk is assigned to Class I.

SUMMARY: The Farmers Home Administration recognizes the validity of these comments. The intended effect of this action is to clarify management responsibilities and remove from the regulation certain occupancy requirements which cause underburden to owners and tenants.

DATE: Comments must be received on or before June 22, 1982.

ADDRESS: Submit written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, Room 6346, South Agriculture Building, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address.

FOR FURTHER INFORMATION CONTACT:
Mr. William F. Daniel, Multiple Housing Servicing Officer, Farmers Home Administration, USDA, Room 5321, South Agriculture Building, Washington, DC, telephone (202)382-1611.

SUPPLEMENTARY INFORMATION: The proposed rule has been reviewed under USDA procedures established in Secretary's Memorandum 1512-1 which implements Executive Order 12291 and has been determined to be non-major. The proposed rule contains revisions to the present rule that will have an insignificant effect on the economy. Costs or prices to consumers, individual businesses and industries, Federal, State or local government agencies, or to geographic regions of the country are not expected to increase. The proposed rule is expected to have little or no adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprise to compete with foreign-based enterprise in domestic or export markets.

The Farmers Home Administration has chosen to totally revise its present regulation. The alternatives to issuance of the proposed regulations which were considered, included not changing existing regulations, partial revision of selected portions of the current regulations, and allowing each FmHA State Office to establish procedures consistent with local practices. These alternatives were rejected because they did not promote efficiency in Agency operations, nor assure long term compliance with the objectives for which the FmHA assistance was provided. Moreover, they could lead to a proliferation of regulations and requirements more stringent than necessary and confusing to the public, especially to borrowers with operations in more than one jurisdiction. On this basis the Agency has determined that
Section 1930.122(b)(1) Provision is made for recordkeeping systems on a cash, modified cash, or accrual basis.

Exhibit B—Multiple Housing Management Handbook
II E—A new definition of Management Fee is provided detailing items not included in the fee.
II N—New definitions are included for income from Public Assistance and nonmonetary assistance.

III B 5 and 6—Identifies tenants who may receive rental assistance in exception to the occupancy standard.
IV-Clarifies which projects must have a Management Plan.
IV D 3—A new paragraph is added to clarify when a rent-up fee may be paid.

V B 1—Adds an eligibility requirement that tenants "do not occupy any other Government subsidized housing."
V B 5—Adds authority for owner to issue a 1-year lease to an ineligible tenant to protect the financial interest of the Government.
V B 6—Clarifies that tenants ineligible for reasons other than income are eligible to receive rental assistance and/or interest credit.

V B 5—Gives the State Director authority to make an exception to the occupancy standards in certain cases of older senior Citizen projects with few or no one-bedroom apartments. This removes a hardship created by the occupancy standards when the housing is predominantly 2-bedroom and the primary need for the housing is by single-person households.

VII B 2—Provides provision for lease terminations if rental assistance is no longer available to the tenant. This relieves a hardship on the tenant if the tenant's rent increases because rental assistance expires and renewal rental assistance units are not available from FmHA.

VII B 8—Adds a required lease clause for tenants to certify that this is their permanent residence. This is necessary to prevent tenants from maintaining two subsidized residences, each occupied only a portion of the year.

VII C—Clauses 5b, 5d, 8, 12, 13, 14, 17 and 18 are added as Guides for the State Director to prepare a sample lease for the State.

XI A 1—Revises ledger column in the General Operating Account to track the initial 2 percent operating capital. This is necessary to determine the remaining balance to be released to the borrower in accordance with § 1944.211(d)(8)(ii) of Subpart E of Part 1944.

XI A 1—Revised to clarify the sequence of disbursement of authorized project expenditure, and the retention of unused portions of project income or revenue.

XIII A 4—"Rent overburden" is defined.

XIII B, C, D—The procedure for termination of tenancy is changed. Eviction will now be handled according to the terms of the lease, this subpart, and State law. Eviction for cause covered by State law is no longer covered by FmHA Instruction 1944-L. "Tenant Grievance and Appeals Procedure."

Requirements to comply with both FmHA Instruction 1944-L and State law was creating undue monetary burden on owners because of the 65-day appeal time required before eviction could be started.

Exhibit B-10, 10 A—Revises guide to assist management in determining the ability of tenants to sustain relative independence. The guide is made less technical for people not familiar with individual geriatric assessments.

Exhibit B-10B, 10 C Removed.

Exhibit C—Rent Increases
II—Borrowers are required to apply for rental assistance if a requested rent increase will cause more than 20 percent of the low-income tenants to pay in excess of 25 percent of adjusted monthly income for most of the rent and utilities. The present requirement for the owner to apply for rental assistance if any tenant would pay in excess of 25 percent of adjusted income creates undue burden on an owner for only one tenant in a project. The shortage of rental assistance units has also made it impossible to fill all the rental assistance requests generated as a result of this requirement. The 20 percent requirement is consistent with Exhibit C to FmHA Instruction 1944-L.

III and IV—The processing time for a rent increase has been reduced from a minimum of 90 days to a minimum of 60 days. Tenant comment period has been reduced from 30 to 20 days. The borrower will be notified of the State Director's decision within 45 days of posting of the "Notice to Tenants of Proposed Rent Increase."

Exhibit C-1—Notice to Tenants of Proposed Rent Increase
Tenants are given 60 days prior notice of the rent increase. The Notice to Tenants of Proposed Rent Increase will be signed by the Assistant Administrator of the Rural Housing Service.

Exhibit D—Energy Audit
This exhibit is added to help borrower's comply with the requirements of 10 CFR Part 456 (RCSE). Each project will have an energy audit every 5 years. The borrower's annual report to FmHA will include a copy of the energy audit and the borrower's plan for implementing the recommended improvements if they are cost effective or defer the improvements to be reviewed at the next annual report period.

The energy audit is no longer required for a rent increase. The time required to get the energy audit before a rent increase can be requested delays the rent increase process unnecessarily.

Comments received in response to this proposed rule will be thoroughly evaluated and considered in the development of the final rule.

List of Subjects in 7 CFR Part 1930
Accounting, Administrative practice and procedure, Grant programs—housing and community development, Loan programs—housing and community development, Low and moderate income housing—rental, Reporting and recordkeeping requirements.
Accordingly, FmHA proposes to revise Subpart C of Part 1930 in Chapter XVIII, Title 7, Code of Federal Regulations to read as follows:

PART 1930—GENERAL

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

Sec. 1930.101 General.
1930.102 Definitions.
1930.103-1930.104 [Reserved]
1930.105 Objective of management and supervision.
1930.106-1930.107 [Reserved]
1930.108 Extent of management.

Exhibit D—Energy Audit

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

Authority: 42 U.S.C. 1490, 7 CFR 2.23, 7 CFR 2.70.

§ 1930.101 General.
This subpart prescribes the policies, authorizations, and procedures for management and supervision of the following Farmers Home Administration (FmHA) loan and grant recipients (existing and future).

(a) Farm Labor Housing (LH).
(b) Rural Rental Housing (RRH) including congregate housing.
(c) Rural Housing Site Loans (RHS).
(d) This subpart, with the exception of Exhibit C "Rent Increases," does not apply to individual type borrowers who did not sign a loan agreement. However, the provisions of Part 1944, Subpart E must be followed. In the case of individual type borrowers who are delinquent on their loan payments or are not otherwise carrying out the objectives of their loans, the State Director may require compliance with any sections of this subpart to assure that the objectives of the loan are carried out. For RHS borrowers, the following sections of this subpart do not apply: Section 1930.106, § 1930.124, § 1930.128, and § 1930.141.

§ 1930.102 Definitions.
(a) FmHA. “FmHA” means the United States of America acting through the Farmers Home Administration; it includes FmHA’s predecessor agencies. (b) OGC. “OGC” means the Regional Attorney or the Attorney in Charge in the field office of the Office of the General Counsel of the United States Department of Agriculture.

§ 1930.103-1930.104 [Reserved]

§ 1930.105 Objective of management and supervision.

(a) Each loan or grant made by FmHA is designed to attain the primary objective of providing decent, safe and sanitary housing for low- and moderate-income persons. Therefore, each borrower and grant recipient will be provided supervision to help in accomplishing the objectives of the loan or grant.

(b) To accomplish this objective primary emphasis will be given to the following:
(1) Proper and efficient management policies as prescribed in Exhibit B of this subpart.
(2) Complying with agreements.
(3) Repaying loans on schedule.
(4) Maintaining security property.
(5) Protecting the interests of FmHA.
(6) Operating facilities in accordance with State and local laws and regulations.
(7) Maintaining accounts and records.
(8) Submitting reports and audits.
(9) Processing rent increases in accordance with Exhibit C of this subpart.

§§ 1930.106-1930.107 [Reserved]

§ 1930.108 Extent of management.

In accordance with Exhibit B of this subpart, the borrower or the borrower’s agent will develop a management plan for each project that describes the level of management needed to maintain program objectives. It may be necessary to obtain management from other than the owner. If so, a management agreement is to be used to define the responsibilities of the management agent. This agreement must be accepted by the FmHA loan approval official. A suggested management agreement is provided in Exhibit B-3 of this subpart.
§ 1930.109 Extent of supervision.

All borrowers will be given guidance and advice to help assure successful completion and operation of facilities, compliance with their agreements and obligations, and protection of the FmHA’s financial interest. Supervision does not relieve borrowers of their own responsibilities and obligations. Supervision starts with the first contact with the applicant and continues through the life of the loan or, through any restrictive time period where prepayment is authorized. In the case of a grant, supervision continues until the requirements of the grant agreement have been fulfilled. Supervision of Multiple Family Housing borrowers is a primary responsibility of the District Director; however, additional supervision and guidance will be given by the Multiple Family Housing Coordinator, and/or other members of the State Office staff, as appropriate.

§ 1930.110 Methods of supervision.

Supervisory methods used by FmHA employees include organizational and development planning; management planning; affirmative marketing; construction conferences; long-term, annual, and other periodic planning and evaluation; accounts and records inspections and guidance; project inspections; attendance at membership and governing body meetings; analysis of accounting and audit reports; guidance by memorandums; and similar activities.

(a) Applicants. Prior to loan or grant closing, supervision will largely be conducted during conferences and meetings with prospective borrowers, members, organizing committees; governing bodies, officers, applicant’s attorney, architects, project manager, bookkeeper, other authorized representatives of the applicant, and involved government agencies. Examples are:

(1) Organizational meetings to discuss needs, services available, owner obligations, and to establish steering or organizational committees.

(2) Preapplication and application conferences.

(3) Preconstruction conferences to reach an understanding regarding responsibilities and the manner in which development will be performed. The applicant at this point should be made fully aware of the responsibilities entailed in assuring Fair Housing and/or Equal Opportunity requirements provided by Title VI and Title VIII of the Civil Rights Acts of 1964 and 1968.

(4) Preloan and/or grant closing conferences to review requirements of the loan resolution or agreement, closing requirements, and management plan to establish responsibilities for the operation of the project. The applicant at this point should be made fully aware of the responsibilities entailed in assuring Fair Housing and/or Equal Opportunity requirements provided by title VI and title VIII of the Civil Rights Acts of 1964 and 1968.

(b) Borrowers who have yet to demonstrate their ability and borrowers with problems. When the borrower is establishing its operations, or for borrowers that are delinquent, or have other difficulties, supervisory guidance will include:

(1) Implementation and/or review for compliance with the management plan.

(2) Establishment and maintenance of a recordkeeping and reporting system.

(3) Compliance with the requirements of the loan agreement or loan resolution.

(4) Review of annual audit and budget requirements.

(5) Any other supervision as may be necessary to assure effective and successful operation of the project.

(c) Borrowers who have demonstrated ability. When the borrower has successfully completed its first full fiscal year of operation, is current with its payments, is in compliance with other loan or grant requirements, is maintaining the security in a satisfactory manner, and otherwise is progressing satisfactorily, supervision will consist of at least an annual review of budgets and reports in accordance with § 1930.124, and at least a biennial security inspection. HUD Form 9822, “Report of Physical Condition and Estimate of Repair Costs,” may be used for the inspection. Steps for conducting a review are outlined in Exhibit A of this subpart. Supervision of grant-only recipients will consist of at least the reviews and inspections outlined in § 1930.119 of this subpart.

§§ 1930.111–1930.112 [Reserved]

§ 1930.113 Borrower responsibilities.

Borrowers should understand the difference between FmHA supervised credit and credit from other Federal, State, and conventional sources. Borrowers are expected to have the ability to analyze and plan their activities, initiate and carry out adjustments and improvements, maintain suitable records, meet their obligations, make required reports, and maintain and properly account for project income and security property. Borrower members should understand their organization and the responsibilities of its governing body. That understanding includes the prohibitions against discrimination because of race, color, religion, sex, national origin, marital status, age, physical or mental handicap (applicant must have capacity to execute a legal contract) which accompany all such assistance from FmHA and the need to maintain adequate records by which the borrowers compliance can be measured.

(a) Borrowers with governing bodies.

Those elected or appointed officials comprising the governing body are responsible for:

(1) Knowing their responsibilities and obligations and conducting the affairs of the borrower so that the terms of its agreement(s) with FmHA will be fulfilled.

(2) Maintaining records of all current members and maintaining membership at the required level.

(3) Establishing and maintaining rules, regulations, rent schedules, fees, and other policies necessary for orderly operation of the project, payment of debts, and maintenance of required reserves.

(4) Preparing reports, audits, and other material required by FmHA for sound financial practices.

(5) Holding meetings as required by the organizational documents, and as otherwise necessary, to provide proper control and management of its operations, and to keep the membership informed.

(b) Membership. Members are responsible for full support of the project and operation by:

(1) Paying any dues, fees, and other required charges promptly.

(2) Electing responsible officials.

(3) Complying with organization rules and regulations.

(4) Attending annual and special meetings.

§§ 1930.114–1930.116 [Reserved]

§ 1930.117 Effective supervision.

For effective supervision, FmHA employees who are responsible for making and servicing Multiple Family Housing loans must be familiar with the complexities of the various types of borrowers; communicate effectively with the borrowers, and, if applicable, borrower’s management agent; and provide guidance in the operation and management of projects.

(a) District Director. District Directors supervise a wide range of borrowers, from the individual to public agencies. To provide successful supervision, District Directors will use supervisory...
methods which will be the most effective. This includes but is not limited to the following:

(1) Organize their work and the work of their staffs in order that time is used effectively in providing supervision.

(2) Emphasize to the borrower and/or the borrower's management agent that they, not FmHA, are responsible for managing the project, collecting rents, repayment of the loan on schedule, project maintenance and for compliance with any loan or grant agreement or resolution, State laws and other FmHA requirements.

(3) Monitor all provisions or conditions of the FmHA approval documents that pertain to site development standards and any use restrictions to ensure that they are fully complied with throughout the life of the project.

(4) Monitor the borrowers' compliance with real property tax, insurance, bonding, security, and reporting requirements of FmHA regulations.

(5) Maintain necessary liaison with State and local authorities and agencies. For example, in the case of projects benefiting the elderly, it is essential that liaison be maintained with State and Area Agencies on Aging.

(6) See that State Office records are maintained to assure effective supervision.

(7) Monitor all provisions or conditions of the FmHA approval documents that pertain to site development standards and any use restrictions to ensure that they are fully complied with throughout the life of the project.

(8) Provide adequate advice and guidance to governing bodies as needed.

(9) Avoid doing any of the following:

(i) Try to run the borrower's business.

(ii) Take charge of the borrower's meetings.

(iii) Attempt to supervise the borrower through its attorney or architect.

(iv) Assume that in the absence of adverse complaints, the borrower is proceeding successfully.

(b) State Director. State Directors will:

(1) Coordinate and direct supervisory activities related to borrowers and perform other functions as prescribed by this subpart.

(2) Provide guidance and leadership to assure that the State staff and District Directors thoroughly understand and carry out their responsibilities.

(3) Develop training programs necessary to assure that FmHA personnel are kept up-to-date regarding the most effective supervisory methods, that the proper time is allotted to supervision, and that borrowers receive supervision to the extent necessary.

(4) Maintain necessary liaison with the OGC.

(5) To determine that borrower and/or borrower's management agent is fully complying with all provisions and conditions of the approval document regarding site development and use restrictions.

(b) Frequency. Visits will be made when necessary to assure compliance with FmHA policies and objectives. The District Director after the first year of operation will make one visit at least every two years to each project. Planned visits will be included in the monthly work calendar. The visit shall be conducted with the borrower or its official representative.

(c) Preparation. The District Director will review the most recent monthly or annual reports, the running records, correspondence and other District Office records to determine payment dates of taxes, insurance, and bond premiums. The loan payment status will also be noted.

(d) Recording and reporting. The results of each visit will be recorded in the running record or, when appropriate, a letter summarizing the visit and outlining followup action may be directed to the borrower. Any major problems with the project will be reported in writing to the State Director with recommendations for corrective action. Exhibit A to Subpart A of Part 556 or Form FmHA 485-7, "Report on Real Estate Problem Case", may be used.

(e) Biennial inspections. The District Director will conduct at least a biennial inspection of each project with the borrower, manager or designated-representative present. This inspection may be made simultaneously with a visit scheduled in accordance with this section. The results of the inspection will be documented in the running record and formally recorded on Form FmHA 1930-8, "Year End Report and Analysis for Fiscal Year Ending ."

§§ 1930.120–1930.121 [Reserved]

§ 1930.122 Accounts and records.

Borrowers and grant recipients are required to maintain accounts and records as necessary to conduct their operation successfully, to meet the requirements of Federal, State and local laws and regulations, and to meet the terms of their agreements with FmHA, including such records on occupancy by race and/or ethnic origin that FmHA will need to be able to measure the Fair Housing compliance posture of the borrower during the conduct of compliance reviews. Borrowers and grant recipients will implement
accounting and recordkeeping systems as may be prescribed by FmHA.

(a) Types of record and accounts. The borrower must maintain records and accounts sufficient to provide accurate, permanent, and current information. In order to meet this requirement, the type and form of records and accounts must be determined prior to loan or grant approval. The person responsible for maintaining such records and accounts (and if audits will be required, the Auditor) should be selected prior to loan or grant closing. Borrowers who are required to provide audits should have their auditors develop a recordkeeping system or at least review their systems and agree that it is acceptable for auditing purposes before loan closing. The recordkeeping system must conform to FmHA requirements.

(b) Recordkeeping guides. The following items will be considered in establishing a recordkeeping system:

(1) Accounting records required by the subpart may be prepared on a cash, modified cash, or accrual basis.

(2) The requirements of Federal, State or local laws.

(3) If outside bookkeeping services are available, they may be used if the cost is reasonable. Management agents may also provide this service. The cost of contracting with an outside service or a management agent must be shown separately and will be included in any management fee.

§ 1930.123 [Reserved]

§ 1930.124 Borrower budgets, reports, audits, and analysis.

In order that borrowers establish and maintain adequate business management practices, it is essential that a system of budgets, reports, and analysis of such reports, be established at the onset. Timely reports and budgets will furnish necessary information on which to make sound management decisions essential to efficient operations and provide FmHA with periodic reports that will indicate trends and reflect the type and extent of management assistance needed. Timely analysis of such reports and budgets will reveal potential problems and provide an opportunity for corrective action before such problems develop to the extent that they have an adverse effect on fiscal or operational conditions. All reports and budgets will pertain only to the FmHA financed project. Forms necessary in making the required reports may be provided to the borrower. The following reports will be required, and borrowers and grant recipients will be required to implement a uniform reporting system that may be prescribed by FmHA.

(a) Monthly report. (1) Each borrower will complete Form FmHA 1930-6, "Monthly Report," the first month after:
(i) Completion of a project or occupancy or any units when FmHA provides the construction financing, (ii) FmHA loan closing or occupancy of any of the units where interim financing is used, (iii) reamortization, (iv) transfer, (v) failure to make scheduled payment, or (vi) failure to make or maintain required transfers to reserve. Reports will be completed in accordance with this subpart. The District Director will review the report, take appropriate action and forward one copy of the report to the State Director with comments within 15 days after the end of each month. The State Director will review and when necessary, make any appropriate comments to the District Director.

(b) Annual reports. Each borrower will submit, within 45 days following the close of its fiscal year, a report consisting of:

(1) An audit report or verification of accounts as required by paragraph (c) of this section.

(2) Form FmHA 1930-7, "Statement of Budget, Income and Expense (Excluding Depreciation)," for the year being planned and the actual income and expenses for the previous year. The form will be completed in accordance with the FMI.

(3) Exhibit A-5, "Housing Allowances for Utilities and other Public Services," of Subpart E to Part 1944 when required for the project.

(4) Form FmHA 1930-8, "Year-End Report and Analysis For Fiscal Year," completed in accordance with the FMI.

(5) Copies of the minutes of the annual meeting or other related material that the District Director may request.

(6) An energy audit as required by Exhibit D to this subpart.

(c) Audit reports. Annual audit reports substantially complying with FmHA's "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees," will be provided by FmHA, are required. Audit reports from public bodies must comply with OMB Circular A-102. Audit reports for private nonprofit borrowers must comply with OMB Circular A-110. Audit reports will be provided for each project as follows:

(1) For all projects with 25 or more units, an audit report will be prepared by a (i) Certified Public Accountant (CPA) or (ii) Licensed Public Accountant (LPA) licensed on or before December 31, 1970, except as outlined in paragraph (c)(3) of this section. The CPA or LPA may not be an individual or organization that is closely associated with the borrower in any manner that creates a possible conflict of interest. For example, the CPA or LPA cannot be an employee of the borrower or a member, stockholder, partner, principal, or have any interest in the borrower organization.

(2) For all borrowers with 24 or less units, an audit will not be required except as outlined in paragraph (c)(3) of this section. The borrower will, however, provide for each project a verification of accounts on Form FmHA 1930-8 by a competent individual qualified by education and/or experience who is independent of the borrower or in the case of a nonprofit organization, by a committee of the membership not including any officer, director, or employee of the borrower.

(3) The State Director or District Director may, for good cause, require that the accounts for any project be audited by a CPA or LPA, such as when records are incomplete or inaccurate or it appears that the borrower has not adequately accounted for project income. The State Director or District Director may require that the accounts of RHS borrowers be audited if the loan exceeds the 2-year repayment term.

(4) The State Director or District Director may authorize the initial audit to cover a period up to 18 months for new projects whose first operating year was for a period of 6 months or less.
(5) The State Director may also make an exception to the CPA or LPA audit requirement for not more than one successive year in a specific case providing: (i) The borrower submits a written request and (ii) the FmHA approved budget for the project includes a typical and reasonable fee for the audit but the negotiated cost of the audit will increase the monthly per unit rental rate by more than $2.00; and (iii) the required reports, including a CPA or LPA audit, were properly submitted for the prior year's operations; and (iv) the borrower provides a verification by a competent individual who is independent of the borrower.

(d) Annual analysis. The business of each borrower will be scheduled for analysis each year not later than 60 days following the end of the borrower's fiscal year. The purpose of the analysis will be to determine the degree and adequacy of the borrower's compliance with various FmHA loan or grant agreements; and to provide consultation or supervision in meeting program objectives. The analysis will be completed within the 60 day period except for extenuating circumstances such as the borrower's failure to provide the required information on time.

(1) Preparation for the analysis. No later than 30 days before the end of the borrower's fiscal year, the District Director will:

(i) Notify the borrower of the required reports, the due dates, and provide the borrower with necessary guides and forms for use in preparing reports.

(ii) When applicable, such as a loan to a new nonprofit organization, see that the borrower properly plans for its annual meeting, see that it will be held on the correct date and plan to attend the annual meeting of nonprofit organizations, unless the borrower has progressed as described in § 1930.110(c) of this subpart.

(iii) Arrange to conduct an inspection of the project with the borrower or the borrower's representative so as to comply with the frequency of visits contained in § 1930.119(b) of this subpart.

(2) Conducting the analysis. The analysis will be conducted by the District Director as soon as possible after the required reports are submitted by the borrower. It is not necessary that the borrower be present during the actual analysis provided the information required by Part IV of Form FmHA 1930-8 can be completed from the District Director's knowledge of the operation. The District Director should review each step listed in Exhibit A of this Subpart when conducting the annual analysis and carefully document the results in a memorandum or in the borrower's case file. Exhibit A–1 should be reviewed when analyzing the results of the required audit reports to determine that the reports are in compliance with Agency regulations. Comments and recommendations should also be recorded in the appropriate section of the analysis report.

(e) Distribution of reports and annual analysis information. The information required by this subpart will be distributed according to Exhibits B–6 and B–7 of this subpart.

(f) State Director's review of annual analysis. Upon receipt of the items listed in paragraph (b) of this section the State Director will:

(1) Review the information submitted, obtain any required modifications, approve Form FmHA 1930–7 and provide comments and recommendations by memorandum to the District Director. The State Director may delegate the authority to approve budgets to State Office staff members and to District Directors. If the authority to approve budgets is delegated to District Directors, a copy of approved budgets and annual reports must be sent to the State Office for review.

(2) Be prepared for a review of reports by the National Office upon request.

§§ 1930.125–1930.127 [Reserved]

§ 1930.128 Labor housing grants.

In addition to the supervision provided in connection with LH loans, recipients of LH grants will receive supervision to assure that the terms of the grant agreement and other objectives of the LH grant are carried out. This supervision will be continued for a period of 50 years from the date of the grant agreement unless supervision is terminated by FmHA regulations at an earlier date. Comments on these points will be included in appropriate reports, including assurance that:

(a) The rents are reasonable.

(b) The project is operated as a community service for the benefit of the tenants.

(c) Domestic farm laborers are given absolute priority in occupancy. (This requirement also applies to borrowers who have LH loans only.)

(d) No organization or borrower, other than an association of farmers or family farm corporation or partnership, may require that an occupant work for a particular farm or for a particular owner or interest as a condition of occupancy of the housing.

§ 1930.129 Rural housing site loans.

For RHS loan borrowers the following additional supervisory action will apply to assure that the terms of the loan resolution and loan objectives are carried out:

(a) Review of the site development account records for compliance with authorized loan expenditures.

(b) Work with the borrower on the adjustment of sales price of the developed lots as they are being sold to assure adequate income to repay the loan, pay taxes, accrued interest and any other authorized debt or expenditures.

(c) Determine that lots are sold only to eligible buyers.

(d) Work closely with the borrower to enhance the sale of all lots prior to the due date of the note.

(e) Should the borrower fail to repay the loan as agreed, the District Director should submit a report to the State Director within 30 days containing the following information:

(1) The status of the account, number of lots unsold, and reasons for the problem.

(2) Prospects of selling lots to eligible buyers and a target date as to when this can be accomplished, if feasible.

(3) General comments and recommendations for future servicing of this account. Where necessary, liquidation may be recommended.

(f) State Directors will take the following actions in connection with problem RHS accounts:

(1) Provide additional guidance and assistance as necessary. If the proposal for selling the remaining lots is feasible, is within FmHA authorities, and the account will likely be paid in full within one year, the State Director may continue with the loan until the lots are sold.

(2) Where no satisfactory proposal for selling the remaining lots can be developed, the account will be handled in accordance with Part 1955, Subpart A of this chapter for liquidation.

§§ 1930.130–1930.133 [Reserved]

§ 1930.134 State Office records.

State Directors will maintain records as necessary to assure that the requirements of this subpart are met. Form FmHA 1930–9, "Multiple Housing Activity Card," will be maintained for each loan and/or grant recipient.

§§ 1930.135–1930.136 [Reserved]

§ 1930.137 State supplements, guides, forms, and other issuances.

The State Director may issue State supplements to this subpart as necessary to assure the successful operation of the program. The State Director, with the assistance of the
OGC, may supplement procedures or exhibits as set out in this subpart to the extent necessary to enable borrowers to comply with the applicable provisions of State laws. State supplements to this subpart require prior National Office approval. Under no circumstances will State forms be developed as replacements for the forms referred to in this subpart.

§§ 1930.138–1930.140 [Reserved]

§ 1930.141 Materials to be provided borrower/applicant.

To enable borrowers and applicants to meet the intent of this subpart, they will be supplied with one reproducible copy of the following FmHA exhibits and materials:

(a) Exhibit B and Exhibits B–1 thru B–9 and Exhibits B–10 through B–10A, of this subpart when applicable.
(b) Exhibits C and C–1 of this subpart.
(c) Exhibits B and B–1 of Subpart E of Part 1944 of this chapter.
(d) Exhibit C of Subpart E of Part 1944, of this chapter.
(e) Booklet entitled “Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees.”
(f) The following forms:
   (1) Form FmHA 1930–7 and attached Exhibit A–5 of Subpart E of Part 1944, if applicable.
   (2) Form FmHA 1930–9.
   (3) Form FmHA 1930–8.
   (4) Form FmHA 444–7, “Interest Credit and Rental Assistance Agreement.”
   (5) Form FmHA 444–29, “Project Worksheet for Interest Credit and Rental Assistance.”
   (6) Form FmHA 444–8, “Tenant Certification.”

§ 1930.142 Complaints regarding discrimination in use and occupancy of RH housing.

Any occupant or applicant for occupancy or use of RH or LH housing or related facilities who believes he or she has been discriminated against because of race, color, religion, sex, national origin, age, marital status, physical or mental handicap (must possess capacity to enter into legal contract) should file a complaint with the Secretary of Agriculture (or with the Office of Equal Opportunity), U.S. Department of Agriculture, Washington, DC 20250. If a complaint is made to an FmHA County, District, or State Office, the complaint should be directed to the Office of Equal Opportunity (USDA–OEO) by the Supervisor of that office. If the complaint is forwarded to USDA–OEO by a County or District Office, the State Director will be made aware of the complaint.

(a) It is preferred that the complaint be in writing and signed by the complainant. The complaint may, however, be telephoned to the FmHA District Office. The complainant should provide the following information:
   (1) The name, address, and telephone number of the complainant.
   (2) The name and address of the person committing the alleged discrimination.
   (3) Date and place of the alleged discrimination.
   (4) Any other pertinent information that will assist in the investigation and resolution of the complaint.
(b) If a complaint is received by an FmHA office, the County Supervisor, District Director, or State Director will acknowledge receipt of the complaint and promptly forward it to the USDA Office of Equal Opportunity, Washington, DC 20250.
(c) Accompanying the complaint should be a statement from the District Director or State Director as to whether the security instrument or other document executed by the borrower contains a nondiscrimination agreement. The statement also should include any other information which the State Director or District Director has pertaining to the complaint. The District Director or State Director should delay a comprehensive investigation of any complaint until requested to do so by the National Office.
(d) The USDA Office of Equal Opportunity will determine whether discrimination did in fact occur. Appropriate steps will be taken to ascertain the essential facts. The USDA Office of Equal Opportunity will handle complaints in accordance with Department regulations.
(e) If it is found that the complaint is without substance, the parties concerned will be so notified.
(f) If it is found that the borrower’s discrimination agreement in the security instrument or elsewhere was violated, FmHA will inform the parties of such finding and advise the violator to take the action necessary to correct the violation and to give appropriate assurance of future compliance.
(g) If the borrower should fail to take such action and assure future compliance, the Administrator may take further appropriate action.

§ 1930.143 Exception authority.

The Administrator of the Farmers Home Administration may, in individual cases, make an exception to any requirements of this subpart not required by the authorizing statute if the Administrator finds that application of such requirement would adversely affect (a) the interest of the Government, or (b) the immediate health or safety of the tenants or the community. The Administrator will exercise the authority only at the request of the State Director. The State Director will submit the request supported by data: Demonstrating the adverse impact; Identifying the particular requirement involved; showing proper alternative courses of action; and, identifying how the adverse impact will be eliminated.

§§ 1930.144–1930.150 [Reserved]

Exhibit A–Steps for FmHA Personnel in Conducting Annual Analysis of Rental Operations

I. Examine the Condition of the Records to Determine that:
A. Required records are being properly maintained in accordance with loan resolution or agreement.
B. Decisions of officials are being entered in the minutes book, if applicable.
C. Financial transactions are recorded as they occur in a complete and orderly manner in appropriate books.
D. Any membership or stock transfers have been approved by FmHA as required and are recorded.
E. The records of accounts are maintained by qualified persons.
F. The records are reviewed by an auditing committee or qualified accountant as required.
II. Study the Financial Progress: Compare current financial condition and owner’s equity with previous years to discover any trends, for example:
   A. Has cash carryover increased or decreased?
   B. Are the debts greater or less?
   C. Is the owner’s equity greater or less?
   D. Are accounts receivable greater or less?
   E. Are collection provisions being enforced?
F. Are reserve and other required funds or accounts properly maintained?
III. Study the Statement of Income and Expenditures for the Past Year: Compare it with the budget for the past year and the same statement for previous years.
   A. Were rents, subsidies, and other monies collected sufficient to produce the required revenues for planned expenditures?
   B. Were actual expenditures significantly different from those budgeted?
   C. Were the expenditures sufficient to adequately maintain the project?
   D. Were expenditures reasonable and typical for similar projects?
   E. Were any essential items of maintenance deferred during the past year?
   F. Were payments made on debts in the proper amounts and on the dates agreed to?
   G. If the borrower is operating on a limited profit basis, did net cash return exceed the amount permitted in the loan agreement or loan resolution?
IV. Study the Budget for the Next Year: Compare it with the statement of income and...
I. Purpose. To present a general guide for use of FMHA staffs in the review of independent accountants' audit reports in order to obtain maximum benefit from these audits. The procedures are designed to provide uniformity in the audit review, improve loan program servicing and help to promote better independent audits.

II. General. FMHA guidelines for independent audits are detailed in the booklet, "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees," (hereinafter called Audit Guide and available from FMHA). This Audit Guide, along with other instructions, is designed to protect the security of Government loans. The review of the financial and financially related information in the audits must be performed from a technical standpoint in a prompt manner so that the facts and conclusions are readily available for analysis; only then can results be used effectively for management purposes and help to insure improved audit practices.

III. Scope. The review should include:

A. A determination of the adequacy of the audit in relation to FMHA regulations and Audit Guide.

B. Interpretation of information included in the audit.

C. Preparing a letter to the borrower on any missing or adverse audit data.

D. Informing appropriate FMHA offices of review results and recommendations.

IV. Review Procedures to be Followed.

A. General. The individual professional judgment of the reviewer should be used at all times. Considerations and decisions requiring the exercise of judgment should be used in the following:

1. Circumstances peculiar to the borrower.

2. Degree of importance attached to each item questioned.

3. Number of exceptions.

4. Whether the exceptions relate to the auditors work or the borrower's records and operations.

5. If specific action is to be requested of the borrower.

6. Whether or not the report as a whole is acceptable.

B. Review and Procedure.

1. Specific.

a. Determine if the audit was performed by a Certified Public Accountant or Licensed Public Accountant licensed on or before December 31, 1979.

b. Does the audit cover the most recent 12 months since the previous audit?

c. Was the audit received within 45 days of the borrower's year end?

2. Evaluation Checklist for Audit Reports. The "Evaluation Checklist for Audit Reports" which is part of this Exhibit is designed to systematically record and reveal the audit findings. Information tallied on this form is a good indication of whether or not additional contact needs to be made with the borrower.

3. Previous audits and correspondence. Reference to the prior audit and any correspondence concerning it can be most helpful in the current review. Determine whether corrections requested in the previous year, if any, have been made, and whether the auditor has complied with previous suggestions for improvement in the audit report, if any.

C. Preparing the audit review letter. General. After completion of the "Evaluation Checklist for Audit Reports" which follows and applying personal judgment, a decision must be made on whether or not to prepare an audit review letter similar to that shown as part of this exhibit.

a. If the audit fully complies with the Audit Guide and instructions, a letter is not necessary.

b. If the audit substantially meets the requirements and is lacking in only a few points, ask the borrower to have the auditor furnish this additional information.

c. Audits which are unacceptable should be returned to the borrower for full compliance, indicating the reasons.

IV. Review Procedures to be Followed.

A. General. The individual professional judgment of the reviewer should be used at all times. Considerations and decisions requiring the exercise of judgment should be used in the following:

1. Circumstances peculiar to the borrower.

2. Degree of importance attached to each item questioned.

3. Number of exceptions.

4. Whether the exceptions relate to the auditors work or the borrower's records and operations.

5. If specific action is to be requested of the borrower.

6. Whether or not the report as a whole is acceptable.

B. Review and Procedure.

1. Specific.

a. Determine if the audit was performed by a Certified Public Accountant or Licensed Public Accountant licensed on or before December 31, 1979.

b. Does the audit cover the most recent 12 months since the previous audit?

c. Was the audit received within 45 days of the borrower's year end?

2. Evaluation Checklist for Audit Reports. The "Evaluation Checklist for Audit Reports" which is part of this Exhibit is designed to systematically record and reveal the audit findings. Information tallied on this form is a good indication of whether or not additional contact needs to be made with the borrower.

3. Previous audits and correspondence. Reference to the prior audit and any correspondence concerning it can be most helpful in the current review. Determine whether corrections requested in the previous year, if any, have been made, and whether the auditor has complied with previous suggestions for improvement in the audit report, if any.

C. Preparing the audit review letter. General. After completion of the "Evaluation Checklist for Audit Reports" which follows and applying personal judgment, a decision must be made on whether or not to prepare an audit review letter similar to that shown as part of this exhibit.

a. If the audit fully complies with the Audit Guide and instructions, a letter is not necessary.

b. If the audit substantially meets the requirements and is lacking in only a few points, ask the borrower to have the auditor furnish this additional information.

c. Audits which are unacceptable should be returned to the borrower for full compliance, indicating the reasons.

D. Does the audit substantially meet the requirements and is lacking in only a few points, ask the borrower to have the auditor furnish this additional information.

E. If the audit fully complies with the Audit Guide and instructions, a letter is not necessary.
Dear [Name]:

We have reviewed your audit report for the period [period], prepared by [Preparer]. This review was made in accordance with current FmHA regulations and the Audit Guide entitled "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits of Farmers Home Administration Borrowers and Grantees." Based on this review, your audit:

1. [ ] Is acceptable. However, the auditors recommendations concerning [recommendations]

should be implemented prior to next year's audit.

2. [ ] Is acceptable but did not include comparative-type financial statements as indicated in Section II C of the Audit Guide. Please inform the auditor to prepare such statements next year.

3. [ ] Is acceptable but was not submitted within 45 days after the end of the year. Please insure that next year's audit is forwarded before [date].

4. [ ] Substantially meets all the requirements. However, the following items were omitted as detailed in the Audit Guide, Section II D, "Required Supplemenal Letter." Please have your auditor comment on the number(s) circled and forward a copy to us. These numbers correspond to the 12 items listed in Section II D of the Audit Guide.

5. [ ] Is returned as unacceptable for the following reason(s). Please have the auditor prepare your audit in accordance with the Audit Guide.

a. [ ] It was prepared without audit.
b. [ ] The following financial statements were omitted: (Audit Guide, Section II C)
   ( ) Balance Sheet
   ( ) Statement of Income and Expense
   ( ) Statement of Changes in Financial Position
   ( ) Reconciliation of Owner's Equity
   ( ) The auditor's opinion.
   ( ) Other.
c. [ ] Other.

District Director.

This letter will be prepared in the District Office. A copy of the audit and the approval memorandum will be sent to the State Office.

Exhibit B—Multiple Housing Management Handbook

I. Purpose: This management handbook prescribing Farmers Home Administration regulations, policies and procedures for management of RRH and LH projects will be used by multiple housing borrowers and applicants and their management agents and resident managers. The subject matter is in chronological stages of management considerations. Several exhibits are also included to provide further clarification and guidance. These regulations are intended to assist in the successful operation of FmHA-financed rental projects.

II. Definitions:
A. Farmers Manual Insert (FMI). A type of directive which includes a sample of the form and complete instructions for its preparation, use and distribution.
B. Management Plan. The applicant's written proposal for the overall operation and management of the rental project.
C. Management Agent. The firm or individual engaged by the borrower to manage the project in accordance with a written agreement.
D. Management Agreement. The written agreement between the borrower and management agent setting forth the management agent's responsibilities and fees for services.
E. Management Fee. The compensation for providing overall management services including normal bookkeeping. It does not include operating expenses such as the cost of a resident manager, other personnel, maintenance cost or the cost of project audits.
F. Project Manager. The individual(s) and/or firm(s) responsible for management of the project; could be the owner and/or management agent and/or resident manager.

C. Resident Assistant. A person(s) residing in a congregate housing or group home living unit who is essential to the well-being and care of the senior citizen or handicapped person(s) and who is not related by blood, marriage or operation of the law to the senior citizen or handicapped person(s) residing in the unit and receiving supportive services.

H. Resident Manager. The individual employed by the borrower or the management agent who lives on the site and is responsible for the day-to-day operations of the project.

I. Rental Agent. The individual responsible for the leasing of the units. This individual may be hired by the owner or management agent.

J. Caretaker. The individual(s) employed by the borrower or management agent to handle normal maintenance and upkeep for the project.

K. Senior Citizen. A person 62 years of age or over and may be either the tenant or co-tenant. A person(s) younger than 62 years of age may reside with a senior citizen provided the person is considered a member of the household of the senior citizen. The term "senior citizen" also includes the elderly as used in this Subpart.

L. Handicapped Person. A person, or in the case of a household, either the tenant or co-tenant, who does not need constant supervision or constant medical or nursing care, but meets the qualifications of either of the following Paragraphs according to a doctor's certificate.

1. A person who has an impairment which (a) is expected to be of long-continued and indefinite duration, (b) substantially impeded his or her ability to live independently, and (c) is of such a nature that such ability could be improved by more suitable housing conditions.

2. A person who is developmentally disabled. A developmentally disabled person is handicapped with a severe, chronic disability which: (a) is attributable to a mental or physical impairment or combination of mental and physical impairments; (b) is manifested before the person attains age 22; (c) is likely to continue indefinitely; (d) results in substantial functional limitations in three or more of the following areas of major life activity: (i) Self-care, (ii) receptive and expressive language, (iii) learning, (iv) mobility, (v) self-direction, (vi) capacity for independent living, and (vii) economic sufficiency; and (e) reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

M. Householder. One or more persons who maintain or will maintain residency in one rental unit.

N. Annual Income. Planned income of the tenant, co-tenant, and spouse of either, and all other adults who live, or propose to live, in the rental unit within the next 12 months.

1. Income included. All net business income and gross income anticipated for the following 12 months from wages, salaries, commissions, pensions, social security, public
assistance, GI Bill, fellowships, scholarships, assistantships, unemployment compensation, alimony, and all other sources, except as indicated in Paragraph 2 below, must be counted. This includes:
a. Social Security, child support payments, and other payments made on behalf of minors.
b. Public assistance. If the Public Assistance payment includes an amount specifically designated for shelter and utilities which is subject to adjustment by the Public Assistance Agency in accordance with the actual cost of shelter and utilities, the amount of Public Assistance income to be included as income shall consist of:
   (i) The amount of the allowance or grant exclusive of the amount specifically designated for shelter and utilities, plus,
   (ii) The maximum amount which the Public Assistance Agency could in fact allow for the family for shelter and utilities.
c. All expected overtime and bonus income which can reasonably be considered dependable.
d. Interest proceeds from the sale of equipment, mineral rights, or real estate sold under a long-term installment contract—usually more than 3 years.
e. The value of support provided by others from outside the household including such items as food, housing, clothing, and personal items. The value of each item should be established by mutual agreement between the owner and the tenant using current market value.

(v) The amount of business losses will be considered as "0" in determining annual income. Expenditures for capital items and depreciation expenses shall not be deducted in determining net business income.

3. Exempted income. The following income is not counted:
a. Earnings from employment or income from GI Bill, fellowships, scholarships, or assistantships for schooling received by a full-time student who is not the tenant, co-tenant, or spouse of either.
b. Proceeds from the sale of equipment, mineral rights, or real estate sold under a short-term installment contract (usually 3 years or less).
c. Cash value of food stamps, real estate tax exemptions, or similar types of assistance.
d. Payments received for the care of foster children or services rendered as a volunteer on a project sponsored by any of the following:
   (1) Retired Senior Volunteer Program.
   (2) Foster Grandparent and Older American Community Service Programs (as either a foster grandparent, senior health aid, or senior companion).
   (3) National Volunteer Programs to Assist Small Business and Promote Volunteer Service by Young Business Experience.
   (4) Peace Corps, Vista, or any other volunteer program sponsored by ACTION.
   e. Income received for services rendered by chore service workers residing with a tenant when such person's occupancy is essential to the well-being of the tenant when such services are compensated by a Federal, State, or local assistance program designed to enable such person to achieve or maintain independent living and/or to avoid inappropriate institutionalization.
   f. Allowances paid by the Department of Labor to CETA participants. Wages paid by the employers of CETA workers will be included.
g. The income of a tenant, co-tenant, or spouse of either not living in the rental unit for reasons of broken marriage or separation, and not because of work assignment or military order when:
   (1) Legal papers have been filed with the appropriate court to commence divorce or legal separation proceedings provided the tenant or co-tenant agrees that the spousal support begin to live in the rental unit, that the spousal support income will then be counted toward annual income and the tenant or co-tenant may be required to vacate the unit if no longer eligible for spousal support provided the spousal support begin to live in the rental unit for at least six months after the spousal support income was claimed.
   (2) Papers have not been filed to commence divorce or legal separation proceedings provided the spousal support begin to live in the rental unit apart from the tenant or co-tenant for at least six months, and the tenant or co-tenant is informed and agrees that should the spousal support begin to live in the rental unit, the spousal support income will then be counted toward annual income and the tenant or co-tenant may be required to vacate the unit if no longer eligible from an income standpoint.

4. Deductions from Income. In determining the tenant's annual income, the following deductions may be made:
   a. A deduction may be made in the same manner as outlined in Internal Revenue Service (IRS) regulations for the exhaustion of the tenant's income, the following deductions may be made:
      (i) The value of support provided by others from outside the household including such items as food, housing, clothing, and personal items. The value of each item should be established by mutual agreement between the owner and the tenant using current market value.
   b. The value of support provided by others from outside the household including such items as food, housing, clothing, and personal items. The value of each item should be established by mutual agreement between the owner and the tenant using current market value.
   c. Cash value of food stamps, real estate tax exemptions, or similar types of assistance.
   d. Payments received for the care of foster children or services rendered as a volunteer on a project sponsored by any of the following:
      (1) Retired Senior Volunteer Program.
      (2) Foster Grandparent and Older American Community Service Programs (as either a foster grandparent, senior health aid, or senior companion).
      (3) National Volunteer Programs to Assist Small Business and Promote Volunteer Service by Young Business Experience.
      (4) Peace Corps, Vista, or any other volunteer program sponsored by ACTION.
      e. Income received for services rendered by chore service workers residing with a tenant when such person's occupancy is essential to the well-being of the tenant when such services are compensated by a Federal, State, or local assistance program designed to enable such person to achieve or maintain independent living and/or to avoid inappropriate institutionalization.
      f. Allowances paid by the Department of Labor to CETA participants. Wages paid by the employers of CETA workers will be included.
      g. The income of a tenant, co-tenant, or spouse of either not living in the rental unit for reasons of broken marriage or separation, and not because of work assignment or military order when:
         (1) Legal papers have been filed with the appropriate court to commence divorce or legal separation proceedings provided the tenant or co-tenant agrees that the spousal support begin to live in the rental unit, that the spousal support income will then be counted toward annual income and the tenant or co-tenant may be required to vacate the unit if no longer eligible for spousal support provided the spousal support begin to live in the rental unit for at least six months after the spousal support income was claimed.
         (2) Papers have not been filed to commence divorce or legal separation proceedings provided the spousal support begin to live in the rental unit apart from the tenant or co-tenant for at least six months, and the tenant or co-tenant is informed and agrees that should the spousal support begin to live in the rental unit, the spousal support income will then be counted toward annual income and the tenant or co-tenant may be required to vacate the unit if no longer eligible from an income standpoint.
   d. For purposes of determining interest credit or rental assistance subsidy a deduction may be made for full-time nursing home or institutional type care which cannot be provided in the home for a member of the household who is a senior citizen or handicapped person. Such care must be expected to be required for six months or more. The deduction will be limited to expenditures actually paid for such services. However, for determining eligibility for occupancy, all household income must be counted and the maximum deduction for institutional care may not exceed $400 per month.
   e. Adjusted Annual Income. This is the current annual income of the household as defined in Paragraph II of this Exhibit, less 5 percent and less an additional $300 for each minor person, (excluding the tenant, co-tenant and foster children), who is a member of the household and lives in the rental unit.
   f. Adjusted Monthly Income. This is the amount obtained by dividing the adjusted annual income by 12.
   g. Low-Income Household. A household having an adjusted annual income within the maximum low-income limit stated in Exhibit C of Subpart A of Part 1944.
   h. Domestic farm laborers. Persons who receive a substantial portion of their income as laborers on farms in the United States, Puerto Rico, or the Virgin Islands and either are citizens or residents of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands after being legally admitted for permanent residence, and may include the immediate families of such persons, and as further defined in Section 1944.15(a) of Subpart D of Part 1944.
   i. Migrant. A domestic farmworker who works in any given local area on a seasonal basis and relocates his or her place of residence as farm work is obtained during the year.
   j. RRH means Rural Rental Housing loans.
   k. LH means Labor Housing loans and/or grants.
   l. RHS means Rural Housing Site Loans.
   m. Congregate housing. Housing that affords an assisted independent living environment that offers the senior citizen or handicapped person who may be functionally impaired or socially deprived, but in good health (not acutely physically ill), the residential accommodations, central dining facilities, related facilities, and supporting service(s) required to achieve, maintain or return to a semi-independent life style and prevent premature or unnecessary institutionalization as they grow older. Congregate housing includes:
      1. Housing which has complete kitchen facilities in each unit. However, some or all of the units may have limited kitchen facilities such as a cooktop with a small oven and a refrigerator. In the case of group living arrangements each single family dwelling is considered a unit.
      2. Housing offering a group living arrangement where one or more senior citizens or handicapped persons may share living space within a rental unit in which a
resident assistant is normally required. The housing may consist of one or more single family dwellings or a multi-unit structure.

III. Rent Subsidy Opportunities: Because of high housing costs, it is often extremely difficult to house families with low and moderate incomes without some type of rental subsidy. The subsidy programs available should be considered at the time of developing a project proposal. In some cases, they should be used in an existing FmHA-financed project where persons are required to pay more than 25 percent of their adjusted income, a threshold specified in Section 521 of Title V of the Housing Act of 1949, as amended, for the cost of rent and utilities. These subsidy programs are as follows:

A. FmHA Interest Credit—Section 515 Loans. Regulations are contained in Exhibit B to Subpart E of Part 1944.

1. Plan I—Available only to broadly-based nonprofit corporations and consumer cooperatives.
   a. Occupancy is limited to low-income nonminor citizens, low- and moderate-income senior citizens, and low- and moderate-income handicapped persons.
   b. Budgets and rental rates are based on a 3 percent loan. The difference between the note rate of interest and the 3 percent interest is made up in the form of an interest credit to the borrower’s account.
   c. Normally this plan would only be considered during the development of a new project proposal when greater benefits cannot be achieved for the prospective tenants under interest credit Plan II.

2. Plan II—Available to broadly based nonprofit corporations, consumers cooperatives, State or local public agencies, or to profit organizations and individuals operating on a limited profit basis.
   a. Occupancy is limited to low and moderate-income persons except as noted in paragraph V B 1 of this exhibit.
   b. Budgets for the housing are prepared for two rental rates—basic and market. Minimum (basic) rental rate is based on a 3 percent loan. The maximum (market) rental rate is based on the interest rate shown in the promissory note.
   c. Tenants pay 25 percent of their adjusted income, less a utility allowance if applicable, or the basic rental rate, whichever is the greater. In no case will the tenant pay more than the market rental rate.
   d. Existing rural rental housing borrowers whose loans were approved subsequent to August 1, 1968, may convert to Plan I or Plan II, or if presently profit motivated, convert to Plan I by executing a new or amended loan resolution or loan agreement and an interest credit and rental assistance agreement in accordance with Exhibit B of Subpart E of Part 1944 of this chapter.

B. Rental Assistance Program—FmHA. This is a subsidy program available to RRH and LH borrowers to assist low-income tenants in paying their rent. Rental assistance is not authorized for tenants whose adjusted income is above the low-income level. LH borrowers who are individual farmers, partnerships, family corporations, or association of farmers cannot obtain rental assistance. RRH borrowers with loans approved after August 1, 1968, must be, or change to, operating under Interest Credit Plan II. Full Profit borrowers may utilize rental assistance by converting to Limited Profit as required in Exhibit C to Subpart B of Part 1944 of this chapter.

1. Occupancy requirements are the same for Plan II and/or RA borrowers.
   a. Tenants occupying a unit and eligible to receive rental assistance, pay 25 percent of their adjusted income, less an approved utility allowance if applicable. The difference between the amount of rent paid by the tenant and the basic rent (for labor housing the established FmHA approved rental rate) is paid to the borrower as a rental assistance payment.
   b. Existing multiple housing loan applicants wanting to participate should make the request a part of their loan application.
   c. Regulations for this program are contained in Exhibit C to Subpart E of Part 1944 of this chapter.

2. Tenants occupying a unit and eligible to receive rental assistance pay 25 percent of their adjusted income, less an approved utility allowance if applicable. The difference between the amount of rent paid by the tenant and the basic rent (for labor housing the established FmHA approved rental rate) is paid to the borrower as a rental assistance payment.

3. Existing multiple housing loan applicants, including eligible labor housing borrowers, may request to participate in the program by contacting the appropriate FmHA District Office. Multiple housing loan applicants wanting to participate should make the request a part of their loan application.

4. Regulations for this program are contained in Exhibit C to Subpart E of Part 1944 of this chapter.

5. Tenants who begin occupancy prior to November 14, 1977, do not have to meet the occupancy standard in Paragraph VB 1 of this Exhibit. As long as such tenants maintain occupancy and are otherwise eligible, they may receive rental assistance.

6. Tenants who begin occupancy between November 14, 1977, and October 26, 1980, maybe receive rental assistance provided they meet the occupancy standard in Paragraph VB 1 of this Exhibit or agree in writing to move to the first available unit of appropriate size. However, if there is not a unit of appropriate size in the project to which a tenant can move, a tenant who is otherwise eligible, may remain and receive rental assistance.

C. Department of Housing and Urban Development (HUD)—Section 8 Housing Assistance Payments Program. This program is similar to the FmHA subsidy rental assistance program but is administered by HUD. There are two programs, one for new construction and rehabilitation and another for existing housing. The FmHA and HUD have entered into a Memorandum of Understanding (Exhibit H to Subpart E of Part 1944 of this chapter) wherein HUD sets aside units for use by FmHA for new construction financed with rural rental housing loans. Additional information on the HUD Section 8 program is contained in Exhibits G and H to Subpart E of Part 1944. HUD Section 8 rules and regulations will be followed for those tenants receiving subsidy under the HUD Section 8 programs except that tenants must have adjusted income not in excess of the FmHA moderate income level to be eligible for occupancy.

IV. Management Plan:

A. General. A comprehensive management program commensurate to project size and complexity is essential to the successful operation of a project. A written plan is the primary ingredient which should describe the detailed policies and procedures in managing the project. A management plan is required for all proposed multiple housing projects, existing projects in which the loan was approved after October 27, 1980, and existing multiple housing projects where the State Director determines a management plan is needed to achieve program objectives. The plan, in detail commensurate to project size and complexity, must be submitted to FmHA with the loan application. (Form AD 625, “Application for Federal Assistance (Short Form”). Exhibit B-1 of this subpart outlines the requirements of the plan. The following items should be addressed in the plan, some of which are discussed later in more detail:

1. The relationship between owner and management agent (if applicable).
2. Personnel policy and staffing arrangements.
3. Publicizing and achieving early occupancy and affirmative marketing.
4. Tenant certification and verification of income.
5. Tenant admissions policies and leasing policies.
6. Rent collection.
7. Rent increases.
8. Marketing.
9. Records maintenance and reports.
11. Management-tenant relations.
12. Termination of leases and evictions.
13. Management of Services to the Elderly (if congregate housing project).
14. Management Background and/or Experience.
15. Management agreement (if applicable).

B. Management agreement. The management agreement is a primary management ingredient and bears a close relationship to the management plan. Requirements of a management agreement are listed in Exhibit B-2 of this subpart. A management agreement is required except in cases where the borrower (owner) fills the role of manager. The management agreement is the primary document by which the management agent is guided and evaluated. Exhibit B-3 of this subpart is a suggested management agreement. There are two types of agreements acceptable to FmHA, described as follows:

1. The owner hires a professional management agent to operate the project. The management agent may provide a resident manager for onsite management and/or caretaker when justified by the size of the project, a qualifications statement by the management agent is required in accordance with Exhibit B-4 of this subpart.
2. The owner maintains all or a part of the management role. A qualifications statement by the owner in accordance with Exhibit B-5 of this Subpart is also required. The owner may use the services of a resident manager in providing onsite management and/or services of a caretaker when justified by the size of the project.

C. Responsibility. Regardless of the management system used, the management plan and management agreement or contract must be based on applicable provisions of local, State, and Federal statutes and the regulatory requirements of the loan used to finance the project. Regardless of the authority delegated by the owner to the management agent, the owner remains totally responsible to FmHA for the project.
D. Compensation.

1. Projects with management agent. The amount of compensation is to be negotiated between the owner and the management agent. The compensation should be based on the agent's management cost plus a reasonable profit converted to a percentage of gross rents collected for each occupied unit. Gross rent includes any rental assistance and/or interest credit paid by the Government. The percentage may vary from project to project depending upon size, complexity, services to be provided, type of project, and other pertinent factors, such as comparable fees for the area in which the project is located.

The management agreement must be specific as to services to be provided that are comparable to those typically provided by a management agent. The agreement must be in writing and signed by both the owner and the management agent. The agreement must be reviewed and approved by the FmHA.

In cases where there is not an identity of interest as defined in § 1924.4(b) of Subpart A to Part 1024 between the management agent and the borrower, such as when the owner is an individual or a part of an organization, the management agent must have the necessary management capabilities, and the owner must agree to manage the project. The management agreement must include a detailed description of the services to be provided and the compensation to be paid.

2. Owner managed projects. Only when FmHA determines that the owner (either as an individual or as a part of an organization) has the necessary management capabilities, will the owner be authorized to manage the project. A typical management fee may be charged and charged as an expense to the project. The compensation must be reasonable, earned, and not exceed the normal cost of similar management services for the project, and such services must be provided by an independent management agency.

This compensation will never include costs normally included in the project budget for other allowable operation and maintenance expenses such as renter, resident manager, resident manager, recordkeeping, etc.

3. Initial Rent-Up Fees. Rent-up fees are allowed as an incentive to achieve full project occupancy of newly completed units soon after initial occupancy is permitted. These fees are subject to the extent that each rental unit is occupied by an initial tenant household. Payment may be made from the 2 percent initial operation and maintenance deposit as follows:

a. If there is an identity of interest as defined in § 1924.4(b) of Subpart A to Part 1024 between the management agent and the borrower, such as when the owner is an individual or a part of an organization, rent-up fees may be allowed but only up to reasonable actual cash expenditures.

b. In cases where there is not an identity of interest, a person or firm, preferably the management agency, may manage the project and be compensated at a rate negotiated with the borrower. The rate should be representative of actual cost plus a normal business profit.

E. Resident Manager and/or Caretaker Services. Whether a project is managed by a management agent or by the owner, the onsite services of a resident manager and/or caretaker may be used when justified by the size of the project. In such cases, there should be a written agreement with the resident manager to define the role and duties of the resident manager as distinct from the owner and which can be used as a basis for evaluating the resident manager. A project must generally have a minimum of twelve rental units in order to justify the services of a resident manager.

For larger projects, FmHA may require an onsite resident manager and/or caretaker. It is desirable but not mandatory that the resident manager and/or caretaker meet the tenant eligibility requirements for occupancy in the project. If a full-time resident manager and/or caretaker is not needed, these functions should, if at all possible, be performed by an eligible tenant.

1. Calculation of rental rate. For the purposes of calculating an appropriate rental rate for a resident manager and/or caretaker and for determining the borrower's appropriate payment on Form FmHA 444-29, "Project Worksheet for Interest Credit and Rental Assistance," the following policies will apply:

- Compensation paid to the resident manager and/or caretaker for services rendered will be reflected in the operation and maintenance expenses of the project and be included in the annual income of the resident manager and/or caretaker. This will include the value of any in-kind compensation received. When a living unit is provided at no cost or at a reduced cost to the resident manager and/or caretaker, the rental value of that rental unit for all projects except those operating under interest credit Plan I will be calculated at the FmHA approved market rental rate for the size of unit occupied. For interest credit Plan I projects, the value of the rental unit will be calculated at the FmHA approved market rental rate for the size of unit occupied, plus 25 percent.

- For resident manager and/or caretaker not provided a living unit at no cost, the rental rate will be calculated as follows:

   a. If the resident manager and/or caretaker meets the tenant eligibility requirements for the type of project being occupied, the appropriate rental rate will be the rate established for an eligible tenant in accordance with Paragraph V.B of this Exhibit.

   b. If the resident manager and/or caretaker does not meet the tenant eligibility requirements for the type of project being occupied because the resident manager's and/or caretaker's adjusted annual income exceeds the maximum income limits, the resident manager's and/or caretaker's appropriate rental rate for all projects except those operating under interest credit Plan I will be the FmHA approved market rental rate for the size of unit occupied. For interest credit Plan I projects, the appropriate rental rate will be the FmHA approved market rental rate for the size of unit occupied, plus 25 percent.

2. Owner Occupancy. Since homeownership is not an objective of the FmHA Multiple Housing loan programs, owners will not be permitted to occupy a project unless the owner will manage the project (rather than hiring a management agent), the size of the project (usually more than 12 units) justifies the services of a resident manager and/or caretaker, and the owner is determined capable and will perform these services. The rental rate for the owner-manager shall be calculated in the manner described in Paragraph IV.E 1 of this Exhibit.

E. Projects Without a Resident Manager and/or Caretaker. Projects without a resident manager and/or caretaker must have, at a minimum, a tenant who is agreeable to serve as a contact person or a person who is easily accessible to the project who is able to speak on behalf of project management or owner.

V. Renting Procedure: Planning for initial rent-up occupancy and maintenance should begin months ahead of the projected completion of the project. Decisions must be made concerning advertisement of the availability of units, how affirmative marketing practices will be used, tenant eligibility, and tenant selection criteria.

A. Affirmative Fair Housing Marketing Plan: All borrowers with five or more rental units must meet the requirements of § 1901.203(c) of Subpart E of Part 1901 of this chapter by preparing and submitting an "Affirmative Fair Housing Marketing Plan on HUD Form 935.2. Records must be maintained by the borrower reflecting efforts to fulfill the plan and will be subject to review by FmHA during compliance reviews for Title VI. The approved plan will be made available by the borrower for public inspection upon request at the borrower's place of business or rental office which must be in the same local area as the housing. In developing the plan, the following items should be considered:

1. Direction of Marketing Activity. The plan should be designed to attract applications for occupancy from all potentially eligible groups of people in the housing marketing area regardless of race, color, religion, sex, age, marital status, or national origin, or physical or mental handicap (must possess capacity to enter into legal contract). The plan must show efforts will be made to reach those low-income and minority persons who traditionally would not be expected to apply for such housing without special outreach efforts.

2. Marketing Program. The applicant or borrower should determine which methods of marketing such as radio, newspaper, TV, and signs, etc. are best suited to reach those low-income and minority persons who otherwise might not apply for occupancy in the project. The Agency on Aging serving the particular community should be contacted to assist in reaching senior citizens.

a. Signs, Brochures, Etc. Any signs, pamphlets, or brochures used must contain appropriate equal opportunity statements. A copy of this proposed material should be submitted with the HUD Form 935.2 for approval. The nondiscrimination poster entitled, "And Justice For All" and/or the "Fair Housing" poster must be displayed in the rental office.

b. Community Contact. In small communities where there may not be formal communications media aimed at minorities, contacts with special interest groups such as places of worship and social organizations should be made in affirmative marketing. Community contacts may also be used in reaching specific elements of the community
such as the elderly or particular ethnic groups.
c. Rental Staff. All persons responsible for
rental of the units will be instructed in the
procedures and requirements of the
Affirmative Fair Housing Marketing Plan and
in those actions necessary to carry out the
plan in promoting equal housing opportunity.
3. The borrower will be required to provide
data in accordance with Subpart E of Part
1901 of this Chapter, pertaining to compliance
reviews to indicate to what extent minority
groups are being benefited.
B. Tenant Eligibility: It is important that
the rental agent of the project be
knowledgeable about the FnHA eligibility
requirements as they relate to a particular
project. FnHA loans are made on housing
projects contingent upon the units being
occupied by eligible tenants.
1. Eligible Tenants. Eligible tenants may
be either (1) senior citizens, handicapped, or
low- and moderate income persons or any
combination thereof in a Rural Rental
Housing projects or (2) domestic farm
laborers in a Labor Housing project; as
planned for the project and shown on the
borrower’s loan resolution or loan agreement
who do not occupy any other Government
subsidized housing and who comply with the
following number of authorized occupants in
the units:

<table>
<thead>
<tr>
<th>No. bedrooms</th>
<th>Occupants</th>

<td>6</td>
</tr>
</tbody>
</table>

The above occupancy requirements for
eligibility of migrants may not be applicable.
Density levels will be determined in those
cases based on project design.
In other cases, when a unit cannot be
rented because a family of the size needed to
rent the unit is not available or the project
was built for the elderly prior to October 27,
1980, the State Director may authorize an
exception to this requirement in accordance
with Paragraph V B 5 of this Exhibit. Also in
case of unusual household situations such as
a single parent with older children of
opposite gender the State Director may make
an exception to the above requirements on a
case by case basis and determine the
household eligible.
a. Tenants must generally be capable of
caring for themselves. However, in the case
decongregate housing with supportive
services, eligible tenants may include elderly
or handicapped persons who require some
supervision and central services, but are
otherwise able to care for themselves. In
congregate housing projects, the tenant or
tenant’s level of function and degree of
competence in performing daily living
activities must be assessed by the borrower
and the tenants may be permitted occupancy
if found to possess the ability to sustain
relative independence, given the supportive
services in the project. See Exhibit B-10,

"Objective Guides to Assist Management in
Determining the Ability of Tenants to Sustain
Relative Independence," All tenants must
meet the following criteria:
(1) Not be totally dependent on others to be
able to vacate the unit for their own safety in
emergency situations.
(2) Be able to provide for their own sustenance in projects that provide less than
full food service.
(3) Possess the legal capacity to enter into
a lease agreement, except in the case of
tenants residing in a congregate housing
project who have a legal guardian.
(4) Be of legal age.
b. For projects under Plan I:
(1) Be a low- or moderate-income senior
citizen or a low- or moderate-income
handicapped person.
(2) Be a low-income non-senior citizen or a
low-income, non-handicapped person.
c. For loans developed under Plan II and all
other RRH loans, be a low- or moderate-
income person or senior citizen or
handicapped person of any income.
d. For LH projects and for those RRH
projects designed for independent living and
designated to provide housing specifically for
senior citizens and/or handicapped persons
as defined in Paragraph II of this Exhibit,
occupancy is limited solely to those meeting the
eligibility requirements for the persons for
whom the housing is designed and designated
(i.e., domestic farm laborers, senior citizens,
and/or handicapped persons), except that
occupancy may be permitted by a person or
persons, usually a member of the household
of the domestic farm laborer, senior citizen,
or handicapped person. However, the total
income of all adult members in the household
and the number of persons to occupy the unit
cannot exceed eligibility requirements.
e. In a congregate housing or group home
dependent living project, a Resident
Assistant may occupy living space without
regard to income.
When the purpose of the program is to
provide adequate housing for the eligible
permanent residents of the community, a
student or other seemingly temporary
resident of the community who is otherwise
eligible and seeks occupancy in a project,
other than farm workers in the case of Labor
Housing projects, may be considered an
eligible tenant if all of the following
conditions are met:
(1) They are eligible occupants in all other
respects,
(2) They occupied the unit at the time that
the original tenant ceased to occupy the unit,
(3) The State Director determines on a
yearly basis that their occupancy will not be detrimental to
preserving the integrity of the project.
b. Surviving members of a domestic farm
laborer household must meet the definition of
domestic farm laborer as defined in
Paragraph II of this Exhibit or vacate the unit
within 30 days if an eligible tenant is
available for occupancy unless the State
Director provides an extension of time
because of an extreme hardship placed on
the household.
4. Formerly Eligible Tenants.
a. Formerly eligible tenants who no longer
meet eligibility requirements because of
income or in the case of an LH project,
because of occupation, except as authorized
in Paragraph B 1 b, may not be permitted
continued occupancy of the project as an
eligible tenant and must vacate the unit
within 30 days or the end of term of lease
whichever is longer if an eligible tenant is
available for occupancy. The District Director

would be the required but unable
to pay more than 25 percent of adjusted
income for rent including utilities may be
eligible for Section 8 subsidy if it is being
administered in the area.

Priority to displaced tenants in
accordance with § 1944.220 of Subpart E of
Part 1944.
3. Surviving Members of Eligible Tenant
Household.
a. Surviving members of a senior citizen
and/or handicapped tenant’s household may
continue occupancy of the project even
though they may not meet the definition of a
senior citizen or handicapped person stated in
Paragraph II of this Exhibit, provided:
(1) They are eligible occupants in all other
respects,
(2) They occupied the unit at the time that
the original tenant ceased to occupy the unit,
(3) The State Director determines on a
yearly basis that their continued
occupancy will not be detrimental to
preserving the integrity of the project.
b. Surviving members of a domestic farm
laborer household must meet the definition of
a domestic farm laborer as defined in
Paragraph II of this Exhibit or vacate the unit
within 30 days if an eligible tenant is
available for occupancy unless the State
Director provides an extension of time
because of an extreme hardship placed on
the household.
4. Formerly Eligible Tenants.
a. Formerly eligible tenants who no longer
meet eligibility requirements because of
income or in the case of an LH project,
because of occupation, except as authorized
in Paragraph B 1 b, may not be permitted
continued occupancy of the project as an
eligible tenant and must vacate the unit
within 30 days or the end of term of lease
whichever is longer if an eligible tenant is
available for occupancy. The District Director

would be the required but unable
to pay more than 25 percent of adjusted
income for rent including utilities may be
eligible for Section 8 subsidy if it is being
administered in the area.

Priority to displaced tenants in
accordance with § 1944.220 of Subpart E of
Part 1944.
3. Surviving Members of Eligible Tenant
Household.
a. Surviving members of a senior citizen
and/or handicapped tenant’s household may
continue occupancy of the project even
though they may not meet the definition of a
senior citizen or handicapped person stated in
Paragraph II of this Exhibit, provided:
(1) They are eligible occupants in all other
respects,
(2) They occupied the unit at the time that
the original tenant ceased to occupy the unit,
(3) The State Director determines on a
yearly basis that their continued
occupancy will not be detrimental to
preserving the integrity of the project.
b. Surviving members of a domestic farm
laborer household must meet the definition of
a domestic farm laborer as defined in
Paragraph II of this Exhibit or vacate the unit
within 30 days if an eligible tenant is
available for occupancy unless the State
Director provides an extension of time
because of an extreme hardship placed on
the household.
4. Formerly Eligible Tenants.
must monitor the borrower's efforts to locate eligible tenants.

b. Formerly eligible tenants who no longer meet tenant eligibility requirements regarding number of occupants in the size unit, except as outlined in Paragraph VB 1h, must move to a unit of appropriate size in the project when it becomes available. The District Director must monitor the tenant's efforts to find a unit of appropriate size for the household.

c. An exception may be made if the borrower can provide a written request with the necessary documentation, to rent units to ineligible persons for temporary periods to protect the financial interests of the Government. This authority will be for periods not to exceed one year and shall apply to the vacant units in the project. The State Director may redelegate this authority to selected District Directors. The following determinations must be made:
   (1) There are no eligible persons on a waiting list.
   (2) The borrower provided evidence that he/she has made a diligent but unsuccessful effort to rent units to eligible tenants, household. Such evidence must consist of advertisements in appropriate publications, posting notices in several public places, holding open houses, appropriate contacts with public housing agencies and authorities (where they exist), State and local agencies and organizations, Chamber of Commerce, real estate agencies, and other places where persons seeking rental housing would likely contact.
   (3) The borrower will continue with aggressive efforts to locate eligible tenants and submit to the District Office, along with Form FmHA 444-29, a report of efforts made. The required followup should be posted in the District Office on Form FmHA 1905-6, "Management System Card—Multifamily Housing."
   (4) In order to protect the security interest of the Government, the units may be rented for no more than a year after which the lease must convert to a monthly basis. The monthly lease must require that the unit be vacated when an eligible prospective tenant is available. The ineligible tenant will then be given 30 days to vacate.
   (5) In those cases where the tenant household does not consist of the appropriate number of occupants for the size unit, the lease will require the tenant, after receiving reasonable notice, to make reasonable adjustment in household composition or vacate and move into the next available unit of appropriate size.
   (6) Tenants who are ineligible, because their household income exceeds the maximum for the project, will be charged the FmHA approved rental rate for the size unit occupied. In projects operated under Interest Credit Plan I, however, ineligible tenants will also be charged an additional rental surcharge of 25 percent of the approved market rental rate.
   (7) Tenants who are ineligible for reasons other than income may benefit from rental assistance and/or interest credit if otherwise eligible in the same manner as an eligible tenant.
   a. Examples of situations where the State Director may consider authorizing a borrower to rent units to ineligible persons when units cannot be rented to eligibles are:
      (1) A project designed for, designated as, and limited to moderate-income senior citizens and/or handicapped persons.
      (2) A household that does not consist of the appropriate number of occupants for the size unit.
      (3) A household that does not meet eligibility requirements regarding income, i.e., an above moderate-income household.
      (4) An exception may be made by the State Director to the provisions of Paragraph V B 1 on the number of occupants for a senior citizen project built before October 27, 1980, with only a few or no one-bedroom units, with the following priority for occupancy.
         (i) First opportunity for occupancy must be given to senior citizens or handicapped persons on the waiting list who meet the occupancy standard.
         (ii) If the list is full, senior citizens or handicapped persons on the waiting list meeting the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.
         (iii) This determination of eligible status will be included in the tenant's lease.
   (5) Non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.
   (6) If the list is full, senior citizens or handicapped persons on the waiting list that meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.
   (7) This determination of eligible status will be included in the tenant's lease.

(2) If there are senior citizens or handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(3) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(4) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(5) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(6) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(7) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(8) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(9) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(10) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(11) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.

(12) If there are non-senior citizens and non-handicapped applicants on the waiting list who meet the occupancy standard, a senior citizen or handicapped household that does not meet the occupancy standard may be authorized occupancy as an eligible tenant.
A. Verification of Income from Employment. Tenant/applicant authorized verification of income from employment must be obtained from the employer in writing and filed in the Tenant Record File. A suggested Employment Inquiry form is attached as Exhibit B-9.

B. Verification of Income from Other Sources. Income is from other than employment (e.g. social security, Veterans Administration, public assistance) it must be verified in writing by the income source. If it is not immediately possible to obtain the written verification from the income source, the income may be verified in the interim by examining the income checks, check stubs, or other reliable data the tenant possesses which indicates the tenant’s gross income. Verification may also be obtained through contacts with individuals who may be knowledgeable of the tenant’s income. If no other verifiable source is available, a notarized affidavit from the tenant attesting to his/her gross annual income may be accepted. Verification of income must be documented and filed in the “Tenant Record File.” In the case of domestic farm laborers, including migrants, who so not have easily verifiable income, the borrower may project monthly income expected to be received by the tenant during occupancy for determining eligibility and subsidy assistance.

C. Random Sample of Tenant Income Verification. District Directors are required to make a random sample of tenant income verifications. The random sample can be devised from information on the tenant certification forms that will be submitted to the District Office in accordance with Paragraph VI E of this Exhibit. The random sample should be representative of both low- and moderate-income persons in the project, including those receiving subsidy assistance, those paying in excess of 25 percent of their income for the costs of rent and utilities, and those paying the market rent. District Directors will conduct the random sample in the borrower’s office during their supervisory visits and at any time he/she may be knowledgeable of discrepancies in income verifications. If the random sample discloses discrepancies, the District Directors will be required to investigate further or report to the State Director in the assistance of the Office of Audit or the Office of Investigations.

D. Use of HUD Certification Form for Section 8 Recipients. For projects where the tenants are receiving Section 8 assistance, HUD Form 444–8 Certification and Recertification of Tenant Eligibility may be used in lieu of Form FmHA 444–8 for the tenants receiving Section 8 assistance.

E. Certification of Tenant Income. The Borrower, in connection with the District Office Form FmHA 444–8 or the acceptable HUD Form for each tenant. The initial signed tenant certification will be submitted to the FmHA District Office with the next monthly payment following the date that the tenant occupies the unit. In those cases where income verification must be delayed and occupancy has occurred, a copy of the original tenant certification will be submitted with the next monthly payment. The original tenant certification with the borrower or management agent certification that income has been verified will be submitted to the District Office within 60 days. The borrower or management agent will establish an adequate record to be documented of tenant certifications to assure the completion of the income verification responsibility. Subsequently signed tenant certifications of verified income must be obtained by all borrowers no later than the twelfth month after the previous certification and submitted to the FmHA District Office, except that subsequent certifications for senior citizens receiving Section 8 Assistance may be obtained biennially.

VII. Leases: A lease is written contract between the tenant and the landlord assuring the tenant quiet, peaceful enjoyment and exclusive possession of a specific dwelling unit in return for payment of rent and reasonable protection of the property.

A. Form of Lease. Each State Director is encouraged to prepare a sample lease form complying with individual State laws and FmHA requirements. The State Director may incorporate the Tenant Record File as a specific need. Any sample lease must be reviewed and approved by the OGC before adoption. The approved sample lease may be provided to borrowers as a guide for preparing an acceptable project lease.

1. All leases will be in writing and must cover a period of at least 30 days but not more than 1 year. In cases of labor housing, the weekly or biweekly labor may be weekly where occupancy is typically seasonal. In areas where there is a concentration of non-English speaking individuals, leases and the established rules and regulations for the project written in both plain English and the non-English concentration language must be available to the tenants. The tenant should have the opportunity to execute either lease form.

2. Annual leases must contain an escalator clause permitting rental increases in basic and market rents prior to the expiration of the lease. Such increases would normally be necessary due to higher utility and other operating costs. Such increase must be approved by FmHA in accordance with Exhibit C of this subpart.

3. The form of lease to be used by the borrower and any modifications of the lease must be approved by the FmHA District Director. When submitting a lease form for FmHA approval, it must be accompanied by a letter from the borrower’s attorney regarding its legal sufficiency and compliance with Federal and State Law and FmHA regulations.

4. A copy of completed Exhibit A-5 “Housing Allowances for Utilities and Other Public Services,” of Subpart E of Part 1944 and a copy of the established rules and regulations for the project will be provided to the tenant as attachments to the lease.

B. Required Lease Clauses. The following clauses will be required in leases used in connection with FmHA financed housing projects.

1. For all leases used in connection with FmHA financed RRH projects, the following clause will be included except for senior citizens and handicapped persons: "I understand that I will no longer be eligible for occupancy in this project if my income exceeds the maximum allowable adjusted income as defined by the Farmers Home Administration for the (State/Territory)."

2. For leases in connection with borrowers participating in the FmHA rental assistance program according to Exhibit C of Subpart E of Part 1944 of this chapter, the following clauses will be used. These clauses should be made an addendum to the lease and should be signed by the lessor and lessee.

   "I understand and agree that as long as I receive rental assistance, my total monthly payment for rent and utilities will be $ —— (25 percent of my adjusted monthly income). If I pay any or all utilities directly (not including telephone or cable T.V.), a utility allowance of $ —— will be deducted from my monthly payment for rental and utilities. If the utility allowance is in excess of 25 percent of my adjusted monthly income, the lessor will pay me this excess.

   I further agree to notify the lessor of any permanent increase in adjusted monthly income or change in the number of family members living in the household. I understand that if as a result of such a change I become eligible for additional rental assistance benefits to which I am not entitled, I may be required to make restitution and I
agree to pay any amount of benefits received to which I was not entitled.

I also understand and agree that monthly payments for this lease may be raised or lowered, based on changes in household income and changes in the number and age of members living in my household and based on the escalation clause in the lease. Should I no longer receive rental assistance as a result of these changes, or the rental assistance agreement executed by the owner and FmHA expires, I understand and agree that my monthly payment for rent may be adjusted to no less than $—— (Basic Rental) nor more than $—— (Market Rental) during the remaining term of this lease, except that based on the escalation clause in this lease these rental payments may be raised by a Farmers Home Administration approved rent increase. 

[Eligible borrowers with LH loans and grants, direct RRH loans, or insured RRH loans approved before August 1, 1968, may omit the words "no less than" from the above statement.]

I understand that every effort will be made to provide a continuous environment for the purpose of providing assistance to a tenant or person with a disability. I agree to permit the owner to make such determinations with procedures consistent with FmHA regulations.

For leases with borrowers operating under Plan II Incentive Credit only:

"I understand and agree that my monthly rental payment under this lease will be $—— (Basic Rental) or more than $—— (Market Rental) during the term of this lease, except that based on the escalation clause in the lease these rental payments may be raised by a Farmers Home Administration approved rent increase. I agree to promptly provide any certifications and income verifications required by the owner to permit eligibility determination and, if applicable, the rental rate to be charged."

4. For all cases involving farm labor housing loans and/or grants, the following additional clauses:

a. "I understand that the project is operated and maintained for the purpose of providing housing for domestic farm laborers and their families. I do hereby certify that a substantial portion of my family income is and will be derived from farm labor. I further understand that domestic farm labor means persons who receive a substantial portion of their income as laborers on farms in the United States and either (1) are citizens of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands, after being legally admitted for permanent residence therein, and may include the immediate families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while in the unprocessed state, provided the place of employment, such as a packing shed, is on or near the farm where the commodity is produced. It also includes labor for the production of aquatic organisms under a controlled or selected environment."

b. "I agree that if my household income ceases to be substantially from farm labor for reasons other than disablement or retirement, I will promptly vacate my dwelling after proper notification by the owner."

c. The lease agreements in congregate housing cases must include in the major provisions the following statement: "I understand that my ability to live independently in the project with the support services available will be evaluated on a continuous basis. I may be requested to vacate if a determination is made that I am no longer able to live in the project without additional assistance. This involves cases where the tenant has progressed or regressed to a state of health that requires, in the opinion of the management, a level of care not available in the congregate housing facility.

5. All lease agreements must include in the major provisions the following statement: "I understand and agree that for the term of this lease this will be my permanent residence and I must physically occupy the unit. I agree that nonoccupancy for a period exceeding 30 days may be reason for eviction."

6. Exceptions can be made for reasons of health and safety.

7. All leases must contain specific provisions for eviction as provided by State law.

c. Other Lease Provisions. All leases must contain provisions covering:

1. Names of the parties to the lease and all individuals to reside in the unit and the identification of the premises leased.

2. The amount and due date of rental payments.

3. Any penalty for late payment of rent in accordance with Paragraph VIII B of this exhibit.

4. The utilities and quantities thereof and the services and equipment to be furnished to the tenant by management and tenants responsibility to pay utility charges promptly when due.

5. The process by which rents and eligibility for occupancy shall be determined and redetermined including:

a. The frequency of such rental and eligibility determinations.

b. The information which the tenant shall supply to permit such determinations: usually, income verification; names and ages of household members; and, in congregate care facilities, information so management can determine the tenant's or co-tenant's level of function and degree of competence in performing daily living activities.

c. The standards by which rents, eligibility, and appropriate dwelling unit size shall be judged.

6. Tenant's agreement to move to a unit of appropriate size if family size changes.

7. The circumstances under which a tenant may request a redetermination of rent.

8. The effect of misrepresentation by tenant of the facts upon which rent or eligibility determinations are based.

9. The time at which rent changes or notice of ineligibility shall become effective.

6. The limitation upon the tenant of the right to the use and occupancy of the dwellings.

7. The responsibilities of the tenant in the maintenance of the dwelling and the obligation for intentional or negligent failure to do so.

8. Agreement of management to accept rental payment without regard to any other charges owed by tenant to management and to seek separate legal remedy for the collection of any other charges which may accrue to management from tenant(s).

9. The responsibility of management to maintain the buildings and any unassigned community areas in a decent, safe, and sanitary condition in accordance with local housing codes and FmHA regulations, and its liabilities for failure to do so.

10. The responsibility of management to provide the tenant with a statement of the condition of the dwelling unit (when the tenant initially enters into occupancy and when vacating the dwelling unit), and the conditions under which the tenant may participate in the inspection of the premises which is the basis for such statement.

11. The circumstances under which management may enter the premises during the tenant's possession thereof, including a periodic inspection of the dwelling unit as a part of a preventive maintenance program.

12. Responsibility of tenant to advise management of any planned absense for an extended period, usually 2 weeks or more.

13. Agreement that tenant may not let or sublet all or any part of the premises.

14. Understanding that should the project be sold to a buyer approved by FmHA, the lease will be transferred to the new owner.

15. The formalities that shall be observed by management and tenant in giving notice one to the other as may be called for under the terms of the lease.

16. The circumstances under which management may terminate the lease, all limited to good cause, and the length of notice required for the tenant to exercise the right to terminate.

17. The procedure for handling tenant's abandoned property as provided by State law.

18. Disposition of lease if building becomes untenable because of fire or other disaster. Right of owner to repair or rehabilitate the building within a certain period or terminate the lease.

19. The agreement that any tenant grievance or appeal from management's decision other than eviction which is covered by State law, shall be resolved in accordance with procedures consistent with FmHA regulations covering such procedures, which are posted in the rental office.

20. The usual signature clause attesting that the lease has been executed by the parties.

D. Prohibited Lease Clauses. Lease clauses in the classifications listed below shall not be included in any lease.

1. Confession of Judgment. Prior consent by tenant to any lawsuit the landlord may bring against the tenant in connection with the lease and to a judgment in favor of the landlord.
2. Distress for Rental or Other Charges. Authorization to the landlord to take property of the tenant and hold it as a pledge until the tenant performs any obligation which the landlord has determined the tenant has failed to perform.

3. Exculpatory Clause. Agreement by tenant not to hold the landlord or landlord's agents liable or responsible whether intentional or negligent on the part of the landlord or the landlord's authorized representative or agents.

4. Waiver of Legal Notice by Tenant Prior to Actions for Eviction or Money Judgments. Agreement by tenant that the landlord may institute suit without any notice to the tenant that the suit has been filed.

5. Waiver of Legal Proceedings. Authorization to the landlord to evict the tenant or hold or sell the tenant's possessions whenever the landlord determines that a breach or default has occurred.

6. Waiver of Jury Trial. Authorization to the landlord's lawyer to appear in court for the tenant and to waive the tenant's right to a trial by jury.

7. Waiver of right to appeal Judicial Error in Legal Proceedings. Authorization to the landlord's lawyer to waive the tenant's right to appeal on the ground of judicial error in any suit or the tenant's right to file a suit in equity to prevent execution of a judgment.

8. Tenant Chargeable with Costs or Legal Actions Regardless of Outcome. Agreement by the tenant to pay attorney's fees or other legal costs whenever the landlord decides to take action against the tenant even though the court finds in favor of the tenant.

(Elimination of this clause does not mean that the tenant, as a party to a lawsuit, may not be obligated to pay attorney's fees or other costs if the tenant loses the suit.)

B. Modification of Lease—Notification to Tenants. The landlord may modify the terms and conditions of the lease, effective at the end of the initial term or a successive term, by serving an appropriate notice on the tenant, together with the tender of a revised lease or an addendum revising the existing lease. This notice and tender shall be sent to the tenant by first-class mail, properly stamped and addressed or delivered to the premises.

The date on which the notice shall be deemed to be received by the tenant shall be the date on which the first-class letter is mailed or the date on which the copy of the notice is delivered to the premises. The notice must be received within 30 days prior to the last date on which the tenant has the right to terminate the tenancy without executing the revised lease. The notice must advise the tenants that they may appeal modifications to the lease in accordance with Subpart L of Part 1944 of this Chapter if the modification will result in a formal, substantial reduction, or termination of benefits being received.

The same notification will be applicable to any changes in the rules and regulations for the property.

F. Rules for Occupancy.

1. All rules for occupancy and rent structures will be in writing, posted conspicuously in the borrower's and/or manager's offices, and provided to each tenant with the lease agreement.

2. Proposed changes of any rules for occupancy must be made available to each tenant at least 30 days in advance of implementation, and tenants must be advise that they may appeal changes in accordance with subpart L, Part 1944 of this Chapter.

3. No rule may ever be contrary to any rights of the tenants to organize an association of tenants. Such associations may be organized to bargain with management, as well as to act socially and/or for the welfare of its members.

4. Rules may be promulgated that prohibit activities which are detrimental to or inimical to the public interest. Such activities include threats to the health or safety of other tenants or the employees of the borrower. Interference with the quiet enjoyment of the premises by other tenants, or damage to the physical structure of the project.

5. Initial rules will be attached to the lease agreement and be approved by FmHA. Approval by FmHA for changes and additions may be requested annually with submission of annual reports or more frequently only in the case of an emergency situation.

C. Security Deposits.

1. Security deposits are not mandatory but may be permitted if reasonable and customary for the area. Such deposits will not be in an amount in excess of the tenant's one month's rent or the basic rent for the project, whichever is greater. The amount of security deposits should be reflected in the borrower's management plan and not be changed without the written consent of the FmHA District Director. Security deposits for persons eligible for Rental Assistance or Section 8 assistance shall be administered so as not to create a hardship on the household. If such tenants cannot pay the full amount initially, they may be given terms that should ordinarily:

a. For RRH projects, not exceed a down payment of 25 percent of adjusted monthly income plus $15 per month until the basic rent amount is reached.

b. For low-income farmworkers in a LH project not exceed a $25 down payment and $15 per month until an equivalent of one month's rent is reached. In the case of migrants who will occupy the units for a short period of time, exception to this policy by FmHA may be made upon written request from the borrower. It is shown that such deposit needs to be raised to protect the security interest of the government and will not create a hardship on the tenants.

2. Security deposits shall be handled in accordance with any State or local laws governing tenant security deposits. Tenant security deposits shall be deposited in a separate account at a Federally insured institution, and shall be handled in accordance with any State or local laws governing tenant security deposits. Funds in the Security Deposit Account shall only be used for authorized purposes as intended and represented by the project management, and until so used, shall be held by the borrower in trust for the respective tenants.

3. Security deposits shall be handled in accordance with any State or local laws governing tenant security deposits. Tenant security deposits shall be deposited in a separate account at a Federally insured institution, and shall be handled in accordance with any State or local laws governing tenant security deposits. Funds in the Security Deposit Account shall only be used for authorized purposes as intended and represented by the project management, and until so used, shall be held by the borrower in trust for the respective tenants.

4. Borrowers may assess fair and reasonable charges to the security deposit for damage and losses caused or allowed by the tenant. An itemized accounting for such charges must be presented to the tenant in such cases, after the move-out inspection provided for in Paragraph X E 2. of this Subpart unless the tenant has abandoned the property and his/her whereabouts are unknown and cannot be ascertained after reasonable inquiry.

VIII. Rent Collection: A pre-established day of the month should be designated rental collection day. The time and place of onsite collection and the correct address for payment by mail should be well publicized and consideration should be given to any need for an after-hours' depository.

A. Rental Receipts. A form of serially-numbered rental receipts should be selected for use and the collection agent held accountable for each receipt. If optional collection services are available, they may be considered.

B. Delinquent Rents. A system to identify and detect unpaid rents should be instituted within the project. A penalty for late payment of rent beyond a 10-day grace period, or the grace period prescribed by State law, not to exceed $10.00 may be permitted. The borrower should consider the circumstances existing the late payment before assessing any penalty. True hardship cases should not be assessed penalties; however, a firm and fair policy on payment of rent will help collections.

C. Recoupment of Improperly Advanced Rental Assistance. In cases where a tenant has received rental assistance benefits to which he/she may not be entitled, the borrower-landlord must provide the tenant with a notice of intent to recoup improperly advanced rental assistance benefits. Such a notice must inform the tenant, of the amount improperly advanced and the monthly amount that will be added to the tenant's rent to recoup the improper rental assistance. If it appears that the tenant has willingly and knowingly misrepresented his/her income, the case will be reported to the FmHA District Director. If the tenant fails to make restitution, the facts will be reported to the State Director for further action.

IX. Rent Increases: It may be necessary as operating costs increase or revenue decreases to consider a rental increase to keep the project viable. If this situation should arise, prior consent of FmHA is required. The procedure to initiate a rent increase is specifically covered in Exhibit C of this Subpart. The borrower must meet these requirements.

X. Maintenance: Maintenance is the process by which a project is kept up in all respects and includes land, buildings, and equipment. Maintenance responsibilities will be included in the management plan. Proper maintenance will help to keep a good image of the property and his/her whereabouts are unknown and cannot be ascertained after reasonable inquiry.

A. Routine Maintenance: Maintenance itemized according to project management and not be changed without the written consent of the FmHA District Director. Maintenance itemized according to project management and not be changed without the written consent of the FmHA District Director. Maintenance itemized according to project management and not be changed without the written consent of the FmHA District Director.
Analysis: All RRH and LH projects approved on or after October 27, 1980, are required to comply with the provisions of this section. All RRH and LH projects approved prior to October 27, 1980, are to comply with regulations then extant will be guided by the reporting requirements of their effective loan agreement, but are encouraged to adopt the provisions of this section by amending their existing loan agreements. The State Director may require adoption of these provisions when deemed necessary as a loan servicing action. Any amendment to an existing loan agreement requires approval by the State Director with advice from the TGC.

A. Accounting System. The type and form of bookkeeping and accounting system to be used will normally have been determined prior to the loan closing, or revised at some subsequent date to meet program objectives. The underlying purpose of a bookkeeping and accounting system is to provide the financial information needed by the project manager to help plan and control the activities of the project. It is also needed by the owner, FmHA, investors, and the public who have an interest that will be served by information about the project's financial position and operating results. Therefore the borrower must develop a methodical system of ledger accounts to record the business transactions of the project. Borrower and grant recipients may be required to implement and use a bookkeeping and accounting system as prescribed by FmHA. The following accounts, as a minimum, will be established for all projects and shall be maintained for as long as the loan obligations remain unsatisfied or through the maximum period in the case of prepayment. The term "account" is used interchangeably to mean ledger account and/or banking account. All funds in any account shall be used only as authorized in this section. Except for the security deposit account, all funds shall until used be held in trust by the borrower or grant recipient for the government as security for the loan obligation.

1. General Operating (Ledger) Account. Funds in this account will be held in a checking account and must be maintained in a bank or banks insured by the Federal Deposit Insurance Corporation (FDIC). The borrower will have deposited the required initial operating capital into this account by the time of loan closing or when interim funds are obtained in order to preclude the necessity for multiple advances of FmHA loan funds, whichever occurs first. The initial operating capital will be recorded in a separate Ledger column of the General Operating Account. Only deposits of initial operating capital will be recorded in this Ledger column. Transfers from the initial operating capital ledger column will be made to the General Operating Account Ledger as needed to cover disbursements described below until cash flow from operation of the project is sufficient to cover on-going project operating expenses. After two full years of operation, the State Director may authorize return of any remaining balance in the initial operating capital account. The borrower, provided the borrower has submitted the year-end audit, the estimated and actual budget, and has paid for all required initial start-up and annual operating expenses and they have been reviewed and approved by the State Director.

b. Deposits. All income and revenue from the housing project shall, upon receipt, immediately be deposited in the General Operating Account. This will include rent receipts, housing subsidy payments, laundry revenue, and any other income. The deposit of initial operating capital will be recorded and handled as described above. The borrower may also at its discretion at any time deposit other funds which are also to be used for purposes authorized by this section including transfer from the Reserve Account. All Housing Assistance Payments received from the Department of Housing and Urban Development (HUD) and FmHA rental assistance on the basis of eligible occupants in the project shall be deemed to be revenue derived from the operation of the project and shall be held by the borrower or grant recipient in trust for the Government as security for the loan obligations.

c. Disbursements. Not later than the 15th of each month, out of the General Operating Account, the borrower or grantee shall pay the actual, reasonable and necessary monthly expenses, for the current month, for operating and maintaining the project. Current expenses may include the initial purchase and installation of furnishings and equipment with any funds deposited in the General Operating Account which are not proceeds of the loan or income or revenue from the project. Other authorized disbursements are authorized installments of debt service, real estate tax and insurance escrow, reserve, and at the end of the fiscal operating year, return on investment as provided in Sections 2 and 3 below. Any balance remaining in the General Operating Account except as authorized above, may be transferred to the Reserve Account or retained in the General Operating Account.

2. Real Estate Tax and Insurance Escrow (Ledger) Account. Funds in this account shall be deposited in an interest bearing account at a Federally insured institution. Each month after the payment of actual, reasonable, and necessary current operating and maintenance expenses there shall be transferred from the General Operating Account to the Real Estate Tax and Insurance Escrow Account an amount equal to one-twelfth of the total anticipated real estate tax and insurance payments for the year. All interest earned shall be prorated based on the amount in each escrow at the time the interest is earned.

3. Reserve (Ledger) Account. Funds in this account shall be held in a separate interest bearing account or accounts which shall be maintained at a Federally insured institution. Immediately after paying each installment for the orderly retirement of the FmHA loan, as provided in the borrower's promissory note, required reserve installments at the monthly rate stipulated by the borrower's Loan Agreement or Resolution shall be transferred to the Reserve Account. Monthly transfers will continue until the account reaches the aggregate amount specified in the Loan Agreement or Resolution. Monthly transfers...
shall be resumed within one month following disbursement from the Reserve Account, to restore it to the specified minimum sum. Reserve Account funds not immediately needed for authorized purposes may be invested in savings certificates insured by a Federal institution, or invested in readily marketable obligations of the United States Treasury or its agencies. The earnings on which shall accrue to the Reserve Account. Interest earnings should be used toward meeting the monthly installments to the Reserve Account. Any amount in the Reserve Account which exceeds the aggregate sum specified in the Loan Agreement or Resolution, and is agreed between the borrower or grant recipient and the Government to be in excess of need for the authorized purposes described below, may be transferred to the General Operating Account, unless the Government directs the sum to be retained in the Reserve Account. With prior consent of the Government, funds in the Reserve Account may be used by the Owner and Agent for the following purposes:

a. To meet the loan obligations in the event the amount for debt service is not sufficient for the purpose.

b. To pay costs of repairs or replacements to the housing, furnishings or equipment caused by catastrophe or long-range depreciation such as are not current expenses. Withdrawal for approved purposes may be approved in advance during the annual budget approval process.

c. To make improvements for extensions to the housing.

d. For other purposes desired by the borrower, which in the judgment of the Government will either promote the loan purposes, strengthen the security, or facilitate, improve, or maintain the orderly collectibility of the loan or impairing the adequacy of the security.

e. To pay a return on investment, provided that after such disbursements (a) the amount in the Reserve Account will not be less than that required by the Loan Agreement or Resolution to be accumulated at that time and (b) during the next 12 months the amount in the Reserve Account will likely not fall below that required to be accumulated by the end of such period.

1. In the case of borrowers operating on a limited profit basis, to pay a return of up to 8 percent per annum of the borrower's initial investment as identified in the Loan Agreement or Resolution.

2. In the case of borrowers operating on a full profit basis, to pay a return on the borrower's initial investment as identified in the Loan Agreement or Resolution.

(a) Tenant Security Deposit (Ledger) Account. If applicable) Immediately upon receipt, all tenant security deposit funds collected shall be recorded in a ledger kept separate from the project ledger accounts. These funds shall be deposited in a bank account, kept separate from any project funds, maintained at a Federally insured institution, and shall be handled in compliance with any State or local laws governing tenant security deposits. Funds in the Tenant Security Deposit Account shall only be used for authorized purposes as intended and represented by the project management and, until so used, shall be held by the borrower in trust for the respective tenants. Any amount of the Tenant Security Deposit Account which is retained by the borrower as a result of lease violations, shall be transferred to the General Operating Account and treated as income of the housing.

1. If security deposits are deposited into an interest bearing account, the owner must follow State and local statutes regarding the disposition of the interest earned for individual tenants.

b. Some jurisdictions allow owners and tenants to agree that the interest earned on a security deposit may be used in lieu of individual tenant refunds to fund a tenant's association or some alternate form of tenant activity. In this regard, project-related expenses are usually excluded as forms of "tenant activity." Generally, the owner must make agreements of this nature with each individual tenant.

B. Borrower Reporting Requirements:

Certain reports are necessary in order to meet the FmHA requirements and aid the borrower in carrying out the objectives of the loan. Some must be submitted with the FmHA payments and others submitted to FmHA either monthly or annually. The following reports will be prepared and submitted by the borrower. Exhibits B-5, B-7, and B-8 which are available in any FmHA District Office, are to be used as a guide for determining when reports are due and the number of copies to be submitted.

1. Monthly Reports:

a. Submit Form FmHA 1930-4, "Monthly Report," by the tenth of each month to the District Office. Monthly reports may be completed on a cash basis if the borrower elected to use modified cash accounting.

b. Submit Form FmHA 444-29, "Project Worksheet for Interest Credit and Rental Assistance," with the payment to the District Office. This form must be submitted each month to report coverage and/or request for rental assistance, even if a loan payment is not submitted.

2. Annual Reports: Within 45 days following the close of the borrower's fiscal year, the borrower will submit the following reports to the FmHA District Office. Annual reports will be completed on an accrual basis.

a. Form FmHA 1930-7, "Statement of Budget, Income and Expense (Excluding Depreciation)," showing planned income and expenses for the next year as well as actual income and expenses for the past year.

b. Form FmHA 1930-8, "Year End Report and Analysis For Fiscal Year Ending ."

c. Audit report to be completed in accordance with the booklet, "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits for FmHA Borrowers and Grantees." For projects with 25 or more units, the audit will be prepared by (1) a CPA or (2) LPA licensed on or before December 31, 1970.

Borrowers with 24 units or less will need to provide a verification by an individual who is qualified by education and/or experience and who is independent of the borrower or by a committee of the membership not including any officer, director, or employee of the borrower; however, the State Director may also require audits by a CPA or LPA for any project.

d. Copy of the minutes of the annual meeting, if applicable.

e. Energy Audit.

f. Any other related material that may be requested by the District Director.

C. Financial and Management Analysis.

Financial and management analysis provides information on how the project is progressing. Regular analysis of the project's operations can help identify problems and deficiencies early so that appropriate corrections can be initiated. Some methods of analysis are:

1. Budget Analysis: This is one of the simplest tools to use in financial analysis. Utilizing the monthly and annual reports, the project manager records actual income and expenses and compares them with the budgeted amounts. Any differences between the budget and actual figures indicate where the management may need to focus additional attention or take corrective action.

2. Ratio Analysis: This is another technique used in financial analysis. It prescribes various measures of actual operating performance in terms of ratios. Some useful ratios are:

a. Vacancy Rate =

b. Resident Turnover Ratio =

c. Expense Ratio =

d. Cost Per Unit =

e. Collection Ratio =

f. Working Capital Ratio =

g. Current Assets =

h. Current Liabilities =

i. Total Collections =

j. Total Rent Roll =

k. Percent of Revenue from Government Sources =

l. FmHA Rent Assistance =

m. Total Market Rent or

HUD Section 8 payments =

n. Total Market Rent =

XII. Management-Tenant Relations: This portion of the management plan should be complete since it establishes the basic relationships that could be the difference between success and failure in the project. A well-planned orientation for tenants or prospective tenants is advisable. Rules and regulations must be provided and adequately explained so the tenant will understand the goals and objectives of the project. The management should be available and willing to work with a tenant organization. Listed below are a number of areas that should be addressed in written materials developed by management and provided to all tenants prior to moving into the project.

A. Explanation of rights and responsibilities under the lease. Where a non-English language is common to an area, a
lease written in that language should also be provided.

B. Rent payment policies and procedures should be fully explained.

C. Policy on periodic inspection of units.

D. Responsibility for tenant complaints.

E. Maintenance request procedure.

F. Services provided by management.

G. Office hours, emergency telephone numbers.

H. Map showing location of community facilities including schools, hospitals, libraries, parks, etc.

I. Restrictions on storage and prohibition against abandoning vehicles in the project area.

J. A project newsletter, if desired.

K. Community and public transportation schedules.

XIII. Termination of Tenancy and Eviction: Borrowers should actively work to avoid forced terminations of leases and evictions. The rules governing termination of leases and evictions for cause are outlined in this section.

A. Entitlement of Tenants to Continued Occupancy.

1. General. The borrower may not terminate or refuse to renew any tenancy except upon material noncompliance with the lease or for other good cause. Any termination or refusal to renew tenancy must be grounded upon material noncompliance with the lease, non-eligibility for tenancy or action or conduct of the tenant which disrupts the liveability of the project, adversely affects the health or safety of any person, or the right of any tenant to the quiet enjoyment of the leased premises and related project, or has an adverse financial effect on the project.

2. Material Noncompliance. Material noncompliance with the lease includes (a) one or more substantial violations of the lease or (b) repeated minor violations of the lease which disrupt the liveability of the project, adversely affect the health or safety of any person, or the right of any tenant to the quiet enjoyment of the leased premises and related project or have an adverse financial effect on the project. Repeated nonpayment of rent or any other financial obligation due under the lease (including any portion thereof) beyond any grace period constitutes substantial violation.

3. Notice of Other Good Cause. Conduct cannot be considered other good cause unless the borrower has given the tenant prior notice of the conduct that will constitute a basis for termination of tenancy.

4. Rent Overburden. Any tenant household paying more than 25 percent of their adjusted income toward rent, including utilities, is experiencing rent overburden. Borrowers are encouraged to apply for rental assistance or to assist tenants in applying for Section 8 assistance whenever a tenant is experiencing rent overburden.

5. Notice of Termination. Any notice to terminate must be based on material violation of the lease terms or for other good cause. Also, a tenant may not be evicted solely because the lease has expired.

The borrower’s notice of intent to terminate the tenancy must be handled in accordance with the terms of the lease, this Subpart, and as provided by State law. The tenant will be given at least 30 days notice prior to any eviction. The notice must:

a. Refer to relevant provisions in the lease.

b. State the reasons for the termination with enough specificity to enable the tenant to prepare a response. In those cases where the proposed termination of the tenancy is due to the tenant’s failure to pay rent, a notice stating the dollar amount of the balance due on the rent account and the date of such computation shall satisfy the requirement of specificity.

c. Inform the tenant that he or she is afforded the opportunity to meet with the project management within 10 days if he or she believe the notice to be unfair or unjust.

d. Cite the specific section of State law under which the notice to terminate is based.

2. A copy of any proposed eviction notice will be forwarded to the FmHA District Office. The District Director will review the notice for compliance with this Subpart and any State Supplements that have been issued covering tenant evictions. If the notice is found to be improper, no further action need be taken. If the notice is found to be improper, the District Director will notify the borrower to terminate the action and will provide the borrower guidance on how to proceed.

3. The State Director will issue State Supplements covering termination notices if, with the advice of the OCC, it is determined that such action is necessary to carry out the requirements of this Subpart in the State.

XIV. Security Servicing: Security servicing, as contained in this Exhibit, concerns the borrower’s responsibilities in relation to the loan agreement or resolution, mortgage, and other loan closing papers. It does not deal with security items between the borrower and the tenants. FmHA will look to the borrower to fulfill its obligation in accordance with the requirements of the loan agreement or resolution, note, mortgage, and other legal or closing documents. Some items of special emphasis are:

A. Fidelity Bond. All borrowers will be required to provide Fidelity Bond coverage for the officers of the borrower, and to require Fidelity Bond coverage from management agents entrusted with the receipt, custody, and disbursement of its funds or any other negotiable or readily saleable property. Except in those cases where a loan has been made to an individual that individual will be responsible for such activities. In the case of a Land Trust where the beneficiary is the owner and the management, the beneficiary will be treated as an individual. Also, a 2-party General Partnership where there is no power of attorney designated pursuant to the partnership agreement or resolution, will be treated as an individual. The amount of the bond will at least equal the potential gross project income for two months rental collection or the maximum amount of money the project must have on hand at any one time, including cash on hand, money in reserve and other special accounts, etc., whichever is greater. The United States will be named as co-obligee in the bond if not prohibited by State Law. Form FmHA 440-34, “Position Fidelity Schedule Bond,” may be used if permitted by State Law. In those cases where other forms are used, the form of bond must be approved by the State Director, if found legally acceptable by the OCC. A blanket policy may be accepted in the case of borrowers with more than one project if blanket coverage is more advantageous cost-wise and the amount of coverage for each project is identified.

B. Insurance. The minimum amounts and types of insurance required of the borrower will be determined by FmHA in accordance with Subpart A of Part 1806 (FmHA Instruction 425.1) and Subpart B of Part 1800 (FmHA Instruction 428.2). All references to County Supervisor shall be construed to mean District Director when applied to the Multiple Housing Program:

1. Adequate fire and extended coverage and earthquake as needed will be required on all buildings included as security for the loan. The amount of coverage will be not less than the amount specified on Form FmHA 428-1, “Valuation of Buildings.”

2. Suitable Worker’s Compensation insurance will be carried by the borrower for all its employees.

3. The borrower will also carry adequate liability insurance.

4. If the project is located in a designated flood hazard area, flood insurance will be required.

C. Property Taxes. All borrowers will be required to pay their own taxes before they become delinquent and to provide FmHA with proof of payment when any taxes have been paid.

XV. Exhibit B—Management Plan Requirements for FmHA Multiple Family Housing Projects

A Management Plan in detail commensurate to project size and complexity is required for all FmHA Multiple Housing projects. Also, a Management Agreement must be provided where a management agent is to be used. The Management Plan will be used by FmHA in evaluating the feasibility of the project from a management standpoint. A Management Plan will be considered sufficiently detailed if it is responsive to each of the following areas and accurately reflects FmHA program requirements.

Exhibit B—Management Plan Requirements for FmHA Multiple Family Housing Projects

A Management Plan in detail commensurate to project size and complexity is required for all FmHA Multiple Housing projects. Also, a Management Agreement must be provided where a management agent is to be used. The Management Plan will be used by FmHA in evaluating the feasibility of the project from a management standpoint. A Management Plan will be considered sufficiently detailed if it is responsive to each of the following areas and accurately reflects FmHA program requirements. The Management Plan will be approved by the loan approval official. No loan will be closed or construction started until the Management Plan has been approved by FmHA.

1. The role and responsibility of the owner and the relationship and delegations of authority to the management agent. If there is no Management Agent, supply the equivalent information concerning the management staff assigned to day-to-day operation of the project.

a. If the management agent is closely associated with the owner in such a manner that creates a possible conflict of interest, is such relationship fully explained and justified?

b. What are the supervisor relationships, and to whom are the persons responsible for the day-to-day operation of the project accountable?
c. Under what conditions must the management agent consult the owner before taking action?

d. What are the areas in which the management agent may make decisions without consulting the owner?

e. Who, in the owner's organization, is the key contact person for the management agent? What decision making powers does this contact person have?

f. Are the respective responsibilities of the owner and the managing agent listed? Are these responsibilities clearly defined so as not to overlap? Are they clearly assigned? Are all basic responsibilities covered?

2. Personnel policy and staffing arrangements.

a. Is all hiring in conformance with equal employment opportunity requirements?

b. What are the projected staffing needs for the project?

c. What are the lines of authority, responsibility, and accountability within the management entity?

d. What positions to be filled, the duties of each position, and the compensation?

3. Plans and procedures for marketing units and achieving and maintaining full occupancy, and affirmative marketing.

a. How and when will the units be advertised as available?

b. How will affirmative marketing practices be used? What outreach and marketing efforts will be made to reach those low-income and minority persons who traditionally would not be expected to apply for such housing without special outreach efforts?

c. What plans are being made to achieve and maintain the highest level of occupancy reasonably obtainable? Indicate any additional compensation or incentives that may be allowed management agents for early initial rent up. (If this area is not covered in the management plan, it will usually not be allowed by FmHA at a later date.)

d. What are the procedures to allow for eligible applicants to inspect the units prior to their being made available for occupancy?

e. What orientation services are to be provided tenants to acquaint them with the project and care of the units?

f. Who is responsible for selecting the tenants? Is this selection subject to review? If so, under what conditions and by whom?

4. Procedures for determining tenant eligibility and for certifying and recertifying incomes.

a. How are applications and other records pertinent to this function kept?

b. Who will be responsible for carrying out this function?

c. Is the responsible person knowledgeable regarding certification and recertification requirements? If not, what provisions are being made to provide this person with the necessary training?

d. Is the responsible person aware of FmHA requirements covering family size and needs as they relate to unit size?

e. Is the responsible person aware of FmHA requirements regarding tenant eligibility, rejection, or placement on a waiting list?

a. What utilities will the tenants have direct control of where energy conservation can be practiced?

b. What utilities will the management have direct control of where energy conservation can be practiced?

c. Explain the proposed energy conservation practices in connection with utilities paid by the management.

d. Describe proposed actions to stimulate energy conservation by the tenants.

e. How will tenants be oriented to energy conservation measures?

11. Plans for tenant-management relations.

a. How will tenants be oriented to the project?

b. Is the person who is responsible, knowledgeable of FmHA's insurance requirements?

12. Termination of Leases and Evictions.

a. Is the person responsible, knowledgeable of State and local laws and FmHA's requirements regarding termination of leases and evictions?

b. Is the person responsible, knowledgeable of State and local laws and FmHA's requirements regarding termination of leases and evictions? Is the person responsible, knowledgeable of FmHA's insurance requirements?

a. Is the person responsible, knowledgeable of FmHA's insurance requirements?

14. Management Background and/or Experience. FmHA requires adequate management of multi family housing projects. Exhibit B-4 of this Subpart will be used by a prospective management agent to provide a resume of management background and/or experience; Exhibit B-5 of this Subpart will be used by an owner who proposes to provide direct project management.

Attach a copy of the proposed form of Management Agreement (Contract) that will be used if the project will not be owner-managed. (See Exhibit B-2 for requirements for management agreements.)

a. If some management is provided by the owner, will a full management fee be paid?

b. What amount of management fee will be paid monthly?

c. Will management fee be paid as cash or as value of apartment or a combination of both?

The plan must provide space at the end for the following:

a. Date, title and signature of borrower or borrower's authorized representative.

b. Date, title and signature of the FmHA official approving the Plan.

Exhibit B-2—Requirements for Management Agreements.

A completed and executed management agreement must be submitted to Farmers Home Administration (FmHA) whenever a management agent is to be used.

1. A written management agreement shall be required for any project when the owner

...
retains a management agent. Although a written management plan is required for all projects, a management agreement is not required if the project is managed by the owner.

2. The management agreement shall conform to FmHA requirements. The owner may delegate to the agent any management duties which are not required to be performed by the owner. Nevertheless, whatever the scope of the agent’s authority, the owner remains totally responsible to FmHA for all aspects of management, including duties delegated to the agent.

3. The management agreement shall be consistent with the management plan for the project. The management plan is the primary management charter, constituting a comprehensive description of the detailed policies and procedures to be followed in managing the project. The function of the management agreement is incidental to implementation of the management plan. The agreement must define in precise language managing the project, The function of the comprehensive description of the detailed management charter, constituting a FmHA for all aspects of management, the owner remains totally responsible to whatever the scope of the agent’s authority, duties which are not required to be owner.

4. In all cases where the owner retains a management agent, the Management Agreement document shall contain the management agent’s organized and staffing structure, management controls, and outside ownership interests. When evidence of transaction density of interest firm, or central service unit exists, the owner shall refer this case to the FmHA for review and approval of such procurement arrangements and the reasonableness of charges to the project. A list of competitive costs shall be provided.

5. The management agreement may conform to the suggested housing management agreement as reflected in Exhibit B-3 of this Subpart. Each management agreement shall be realistically tailored to the specific conditions of the particular project. The site, design, and size of the project fiscal constraints; market conditions; local law and business practices are among the elements which may require variations in the management agreement. Consideration should also be given to the capabilities and legitimate desires of the owner and agent.

Exhibit B-3—Suggested Housing Management Agreement for FmHA Multiple Family Housing Projects
This agreement is made this day of 10 , between (the “Owner”) and (the “Agent”).

1. Appointment and Acceptance. The Owner appoints the Agent as exclusive agent for the management of the property described in Section 2 of this Agreement, and the Agent accepts the appointment, subject to the terms and conditions set forth in this Agreement.

2. Description of Project. The property to be managed by the Agent under this Agreement (the “Project”) is a housing development consisting of the land, buildings, and other improvements which make up Project No._ . The project is further described as follows: Name—

Location: City __________________________
County: __________________________
No. of dwelling units __________________________
Type of units __________________________
(Family, Elderly, Congregate)

3. Definitions. As used in this Agreement:
   a. “FmHA” means the Farmers Home Administration, including any successor agencies.
   b. “Principal Parties” means the Owner and the Agent.
   c. “Project” means the development consisting of the land, buildings, other mechanical equipment, and any other improvements.

   a. Preparation and submission to the Owner of a recommended operating budget for the initial operating year of the Project.
   b. Participation in any conference with FmHA officials involving project management.
   c. Preparation and submission to the Owner (for the Owner’s signature and submission to FmHA) of Form FmHA 1930-6, “Monthly Report,” throughout the period from initial occupancy after FmHA loan closing until such time as no longer required by FmHA. If the management is authorized to sign the reports in the owner’s absence, a copy of the signed report as submitted to FmHA will be provided.
   d. Participation in the on-site final inspection of the Project, required by FmHA prior to initial occupancy.
   e. Continuing review of the Management Plan, for the purpose of keeping the Owner advised of necessary or desirable changes.

6. Management Plan. Attached is a copy of the Management Plan for the Project, which provides a comprehensive and detailed description of the policies and procedures to be followed in the management of the Project. In many of its provisions, this Agreement briefly defines the Agent’s obligations, with the intention that reference be made to the Management Plan for more detailed policies and procedures. Accordingly, the Owner and the Agent will comply with all applicable provisions of the Management Plan, regardless of whether specific reference is made thereto in any particular provision of this Agreement. A copy of the Loan Resolution or Agreement with FmHA is also attached.

7. Basic Information. As soon as possible, the Owner will furnish the Agent with a complete set of “as built” plans and specifications and copies of all guarantees and warranties pertinent to construction, fixtures, and equipment. With the aid of this information and inspection by competent personnel, the Agent will become thoroughly familiar with the character, location, construction, layout, plan and operation of the Project, and especially of the electrical, heating, plumbing, and air-conditioning and ventilating systems, the elevators, and all other mechanical equipment.

8. Agreement with Architect and General Contractor. At the direction of the owner during the planning and construction phases, the Agent will maintain direct liaison with the architect and general contractor, in order to coordinate management concerns with the design and construction of the Project and to facilitate completion of all corrective work and the Agent’s responsibilities for arranging utilities and services pursuant to Section 14 of this Agreement. The Agent will keep the Owner advised of all significant matters in this connection.

9. Marketing. The Agent will carry out the marketing activities prescribed in the Management Plan, observing all requirements of the Affirmative Fair Housing Marketing Plan.

10. Rentals. The Agent will offer for rent and will rent the dwelling units in the Project. The following provisions will apply:
   a. The Agent will make preparations for initial rent-up, as described in the Management Plan.
   b. The Agent will follow the tenant selection policy described in the Management Plan.
   c. The Agent will show the premises to prospective tenants.
   d. The Agent will take and process applications for rentals. If an application is rejected, the Agent will inform the applicant in writing of the reason for rejection, and the rejected application, with reason for rejection noted on it, will be kept on file until a compliance review has been conducted. If the rejection is due to information obtained from a Credit Bureau, the source of the report must be revealed to the applicant in accordance with the Fair Credit Reporting Act. A current list of prospective tenants will be maintained.
   e. The Agent will prepare all dwelling leases, parking permits, and will execute the same in its name, identified as agent for the Owner. The terms of all leases will comply with the pertinent provisions of FmHA regulations. Dwelling leases will be in a form approved by the Owner and FmHA.
   f. The Owner will furnish the Agent with rent and income report forms required by FmHA, showing rents as appropriate for dwelling units, and other charges for facilities and services, and income data pertinent to determinations of tenant eligibility and tenant rents. In no event will the rents and other charges be exceeded.
   g. The Agent will counsel all prospective tenants regarding eligibility and will prepare and verify eligibility certifications and recertifications in accordance with FmHA requirements.
   h. The Agent will collect, deposit, and disburse security deposits, if required, in compliance with any State or local laws governing tenant security deposits. Security deposits will be deposited by the Agent in a separate account, at a Federally insured institution. This account will be carried in the owner’s name and designated of record as “[Name of Project] Security Deposit Account.”

11. Collection of Rents and Other Receipts. The Agent will collect when due all rents, charges, and other amounts receivable on the Owner’s account in connection with the management and operation of the Project. Such receipts will be deposited immediately
in the project's General Operating Account with or such other bank designated by the owner, a bank whose deposits are insured by the Federal Deposit Insurance Corporation.

12. Enforcement of Leases. The Agent will ensure full compliance by each tenant with the terms of the lease. Voluntary compliance will be emphasized. The Agent, using the services of local social service agencies when available, will counsel tenants and make referrals to community agencies in cases of financial hardship or under other circumstances deemed appropriate by the Agent. Involuntary termination of tenancies should be avoided to the maximum extent consistent with sound management of the Project. Nevertheless, and subject to the pertinent procedures prescribed in the Management Plan, the Agent may initiate action to terminate any tenancy when, in the Agent's judgment, there is material noncompliance with the lease or other good cause as prescribed by FmHA regulations for such termination. The tenant must be given at least 30 days notice in accordance with FmHA regulations. The notice shall comply with state law requirements, subject to the owner's approval, attorney's fees and other necessary costs incurred in connection with such actions will be paid out of the General Operating Account as Project expenses.

13. Maintenance and Repair. The Agent will cause the Project to be maintained and repaired in accordance with the Management Plan and local codes, and in a condition at all times acceptable to the Owner and FmHA. This will include but is not limited to cleaning, painting, decorating, plumbing, carpentry, grounds care, energy conservation practices and methods of management and repair work as may be necessary, subject to any limitations imposed by the Owner in addition to those contained herein.

Incident to this, the following provisions will apply:

a. Special attention will be given to preventive maintenance, and to the greatest extent feasible, the services of regular maintenance employees will be used.

b. Subject to the Owner's prior written approval, the Agent will contract with qualified independent contractors for the maintenance and repair of air-conditioning systems and elevators, and for extraordinary repair beyond the capability of regular maintenance employees.

c. The Agent systematically and promptly receive and investigate all service requests from tenants, take such action as may be justified, and keep records of the same. Emergency requests will be received and serviced on a twenty-four (24) hour basis. Serious complaints will be reported to the Owner after investigation.

d. The Agent is authorized to purchase all materials, equipment, tools, appliances, supplies and services necessary for proper maintenance and repair subject to the prior written approval of the owner as provided for above.

e. The Agent will advise the owner of any cost-effective energy conservation measures adaptable to the project. The Agent will encourage their use and will assist the owner during any installation of these measures.

f. The prior written approval of the Owner will be required for any expenditure which exceeds $250,000 in one instance for labor, materials, or otherwise in connection with the maintenance and repair of the Project. The limit is not applicable for recurring expenses within the limits of the operating budget or emergency repairs involving manifest danger to persons or property, or required to avoid suspension of any necessary services to the Project. In the latter event, the Agent will inform the Owner of the facts as promptly as possible.

14. Utilities and Services. In accordance with the Management Plan, the Agent will make arrangements for water, electricity, gas, fuel oil, sewage and trash disposal, vermin extermination, decorating, laundry facilities, and telephone service. Subject to the Owner's prior written approval, the Agent will make such contracts as may be necessary to secure such utilities and services acting as agent for the owner.

15. Employees. The Management Plan prescribes the number, qualifications, and duties of the personnel to be regularly employed in the direct management of the Project, including a Resident Manager, maintenance, bookkeeping, clerical and other managerial employees. All such personnel should be employees of the Agent and not the Owner, and will be hired, paid, supervised, and discharged by the Agent. Employee salaries will be paid directly from the Owner's General Operating Account. This account will also reimburse the Agent for Workers Compensation, Social Security taxes, and other taxes normally paid by the employer dealing with wages.

16. Records and Reports. The Management Plan will be reviewed and approved by the Federal Deposit Insurance Corporation. The Management Plan will be reviewed and approved by the State Director may authorize return of remaining balance in the initial operating capital column to the borrower, provided the borrower has submitted the annual audit, the estimated and actual budget, and has paid for all expenses there shall be transferred from the Reserve Account to the Real Estate Tax and Insurance Escrow Account.

(b) Deposits. All income and revenue from the housing project shall, upon receipt, be similarly deposited in the General Operating Account. This will include rent receipts, housing subsidy payments, laundry revenue, or any other project income. The deposit of initial operating capital will be recorded and handled as described above. The borrower may also at its discretion at any time deposit other funds which are also to be used for purposes authorized by this section including transfer from the Reserve Account. All Housing Assistance Payments received from the Department of Housing and Urban Development (HUD) and FmHA rental assistance on the basis of eligible occupants in the project shall be deemed to be revenue derived from the operation of the project and shall be held by the borrower or grant recipient in trust for the Government as security for the loan obligations.

c. Disbursements. Not later than the 15th of each month, out of the General Operating Account, the Agent shall pay the actual, reasonable and necessary monthly expenses for the current month for operating and maintaining the project. Current expenses may include the initial purchase and installation of furnishings and equipment with any funds deposited in the General Operating Account which are not proceeds of the loan or income or revenue from the project. Other authorized disbursements are authorized instalments of debt service, real estate tax and insurance escrow, reserve, and at the end of the fiscal year, return on investment as provided in Sections 2 and 3 below. Any balance remaining in the General Operation Account except as authorized above, may be transferred to the Reserve Account.

(2) Real Estate Tax and Insurance Escrow (Ledger) Account. Funds in this account shall be deposited in an interest bearing account at a Federally insured institution. Each month after the payment of actual, reasonable, and necessary current operating and maintenance expenses there shall be transferred from the General Operating Account to the Real Estate Tax and Insurance Escrow Account an
amount equal to one-twelfth of the total anticipated real estate tax and insurance payments for the year. All interest earned shall be prorated based on the amount in each escrow at the time the interest is earned.

3. Reserve (Ledger) Account. Funds in this account shall be held in a separate interest bearing account or accounts which shall be maintained at a Federally insured institution. Immediately after paying each installment for the orderly retirement of the FmHA loan, as provided in the borrower’s promissory note, installments at the monthly rate stipulated in the borrower’s Loan Agreement or Resolution shall be transferred to the Reserve Account. Monthly transfers will continue until the account reaches the aggregate amount specified in the Loan Agreement or Resolution. All transfers shall be resumed within one month following disbursement from the Reserve Account, to restore it to the specified minimum sum. Reserve Account funds not immediately needed for authorized purposes may be invested in saving certificates insured by a Federal institution, or invested in readily marketable obligations of the United States Treasury Department, the earnings on which shall accrue to the Reserve Account. Interest earned should be used toward meeting the monthly installments to the Reserve Account. Any amount in the reserve account which exceeds the aggregate sum specified in the Loan Agreement or Resolution, and is agreed between the Owner and the Government to be in excess of need for the authorized purposes described below, may be transferred to the General Operating Account, unless the Government directs the sum to be retained in the Reserve Account. With prior consent of the Government, funds in the Reserve Account may be used by the Owner and Agent for the following purposes:

(a) To meet payments due on the loan obligations in the event the amount for debt service is not sufficient for the purpose.
(b) To pay costs of repairs or replacements to the housing, furnishings, or equipment caused by catastrophe or long-range depreciation which are not current expenses. Withdrawal for approved purposes may be approved in advance during the annual budget approval process.
(c) To make improvements for extensions to the housing.
(d) For other purposes desired by the Owner, which in the judgment of the Government will either promote the loan purposes, strengthen the security, or facilitate, improve, or maintain the orderly collectibility of the loan, without jeopardizing collectibility of the loan or impairing the adequacy of the security.

(e) To pay a return on investment provided that after such disbursement (a) the amount in the Reserve Account will be not less than that required by the Loan Agreement or Resolution to be accumulated by that time and (b) during the next 12 months the amount in the Reserve Account will likely not fall below that required to be accumulated by the end of such period.

(f) In the case of borrowers operating on a limited profit basis, to pay a return of up to 8 percent per annum on the borrower’s initial investment as identified in the Loan Agreement or Resolution.

(ii) In the case of borrowers operating on a full profit basis, to pay a return on the borrower’s initial investment as identified in the Loan Agreement or Resolution.

4. Tenant Security Deposit (Ledger) Account. (If applicable) Immediately upon receipt, all tenant security deposit funds collected shall be recorded in a ledger kept separate from the project ledger accounts. These funds shall be deposited in a bank account, kept separate from any project funds, maintained at a federally insured institution, and shall be handled in compliance with any State or local laws governing tenant security deposits. Funds in the Tenant Security Deposit Account shall only be used for authorized purposes as Intended and represented by the project management and, until so used, shall be held by the Agent in trust for the respective tenants. Any amount of the Tenant Security Deposit Account which is retained by the Agent as a result of lease violations, shall be transferred to the General Operating Account and treated as income of the housing.

(a) If security deposits are deposited into an interest bearing account, the owner must follow State and local statutes regarding the disposition of the interest earned for Individual tenants.
(b) Some jurisdictions allow owners and tenants to agree that the interest earned on a security deposit may be used in lieu of individual tenant refunds, to fund a tenant’s association or some alternate form of tenant activity. In this regard, project-related expenses are usually excluded as forms of “tenant activity.” Generally, the owner must make agreements of this nature with each individual tenant family.

b. Reports.

(1) The Agent will furnish information (including occupancy reports) as may be requested by the Owner or the FmHA from time to time with respect to the financial, physical, or operational condition of the Project.

(2) The Agent will prepare and submit:

Form FmHA 494-6—“Tenant Certification”
Form FmHA 494-7—“Project Worksheet for Interest Credit and Rental Assistance”
Form FmHA 1630-6—“Monthly Report”
Form FmHA 1630-7—“Statement of Budget, Income and Expense (Excluding Depreciation)”
Form FmHA 1630-8—“End Year Report and Analysis For Fiscal Year Ending ——-

(3) The Agent will assist the owner in completing all forms and data prescribed by FmHA affecting the operation and maintenance of the project.

17. Fidelity Bond. The Agent will furnish, at its own expense, a fidelity bond in the principal sum of $10,000 Dollars ($10,000), which is at least equal to the potential gross project income for two months and cash on hand and is conditioned to protect the Owner and FmHA against misapplication of project funds by the agent and its employees. The United States will be named as co-obligee in the bond at the time of FmHA loan closing if not prohibited by State law. The other terms and conditions of the bond, and the surety thereon, will be subject to the approval of the Owner.

18. Bids, Discounts, Rebates, etc. With prior approval of the owner, the Agent will obtain contracts, materials, supplies, utilities, and services on the most advantageous terms to the Project, and is authorized to solicit bids either formal or informal, for those items which can be obtained from more than one source. The Agent will secure and credit to the Owner all discounts, rebates, or commissions obtainable with respect to purchases, service contracts, and all other transactions on the Owner’s behalf.

19. Insurance. The Owner will inform the Agent of insurance to be carried with respect to the Project and its operations, and the Agent will cause such insurance to be placed and kept in effect at all times. The Agent will pay premiums and pass through the premiums from the General Operating Account, and premiums will be treated as operating expenses. All insurance will be placed with such companies, on such conditions, in such amounts, and with such beneficial terms appearing therein as shall be acceptable to the Owner and the FmHA provided that the same will include public liability coverage, with the Agent designated as one of the insured, in amounts acceptable to the Agent as well as the Owner and FmHA. The Agent will investigate and furnish the Owner with full reports as to all claims, accidents, and potential claims, for damage relating to the Project, and will cooperate with the Owner’s insurers in connection therewith.

20. Compliance with Governmental Orders. The Agent will take such action as may be necessary to comply promptly with all governmental orders or other requirements affecting the Project, whether imposed by Federal, State, county or municipal authority, subject, however, to the limitation stated in Subsection 13e of this exhibit with respect to repairs. Nevertheless, the Agent shall take no such action as long as the Owner is contesting, or has affirmed its intention to contest, any such order or requirement. The Agent will notify the Owner in writing of all notices of such orders or other requirements, within seventy-two (72) hours from the time of their receipt.

21. Nondiscrimination. In the performance of its obligations under this Agreement, the Agent will comply with the provisions of any Federal, State or local law prohibiting discrimination in housing on the grounds of race, color, creed, sex, age, marital status, national origin, or physical or mental handicap (applicant must have capacity to cooperate with the Agent’s aide if required to do so).

22. Agent’s Compensation. The Agent will be compensated for its services under this Agreement by monthly fees, to be paid from the Operating and Maintenance Account and treated as project expenses. Such fees will be payable on the —— day of each month for the preceding month. Each such monthly fee, will be in an amount computed as follows: —% of the gross rents, including rental
assistance and interest credit, actually collected for the preceding month.

23. Term of Agreement. This Agreement shall be in effect for a period of [number of year(s)], beginning on the [date of year] day of [month], subject, however, to the following conditions:
   a. This Agreement will not be binding upon the Principal Parties until approved by FmHA.
   b. This Agreement may be terminated by the mutual consent of the Principal Parties as of the end of any calendar month, provided that at least thirty (30) days advance written notice thereof is given to FmHA.
   c. In the event that a petition in bankruptcy is filed by or against either of the Principal Parties, or in the event that either makes an assignment for the benefit of creditors or takes advantage of any insolvency act, the other party may terminate this Agreement without notice to the other, provided that prompt written notice of such termination is given to FmHA.
   d. Upon termination, the Agent will submit to the Owner all project books and records and any financial statements required by the FmHA, and after the Principal Parties have accounted to each other with respect to all matters outstanding as of the date of termination, the Owner will furnish the Agent security, in form and principal amount satisfactory to the Agent, against any obligations or liabilities which the Agent may properly have incurred on behalf of the Owner hereunder.

   a. This Agreement constitutes the entire agreement between the Owner and the Agent with respect to the management and operation of the Project, and no change will be valid, unless made by supplemental written agreement, approved by FmHA.
   b. This Agreement has been executed in several counterparts, each of which shall constitute a complete original Agreement, which may be introduced in evidence or used for any other purpose without production of any of the other counterparts.

IN WITNESS WHEREOF, the Principal Parties [by their duly authorized officers] have executed this Agreement on the date first above written.

Exhibit B-4—Questionnaire for Prospective Management Agent of FmHA Multiple Family Housing Projects

Note.—This questionnaire outline will be used by prospective management agents in developing a resume of their capacity to provide management in a new or existing multiple family housing project.

Please provide a written signed statement for FmHA and the Owner giving your answers in the same order, to the information requested. Please be brief and concise in your answers and indicate if a certain question is not applicable in your particular case. Your statement will be used by FmHA and the owner to evaluate your capacity to successfully manage the project successfully.

1. Provide your name, address, name of project, location of project, and the name of the owner.
2. Provide information as to projects previously or presently managed by the management entity and its employees, including information related to default history, mortgage relief history, and foreclosure history along with an explanation of the circumstances that led to such actions.
3. Describe your firm including number of main office staff employed in the following capacities: supervisory, clerical, maintenance, and social services.
4. Describe your plan for project on-site staff including their duties and work frequency.
5. Give the distance in miles from your home office or branch office to the project.
6. Describe the accounting system, rent-up procedure, rent-collection policy, and preventive maintenance program you intend to use in the proposed project.
7. Describe your relationship with the owner and your knowledge of the intended degree of owner involvement in operating the project.
8. Describe the frequency and type of direct supervision to be given the resident manager.
9. Give a description of your financial stability and financial resources.
10. Describe applicable FmHA accounting requirements for your particular type of project. If you have managed this type of project before, cite those projects as a showing of your knowledge of such requirements. If you have not managed such projects, indicate your understanding of what needs to be done to fulfill such requirements.
11. Please also describe:
   a. Your plans for handling tenant grievances and appeals, providing tenant counseling, and using outside social service agencies.
   b. The extent of your knowledge of FmHA requirements for tenant eligibility, tenant certifications and recertifications.
   c. Your plans, if any, to train your personnel in the management of FmHA multifamily housing.
   d. Provide evidence of fidelity bonding capacity.
12. Include the following statement: “I hereby certify that there is no close association between the management Agent and the Owner of the above described project in such manner that creates a possible conflict of interest.” If such an association exists (e.g. the management agent is a member, stockholder, partner, principal, etc., of the borrower organization, familiar relationship) explain in detail.

Exhibit B-5—Questionnaire for Owner who Employs Owner-Management of a Multiple Family Housing Project

Note.—This questionnaire outline will be used by owners, who propose to provide owner-management, in developing a resume of their capacity to provide management in a new or existing multiple family housing project.

Please provide a written signed statement for FmHA responding in the same order to the items that follow. Please be brief and concise in your answers and indicate if a certain item is not applicable in your case.

Your statement will be used by FmHA to evaluate your capacity to operate the project successfully. For projects owned by a partnership, the following information should be provided for the partnership entity as well as each general partner.

1. Provide name of Owner, address, and the name and location of project. State the number of units in the proposal.
2. Provide information on your previous projects, regardless of the source of financing, including mortgage relief and foreclosure history along with an explanation of the circumstances that led to such actions.
3. List names and addresses of management agents who manage your previously or presently owned projects.
4. Describe you understanding of the responsibilities connected with owning and managing a multifamily project under FmHA.
5. Outline your experience and capabilities in providing housing for low- and moderate-income tenants.
6. Describe your intended tenure of ownership and the extent of personal involvement in operating and managing this project.
7. Describe your intentions and capacity to meet negative cash flow situations.
8. Describe your plans for the management of the proposed project. If you intend to manage the project, describe your management capacity by answering applicable portions of the “Questionnaire for Management Agent of FmHA Multiple Family Housing Projects.” Exhibit B-4 of this subpart.

**Exhibit C—Rent Increases**

**I. Objectives:** The basic objective of this Exhibit is to provide a method of processing requests for increases in the monthly rental rates for tenants in Farmers Home Administration (FmHA) Rural Rental Housing (RRH) and Labor Housing (LH) projects. This Exhibit covers all RRH and LH loans including those approved before the date of this Subpart.

**II. Initial Understanding with Borrower:** All RRH and LH applicants will be informed at the time of application that rental rates in projects financed in whole or in part by an RRH or LH loan cannot be raised without FmHA consent in accordance with requirements in loan agreements, loan resolutions, and other instruments executed in connection with RRH and LH loans. LH borrowers and/or grant recipients whose projects are occupied on a seasonal basis should request rent increases only when the project is at least 40 percent occupied in order that a greater number of tenants will have an opportunity to make comments. Borrowers are encouraged to have the effective date of needed rent increases coincide with the start of their fiscal year or with the start of the season in the case of LH projects occupied on a seasonal basis. Rental increase requests, therefore, normally should be made at least 60 days prior to the end of the borrower’s fiscal year or at least 80 days prior to the end of the season in the case of LH projects occupied on a seasonal basis. It is anticipated that rent increases would not be necessary more than once a year. All borrowers are encouraged to participate in the Rental Assistance Program. However, borrowers with projects meeting the eligibility requirements of Paragraph II D of Exhibit C Part 144 Subpart E, except profit borrowers, will be required according to Section 530 of Title V of the Housing Act of 1949, as amended, to participate in the Rental Assistance Program if it appears that a rent increase will cause more than 20 percent of the low-income tenants to pay in excess of 25 percent of adjusted monthly income for costs of rent and utilities. All borrowers will be advised that all proposed rent increases are subject to compliance with this Exhibit. This Exhibit will also apply to rent increases resulting from HUD’s Automatic Adjustment Factors for units receiving Section 8 assistance.

**III. Borrower’s Responsibility in Processing Requests:**

A. When an RRH or LH borrower determines that a rental increase is needed, the borrower should provide FmHA with the following information:

1. An application for Rental Assistance on Form FmHA 444-25, “Request For Rental Assistance,” if the borrower’s project is an eligible project and the proposed rent increase will cause any low-income tenant to pay in excess of 25 percent of adjusted monthly income for the costs of rent and utilities.

2. Facts demonstrating the need and justification for a rent increase.

3. Current year’s operating budget showing actual income and expenses for the project to date and estimating the income and expenses for the remainder of the year or to the end of the season in the case of LH projects occupied on a seasonal basis.

4. A new operating budget based on the old rates covering the period to the effective date of the proposed rent increase and then using the new rates to the end of the operating year selected by the borrower, if applicable.

5. A budget for the next full year of operation using the proposed rents for each size unit.

6. Current tenant Certifications on Form FmHA 444-8 “Tenant Certification,” or other form approved by FmHA.

7. A dated copy of the Notice required by paragraph III B of this Exhibit.

8. Any other information the borrower believes necessary to justify the proposed rent increase.

B. The borrower will notify tenants of any proposed rent increase unless an exception is permitted in accordance with paragraph III C of this Exhibit. Tenants must be notified by the following methods on the same date the application for the proposed rent increase is submitted to FmHA:

1. Post prominently in common areas around the project (laundry rooms, parking areas, recreation rooms, etc.) a Notice to Tenants of Proposed Rent Increase (hereinafter referred to as a Notice) in the format of Exhibit C-1. In addition to plain English, all notifications will be published in the other primary languages of the tenants, and will:

   a. Advise the tenants that during a 20-day comment period in which the Notice will be posted, they have an opportunity to inspect, copy, and make written comments or objections to all materials justifying the proposed rental increase which will be made available to them.

   b. Advise the tenants that all written comments or objections should be submitted directly to the FmHA District Director by the end of the 20 day waiting period.

   2. Give or mail copies of the Notice to all affected tenants.

3. After the 20 day comment period has ended, submit any other information to be considered to the District Director.

C. Notification to the tenant of proposed rent increase will not be required (1) when the borrower is receiving either FmHA rental assistance or HUD Section 8 on all units, and all tenants are eligible tenants participating in the rent subsidy program or (2) when an increase in the utility allowance only is proposed on Exhibit A-5 and the utilities are paid directly by the tenants. This does not preclude posting of the FmHA Letter of...
Approval as provided for in Paragraph IV B 2 of this Exhibit.

IV. Determination by FmHA:

A. Actions by District Director: When the application and all attachments for the proposed rent increase have been received (including the tenant comments when notification is required), the District Director will:

1. Review the application, past year's budgets, planned budgets, schedule for proposed rents, and other information received.
2. Write a short narrative describing the general tone of the tenant comments and complaints.
3. Provide copy of the borrower's latest Form FmHA 444-29, "Project Worksheet for complaints.

4. Determine whether the borrower's project is eligible to receive Rental Assistance on behalf of the low-income tenants of the project and whether or not rental assistance is available for the borrower's project.
5. When the increase is requested for energy savings improvements identified in an Energy Audit, the District Director shall determine the cost effectiveness and financial impact of the proposed improvements from information contained in the energy audit. The District Director's determination will be made in accordance with Paragraph VI of Exhibit D of this Subpart.
6. Recommend whether the proposed Increase should be approved and indicate the number of tenants who will need rental assistance as a result of the rent increase. If the District Director cannot recommend approval of the rent increase based on the borrower's rent increase submission, the submission will be returned to the borrower. The District Director will advise the borrower to make necessary corrections.
7. Submit all the material received from the borrower, including tenant comments or objections, to the State Director at the end of the 20 day comment period.

B. Actions by State Director: When the application and attachments with comments have been submitted, the State Director will review the material to make a determination on the rent increase. The borrower will be notified of the determination within 45 days from the date the "Notice to Tenants of Proposed Rent Increase" is posted.

1. Disapproval Actions. When the State Director determines an application for a proposed rent increase is not justified on the basis of the information submitted, the State Director will directly, or through the District Director, notify the borrower in writing stating the reason(s) why the rent increase is not approved. The borrower will be advised of the right to file an appeal regarding the rent increase disapproval in accordance with § 1900.56, Subpart B, Part 1900 of this chapter. Rent increases may not be approved if any of the following circumstances exist:

a. The borrower is able but unwilling to comply with applicable tenant eligibility requirements, the audit and reporting requirements of this Subpart or the conditions set forth in the borrower’s loan agreement or resolution, interest credit and/or rental assistance agreement, form of note, or mortgage.
b. The budget for the project reflects sufficient income at the present rent structure to meet operation and maintenance expenses which are appropriate and reasonable in amount, meet the FmHA debt service requirements, meet the required reserve account deposit, and provide a return to the borrower, if appropriate.
c. The borrower's project is operated on a profit basis as defined in § 1944.205(a) of Subpart E to Part 1944 and the proposed rent increase is for purposes other than meeting operation and maintenance expenses and debt service; i.e., the purpose is to allow excessive profits and the proposed rent increase will result in rental rates in excess of what eligible tenants can afford.
d. The borrower's project is operated on either a nonprofit basis or limited profit basis as defined in § 1944.205(r) of Subpart E to Part 1944, the borrower has not applied for rental assistance within the most recent period of 180 days prior to the rent increase request, 20 percent or more of the low-income tenants of the project are eligible to receive rental assistance, and the State Director is able to provide the rental assistance units to the project.

2. Approval Actions. When a rent increase is approved, the State Director will directly or through the District Director notify the borrower by a Letter of Approval of the amount of rent increase approved. The letter must:
a. Show the current rate(s), the rate(s) requested, and the rate(s) approved.
b. Contain concise statements of FmHA's reasons for approval of the rent increase.
c. Indicate that it does not authorize the borrower to violate the terms of any lease with the tenants.
d. For those projects where there is rental assistance and/or HUD Section 8 assistance, explain that for those receiving subsidy assistance, their costs for rent and utilities will continue to be based on 25 percent of their adjusted monthly income.
e. If rental assistance units are not available, approve the rent increase subject to the borrower's acceptance of the units when they become available. Acknowledge that the borrower has applied for rental assistance and is eligible for rental assistance.
f. Require that the borrower must notify the tenants individually in writing of the FmHA decision prior to the effective date of the increase. If the proposed rent increase cannot be processed prior to the effective date shown on the Notice to Tenants, an additional notice will be posted and the tenants will be notified in writing that the new rents will be effective at the next rent due date following the additional notice and the State Director's approval.
g. For profit motivated borrowers which do not desire to convert to limited profit and apply for rental assistance, and where rental assistance units are not available, suggest that the borrower advise tenants of the availability of Section 8 assistance for low-income tenants and that they may apply to the local HUD office or State or local Public Housing Agency for certification of eligibility.

b. Grant the rent increase conditioned on the requirement that the borrower carry out energy conservation measures as determined necessary by the project energy audit. Allow a sufficient time frame for completion of the work and offer FmHA assistance, if necessary, to finance the improvements needed.

i. Advise the borrower and the tenants of either party's right to file an appeal regarding the rent increases as approved within 45 days of the date of the notice by writing to the Administrator, Farmers Home Administration, Washington, D.C. 20250. Until the appeal is resolved, the tenants are required to pay the increased amount of rent as indicated in the Notice of Approval.

j. Require that the borrower post the Letter of Approval in a conspicuous place for the information of the tenants.

3. Automatic Adjustment Factors for Section 8 Units. If the State Director disapproves a rent increase requested as a result of HUD's automatic adjustment increase for units receiving Section 8 assistance or approves a rent increase for a lesser amount than the increase permitted by HUD, the State Director must require the borrower to deposit any excess funds into the Reserve Account. If this results in a buildup of excess funds in the Reserve Account, the interest reduction on a Section 8/15 project should be further reduced or canceled by memorandum to the Finance Office. The borrower will still be required to operate on a limited profit basis.

4. Return on Investment. Limited profit borrowers can take their 8 (or 9) percent return if the project produces adequate income to cover all expenditures in accordance with the actual "Statement of Budget Income and Expense." If income is not adequate in any given accounting period to cover the return to owner, the return can be recouped the following year from excess funds available at the end of the fiscal year of operation and provided it does not result in a rent increase. Business losses do not qualify for recoupment.

V. Special Problem Cases: Problem cases which cannot be handled under this Subpart should be submitted to the National Office for review with the State Director's recommended plan of action.

Exhibit C-1 Notice to Tenants of Proposed Rent Increase

Date Posted:
You are hereby notified that, subject to Farmers Home Administration approval, rents will be increased effective ——— (at least 60 days from posting). has filed with the Farmers Home Administration (FmHA), United States Department of Agriculture, a request for approval of an increase in the monthly rental rates of the ——— project for the following reasons:

1. ———
2. ———
3. ———
4. ———

Planned rent increases are as follows:
Borrower’s fiscal year. The borrower’s plan energy audit with the annual project reports submit a copy of the initial or subsequent feasible.

By date following the additional notice and the
tenants; improve the value of

An energy audit and

The basic objective of this Exhibit is to define the Farmers Home Administration (FmHA) requirement in Multiple Family projects for an energy audit and what is included in an energy audit.

I. Objectives: The basic objective of this Exhibit is to define the FmHA decision to approve, reduce or deny the increase. The approved rents will then be effective upon the effective date given above, or if the approved rent increase cannot be made effective by such date an additional notice will be posted and the tenants will be notified in writing that new rents will be effective at the next rent due date following the additional notice and FmHA approval.

By Borrower or Borrower’s Representative.

Financial Impact. Financial impact shall be determined by comparing the estimated net energy and operation and maintenance costs savings in the first year to the annual cost of amortizing a loan to install the proposed energy saving improvement. A positive financial impact occurs when the first year annual savings equals or exceeds the annual cost of amortizing any loan(s) for the proposed energy savings improvement.

3. During the “Program Audit” inspection, the auditor also examines the building to

Duct or pipe insulation
e. Water heater insulation
f. Storm or thermal windows and doors
g. Heat-reflective and heat-absorbing

Financial Impact shall include

The auditor inspects the building to determine the installation applicability of energy conservation improvements.

1. These improvements should be included in the inspection as a minimum:

a. Caulking and weatherstripping
b. Replacement central high efficiency air conditioners
c. Ceiling, wall, and floor insulation
d. Light or shade windows and doors
e. Air-sealing and air-tightness
f. Heat-reflective and heat-absorbing

window and door material

g. Reduce capital expenditures on rent increases for energy saving improvements which are not “cost effective” whenever the

B. Subsequent Audit. A subsequent energy audit is required five years following the initial audit and every five years thereafter, to identify if further improvements are feasible.

C. Submission of Audit. The borrower shall submit a copy of the initial or subsequent energy audit with the annual project reports due 45 days following the end of the borrower’s fiscal year. The borrower’s plan for implementing the recommended improvements shall be included with the report. If any of the improvements are deferred, each year thereafter the borrower shall include with the annual project report an analysis of the deferred improvements, based on current costs, and the borrower’s recommendation for implementing the improvements.

IV. Types of Audits Acceptable to FmHA:

A. The class "B" energy audit is governed by the regulations of 10 CFR 456 (RCS). For this audit estimates of costs and savings are based upon information collected by the borrower concerning the housing project and forwarded to a trained energy auditor. This type of audit is also governed by the regulations of 10 CFR 456 (RCS). The auditor inspecting the building to determine the installation applicability of energy conservation improvements.

f. Efficient use of shading

4. Upon completion of the program audit, the auditor calculates the estimated energy savings and installation costs for applicable measures and presents the results in writing to the borrower.

C. Any other energy audit which substantially complies with 1 or 2 above. This may be applicable in some States where State energy plans are not yet in place. In such cases the State Director may accept such Audits. Some private energy suppliers, Regional Utility Commissions (RUC), Public Utility Districts (PUD), Rural Electrification Administration (REA) offices, State extension offices, property management firms, and the Department of Energy have developed energy audit check-lists and forms. These sources of information may be utilized.

V. Funding: Improvements may be funded from borrower’s funds, project reserve, a subsequent loan, or any other FmHA authorized funding which will keep the improvement cost effective. Plans for funding the improvements should be included in the borrower’s recommendation for implementation.

VI. District Director Responsibility:

A. The District Director shall determine the cost effectiveness and financial impact of the proposed improvements from information contained in the energy audit.

1. Cost effectiveness: Cost effectiveness shall be determined by comparing the life cycle costs of the facility with and without the proposed energy saving improvement. The improvement is cost effective when the present value of its life cycle costs is less than the present value of the life cycle costs without the improvement. Present value of life cycle costs shall be computed utilizing the following criteria:

a. 7 percent discount rate;
b. All costs indexed to current year;
c. Future fuel costs as determined by the Department of Energy Mid Term Energy Forecasting System;
d. 25-year maximum analysis period;
e. Present value of life cycle fuel costs increased by 10 percent to reflect value of energy savings not reflected in market price of fuel; and
f. Capital investments are discounted from the year they are made and are not amortized.

2. Financial Impact. Financial impact shall be determined by comparing the estimated net energy and operation and maintenance costs savings in the first year to the annual cost of amortizing a loan to install the proposed energy saving improvement. A positive financial impact occurs when the first year annual savings equals or exceeds the annual cost of amortizing any loan(s) for the proposed energy savings improvement.

3. When the improvements identified by the energy audit are cost effective and have a positive financial impact, the District Director shall recommend that any rent increase requested by the borrower be conditioned upon installation of such energy saving improvement(s).

4. The District Director may recommend a rent increase for energy saving improvements which are not “cost effective” whenever the

h. Efficient use of shading

4. Upon completion of the program audit, the auditor calculates the estimated energy savings and installation costs for applicable measures and presents the results in writing to the borrower.

C. Any other energy audit which substantially complies with 1 or 2 above. This may be applicable in some States where State energy plans are not yet in place. In such cases the State Director may accept such Audits. Some private energy suppliers, Regional Utility Commissions (RUC), Public Utility Districts (PUD), Rural Electrification Administration (REA) offices, State extension offices, property management firms, and the Department of Energy have developed energy audit check-lists and forms. These sources of information may be utilized.

V. Funding: Improvements may be funded from borrower’s funds, project reserve, a subsequent loan, or any other FmHA authorized funding which will keep the improvement cost effective. Plans for funding the improvements should be included in the borrower’s recommendation for implementation.

VI. District Director Responsibility:

A. The District Director shall determine the cost effectiveness and financial impact of the proposed improvements from information contained in the energy audit.

1. Cost effectiveness: Cost effectiveness shall be determined by comparing the life cycle costs of the facility with and without the proposed energy saving improvement. The improvement is cost effective when the present value of its life cycle costs is less than the present value of the life cycle costs without the improvement. Present value of life cycle costs shall be computed utilizing the following criteria:

a. 7 percent discount rate;
b. All costs indexed to current year;
c. Future fuel costs as determined by the Department of Energy Mid Term Energy Forecasting System;
d. 25-year maximum analysis period;
e. Present value of life cycle fuel costs increased by 10 percent to reflect value of energy savings not reflected in market price of fuel; and
f. Capital investments are discounted from the year they are made and are not amortized.

2. Financial Impact. Financial impact shall be determined by comparing the estimated net energy and operation and maintenance costs savings in the first year to the annual cost of amortizing a loan to install the proposed energy saving improvement. A positive financial impact occurs when the first year annual savings equals or exceeds the annual cost of amortizing any loan(s) for the proposed energy savings improvement.

3. When the improvements identified by the energy audit are cost effective and have a positive financial impact, the District Director shall recommend that any rent increase requested by the borrower be conditioned upon installation of such energy saving improvement(s).

4. The District Director may recommend a rent increase for energy saving improvements which are not “cost effective” whenever the

h. Efficient use of shading

4. Upon completion of the program audit, the auditor calculates the estimated energy savings and installation costs for applicable measures and presents the results in writing to the borrower.

C. Any other energy audit which substantially complies with 1 or 2 above. This may be applicable in some States where State energy plans are not yet in place. In such cases the State Director may accept such Audits. Some private energy suppliers, Regional Utility Commissions (RUC), Public Utility Districts (PUD), Rural Electrification Administration (REA) offices, State extension offices, property management firms, and the Department of Energy have developed energy audit check-lists and forms. These sources of information may be utilized.

V. Funding: Improvements may be funded from borrower’s funds, project reserve, a subsequent loan, or any other FmHA authorized funding which will keep the improvement cost effective. Plans for funding the improvements should be included in the borrower’s recommendation for implementation.

VI. District Director Responsibility:

A. The District Director shall determine the cost effectiveness and financial impact of the proposed improvements from information contained in the energy audit.

1. Cost effectiveness: Cost effectiveness shall be determined by comparing the life cycle costs of the facility with and without the proposed energy saving improvement. The improvement is cost effective when the present value of its life cycle costs is less than the present value of the life cycle costs without the improvement. Present value of life cycle costs shall be computed utilizing the following criteria:

a. 7 percent discount rate;
b. All costs indexed to current year;
c. Future fuel costs as determined by the Department of Energy Mid Term Energy Forecasting System;
d. 25-year maximum analysis period;
e. Present value of life cycle fuel costs increased by 10 percent to reflect value of energy savings not reflected in market price of fuel; and
f. Capital investments are discounted from the year they are made and are not amortized.

2. Financial Impact. Financial impact shall be determined by comparing the estimated net energy and operation and maintenance costs savings in the first year to the annual cost of amortizing a loan to install the proposed energy saving improvement. A positive financial impact occurs when the first year annual savings equals or exceeds the annual cost of amortizing any loan(s) for the proposed energy savings improvement.

3. When the improvements identified by the energy audit are cost effective and have a positive financial impact, the District Director shall recommend that any rent increase requested by the borrower be conditioned upon installation of such energy saving improvement(s).

4. The District Director may recommend a rent increase for energy saving improvements which are not “cost effective” whenever the

h. Efficient use of shading
borrower contributes sufficient funds to reduce the cost of the improvement so that, on the basis of the FHA investment only, the improvement is cost effective. A positive first year financial impact is not required. Any contribution made by the borrower to reduce the cost of the improvement to the cost effective limits will not be an eligible contribution for computing rent on investments. The project reserve may not be utilized for such contribution.

B. If the improvements are not cost effective the District Director may recommend deferral of implementation of the improvements. Any deferred improvements must be analyzed during each subsequent years annual analysis.

C. A copy of the decision regarding the energy audit will be included in the annual reports forwarded to the State Director.

VII. State Director Responsibility: The State Director shall review the Director’s recommendations and the decision regarding implementation of the proposed improvements as a part of the annual report review.

VIII. Development: All development will be performed in accordance with the requirements of Subpart E of Part 1044 and Subpart A of Part 1024 of this Chapter, except that § 1024.6(b)(3)(ii) of Subpart A of Part 1024 will not apply to improvements made by the owner-builder method.

IX. Rent Increase: Any rent increase necessitated by the improvements must be processed as set forth in Exhibit C to Subpart C of Part 1930 of this Chapter. Dated: March 17, 1982.

Charles W. Shuman,
Administrator, Farmers Home Administration.

BILLING CODE 4410-07-M

CIVIL AERONAUTICS BOARD

[ODR-25A: Economic Regulation Docket No. 30586]

14 CFR Part 389

Fees and Charges for Special Services; Elimination of License Fees and Revision of Filing Fees; Extension of Comment Period

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental Notice of Proposed Rulemaking.

SUMMARY: The CAB extends for 10 days the comment period in its rulemaking to revise its filing fee schedule. The reply comment period is extended accordingly. The Airline Transport Association asked for the extension.

Reply comments by: May 20, 1982.

Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 30586, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C., as soon as they are received.

SUPPLEMENTARY INFORMATION: By a notice of proposed rulemaking (ODR-25, 47 FR 7846, February 23, 1982), the Board proposed to revise its filing fee schedule in 14 CFR Part 389. The changes would bring the CAB’s fee structure into line with the rising costs that the CAB has experienced and with the changes in services made by deregulation.

On April 15, 1982, the Airline Transport Association (ATA) asked that the date for filing comments be extended from April 20 to April 30, 1982. ATA cited the need to review background documents recently received by it under the Freedom of Information Act, and the need to coordinate further with its members after this review of the rulemaking.

For those reasons, and because it does not appear that the brief extension requested will prejudice any other person or delay Board action in the rulemaking, ATA’s request is granted. The date for Reply Comments will be extended accordingly.

List of Subjects in 14 CFR Part 389

Archives and records.

Accordingly, good cause is found to extend the time for filing of comments. Under authority delegated by the Board in 14 CFR 385.30(d), the time for filing initial comments is extended to April 30 and the time for filing reply comments to May 20, 1982.

By the Civil Aeronautics Board.

Richard B. Dyeon,
Associate General Counsel Rules and Legislation.

BILLING CODE 1505-01-M
Weight Control Drug Products for Over-the-Counter Human Use; Advance Notice of Proposed Rulemaking; Extension of Time for Comments and Reply Comments

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking; extension of comment periods.

SUMMARY: The Food and Drug Administration (FDA) is extending to July 28, 1982, the comment period and to August 27, 1982, the reply comment period for the advance notice of proposed rulemaking to establish conditions for the safety, effectiveness, and labeling of over-the-counter (OTC) weight control drug products. This action is being taken in response to a request to allow more time for interested parties to examine background data on the safety of phenylpropanolamine, an active ingredient in weight control drug products, in order to provide more informed comments on the notice.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 19-25, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Bureau of Drugs (HFD-510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: In the Federal Register of February 26, 1982 (47 FR 49932-49933), FDA issued an advance notice of proposed rulemaking to establish conditions for the safety, effectiveness, and labeling of weight control drug products for OTC human use. This advance notice of proposed rulemaking, based on the recommendations of the Advisory Review Panel on OTC Miscellaneous Internal Drug Products, is part of the ongoing review of OTC drug products conducted by the agency. Interested persons were given until May 27, 1982, to comment on the advance notice of proposed rulemaking and until June 28, 1982, for reply comments.

In response to the proposal, The Proprietary Association requested a 60-day extension of the comment period in order to allow adequate time for the association to examine background data on the ingredient phenylpropanolamine in order to respond more meaningfully to safety questions regarding this ingredient raised by the agency in this advance notice of proposed rulemaking. FDA has carefully considered the request and believes that information described in the request may be of assistance to the agency in establishing the safety and effectiveness of OTC weight control drug products and is in the public interest. The agency considers a general extension of the comment period for 60 days to be appropriate. Accordingly, the comment period for submissions by any interested person is extended to July 28, 1982, and the reply comment period is extended to August 27, 1982. Comments may be seen in the Dockets Management Branch, Food and Drug Administration, at the address noted above, between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 18, 1982.

William F. Randolph,
Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF THE INTERIOR
Office of Surface Mining Reclamation and Enforcement
30 CFR Part 942
Abandoned Mine Land Reclamation Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: On March 24, 1982, the State of Tennessee submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). OSM is seeking public comment on the adequacy of the State Plan.

DATES: Written comments on the Plan must be received on or before 5:00 p.m., May 24, 1982.

ADDRESSES: Copies of the full text of the proposed Tennessee Plan are available for review during regular business hours at the following locations:

Office of Surface Mining Reclamation and Enforcement, Region II, 530 Gay Street, Suite 560, Knoxville, Tennessee 37902
State of Tennessee, Department of Conservation, Division of Surface Mining and Reclamation, 305 W. Springdale, Knoxville, Tennessee 37917
Office of Surface Mining Reclamation and Enforcement, Administrative Record, Rm. 5315; 1100 "L" Street, N.W., Washington, D.C. 20240

Written comments must be mailed or hand carried to: Office of Surface Mining at the first address listed above. Comments received after 5:00 p.m. (30 days from publication) ordinarily will not be considered or included in the administrative record for this rulemaking.

The administrative record will be available for public review at the OSM Knoxville office above, on Monday through Friday, 8:00 a.m. to 4:30 p.m. excluding holidays.

FOR FURTHER INFORMATION CONTACT: Richard Ellison, Abandoned Mine Land Reclamation, Office of Surface Mining, 530 Gay Street, Suite 500, Knoxville, Tennessee 37902, Telephone: (615) 971-5290.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95-87, 30 U.S.C. 1210 et seq., establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate condition for the safety and health of the public. Lands and water, or portions of such lands and water, may be eligible for reclamation only to the extent that they are located on lands owned or operated by the State or Federal Government. Title IV provides that if the Secretary determines that a State has developed and submitted a program for reclamation of abandoned mines and has the ability and necessary State legislation to implement the provisions of Title IV, the Secretary may approve the State program and grant to the State exclusive responsibility and authority to implement the approved program.

On March 24, 1982, OSM received a proposed Abandoned Mine Land Reclamation Plan from the State of Tennessee. The purpose of this submission is to demonstrate both the intent and capability to assume responsibility for administering and conducting the provisions of SMCRA and OSM's Abandoned Mine Land Reclamation (AMLR) Program (30 CFR Chapter VII, Subchapter R) as published in the Federal Register (FR) on October 25, 1978, 43 FR 49632-49652.
This notice describes the proposed program and sets forth information concerning public participation in the Assistant Secretary's determination of whether or not the submitted Plan may be approved. The public participation requirements for the consideration of a State Plan are found in 30 CFR 884.13 and 884.14 (43 FR 49945 (1978)). Additional information may be found under corresponding sections of the preamble to OSM's AMLR Program Final Rules (43 FR 49932-49940 (1978)).

The receipt of the Tennessee Plan submission is the first step in the process which will result in the establishment of a comprehensive program for the reclamation of abandoned mine lands in Tennessee.

By submitting a proposed Plan, Tennessee has indicated that it wishes to be primarily responsible for this program. If the submission is approved by the Assistant Secretary for Energy and Minerals of the Department of the Interior, the State will have primary responsibility for the reclamation of abandoned mine lands in Tennessee. If the program is disapproved and the State does not choose to revise the Plan, a Federal AMLR program will be implemented and OSM will have primary responsibility for these activities.

OSM's Regional Director has determined that the public was provided adequate notice and opportunity to be heard on the Plan and that the record does not reflect any major unresolved controversies. Therefore, a public hearing will not be held.

Representatives of OSM's Regional Office Director will be available to meet Monday through Friday, excluding holidays, between 8:30 a.m. and 4:00 p.m. at OSM's office in Knoxville, TN, indicated above under "Addresses", at the request of members of the public to receive their advice and recommendations concerning the proposed State Abandoned Mine Land Reclamation Plan.

Persons wishing to meet with representatives of the Regional Director's Office during this time period may place such requests with Richard Ellison, telephone 615/971-5280.

The Department intends to continue to discuss the State's Plan with representatives of the State throughout the review process. All contacts between Departmental personnel and representatives of the State will be conducted in accordance with OSM's guidelines on contacts with States published September 19, 1979 at 44 FR 54444.

The Office of Surface Mining has examined this proposed rulemaking under Section 1(b) of Executive Order No. 12291 (February 17, 1981) and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Office of Surface Mining has determined that the rule will not have significant economic effects on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

Further, the Office of Surface Mining has determined that the Tennessee Plan will not have a significant effect on the quality of the human environment because the decision relates only to the policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of the Interior Manual DM 5162.3(A)(1), the Assistant Secretary's decision on the Tennessee Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment (EA) nor environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Moreover, an EA or an EIS will be prepared for the approval of grants for the abandoned mine land reclamation projects under 50 CFR Part 888.

The Tennessee Abandoned Mine Land Reclamation Plan can be approved if:

1. The Assistant Secretary finds that the public has been given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.

2. Views of other Federal agencies have been solicited and considered.

3. The State has the legal authority, policies and administrative structure to carry out the Plan.

4. The Plan meets all requirements of the OSM, AMLR Program Provisions.

5. The State has an approved Regulatory Program.

6. It is determined that the Plan is in compliance with all applicable State and Federal laws and regulations.

The Tennessee Department of Conservation has been designated by the Governor of the State of Tennessee to implement and enforce the Abandoned Mine Land Reclamation Program in accordance with SMCRA. The Department will, as an objective of its proposed Plan, promulgate regulations enabling implementation of all program elements not otherwise directly enabled by the Tennessee Coal and Surface Mining Act of 1980. Contents of the State Plan submission include:

(a) Designation of authorized State Agency to administer the Program;

(b) State's chief legal officer's opinion on the authority of the designated agency to conduct the program in accordance with Title IV of the SMCRA;

(c) Description of the policies and procedures to be followed in conducting the Program including:

1. Goals and objectives;

2. Project ranking and selection procedures;

3. Coordination with other reclamation projects;

4. Land acquisition, management and disposal;

5. Reclamation on private land;

6. Rights of entry; and

7. Public participation in the Program;

(d) Description of the administrative and management structure to be used in the Program including:

1. Description of the organization of the designated agency and its relationship to other organizations that will participate in the Program;

2. Personnel staffing policies;

3. Purchasing and procurement systems and policies; and

4. Description of the accounting system including specific procedures for operation of the reclamation fund;

(e) Description of the public's participation in the preparation of the Plan;

(f) A general description of activities to be conducted under the Plan including:

1. Known or suspected eligible lands and water requiring reclamation, including a map;

2. General description of the problems identified and how the Plan proposes to deal with them;

3. General description of how the lands to be reclaimed and proposed
reclamation relate to the surrounding lands and land uses;
(4) A table summarizing the quantities of land and water affected and an estimate of the quantities to be reclaimed during each year covered by the Plan;
(5) General description of the social, economic, and environmental conditions in the different geographic areas where reclamation is planned, including:
(i) The economic base;
(ii) Sociologic and demographic characteristics;
(iii) Significant aesthetic, historic or cultural, and recreational values;
(iv) Hydrology, including water quality and quantity problems associated with past mining;
(v) Flora and fauna, including endangered and threatened species and their habitat;
(vi) Underlying or adjacent coal beds and other minerals and projected methods of extraction; and
(vii) Anticipated benefits from reclamation.

SELECTIVE SERVICE SYSTEM
32 CFR Part 1665

Selecting Service Regulations; Privacy Act of 1974

AGENCY: Selective Service System.
ACTION: Proposed rule.

SUMMARY: Procedures under the Privacy Act of 1974 [5 U.S.C. 552a] are revised to exempt certain information in a system of records from the disclosure requirements of that act.

DATES: Comment Date: Written comments received on or before May 24, 1982 will be considered. Effective date: Subject to the comments received the amendments are proposed to become effective upon publication in the Federal Register not earlier than May 25, 1982.

ADDRESS: Written comments to:

FOR FURTHER INFORMATION CONTACT:
Phone: (202) 724-0644.

SUPPLEMENTARY INFORMATION: These amendments to Selective Service Regulations are published pursuant to section 13(b) of the Military Selective Service Act (50 U.S.C. App. 463(b) and 5 U.S.C. 552 and 552a). These Regulations implement 5 U.S.C. 552a.

Interested persons are invited to submit written comments on the proposed regulation. All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Associate Director for Policy Development from 9:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

As required by Executive Order 12291, I have determined that this proposed rule is not a “Major” rule and therefore does not require a Regulatory Impact Analysis.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 98-534, 94 Stat. 1164, 5 U.S.C. 601–612), I have determined that these regulations do not have significant economic impact on a substantial number of small entities.

List of Subjects in 32 CFR Part 1665
Armed Forces; Draft, Privacy.

Thomas K. Turnage,
Director.
April 20, 1982.

PART 1665—PRIVACY ACT PROCEDURES

The amendment is:
Part 1665—Privacy Act Procedures of 32 CFR is amended by adding § 1665.8 to read as follows:

§ 1665.8 Systems of records exempted from certain provisions of this act.

Pursuant to 5 U.S.C. 552a(k)(2), the Selective Service System will not reveal to the suspected violator the informant's name or other identifying information relating to the informant.

(5 U.S.C. 552a)

BILLING CODE 8015-01-M

ENVIRONMENTAL PROTECTION AGENCY
40 CFR Part 122

[FRL 1946-5]
Underground Injection Control Program
AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing an amendment to its Consolidated Permit Regulations (40 CFR Part 122), as promulgated on May 19, 1980, to allow more flexibility to the Agency in prescribing Class II Underground Injection Control programs for Indian lands under the Safe Drinking Water Act.

DATE: EPA will accept public comments on the proposed amendments until June 7, 1982, either in writing or the informal public hearing to be held at the time and place listed below.

ADDRESS: Written public comments should be sent to the Comment Clerk, UIC Program Regulations, Office of Drinking Water (WH-550), EPA, Washington, DC 20460.

PUBLIC HEARING: A public hearing will be held in Washington, D.C., at the U.S. Environmental Protection Agency, 401 M St. SW, Room 5008 M, on June 2, 1982. The Agenda for the hearing is as follows:

Registration, 8:30 am–9:00 am
Proposed amendment—9:00 am–5:00 pm or until all speakers have been heard.

FOR FURTHER INFORMATION CONTACT:
Thomas E. Belk, Chief, Ground Water Protection Branch, Environmental Protection Agency, (202) 426-3934.

SUPPLEMENTARY INFORMATION: An issue which has arisen as a result of the enactment of the Safe Drinking Water Act, section 1425 (the “Waxman amendment”) is what kind of program pursuant to section 1422(c) of the Act should EPA prescribe for Class II wells on Indian lands located in a State which does not have jurisdiction over the Indian lands or which does not have an approved Class II program.

The Agency's position with regard to a State's assertion of jurisdiction over Indian lands was set forth in the preamble to 40 CFR Part 123 as follows:

EPA will assume that a State lacks authority unless the State affirmatively asserts authority and supports its assertion with an analysis from the State Attorney General. Thus, the State will not be forced to
take a position unless it chooses to assert jurisdiction." (45 FR 35378).

As a result, EPA will prescribe and implement Underground Injection Control (UIC) programs on Indian reservations except in cases where a State has chosen to assert and has demonstrated the requisite jurisdiction. Under the current Consolidated Permits Regulations, when EPA prescribes a program, whether for a State or Indian lands, it will do so in conformance with the requirements of 40 CFR Parts 122, 124 and 146, insofar as they apply to UIC programs (see e.g. 40 CFR 122.1(b)(1)(i) and (iii)).

The amendment proposed here today is not intended to suggest a change in the Agency's position concerning States' assertions of jurisdiction over Indian lands. EPA believes that its approach, as expressed in 40 CFR Part 123, is still correct. However, EPA does wish to raise the question of whether the Class II program (oil and gas-related injection wells) UIC programs prescribed by the Agency for Indian lands should invariably follow 40 CFR Part 122, 124 and 146 or whether the Agency should be more flexible and take a number of considerations into account in designing an appropriate Class II UIC program for a particular Indian reservation.

The Agency's original approach would have assured that whenever EPA was responsible for implementing an UIC Program, only one set of Federal standards based on 40 CFR Parts 122, 124 and 146 would have applied. The existence of only one basic Federal program could have benefited not only EPA in administering the program but also owners and operators who would have had to learn but one set of requirements. This could be an important consideration since Class II operators also operate other types of injection wells, for example Class III. The existing regulations already provided some degree of flexibility to allow local circumstances to be taken into consideration. They did not, however, have the degree of flexibility that section 1425 provides for Class II wells. Thus the Agency is proposing to be more flexible and to take a number of considerations into account in designing a Class II program for Indian lands. In designing such a program it should be recognized that EPA is limited by Federal statutory authority in the types of requirements it can establish, and these limits will have to be taken into account when prescribing specific programs.

There are, however, two reasons why EPA believes that it may be appropriate to change its approach and the Agency wishes to invite comments on the proposed changes from interested parties. First, subsequent to the promulgation of the Consolidated Permit Regulations, Congress amended the Safe Drinking Water Act (SDWA). New section 1425 allows a State to make an alternative demonstration in order to gain EPA's approval for its Class II program. Whereas previously under section 1422 of the SDWA the State had to demonstrate that its UIC program met the requirements of the Consolidated Permit Regulations and Part 146, under section 1425 a State may choose to demonstrate that its Class II UIC program meets the requirements of section 1421(b)(1)(A)-(D) and represents an effective program to prevent endangerment of underground sources of drinking water.

Prior to the enactment of section 1425, EPA expected all programs, whether adopted by States or prescribed by EPA, to share a certain degree of consistency since they would all be based on the Consolidated Permit Regulations and Part 146. Under section 1425, however, EPA expects to approve a number of State Class II UIC programs which, while effective, may vary significantly from the program the Agency would prescribe pursuant to the Consolidated Permit Regulations and Part 146.

The opportunity for an alternative demonstration under section 1425 raises the possibility, if EPA retains its current approach, that the State (within its jurisdiction) and EPA (for Indian lands) will establish inconsistent requirements for the regulation of oil and gas-related injection wells. This possibility is compounded by the fact that Indian lands cross State boundaries.

The Agency is mindful of the admonition of the Safe Drinking Water Act that, to the extent feasible, EPA regulatory actions designed to protect underground sources of drinking water should not unnecessarily interfere with or impede underground injections in connection with oil and natural gas production and recovery. In this regard, the Agency is aware of the possibility that special circumstances may exist in certain cases where the presence of two inconsistent Class II programs within a given State, within a given reservation, or perhaps between a reservation and an adjoining State, might create an undue burden on affected oil and gas producers.

The second reason for this proposal is that the Agency is mindful of the responsibilities and interests of tribal governments having authority over Indian lands. In keeping with the special "government-to-government relationship" which generally exists between such tribes and the Federal Government, it is appropriate to give special consideration to the expressed interests and desires of the affected tribal government when prescribing a Federal program for the Reservation.

The amendment proposed here today would allow EPA to prescribe the most appropriate Class II program for individual reservations or Indian lands where it is responsible for the UIC program. In determining the appropriate program in each case, the Administrator would take into account: (1) The interests and preferences of the responsible tribal government or nation; (2) the goal of simplifying regulatory requirements applicable to producers of oil and gas; and (3) the authorities and responsibilities conferred upon EPA by the Safe Drinking Water Act to protect underground sources of drinking water.

The Agency proposes to consider the facts pertaining to the individual reservation. The Agency anticipates that as a result of the proposed amendments some of the programs it prescribes for Indian lands and reservations may be patterned after State programs in States which have primary under Section 1425.

In States where EPA has jurisdiction, the Agency may prescribe a unified Federal Program pursuant to the Consolidated Permit Regulations and Part 146. Alternatively the Agency may prescribe a program different from either of these approaches, which may be suggested by the affected tribal government or other interested parties if that approach is deemed more appropriate and satisfies the requirements of the Safe Drinking Water Act. However, the Agency would in all cases take into consideration the desires of the tribal governments in establishing the specific programs.

Each specific Class II program prescribed for Indian lands or reservations, as all UIC programs prescribed by EPA, will be prescribed through formal rulemaking, with further opportunity for public comment and public hearing.

The Agency is requesting public comment on this amendment, specifically whether other pertinent factors have been overlooked which should be considered by the Administrator when prescribing Class II UIC programs for Indian reservations and lands. The Agency particularly welcomes comment from Indian tribes, oil and gas producers and others on the issue of tribal input into the Administrator's determination and the issue of consistency between programs in adjoining jurisdictions.
Impact on Small Businesses

Under the Regulatory Flexibility Act an agency is required to prepare an initial regulatory flexibility analysis whenever it is required to publish general notice of any proposed rule, unless the head of the agency certifies that the rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This amendment is proposed in order to provide increased regulatory flexibility; therefore, the Administrator certifies that this regulation will not have a significant impact on a substantial number of small entities.

Executive Order 12291

Under Executive Order 12291, EPA must judge whether the proposed rule is major and therefore subject to the requirements of a regulatory impact analysis. The proposed amendment would provide increased regulatory flexibility to the Administrator and does not set any specific requirement for the regulated community. It does not constitute major rulemaking. This amendment was submitted to OMB for review as required by Executive Order 12291.

List of Subjects in 40 CFR Part 122

Administrative practice and procedure, Air pollution control, Hazardous materials, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Confidential business information.

40 CFR Part 122 is amended as follows:

PART 122—EPA ADMINISTERED PERMIT PROGRAMS: THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM; THE HAZARDOUS WASTE PERMIT PROGRAM; AND THE UNDERGROUND INJECTION CONTROL PROGRAM

1. Add §122.46 which reads:

§122.46 Promulgation of Class II programs for Indian lands.

Notwithstanding the requirements of this Part or of Parts 124 and 146, when the Administrator prescribes a Class II program for an Indian reservation or for Indian lands, he or she may do so in a manner that he or she deems appropriate for the individual reservation or Indian lands. In prescribing such programs the Administrator shall consider the following factors:

(a) The interest and preferences of the tribal government having responsibility for the given reservation or Indian lands.

(b) The consistency between the prescribed program and program or programs in effect in adjoining jurisdictions.

(c) Such other factors as are necessary and appropriate to attain the purposes of the Safe Drinking Water Act.

40 CFR Part 228

Ocean Dumping: Proposed Cancellation of Site Designations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA today proposes to cancel the designation of four ocean dumping sites which are currently designated on an interim basis. This action is being taken because there is no projected future need for these sites. These sites will be removed from the list of "Approved Interim and Final Ocean Dumping Sites." Comments must be received on or before June 22, 1982.

ADDRESS: Send comments to Mr. T. A. Wastler, Chief, Marine Protection Branch (WPH-585), EPA, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
Mr. T. A. Wastler, 202/755-0356.

SUPPLEMENTARY INFORMATION: EPA published revised Ocean Dumping Regulations and Criteria in the Federal Register on January 11, 1977 (42 FR 4262 et seq.), Section 228.12 contains a list of "Approved Interim and Final Ocean Dumping Sites." This list was amended on December 9, 1980 (45 FR 61042 et seq.) to extend the interim designation of some ocean dumping sites and cancel the designation of six industrial sites and one dredged material site. At that time EPA stated its intention to identify additional ocean dumping sites for which there is no projected future need.

Four such sites have now been identified, and EPA proposes to cancel the designation of these sites based upon recommendations from the Corps of Engineers.

The purpose of this notice is to provide the public an opportunity to comment on the proposed cancellation of four Interim designated ocean dumping sites for the disposal of dredged material. These sites with their identifying coordinates are listed below.

1. Withlacoochee River, FL—28d 59'34" N., 82d 47'14" W.; 28d 00'28" N., 82d 46'06" W.; 28d 00'14" N., 82d 45'59" W.; 28d 59'40" N., 82d 47'06" W.
3. Crescent City, CA, 100 fathom site—41d 43'50" N., 124d 26'00" W (center coordinates).

The cancellation of these four sites as EPA Interim Approved Ocean Dumping Sites is being published as proposed rulemaking. Interested persons may participate in this proposed rulemaking by submitting written comments within 60 days of the date of this publication to the address given above.

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this proposal will not have a significant impact on small entities. No small entities are using or, as far as EPA is aware, are planning to use these sites in the near future. Furthermore, the cancellation of these site designations will have no effect on the economy or cause any of the other effects which would result in its being classified as a "major" action. Consequently, this proposal does not necessitate the preparation of a Regulatory Flexibility Analysis or Regulatory Impact Analysis.

This proposal was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

List of Subjects in 40 CFR Part 228

Water pollution control.

Dated: March 8, 1982.

Bruce R. Barrett,
Acting Assistant Administrator for Water.

PART 228—CRITERIA FOR THE MANAGEMENT OF DISPOSAL SITES FOR OCEAN DUMPING

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is proposed to be amended by removing from §228.12(a) four ocean dumping sites as follows:
§ 228.12 [Amended]
1. Withlacoochee River, FL—28d 58’54” N., 82d 47’14” W.; 29d 00’28” N., 82d 46’06” W.; 29d 00’14” N., 82d 45’38” W.; 29d 55’40” N., 82d 47’06” W.
3. Crescent City, CA, 100 fathom site—41d 43’50” N., 124d 28’00” W (center coordinates).

[AAA-FRL-2110-1]

Individual Conflicts of Interest Involving Current or Former Agency Employees

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to reissue its procurement regulation to add policy and procedures to control conflicts of interest involving current or former EPA employees. The proposed regulation is designed to prevent Agency contract awards from being affected by favoritism to or improper influence by current or former EPA employees. The proposed regulation provides a mechanism for identifying the proposed use of current or former EPA employees and procedures for the proper treatment of contract proposals in these situations.

DATE: Comments must be received on or before May 14, 1982.

ADDRESS: Send comments to: Environmental Protection Agency, Procurement and Contracts Management Division (PM-214), Attention: Grafton E. Young, Jr., 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Mr. Grafton E. Young, Jr., address as above, telephone (202) 755-0900.

SUPPLEMENTARY INFORMATION: This proposed rule establishes 41 CFR 15-1-55 (new coverage of Conflicts of Interest Involving Current or Former EPA Employees).

(Doc. 205(c), 63 Stat. 390, as amended; 40 U.S.C. 480(c))

Dated: March 17, 1982.

John P. Horton,
Assistant Administrator, Office of Administration.

List of Subjects in 41 CFR Part 15-1

Conflict of interest, Environmental protection, Government procurement.

PART 15-1—GENERAL

1. The table of contents for Part 15-1 is amended to add the following new entries:

Subpart 15-1.55—Prevention of Conflicts of Interest In Contracts Involving Current or Former Employees of the Environmental Protection Agency (EPA)

Sec.
15-1.5500 Scope of subpart.
15-1.5501 Definitions.
15-1.5502 Limitations on award of noncompetitive negotiated contracts.
15-1.5503 Treatment of competitive contracts.
15-1.5504 Solicitation disclosure provision.
15-1.5505 Subcontracts.

2. Part 15-1 is amended by adding Subpart 15-1.55 to read as follows:

Subpart 15-1.55—Prevention of Conflicts of Interest In Contracts Involving Current or Former Employees of the Environmental Protection Agency (EPA)

§ 15-1.5500 Scope of subpart.
This subpart sets forth EPA policy and procedures for identifying and dealing with conflicts of interest and improper influence or favoritism in connection with contracts involving current or former EPA employees. This subpart does not apply to competitively awarded contracts.

§ 15-1.5501 Definitions.
(a) "Regular employee" means any officer or employee of EPA who is employed or appointed, with or without compensation, to serve more than 130 days during any period of 365 consecutive days, including regular officers of the Public Health Service Commissioned Corps and reserve officers of the Public Health Service Commissioned Corps while on active duty.

(b) "Special employee" means an officer or employee of EPA who is employed or appointed, with or without compensation, temporary duties either on a full-time or intermittent basis for not more than 130 days during any period of 365 consecutive days and who actually served more than 60 days during such 365 day period.

§ 15-1.5502 Limitations on award of noncompetitive negotiated contracts.
(a) No contract may be awarded without competition to a current regular or special EPA employee or to a former regular or special EPA employee whose employment terminated within 365 days before submission of a proposal to EPA. Likewise, no contract shall be awarded without competition to a firm which employs, or proposes to employ a current regular or special EPA employee or a former EPA regular or special employee whose employment terminated within 365 calendar days before submission of a proposal to EPA.

(b) Waiver—The foregoing restriction may be waived in writing by the Deputy Administrator if the award would not involve a violation of 18 U.S.C. 203, 18 U.S.C. 205, 18 U.S.C. 207, 18 U.S.C. 208, EPA regulations at 40 CFR Part 3, or the Federal Procurement Regulations at 41 CFR 1-1.302-3 and if the award would be in the best interests of the Government. The Deputy Administrator will consult with the Designated Agency Ethics Official before making such a determination.

§ 15-1.5503 Treatment of competitive contracts.
(a) The prohibition of § 15-1.5502 does not apply to competitively awarded contracts. However, such awards must not involve violation of 18 U.S.C. 203, 18 U.S.C. 205, 18 U.S.C. 207, 18 U.S.C. 208, or 41 CFR 1-1.302-3 and must be based on improper influence or favoritism arising out of an EPA employee's current or former EPA employment.

(b) When any part of the disclosure required under § 15-1.5504 is affirmative, or when the contracting officer has reason to believe that an award may be prohibited by this subpart, no award may be made without the written approval of an official at a level above that of the Head of the Procuring Activity (see § 15-1.206) indicating that award would be consistent with § 15-1.5503(a). The official will consult with the Designated Agency Ethics Official before making such a determination.
ACTION: General notice.

SUMMARY: This notice solicits comments on the operation of HHS regulations on sterilizations. Comments are requested for two reasons. First, comments are being requested as a result of a mandate in the regulations that requires the Department to solicit public comments no later than 3 years after their 1979 effective date.

Second, comments on the sterilization regulations are requested to assist us in assessing their clarity and effectiveness and in determining whether any unnecessary burdens have resulted from their implementation. We will consider any comments we receive in making decisions as to whether revisions to the regulations are needed. If we revise the regulations, the public will be afforded an opportunity to comment on proposed changes prior to final publication.

DATE: To assure consideration, comments should be mailed by June 22, 1982.

ADDRESS: Address comments on all HHS sterilization regulations in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17078, Baltimore, Maryland 21235.

All comments will be reviewed by each of the affected programs.

If you prefer, you may deliver your comments to Room 309-G Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C., or to Room 783, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BPP-508-GN. Agencies and organizations are requested to submit comments in duplicate.

Comments will be available for public inspection, beginning approximately two weeks after publication, in Room 309-G of the Department’s office at 200 Independence Ave., S.W., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202-245-7800).

FOR FURTHER INFORMATION CONTACT: Robert Wren, (301) 594-8820.

SUPPLEMENTARY INFORMATION:

Background

On November 8, 1978, we issued final rules governing expenditures for sterilizations under certain federally assisted programs administered by the Health Care Financing Administration (HCFA), the Public Health Service (PHS), and the Administration for Public Services of the Office of Human Development Services (OHDS) (43 FR 52146). These rules were codified at 42 CFR Part 411, Subpart F for HCFA; 42 CFR Part 50, Subpart B for PHS; and 45 CFR 1392.21, 1392.59, and 1396.639 for OHDS. The rules contain a requirement that we request comments on the operation of the regulations no later than 3 years after their effective date.

In addition, the rules require that a candidate for a federally funded sterilization be at least 21 years of age, be mentally competent, and give informed consent to the procedure. The rules also require that 30 days must have elapsed between the date the individual signs the consent form and the date the sterilization procedure is performed. (A 72-hour waiting period is required for sterilization performed during emergency abdominal surgery or premature delivery. In the case of premature delivery, the informed consent must have been given at least 30 days before the expected date of delivery.)

These rules also describe requirements for availability of Federal funds for hysterectomies as follows:

(1) Federal funds are not available for hysterectomies performed solely for the purpose of sterilizing the individual.

(2) Federal funds are not available for hysterectomies performed when there is more than one purpose to the procedure, but which nevertheless would not have been performed except for the purpose of making the individual sterile.

(3) Federal funds are available for a hysterectomy performed for a reason other than sterilization, provided that the following "acknowledgement requirements" are met:

(a) The person securing authorization to perform the hysterectomy informs the individual and her representative, if any, orally and in writing, that the procedure will make the patient sterile; and

(b) The individual, or her representative, if any, signs a statement acknowledging receipt of that information.

The Department published a Notice of Proposed Rulemaking (NPRM) that addressed the hysterectomy requirements (46 FR 5003, January 19, 1981). The proposal contained provisions that would revise the rule that no Federal funds be made available for hysterectomies unless the individual or her representative has signed an acknowledgement that she was informed that the operation would make her sterile. (42 CFR 441.255 and 256, 42 CFR 50.207 and 209.) Under the proposal, the "acknowledgement requirement" would be eliminated in...

\(^{1}\) Editorial Note—45 CFR Part 1396 was removed effective October 1, 1981 (40 FR 46598, Oct. 1, 1981).
certain situations where the patient is already sterile or a life threatening emergency exists. The comment period on the proposal closed on March 20, 1981. We have reviewed the comments received on the NPRM and expect to publish the final rule on the hysterectomy portion of the sterilization regulations shortly.

Request for Comments

We are interested in comments concerning any aspect of the operation of HHS sterilization regulations. The Address section above explains the procedures to be used in commenting.

Dated: April 5, 1982.
Richard S. Schweiker, Secretary of Health and Human Services.

[FR Doc. 82-10157 Filed 4-22-82; 8:45 am]
BILLING CODE 4110-12-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6278]

National Flood Insurance Program;
Proposed Flood Elevation Determinations; California, et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

These elevations, together with the floodplain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Floodplains.

The proposed base (100-year) flood elevations for selected locations are:

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17604, November 28, 1968), as amended (42 U.S.C. 4001–4128); Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: March 22, 1982.

Lee M. Thomas,
Associate Director, State and Local Programs and Support.

[FR Doc. 82-11644 Filed 4-23-82; 8:45 am]

BILLING CODE 6718-03-M

**44 CFR Part 67**

[Docket No. FEMA-6243]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Correction

**AGENCY:** Federal Emergency Management Agency.

**ACTION:** Proposed rule; correction.

**SUMMARY:** This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the City of Cincinnati, Hamilton County, Ohio, previously published at 47 FR 3379 on January 25, 1982.

**FOR FURTHER INFORMATION CONTACT:**

On page 3383, January 25, 1982, make the following corrections. The elevation for the location “within the community” on “Little Miami River” was changed from 502 to 501 in order to reflect the backwater from the Ohio River present on the Little Miami River. In the location “at confluence of East Fork Mill Creek” on “Mill Creek,” east replaced west to avoid confusion with a location on the “West Fork”. The source of flooding named “West Fork Mill Creek” was changed to “West Fork” to reflect the correct topographic name of the stream. On the “West Fork,” the location “at confluence with Mill Creek” added the description “(near Geringer Street)” in order to clarify possible confusion with the confluence of West Fork Mill Creek, which is a different stream. The new location for “Congress Run,” “about 700 feet upstream of Ridgeway Avenue” and the new elevation 542, were corrected so that it would be within the corporate limits.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the (proposed) flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not prescribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67
Flood insurance, Flood plains.

National Oceanic and Atmospheric Administration
50 CFR Part 654
Stone Crab Fishery

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Proposed rule.

SUMMARY: The Assistant Administrator for Fisheries, NOAA, has approved an amendment to the Fishery Management Plan for the Stone Crab Fishery of the Gulf of Mexico (FMP). NOAA proposes regulations to implement the FMP amendment and proposes a regulatory amendment to provide for the disposition of stone crab traps remaining in the fishery conservation zone during the closed season. NOAA announces the availability of copies of the FMP amendment, and requests comments on the FMP amendment and rulemaking. These regulations are intended to (1) reduce the reporting burden for stone crab fishermen, dealers, and processors; and (2) protect some stone crabs from being caught in lost or abandoned traps.

DATES: Comments on the FMP amendment and on the proposed regulations must be received in writing on or before June 7, 1982.

ADDRESSES: All comments should be sent to Mr. Jack C. Brawner, Acting Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Blvd., St. Petersburg, Florida 33732. Copies of the amendment and current regulations are available from Mr. Brawner upon request.

FOR FURTHER INFORMATION CONTACT: Mr. Jack C. Brawner, 813-693-3141.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act, (Magnuson Act), 16 U.S.C. 1801 et seq., authorizes the Secretary of Commerce (Secretary) to promulgate regulations implementing approved fishery management plans and amendments to fishery management plans, prepared by the Regional fishery Management Councils for their geographic areas of concern. Under Title III of the Act, the Gulf of Mexico Fishery Management Council (Council) prepared and submitted to the Secretary an amendment to the Fishery Management Plan for the Stone Crab Fishery of the Gulf of Mexico (FMP).

The FMP was approved by the Assistant Administrator for Fisheries, NOAA, on March 19, 1979, and implemented by the Secretary on September 14, 1979 (44 FR 53519). After monitoring the stone crab fishery and reviewing the management measures established in the FMP, the Council concluded that amendment of the FMP was necessary and appropriate, and approved changes to the FMP. The Assistant Administrator approved the FMP amendment on March 31, 1982. The FMP amendment (1) provides a procedure for adjusting the location and effective period for the line of separation between stone crab and shrimp fishing; (2) modifies the statistical reporting procedures by requiring a randomly selected fishermen and processors to report; (3) deletes the provision for the harvesting of bait shrimp within the restricted area shoreward of the line of separation; and (4) provides for editorial changes to the FMP.

The first FMP change provides a mechanism by which the Secretary may modify, by regulatory amendment, the provisions of 50 CFR 654.23, Area restrictions. This section specifies a geographic line and prohibits shrimp fishing shoreward of this line from January 1 through May 20. The change requires that the National Marine Fisheries Service (NMFS) collect information on catches and fishing effort of the shrimp and stone crab fisheries in areas inshore and offshore of the separation line, and any other information regarding the location of the line or duration of its effect. This information is to be assessed by the NMFS, the Council, and its stone crab and shrimp advisory panels. Based on this information, the Secretary may change the position of the separation line or the period during which shipping is prohibited inshore of the line by proposing a regulatory amendment.

The second change modifies the reporting requirements of the FMP to require mandatory reporting of only a randomly selected sample of catch, effort, and value information from the fishery. Presently, all commercial operators and owners of vessels that fish for stone crabs, and dealers and processors of stone crabs, must provide statistical data on all fishing trips monthly to the Southeast Fisheries Center Director (Center Director). The Council determined that accurate data needed to assess management measures may be collected more cost effectively by requiring mandatory reporting by a randomly selected sample of vessel owners and operators, dealers and processors. The Center Director will determine the number of respondents, and the interval and duration for reporting. Reporting forms for all user groups may be obtained from the Center Director. The primary data-collection effort will be directed toward fishermen most actively involved in the fishery, i.e., "full-time" fishermen. Variability of catch is thought to be greatest within this sector of the fishery; therefore, more intensive reporting is required to minimize sampling error. Full-time fishermen usually sell their catch through dealers or fish houses. Most of these fishermen and dealers and processors will be required to maintain records, but will report only that portion of their data which the Center Director determines essential to meeting current management objectives. When required to report, dealers may submit copies of their sales receipts.

Fishermen who obtain fishing permits but do not sell their catch through dealers or fish houses are likely to be part-time fishermen. Approximately 25 percent of these fishermen will be required to report information which the Center Director considers essential. Special statistical surveys will be conducted to estimate the amount of recreational stone crab fishing. No more than 10 percent of these recreational fishermen will be randomly selected to report pertinent catch information.

The third change to the FMP deletes an exception which allowed bait shrimp fishermen to trawl inshore of the geographic line separating shrimp and stone crab fishing. The change makes this FMP consistent with the Gulf of Mexico Shrimp FMP.

The fourth change is an editorial correction to the FMP and regulations.
by inserting "landed" in reporting requirements, to facilitate shoreside enforcement.

The Assistant Administrator also approved on March 31, 1982, an amendment to the regulations for this fishery which provides a mechanism for disposition of lost or abandoned stone crab traps in the fishery conservation zone (FCZ). This amendment authorizes the disposition of the traps by the Secretary of Commerce, or an Authorized Officer, to prevent lost or abandoned traps from continuing to catch stone crabs during the closed season.

The abandonment procedure specified in these regulations supplements the procedures provided for seizure, forfeiture, and disposal, 50 CFR Part 219. Special characteristics of the trap fishery for stone crabs necessitate this additional method of abandonment and disposal of traps remaining in the FCZ during the closed season. First, the traps are heavy and bulky, which makes them difficult to handle without proper equipment. Currently, this equipment is not available to law enforcement officers. Second, during the last closed season, thousands of traps were left in the water. Limited resources, both in terms of time and money, make it impractical, if not impossible, for authorized enforcement officers to haul all the traps to shore and to store them for the one-year time period required by 50 CFR 219.29 before the traps can be destroyed. Finally, many of these traps are not properly marked, and it is difficult to determine ownership. The notification process of Part 219, therefore cannot be easily applied to the stone crab fishery. The procedure of abandonment and destruction provided in these regulations will discourage fishing during the closed season.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that the FMP changes, the regulations implementing certain of these changes, and the proposed regulatory amendment comply with the national standards, other provisions of the Magnuson Act, and other applicable law.

Under the National Environmental Policy Act (NEPA) and NOAA Directive 02-10, an environmental assessment was prepared to determine if it was necessary to prepare a supplemental environmental impact statement (SEIS). The environmental assessment concluded that adoption and implementation of the amendment and other proposed regulations are not a major Federal action and will not have a significant impact on the quality of the human environment. If further regulatory action is taken under the provisions of the amendment allowing modification of the separation line, and environmental assessment will be prepared and public hearings held to determine if the change is a major Federal action, having a significant impact on the quality of the human environment. If so, a supplemental EIS will be prepared under the NEPA.

The Administrator, NOAA, has determined that this rule is not a major one requiring the preparation of a regulatory impact analysis (RIA) under Executive Order 12291. The major benefits from this regulation are the reduction of the reporting burden for participants in the fishery, and protection of the stone crab stocks from lost or abandoned traps. If further regulatory action is taken under the provisions of the FMP amendment allowing modification to the separation line, NOAA will determine whether an RIA must be prepared for that action.

The Regulatory Impact Review indicated that potential benefits are significantly greater than expected costs. The original FMP resolved an armed conflict between stone crab trap fishermen and shrimp trawler fishermen. This amendment of the FMP allows both fisheries to operate in an orderly manner. Additional benefits will come when the line of separation between the shrimp trawling area and the stone crab trapping area is modified to meet changes in areas of abundance of shrimp and stone crabs. The proposed reporting requirements reduce the reporting burden on the fishermen by 75 percent through the changes from a census-type to a sample-type reporting system. The regulatory amendment enhances law enforcement by authorizing agents to destroy the traps in the FCZ during the closed season after the first-day grace period and before the start of the trap "soak period."

The General Counsel of the Department of Commerce has certified under the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., that this regulation will not have a significant economic impact on a substantial number of small entities and, therefore, does not require a regulatory flexibility analysis. If future regulatory action is taken under the provisions of the FMP amendment to allow modification of the separation line, NOAA will determine whether a regulatory flexibility analysis must be prepared for that rulemaking.

This amendment does not call for additional information and thus does not increase the Federal paperwork burden, as defined by the Paperwork Reduction Act of 1980 (Pub. L. 96-511) for individuals, small businesses, or other persons. Instead, it reduces the reporting burden on participants through the use of random sampling techniques. Collection requirements contained in this regulation (§ 654.5) have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act and have been assigned OMB control numbers 0648-0018 for reports by owners and operators, and 0648-0013 for reports by dealers and processors.

List of Subjects in 50 CFR Part 654

Fisheries.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

PART 654—STONE CRAB FISHERY

50 CFR Part 654 is proposed to be amended as follows:

1. The authority citation for Part 654 reads as follows:

Authority: 16 U.S.C. 1801 et seq.

§ 654.5 (Amended)

2. Paragraph (a) is amended by removing the first sentence and substituting the following sentence in its place: "The owner or operator of any vessel that fishes for stone crabs or any vessel that lands stone crabs or any portion thereof, and who is selected to report, shall report the information required by this paragraph to the Center Director each month on forms obtained from the Center Director."

3. Paragraph (b) is amended by removing that part of the first sentence which precedes the colon and substituting the following phrase in its place: "Any person who receives stone crab claws by way of purchase, barter, trade, or sale from a fishing vessel subject to this Part, and who is selected to report, shall file a monthly report with the Center Director, on forms obtained from the Center Director, which shall contain the following information:"

4. Paragraph (c) is amended by removing the phrase "were received or harvested" and substituting the following phrase in its place: "were landed, received, or harvested."

5. Section 654.22 is amended by adding paragraph (b) to read as follows:

(b) Stone crab traps in the management area from 0001 hours May 21 to 2400 hours October 4 will be considered unclaimed or abandoned...
property and may be disposed in any manner considered appropriate by the Secretary or an Authorized Officer. Owners of these stone crab traps remain subject to appropriate civil penalties.

6. Section 654.23 is revised to read as follows:

§ 654.23 Area restrictions.

Between January 1 and May 20, it is unlawful to use trawl gear in that part of the FCZ (Figure 1) shoreward of a rhumb line connecting in order points B at 26°16.0' N. latitude and 81°58.5' W. longitude, C at 26°00.0' N. latitude and 82°04.0' W. longitude, D at 25°09.0' N. latitude and 81°47.6' W. longitude, E at 24°54.5' N. latitude and 81°50.5' W. longitude, and F at 24°41.9' N. latitude and 81°40.5' W. longitude (Snipe Point).
This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE
Office of the Secretary

Section 22 Import Fees; Adjustment of Import Fees on Sugar

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: Headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS) requires the Secretary of Agriculture to increase by one cent the amount of the fees which shall be imposed on imports of raw and refined sugar (TSUS items 956.05, 956.15, and 957.15) under the authority of Section 22 of the Agricultural Adjustment Act of 1933, as amended, whenever the average daily spot price quotation for raw sugar for 10 consecutive market days within any calendar quarter, adjusted to a United States delivered basis, plus the fee then in effect, is less than the market stabilization price. The notice announces such adjustment.

EFFECTIVE DATE: 12:01 AM (local time at point of entry) (See supplementary information.) April 23, 1982.

SUPPLEMENTARY INFORMATION: By Presidential Proclamation No. 4887, dated December 23, 1981, headnote 4 of Part 3 of the Appendix to the TSUS was amended to provide for quarterly adjusted fees on imports of raw and refined sugar (TSUS items 956.05, 956.15, and 957.15). Paragraph (c)(ii) of headnote 4 provides that the quarterly adjusted fee for item 956.05 and 957.15 shall be the amount of the fee for item 956.15 plus .15 times the amount by which the market stabilization price exceeds the 20 day average of the daily spot (world) price quotation for refined sugar as calculated in paragraph (c)(ii) of headnote 4.

The average of the daily spot price quotations for raw sugar (item 956.15) for the 10 consecutive market day period April 1–April 15, inclusive, within the second calendar quarter of 1982, adjusted as provided in headnote 4(c) to a United States delivered basis, plus the fee of 3.0703 cents per pound now in effect for item 956.15 (14.5467 + 3.0703 = 17.6170 cents), is more than one cent less than the market stabilization price of 19.08 cents. Accordingly, the fee of 3.0703 cents per pound for item 956.15 is required to be increased by one cent, resulting in a fee for item 956.15 of 4.0703 cents per pound and a fee for items 956.05 and 957.15 of 5.1782 cents per pound.

Headnote 4(c) requires the Secretary of Agriculture to determine and announce any adjustment in the fees made within a calendar quarter, certify such adjusted fees to the Secretary of the Treasury, and file notice thereof with the Federal Register within 30 days of such determination. This notice is therefore being issued in order to comply with the requirements of headnote 4(c).

Effective Date

In accordance with headnote 4(c)(vii) of part 3 of the Appendix to the Tariff Schedules of the United States, the adjustment in fees made herein shall not apply to the entry or withdrawal from warehouse for consumption of sugar exported (as defined in § 152.1 of the Customs regulations) on a through bill of lading to the United States from the country of origin before the effective date of the adjustment.

Notice

Notice is hereby given that, in accordance with the requirements of headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States, it is determined that the fees for raw and refined sugar (TSUS items 956.05, 956.15, and 957.15) for the remainder of the second calendar quarter of 1982 shall be as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>956.05</td>
<td>5.1782 cents per lb.</td>
</tr>
<tr>
<td>956.15</td>
<td>4.0703 cents per lb.</td>
</tr>
<tr>
<td>957.15</td>
<td>5.1782 cents per lb.</td>
</tr>
</tbody>
</table>

The amounts of such fees have been certified to the Secretary of the Treasury in accordance with paragraph (c)(v) of headnote 4.

John R. Block,
Secretary of Agriculture.

BILLING CODE 3410-10-M

Soil Conservation Service

Big Cedar Creek Watershed, GA.

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council of Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives
notice that an environmental impact statement is being prepared for the Big Cedar Creek Watershed, Polk and Floyd Counties, Georgia.

FOR FURTHER INFORMATION CONTACT: Dwight M. Treadway, State Conservationist, Soil Conservation Service, 355 East Hancock Avenue (P.O. Box 832), Athens, Georgia 30613, telephone 404-546-2273.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Dwight M. Treadway, State Conservationist, has determined that the preparation and review of an environmental impact statement are needed for this project.

The project concerns a plan for watershed protection and flood prevention on agricultural and urban areas located in the flood plains of Big Cedar Creek and its tributaries. Alternatives under consideration to reach these objectives include systems of conservation land treatment, nonstructural measures, earth dams, channel improvement, earth dikes, floodwater storage basins, floodwater pumping stations, and fish and wildlife mitigation measures.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service has invited participation and consultation of agencies and individuals that have special expertise, legal jurisdiction, or interest in the preparation of the draft environmental impact statement. A scoping meeting was held at 11 a.m., Tuesday, March 31, 1981, in the field office of the Soil Conservation Service in Cedartown, Georgia, and a public meeting was held at 7:30 p.m., Tuesday, June 9, 1981, in the conference room of the Cedartown City Hall, Cedartown, Georgia to determine the scope and the evaluation of the proposed action.

Further information on proposed action, or the meetings may be obtained from Dwight M. Treadway, State Conservationist, at the above address, or telephone 404-546-2273.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dwight M. Treadway, State Conservationist.

BILLING CODE 3410-16-M

Bunker R-3 School Critical Area Treatment R.C. & D. Measure, Missouri
AGENCY: Soil Conservation Service, USDA.
ACTION: Notice of Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Paul F. Larson, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri 65202, telephone 314-875-5214.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Paul F. Larson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include critical area planting and heavy use area protection.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting the Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri 65202.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register. (May 24, 1982).

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: April 14, 1982.
Paul F. Larson, State Conservationist.

BILLING CODE 3410-16-M

Red Bud River Front Park R.C. & D. Measure, Michigan
AGENCY: Soil Conservation Service, USDA.
ACTION: Notice of Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Homer R. Hilner, State Conservationist, Soil Conservation Service, 1405 South Harrison Road, East Lansing, Michigan 48823, telephone 517-337-6702.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Homer R. Hilner, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

This measure concerns a plan for the installation of measures for critical area treatment and public water-based recreation. Critical area treatment measures will include: three erosion control structures, a diversion and barrier erosion control. Public water-based recreation will include two picnic areas with one picnic shelter, two walkways, two parking lots, stairs and restrooms. Total construction cost is estimated to be $103,700; $58,100 R.C. & D. funds and $45,600 local funds.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Homer R. Hilner. The FNSI has been sent to various federal, state, and local agencies.
and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until 30 days after the date of this publication in the Federal Register (May 24, 1982).

Homer R. Hilner, State Conservationist.

FOR FURTHER INFORMATION CONTACT:
Dwight M. Treadway, State Conservationist, Soil Conservation Service, 355 East Hancock Avenue (P.O. Box 832), Athens, Georgia 30613, telephone 404-545-2273.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Dwight M. Treadway, State Conservationist has determined that the preparation and review of an environmental impact statement are not needed for this project.

The objectives of the sponsors are to provide a park and access for water-based recreation. The planned works of improvement include picnic-facilities landscaping, boat ramp, comfort station, and a parking area. Conservation practices include preservation of native vegetation and immediate stabilization of exposed areas.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting Dwight M. Treadway.

No administrative action on implementation of the proposal will be taken until May 24, 1982.

CIVIL RIGHTS COMMISION

California Advisory Committee; Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the California Advisory Committee to the Commission will convene at 6:00 p.m., and will end at 8:00 p.m., on May 19, 1982, at the Law Offices of Stanley Fleishman, 433 North Camden Drive, in Room 900, Beverly Hills, California 90210. At this meeting the Handicap Subcommittee will discuss projects on the handicap and aged.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Maurice B. Mitchell, 260 Eucalyptus Hill, Santa Barbara, California 93105. (303) 444-3541 or the Western Regional Office, 3600 Wilshire Boulevard, Suite 810, Los Angeles, California 90010, (213) 668-3437.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

John I. Binkley,
Advisory Committee Management Officer.

DEPARTMENT OF COMMERCE

National Bureau of Standards

Change Pertaining to the Interface Standards Exclusion List

In a notice published in the Federal Register on December 15, 1981 (46 FR 61861), the National Bureau of Standards (NBS) announced proposed changes to the exclusion list pertaining to Federal Information Processing Standards Publication 60-1, I/O Channel Interface; Federal Information Processing Standards Publication 61, Channel Level Power Control Interface; Federal Information Processing Standards Publication 62, Operational Specifications for Magnetic Tape Subsystems; and Federal Information Processing Standards Publication 63, Operational Specifications for Rotating Mass Storage Subsystems. Interested parties were allowed until January 29, 1982, to submit written comments regarding the proposed changes to the exclusion list.

As a result of a review and analysis of comments received, NBS has made a determination that the following addition will be made to the exclusion list:

- **Manufacturer**: Burroughs
- **Model**: 5930

Interested parties are invited to submit written comments or recommendations identifying candidate systems which should be added or removed from the exclusion list to the Director, Institute for Computer Sciences and Technology, Attention: Interface Standards Exclusion List, National Bureau of Standards, Washington, D.C. 20234. Comments should include information supporting any proposed additions (or removals) to that list according to the criteria described in the Federal Register notice of March 19, 1979 (44 FR 16466), which announced the availability of a proposed initial exclusion list. Any comments submitted which are deemed by the sender to contain confidential or proprietary information should be appropriately designated and marked.

NBS maintains a mailing list of vendors, Federal agencies, and other interested parties to whom copies of the current exclusion list are sent on a regular basis. Parties on the mailing list will also be sent copies of the proposed changes and the announcement of the determination on the proposed changes. Those who wish to be included on the mailing list should send a written request to the address noted above for submission of comments or recommendations regarding the exclusion list.

Changes Pertaining to the Interface Standards Exclusion List

In a notice published in the Federal Register on September 2, 1981 (46 FR 44027), the National Bureau of Standards (NBS) announced proposed changes to the exclusion list pertaining to Federal Information Processing Standards Publication 60-1, I/O Channel Interface; Federal Information Processing Standards Publication 61, Channel Level Power Control Interface; Federal Information Processing Standards Publication 62, Operational Specifications for Magnetic Tape Subsystems; and Federal Information Processing Standards Publication 63, Operational Specifications for Rotating Mass Storage Subsystems. Interested parties were allowed until March 12, 1982, to submit written comments regarding the proposed changes to the exclusion list.

As a result of a review and analysis of comments received, NBS has made a determination that the following additions will be made to the exclusion list:

- **Manufacturer**: Four-Phase Systems, Inc
  - **Model**: 311
- **Manufacturer**: Zilog
  - **Model**: 8000

Interested parties are invited to submit written comments or recommendations regarding the exclusion list to the Director, Institute for Computer Sciences and Technology, Attention: Interface Standards Exclusion List, National Bureau of Standards, Washington, D.C. 20234. Comments specifically identifying candidate systems which should be added or removed from the exclusion list are especially encouraged. Comments should also include information supporting any proposed additions (or removals) to that list according to the criteria described in the Federal Register notice of March 19, 1979 (44 FR 16466), which announced the availability of a proposed initial exclusion list. Any comments submitted which are deemed by the sender to contain confidential or proprietary information should be appropriately designated and marked.

NBS maintains a mailing list of vendors, Federal agencies, and other interested parties to whom copies of the current exclusion list are sent on a regular basis. Parties on the mailing list will also be sent copies of the proposed changes and the announcement of the determination on the proposed changes. Those who wish to be included on the mailing list should send a written request to the address noted above for submission of comments or recommendations regarding the exclusion list.

The exclusion list will be used in conjunction with the applicability provisions of the Federal I/O channel level interface standards. This list and the exclusion criteria are not a part of the standards themselves, but are provided for in the standards.

Advisory Committee for International Legal Metrology; Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976) and Office of Management and Budget Circular A-63 of March 1974, as amended, and after consultation with the General Services Administration, the Secretary of Commerce has determined that the renewal of the Advisory Committee for International Legal Metrology is in the public interest in connection with the performance of duties imposed on the Department by law.

The Committee, first established in March 1974 and renewed in March 1976, 1978, and 1980 was to terminate on March 18, 1982. Its purpose was to advise the Department through the Director, National Bureau of Standards (NBS), on technical and policy matters relating to NBS' assigned general responsibility for the development of U.S. positions on technical issues arising in the International Organization of Legal Metrology (OIML). This objective was achieved. Its advice and recommendations—all of which were accepted and implemented by NBS—have meaningfully contributed to the Administration's program for increased export trade by ensuring that International Recommendations proposed by OIML do not contain restrictive technical requirements which act as non-tariff trade barriers.

In renewing the Committee, the Secretary has not changed its objective. The trade implications of OIML and the ambitious work program envisioned by the Organization mandate continued active participation by the U.S. and the continued need for timely action by Government and industry to assess the trade impact of proposed OIML actions. The Committee is uniquely suited to assist NBS in this task and its function cannot be accomplished by any organizational element or other committee of the Department. As initially established (39 FR 6138-2-19-74) the Committee will continue with a balanced representation, presently of approximately 40 members, chaired by the United States representative to the International Committee of Legal Metrology (CIML). Membership on the Committee is balanced through representation from four major interest groups: (1) Federal agencies which use and/or regulate measurement instruments in commerce, or in the field of public health and safety; (2) State and local weights and measures jurisdictions which establish metrological requirements for instruments and which regulate the accuracy of these instruments in intrastate commerce; (3) Industry trade associations, professional metrologists and private standards bodies which manufacture, use and/or write private voluntary standards incorporating, or referencing, measurement devices or methods; and (4) Consumers. Additionally, Committee membership is open at any time to any interest group who demonstrates a desire to participate.

The Committee will function solely as an advisory body, and in compliance with the provisions of the Federal Advisory Committee Act.

Copies of the Committee's revised charter will be filed with appropriate committees of the Congress and with the Library of Congress.

Inquiries or comments may be addressed to the Committee Control Officer, Mr. David Edgerly, Chief, Office of Domestic and International Measurement Standards, Building 221, Room A3053, National Bureau of Standards, U.S. Department of Commerce, Washington, D.C. 20234, telephone 301-921-3307, or Mrs. Yvonne Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-4217.

Dennis C. Boyd,
Executive Director, Information Resources Management.

Advisory Panels for the Pacific and Gulf of Mexico Fishery Management Councils; Renewal

In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. (1976) and Office of Management and Budget Circular A-63 of March 1974 (as revised), and after consultation with GSA, the Department has determined that the renewal of the charters for the Advisory Panels (APs) for the Pacific and Gulf of Mexico Fishery Management Councils (FMCS) are in the public interest in connection with the performance of duties imposed on the Department by law.

The President signed the Magnuson Fishery conservation and Management Act, as amended, into law on April 13, 1978. The Act mandated the establishment of eight Regional Fishery Management Councils to serve as the instruments of Federal-State-private interaction in the conduct of fishery management in the U.S. Fishery Conservation Zone (FCZ). The Act also authorized the establishment of such APs as are deemed by the Councils to be necessary or appropriate to assist them in carrying out their functions under the Act.

The APs for the Pacific and Gulf of Mexico FMCSs were established on May 18, 1976 and April 20, 1978, respectively. These panels are expected to continue with a balanced representation of members, who are appointed by the parent Councils. The purpose of each Panel is to advise the respective Council on the assessments and specifications contained in the fishery management plans (FMPs) for fisheries within the Council's geographical area of concern, with particular regard to (1) the extent to which the fishing vessels of the U.S. will harvest resources considered in the FMPs; (2) the effect of such FMPs on local economies and social structures; (3) potential conflicts between user groups of a given fishery resource; and (4) enforcement problems peculiar to each fishery with emphasis on the expected need for enforcement resources. Research indicates that the functions of these Panels cannot be accomplished by any other organization element or other committee of the Department.

These Panels have produced several oral and written reports on the topics listed above. The AP for the Pacific FMC is currently addressing four fishery management units selected by the Council for management plan development; and the AP for the Gulf of Mexico FMC is currently addressing five fishery management units also selected by the Council. The management plans for each Panel are in the developmental state.

These APs will continue to operate in compliance with the provisions of the Federal Advisory Committee Act (FACA). Copies of each AP charter will be filed with the appropriate committees of the Congress and with the Library of Congress. Inquiries regarding this notice may be addressed to the Committee Liaison Officer, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Maryland 20852, or Mrs. Yvonne Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230.
COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Levels of Restraint for Certain Cotton and Man-Made Fiber Textile Products from the Federative Republic of Brazil

April 19, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1982 and extends through March 31, 1983 under a new bilateral agreement.

SUMMARY: On March 31, 1982, the Governments of the United States and the Federative Republic of Brazil signed a new Bilateral Cotton and Man-Made Fiber Textile Agreement which establishes an aggregate and group ceilings and within those ceilings specific ceilings for Categories 300, 313, 317, and 319 during the agreement year which began on April 1, 1982. It also provides consultation levels for certain other categories, such as Categories 300/301, 314, 320, 334, 335, 369pt. (floor coverings), and 614, which are not subject to specific ceilings and which may be adjusted during the agreement year. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the new bilateral agreement, to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 300/301, 313, 314, 317, 318, 319, 320, 334, 335, 369pt. (floor coverings), and 614, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1982 and extends through March 31, 1983, in excess of the designated levels of restraint.

Effective Date: May 3, 1982.

For further information contact:

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Sincerely,

Paul T. O'Day,
Chairman, Committee for the Implementation of Textile Agreements.

United States Department of Commerce, International Trade Administration
April 19, 1982.

Committee for the Implementation of Textile Agreements
Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner:

Under the terms of the Arrangements Regarding International Trade in Textiles done at Geneva on December 23, 1973, as extended on December 15, 1977 and December 22, 1982 pursuant to the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 31, 1972, as amended by Executive Order 11951 of January 8, 1977, you are directed to prohibit, effective on May 3, 1982 and for the twelve-month period which began on April 1, 1982 and extends through March 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 300/301, 313, 314, 317, 318, 319, 320, 334, 335, 369pt. and 614, in excess of the following levels of restraint:

</tbody>
</table>

1 The levels of restraint have not been adjusted to reflect any imports after March 31, 1982.

In carrying out this directive, entries of textile products in the foregoing categories, except Categories 317, 319, 320, 334, 335 and 614, produced or manufactured in Brazil, which have been exported to the United States on and after April 1, 1981, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period which began on April 1, 1981 and extended through March 31, 1982. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Textile products in Categories 317, 319, 320, 334, 335 and 614 which have been exported before April 1, 1982 shall not be subject to this directive.

The levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of March 31, 1982 between the Governments of the United States and the Federative Republic of Brazil which provide, in part, that; (1) Within the aggregate and group limits, specific limits may be exceeded by designated percentages; (2) specific ceilings may be increased for carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 23121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), and February 9, 1982 (47 FR 5920). The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cotton and man-made fiber textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such action, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Paul T. O'Day,
Chairman, Committee for the Implementation of Textile Agreements.
Coffee, Sugar, and Cocoa Exchange, Inc.: Proposed Amendments Relating to the Coffee "C" Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule change.

SUMMARY: The Coffee, Sugar, and Cocoa Exchange, Inc. ("CSCE" or "Exchange") has submitted a proposal to amend the differentials for nine growths of coffee in its coffee "C" contract. The Commodity Futures Trading Commission ("Commission") has determined that the proposal is of major economic significance and that, accordingly, publication of the proposal is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments should be received on or before May 24, 1982.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581.

SUPPLEMENTARY INFORMATION: The Coffee, Sugar, and Cocoa Exchange, Inc. is proposing to amend Rule 8.23, Schedule C-2 of its coffee "C" futures contract. The Exchange proposes to readjust the differentials for nine growths of coffee deliverable on the contract. The CSCE has determined that the differentials should be readjusted to reflect changed circumstances in the spot market. The new differentials would be applied to delivery months following the last month in which an open position exists at the time of Commission approval.

In accordance with Section 5a(12) of the Commodity Exchange Act, 7 U.S.C. 7a(12) (Supp. IV 1980), the Commission has determined that the proposed amendments to the coffee "C" contract are of major economic significance. Accordingly, the proposed differentials as contained in Schedule C-2 of Rule 8.23 are printed below:

DIFFERENCE IN VALUE BETWEEN GRADES AND GROWTHS

Other materials submitted by the CSCE in support of the proposed rule change may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1981)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by May 24, 1982. Such comment letters will be publicly available except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on April 19, 1982.

Jane K. Stuckey,
Secretary of the Commission

BILeH CODE 6531-01-M
Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463), announcement is made of the following Committee Meeting:

Name of the committee: Army Science Board (ASB)

Date of meeting: Tuesday, 11 May 1982
Time: 0900–1600 hours (Closed)
Place: The Pentagon, Washington, D.C. (Exact location to be determined.)

Agenda: The Army Science Board Specialty Subgroup on Weapons will meet to receive briefings and hold discussions in that specific area of Army research, development, and acquisition with respect to the major issues, developments, and opportunities. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C. App. I, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 697–9703 or 695–3039.

Helen M. Bowen,
Administrative Officer.

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Supplement II to the Final Environmental Impact Statement for the Proposed Manatee (Shallowbag) Bay Project, Dare County, North Carolina

AGENCY: Army Corps of Engineers, DOD.
ACTION: Notice of intent to prepare a draft supplement II to a final environmental impact statement (FEIS).
SUMMARY: 1. The proposed action includes the deepening of the ocean bar channel at Oregon Inlet to 20 feet over a width of 400 feet; deepening and widening the Mantoe–Oregon Inlet Channel (mile 0 to mile 8.2) and a side channel to Wanchese to 14 feet deep with a width of 120 feet; enlarging the basin at Wanchese to 15 acres and deepening it to 14 feet; stabilizing Oregon Inlet with a dual rubblemound jetty system; providing for bottom protection for the Bonner Bridge; and providing for a means for sand transfer across the inlet to the downdrift beach. The portion of the project involving the Wanchese Basin has already been completed by the State of North Carolina.
2. The alternatives to the proposed action include: maintaining the existing project with improvements to Wanchese Harbor (no action); abandoning the existing project; and maintaining the Oregon Inlet ocean bar channel by dredging with nearshore disposal of dredged material.
3. a. Participation and public involvement of affected Federal, State, and local agencies, private organizations, and individuals are invited and encouraged.

Defense Logistics Agency

Draft Environmental Impact Statement Addressing Proposed Construction and Relocation of Fuel Pier to Terminal Island Mole at Naval Station Long Beach, Calif.

AGENCY: Defense Logistics Agency, DOD.
SUMMARY: The Defense Logistics Agency (DLA) announces the availability of a draft Environmental Impact Statement (EIS) addressing the proposal to construct a fuel pier at the Navy Mole on Terminal Island at Naval Station Long Beach, CA. A public hearing on the proposal will be held at the date and location specified below. A public notice of the availability of draft EISs and hearings is required under regulations of the Council on Environmental Quality (40 CFR 1506.6).
DAYS: All comments on the draft EIS must be received on or before 1 July 1982. Comments may also be presented at the public hearing on 25 May 1982. Public Hearing: DLA will conduct a public hearing on the draft EIS on Tuesday, 25 May 1982, 1:00–5:00 PM and
Building scheduled to testify, but wishing to do so will be heard at the end of the scheduled to speak have been heard.

DIA encourages the public to comment on the scope and content of this draft EIS. Whenever possible, public comments should be supported by technical data or other source material. All comments from the public on the draft EIS will be considered and responses to timely comments will be prepared for inclusion in the final EIS. All comments will be on file and available for inspection by contacting Mr. Chuck Williams at the address provided above.

Dated: April 12, 1982.

Christ F. Potamos,
Colonel, USA, Staff Director, Installation Services and Environmental Protection.

BILLING CODE 3620-01-M

Office of the Secretary of Defense

Defense Intelligence Agency Advisory Committee; Closed Meeting

Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by Section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a Panel of the DIA Advisory Committee has been scheduled as follows: Wednesday, 26 May 1982, Plaza West, Rosslyn, Virginia.

The entire meeting, commencing at 0900 hours, is devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a special study on the REIS program.

M. S. Healy,
OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-51-M

DEPARTMENT OF EDUCATION

Compensatory Education Programs for Educationally Deprived Children—Neglected or Delinquent

AGENCY: Department of Education.

ACTION: Application notice for grants to state and local educational agencies to support projects to facilitate the transition of children from state-operated institutions for neglected or delinquent children into locally-operated programs; closing date for transmittal of applications for Fiscal Year 1982.

Applications are invited for grants to provide services that will facilitate the transition of neglected or delinquent (N or D) children from State-operated institutions to locally-operated educational programs. The authority for these grants is contained in Section 153 of Title I of the Elementary and Secondary Education Act (ESEA), as amended by Pub. L. 94-559. The available funds were appropriated in the Fiscal Year (FY) 1981 annual appropriation act for Department of Education programs. Certain additional funds may also become available for these programs from the Department's FY 1982 appropriation. (20 U.S.C. 2783)

Eligible applicants are State educational agencies (SEAs) and local educational agencies (LEAs).

Section 153 of Title I recognizes the special needs of N or D children who, after leaving an institution, attempt to resume their education in local schools. A recent study showed that only one-half of the children returned to school and that almost 80 percent of those children dropped out within six months of their release from the institutions.

Because the Department has not issued any specific regulations for this program, and because the program is being funded for the first time, the award of grants is governed by the regulations in 34 CFR Part 75 for programs without specific regulations. (45 FR 84056 [Dec. 22, 1980])

Closing date for transmittal of applications: To be assured of consideration for funding, an application for a grant must be mailed or hand-delivered to the Department of Education by June 7, 1982.

Applications delivered by mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84152, Washington, D.C. 20202-3651.

An applicant must show proof of mailing consisting of one of the following:

1. A legibly-dated U.S. Postal Service postmark.
2. A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
3. A dated shipping label, invoice, or receipt from a commercial carrier.
4. Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

1. A private metered postmark.
meet the special educational needs of the eligible children who are selected to participate in the project.

Available funds: An amount of $900,000 has been appropriated for FY 1981 for Section 153 transition services grants. The funds remain available for obligation by the Department to grantees from July 1, 1981 to September 30, 1982. The Secretary estimates that these funds will support up to ten projects which the U.S. Department of Education may use as demonstration models for other SEAs and LEAs. This estimate, however, does not bind the Department of Education to a specific number of grants or the amount of any grant.

In addition, an amount of $646,000 may be available under the Department's FY 1982 appropriation. Until an FY 1982 appropriation bill is passed in final for Department of Education programs, it will not be known whether funds will actually be appropriated. If they are, they would be available for obligation by the Department to grantees from July 1, 1982 through September 30, 1983, and will be awarded under this application notice on the same basis as the FY 1981 funds.

Application forms: Application forms and instructions have been mailed to all SEAs. They may be obtained from the SEA by request. Application forms and instructions have been mailed to all LEAs. Application forms and instructions have been mailed to all LEAs and have been released from State-operated institutions. The Secretary interprets Section 153 to require that grants be used to develop and implement special projects to facilitate the transition of these children from the institutions to the local educational agencies, and to secondary schools, not beyond grade 12. For these purposes, project participants must be persons under 21 years of age who have been released from a State-operated institution. A list of State-operated institutions may be obtained from the Title I Coordinator in the SEA or from the Compensatory Education Programs office in the U.S. Department of Education.

The services to be provided for children under this grant program may include, but are not limited to—

(a) Compensatory education;
(b) Counseling—educational and individual;
(c) The services of persons with special responsibilities to act on behalf of individual children (Ombudspersons);
(d) Peer tutors; and
(e) Re-entry orientation programs.

Services may be provided through resource and vocational centers designed specifically for children who have been released from institutions. Grants under this section shall be used to provide educational services to _N_ or _D_ children in schools other than State-operated institutions. The Secretary interprets Section 153 to require that the projects be designed to

(2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. A late application will be notified that its application will not be considered.

Applications delivered by hand: An application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, Seventh and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C., time) daily, except Saturdays, Sundays, and Federal holidays. An application that is hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Program information: Grants under Section 153 of Title I, ESEA, are made to SEAs and LEAs serving substantial numbers of _N_ or _D_ children who have been released from State-operated institutions. The Secretary interprets Section 153 to require that grants be used to develop and implement special projects to facilitate the transition of these children from the institutions to the local educational agencies and to secondary schools, not beyond grade 12. For these purposes, project participants must be persons under 21 years of age who have been released from a State-operated institution. A list of State-operated institutions may be obtained from the Title I Coordinator in the SEA or from the Compensatory Education Programs office in the U.S. Department of Education.

The services to be provided for children under this grant program may include, but are not limited to—

(a) Compensatory education;
(b) Counseling—educational and individual;
(c) The services of persons with special responsibilities to act on behalf of individual children (Ombudspersons);
(d) Peer tutors; and
(e) Re-entry orientation programs.

Services may be provided through resource and vocational centers designed specifically for children who have been released from institutions. Grants under this section shall be used to provide educational services to _N_ or _D_ children in schools other than State-operated institutions. The Secretary interprets Section 153 to require that the projects be designed to

(2) A mail receipt that is not dated by the U.S. Postal Service.

(a) Compensatory education;
(b) Counseling—educational and individual;
(c) The services of persons with special responsibilities to act on behalf of individual children (Ombudspersons);
(d) Peer tutors; and
(e) Re-entry orientation programs.

Services may be provided through resource and vocational centers designed specifically for children who have been released from institutions. Grants under this section shall be used to provide educational services to _N_ or _D_ children in schools other than State-operated institutions. The Secretary interprets Section 153 to require that the projects be designed to

meet the special educational needs of the eligible children who are selected to participate in the project.

Available funds: An amount of $900,000 has been appropriated in FY 1981 for Section 153 transition services grants. The funds remain available for obligation by the Department to grantees from July 1, 1981 to September 30, 1982. The Secretary estimates that these funds will support up to ten projects which the U.S. Department of Education may use as demonstration models for other SEAs and LEAs. This estimate, however, does not bind the Department of Education to a specific number of grants or the amount of any grant.

In addition, an amount of $646,000 may be available under the Department's FY 1982 appropriation. Until an FY 1982 appropriation bill is passed in final for Department of Education programs, it will not be known whether funds will actually be appropriated. If they are, they would be available for obligation by the Department to grantees from July 1, 1982 through September 30, 1983, and will be awarded under this application notice on the same basis as the FY 1981 funds.

Application forms: Application forms and instructions have been mailed to all SEAs. They may be obtained from the appropriate SEA or by writing to the U.S. Department of Education, Office of Elementary and Secondary Education, Compensatory Education Programs, 400 Maryland Avenue, SW., (ROB-3, Room 3616), Washington, D.C. 20202-3321.

Applications must be prepared and submitted in accordance with the forms and instructions included in the grant application package. The Secretary requests that project applications not exceed 20 pages in length.

Applicable regulations: The following regulations are applicable to this program:

The Education Department General Administrative Regulations (34 CFR Parts 74, 75, 77, and 78).

How the Secretary Makes a Grant Under Section 153 of Title I of ESEA.

1. How does the Secretary evaluate an application?

(a) The Secretary evaluates an application under 34 CFR Part 75 on the basis of the selection criteria listed in § 75.210. These selection criteria are contained in paragraphs (1) through (g) of this notice.

(b) The Secretary awards up to 100 possible points for meeting these criteria.

(c) The maximum number of points possible for meeting each individual criterion is indicated in parentheses after the heading for that criterion.

2. What selection criteria does the Secretary use to evaluate an application?

(a) Meeting the purposes of the authorizing statute. (30 points)

(1) The Secretary reviews each application for information that shows how well the project will meet the purposes of the statute that authorizes the program.

(2) In conducting this review, the Secretary looks for information that describes—

(A) The objectives of the project; and

(B) How the objectives of the project further the purposes of the authorizing statute.

(b) Extent of need for the project. (20 points)

(1) The Secretary reviews each application for information that shows the project meets specific needs recognized in the statute that authorized the program.

(2) In conducting this review, the Secretary looks for information that—

(i) Describes the needs addressed by the project;

(ii) Describes how the applicant identified those needs;

(iii) Describes how those needs will be met by the project; and

(iv) Describes the benefits to be gained by meeting those needs.

(c) Plan of operation. (20 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally under-represented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women; and

(C) Handicapped persons.

(d) Quality of key personnel. (12 points)

(1) The Secretary reviews each application for information that shows the qualifications of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (d)(1) (i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications from persons who are members of groups that have been traditionally under-represented, such as—

(A) Members of racial or ethnic minority groups;
The Secretary gives notice that the sample cases and the expected parental contributions provided in the table below will be used in approving separate systems of need analysis for academic year 1982-83 for the Campus-Based Programs National Direct Student Loan (NDSL), College Work-Study (CWS), and supplemental Educational Opportunity Grant (SEOG). The Secretary takes this action under the authority of Section 124(3) of the continuing resolution for fiscal year 1982, Pub. L. 97-92.

Institutions of higher education are required to use these approved systems of need analysis in determining the financial need of dependent and independent students under the respective Campus-Based Programs.

Closing Date for Transmittal of Information: An individual or organization wishing to have a system of need analysis approved must submit to the Secretary on or before the closing date and will return information received after the closing date to the sender.

Documents Delivered by Mail: Descriptions of systems, expected parental contributions, and calculations of how each expected parental contribution was derived which are hand-delivered must be taken to Paula Husselmann, Department of Education, Office of Student Financial Assistance, Campus and State Grant Branch, 7th & D Streets, S.W., Room 4018, Regional Office Building 3, Washington, D.C. The Campus and State Grant Branch will accept these hand-delivered documents between 8:00 a.m. and 4:30 p.m. daily (Washington, D.C. time), except Saturdays, Sundays, and Federal holidays.

These documents will not be accepted after 4:30 p.m., May 24, 1982.

Program Information: This notice provides the sample cases and the expected parental contributions that the Secretary will use to approve need analysis systems for academic year 1982-83 under the Campus-Based Programs. In order to be approved a system must meet the requirements provided in this notice.

An individual or organization must submit to the Secretary expected parental contributions for dependent students which: increase incrementally as the parents' financial strength, measured in constant dollars, increases; are equal for families of equal financial strength; and are within $50 of the expected parental contributions in 75 percent of the sample cases supplied by the Secretary. An individual or organization that wishes to have its system of need analysis approved for dependent students must also submit its system of need analysis for independent students. The Secretary will also approve a need analysis system for independent undergraduate, graduate, and professional students if the Secretary approves the system for dependent students.

The expected parental contributions in this notice are based on the following assumptions: a 10 percent inflation rate for 1981; families of varying sizes with two parents and one dependent undergraduate student; adjusted gross income of the older parent who is age 45; the other parent is not gainfully employed, and asset protection allowance of $25,100 and use of 1981 U.S. income tax schedules for a joint return with standard deductions. No assumptions were made for: business or farm assets; nontaxable income; including social security benefits for
education; unusual medical or dental expenses; other unusual expenses; or

(Catalog of Federal Domestic Assistance No. 84.033, College Work-Study Program; 84.034, National Direct Loan Program; 84.033, College Work-Study Program; and 84.007, Supplemental Educational Opportunity Grant Program.)

T. H. Bell,
Secretary of Education.

**DEPARTMENT OF ENERGY**

**AGENCY:** Environmental Protection, Safety and Emergency Preparedness.

**ACTION:** Notice of Office of Management and Budget Approval of EP-739.

**SUMMARY:** The U.S. Department of Energy recently obtained approval from the Office of Management and Budget (OMB) to gather data on imports of crude oil by 30 of the largest refiners. These refiners account for 90 percent of all crude oil imported into the U.S.

**EFFECTIVE DATE:** Immediately.

**ADDRESSES:** As with all studies conducted by the Department of Energy (DOE), comments on possible improvements are always welcome. Any comments should be directed to John Wells, U.S. Department of Energy, Environment Protection, Safety and Emergency Preparedness (EP-40), Washington, D.C. 20585; or call (202) 252-2878.

**FOR FURTHER INFORMATION CONTACT:** Mrs. Dale Bodzer, Energy Information Administration, Department of Energy, Washington, D.C. 20585, (202) 252-5996.

**SUPPLEMENTARY INFORMATION:** The collection will be carried out by telephone by the Energy Information Administration for Office of the Assistant Secretary, Environmental Protection, Safety and Emergency Preparedness of the U.S. Department of Energy. The reporting format, EP-739, “Weekly Crude Watch Report,” was approved by the Office of Management and Budget February 26, 1982. The following information will be collected for each cargo acquired for import into the U.S. during the previous week: Country/code/crude type, quantity, F.O.B. price, date acquired, port code, seller code, and seller name.

The OMB number is 1905-0132 and approval for use has been granted through February 29, 1985, (SIC) in accordance with the Paperwork Reduction Act, Pub. L. 95-541. This survey is authorized by the Federal Energy Administration Act of 1974, Pub. L. 93-275, and response is voluntary.

This study will provide the only timely source of cost and volume loading data for crude oil purchased destined for the U.S. The information is required to assist DOE in monitoring trends in the world energy market. The Crude Watch study will be used to provide non-company specific information to the Defense Fuel Supply Center of the Department of Defense, the purchasing agent for the Strategic Petroleum Reserve. The data requested on this form were previously provided to the Office of Special Counsel of the Economic Regulatory Administration. Because of its importance for a number of international and emergency preparedness programs, collection and sponsorship is being formally established and transferred to the Assistant Secretary for Environmental Protection, Safety and Emergency Preparedness. It has been approved by OMB as a Voluntary report, which will be collected by telephone on a weekly basis. Making this a voluntary report represents another step in the continuing effort by the DOE to work cooperatively with the private sector on energy emergency preparedness activities. DOE encourages suggestions and other comments as to how this program might be improved.

Issued in Washington, D.C., April 15, 1982.

William A. Vaughan,
Assistant Secretary, Environmental Protection, Safety and Emergency Preparedness.

[FR Doc. 82-11119 Filed 4-22-82; 8:45 am]

**BILLING CODE 4050-01-M**

**Economic Regulatory Administration**

**Inexco Oil Co.; Proposed Consent Order**

**AGENCY:** Economic Regulatory Administration, DOE.

**ACTION:** Notice of proposed Consent Order and opportunity for comment.

**SUMMARY:** The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with Inexco Oil Company and provides an opportunity for public comment on the proposed Consent Order.

**DATE: COMMENTS BY:** May 24, 1982.

**ADDRESS:** Send comments to: David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, Missouri 64106-2466.

**FOR FURTHER INFORMATION CONTACT:** David H. Jackson, Director, Kansas City Office, Economic Regulatory Administration, 324 East 11th Street, Kansas City, Missouri 64106-2466.

**SUPPLEMENTARY INFORMATION:** On March 25, 1982, the ERA executed a proposed Consent Order with Inexco Oil Company of Houston, Texas. Under 10 CFR 205.199(b), a proposed Consent Order which involves a sum of $500,000 or more excluding interest and penalties, becomes effective no sooner than thirty days after publication in the Federal Register requesting comments concerning the proposed Consent Order.
Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate an alternative Consent Order.

I. The Consent Order

Inexco Oil Company, with its home office located in Houston, Texas, is a firm engaged in the sale of natural gas liquids and natural gas liquid products, and was subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, and 212 during the period covered by this Consent Order (September 1, 1973 through January 28, 1981). To resolve certain potential civil liability arising out of the Mandatory Petroleum Allocation and Price Regulations and related regulations, 10 CFR Parts 205, 210, 211, and 212, in connection with Inexco Oil Company’s transactions involving natural gas liquids (NGL’s) and natural gas liquid products (NGLP’s) during the period September 1, 1973 through January 28, 1981, the ERA, and Inexco Oil Company entered into a Consent Order, the significant terms of which are as follows:

A. Facts: DOE alleges that during the period September 1, 1973, through January 28, 1981, Inexco Oil Company sold products at prices in excess of the applicable ceiling or maximum lawful selling prices in violation of 6 CFR 150.355 and 150.358 and 10 CFR 212.82, 212.83, 212.143 and 212.163.

B. The execution of this Consent Order by Inexco Oil Company constitutes neither an admission by the company nor a finding by the DOE of any violation by the company of any statute or regulation.

II. Refunds and Civil Penalty

A. Disposition of Refunds: Under this Consent Order, Inexco Oil Company will pay the sum of $982,000, including interest, in twelve equal monthly installments commencing within thirty (30) days after the effective date of this Consent Order plus installment interest. Upon full satisfaction of the terms and conditions of this Consent Order by Inexco Oil Company, the DOE releases Inexco Oil Company from any civil claims that the DOE may have arising out of the specified transactions during the period covered by this Consent Order. Payments shall be made to the DOE for deposit in the U.S. Treasury as miscellaneous receipts. The provision for payment of the refund amount to DOE for deposit in the U.S. Treasury was decided upon because DOE determined that it could not identify the parties, if any, injured by Inexco’s alleged violations. Inexco sold the NGL’s, NGLP’s, and condensate that are covered by this Consent Order to refiners and resellers. Some of the NGL’s, NGLP’s and condensate Inexco sold were used as refinery blendstock while the remainder was sold as specific products, such as propane or butane. Because the sales were to refiners and resellers that were able to pass on the alleged overcharges to subsequent purchasers, we were unable to identify specific parties, if any, ultimately injured. The inability to identify injured parties is compounded by DOE’s inability to determine on the basis of its audit how the alleged overcharges were apportioned between those products that were used as refinery blendstock and those that were not. Consequently, the DOE determined that deposit of the refund amount in the U.S. Treasury is an appropriate remedy under the circumstances of this case.

B. Civil Penalty. In addition, Inexco Oil Company agrees to pay the sum of $15,000 in compromise of civil penalties relating to the above-described transactions during the period covered by this Consent Order.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, “Comments on Inexco Oil Company Consent Order.” The ERA will consider all comments it receives by 4:30 p.m., local time, on May 24, 1982. Any information or data considered confidential by the persons submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Kansas City, Mo., on the 5th day of April 1982.

Thomas A. Elliott,
Deputy Director, Kansas City Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Solicitation of Comments and Notice of Public Hearing

AGENCY: Energy Information Administration, DOE.

ACTION: Solicitation of comments and notice of public hearing.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy solicits comments concerning proposed changes to the Petroleum Supply Data Collection forms. In an effort to maximize public participation in the revision of these forms, EIA will conduct a public hearing on Thursday, May 27, 1982, and continued on Friday, May 28, 1982, if necessary, in the Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, beginning at 9 a.m. (e.s.t.)

DATES: Those wishing to provide oral testimony at the public hearing must request to speak at the hearing latest by 4:30 p.m. Friday, May 7, 1982 and must submit a copy of their presentation to the Energy Information Administration latest by 4:30 p.m. Monday, May 16, 1982.

ADDRESS: Send comments, requests to speak at the hearing, and written presentation to: Special Projects Manager, EI-422, Mail Stop 2H-058, Office of Oil and Gas, Energy Information Administration, Washington, D.C. 20585.

SUPPLEMENTARY INFORMATION:

I. Background

II. Comments and Public Hearing Procedures.

I. Background

In accordance with provisions of the Department of Energy (DOE) Organization Act (Pub. L. No. 95-91), the Energy Information Administration (EIA) is responsible for carrying out comprehensive, national energy data programs including the compilation and dissemination of economic and statistical information. In keeping with DOE’s mandated responsibilities and in an effort to minimize respondent burden, the EIA proposes changes in the following petroleum supply data collection forms:

Monthly Refinery Report—(Form EIA-87)
Weekly Refinery Report—(Form EIA-161)
Annual Refinery Capacity Report—(Form EIA-177)
Monthly Bulk Terminal Stocks Report—(Form EIA-88)
Weekly Bulk Terminal Stocks Report—
(Form EIA-162)
Monthly Products Pipeline Report—
(Form EIA-89)
Weekly Pipeline Product Stock Report—
(Form EIA-163)
Monthly Crude Oil Stocks Report—
(Form EIA-90)
Weekly Crude Oil Stocks Report—
(Form EIA-91)
Monthly Tanker and Barge Shipments of
Crude Oil & Petroleum Products
Between PADD Districts—(Form EIA-
170)
Monthly Natural Gas Liquids
Operations Report—(Form EIA-94)
Monthly Report of Oil Imports into the
United States and Puerto Rico—(Form
ERA-60)
Monthly Shipments of Refined
Petroleum Products from Puerto Rico
into the United States—(Form FEA-P-
133)
Weekly Imports Report—(Form EIA-
165)
The proposed changes and modifications are designed to reduce respondent burden, to increase the consistency between the weekly, monthly and related petroleum supply publications and to eliminate definitional ambiguity in instructions. Only minor changes are proposed to the Form ERA-60 since all DOE import forms are scheduled for a thorough review and consolidation during the upcoming year.

The proposed changes are summarized below:
1. Monthly Refinery Report (Form EIA-87)
   * Section 1, “Refinery Receipts of
     Crude Oil During Month By Method
     of Transportation,” section 7, “Fuel,
     Electric Energy, and Steam Consumed
     for All Purposes At the Refinery,” are
     eliminated from the monthly form and
     moved to the annual form EIA-177.
   * In section 2, “Refinery Production
     During The Month and End-of-Month
     Stocks of No. 4 and Residual Fuel Oil by
     Sulfur Content,” No. 4 fuel oil is
     eliminated and the five categories of
     sulfur content are reduced to three
     categories corresponding to low,
     medium and high sulfur residual fuel oil.
   * The detailed categories under
     section 4, “Gross Input to Crude Oil
     Distillation Unit During the Month,” are
     eliminated and only the “Total Gross
     Input to Crude Oil Distillation Units”
     will be collected.
   * In section 6, “Refinery Stocks,
     Receipts, Inputs, Production, Shipments
     and Refinery Fuel Use and Losses,”
     several data elements are combined:
     "Normal Butane" (code 235), "Other
     Butanes" (code 236) and "Isobutane"
     (code 233) are combined into a single
     category, “Butane”.
   * The three subcategories of lubricating
     oils, Bright Stock (code 853), Neutral
     (code 855) and Other (code 859) are
     combined into a single category,
     "Lubricating Oils”.
   * The three subcategories of waxes,
     Miscrocrystalline (code 061),
     Crystalline-Fully Refined (code 071), and
     Crystalline-Other (code 081), are
     combined into a single category,
     "Petroleum Waxes”.
   * Asphalt (code 900) and Road Oil
     (code 051) are combined into a single
     category, “Asphalt and Road oil”.
   * No. 4 fuel oil (code 414) is combined
     with Distillate Fuel oil (code 412) into
     a single category, “Distillate Fuel Oil”.
   * In section 8, “End-of-Month
     Stocks of Unfinished Oils by Category/Degree
     End-Point”, the four petroleum product
     categories are combined. "Naphthas and
     Lighter Oils” is combined with "Kerosene and Lighter Gas Oils”;
     Heavy Gas Oils” is combined with
     “Residuum”.
   * 2. Weekly Refinery Report (Form EIA-
     161)
     * The distinction between domestic and
       foreign crude oil (including lease
       condensate) is eliminated.
     * The two categories of gasoline are
       increased to four corresponding to those
       collected by the monthly form, EIA-87.
     * Kerosene (including range oil) is
       eliminated as an individual item.
     * A “Total” category is added to the
       form to account for all petroleum
       products.
     * Refinery crude oil stocks are
       collected on the EIA-161 to be
       comparable with those collected on the
       monthly EIA-87. Weekly refinery crude
       oil stocks will no longer be reported on
       form EIA-164.
     * Unfinished oils input and
       production at refineries will be added to
       the EIA-161 to allow the calculation of a
       reclassified value comparable to that
       calculated in the EIA-87.
     * Inputs data for each product will be
       collected to allow calculation of weekly
       net production for each product.
   3. Annual Refinery Capacity Report
     (Form EIA-177)
     * In section 1, “Crude Oil and Other
       Feedstocks Product Yield”;
     * The projected second year column is
       eliminated for both the input and
       output items.
     * The distinction between light and
       heavy API gravity for the input items is
       eliminated.
     * Gasoline blending components are
       added to the input items.
     * Lease condensate is combined with
       crude oil.
     * No. 4 fuel oil is combined with
       Distillate Fuel oil in the output items.
   * In section III, “Operable Capacity,”
     the projected second year column is
     eliminated.
   * Also in section III, “Operable
     Capacity,” the “Catalytic
     Hydroreforming” category is merged with
     the “Catalytic Hydrotreating” category.
   * Form EIA-87, section 1, “Refinery
     Receipts of Crude Oil by Method
     of Transportation” and section 7 “Fuel,
     Electric Energy and Steam Consumed
     for All Purposes at the Refinery” are
     added to the annual form and
     eliminated from the monthly. Annual
     data will be collected for the preceding
     year.
4. Monthly Bulk Terminal Stocks
   Report (Form EIA-88)
   * All states which are currently split
     (e.g. TX Gulf and TX Inland) are
     combined to result in 53 geographical
     reporting categories, the 50 states, D.C.,
     Puerto Rico and the Virgin Islands.
   * No. 4 fuel oil will be included with
distillate fuel oil. Sulfur categories of
No. 4 fuel oil are eliminated as on the
monthly refinery report EIA-87.
   * The five categories of sulfur levels for
   residual fuel oil are condensed to
   three as on the monthly refinery report
   EIA-87.
   * Isobutane (Code 233) is combined with
   Butane (code 232) into a single
   category “Butane”.
   * The category “Miscellaneous
   Finished Oils” is changed to “All
   Other Finished Products”.
   * Asphalt product category will
   include road oil.
5. Weekly Bulk Terminal Stocks
   Report (Form EIA-162)
   * The two categories of motor
gasoline, total motor and motor
   unleaded, are changed to four
   categories: finished leaded, finished
   unleaded, blending components and
   gasohol.
   * The product category, kerosene, is
   eliminated.
   * The refinery district level of
   aggregation is consolidated to a PADD
   level basis, except that PADD 1 is
   divided into the three sub-PADD
   geographic areas of New England,
   Central Atlantic and Lower Atlantic.
   * A total stocks column is added.
6. Monthly Products Pipeline Report
   (Form EIA-89)
   * Petroleum product stock
   information within pipelines and
   working tanks are reported by PADD
   level (with three subcategories for
   PADD-1) instead of by Refining District.
   * No. 4 fuel oil will be included with
   distillate fuel oil.
7. Weekly Pipeline Product Stock
   Report (Form EIA-163)
Changes are made to the Weekly Pipeline Product Stocks Report identical to the changes on the Weekly Bulk Terminal Stocks Report: Changes in motor gasoline categories, elimination of kerosene, changes to PADD categories, and addition of a "Total Stocks" category.

8. Monthly Crude Oil Stock Report (EIA-90)—

- Crude oil stocks are collected at the PADD level instead of the state level on the proposed form.
- The titles of the columns "Distillate Fuel Oil Consumed on Leases/Pipelines" and "Residual Fuel Oil Consumed on Leases/Pipelines" are changed to "Crude Oil Consumed as Distillate Fuel Oil" and "Crude Oil Consumed as Residual Fuel Oil" respectively.

9. Weekly Crude Oil Stock Report (Form EIA-164)—

- The domestic and foreign origin breakdown is eliminated.
- Refinery crude oil stocks currently reported on form EIA-164 will be reported on form EIA-161.

10. Monthly Tanker and Barge Shipments of Crude Oil & Petroleum Products Between PAD Districts (Form EIA-170)—

- Inter-PADD movements of crude oil and petroleum products are collected instead of inter-PADD by state movements.
- No. 4 fuel oil will be included with distillate fuel oil. The sulfur level breakdown of No. 4 fuel oil is eliminated.
- The five sulfur levels of residual fuel oil are reduced to three.
- Gasoline is divided into the standard four motor gasoline categories and the two categories of aviation gasoline, finished aviation and aviation blending components.
- Petrochemical feedstocks are divided into Naphtha-ls less than 400 degrees end-point and Other oils-over 400 degrees end-point.

11. Monthly Natural Gas Liquids Operations Report (Form EIA-64)—

- In section 1, "Natural Gas Processing Plants and Fractionator Operations," the five column breakout for shipment destination by facility type is combined into one column.
- Also in section 1, plant fuel use and losses are combined into a single reporting category.
- Isopentane, and the two subcategories of natural gasoline, 14 # and less RVP and over 14 # RVP, are combined into one product category, "Natural gasline and isopentane". Normal butane, isobutane, and other butanes are combined to form one product category called "Butanes".
- The overage (inputs) or shortage (production) rows are eliminated.
- In section 2, "Storage Facility Operations" all data columns are eliminated. End of Month stocks will still be reported by storage facility operations, but in section 1 of the report.
- On form EIA-64, the unit "barrels" is changed to "thousands of barrels".

12. Monthly Report of Oil Imports into the United States and Puerto Rico (Form ERA-60)—

Only minor changes are proposed to the Form ERA-60 since all DOE import forms are scheduled for a thorough review and consolidation during the upcoming year. These proposed changes are:

- Section II, part A of Schedule A, the requirement to indicate if no imports are made during the report month is eliminated. However, to maintain accuracy a sample selected to provide 95 percent coverage of monthly imports of each product will identify specific respondents required to file a report for all months including months with no imports.
- Product definitions for liquefied petroleum gases are revised.
- Schedule K, "Finished Petroleum Products," and Schedule T, "Residual Fuel Oil (Including Crude Oil to be Burned as Fuel)," are combined into one new schedule K.
- The "License Number" column is eliminated from Schedules B, C and K. All crude oil, unfinished oils and finished petroleum products reported on Schedules B, C, and K respectively, will be aggregated by Port of Entry and Country of Origin (for all license numbers).
- The "viscosity" column is eliminated from the new Schedule K.
- Shipment of Refined Petroleum Products from Puerto Rico to the United States (Form FEA-P-133—)
- Since the monthly "Shipments of Refined Petroleum Products (Including Unfinished Oils) from Puerto Rico to the United States" (Form FEA-P-133-M-0) is essentially the same form as the ERA-60, the changes listed above for the ERA-60 are also proposed for incorporation into the FEA-P-133.

14. Weekly Imports Report (Form EIA-165)—

- The two columns on section 1, "Imports of Petroleum Products", "Total Motor Gasoline", and "Unleaded Motor Gasoline", are changed to the new standard four categories: Finished Leaded, Finished Unleaded, Blending Components, and Gasohol.
- The petroleum product, kerosene, is eliminated.
- Section 2 of the existing form showing crude oil imports by PADD and country of origin is eliminated. The collection of crude oil imports aggregated by PADD is retained by adding a column labeled "Crude Oil" to section A and relabeling section 1, "Imports of Petroleum". Section 2 is reduced to the collection of aggregate volumes of crude oil by country of origin (not further divided by PADD). The countries of origin in section 2 will be chosen on a ranking basis.
- A "total" column is added to section 1.

II. Comments and Public Hearing Procedures

A. Written Comments. EIA invites the public to comment on these forms and provides the following guidelines to assist in preparation of responses.

If you are a possible data provider:
(1) Are the instructions and definitions clear and sufficient?
(2) Can the data be submitted in accordance with the response time specified in the instructions?
(3) How many hours, including time for research, computation, preparation and administrative review, will it take your firm to complete and submit these forms for the first year of reporting?
(4) How many hours will it take your firm for subsequent years of reporting?
(5) Estimate the annual cost of completing the forms, including direct and indirect costs associated with the data collection. Direct costs should include all one-time and recurring costs, such as development, assembly, equipment, ADP and other administrative costs.

B. Public Hearings. 1. Procedures for Request to Make Oral Presentation. The time and place for the hearing are indicated in the "Dates" and "Addresses" sections above. EIA invites any interested person wishing to provide oral testimony on these forms to request to speak at the hearing no later than 4:30 p.m. Friday, May 7, 1982 and to provide a copy of the presentation to EIA latest by 4:30 p.m. Monday, May 17, 1982. Such a
preliminary permit (pursuant to the Federal Power Act, 18 U.S.C. 791(a)-825 (r)) for Project No. 5952 to be known as the Grist Mill Project located on the Moose River, town of Concord, Vermont. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Stephen E. or George S. Austin, Box 20, Concord, Vermont 05824.

Project Description—The proposed project would consist of: (1) a newly constructed 15-foot high concrete dam; (2) a proposed reservoir with a surface elevation of 878 feet NGVD with an estimated storage of 50 acre-feet; (3) a 200-foot long tailrace; (4) a new powerhouse containing one generating unit with a rated capacity of 80 kW; (5) a new transmission line; and (6) appurtenant facilities. The Applicant estimates that the average annual energy output would be 350,000 to 400,000 kwh. The most likely market for the energy derived at the proposed project would be the Central Vermont Public Service Corporation. The lands affected by the proposed project are owned by Willard Baker of Concord, Vermont; Willard and Myrtle McPherson of Lunenburg, Vermont; and the town of Concord.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $15,738.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before July 1, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM 81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 30, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a Petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980).

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before July 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATION," "PROTEST," or "PETITION TO INTERVENE," as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20458. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11094 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

Federal Energy Regulatory Commission

[Project No. 5952-000]

Stephen E. and George S. Austin; Application for Preliminary Permit

April 20, 1982.

Take notice that Stephen E. and George S. Austin (Applicant) filed on February 8, 1982, an application for

Federal Energy Regulatory Commission

[Project No. 5952-000]

Stephen E. and George S. Austin; Application for Preliminary Permit

April 20, 1982.

Take notice that Stephen E. and George S. Austin (Applicant) filed on February 8, 1982, an application for

Federal Energy Regulatory Commission

[Project No. 5952-000]

Stephen E. and George S. Austin; Application for Preliminary Permit

April 20, 1982.

Take notice that Stephen E. and George S. Austin (Applicant) filed on February 8, 1982, an application for
Mr. N. Burgess and Ms. M. Burgess; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

April 20, 1982.

Take notice that on March 8, 1982, Mr. N. Burgess and Ms. M. Burgess (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) [16 U.S.C. 2705 and 2708 as amended], for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 6062) would be located on Bluford Creek, Trinity County, California. Correspondence with the Applicant should be directed to: Mr. N. Burgess, P.O. Box 200, Willits, California 95490.

Project Description—The proposed project would consist of: (1) a 6-foot high, 15-foot long diversion structure; (2) a 24-inch diameter, 6,440-foot long penstock; (3) a powerhouse containing a turbine-generating unit with a rated capacity of 1,250 kW; and (4) appurtenant facilities. Applicant estimates a 3,585 MWh average annual energy production.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project. Project energy would be sold to Pacific Gas and Electric Company.

Agency Comments—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the California Department of Fish & Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of any agency’s comments must also be sent to the Applicant’s representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 14, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 14, 1982.

Filing of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS,” “NOTICE OF INTENT TO FILE COMPETING APPLICATION,” “COMPETING APPLICATION,” “PROTEST,” or “PETITION TO INTERVEN,” as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, P.O. Box 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11055 Filed 4-22-82; 8:45 am]

BILLING CODE 6717-01-M

Colorado Interstate Gas Co.; Application

April 16, 1982.

Take notice that on April 1, 1982, Colorado Interstate Gas Company (Applicant), P.O. Box 1067, Colorado Springs, Colorado 80933, filed in Docket No. CP82-267-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of one observation well at the Boehm Storage Field, Morton County, Kansas. All as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to drill and equip one observation well on the western flank of the Keyes Sand Structure to the Boehm Storage Field in Section 16, Township 33 South, Range 42 West, Morton County, Kansas. Applicant explains that the purpose of this facility is to provide improved control and monitoring of the field.

Applicant estimates the cost of the proposed facility to be $322,100 which would be financed from current funds on hand, funds from operations, short-term borrowings, or long term financing.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 1.6 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission’s Rules of Practice...
and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11123 Filed 4-22-82; 8:45 am] BILLING CODE 6717-01-M

[Docket No. RP82-64-000]
Consolidated Gas Supply Corp.; Proposed Changes in FERC Gas Tariff
April 15, 1982.

Take notice that Consolidated Gas Supply Corporation (Consolidated) filed on April 1, 1982, revised tariff sheets pursuant to the Natural Gas Act, the Natural Gas Policy Act and Section 12 (PGA Clause) of the General Terms & Conditions of its Tariff. The revisions, shown on Substitute Twenty-Eighth Revised Sheet No. 10 and Substitute Twenty-Ninth Revised Sheet No. 10 proposed to be made effective on January 1, 1982 and March 1, 1982, respectively, would implement the order of the United States Court of Appeals for the Fifth Circuit in Mid-Louisiana Gas Co. v. FERC, issued December 23, 1981, in Nos. 80-11123.

Consolidated states that the proposed change would increase by 4.66¢ Dth the “Base Cost of Gas From Producer Suppliers,” as defined in the PGA clause of Consolidated’s tariff and as shown on the bottom of Sheet No. 10. This change would allow Consolidated to defer each month to Account No. 191, Unrecovered Purchased Gas Costs, the difference between the unit amount per Dth (4.66¢) now included on a cost-of-service basis in base rates for “old” pipeline production (i.e. production from wells drilled prior to January 1, 1973, or leases acquired prior to October 8, 1969) and the amount permitted under the NGPA as found by the court in Mid-Louisiana. This additional deferral would be included in Consolidated’s sales rates as part of its PGA surcharge beginning with the effective date of Consolidated’s next regularly scheduled PGA filing, September 1, 1982.

Consolidated does not propose in this filing to change its currently effective sales rates.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission’s Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 5, 1982.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any persons wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11123 Filed 4-22-82; 8:45 am] BILLING CODE 6717-01-M

[Docket No. TAE82-1-12-002]
Distrigas of Massachusetts Corp.; Revised Purchased LNG Cost Adjustment
April 15, 1982.

Take notice that on March 31, 1982, Distrigas Corporation (Distrigas) tendered for filing Tenth Revised Sheet No. 1 to its FERC Gas Tariff. This tariff sheet was filed to reflect the correct interest calculation for the surcharge credit. The revised rate proposed is $4.930966 per MMbtu, reflecting an increase in the surcharge credit of $.000012.

Concurrently, Distrigas of Massachusetts Corporation (DOMAC) tendered for filing Tenth Revised Sheet No. 3A to its FERC Gas Tariff. This tariff sheet was filed to reflect the addition of the Gas Research Institute Surcharge and to reflect the correct interest calculation for the surcharge credit. The revised rate proposed is $5.181409 per MMbtu, reflecting an increase in the surcharge credit of $.000012 to correct the interest calculation and the proper addition of the Gas Research Institute Surcharge.

Distrigas and DOMAC state that on November 30, 1981, Distrigas tendered for filing Eighth Revised Sheet No. 1 to its FERC Gas Tariff and, concurrently, DOMAC tendered for filing Eighth Revised Sheet No. 3A. These tariff sheets were filed pursuant to Distrigas’ and DOMAC’s purchased LNG cost adjustment provision set forth in their respective tariffs.

By suspension order issued December 31, 1981, the Commission accepted the above-referenced tariff sheets for filing, effective January 1, 1982, subject to refund and conditions.

On March 16, 1982, Distrigas and DOMAC concurrently submitted for filing revised tariff sheets in compliance with the conditions specified in the Commission’s suspension order.

However, on March 25, 1982, Distrigas and DOMAC became aware that an inadvertent error was made in the calculation of DOMAC’s proposed rate. The Gas Research Institute surcharge had been subtracted and not added. Furthermore, the carrying charge for the months of July, August and September was 18.21% instead of 18.27%. In October, 20.13% was used instead of 20.31%.

Accordingly, Distrigas and DOMAC submitted these revised rates which are to supersede the rates previously proposed and placed into effect subject to refund and conditions. The proposed effective date for these revised tariff sheets is January 1, 1982.

Copies of this filing were served upon Distrigas’ and DOMAC’s customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission’s Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 5, 1982.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11124 Filed 4-22-82; 8:45 am] BILLING CODE 6717-01-M

[Docket No. RP82-66-000]
East Tennessee Natural Gas Co.; Change in FERC Gas Tariff
April 15, 1982.

Take notice that on April 8, 1982, East Tennessee Natural Gas Company [East Tennessee] tendered for filing First Revised Sheet No. 122 to Original
Volume No. 1 of East Tennessee's FERC Gas Tariff to be effective May 9, 1982.

East Tennessee states that the subject tariff change is being made pursuant to a FERC auditor's request that East Tennessee conform the PG A provision in its tariff with the actual computational methodology utilized by East Tennessee.

East Tennessee also states that copies of the filing have been mailed to all affected customers and affected state regulatory commissions and is available for public inspection during regular business hours in a convenient form and place at East Tennessee's offices at 8200 Kingston Pike in Knoxville, Tennessee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 8, 1982.

Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protesting parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

BILLING CODE 6714-01-M

[Docket No. CP82-246-000]

El Paso Natural Gas Co.: Application

April 21, 1982.

Take notice that on March 19, 1982, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP82-246-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain minor facilities and the transportation and delivery of natural gas to Minco Oil and Gas Co. (Minco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that pursuant to an agreement dated October 1, 1979, between Applicant and Minco Applicant has acquired a source of supply in Hemphill County, Texas. It is asserted that under the purchase agreement Minco has reserved the right to receive in kind up to 25 percent of its combined production from said wells in addition to any future production which may be produced on Minco's properties for use by Minco in the operation of its irrigation facilities located on its ranching properties situated in Wheeler County, Texas. Minco has advised Applicant that Minco would require approximately 50 Mcf of natural gas per day for operating its irrigation facilities.

Applicant explains that in order to assist Minco in making such quantities of natural gas available to its ranching properties Applicant has agreed to construct and operate certain minor facilities located on its existing 20-inch O.D. South Zybach pipeline and then to transport and deliver natural gas to Minco.

It is further stated that on November 23, 1981, Applicant and Minco entered into an agreement whereby Applicant would receive and transport for the account of Minco for a period coterminous with the gas purchase agreement such quantities of natural gas as Minco should cause to be tendered to Applicant from the Flowers No. 1-1 and McMordie No. 1-8 wells not to exceed 25 percent of Minco's gas otherwise available for sale to Applicant under the gas purchase agreement. Applicant has agreed to transport and deliver equivalent quantities of natural gas on a volumetric basis, less fuel shrinkage and gas lost and otherwise unaccounted for, to Minco at a proposed point of delivery located on Applicant's existing 20-inch O.D. South Zybach pipeline in Wheeler County, Texas (EPNG Delivery Point). For each Mcf of Natural gas delivered by Applicant to Minco, it is asserted, the transportation agreement provides that Minco should pay Applicant the appropriate "Field Transportation Charge" as set forth on Sheet No. 1-D.2 of Applicant's FERC Gas Tariff, Third Revised Volume No. 2 or superseding sheet or tariff. The currently effective rate is 15.31 cents per Mcf, it is submitted.

It is stated that on any day when the quantity of natural gas made available to Applicant by Minco for transportation exceeds Minco's need for operating its irrigation facilities the parties have agreed that Applicant should have the right but not the obligation to purchase that volume of natural gas if any designated by Minco as being excess pursuant to the terms of the purchase agreement.

Applicant asserts that in order to effectuate the deliveries by Applicant of natural gas to Minco, Minco would construct at its own expense, own, operate, and maintain the pipeline facilities necessary to connect its pipeline system with Applicant's pipeline system facilities. Applicant would be required to construct, own, operate, and maintain the necessary measurement facilities and a tap and valve assembly with appurtenances on its 20-inch O.D. South Zybach pipeline. The estimated total cost of the minor facilities to be constructed and operated by Applicant is $2,950. Minco would reimburse Applicant for the actual cost incurred by Applicant in the construction of such facilities.

Applicant further requests that the authorization sought herein specifically permit the transportation of natural gas from additional receipt points and the addition of such delivery points as may be required provided that such gas to be delivered by Applicant to Minco would be used as fuel for its irrigation operations located on Minco's ranching properties in Wheeler County, Texas.

Applicant further requests blanket authorization for the deletion by mutual consent of receipt points and/or delivery points from the transportation arrangement. Applicant proposes that commencing one year from the last day of the month in which the requested authorization is issued and on a yearly basis thereafter all additions and deletions of receipt points and/or delivery points under the transportation arrangement that have occurred during the preceding year shall be executed and filed with the Commission. In the event facilities subject to the jurisdiction of the Commission are required to be installed by Applicant, Applicant proposes to do so under its budget-type authorization.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 10, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protesting parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act
El Paso Natural Gas Co., Application

April 21, 1982.

Take notice that on March 19, 1982, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP82-247-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing (1) the transportation of natural gas in interstate commerce for the account of Western Gas Interstate Company (WGI) and the delivery of such gas to Southern Union Gas Company (Southern Union) for WGI's account at certain points of delivery on Applicant's interstate transmission pipeline system in Arizona, New Mexico and Texas; and (2) the retention, in place and operator of certain tap facilities installed to facilitate a transportation service pursuant to section 311 of the Natural Gas Policy Act of 1978 (NGPA) and which would continue to be utilized under the proposed transportation arrangement with WGI all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a gas transportation agreement with WGI Applicant proposes to receive, transport, and deliver for the account of WGI such volumes of natural gas as WGI may tender to Applicant on any day during the term of the transportation agreement which commences with the date of initial deliveries and extends for a primary term of twenty years. It is stated that under such agreement Applicant would not be obligated to accept on any day volumes in excess of the contract quantity of 100,000 Mcf of gas per day as set forth in the agreement. It is further stated that Applicant's obligation to accept and transport natural gas for WGI under the agreement would be limited to that volume of natural gas that Applicant determines, in its sole discretion, that it has available existing capacity to accept, transport and deliver after moving supplies of natural gas for service to its sales customers and allocating remaining capacity between WGI and other shippers under arrangements with similar transportation services.

Applicant states that it would accept the volumes of natural gas to be delivered by WGI for transportation at the existing points of receipt in Eddy, Lea, San Juan, and Valencia Counties, New Mexico, and would concurrently deliver equivalent volumes, on a volumetric basis, less five percent representing gas lost and unaccounted for as well as mainline fuel requirements at the delivery points in Arizona, Texas and New Mexico as set forth in Exhibit B of the transportation agreement.

For such service, it is asserted, WGI would pay Applicant for each Mcf of natural gas transported by forward haul over a distance of one hundred miles or more a weightier average rate equal to the sum of the products of the percentages of the total volume delivered in Arizona, New Mexico and Texas, multiplied by applicant's mainline transportation charge applicable to each such rate as such charges may be in effect from time to time and set forth on Sheet No. 1-D.2 of Applicant's Tariff Volume No. 2 or superseding tariff. It is further asserted that WGI would pay Applicant for each Mcf of natural gas transported, upon Applicant's prior agreement, by forward haul over a distance of less than 100 miles at the rate in effect and reflected from time to time as the "Short Haul Charge" set forth on Sheet No. 1-D.2 of Applicant's Tariff Volume No. 2 or superseding tariff. It is further asserted that, as compensation for the use, upon Applicant's prior agreement, of Applicant's mainline transportation facilities in the back haul transmission of natural gas under the transportation agreement, WGI would pay Applicant the rate in effect and reflected from time to time as the "Back Haul Charge" set forth on Sheet No. 1-D.2 of Applicant's Tariff Volume No. 2.

It is further stated that Applicant and WGI have agreed to utilize two meter stations, the Rio Puerco and MAPCO meter stations, which would be installed under the Commission's Regulations governing transportation arrangements under Section 311(a) of the NGPA as receipt and delivery points under the subject transportation agreement. In order to utilize such meter station facilities under the proposed arrangement with WGI Applicant requests Commission authorization to retain in place and continue the operation of its tap and valve assemblies that would be installed at the Rio Puerco and MAPCO meter station locations. Specifically, Applicant proposes to retain in place and operate two 8%-inch O.D. tap and valve assemblies with appurtenances at the Rio Puerco meter station, Valencia County, New Mexico, and two 2%-inch O.D. tap and valve assemblies with appurtenances at the MAPCO meter station, Chaves County, New Mexico.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 10, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be...
unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11007 Filed 4-23-82; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. CP82-245-000]

El Paso Natural Gas Co.; Application

April 16, 1982.

Take notice that on March 19, 1982, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79976, filed in Docket No. CP82-245-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of convenience and necessity authorizing the construction and operation of certain minor tap facilities and the sale of natural gas to 4 existing distribution customers, Southern Union Gas Company, a Division of Southern Union Company (Southern Union), Gas Company of New Mexico, a Division of Southern Union Company (Gas Company), West Texas Gas, Inc. (West Texas) and Southwest Gas Corporation (Southwest) for resale to 7 right-of-way grantees on Applicant's interstate pipeline transmission system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate minor facilities to provide a total of 7 taps in order to provide natural gas service to 7 right-of-way grantees. Applicant asserts that natural gas would be sold and delivered by Applicant for residential and irrigation pumping uses to Southern Union, Gas Company, West Texas and Southwest for resale and delivery to the following right-of-way grantees:

Southern Union
1. William O. Hintze Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on Applicant's existing 20-inch O.D. Maricopa County pipeline in Yavapai County, Arizona.

2. Phillip E. Pitrat Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on Applicant's existing 30-inch O.D. San Juan Crossover pipeline in Mohave County, Arizona.

Gas Company
1. Mrs. Tony M. Atencio Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on the existing 4½-inch O.D. Amoco Production Company-Sammons Gas Com, "E" No. 1 well-tie pipeline in San Juan County, New Mexico.

2. Pat Montoya Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on the existing 4½-inch O.D. Amoco Production Company-Chavez Gas Com. "D" No. 1E well-tie pipeline in San Juan County, New Mexico.

3. Jay Christensen Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on Applicant's existing 30-inch O.D. Permian-San Juan pipeline in Socorro County, New Mexico.

West Texas
1. Longfellow Corporation Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on Applicant's existing 30-inch O.D. Waha-Ehrenberg pipeline in Collier County, Texas.

Southwest
1. Barkley Ray McLaughlin Tap
A 1-inch O.D. tap and valve assembly with appurtenances located at a point on Applicant's 8¾-inch O.D. San Manuel Crossover pipeline in Pinal County, Arizona.

Applicant estimates the cost of the proposed facilities to be $20,289 which cost would be financed by internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11126 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 6131-000]

Energenics Systems, Inc.; Application for Preliminary Permit

April 20, 1982.

Take notice that Energenics Systems, Inc. (Applicant) filed on March 29, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791a–825(r) for Project No. 6131 to be known as the Mansfield Hollow Project located on the Natchaug River in Tolland County, Connecticut. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1717 K Street, N.W., Suite 705, Washington, D.C. 20006.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Mansfield Hollow Dam and Reservoir and would consist of: (1) a new penstock utilizing the existing outlet works in the right section of the dam; (2) a new powerhouse containing turbine-generator units having a total rated capacity of 2,210 kW; (3) a tailrace, approximately 40 feet long; (4) a new transmission line, one half mile long, connecting to existing 115-kV transmission lines; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 7,800,000 kWh. Project energy would be sold to the Connecticut Light and Power Company or to nearby public institutions and industrial users.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license.

Applicant estimates the cost of the studies under the permit would be $35,000.
Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before August 2, 1982, the competing application itself [see: 18 CFR 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted or for filing. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before July 1, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before July 1, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

[Docket No. QF82-103-000]
Energenics Systems Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 15, 1982.

The hydroelectric facility will be located in Lyons, Boulder County, Colorado. The electric power production of the facility will be 1,650 kilowatts. There are no other small power production facilities within one mile of the site which are owned by the Applicant. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§1.8 and 1.10 of the Commission’s Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Project No. 6065-000]
Energenics Systems, Inc.; Application for Preliminary Permit

April 19, 1982.

Take notice that Energenics Systems, Inc. (Applicant) filed on March 8, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r) for Project No. 6065 to be known as the Thomaston Hydro Project located on the Naugatuck River in Litchfield County, Connecticut. The application is on file with the
Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1717 K Street, N.W., Suite 706, Washington, D.C. 20006.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Thomaston Dam and Reservoir and would consist of: (1) a new penstock utilizing the existing outlet works; (2) a new powerhouse containing two turbine-generator units having a total rated capacity of 2,750 kW; (3) a tailrace, 85 feet long; (4) a new transmission line, approximately 5 miles long, connecting to existing 115-kV transmission lines; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 9,700,000 KWH. Project energy would be sold to the Hartford Electric Light Company and the Connecticut Light and Power Company, or to nearby public institutions and industrial users.

Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $35,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before August 2, 1982,  an application for license or exemption from licensing, or a notice of intent to file an application for license or exemption from licensing, or a notice of intent to intervene in accordance with the regulations [see 18 CFR 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption from licensing must be submitted to the Commission on or before July 1, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the commission's regulations [see 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene.—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before August 2, 1982.

Filing and Service of Responsive Documents—Any filings must be served in all capital letters the title "COMMENT", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary [FR Doc. 82-11340 Filed 4-22-82; 8:45 am] [i

Project No. 6130-000]
Energenics Systems, Inc.; Application for Preliminary Permit
April 19, 1982.
Take notice that Energenics Systems, Inc. (Applicant) filed on March 29, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(829)] for Project No. 6130 to be known as the Neshonoc Dam Hydroelectric Project located on the La Crosse River, near Hamilton in La Crosse County, Wisconsin. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Thomas H. Clarke, Jr., President, Energenics Systems, Inc., 1717 K Street, N.W., Suite 706, Washington, D.C. 20006.

Project Description—The proposed project would utilize the existing U.S. Army Corps of Engineers' Neshonoc Dam and would consist of: (1) a proposed powerhouse with generating units having an estimated installed capacity of 49,000 kW and producing an average annual energy output of 2.0 GWh; (2) a proposed 50-foot-long penstock; (3) a proposed 30-foot-long tailrace; (4) a proposed 1-mile 115-kV transmission line to connect to an existing Northern States Power Company line; and (5) appurtenant facilities. The proposed market for the power is Northern States Power Company and Dairyland Power Cooperative.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant has requested a 36-month period to prepare a project report including preliminary designs, and results of hydrological, environmental, and economic feasibility studies. The cost of these activities along with obtaining agreements with the public utilities, consulting Federal, State, and local agencies, and preparing a license application is estimated by the Applicant at $30,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before August 2, 1982, the competing application itself [see 18 CFR 4.30 et. seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption from licensing must be submitted to the Commission on or before July 1, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit
Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydrouser Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

Project No. 6116-000

Town of Hillsborough, New Hampshire; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

April 21, 1982.

Take notice that on March 22, 1982, Town of Hillsborough, New Hampshire (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act 16 U.S.C. 2705 and 2706 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydropower project (Project No. 6116) would be located on the Coontoocook River in Hillsborough County, New Hampshire. Correspondence with the Applicant should be directed to: Mr. Robert J. Johnson, Chairman, Hydropower Study Committee, Hillsborough, New Hampshire 03244.

Project Description—The proposed run-of-the-river project would consist of:(1) an existing concrete dam with a maximum height of 15 feet, a total length of 396 feet, a spillway crest length of 239 feet and equipped with 3-foot flashboards; (2) an impoundment covering 2.0 acres with a usable storage of 6.0 acre-feet at a surface elevation of 571.5 feet msl; (3) a new reinforced concrete powerhouse measuring 25 by 76 feet, having an integral intake structure with a 10 by 10-foot hydraulically-operated gate and containing one 1.0-MW turbine/ generator unit operating under a head of 19 feet; (4) a newly-excavated tailrace canal 210 feet long and 22 feet wide; (5) a new switchyard; (6) a new 110-foot long, 34.5-kv transmission line; and (7) appurtenant facilities. The average annual generation of 4.01 million kWh would be used for municipal purposes.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the New Hampshire Fish and Game Department are requested, for the purposes set forth in Section 408 of the Act to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 9, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.6 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 9, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydrouser Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

[FR Doc. 82-11106 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M
April 15, 1982.

On March 29, 1982, Great American Federal Savings and Loan Association, 600 B Street, San Diego, California 92183 filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 282.207 of the Commission's rules.

The topping-cycle cogeneration facility will be located in National City, California. The primary energy source of the facility will be natural gas. The electric power production capacity of the facility will be 1.85 megawatts, provided by three 650 kilowatt reciprocating engine generators with heat recovery equipment on each engine. Useful steam output will drive two 300 ton absorption chillers to provide space conditioning within the facility. Installation of the facility began in January 1981. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene pursuant to § 282.207 of the Commission’s rules. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Cyril M. Jones, St. Route 2, EM Kayan Village, Libby, Montana 59923.

Project Description—The proposed project would consist of: (1) a 3-foot high diversion structure; (2) a 300-foot long earthen canal; (3) a 3-acre sump; (4) a 1,900-foot long, 10-inch diameter steel penstock; (5) a powerhouse containing one generating unit rated at 350 kW; and (6) a 1,500-foot long transmission line. The average annual energy generation is estimated to be 1.2 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time it would conduct engineering, economic, environmental, and feasibility studies, and prepare an FERC license application. No new roads would be required to conduct the studies. The cost of the work under the preliminary permit is estimated to be $3,600.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before June 28, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981]. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before June 28, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or § 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 27, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 28, 1982.

Filing and Service of Responsive Documents—Any filings must be in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

Kansas Power & Light Co.; Application
April 16, 1982.

Take notice that on April 1, 1982, Kansas Power and Light Company (Applicant), P.O. Box 889, Topeka, Kansas 66601, filed in Docket No. CP82-268-000 an application pursuant to Section 7(c) of the Natural Gas Act and § 284.222 of the Commission's Regulations for a certificate of public convenience and necessity for blanket authorization to transport, sell, and assign natural gas in interstate commerce as if Applicant were in intrastate pipeline as defined in...
Subparts C, D, and E of Part 284 thereof, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it received 8,241,298 Mcf of natural gas within or at the boundary of Kansas from interstate suppliers during the 12-month period ending December 31, 1981. It is asserted that during the same period Applicant received 82,816,058 Mcf of natural gas from all sources. It is also submitted that all of Applicant's existing operations are conducted in Kansas and that Applicant is currently applying for an exemption pursuant to Section 1(c) of the Natural Gas Act.

Applicant asserts that it would comply with the conditions set forth in §284.22(e) of the Commission's Regulations.

In the application Applicant provides a statement of the methodology to be used in calculating rates for services to be rendered.

Any person desiring to be heard or to make any protests with reference to said application should file such protest on or before May 7, 1982, with the Federal Energy Regulatory Commission, Washington, D.C. 20426, in accordance with §§ 204.20 and 204.26, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission if its designee this application if no petition to intervene if filed within the time required herein, if the Commission, on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Docket No. QF82-98-000]
Kimberly-Clark Corp., Application for Commission Certification of Qualifying Status of a Cogeneration Facility
April 15, 1982.

On March 26, 1982, Kimberly-Clark Corp., 401 North Lake St., Neenah, Wisconsin 54956 filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to §292.207 of the Commission's rules.

The topping-cycle cogeneration facility will be located in Fullerton, California. The primary energy source to be used by the facility will be natural gas. The net electric power production capacity of the facility will be 23.2 megawatts. Exhaust heat from a 20 megawatt turbine generator will be recovered in a waste heat recovery boiler and steam produced will drive a 3.5 megawatt steam turbine generator. Extraction steam from the steam turbine will be used in the mill plant production process at a rate of 30,300 lbs per hour. Installation of the facility will begin in 1983. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protestors will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Kenneth F. Plumb, Secretary.

[FR Doc. 82-11129 Filed 4-22-82; 8:45 am]
BILLING CODE 6177-01-M

[Project No. 6095-000]
Bruce J. Massey; Application for Preliminary Permit
April 21, 1982.

Take notice that Bruce Massey, (Applicant) on March 15, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(f)] for Project No. 6095, Massey hydroelectric project located on the Upper Little River near Hickory in Alexander and Caldwell Counties, North Carolina. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Bruce J. Massey, Route 1, Box 249, Hiddinsite, North Carolina 28636.

Project Description—The proposed project would consist of: (1) an existing 550-foot long, 52-foot high concrete ogee dam; (2) an existing reservoir with a storage capacity of 3,200 acre-feet; (3) an existing powerhouse and intake gate at one end of the dam; (4) a proposed 100-foot transmission line; and (5) appurtenant facilities. Applicant estimates the capacity of the proposed project to be 500 kW, and the annual energy output to be 2,628,000 kWh. Energy produced at the project would be sold to Duke Power Company.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 30-month permit to prepare a project report including preliminary designs, and results of hydrological, environmental and economic feasibility studies. The cost of these activities along with obtaining agreements with Duke Power Company and other Federal, State and local agencies; conducting final field surveys, and preparing a license application is estimated by the Applicant to approximate $8,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before August 2, 1982, the competing application itself [see: 18 CFR 4.30 et seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before July 6, 1982, and should specify the type of application forthcoming.

Applications for licensing or exemption
from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR § 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments in the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before July 6, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETITION" APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 F Street, N.W., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

[FR Doc. 82-11010 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

(Docket No. CP81-40-001)

Michigan Wisconsin Pipe Line Co. and Transcontinental Gas Pipe Line Corp.; Petition To Amend

April 21, 1982.

Take notice that on March 22, 1982, Michigan Wisconsin Pipe Line Company (Mich Wis), One Woodward Avenue, Detroit, Michigan 48226, and Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP81-40-001 a joint petition to amend the order issued July 2, 1981, in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize Mich Wis jointly to own and operate with Transco the offshore pipeline and related facilities which Transco was authorized to construct and operate, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that on order issued July 2, 1981, Transco was authorized to construct and operate 12.91 miles of 24-inch pipeline and appurtenant metering, regulating and connecting facilities necessary to attach a new source of gas supply in Block A-85, Mustang Island area, offshore Texas. It is asserted that the proposed facilities would constitute an extension of the offshore portion of Transco's Central Texas Gathering System which presently extends from Transco's main line at Compressor Station 30 in Wharton County, Texas, to producing fields in the Brazos and Matagorda Island areas, offshore Texas. Petitioners submit that ANR Production Company (ANR) owns a 33.33 percent interest in the Block A-85 reserves and Mich Wis has acquired the right to purchase the gas reserves attributable to the aforementioned interest of ANR. It is stated that in order to assist Mich Wis in effectuating receipt of the gas supplies in Block A-85 Transco has agreed pursuant to an ownership agreement dated December 8, 1981, to permit Mich Wis to share in the ownership and operation of the lateral pipeline facilities which Transco was authorized to construct in the instant docket. Petitioners further state that in accordance with the said ownership agreement the individual ownership percentage in the facilities of Transco would be 58.67 percent and that of Mich Wis would be 33.33 percent.

It is explained that the instant proposal would enable Mich Wis to move it gas supplies to its own transmission system.

Any person desiring to be heard or to make any protest with reference to said application should, on or before May 10, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb, Secretary.

(Docket No. RP82-67-000)

Natural Gas Pipeline Co. of America; Petition for Advanced approval of Accounting and Rate Treatment for Research, Development and Demonstration Expenditures

April 15, 1982.

Take notice that on April 12, 1982, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois, 60603, filed in Docket No.RP-20800 a petition pursuant to Section 1.7 of the commission's rules of Practice and Procedure (18 CFR 1.7) for advance approval of rate base treatment for certain research, development and demonstration expenditures under § 154.36(d)(5)(i) of the Commission's Regulations, all as more fully set forth in the petition which is on file with the Commission and open for public inspection.

Natural proposes to implement a demonstration project to recover and utilize waste heat from the exhaust gas of reciprocating engines. Specifically, Natural is proposing the installation of a Rankine bottoming cycle system at its Compressor Station 56 near Beatrice in Gage County, Nebraska, to utilize waste heat from the exhaust of two 4,000 horsepower Clark TCV-12 engine compressors. This proposed facility will provide approximately 1,000 horsepower to drive an additional gas compressor in parallel with existing compression equipment.

The purpose of the proposed demonstration is to assess the Rankine cycle system's potential for reducing fuel gas use and compression costs at Natural's compressor stations. Since the goal of the demonstration will be to reduce overall fuel use at Station 106, horsepower generated through the Rankine cycle will displace rather than supplement existing fuel-fired horsepower. Therefore, the demonstration will not result in additional flow capacity on Natural's system. The knowledge gained through this demonstration will be used to project the technical and economic
viability of future commercial waste heat recovery installations at natural’s other mainline compressor stations. It is estimated that this demonstration project will be installed by September, 1983. The total installed cost for a 1000 horsepower bottoming cycle system is estimated to be approximately $2,600,000. Once the system is in service, a demonstration period of approximately twenty-four months would probably be necessary to prove the effectiveness of the technology.

Pursuant to § 154.38(d)(5)(i) of the Commission’s Regulations under the Natural Gas Act, Natural requests advance approval from the Commission to adjust its rates without refund liability for funds expended to implement a demonstration project at its Station 106 to convert waste heat into mechanical energy to provide shaft horsepower for additional gas compression. The capital costs associated with the project would be charged to Account No. 188, Research and Development Expenditures. Pursuant to the terms and provisions of Section 24 of Natural’s F.P.C. Gas Tariff, Third Revised Volume No. 1, Natural would file forty-five (45) days before the project was ready for testing to include in rates the RD & D costs incurred under the project. These costs would include return and income taxes on the unamortized project plant and amortization of the project over a five (5) year period. At the conclusion of the first year and each year thereafter, Natural would file to reflect the amortization effect on the remaining unamortized capital costs in Account No. 188.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 6, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission’s Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this petition if no protest or intervention is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the petition is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Natural to appear or be represented at the hearing.

Kenneth F. Plumb, Secretary.

[Project No. 6099-000]

Northern Colorado Water Conservancy District; Application for Preliminary Permit

April 20, 1982.

Take notice that Northern Colorado Water Conservancy District (Applicant) filed on March 18, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(825(r)) for Project No. 6099 to be known as the Horsetooth Dam Project located on Cache la Poudre River in Larimer County, Colorado. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Larry D. Simpson, P.O. Box 679, Loveland, Colorado 80539.

Project Description—The proposed project would utilize the existing Bureau of Reclamation’s Horsetooth Dam and would consist of: (1) a new powerhouse containing two generating units, having a total rated capacity of 5.2 MW; (2) an existing 44-kV transmission line; and (3) appurtenant facilities. The Applicant estimates that the average annual energy output would be 7 million kWh, the most likely market for the energy derived at the proposed project would be the Public Service Company of Colorado.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 24 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $40,000.

Competing Applications—This application was filed as a competing application to Energensics Systems, Inc.’s application for Project No. 5644 filed on November 13, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission’s regulations, no competing application for preliminary permit, or notices of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission’s regulations [see 18 CFR 4.30 et. seq. or 4.101 et. seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant). If an agency does not file comments within the time set below, it will be presumed to have no comments. Comments, Protests, or Petitions to Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 10, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Room 208.
Northern Natural Gas Company, Division of InterNorth, Inc.; Application

April 16, 1982.

Take notice that on March 19, 1982, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP82-249-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon and displace and transport at the direction of Peoples no longer necessary for Applicant to appear or be represented at the hearing.

Applicant states that Northern States Power Company (NSP) agreed to store certain volumes of propane for Peoples which were subsequently converted to propane-air at NSP's peak shaving plants in St. Paul, Minnesota. Applicant asserts that it is now authorized to displace and transport at the direction of NSP volumes of propane-air at a daily rate of up to 15,000 Mcf to certain designated Peoples delivery points. It is submitted that Peoples no longer requires the supplemental peak shaving capability and has since terminated its propane-air agreement with NSP and its transportation agreement with Applicant.

Applicant submits that the proposed abandonment would be implemented without detriment or termination of gas service to any of Applicant's customers. Any person desiring to be heard or to make any protest reference to said abandonment application should on or before May 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the Commission’s Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[BILLING CODE 7171-01-M]

Northern Natural Gas Company, Division of InterNorth, Inc.; Application

April 16, 1982.

Take notice that on March 19, 1982, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP82-249-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon certain gas measuring facilities identified as the Eveleth town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2 and the Oakland town border station No. 2.

Applicant further stated that the Oakland town border station No. 2 was placed in service to facilitate delivery of natural gas to the Dehydrated Products Company for use in alfalfa and corn dehydration. It is stated that dehydration operations have terminated.

Applicant, therefore, requests permission and approval to abandon and remove the Eveleth town border station No. 2 and the Oakland town border station No. 2.

Any person desiring to be heard or to make any protest reference to said application should on or before May 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission finds that permission for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission finds that permission and approval for the proposed abandonment is required by the public convenience and necessity, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[BILLING CODE 7171-01-M]

Oroville-Wyandotte Irrigation District; Application for Amendment of License

April 19, 1982.

Take notice that on February 22, 1982, the Oroville-Wyandotte Irrigation District (Applicant) filed [pursuant to...
the Federal Power Act, 16 U.S.C. 791(a)-825(r) for an amendment to its license for the South Fork Power Project No. 2068-006. Applicant proposes to construct the Kelly Ridge II Power Plant on the Feather River in Butte County, California. Correspondence with the Applicant should be directed to: Mr. Francis R. Drake, President, Oroville-Wyandotte Irrigation District, P.O. Box 229, Oroville, California 95965.

Project Description—The proposed Kelly Ridge II Power Plant would consist of: (1) a bifurcation installed on the existing Kelly Ridge Power Plant penstock; (2) approximately 50 feet of new 36-inch diameter penstock; (3) a powerhouse constructed adjacent to the existing plant housing a single 2,500-kW generating unit; and (4) a switchyard located adjacent to the powerhouse. The Kelly Ridge II Power Plant would make use of up to 50 cfs of flows now spilled at Ponderosa Dam because of the limited capacity of the existing Kelly Ridge Power Plant.

The Kelly Ridge II Power Plant would add to the project an average annual generation of 20,000 MWh at a cost of $3,240,000 in 1982 dollars. Project power will probably be sold to the Pacific Gas and Electric Company.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other communications filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary.

Panhandle Eastern Pipe Line Co.; Extension Reports
April 14, 1982.

The companies listed below have filed extension reports pursuant to Section 311 of the Natural Gas Policy Act of 1978 (NGPA) and Part 284 of the Commission’s regulations giving notice of their intention to continue transportation and sales of natural gas for an additional term of up to 2 years. These transactions commenced on a self- implementing basis without case-by-case Commission authorization. The Commission’s regulations provide that the transportation or sales may continue for an additional term if the Commission does not act to disapprove or modify the proposed extension during the 90 days preceding the effective date of the requested extension.

The table below lists the name and addresses of each company selling or transporting pursuant to Part 284; the party receiving the gas; the date that the extension report was filed; and the effective date of the extension. A letter “B” in the Part 284 column indicates a transportation by an interstate pipeline which is extended under § 284.105. A letter “C” indicates transportation by an intrastate pipeline extended under § 284.125. A “D” indicates a sale by an intrastate pipeline extended under § 284.146.

Any person desiring to be heard or to make any protest with reference to said extension report should on or before May 10, 1982 file with the Federal Energy Regulatory Commission, Washington, D.C. 20428, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 1.6 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Kenneth F. Plumb, Secretary.

Docket No. ST80-242-001

Panhandle Eastern Pipe Line Co.;
Extension Reports

April 14, 1982.

The companies listed below have filed extension reports pursuant to Section 311 of the Natural Gas Policy Act of 1978 (NGPA) and Part 284 of the Commission’s regulations giving notice of their intention to continue transportation and sales of natural gas for an additional term of up to 2 years. These transactions commenced on a self- implementing basis without case-by-case Commission authorization. The Commission’s regulations provide that the transportation or sales may continue for an additional term if the Commission does not act to disapprove or modify the proposed extension during the 90 days preceding the effective date of the requested extension.

The table below lists the name and addresses of each company selling or transporting pursuant to Part 284; the party receiving the gas; the date that the extension report was filed; and the effective date of the extension. A letter “B” in the Part 284 column indicates a transportation by an interstate pipeline which is extended under § 284.105. A letter “C” indicates transportation by an intrastate pipeline extended under § 284.125. A “D” indicates a sale by an intrastate pipeline extended under § 284.146.

Any person desiring to be heard or to make any protest with reference to said extension report should on or before May 10, 1982 file with the Federal Energy Regulatory Commission, Washington, D.C. 20428, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 1.6 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Kenneth F. Plumb, Secretary.

Panhandle Eastern Pipe Line Co.;
Petition To Amend
April 16, 1982.

Teke notice that on March 8, 1982, the application was initially tendered for filing on March 8, 1982, however the fee required by § 180.1 for filing was not completed until April 2, 1982; thus filing was not completed until the latter date.
It is stated that by order issued January 31, 1980, in the instant docket, Petitioner was authorized to construct gas supply facilities to enable it to add new sources of supply to its system.

Petitioner requests waiver of the total cost limitation of $20,000,000 and proposes to increase the total project limitation for calendar year 1981 to $21,000,000. It is stated that the proposed increase is commensurate with the proposed construction taking into account the increases in the cost of equipment and expenses incident to the proposed facilities due to inflation.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 7, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission’s Rules of Practice and Procedure (18 CFR 1.6 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Project No. 2499-000]

Potsdam Paper Corp.; Application for Small Hydroelectric Power Project Under 5 MW Capacity

April 21, 1982.

Take notice that on March 11, 1982, the Potsdam Paper Corporation (Applicant) filed an application under Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 4, 1982, either the competing license application proposing to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (c) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.6 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 4, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

[FR Doc. 82-11134 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 2499-000]

Potsdam Paper Corp.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

April 21, 1982.

Take notice that on March 11, 1982, the Potsdam Paper Corporation (Applicant) filed an application under
Section 408 of the Energy Security Act of 1980 (Act) 10 U.S.C. 2705 and 2708 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 2498) would be located on the Raquette River in St. Lawrence County, N.Y.

Correspondence with the Applicant should be directed to: Mr. W. W. Krueger, President, P.O. Box 191, Potsdam, New York 13676.

Project Description—The proposed run-of-the-river project would consist of: (1) an existing concrete dam, 300 feet long and 20 feet high; (2) a small impoundment covering 35 acres with negligible storage at a normal surface elevation of 353 feet msl; (3) a refurbished 80 by 80-foot powerhouse containing four new 750-kV turbine/generator units operating under a head of 19.5 feet; (4) an existing tailrace 1,600 feet long, 100 feet wide and 2 feet deep; (5) a new upgraded 115-kV transmission line one mile long from the Hewittville powerhouse to the Unionville substation; and (6) appurtenant facilities. The average annual generation of 18.0 million kWh would be used by the Applicant in its manufacturing processes.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the New York State Division of Fish and Wildlife are requested, for good purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Competing Application—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 4, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980).

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those files a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before June 4, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Project No. 6121-000]

Seattle Oil Service, Inc.; Application for Preliminary Permit

April 19, 1982.

Take notice that Seattle Oil Service, Inc. (Applicant) filed on March 22, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. § 791(a)–(d)(7)] for Project No. 6121 to be known as the Frenchman Hills Waterway Station 15–000 Hydroelectric Project located on Frenchman Hills Waste Waterway near Royal City in Grant County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Milton B. Rice, Seattle Oil Service, Inc., 6320 Fauntleroy Way, S.W., Seattle, Washington 98136.

Project Description—The proposed project would consist of: (1) a 5-foot high concrete intake structure diverting water from the existing Frenchman Hills Waste Waterway; (2) a 4-foot diameter steel penstock; (3) a powerhouse with a total installed capacity of 350 kW; (4) a tailrace conveying the effluent to the Frenchman Hills Waste Waterway; and (5) a 300-foot long, 12.4-kV transmission line interconnecting with an existing 12.4-kV Grant County PUD transmission line. The Applicant estimates that the average annual output would be 1,700 MWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant is seeking issuance of a preliminary permit for a period of 18 months during which it would conduct engineering, economic, hydrological, and environmental studies and prepare an FERC license application. The cost of these studies is estimated by the Applicant to be $10,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before June 28, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81–15, issued October 20, 1981, 46 F.R. 55245, November 9, 1981].

The Commission will accept applications for license or exemption.
from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before June 28, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 27, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests or petitions to intervene must be received on or before June 28, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11143 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 6118-000]

Seattle Oil Service, Inc.; Application for Preliminary Permit
April 19, 1982.

Take notice that Seattle Oil Service, Inc. (Applicant) filed on March 22, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for Project No. 6118 to be known as the Frenchman Hills Waterway Station 0-50 Hydroelectric Project located on Frenchman Hills Waterway near Royal City in Grant County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Milton B. Rice, Seattle Oil Service, Inc., 6320 Floaters Way, S.W., Seattle, Washington 98136.

Project Description—The proposed project would consist of: (1) a 5-foot high concrete intake structure diverting water from the existing Frenchman Hills Waterway; (2) a 3-foot diameter steel penstock; (3) a powerhouse with a total installed capacity of 200 kW; (4) a tailrace conveying the effluent to the Frenchman Hills Waste Waterway; and (5) a 200-foot long, 12.4-kV transmission line interconnecting with an existing 12.4-kV Grant County PUD transmission line. The Applicant estimates that the average annual output would be 900 MWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant is seeking issuance of a preliminary permit for a period of 18 months during which it would conduct engineering, economic, hydrological, and environmental studies and prepare an FERC license application. The cost of these studies is estimated by the Applicant to be $10,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before June 28, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981), and Docket No. RM81/15, issued October 29, 1981, 49 FR 55245, November 9, 1981].

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before June 28, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 27, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 28, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative
Michael Earl Springer and James Baynard Boulden; Application for Preliminary Permit

April 20, 1982.

Take notice that Michael Earl Springer and James Baynard Boulden [Applicant] filed on February 1, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(825(r)) for Project No. 5933 to be known as the Wolf Creek Hydro Project located on the Wolf Creek, near Bridgeport, in Mono County, California. The project would entirely lie within the Toiyabe National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. James Baynard Boulden, Box 78, Wellington, Nevada 89444.

Project Description—The proposed project would consist of: (1) a proposed reinforced concrete diversion dam; (2) a proposed 1.2 mile long, 12-inch diameter diversion conduit; (3) a proposed powerhouse with a total rated capacity of 450 kW; (4) an approximately 2 mile long transmission line; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 3.78 GWh. A potential market for project generated energy is the Southern California Edison Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies, and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $35,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before July 6, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before July 6, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than September 7, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before July 6, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Take notice that Michael Earl Springer and James Baynard Boulden [Applicant] filed on February 1, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(825(r)) for Project No. 5934 to be known as the Leavitt Creek Hydro Power Project located on the Leavitt Creek, near Bridgeport, in Mono County, California. The project would entirely lie within the Toiyabe National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. James Baynard Boulden, Box 78, Wellington, Nevada 89444.

Project Description—The proposed project would consist of: (1) a proposed reinforced concrete diversion dam; (2) a proposed 3.680-foot long, 18-inch diameter diversion conduit; (3) a proposed powerhouse with a total rated capacity of 450 kW; (4) an approximately 4 mile long transmission line; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 3.78 GWh. A potential market for project generated energy is the Southern California Edison Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies, and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $35,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before June 22, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 28, 1981, 46 FR 55245, November 9, 1981.]

At the beginning of the notice, the following was written:

[Project No. 5933-000]

Michael Earl Springer and James Baynard Boulden; Application for Preliminary Permit

April 20, 1982.

Take notice that Michael Earl Springer and James Baynard Boulden [Applicant] filed on February 1, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(825(r)) for Project No. 5933 to be known as the Wolf Creek Hydro Project located on the Wolf Creek, near Bridgeport, in Mono County, California. The project would entirely lie within the Toiyabe National Forest. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. James Baynard Boulden, Box 78, Wellington, Nevada 89444.

Project Description—The proposed project would consist of: (1) a proposed reinforced concrete diversion dam; (2) a proposed 1.2 mile long, 12-inch diameter diversion conduit; (3) a proposed powerhouse with a total rated capacity of 450 kW; (4) an approximately 2 mile long transmission line; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 3.78 GWh. A potential market for project generated energy is the Southern California Edison Corporation.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies, and also prepare an FERC license application. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $35,000.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before July 6, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]
The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before June 28, 1982, and should specify the type of application forthcoming. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 27, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received by or before June 29, 1982.

Filing and Service of Responsive Documents—Any filings must be bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Project No. 5451-001]

Ted Lance Slater; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity
April 10, 1982.

Take notice that on March 5, 1982, Ted Lance Slater (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) [18 U.S.C. 2705, and 2708 as amended], for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5451) would be located on Sullivan Creek in Tuolomne County, California. Correspondence with the Applicant should be directed to: Mr. Ted Lance Slater, 2618 Hacienda Court, Santa Barbara, California 93105.

Project Description—The proposed project would consist of: (1) a 4-foot high diversion structure at approximate elevation 3050 feet; (2) a penstock 850 feet long, (3) a powerplant at elevation 2806 feet with 10 to 40 kw capacity, and (4) a transmission line 185 feet long.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the California Department of Fish and Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 90 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 90 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 7, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 7, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “NOTICE OF INTENT TO FILE COMPETING APPLICATION”, “COMPETING APPLICATION”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary. [FR Doc. 82-11145 Filed 4-22-82; 8:45 am] BILLING CODE 6717-01-M
Town of Sunapee; Application From Exemption From Licensing of a Small Hydroelectric Project of 5 Megawatts or Less

April 21, 1982.

Take notice that the Town of Sunapee filed with the Federal Energy Regulatory Commission on February 16, 1982, an application for exemption for its Sunapee Project No. 5985-000 from all or part of Part I of the Federal Power Act pursuant to 18 CFR Part 4 subpart K (1980) implementing in part section 408 of the Energy Security Act of 1980. The proposed project would be located on the Sugar River in Sullivan County, New Hampshire. Correspondence with the Applicant should be directed to: Fred J. Ayer III, Kleinschmidt and Dutting, 75 Main Street, P.O. Box 76, Pittsfield, Maine 04857.

Project Description—The proposed project would consist of: (1) the existing town dam, a stone masonry structure 15 feet high and 71 feet long; (2) a reservoir with negligible storage and a surface area of 0.5 acre, having a normal surface elevation of 1085.8 feet USGS; (3) a new intake; (4) a new 4-foot diameter penstock 1,050 feet long; (5) a new powerhouse having one generating unit with a capacity of 750 kW; (6) a new tailrace; and (7) appurtenant facilities. The Applicant estimates the average annual energy production would be 2,500,000 kwh. All project energy would be sold to the Public Service Company of New Hampshire.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption form licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for exemption (a copy of the application may be obtained directly from the Applicant). Comments should be confined to substantive issues relevant to the issuance of an exemption and consistent with the purpose of an exemption as described in this notice.

No other formal requests for comments will be made. If an agency does not file comments within 60 days of the date of issuance of this notice, it will be presumed to have no comments.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 4, 1982, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than October 4, 1982. Applications for a preliminary permit will not be accepted. A notice of intent must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission’s Rules. Any comments, protest, or petition to intervene must be received on or before June 4, 1982.

Filing and Service of Responsive Documents—Any comments, protests, or petitions to intervene must bear in all capital letters the title “COMMENTS”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable. Any of these filings must also state that it is made in response to this notice of application for exemption for Project No. 5985-000. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E.
Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 or 1.10 of the Commission’s rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before April 23, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-272-000]

Texas Eastern Transmission Corp.; Application

April 16, 1982.

Take notice that on April 2, 1982, Texas Eastern Transmission Corporation (Applicant), P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP82-27-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities offshore Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant specifically proposes to construct and operate 3.5 miles of 12-inch pipeline (WD 88 pipeline) together with related facilities extending from West Delta Block 86 “A” Platform, offshore Louisiana, to Applicant's South Pass Block 89 pipeline at a subsea tie-in in West Delta Block 87, offshore Louisiana. Applicant states that the WD 88 pipeline would have a maximum capacity of approximately 115,000 Mcf of natural gas per day. Applicant states that upon completion the WD 88 pipeline would have a maximum capacity of approximately 115,000 Mcf of natural gas per day.

Applicant states that upon completion the WD 88 pipeline would have a maximum capacity of approximately 115,000 Mcf of natural gas per day. Applicant estimates that total cost of the proposed facilities to be $4,754,000 which would be financed initially through revolving credit arrangements or from funds on hand. Permanent financing, it is asserted, would be undertaken as part of Applicant's overall long-term financing program at a latter date.

Applicant further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157-10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission’s Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb, Secretary.

[FR Doc. 82-11147 Filed 4-22-82; 8:45 a.m.]
BILLING CODE 6717-01-M
[Project No. 6092-000]

Western Hydro Electric, Inc.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

April 20, 1982.

Take notice that on March 15, 1982, Western Hydro Electric, Inc. (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705, and 2708 as amended), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed Butter Creek small hydroelectric project (Project No. 6092) would be located on Butter Creek, near Packwood, in Lewis County, Washington. Correspondence with the Applicant should be directed to: Donald J. White, Western Hydro Electric, Inc., Commercial Security Bank Bldg., Suite 600, 50 S. Main Street, Salt Lake City, Utah 84144.

Project Description—The proposed project would consist of: (1) a 6-foot high concrete diversion weir; (2) an intake; (3) a 7,300-foot long pipeline; (4) a 3,600-foot long steel penstock; (5) a powerhouse containing 3 generating units, one rated at 1,455 kW, one rated at 725 kW, and one rated at 385 kW; and (6) a 3,700-foot long transmission line.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Washington Department of Fisheries and Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 14, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene— Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 14, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

[FR Doc. 82-11108 Filed 4-20-82; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 5931-000]

City of Thayer, Missouri; Application for Preliminary Permit

April 20, 1982.

Take notice that the City of Thayer, Missouri (Applicant) filed on December 29, 1981, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-(625(r)] for Project No. 5931 to be known as the Dam No. 3 Project located on the Spring River near the Town of Mammoth Spring in Fulton County, Arkansas. The application is on file with the Commission and is available for public inspection.

Correspondence with the Applicant should be directed to: The Honorable A. D. Pierce, Mayor, City Hall, Thayer, Missouri 65771.

Project Description—The proposed project would consist of: (1) an existing concrete dam owned by the Arkansas Power & Light Company, 150 feet long and 30 feet high; (2) an impoundment with a storage of about 350 acre-feet at an elevation of 240 feet m.s.l.; (3) a renovated powerhouse measuring 20 by 30 feet, containing two 300-kW turbine/generator units operating under a head of 20 feet; (4) an existing 69-kV transmission line 2.4 miles long and (5) appurtenant facilities. The average annual generation of 1.5 million kWh would be used by the Applicant in its municipal distribution system.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would perform surveys and geological investigations, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under the permit would be $30,000.

Competing Applications—This application was filed as a competing
application to the Spring River Power Developers and the City of Searcy, Arkansas's application for Project No. 5219 filed on August 11, 1981. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission’s regulations, any competing application for preliminary permit, or applications of intent to file an application for preliminary permit or license will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the Commission’s regulations [see: 18 CFR 4.30 et seq. or 4.101 et. seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.6 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-M

(Project No. 5279-001) Application for Exemption for Small Hydroelectric Power Project Under 5 MW Capacity

April 16, 1982.

Take notice that on January 22, 1982, Yankee Power Company (Applicant) filed an application, under Section 408 of the Energy Security Act of 1980 (Act) [16 U.S.C. 2705, and 2708 as amended], for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric project (Project No. 5279) would be located on Birch Creek, Whatcom County, Washington. Correspondence with the Applicant should be directed to: Mr. James E. Hungerford, Yankee Power Company, SE 8330 Arcadia Road, Shelton, Washington 98584.

Project Description—The proposed project would consist of: (1) an existing 15-foot long, 9-foot high dam; (2) a 500-foot long, 8-foot diameter penstock; (3) a powerhouse containing one generating unit with a rated capacity of 10 kw; and (4) a 30-foot long, 240-kV transmission line from the powerhouse to an existing transmission line. The Applicant estimates that the average annual energy production would be 60 MWh.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State of Washington, Department of Fisheries & State of Washington Department of Game are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency’s comments must also be sent to the Applicant’s representatives.

Competing Applications—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before June 7, 1982, either the competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing license application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.6 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission’s Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 14, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title “COMMENTS”, “PROTEST”, or “PETITION TO INTERVENE”, as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission’s regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb, Secretary.
additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary.

[FR Doc. 82-11149 Filed 4-22-82; 8:45 am]
BILLING CODE 6717-01-M

[Project No. 6125-000] Yuba County Water Agency; Application for Preliminary Permit April 16, 1982. Take notice that Yuba County Water Agency (Applicant) filed on March 28, 1982, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r) for Project No. 6125 to be known as the Wambo Bar Water Power Project located on North Fork Yuba River and Tributaries including part of deadwood, slate, canyon, Cherokee and Indian Creeks, partially within the Plumas and Tahoe National Forests in Yuba and Sierra County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Frost, Administrator, Yuba County Water Agency, County Courthouse, Marysville, California 95901.

Project Description—The proposed project would consist of: (1) a 310-foot high, 900-foot long crest rockfill dam; (2) a 14-foot square intake structure; (3) a 10-foot diameter circular tunnel connecting to; (4) a 10-foot diameter, 200-foot long penstock; (5) a powerhouse containing a turbine-generating unit with a total rated capacity of 15 MW; (6) a reservoir with 70,000 acre-foot storage; and (7) appurtenant facilities. Applicant estimates a 85 GWh average annual energy production.

- Purposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant has requested a 30-month permit to prepare a definitive project report including preliminary designs, and geological, environmental, and economic feasibility studies. The cost of the aforementioned activities along with preparation of an environmental impact report, obtaining agreements with Federal, State, and local agencies, and preparing a license application is estimated by the Applicant to be $500,000. Power would be sold to Pacific Gas & Electric Company.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must submit to the Commission, on or before June 25, 1982, the competing application itself or a notice of intent to file such an application (see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.) The Commission will accept applications for license or exemption from licensing or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before June 25, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations (see: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as applicable).

Submission of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than August 24, 1982.

Agency Comments—Federal, State, and local agencies are invited to submit comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Petitions To Intervene—Anyone may submit comments, a protest, or a petition to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a petition to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or petitions to intervene must be received on or before June 25, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE " COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB, at the above address. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice. Kenneth F. Plumb, Secretary.

BILLING CODE 6717-01-C
The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF). An (*) before the Control (JD) number denotes additional purchasers listed at the end of the notice.

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 miles rule)
102-3: New well (1000 ft rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
107-GB: Geopressed brine
107-GS: Coal seams
107-DV: Devonian shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation

Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 4717-01-C
Office of Assistant Secretary for International Affairs

European Atomic Energy Community, Switzerland; Proposed Subsequent Arrangement

This subsequent arrangement would give approval, which must be obtained under the above mentioned agreements, for the transfer of special nuclear materials of United States origin, or of special nuclear materials produced through the use of materials of United States origin, as follows: From Switzerland to the Compagnie Generale des Matieres Nucleaires (COGEMA), La Hague, France, for the purpose of reprocessing, 68 irradiated fuel assemblies, containing 12.022 kilograms of uranium, enriched to 0.97% in U-235, and 98 kilograms of plutonium from the Muhleberg Nuclear Power Plant, owned by Bernische Kraftwerk AG. This subsequent arrangement is designated as RTD/EU(SD)-38.

The Department of Energy has received letters of assurance from the Government of Switzerland that the recovered uranium and plutonium will be stored within France and will not be transferred from France, nor put to any use, without the prior consent of the United States Government.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice and after fifteen days of continuous session of the Congress, beginning the day after the date on which the reports required by section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) are submitted to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate. The two time periods referred to above shall run concurrently.

For the Department of Energy.
Jack Ebelino,
Acting Director, Office of International Nuclear and Non-Proliferation Policy.

European Atomic Energy Community, Switzerland; Proposed Subsequent Arrangement

This subsequent arrangement would give approval, which must be obtained under the above mentioned agreements, for the transfer of special nuclear materials of United States origin, or of special nuclear materials produced through the use of materials of United States origin, as follows: From Switzerland to the Compagnie Generale des Matieres Nucleaires (COGEMA), La Hague, France, for the purpose of reprocessing, 60 irradiated fuel assemblies, containing 23,752 kilograms of uranium, enriched to 0.83% in U-235, and 162 kilograms of plutonium from the Goesgen Nuclear Power Plant, owned by Kernkraftwerks Daeniken AG. This subsequent arrangement is designated as RTD/EU(SD)-39.

The Department of Energy has received letters of assurance from the Government of Switzerland that the recovered uranium and plutonium will be stored within France and will not be transferred from France, nor put to any use, without the prior consent of the United States Government.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice and after fifteen days of continuous session of the Congress, beginning the day after the date on which the reports required by section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) are submitted to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate. The two time periods referred to above shall run concurrently.

For the Department of Energy.
Jack Ebelino,
Acting Director, Office of International Nuclear and Non-Proliferation Policy.

European Atomic Energy Community, Japan; Proposed Subsequent Arrangement

This subsequent arrangement would give approval, which must be obtained under the above mentioned agreements, for the following transfer of special nuclear materials of United States origin, or of special nuclear materials produced through the use of materials of United States origin, as follows: From Japan to the United Kingdom (British Nuclear Fuels, Ltd.) for the purpose of reprocessing, 616 irradiated fuel bundles, containing 114,696 kilograms of uranium, enriched to 1.06% in U-235, and 896 kilograms of plutonium from the Fukushima No. 1 Nuclear Power Station, Units Nos. 1, 2, 3, 4, 5, and 6. This subsequent arrangement is designated as RTD/EU(JA)-40.

The Department of Energy has received letters of assurance from the Government of Japan that the recovered uranium and plutonium will be stored in the United Kingdom, and will not be transferred from the United Kingdom, nor put to any use, without the prior consent of the United States Government.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice and after fifteen days of continuous session of the Congress.
European Atomic Energy Community, Peaceful Uses; Proposed Subsequent Arrangements

The subsequent arrangements to be carried out under the above mentioned agreement involve approval for shipment of 12 kilograms of irradiated highly enriched fuel from the Saphir II research reactor and 200 grams of irradiated highly enriched fuel from the ISIS research reactor to the Department of Energy Savannah River facility for reprocessing and storage.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that these subsequent arrangements will not be inimical to the common defense and security. These arrangements for the return of U.S. origin highly enriched uranium (HEU) are consistent with U.S. non-proliferation policy in that they serve to reduce the amount of HEU abroad.

These subsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Jack Ebetino,
Acting Director, Office of International Nuclear and Non-Proliferation Policy.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ORD-FRL-2110-3; Doc. No. ECAO-CD-81-2]

Air Quality Criteria Document for Lead

AGENCY: Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: A series of peer-review workshops will be held at the Environmental Research Center Annex (Beaunit Building), Research Triangle Park, North Carolina, on May 18-20, 1982, to facilitate scientific and technical evaluation of some of the preliminary working draft chapters of the Air Quality Criteria Document for Lead. The workshop beginning at 8:00 a.m. Tuesday, May 18 will deal with the effect of lead on ecosystems. It is expected to end at approximately 5:00 p.m. The workshop which will begin at 8:00 a.m. on Wednesday, May 19, 1982 will deal with the chemical and physical properties, sampling and analytical methodology, sources and emissions, transformation and transport, and environmental concentrations of lead. This workshop is expected to end at approximately 5:00 p.m. on Thursday, May 20. The public is invited to attend as observers.

SUPPLEMENTARY INFORMATION: The existing Air Quality Criteria Document for Lead (EPA-600/8-77-027) is being updated and revised pursuant to Section 108 and 109 of the Clean Air Act, as amended, 42 U.S.C., §§ 7408 and 7409, and will be used as a basis for the review and, as appropriate, revision of the National Ambient Air Quality Standard (NAAQS) for lead. As part of this process, EPA is assembling a panel consisting of its consulting authors and contributors, EPA personnel and other scientific and technically qualified persons selected by EPA to discuss the proposed revisions and suggest ways of resolving outstanding issues.

Persons wishing to attend these workshops as observers should contact David Weil (see “Further Information” above). Copies of the preliminarily revised chapters will be provided to such observers, who will have an opportunity at the end of the meeting to review and copy the chapters and submit written comments that will be provided when the first external review of the revised chapters and drafts of the entire document are submitted for EPA Science Advisory Board review.

Notes of the meeting will be kept by EPA, from which a summary of matters discussed and any conclusions reached will be prepared. This summary, preliminary chapter drafts discussed at the meeting, and any other materials provided for or produced collectively at the meeting will be included in the docket established for the review of the lead document. The docket is available for inspection and copying between the hours of 8 and 4 at EPA headquarters in the Central Docket Section (A-130), Gallery 1, West Tower, Waterside Mall, 401 "M" Street, S.W., Washington, D.C. 20460. (The criteria document docket is No. ECAO-CD-81-2).

Dated: April 14, 1982.

Courtney Riordan,
Acting Assistant Administrator for Research and Development (RD-872).

BILLING CODE 6560-50-M

[OPTS-59086; TSH-FRL 2110-2]

Benzoazole Carboxyly; Premanufacture Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA’s revised statement of interim policy published in the Federal Register on November 7, 1980 (45 FR 74370). This notice, issued under section 5(h)(6) of TSCA, announces receipt of one application for an exemption, provides a summary, and requests comments on the
appropiateness of granting the exemption.

ADDRESS: Written comments, identified by the document control number "[OPTS-59068]" and the specific TME number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E-401, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The following is a summary of information provided by the manufacturer on the TME received by the EPA:

TME 82-14
Manufacturer. Confidential. Chemical. (G) Benzoxazole carboxycyanine.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. Confidential.
Exposure. Manufacture and processing; dermal, 0-0.1 gm (max).
Customer sites: dermal, 0-1 ugm/da, 10 workers, 200 da/yr.
Environmental Release/Disposal.
Disposal by publicly owned treatment works (POTW), contract disposal, National Pollution Discharge Elimination System at manufacturing and processing sites, 0-10 gms to water at customer sites.
Dated: April 19, 1982.
Woodson W. Bercew,
Acting Director Management Support Division.

BILLING CODE 6560-50-M

[OPTS-51410 TSH FRL 2110-4]
Certain Chemicals; Premanufacture Notices
AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences.

Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the Federal Register of May 15, 1979 (44 FR 26558) and November 7, 1980 (45 FR 74378). This notice announces receipt of thirteen PMNs and provides a summary of each.

DATES: Close of Review Period:
PMN 82-263, 82-284 and 82-285, June 9, 1982.
PMN 82-274 and 82-276, July 11, 1982.
PMN 82-275, 82-277 and 82-278, July 12, 1982.
PMN 82-279, 82-280, 82-281 and 82-282, July 13, 1982.
PMN 82-286, July 4, 1982.
Written comments by: PMN 82-283, 82-284 and 82-285, May 10, 1982.
PMN 82-274 and 82-276, June 11, 1982.
PMN 82-275, 82-277 and 82-278, June 12, 1982.
PMN 82-279, 82-280, 82-281 and 82-282, June 13, 1982.
PMN 82-286, June 14, 1982.

ADDRESS: Written comments, identified by the document control number "[OPTS-51410]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-408, 401 M Street SW., Washington, DC 20460. (202-382-3532).

FOR FURTHER INFORMATION CONTACT:
Wormald U.S.A. Inc.

Use/Production. (S) Inert solvent for chemical. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: a total of 11 workers, up to 4 hrs/da, up to 50 da/yr.
Environmental Release/Disposal. 1,000-10,000 kg/yr released to water. Disposal by publicly owned treatment works (POTW).

PMN 82-274
Manufacturer. Wormald U.S.A., Inc.

Chemical. (G) Triethylene glycol ether.
Use/Production. (S) Industrial hot melt adhesive and coating. Prod. range: 25,000-150,000 kg/yr.
Toxicity Data. No data available on the PMN substance.
Exposure. Manufacture: dust, a total of 8 workers, up to 8 hrs/da, up to 50 da/yr.
Environmental Release/Disposal. 100-1,000 kg/yr released to land. Disposal by incineration, approved landfill and settling ponds/water treatment basin.

PMN 82-275
Manufacturer. Thiokol/Specialty Chemicals Division.

Chemical. (G) Di quaternary ammonium salt with formal linkage.
Use/Production. (S) Industrial corrosion inhibitor and anti-clay swellant in drilling muds. Prod. range: 50,000-350,000 kg/yr.
Exposure. Manufacture, use and disposal: dermal, a total of 6 workers, up to 8 hrs/da, up to 22 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to land with 100-1,000 kg/yr to water. Disposal by deep well injection, incineration and landfill.
PMN 82–279

Manufacturer. E.I. du Pont de Nemours and Company, Inc.  
Chemical. (G) Unsaturated carboxylic amide-carboxylic acid.  
Use/Production. (G) Fuel additive.  
Prod. range: Confidential.  
Toxicity Data. Acute oral: >17,000 mg/kg, Skin corrosion: Non-corrosive.  
Exposure. No exposure anticipated.  

PMN 82–280

Manufacturer. E.I. du Pont de Nemours and Company, Inc.  
Chemical. (G) Unsaturated carboxylic amide-carboxylic acid.  
Use/Production. (G) Fuel additive.  
Prod. range: Confidential.  
Toxicity Data. Acute oral: >17,000 mg/kg, Skin corrosion: Non-corrosive.  
Exposure. No exposure anticipated.  

PMN 82–281

Manufacturer. Confidential.  
Chemical. (G) Polyether alkyl esters.  
Use/Production. (G) Contained use.  
Prod. range: 30,000–45,000 kg/yr.  
Toxicity Data. No data submitted.  
Exposure. Manufacture, processing, use and disposal: dermal, a total of 18 workers, up to 2 hrs/day, up to 250 da/yr.  
Environmental Release/Disposal. 100–1,000 kg/yr released to water 1 hr/da, 50 da/yr with 100–1,000 kg/yr to land. Disposal by biological treatment system, landfill and settling sump and aeration basin.

PMN 82–282

Importer. Confidential.  
Chemical. (G) Polyhalogenated aromatic poly acrylate.  
Use/Import. (S) Industrial flame retardant for plastics. Import range: 5,000–700,000 lbs/yr.  
Toxicity Data. Acute oral: Exceeds 5,000 mg/kg, Skin: Mild primary irritant, Eye: Mild irritant.  
Exposure. Import: Minimal.  

PMN 82–283

Manufacturer. FMC Corporation.  
Chemical. (S) T-butylated triphenyl phosphate residue.  
Use/Production. (G) Wood treatment.  
Prod. range: Confidential.  
Toxicity Data. Acute oral: 500 mg/kg, Acute dermal: 2 g/kg, Skin: Moderate irritant, Eye: Non-irritant, LC50 98 hr (bluegill sunfish): 7.0 mg/L, LC50 48 hr (daphnia magna): 2.7 mg/L, BOD 5 day: 0.2 mg/L at 10 parts per million (ppm).

PMN 82–284

Manufacturer. FMC Corporation.  
Chemical. (S) Methylated triphenyl phosphate residue.  
Use/Production. (G) Wood treatment.  
Prod. range: Confidential.  
Toxicity Data. Acute oral: 500 mg/kg, Acute dermal: 2 g/kg, Skin: Moderate irritant, Eye: Non-irritant, LC50 98 hr (bluegill sunfish): 7.0 mg/L, LC50 48 hr (daphnia magna): 2.7 mg/L, BOD 5 day: 0.2 mg/L at 30 ppm.  
Exposure. Confidential.  

PMN 82–285

Manufacturer. FMC Corporation.  
Chemical. (S) Isopropylated triphenyl phosphate residue.  
Use/Production. (G) Wood treatment.  
Prod. range: Confidential.  
Toxicity Data. Acute oral: 500 mg/kg, Acute dermal: 2 g/kg, Skin: Moderate irritant, Eye: Non-irritant, LC50 98 hr (bluegill sunfish): 7.0 mg/L, LC50 48 hr (daphnia magna): 2.7 mg/L, BOD 5 day: 0.2 mg/L at 10 ppm.  
Exposure. Confidential.  

PMN 82–286

Manufacturer. Confidential.  
Chemical. (G) Substituted aryl alkyl siloxane.  
Use/Production. (S) Chemical intermediate. Prod. range: Confidential.  
Toxicity Data. No data submitted.  
Exposure. Confidential.

FEDERAL MARITIME COMMISSION

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval pursuant to Section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement and the justification offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10427; or may inspect the agreement at the Field Offices located at New York, N.Y.; New Orleans, Louisiana, San Francisco, California, Chicago, Illinois, and San Juan, Puerto Rico. Interested parties may submit comments on the agreement, including request for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before May 3, 1982, in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:
1. First Atlanta Corporation, Atlanta, Georgia; to acquire 11.1 percent of the voting shares or assets of First South Bankcorp, Columbus, Georgia. Comments on this application must be received not later than May 16, 1982.

B. First Atlanta Corporation, Atlanta, Georgia; to acquire 11.1 percent of the voting shares or assets of First South Bankcorp, Columbus, Georgia. Comments on this application must be received not later than May 16, 1982.

B. Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551:
1. North Shore Capital Corporation, Wilmette, Illinois; to acquire 80 percent or more of the voting shares or assets of The Morton Grove Bank, Morton Grove, Illinois. Comments on this application must be received not later than May 16, 1982.

Dolores S. Smith, Assistant Secretary of the Board.

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

the evidence that would be presented at a hearing.  

A. Federal Reserve Bank of Cleveland 
(Harry W. Huning, Vice President) 1455 
East Sixth Street, Cleveland, Ohio 44101: 
1. Buches, Ltd., Fostoria, Ohio; to become a bank holding company by acquiring 50 percent or more of the voting shares of Union Commerce Corporation, Cleveland, Ohio, and thereby indirectly acquire Union Commerce Bank, Cleveland, Ohio; to become a bank holding company by acquiring 90 percent or more of the voting shares of First National Bank of Nelsonville, Nelsonville, Ohio. Comments on this application must be received not later than May 16, 1982.

B. Federal Reserve Bank of Atlanta 
(Robert E. Heck, Vice President) 104 
Marietta Street, N.W., Atlanta, Georgia 30303: 
1. Philadelphia Capital Corporation, 
Philadelphia, Mississippi; to become a bank holding company by acquiring 90 percent or more of the voting shares of Bank of Philadelphia, Philadelphia, Mississippi. Comments on this application must be received not later than May 13, 1982.

2. Citizens Holding Company,  
Philadelphia, Mississippi; to become a bank holding company by acquiring 80 percent or more of the voting shares of The Citizens Bank of Philadelphia, Philadelphia, Mississippi. Comments on this application must be received not later than May 13, 1982.

C. Federal Reserve Bank of St. Louis  
(Delmer P. Weisz, Vice President) 411 
Locust Street, St. Louis, Missouri 63101: 
1. Valley Capital Corp., 
Rosedale, Mississippi; to become a bank holding company by acquiring 80 percent or more of the voting shares of The Valley Bank, Rosedale, Mississippi. Comments on this application must be received not later than May 16, 1982.

D. Federal Reserve Bank of Kansas 
City (Thomas M. Hoenig, Assistant Vice President) 924 Grand Avenue, Kansas 
City, Missouri 66106: 
1. State Holding Company, 
 thermopolis, Wyoming; to become a bank holding company by acquiring 80 percent or more of the voting shares of First State Bank, Thermopolis, Wyoming. Comments on this application must be received not later than May 16, 1982.

E. Federal Reserve Bank of Dallas  
(Anthony J. Montelaro, Assistant Vice President) 400 South Akard Street, 
Dallas, Texas 75222: 
1. Americo Bancshares, Inc., 
Wolfforth, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of American Bank of Commerce at Wolfforth, Texas, Wolfforth, Texas. Comments on this application must be received not later than May 16, 1982.

F. Federal Reserve Bank of San 
Francisco (Harry W. Green, Vice 
President) 400 Sansome Street, San 
Francisco, California 94105: 
1. La Jolla Bancorp, La Jolla, 
California; to become a bank holding company by acquiring 100 percent of the voting shares of La Jolla Bank and Trust Company, La Jolla, California. Comments on this application must be received not later than May 13, 1982.

G. Secretary, Board of Governors of 
the Federal Reserve System, 
Washington, D.C. 20551: 
1. Cambria State Bankshares, Inc., 
Cambria, Wisconsin; to become a bank holding company by acquiring 50 percent or more of the voting shares of The Cambria State Bank, Cambria, Wisconsin. Comments on this application must be received not later than May 16, 1982.

Board of Governors of the Federal Reserve System, April 19, 1982.

Dolores S. Smith, 
Assistant Secretary of the Board. 

Bank Holding Companies; Proposed de Nova Nonbank Activities 

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage de novo (or continue in an activity earlier commenced de novo), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consumption of the proposal can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices.** Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings shall be dated in writing and received. In writing and received by the appropriate Federal Reserve Bank not later than May 12, 1982.

A. Federal Reserve Bank of New York  
(A. Marshall Puckett, Vice President) 33 
Liberty Street, New York, New York 10046: 
1. Barclays Bank Limited and its 
subsidiary, Barclays Bank International 
Limited, each a bank holding company 
whose principal office is in London, 
England (the sale at retail of traveler's checks; Ohio): To engage through their

corporation ("BAF"), in selling at retail 
travelers checks issued by Barclays 
Bank International Limited. This activity 
will be conducted from the following existing consumer finance offices of 
BAF: Ste. 101, 1717 Brittain Rd., Akron, Ohio; 2810 East Waterloo Rd., Akron, Ohio; 2115 West State St., Alliance, Ohio; 4702 Main St., Ohio; 155 Wooster Rd. N. Barberton, Ohio; 503 W. Main St., Batavia, Ohio; 6259 Glenway Ave., Cincinnati, Ohio; 11822 Springfield Pike, Cincinnati, Ohio; 9805 Colerain Ave., Cincinnati, Ohio; 88 Cherry Grove, Cincinnati, Ohio; 7525 Kenwood Rd., Room 205, Cincinnati, Ohio; 1286 S. High St., Columbus, Ohio; 5025 Arlington Centre Blvd., Ste. 100, Oil of Ohio, Ohio; 5055-59 N. High St., Columbus, Ohio; 3425 South Blvd., Columbus, Ohio; 21895 
Lorain Ave., Fairview Park, Ohio; 321 S. 
Main St., Findlay, Ohio; 3076 Southwest 
Boulevard, Grove City, Ohio; 633 High St., Hamilton, Ohio; 3636 Main St., Hilliard, Ohio; 3024 Woodman Dr., Kettering, Ohio; 42783 N. Ridge Rd., Lorain, Ohio; 400 Loveland-Madera Rd., Loveland, Ohio; 3309 Warrensville Center Rd., Maple Heights, Ohio; 46 N. Erie St., Massillon, Ohio; 127 W. Wayne St., Maumee, Ohio; 963 Lila Ave., Milford, Ohio; 792 North Main St., North Canton, Ohio; 2912 Woodville Rd., Northwood, Ohio; 1472 Mentor Ave., Painesville, Ohio; 5333 Ridge Rd., Parma, Ohio; 8769 West 130th St., Parma Heights, Ohio; 1812 Brice Rd., Reynoldsburg, Ohio; 72 
West Main St., Springfield, Ohio; 123 S. 
Fourth St., Steubenville, Ohio; 4509 
Sylvania Ave., Toledo, Ohio; 4639 
Robinhood Dr., Willoughby, Ohio; 38 
North Fourth St., Zanesville, Ohio; each 
such office serving portions of the 
county in which such office is located

B. Federal Reserve Bank of Atlanta  
(Anthony P. Smith, Assistant Vice 
President) 104 
Marietta Street, N.W., Atlanta, Georgia 
30303: 
1. Buckes, Ltd., Fostoria, Ohio; to become a bank holding company by acquiring 50 percent or more of the voting shares of Union Commerce Corporation, Cleveland, Ohio, and thereby indirectly acquire Union Commerce Bank, Cleveland, Ohio; Southern Ohio Bank, Cincinnati, Ohio; Port Clinton National Bank, Port Clinton, Ohio; and First National Bank of Nelsonville, Nelsonville, Ohio. Comments on this application must be received not later than May 16, 1982.

C. Federal Reserve Bank of St. Louis  
(Delmer P. Weisz, Vice President) 411 
Locust Street, St. Louis, Missouri 63101: 
1. Valley Capital Corp., 
Rosedale, Mississippi; to become a bank holding company by acquiring 80 percent or more of the voting shares of The Valley Bank, Rosedale, Mississippi. Comments on this application must be received not later than May 13, 1982.

2. Citizens Holding Company,  
Philadelphia, Mississippi; to become a bank holding company by acquiring 80 percent or more of the voting shares of The Citizens Bank of Philadelphia, Philadelphia, Mississippi. Comments on this application must be received not later than May 13, 1982.

D. Federal Reserve Bank of Kansas 
City (Thomas M. Hoenig, Assistant Vice President) 924 Grand Avenue, Kansas 
City, Missouri 66106: 
1. State Holding Company, 
 Thermopolis, Wyoming; to become a bank holding company by acquiring 80 percent or more of the voting shares of First State Bank, Thermopolis, Wyoming. Comments on this application must be received not later than May 16, 1982.

E. Federal Reserve Bank of Dallas  
(Anthony J. Montelaro, Assistant Vice 
President) 400 South Akard Street, 
Dallas, Texas 75222: 
1. Americo Bancshares, Inc., 
Wolfforth, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of American Bank of Commerce at Wolfforth, Texas, Wolfforth, Texas. Comments on this application must be received not later than May 16, 1982.
and in certain cases portions of contiguous counties.

2. Citicorp, New York, New York (consumer finance and insurance activities; California): To expand the activities and service area of an existing office of its subsidiary, Citicorp Person-to-Person Financial Center, Inc., located in City of Industry, California. The office of the subsidiary currently engages in the following previously approved activities: the making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the extension of loans to dealers for the financing of inventory (floor planning) and working capital purposes; the purchasing and servicing for its own account of sales finance contracts; the sale of credit related life and accident and health or decreasing or level (in the case of single payment loans) term life insurance by licensed agents or brokers, as required; the sale of credit related property and casualty insurance protecting real and personal property subject to a security agreement with Citicorp Person-to-Person Financial Center, Inc., to the extent permissible under applicable state insurance laws and regulations; the sale of consumer oriented financial management courses; and the servicing, for any person, of loans and other extensions of credit. The new activities in which the office proposes to engage de novo are: the making, acquiring and servicing, for its own account and for the account of others, of extensions of credit to individuals secured by liens on residential or non-residential real estate; and the sale of mortgage life and mortgage disability insurance directly related to extensions of mortgage loans. The proposes expanded service area for all aforementioned previously approved and proposed activities is the entire State of California. Credit related life, accident, and health insurance may be written by Family Guardian Life Insurance Company, an affiliate of Citicorp Person-to-Person Financial Center, Inc.

3. Manufacturers Hanover Corporation, New York, New York, (consumer finance and credit insurance activities; New Mexico): To engage through its de novo indirect subsidiary, Finance One Mortgage of New Mexico, Inc., in the activities of making or acquiring loans and other extensions of credit, secured and unsecured, such as would be made or acquired by a finance company under state law; servicing such loans and other extensions of credit; and offering credit-related life insurance such activities will include, but not be limited to, making consumer installment loans and other extensions of credit secured by a real and personal property, and offering credit-related life insurance and decreasing or level term (in the case of single payment loans) life insurance by licensed agents or brokers to the extent permissible under applicable state insurance laws and regulations directly related to extensions of credit made or acquired by Finance One Mortgage of South Carolina, Inc. This office will serve the entire State of South Carolina.

4. Manufacturers Hanover Corporation, and New York, New York (expansion of service area for real personal property leasing and financing activities; New York): To continue to hold the shares of Manufacturers Hanover Leasing Corporation ("MHLC") after MHLC expands the service area of its office located at 5 Landmark Square, Stamford, Connecticut, to include the County of Westchester, New York. MHLC would engage in the following activities in the expanded part of the service area: Leasing real and personal property on a full payout basis; and acting as agent, broker or advisor in leasing of such property in accordance with the provisions of regulations promulgated by the Board of Governors of the Federal Reserve System and making and acquiring for its own account or for the account of others loans and other extensions of credit with respect to such property and servicing such leases, loans or other extensions of credit. Such activities will generally involve substantial dollar amounts and property used for commercial/business purposes by the lessee/borrower concerned.

5. Manufacturers Hanover Corporation, New York, New York, (consumer finance, sales finance, and credit insurance activities; South Carolina): To engage through a de novo office of its indirect subsidia Finance One Mortgage of South Carolina, Inc., to be located at 2420 Mall Drive, Charleston, South Carolina, in the activities of making or acquiring loans and other extensions of credit, secured or unsecured, such as would be made or acquired by a finance company under state law; servicing such loans and other extensions of credit; and offering credit-related life insurance; such activities will include, but not be limited to, making consumer installment loans, purchasing installment sales finance contracts, making loans and other extensions of credit secured by real and personal property, and offering credit-related life insurance and decreasing or level term (in the case of single payment loans) life insurance by licensed agents or brokers to the extent permissible under applicable state insurance laws and regulations directly related to extensions of credit made or acquired by Finance One Mortgage of South Carolina, Inc. This office will serve the entire State of South Carolina.

6. The Hongkong and Shanghai Banking Corporation, Hong Kong, Kellett N.V., Curacao, Netherlands Antilles, HSBC Holdings B.V., Amsterdam, The Netherlands, and Marine Midland Banks, Inc., Buffalo, New York, (financing and investment advising activities; California); To engage through their subsidiary, Marine Midland Realty Credit Corporation, in the following activities: originating, making, acquiring, and servicing, for its own account or for the account of others, loans and other extensions of credit, either unsecured or principally secured by mortgages on residential or commercial properties or lease-hold interests therein and acting as investment or financial adviser to the extent as serving as the advisory company for a mortgage or real estate investment trust, furnishing general economic information and advice on real estate matters, and providing portfolio investment advice on real estate matters. These activities are to be conducted from an office located in Newport Beach, California, and will serve the entire State of California.

B. Other Federal Reserve Banks:

None.

Dolores S. Smith, Assistant Secretary of the Board.

Bank Holding Companies; Proposed de Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage de novo (or continue to engage in an activity earlier commenced de novo), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce
benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices.” Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than May 13, 1982.

*Federal Reserve Bank of Boston* (Richard E. Randall, Vice President) 300 Atlantic Avenue, Boston, Massachusetts 02109:  
*CBT Corporation*, Hartford, Connecticut (financing activities: Illinois, Michigan, Indiana, Kentucky, Missouri, Iowa, Wisconsin and Minnesota): To engage, through its subsidiary, Lazere Financial Corporation, in commercial financing, including the making of secured loans to finance accounts receivable, inventories and imports for business customers. These activities will be conducted from an office at 208 LaSalle Street, Chicago, Illinois, serving the States of Illinois, Michigan, Indiana, Kentucky, Missouri, Iowa, Wisconsin and Minnesota.

*Federal Reserve Bank of Kansas City* (Thomas M. Hoening, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

First Healdton Bancorporation, Inc., Healdton, Oklahoma (insurance activities: Oklahoma): To engage, through a proposed subsidiary, First Healdton Insurance Co., in the sale of life, accident and health insurance in connection with extensions of credit by the Bank of Healdton, the subsidiary bank of First Healdton Bancorporation. This activity would be conducted from an office at 313 West Main Street, Healdton, Oklahoma, serving the two of Healdton and the surrounding rural area which extends approximately 25 miles North, West and South, and 10 miles East.

*Federal Reserve Bank of San Francisco* (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94110:  
*BankAmerica Corporation*, San Francisco, California (financing, servicing, and insurance activities; de novo office: Louisiana): To engage, through its indirect subsidiary, FinanceAmerica Corporation, a Louisiana corporation, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing loans and other extensions of credit; and offering credit-related life insurance, credit-related accident and health insurance and credit-related property insurance in the State of Louisiana. Such activities will include, but not be limited to, purchasing installment sales finance contracts, making loans and other extensions of credit to consumers and small businesses, making loans and other extensions of credit secured by real property, and offering credit-related life, credit-related accident and health and credit-related property insurance directly related to extensions of credit made or acquired by FinanceAmerica Corporation. These activities will be conducted from a de novo office located at 104A Constitution Boulevard, Alexandria, Louisiana, serving the entire State of Louisiana.

*U.S. Bancorp*, Portland, Oregon (insurance activities: Oregon): To engage, through its subsidiary, Mt. Hood Credit Life Insurance Agency, Inc., in the offering of homeowners insurance, credit life insurance and credit accident and health insurance in connection with credit made by U.S. Bancorp and its subsidiaries. These activities would be conducted from an office in Portland, Oregon, serving Oregon.

*Other Federal Reserve Banks*: None.

Dolores S. Smith,  
Assistant Secretary of the Board.

[FR Doc. 82-11082 Filed 4-22-82; 8:45 am]  
BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Notice of Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following national advisory bodies scheduled to assemble during the month of May 1982.

- National Advisory Council on Drug Abuse, May 18–19; 9:00 a.m., National Institutes of Health, Conference Room 10, Building 31C, Bethesda, Maryland 20205

Open—May 18, 9:00 a.m.—12 Noon, May 19, 9:00 a.m.—5:00 p.m.

Closed—Otherwise

Contact: Mrs. Bee Hamlin, Parklawn Building, Room 10A-03, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-6460

Purpose: The National Advisory Council on Drug Abuse advises and makes recommendations to the Secretary of Health and Human Services; the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, research training, demonstration and prevention. The Council also gives advice on policies and priorities for drug abuse grants and contracts, and reviews and makes recommendations on grant applications.

Agenda: From 9:00 a.m.—12 Noon, May 18, and from 9:00 a.m.—5:00 p.m., May 19,
the meeting will be open to the public for discussion of program development and policy issues. Otherwise, the Committee will be performing final review of applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552(b)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

* National Advisory Mental Health Council, May 24–26
Open—May 24; 9:30 a.m., National Institutes of Health, Building 31C, Conference Room 10, Rockville Pike, Bethesda, Maryland 20850
Closed—May 25–26; 9:00 a.m., Parklawn Building, NIH Conference Room 17–00B, 5600 Fishers Lane, Rockville, Maryland 20857
Contact: Ms. Helen W. Garrett, Committee Management Officer, Parklawn Building, Room 9–95, 5600 Fishers Lane, Rockville, Maryland 20857
Purpose: The National Advisory Mental Health Council advises the Secretary of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, regarding policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research and training in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and amount of, these grants.

Agenda: On May 24, the meeting will be open for discussion of NIMH policy issues and will include current administrative, legislative, and program developments. Attendance by the public for the open session will be limited to space available. Otherwise, the Council will conduct a final review of applications for assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552(b)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

* National Advisory Council on Alcohol Abuse and Alcoholism, May 27; 9:00 a.m., National Institutes of Health, Conference Room 4, Building 31A, 9000 Rockville Pike, Bethesda, Maryland 20850
Open—May 27; 9:00 a.m.
Closed—9:30 a.m. to adjournment
Contact: Mr. James Vaughan, Parklawn Building, Room 16C08, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3887
Purpose: The Council advises the Secretary, Department of Health and Human Services regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. It reviews all grant applications submitted, evaluates these applications in terms of scientific merit and coherence with Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.

Agenda: The morning session on May 27 will be devoted to general business of the Council and a discussion of current budget, legislative, and program activities. From 1:30 p.m. to adjournment the Council will conduct a final review of grant applications for Federal Assistance and this session will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552(b)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact persons listed above. Summaries of the meetings and rosters of Committee members may be obtained as follows: NIAAA: Mrs. Diana Widner, Committee Management Officer, Room 16C–21, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3860. NIDA: Ms. Claudette Wright, Committee Management Officer, Room 10–22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4333.

Dated: April 19, 1982.
Elizabeth A. Connolly, Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

**BILLING CODE 5055–01–M**

**Food and Drug Administration**

[Docket No. 82F–0098]

**Ciba-Geigy Corp.; Filing of Food Additive Petition**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of acrylic acid polymer with sodium phosphinate as a boiler water additive used in the preparation of steam that will contact food.

**SUPPLEMENTARY INFORMATION:** Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 [21 U.S.C. 348(b)(5)]), notice is given that a petition (FAP 2A3607) has been filed by the Ciba-Geigy Corp., Plastics and Additives Division, Three Skyline Drive, Hawthorne, NY 10532, proposing that § 173.310 (21 CFR 173.310) be amended to provide for the safe use of acrylic acid polymer with sodium phosphinate as a boiler water additive used in the preparation of steam that contacts food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published in the Federal Register in accordance with 21 CFR 205.50(c) (proposed December 11, 1979; 44 FR 71742).

Dated: April 12, 1982.
Sanford A. Miller, Director, Bureau of Foods.

**JSR America, Inc.; Filing of Food Additive Petition**

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice.
SUMMARY: The Food and Drug Administration (FDA) is announcing that JSR America, Inc., has filed a petition proposing that the drug additive regulations be amended to provide for the safe use of 1,2-polybutadiene as a food-packaging film that will contact food.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(h)(5), 72 Stat. 1796 [21 U.S.C. 348(h)(5)]), notice is given that a petition (FAP 28382) has been filed by JSR America, Inc., 350 Fifth Ave., New York, NY 10001, proposing that the drug additive regulations be amended to provide for the safe use of 1,2-polybutadiene as a food-packaging film that will contact food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the Federal Register in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: April 12, 1982.
Sanford A. Miller,
Director, Bureau of Foods.

BILLING CODE 4160–01–M

[Docket No. 77N–0240; DESI 1786]

Certain Single-Entity Coronary Vasodilators; Drug Efficacy Study Implementation; Revocation of Exemption and Notice of Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice

SUMMARY: This notice revokes the temporary exemption for continued marketing of certain single-entity coronary vasodilators. Under the exemption, the drugs have been allowed to remain on the market for continued study beyond the time limit scheduled for implementation of the Drug Efficacy Study. This notice also reclassifies the drugs to lacking substantial evidence of effectiveness, proposes to withdraw approval of the new drug applications, and offers an opportunity for hearing on the proposal.

DATES: The revocation of exemption is effective April 23, 1982; hearing requests on proposal to withdraw approval due on or before May 24, 1982.

ADDRESSES: Communications in response to this notice should be identified with Docket No. 77N–0240 and the reference number DESI 1786 and directed to the attention of the appropriate office named below:

Requests for hearing, supporting data, and other comments: Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5000 Fishers Lane, Rockville, MD 20857.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD–310), Bureau of Drugs, Food and Drug Administration, 5000 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary E. Catchings, Bureau of Drugs (HFD–32), Food and Drug Administration, 5000 Fishers Lane, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: In a notice (DESI 1786) published in the Federal Register of February 25, 1972 (37 FR 4001), the Food and Drug Administration classified certain coronary vasodilators as possibly effective for the management, prophylaxis, or treatment of anginal attacks.

In a notice published in the Federal Register of December 14, 1972 (37 FR 26623), as amended July 11, 1973 (38 FR 18477), August 28, 1977 (42 FR 43127), October 21, 1977 (42 FR 56156), and September 15, 1978 (43 FR 41282), certain single-entity coronary vasodilators were temporarily exempted from the time limits established for the Drug Efficacy Study Implementation (DESI) program, pending completion of clinical studies to determine the one-and-a-half-year commitment from each manufacturer to conduct bioavailability studies on its product.

Recognizing that the development of adequate protocols for, and the conduct of, clinical studies was difficult and would necessarily require several years, FDA established a two-stage study requirement. Manufacturers would first need to show that their products were bioavailable (i.e., had some chance of ultimately being classified effective), and then demonstrate clinical effectiveness. Because there were no grounds for limiting marketing to new drug application (NDA) holders, the amended exempting notice established conditions not only for continued marketing of DESI drug products, but also for marketing of other products substantially the same as the DESI drug products manufactured by other firms, whether or not these had previously been marketed. Those conditions included dates by which to submit an abbreviated new drug application (ANDA) if the product was not already the subject of an approved NDA, to begin bioavailability studies, to obtain conditional approval of ANDA's, to submit bioavailability data, to begin clinical trials, and to report the results of clinical studies. If one drug sponsor was conducting clinical studies on a product, that was considered sufficient to permit marketing of all firms' products containing the same chemical entity in a similar dosage form provided each product met the other conditions. Because bioavailability is specific for an individual product, each firm was required to conduct a bioavailability study on its own product.

The August 28, 1977 and September 15, 1978 notices stated that FDA would initiate proceedings to withdraw (or refuse) approval of any product if data do not show that the drug is bioavailable. The September 15, 1978 notice further stated that if no person elected to conduct clinical studies on a particular kind of product, all such products would fail to meet a condition that established eligibility to remain on the market.

As a result of the exempting notices and conditions described therein, more than 130 ANDA's for coronary vasodilators have received conditional approval. Many bioavailability study protocols, as well as subsequent data, have been submitted and reviewed. Similarly, many efficacy study protocols were reviewed and studies initiated. Several active ingredients are not the subject of any clinical study, however, and numerous specific products have never been the subject of a bioavailability study.

The Director of the Bureau of Drugs now proposes to withdraw approval or conditional approval of those NDA's and ANDA's that are not in compliance with the conditions for marketing because (1) no sponsor is conducting clinical studies on any of the products containing the drug entity, or (2) no bioavailability data have been submitted for specific products covered by an NDA or ANDA. In the first group are the drug entities mannnitol hexanitrate and trolnitrate phosphate. This notice lists all approved single-entity products containing either of these ingredients, because none of them complies with the conditions for continued marketing. For the second group, this notice pertains to some, but not all, single-entity products containing...
one of the following drug entities: dipyridamole, isosorbide dinitrate, nitroglycerin, of pentaerythritol tetranitrate. Some of the products in this group are the subject of ANDA’s that were conditionally approved after December 1, 1978, and before July 1, 1981. Although no time limits were established for the submission of bioavailability data for products entering the market after December 1, 1978, the amended exempting notices allowed six months for the submission of such data for those products on the market before December 1, 1978. Thus, manufacturers of products that were conditionally approved after December 1, 1978, and before July 1, 1981, have had ample time to conduct the required bioavailability studies and submit the resulting data. This notice, therefore, includes all the products conditionally approved before July 1, 1981, for which no bioavailability data have been submitted.

In order to implement actions on coronary vasodilators in an orderly manner, the following actions in the order listed, have been taken or are planned:

1. Remove from the market all products not the subject of an approved NDA or conditionally approved ANDA. (This has been accomplished.)
2. Remove from the market all products that are the subject of an approved NDA or conditionally approved ANDA and for which no bioavailability data have been received. (This notice proposes that action for products conditionally approved before July 1, 1981: products conditionally approved on or after that date will be the subject of a future Federal Register notice.)
3. Remove from the market all products that are the subject of an approved NDA or conditionally approved ANDA and that contain a drug entity whose effectiveness has not been under study by any firm. (This notice also proposes that action.)
4. Remove from the market all products that are the subject of an approved NDA or conditionally approved ANDA and for which bioavailability data have been submitted and are inadequate to show that the drug is bioavailable. (This action will be taken in a future Federal Register notice.)
5. Upgrade those drug products that are determined to be effective and remove from the market the remaining products determined to lack substantial evidence of effectiveness. (These actions will be taken when FDA has completed its review of data resulting from clinical investigations.)

Revocation of Exemption

No person has expressed an intention to conduct clinical studies of effectiveness or bioavailability studies on any products containing mannitol hexanitrate or trolinitrate phosphate as listed below. The manufacturers of the other drug products listed below have not conducted the required bioavailability studies. Therefore, the drug products described below do not meet the conditions of the exemption for continued marketing and are now reclassified to lacking substantial evidence of effectiveness. The temporary exemption as it pertains to all drug products containing mannitol hexanitrate or trolinitrate phosphate and to the other specific products listed below is hereby revoked.

Future Bioavailability Requirements

1. This notice also modifies the bioavailability requirements for products that (1) were conditionally approved on or after July 1, 1981, but before April 23, 1982, and (2) will be conditionally approved after April 23, 1982. As stated above, the amended exempting notices provided for conditional approval pending the completion of bioavailability studies if other information in the abbreviated application was satisfactory. Because the time allowed for completing studies of effectiveness has now lapsed and evaluation of those studies is underway, the agency believes it is appropriate to provide a time limit for submission of bioavailability data for recently approved ANDA’s and for any future ANDA’s. Thus, this notice modifies that requirement, as set forth below.

1. For products that were conditionally approved on or after July 1, 1981, and before April 23, 1982. Any sponsor who has not submitted bioavailability data must do so on or before October 20, 1982.
2. For a product that is to be placed on the market after April 23, 1982, the sponsor must submit and obtain conditional approval of an ANDA before marketing the product. Before the application may be approved, the sponsor must submit data adequate to demonstrate the bioavailability of the product.

Opportunity for Hearing

The products that are known by FDA to be subject to this notice are listed below, and begin with products reviewed by the National Academy of Sciences-National Research Council (NAS-NRC).

DESI 1786

1. NDA 1–786; Metaxate Tablets containing mannitol hexanitrate; Penwalt Prescription Products Division, P.O. Box 1710, Rochester, NY 14603.
3. NDA 4–730; Manmitol Hexanitate Tablets; S. F. Durst & Co., Inc., Division of O’Neal, Jones, & Feldman, Inc., 1304 Ashby Rd., St. Louis, MO 63132.
4. NDA 8–294; Metamine Tablets containing trolinitrate phosphate; Pfizer Laboratories, Division of Charles Pfizer & Co., Inc., 235 East 42nd St., New York, NY 10017.
5. NDA 8–852; Pencard and Pencard No. 2 Tablets containing pentaerythritol tetranitrate; Cole Pharmaceuticals Co., P.O. Box 14404, St. Louis, MO 63132.
6. NDA 9–198; Nitrotamine and Nitrotamine-10 Tablets containing trolinitrate phosphate; Squibb Pharmaceutical Co., Division of E. R. Squibb & Sons, Inc., P.O. Box 4000, Princeton, NJ 08540.
7. NDA 10–131; Metamine Sustained Tablets containing trolinitrate phosphate; Pfizer, Inc.
8. NDA 12–317; Penta-Erythritol Tetranitrate Nycaps containing pentaerythritol tetranitrate; USV Laboratories, Division of USV Pharmaceutical Corp., 1 Scarsdale Rd., Tuckahoe, NY 10707.
9. NDA 12–450; Tetrasule-80 Timesules containing pentaerythritol tetranitrate; Storck Pharmaceuticals, Inc., Division of Armar-Stone Laboratories, Inc., 601 East Kensington Rd., Mount Prospect, IL 60056.
10. NDA 12–488; Pentestan-80 Timesules containing pentaerythritol tetranitrate; Standox Laboratories, 585 West Second Ave., Columbus, OH 43215.
11. NDA 12–646; Timed Pentyrate Stronger Capsules containing pentaerythritol tetranitrate; Fellows-Testagar, Subdivision of Chromalloy Pharmaceuticals, Inc., 12741 Capital Ave., Oak Park, MI 48237.

The following drug products were neither reviewed by the NAS–NRC nor included in the initial notice of February 25, 1972, but the conclusions described herein apply to them.

1. NDA 8–789; Metamine Tablets containing trolinitrate phosphate; Leeming/Pacquin, Division of Charles Pfizer & Co., Inc., 235 East 42nd St., New York, NY 10017.
18. NDA 16–593; Pentanethryitol Tertraniitrate Tablets; American Pharmaceutical Co., Inc., P.O. Box 448, Passaic, N.J. 07055.
19. NDA 16–661; Dilivas Tablets containing pentaerythritol tertranitrate; Ferrand Laboratories, Inc., 760 West Eight Mile Rd., Farmdale, MI 48220.
20. ANDA 84–204; Isosorbide Dinitrate (sublingual) Tablets containing 2.5 mg isosorbide dinitrate per tablet; Barr Laboratories, Inc., 265 Livinston St., Northvale, N.J. 07647.
21. ANDA 84–473; Isosorbide Dinitrate (sublingual) Tablets containing 2.5 mg isosorbide dinitrate per tablet; Zenith Laboratories, Inc., 140 Le Grand Ave., Northvale, N.J. 07647.
22. ANDA 84–474; Isosorbide Dinitrate (sublingual) Tablets containing 5 mg isosorbide dinitrate per tablet; Zenith.
23. ANDA 86–355; Isosorbide Dinitrate Tablets containing 10 mg isosorbide dinitrate per tablet; Zenith.
24. ANDA 86–444; Isosorbide Dinitrate Tablets containing 10 mg isosorbide dinitrate per tablet; Bolar Pharmaceutical Co., Inc., 130 Lincoln St., Copiague, N.Y. 11726.
25. ANDA 86–448; Isosorbide Dinitrate Tablets containing 20 mg isosorbide dinitrate per tablet; Bolar.
26. ANDA 86–651; Isosorbide Dinitrate (sustained release) Tablets, containing 40 mg of isosorbide dinitrate per tablet; Bolar.
27. ANDA 86–671; Isosorbide Dinitrate Tablets containing 5 mg isosorbide dinitrate per tablet; Chelsea Laboratories, Inc., 428 Doughty Blvd., Inwood, N.Y. 11196.
28. ANDA 86–672; Isosorbide Dinitrate Tablets containing 5 mg isosorbide dinitrate per tablet; Chelsea.
29. ANDA 86–673; Isosorbide Dinitrate (sublingual) Tablets containing 2.5 mg isosorbide dinitrate per tablet; Chelsea.
30. ANDA 86–678; Isosorbide Dinitrate Tablets containing 10 mg isosorbide dinitrate per tablet; Chelsea.
31. ANDA 86–688; Isosorbide Dinitrate Tablets containing 5 mg isosorbide dinitrate per tablet; Barr.
32. ANDA 86–689; Isosorbide Dinitrate Tablets containing 20 mg isosorbide dinitrate per tablet; Barr.
33. ANDA 86–690; Isosorbide Dinitrate Tablets containing 5 mg isosorbide dinitrate per tablet; Barr.
34. ANDA 86–691; Isosorbide Dinitrate Tablets containing 10 mg of the drug per tablet; Barr.
35. ANDA 86–693; Isosorbide Dinitrate Tablets containing 10 mg of the drug per tablet; Barr.
37. ANDA 86–191; Isosorbide Dinitrate (sublingual) Tablets, containing 5 mg of the drug per tablet; Bolar.
38. ANDA 86–193; Pentanethryitol Tertranitrate (sustained release) Tablets containing 60 mg of the drug per tablet; Bolar.
39. ANDA 86–302; Isosorbide Dinitrate Tablets containing 10 mg of the drug per tablet; Purepak Pharmaceutical Co., 200 Elmora Ave., Elizabeth, N.J. 07207.
40. ANDA 86–304; Isosorbide (sublingual Tablets containing 5 mg of the drug per tablet; Purepak.
41. ANDA 86–382; Isosorbide Dinitrate (sublingual Tablets containing 2.5 mg of the drug per tablet; Bolar.
42. ANDA 86–855; Isosorbide Dinitrate (sublingual Tablets containing 5 mg of the drug per tablet; Lederle Laboratories, Inc., North Middletown Rd., Pearl River, N.Y. 10965.
43. ANDA 86–858; Isosorbide Dinitrate Tablets containing 5 mg of the drug per tablet; Lederle Laboratories, Inc.
44. ANDA 86–641; Isosorbide Dinitrate (sublingual Tablets containing 10 mg of the drug per tablet; Lederle.
45. ANDA 86–662; Isosorbide Dinitrate (sublingual Tablets containing 2.5 mg of the drug per tablet; Lederle.
46. ANDA 86–891; Nitroglycerin (sustained release) Capsules containing 2.5 mg of the drug per capsule; Lederle.
47. ANDA 86–894; Nitroglycerin (sustained release) Capsules containing 6.5 mg of the drug per capsule; Lederle.
48. ANDA 86–908; Dipyridamole Tablets containing 25 mg of the drug per tablet; Lemmon Co., P.O. Box 30, Sellersville, PA 18960 (formerly held by Premo Pharmaceutical Laboratories, Inc.).
49. ANDA 86–922; Isosorbide Dinitrate (sublingual Tablets containing 5 mg of the drug per tablet; Par Pharmaceutical, Inc., 12 Industrial Ave., Upper Saddle River, N.J. 07458.
50. ANDA 86–923; Isosorbide Dinitrate Tablets containing 5 mg of the drug per tablet; Par Pharmaceutical, Inc.
51. ANDA 86–924; Isosorbide Dinitrate (sublingual Tablets containing 5 mg of the drug per tablet; Par Pharmaceutical, Inc.
52. ANDA 86–925; Isosorbide Dinitrate (sublingual Tablets containing 10 mg of the drug per tablet; Par Pharmaceutical, Inc.
53. ANDA 86–944; Dipyridamole Tablets containing 25 mg of the drug per tablet; Cord Laboratories, Inc., 2555 West Midway Blvd., Broomfield, CO 80020.
54. ANDA 86–981; Dipyridamole Tablets containing 25 mg of the drug per tablet; Bolar.
55. ANDA 87-008; Dipyridamole Tablets containing 25 mg of the drug per tablet; Zenith.

56. ANDA 87-038; Dipyridamole Tablets containing 25 mg of the drug per tablet; Chelsea.

57. ANDA 87-094; Dipyridamole Tablets containing 25 mg of the drug per tablet; Par Pharmaceutical, Inc.

58. ANDA 87-184; Dipyridamole Tablets containing 25 mg of the drug per tablet; Barr.

Approval of the following new drug applications had already been withdrawn on the ground of failure to submit required reports under section 505(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(j)). At the time the notices withdrawing approval were published, no conclusions concerning the products' effectiveness had been reached. Although final conclusions about effectiveness are deferred until all studies have been reviewed, these products are included in this notice because they, too, did not meet the conditions of the exemption. This notice offers the applicants an opportunity to request a hearing concerning all issues relating to the legal status of the products.

1. NDA 12-528; Metanril Duracap containing pentaerythritol tetranitrate; Meyer Laboratories, Inc., 1900 West Commercial Blvd., Ft. Lauderdale, FL 33309.

2. NDA 16-438; Vasitol Tablets containing pentaerythritol tetranitrate; Rowell Laboratories, 210 Main St. West, Baudette, MN 56623.

4. NDA 16-655; Pentaerythritol Tetranitrate Tablets, Philips Roxane Laboratories.

On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product that the person manufactures or distributes. Such person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above).

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act under the exemption for products marketed before June 25, 1938, contained in section 201(p) of the act, or under section 107(c) of the Drug Amendments of 1962 or for any other reason.

In accordance with section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicants and all other persons subject to this notice under 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug applications should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product names above and of all identical, related or similar drug products.

An applicant or any other person subject to this notice under 21 CFR 310.6 who decides to seek a hearing shall file (1) on or before May 24, 1982, a written notice of appearance and request for hearing, and (2) on or before June 22, 1982, the data, information, and analyses relied on to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice under 21 CFR 310.6 to file a timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by the person not to make use of the opportunity for a hearing concerning the action proposed with respect to the product and constitutes a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved new drug application is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denial, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact that precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in four copies. Such submissions, except for data and information prohibited from public disclosure under 21 U.S.C. 331o(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority
supplementary information: In a notice of opportunity for hearing (NOOH) published in the Federal Register of September 25, 1981 (40 FR 47408), the Director of the Bureau of Drugs proposed to withdraw approval of the new drug applications (NDA's) of 112 prescription topical anti-infective drug products and offered an opportunity to request a hearing on the proposal. The basis of the proposal was that the products lack substantial evidence of effectiveness. The NOOH listed two products erroneously. They are ophthalmic preparations and are not covered by the NOOH or by this notice. 1. NDA 50-308; sterile Ophthalmic Ointment, Iloitocin containing erythromycin; manufactured by Distac Products Co., Division of Eli Lilly & Co., P.O. Box 1407, Indianapolis, IN 46208. 2. NDA 50-378; NeoHydeltrasol Ophthalmic Ointment containing neomycin sulfate and prednisolone sodium phosphate; manufactured by Merck Sharp & Dohme Research Laboratories, Division of Merck & Co., Inc., West Point, PA 19101.
NDA 50–244; Nysta-Cort Lotion containing hydrocortisone and nystatin.
  o. Penwalt Corp., Pharmaceutical Division, P.O. Box 1710, Rochester, NY 14603.

NDA 10–959; Caldecort Ointment containing calcium undecylenate 3% and hydrocortisone acetate 1%.

NDA 60–651; Caldecort Ointment containing neomycin sulfate, hydrocortisone acetate, and calcium undecylenate.

NDA 60–632; Terra-Cortril Topical Aerosol containing oxytetracycline hydrochloride, polymyxin B sulfate, and hydrocortisone.

NDA 10–697; Neo-Magnacort Ointment containing neomycin sulfate and hydrocortisone hydrochloride.

NDA 60–362; Zetone Cream (no NDA) containing coal tar and hydrocortisone.

Many of the antibiotic drug products listed above were originally certified or released under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357). However, in the Federal Register of October 28, 1980 (45 FR 71354), FDA amended the antibiotic regulations to exempt dermatologic drug products from certification requirements. Antibiotics exempted from batch certification are considered new drugs subject to the requirements of section 505 of the act (21 U.S.C. 355).

The NOOH stated that FDA would retain the certification regulations in the Code of Federal Regulations as public standards until the effectiveness of all products formerly certified under them is finally resolved. A Federal Register notice will be published in the near future to revoke the regulations under which the products listed above were formerly certified, if there are no other approved products (i.e., products for which a hearing was requested) to which the regulations pertain.

Products for Which a Hearing Was Requested.

The manufacturers of 53 products listed in the NOOH requested hearings. The products, which are listed below, may be marketed pending a final determination of their effectiveness.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under authority delegated to him (21 CFR 5.82) finds that, on the basis of new information before him with respect to the products, evaluated together with the evidence available to him when the applications listed above were approved, there is a lack of substantial evidence that the drug products will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling. Therefore, pursuant to this finding, approval of the NDA’s listed above and all amendments and supplements applying to them is withdrawn effective May 3, 1982.

NDA 50–640; Nycin-HC Ointment containing neomycin sulfate and hydrocortisone.

NDA 60–410; Nycin-HC Ointment containing neomycin sulfate and hydrocortisone.

NDA 60–373; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, resorcinol monooacetate, and sulfur.

NDA 60–340; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.

NDA 60–36; Neo-Resulin-F Cream containing hydrocortisone, neomycin sulfate, and prednisolone acetate.
NDA 60-315; Neomycin Sulfate-Hydrocortisone Ointment (0.5%, 1%, and 2.5%).
NDA 60-319; Hydrocortisone-Neomycin Cream (0.5% and 1%) containing hydrocortisone acetate and neomycin sulfate.
NDA 60-215; Bacitracin-Neomycin Sulfate-Polymyxin B Sulfate-Hydrocortisone Acetate Ointment.
NDA 62-186; Tri-Statin Topical Cream containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.
NDA 62-281; Vioform-HC Mild Cream and Ointment containing iodochlorhydroxyquin and hydrocortisone.
NDA 60-345; Cordran-N Ointment containing neomycin sulfate and flurandrenolide.
NDA 60-348; Cordran-N Cream containing neomycin sulfate and flurandrenolide.
NDA 60-646; Ibotycin No. 90 Ointment containing erythromycin.
NDA 62-323; NeoDecadron Cream containing neomycin sulfate and dexamethasone sodium phosphate.
NDA 50-837; Neo-Cort-Dome Creme (0.5% and 1%) containing hydrocortisone and neomycin sulfate.
NDA 50-807; Neo-Cort-Dome Lotion (0.5% and 1%) containing neomycin sulfate and hydrocortisone.
Iodochlorhydroxyquin and Hydrocortisone Cream and Ointment (no NDA—not listed in NOOH).

k. Pfizer Laboratories
NDA 61-011; Terra-Cortril Topical Ointment containing oxytetracycline hydrochloride and hydrocortisone.
NDA 60-604; Neomycin Sulfate-Hydrocortisone Ointment.
NDA 61-654; Myco Triacet Cream containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.
NDA 62-045; Myco Triacet Ointment containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.

m. E. R. Squibb & Sons.
NDA 60-572; Mycolog Ointment containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.
NDA 60-576; Mycolog Cream containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.

NDA 60-700; Neo-Synalar Cream containing neomycin sulfate and fluorocinolone acetonide.

o. The Upjohn Co.
NDA 50-374; Neo-Cortef Lotion containing neomycin sulfate and hydrocortisone acetate.
NDA 60-460; Neo-Oxylene Ointment containing neomycin sulfate and fluorometholone.

P. Pfizer Laboratories
NDA 60-811; Neo-Medrol Acetate (25% and 1%) containing neomycin sulfate and methylprednisolone acetate.
NDA 60-751; Neo-Cortef Ointment (0.5%, 1%, and 2.5%) containing neomycin sulfate and hydrocortisone acetate.

NDA 61-036; Neo-Delta-Cortef Ointment containing neomycin sulfate and prednisolone acetate.
NDA 61-049; Neo-Cortef Cream [1% and 2.5%] containing neomycin sulfate and hydrocortisone acetate.

Requests for hearings were also submitted by manufacturers of products for which there are no NDA's and which were not listed in the NOOH. These requests were received from:

1. Hyrex Pharmaceuticals, P.O. Box 18355, Memphis, TN 38118.
3. Marnel Pharmaceuticals, Inc., 4 Dundas Cir., P.O. Box 20420, Greensboro, NC 27420.
4. Mayrand, Inc., 4 Dundas Cir., P.O. Box 661-954, Myco Triacet Cream containing nystatin, neomycin sulfate, gramicidin, and triamcinolone acetonide.

7. Saron Pharmacial, P.O. Box 25436, Tampa, FL 33622.
8. UAD Laboratories, P.O. Box 794, 1400 Commerce St., Minden, LA 71055.

In addition, the American Academy of Dermatology and the National Pharmaceutical Alliance requested a hearing on topical anti-infective drug products generally, rather than on any specific drug product. Only NDA holders and manufacturers of identical, similar, or related drugs are entitled to request hearings on the products they manufacture, and to participate as parties in any evidentiary hearing that may be held. However, the agency's regulations specifically allow interested persons to submit comments in response to an NOOH (21 CFR 314.200(c)(3)).

Thus, the agency may consider relevant data and information submitted by these two organizations in determining whether a hearing is justified and in the event a hearing is held on a particular product.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1050-1053 as amended (21 U.S.C. 355)) and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: March 19, 1982.

J. Richard Croot, Director, Bureau of Drugs.

Public Health Service
Assistant Secretary for Health; General Powers and Duties Under Title III of the Public Health Service Act; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of January 14, 1981 (46 FR 10016) by the Secretary of Health and Human Services to the Assistant Secretary for Health, the Assistant Secretary for Health has delegated to the Administrator, Health Services Administration, with authority to redelegate, the following authorities delegated to the Assistant Secretary for Health under Title III of the Public Health Service Act (42 U.S.C. 241 et seq.), as amended, concerning General Powers and Duties pertaining to the functional responsibilities of the Health Services Administration.

Authority under section 301 (42 U.S.C. 241) relative to research, investigation, and testing functions;
Authority under section 311 (42 U.S.C. 243) concerning Federal-State cooperation;
Authority under section 320 (42 U.S.C. 255) concerning receipt, apprehension, retention, treatment, and release of lepers;

Authority under section 321 (42 U.S.C. 248) relative to hospitals;

Authority under section 322 (42 U.S.C. 249) relative to the care and treatment of persons under quarantine and other persons except 322(e) as it relates to providing mental health care for the Haitian/Cuban Initiative insofar as the authority applies to the functional responsibility assigned to the Alcohol, Drug Abuse, and Mental Health Administration;

Authority under section 323 (42 U.S.C. 250) concerning the care and treatment of Federal prisoners;

Authority under section 324 (42 U.S.C. 251) concerning the examination and treatment of Federal employees;

Authority under section 325 (42 U.S.C. 252) concerning the examination of aliens;

Authority under section 326 (42 U.S.C. 253) concerning services to Coast Guard, Coast and Geodetic Survey, and Public Health Service;

Authority under section 327 (42 U.S.C. 254) concerning interdepartmental work;

Authority under section 327A (42 U.S.C. 254a) as it pertains to the sharing of medical care facilities and resources under the jurisdiction of the Administrator, Health Services Administration;

Authority under section 328 (42 U.S.C. 254a-1) relative to hospital affiliated primary care centers;

Authority under section 329 (42 U.S.C. 247d) relative to Migrant Health Centers;

Authority under section 330 (42 U.S.C. 254c) relative to Community Health Centers;

Authority under section 331 (42 U.S.C. 254d) relative to the National Health Service Corps;

Authority under section 332h (42 U.S.C. 254e[h]) relative to information programs pertinent to the designation of health manpower shortage areas;

Authority under section 333 (42 U.S.C. 254f) relative to the assignment of corps personnel to provide health services in or to a health manpower shortage area;

Authority under section 334 (42 U.S.C. 254g) relative to cost sharing factors regarding the National Health Service Corps Program;

Authority under section 335 (42 U.S.C. 254h) as it pertains to the provision of health services by Corps members;

Authority under section 338A (42 U.S.C. 294i) relative to the National Health Service Corps Scholarship Program;

Authority under section 338B (42 U.S.C. 294u) concerning obligated service of an individual as a member of the National Health Service Corps;

Authority under section 338C (42 U.S.C. 294v) concerning release from Corps service obligation to enter into private practice;

Authority under section 338D (42 U.S.C. 294w) to take action relative to an individual's breach of Corps scholarship contract;

Authority under section 338E (42 U.S.C. 294x) concerning special loans for former Corps members to enter private practice;

Authority under section 338G (42 U.S.C. 294y-1) concerning the Indian Health Scholarship Program;

Authority under section 340 (42 U.S.C. 256) relative to Primary Care Research and Demonstration Projects subject to the limitations set forth in section 340(c)(1) and section 340(g)(4) of the Public Health Service Act; and

The following delegations to the Administrator, Health Services Administration, as they pertain to authorities administered by the Health Services Administration under Title III of the Public Health Service Act, have been superseded:

(1) The July 1, 1973 delegation (38 FR 18260) by the Assistant Secretary for Health as it pertains to the authorities herein delegated;

(2) The July 24, 1979 delegation (44 FR 45759) by the Assistant Secretary for Health as it pertains to Health insofar as it relates to section 301;

(3) The November 23, 1979 delegation (44 FR 70571) by the Assistant Secretary for Health as it relates to section 317[a](1);

(4) The October 8, 1980 delegation (45 FR 74064-74065) by the Assistant Secretary for Health as it relates to section 322;

(5) The September 24, 1980 delegation (45 FR 65679-65680) by the Assistant Secretary for Health as it relates to section 327A;

(6) The August 20, 1980 delegation (45 FR 63359-63360) by the Assistant Secretary for Health as it relates to section 328;

(7) The April 2, 1980 delegation (45 FR 27017-27018) by the Assistant Secretary for Health as it relates to section 329;

(8) The August 27, 1980 delegation (45 FR 65679) by the Acting Assistant Secretary for Health as it relates to section 330;

(9) The June 20, 1977 delegation (42 FR 36311-36312) by the Assistant Secretary for Health as it relates to sections 331–335;

(10) The November 13, 1979 delegation (44 FR 69732) by the Assistant Secretary for Health as it relates to section 339;

(11) The August 22, 1980 delegation (45 FR 65678-65679) by the Assistant Secretary for Health as it relates to section 340;

(12) The September 29, 1980 delegation (45 FR 80098-80099) by the Assistant Secretary for Health as it relates to section 340A; and

(13) The March 27, 1981 delegation (46 FR 21699-21700) by the Acting Assistant Secretary for Health as it relates to Part C, Subpart IV, Title VII of the Public Health Service Act.

Provision has been made for previous delegations and redelegations made to other officials within the Health Services Administration under Title III of the Public Health Service Act to continue in effect pending further redelegation provided they are consistent with the delegation to the Administrator, Health Services Administration.

The delegation to the Administrator, Health Services Administration, became effective April 12, 1982.

Dated: April 12, 1982.

E. N. Brandt, Jr.,
Assistant Secretary for Health.

B. Hubbard, Jacksonvill
Motor Carriers; Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register on December 31, 1980, at 45 FR 66771. For compliance procedures, refer to the Federal Register issue of December 31, 1980, at 45 FR 66771.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested only on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.
Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants shall be brought to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to the Ombudsman's Office, (202) 725-7326.

[Volume No. 250]

Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: April 12, 1982.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the Federal Register of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to the applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Canadian Carrier Applicants

In the event an application to transport property, filed by a Canadian domiciled motor carrier, is opposed, it will be reopened on the Commission's own motion for receipt of additional evidence and further consideration in light of the record developed in Ex Parte No. MC-157, Investigation Into Canadian Law and Policy Regarding Applications of American Motor Carriers For Canadian Operating Authority.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Sporn, Ewing, and Shaffer.

Agatha L. Mergenovich, Secretary.

MC 127550 (Sub-11), filed April 5, 1982. Applicant: BOSCH TRUCKING COMPANY, INC., 5600 South Washington St., Bartonville, IL 61607

Operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant’s other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."
Transporting general commodities (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Growmark, Inc., of Bloomington, IL.

Gallagher, 1000 Connecticut Ave., N.W., Suite 122, Washington, DC 20036, (202) 785-0024. Transporting (1) furnaces and furnace parts, between points in the U.S., under continuing contract(s) with Powermatic, Inc., of Finksburg, MD; (2) chemicals, between point in the U.S. (except AK and HI), under continuing contract(s) with Mineral Pigments Corp., of Beltsville, MD; (3) machinery, between points in the U.S. (except AK and HI), under continuing contract(s) with C. M. Kemp Manufacturing Co., of Glen Burnie, MD.

The other, points in the U.S. (except AK and HI), and (3) moving locomotives, between points in Indiana County, PA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

Note.—The purpose of this republication is to include the state of CA to part(s) of the requested authority.

**Volume No. OP5-96**

Decided: April 15, 1982.

By the Commission, Review Board No. 3. Members Krock, Joyce, and Dowell.

MC 109448 (Sub-43), filed April 5, 1982. Applicant: PARKER TRANSFER COMPANY, 1539 Lowell St., P.O. Box 258, Elyria, OH 44036. Representative: David A. Turano, 100 E. Broad St., Columbus, OH 43215, 614-228-1541. Transporting such commodities as are dealt in or used by manufacturers and distributors of building materials, between Cleveland, and points in Medina County, OH, Baltimore, MD; points in York County, PA; Erie County, NY; Lincoln County, OK; and San Joaquin County, CA.
County, CA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 141119 (Sub-B), filed April 6, 1982. Applicant: MERCHANT'S 5 STAR, INC.; Moore's Junction, Box 541, Marietta, OH 45750. Representative: John L. Alden, 1396 W. Fifth Ave., Columbus, OH 43221, (614) 881-8821. Transporting plastic articles, between points in Guernsey County, OH, on the one hand, and, on the other, points in the

MC 141489 (Sub-19), filed April 1, 1982. Applicant: HUNTER TRUCKING, INC., 2230 32nd Ave., Council Bluffs, IA 51501. Representative: Donald L. Stern, Suite 610, 1717 Mercy Rd., Omaha, NE 68106, 402-392-1220. Transporting such commodities as are dealt in or used by manufacturers and distributors of clay, concrete, glass or stone products, between points in the U.S. under continuing contract(s) with Sioux City Brick & Tile Company of Sioux City, IA; United Brick & Tile Co. of Iowa of Adel, IA, and Ballou Brick Company of Sergent Bluff, IA.

MC 141559 (Sub-42), filed March 23, 1982. Applicant: THERMO TRANSPORT, INC., P.O. Box 41587, Indianapolis, IN 46240. Representative: Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46240, 317-846-6655. Transporting general commodities (except classes A and B explosives, household goods, and commodities in bulk), under continuing contract(s) with Schering Plough, Inc. of Memphis, TN, and its wholly owned subsidiaries Scholl, Inc. and Maybelline Company, both of Memphis, TN, and Dap, Inc. of Dayton, OH between points in the U.S. (except AK and HI).

MC 146438 (Sub-15), filed April 5, 1982. Applicant: ETV, INC., P.O. Box 391, Comestock Park, MI 49321. Representative: Wilhelmina Boersma, 1800 First Federal Bldg., Detroit, MI 48226, 313-962-4942. Transporting plumbing supplies and related products, between Detroit, MI, and points in Los Angeles County, CA; Davidson County, NC; Georgetown County, SC, and Dallas County, TX, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 147738 (Sub-4), filed April 1, 1982. Applicant: FALCON EXPRESS FORWARDERS, INC., 8 Lawrence St., Belleville, NJ 07109. Representative: Thomas F. X. Foley, P.O. Box F, Colfs Neck, NJ 07722, 201-946-2020. Transporting metal products, between points in the U.S. under continuing contract(s) with Utility Brass and Copper Corporation of Moonachie, NJ.

MC 148929 (Sub-2), filed March 29, 1982. Applicant: GAY'S HOT SHOT SERVICE, INC., 16 Casti Pl., Casper, WY 82601. Representative: Jack L. Schiller, 123-60 83rd Ave., Kew Gardens, NY 11415, 212-263-2078. Transporting earth drilling equipment materials and supplies, between points in WY, on the one hand, and, on the other, points in AZ, CO, ID, KS, MT, ND, NE, NM, NV, OK, OR, SD, TX, UT, and WA.

MC 155908 (Sub-1), filed April 5, 1982. Applicant: AMTRANS, INC., P.O. Box 04704, Milwaukee, WI 53204. Representative: Richard C. Alexander, 710 North Plankinton Ave., Milwaukee, WI 53203, (414) 273-7410. Transporting paper and related products, between points in the U.S. (except AK and HI), under continuing contract(s) with Nackie Paper, a division of Jim Walter Papers, Inc., of Milwaukee, WI.

MC 159988, filed April 6, 1982. Applicant: BORCULO GARAGE, INC., d.b.a. GRASSMID TRANSPORT, 6410 96th Ave., Zeeland, MI 49464. Representative: D. Richard Black, Jr., 285 James St., P.O. Box 636C, Holland, MI 49423, (616) 399-3400. Transporting such commodities as are dealt in or used by manufacturers and distributors of food products, between points in the U.S., under continuing contract(s) with Bil-Mar Foods, Inc., of Zeeland, MI.

MC 161348, filed April 5, 1982. Applicant: SHENANDOAH EXPRESS, INC., Rt. 1 Box 265, Middletown, VA 22645. Representative: C. Michael Wymer (same address as applicant), 703-806-4036. Transporting food and related products, between points in the U.S. under continuing contract(s) with The Shenandoah Apple Co-Operative, Inc. of Winchester, VA.

MC 161358, filed April 5, 1982. Applicant: CHECKER MOVING & STORAGE, INC., P.O. Box 650, 1705 Dixie Rd., Neenah, WI 54956. Representative: Edward J. Gerrity, P.O. Box 914, Appleton, WI 54912, (414) 734-5608. Transporting pulp, paper and related products, rubber and plastic products, and metal products, between points in Winnebago County, WI, on the one hand, and, on the other, points in IL, IN, IA, MI, and MN.

Agatha L. Mergenovich, Secretary.

[DOCKET NO. AB-167 (SUB-408N)]
Rail Carriers; Connal Abandonment Between Cranbury and Highstown, NJ; Correction; Findings

Docket No. AB-167 (Sub-No. 408N). Connal Abandonment Between Cranbury and Highstown, NJ, was published in the Federal Register April 13, 1982, at 47 FR 15923. The publication incorrectly described the line of abandonment and net liquidation value of the line.

The correct line description is 3.1 miles of real line between Cranbury (milepost 18.6) and Highstown (milepost 21.7) in Middlesex and Mercer Counties, NJ. The net liquidation value of this line is $196,750.

Agatha L. Mergenovich, Secretary.

DEPARTMENT OF LABOR
Bureau of Labor Statistics

Business Research Advisory Council Committees; Meetings and Agenda

The Spring meetings of committees of the Business Research Advisory Council will be held on May 17 and 18, 1982.

The Committee on Employment and Unemployment will hold its meeting in Room 2734 of the General Accounting Office Building, 441 G Street, N.W., Washington, D.C.

The meetings of the Committees on Wages and Industrial Relations and Price Indexes will be held in Room 2433, General Accounting Office Building.

The Business Research Advisory Council and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of technical officers from American business and industry.

The schedule and agenda of the meetings are as follows:

Monday, May 17
2:00 p.m.—Committee on Employment and Unemployment

1. Program Priorities—What follows the 1982 cuts?
2. Status Reports of Ongoing Programs.
3. Private Sector Initiatives—What support can be made available?
4. The Underground Economy—Considerations, Dimensions.
5. Other Business.

Tuesday, May 18
9:30 a.m.—Committee on Wages and Industrial Relations
1. Industrial Relations Need for Simultaneous Issuance of CPI-U and CPI-W on a Rental Equivalence Basis.
2. Review of WIR Work in Progress.
4. Other Business.

Tuesday, May 18
1:30 p.m.—Committee on Price Indexes
1. Update on budget situation.
2. Treatment of health care costs in the CPI.
3. PPI—current status.
4. Consumer Expenditure Survey update and possibility of weight changes.
5. Point of Purchase Survey update and possibility of weight changes.
6. A review of the adjustment in homeownership component, COI-U and CPI-W.

The meetings are open to the public. It is suggested that persons planning to attend these meetings as observers contact Kenneth G. Van Auken, Executive Secretary, Business Research Advisory Council on Area Code (202) 272-5241.

Signed at Washington, D.C. this 20th day of April 1982.

Janet L. Norwood,
Commissioner of Labor Statistics.

BILLING CODE 4510-24-M

Employment and Training Administration

Comprehensive Employment and Training Act; Programs for Youth Who Are Members of Migrant and Other Seasonally Employed Farmworker Families

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of solicitation of grant applications.

SUMMARY: This notice sets forth the procedure and schedule for the solicitation of applications for grants and the allocation of funds by the Employment and Training Administration for programs for eligible youth ages 14 through 21 who are members of migrant and other seasonally employed farmworker families for Program Year 1982. These programs are authorized under Title IV, Part A, Subparts 2 and 3 of the Comprehensive Employment and Training Act (CETA) at sections 433(a)(4) and 423(b).

FOR FURTHER INFORMATION CONTACT: Mr. A. E. Berndt, Acting Director, Division of Farmworker and Rural Employment Programs, Employment and Training Administration, U.S. Department of Labor, 601 D Street N.W., Room 7208, Washington, D.C. 20213, Telephone (202) 376-7124.

SUPPLEMENTARY INFORMATION: The Division of Farmworker and Rural Employment Programs, Employment and Training Administration, U.S. Department of Labor announces the availability of funds under Title IV, Part A, Subparts 2 and 3 of the Comprehensive Employment and Training Act (CETA), at sections 433(a)(4) and 423(b), and the schedule for solicitation of applications for grants and the award of funds to implement programs for eligible youth who are members of migrant and seasonal farmworker families for Program Year 1982. Approximately $3.8 million is available for these programs. Funds will be awarded on a special competitive basis, pursuant to the regulations at 29 CFR 97.900 et seq., to grantees operating Section 303 programs for Program Year 1982. A list of eligible applicants is set forth below.

Grants will be awarded for not less than $150,000 and not more than $150,000. The Department, however, may award $1,000,000 to a single grant under special circumstances. Because of the limited funds available, the Department expects to award no more than 15 grants for these programs.

Solicitation for Grant Application (SGA) packages for these programs were mailed to all eligible applicants on April 19, 1982. Grant application packages include the guidelines and specifications to which eligible applicants must adhere in preparing applications. Applications must not exceed fifty (50) "8½ x 11" pages of double-spaced, unreduced type, including appendices.

Applications for funds must be hand delivered or posted by registered or certified mail no later than May 14, 1982. Grantees which are multi-State operators may submit one proposal covering more than one State. Each applicant must submit three copies of the application(s) to the Office of Financial Control and Management Systems (OFCMS), Employment and Training Administration, Room 5118, 601 D Street N.W., Washington, D.C. 20213. Attention: Ms. Janet Sten.

All grant applications bearing postmarks after May 14, 1982, will be returned without consideration. Hand delivered grant applications will be accepted daily between the hours of 8:15 a.m. and 4:45 p.m. at the address listed above. All eligible applicants will be given a receipt bearing a time and date of delivery. Hand delivered applications received after 4:45 p.m. on May 14, 1982, will be returned without consideration. No exceptions to these time limitations will be made.

 Eligible applicants are required to notify both the OFCMS and the appropriate A–95 clearinghouse(s), by Preapplication for Federal Assistance, Standard Form 424, posted by registered or certified mail no later than April 26, 1982, so that appropriate arrangements may be made for prompt review of the grant applications. Copies of the formal grant application(s) must also be sent to the appropriate A–95 clearinghouse(s) for comment at the same time the application is mailed to OFCMS. The A–95 clearinghouses should send...
comments to OFCMS at the above address, as well as to the applicant(s).

It is expected that grant awards will be made on or about July 1, 1982.

Consultation and technical assistance relative to the development of applications is available upon request from the Division of Farmworker and Rural Employment Programs at the address and telephone number listed above.

Eligible Applicants

The following Section 303 grantees are eligible to compete for the youth awards. Please note that grantees operating multi-State programs are listed only once; however, grantees may submit proposals for all States for which they currently hold section 303 grants.

- New England Farmworkers’ Council, Inc., Springfield, Massachusetts
- Pennsobor Consortium Training and Employment Administration, Bangor, Maine
- Rural New York Farmworker Opportunities, Inc., Rochester, New York
- Commonwealth of Puerto Rico, Hato Rey, Puerto Rico
- Migrant and Seasonal Farmworkers Association, Inc., Raleigh, North Carolina
- Alabama Migrant & Seasonal Farmworkers Council, Inc., Montgomery, Alabama
- Florida State Department of Education, Tallahassee, Florida
- Tennessee Opportunity Program for Seasonal Farmworkers, Inc., Nashville, Tennessee
- Mississippi Delta Council for Farmworkers Opportunities, Clarksdale, Mississippi
- Office of the Governor, Department of Labor & Industrial Relations, Honolulu, Hawaii
- Idaho Migrant Council, Boise, Idaho
- Northwest Rural Opportunities, Sunnyvale, Washington
- Signed at Washington, D.C., this 19th day of April 1982.
- Ludwin Branch, Acting Administrator, Office of National Programs.

The following are the results of the meeting.

**NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (Notice 82-24)**

**NASA Advisory Council, Aeronautics Advisory Committee; Meeting**

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on High Performance Aircraft Systems.

**DATE AND TIME:** May 18, 1982, 8:30 a.m. to 12:30 p.m.; May 19, 1982, 8:30 a.m. to 4:30 p.m.; May 20, 1982, 8:30 a.m. to 12:30 p.m.

**ADDRESS:** National Aeronautics and Space Administration, 600 Independence Avenue SW, Room 625, Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Mr. Jack Levine, National Aeronautics and Space Administration, Code RJH-2, Washington, DC 20546 (202/785-2366).

**SUPPLEMENTARY INFORMATION:** The Informal Advisory Subcommittee on High Performance Aircraft Systems was established to assist the NASA in assessing the current adequacy of high performance aircraft technology and recommend actions to reduce deficiencies through modification of the planned NASA research and technology program in flight dynamics, aerodynamics, structures and materials, propulsion, airframe propulsion integration, integrated propulsion/airframe controls, and flight research.

The Subcommittee, chaired by Mr. William T. Hamilton, is comprised of ten members. The meeting will be open to the public up to the seating capacity of the room (approximately 45 persons including the Subcommittee members and participants).

**Type of Meeting**

Open.

**Agenda**

- May 18, 1982
  - 8:30 a.m.—Welcome and Introduction.
  - 8:45 a.m.—Budget Overview/Status of NASA Aeronautics Program.
  - 9:15 a.m.—Significant Changes From Last Year’s Review.
  - 9:45 a.m.—Discussion of New Programs.
  - 10:30 a.m.—Review of Recommendations and Comments From Previous Meeting of the Subcommittee (Facility Productivity Update).
  - 11 a.m.—Special Topic: Propulsion System and Propulsion/Airframe Integration Technology (NASA Center Presentations).
  - 11:30 a.m.—Meeting Adjourned.
- May 19, 1982
  - 8:30 a.m.—Special Topic: Propulsion System and Propulsion/Airframe Integration Technology (Member Presentations and Discussion).
  - 1 p.m.—Other Business of the Subcommittee.
  - 2:30 p.m.—Preparation of the Subcommittee Report.
  - 4:30 p.m.—Adjourn.
- May 20, 1982
  - 8:30 a.m.—Preparation of the Subcommittee Report Continued.
  - 12:30 p.m.—Adjourn.

**NATIONAL COMMISSION ON SOCIAL SECURITY REFORM**

**Meeting**

**AGENCY:** National Commission on Social Security Reform.

**ACTION:** Notice of meeting.

**SUMMARY:** This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Commission on Social Security Reform.
This notice also describes the functions of the Commission. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: May 10, 1982: 1:00 p.m. to 5:00 p.m.

ADDRESS: Room 5110, Dirksen Senate Office Building, Washington, D.C. 20510.

FOR FURTHER INFORMATION CONTACT: Robert J. Myers, Executive Director, 736 Jackson Place, N.W., Washington, D.C. 20503; Telephone (202) 355-5132

SUPPLEMENTARY INFORMATION: The National Commission on Social Security Reform is established by Executive Order No. 12335 dated December 18, 1981 to provide appropriate recommendations to the Secretary of Health and Human Services, the President, and the Congress on long-term reforms to put Social Security back on a sound financial footing.

The meeting of the Commission is open to the public. The proposed agenda includes:

Presentation on private pensions by Quentin I. Smith, Jr. and Alicia H. Munnell.

Discussion on private pensions in the context of total retirement income.

Such new business as the chairman or the membership may put before the Commission.

Records are kept of all Commission proceedings, and are available for public inspection at the office of The Executive Director, National Commission on Social Security Reform, 736 Jackson Place, N.W., Washington, D.C. 20503.

Robert J. Myers,
Executive Director.

BILLING CODE 3115-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-318]

Baltimore Gas & Electric Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 51 to Facility Operating License No. DPR-69, issued to Baltimore Gas and Electric Company, which revised Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant, Unit No. 2 located in Calvert County, Maryland. The amendment is effective as of the date of issuance.

The amendment extends the maximum allowable period of inoperability for control room air conditioning unit from 7 to 21 days to allow modifications to the equipment. This amendment is applicable during the period April 17 to July 21, 1982, during which time Calvert Cliffs Unit 1 would be shut down (Modes 5 and 6).

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated April 12, 1982, (2) Amendment No. 51 to License No. DPR-69, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Calvert County Library, Prince Frederick, Maryland. A copy of items (2) and (3) may by obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 19th day of April 1982.

For the Nuclear Regulatory Commission.

Charles M. Trammell, Acting Chief, Operating Reactors Branch No. 3, Division of Licensing.

[NR Doc. 82-11219 Filed 4-22-82: 6:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-373]

Commonwealth Edison Co.; Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Facility Operating License No. NPF-11, to Commonwealth Edison Company (the licensee) which authorizes operation of the La Salle County Station, Unit 1 (the facility), by Commonwealth Edison Company at reactor core power levels not in excess of 166 megawatts thermal (5 percent power) in accordance with the provisions of the License, the Technical Specifications and the Environmental Protection Plan.

La Salle County Station, Unit 1, is a boiling water nuclear reactor located at the licensee's site in Brookfield Township, La Salle County, Illinois approximately 65 miles southwest of Chicago, Illinois. The license is effective as of the date of issuance.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the Federal Register on June 9, 1977 (42 FR 29576-29577).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement and its Addendum since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement and its Addendum.

For further details with respect to this action, see (1) Facility Operating License No. NPF-11, complete with Technical Specifications and Environmental Protection Plan; (2) the report of the Advisory Committee on Reactor Safeguards dated April 16, 1981; (3) the Commission's Safety Evaluation Report dated March 1981, Supplement No. 1 dated June 1981, Supplement No. 2 dated February 1982, and Supplement No. 3 dated April 1982; (4) the Final Safety Analysis Report and amendments thereto; (5) the Environmental Report and Supplements thereto; (6) the Final Environmental Statement dated November 1978 and the Addendum to the final Environmental Statement dated May 1981; and (7) NRC Flood Plain Review of La Salle Nuclear Plant site Dated January 29, 1981.

These items are available for public inspection at the Commission's Public Document Room 1717 H Street, N.W., Washington, D.C. 20555, and the Public
Library of Illinois Valley Community College, Rural Route No. 1, Ogleby, Illinois 61348. A copy of Facility Operating License No. NPF-11 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing. Copies of the Safety Evaluation Report and its Supplements 1, 2, and 3 (NUREG-0519) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the U.S. Nuclear Regulatory Commission, Attention: Sales Manager, Washington, D.C. 20555. GPO deposit account holders can call (301) 492-9530.

Dated at Bethesda, Md., this 17th day of April 1982

For the Nuclear Regulatory Commission.

A. Schwencer,
Chief, Licensing Branch No. 2, Division of Licensing.

[FR Doc. 82-11222 Filed 4-22-82; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-249 EA 82-57]

Commonwealth Edison Co. (Dresden Nuclear Power Station Unit No. 3); Rescission of October 2, 1980 Confirmatory Order

Commonwealth Edison Company (the "licensee") is the holder of Facility Operating License No. DPR-25 (the "license") with an expiration date of 2006. License Amendment No. 80-17, issued on March 26, 1982, reflects these modifications include two Scram Discharge Volume (SDV), diverse and redundant scram sensor instrumentation, dedicated and positive vents with two air-operated isolation valves, two air-operated isolation valves on the drain lines and diverse power supplies for the instrumentation and controls. License Amendment No. 58, issued on March 26, 1982, reflects these facility changes. This newly installed system now provides to the control room operators all the necessary information concerning the scram discharge volume system which had been provided by the intermeasures installed pursuant to the October 2, 1980 Confirmatory Order.

As the result of an investigation of an event at the Browns Ferry Nuclear Power Station, Unit 3, when a manual scram from approximately 35 percent power failed to insert all of the control rods, IE Bulletin No. 80-17, "Failure of 76 of 185 Control Rods to Fully Insert During a Scram at a BWR," was issued on July 3, 1980 and requested action to be taken by all licensees of General Electric designed Boiling Water Reactors (BWR). Additional action applicable to these BWR facilities was requested in Supplement Nos. 1, 2, and 3 to IE Bulletin 80-17 and these supplements were issued on July 18, July 22 and August 22, 1980, respectively. These actions were designed to provide reasonable assurance that the licensee could maintain scram capability at all times during an interim period of operation until an ultimate resolution could be achieved by changes in system design and operating procedures.

An Order was issued to the licensee on October 2, 1980 to confirm the licensee's commitment to undertake a set of interim actions designed to provide continuous monitoring of the scram discharge volume (SDV) with appropriate indication and alarm in the control room so that if water accumulated in the SDV the operator decision about action to be taken could be made in a timely fashion from the control room.

By letter dated December 9, 1980, the Office of Nuclear Reactor Regulation transmitted "Generic SER of BWR Scram Discharge Systems" to all BWR licensees which set down the final requirements for the modifications of the scram discharge volume systems.

In a letter dated March 24, 1982, to the Director, Office of Inspection and Enforcement, the licensee stated that the long term design modifications to the Dresden Unit 3 Scram Discharge Volume System have been implemented during the current refueling outage. These modifications include two Scram Discharge Instrument Volumes (SDIVs), improved communications between the SDV headers and the SDIVs, diverse and redundant scram sensor instrumentation, dedicated and positive vents with two air-operated isolation valves, two air-operated isolation valves on the drain lines and diverse power supplies for the instrumentation and controls. License Amendment No. 58, issued on March 26, 1982, reflects these facility changes. This newly installed system now provides to the control room operators all the necessary information concerning the scram discharge volume system which had been provided by the intermeasures installed pursuant to the October 2, 1980 Confirmatory Order.

In view of the foregoing, the October 2, 1980 Confirmatory Order is hereby rescinded for Dresden Nuclear Power Station, Unit No. 3.

Effective Date: April 12, 1982; Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,
Director, Office of Inspection and Enforcement.

[FR Doc. 82-11222 Filed 4-22-82; 8:45 am]
BILLING CODE 7590-01-M

[Docket Nos. 50-373; 50-374]

Commonwealth Edison Co. (La Salle County Nuclear Generating Station, Units 1 and Unit 2); Request for Action Under 10 CFR 2.206

Notice is hereby given that by its Request to Institute a Show Cause Proceeding and for Other Relief dated March 24, 1982 (Petition), the Attorney General for the State of Illinois requested that certain actions be taken by the Nuclear Regulatory Commission with respect to the La Salle County Units 1 and 2 of the Commonwealth Edison Company, in light of alleged newly discovered safety issues. Alleged safety issues concern the drilling of holes into structural concrete at the La Salle facility and also concern the structural adequacy of the off-gas building roof for that facility. The relief requested included institution of a show cause proceeding pursuant to 10 CFR 2.202 and immediate suspension of further consideration of Edison's application for operating licenses. This request is being treated as a petition pursuant to 10 CFR 2.206 of the Commission's regulations, and accordingly, action will be taken on the Petition within a reasonable time.

Copies of the Petition are available for inspection in the Commission's public document room at 1717 H Street NW., Washington, D.C. 20555, and in the local public document room for the La Salle County Plant, Units 1 and 2 located at Illinois Valley Community College, Rural Route #1, Ogleby, Illinois 61348.

Dated at Bethesda, Maryland this 17th day of April, 1982.

For the Nuclear Regulatory Commission.

Harold R. Denton,
Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-335]
Florida Power and Light Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 49 to Facility Operating License No. DPR-67, issued to Florida Power and Light Company, which deleted a license condition and revised Technical Specifications for operation of the St. Lucie Plant, Unit No. 1 (the facility), located in St. Lucie County, Florida. The amendment is effective as of its date of issuance.

The amendment changes the Technical Specifications to correct an inconsistency regarding valve closure time of an instrument air containment isolation valve and by adding the requirement of periodic flow path verification of the NaOH containment spray additive system. License Condition Q, which required that such verification be proposed, has been deleted.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) applications for amendment dated February 9, 1979 (as supplemented January 19, 1981) and February 21, 1979, (2) Amendment No. 49 to License No. DPR-67, and (3) the Commission's related Safety Evaluation. All of these times are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 12th day of April 1982.

For the Nuclear Regulatory Commission.
Robert A. Clark, Chief, Operating Reactors Branch No. 3, Division of Licensing.

[Docket No. 50-331]
Iowa Electric Light and Power Co., et al., Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 73 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications to incorporate surveillance requirements for Scram Discharge Volume (SDV) vent and drain valves and limiting conditions for operation and surveillance requirements for SDV level instrumentation.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated October 9, 1980, (2) Amendment No. 73 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

[Docket No. 50-336]
Northeast Nuclear Energy Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 76 to Facility Operating License No. DPR-65, issued to Northeast Nuclear Energy Company, the Connecticut Light and Power Company, the Hartford Electric Light Company, and the Western Massachusetts Electric Company (the Licensee), which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2 (the facility) located in the town of Waterford, Connecticut. The amendment was effective March 20, 1982.

The amendment changes the Technical Specifications to allow 72 additional hours to return the steam turbine driven auxiliary feedwater pump to service following its failure at 10:40 p.m. on March 18, 1982. The amendment was issued on an expedited basis to permit continued plant operation while pump repairs were made.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 18, 1982, (2) Amendment No. 76 to License No. DPR-65, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Availability of Safety Evaluation Report for the Wolf Creek Generating Station, Unit No. 1

The Office of Nuclear Reactor Regulation has published its Safety Evaluation Report related to the proposed operation of the Wolf Creek Generating Station, Unit No. 1, located in Coffey County Kansas. Notice of receipt of Kansas Gas and Electric Company’s application for a facility operating license for the Wolf Creek Generating Station, Unit No. 1, was published in the Federal Register on December 18, 1980 (45 FR 83360).

The report is being referred to the Advisory Committee on Reactor Safeguards and is being made available at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the William Allen White Library, Emporia State University, 1200 Commercial Street, Emporia, Kansas 66801 for inspection and copying. The report (Document No. NUREG-0861) can also be purchased at current rates, from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161. The report may be purchased directly from NRC by writing to the Director, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. GPO Deposit Account holders may charge their order by calling (301)492-9530.

[DOCKET NOs. 50-445; 50-446]

Texas Utilities Generating Co., et al.,
(Comanche Peak Steam Electric Station, Units 1 and 2), (Application for Operation License; Continuation of Evidentiary Hearing;

April 19, 1982.

Please take notice that a continuation of an evidentiary hearing will be held in this operating license proceeding before an Atomic Safety and Licensing Board (Board), pursuant to the Atomic Energy Act of 1954 as amended (the Act), and the regulations in Title 10, Code of Federal Regulations (CFR), Part 50, “Licensing of Production and Utilization Facilities,” Part 51, “Licensing and Regulatory Policy and Procedures for Environmental Protection,” and Part 2, “Rules of Practice.” The prior portion of the evidentiary hearing was held December 2, 1981.

This continuation of the evidentiary hearing will commence on June 7, 1982, at 9:00 a.m., local time, at the Fort Worth Hilton Hotel, located at 1701 Commerce Street, Fort Worth, Texas 76101 and will continue until completion of taking evidence on the issues and contentions described hereafter. This evidentiary hearing will address the matters in controversy resulting from Contention 5 (QA/QC), from Board Questions 1 and 3, if necessary.

A final prehearing conference, pursuant to 10 CFR 2.752, will be held at the same location immediately prior to the resumed evidentiary hearing.

On February 5, 1979, the Nuclear Regulatory Commission (NRC) issued a notice in the Federal Register of the availability of Applicants’ Environmental Report, Consideration of Issuance of Facility Operating Licenses, and Opportunity for Hearing for Comanche Peak (44 FR 6995). The notice stated that a petition for leave to intervene must be filed by March 5, 1979. Timely petitions were received from the State of Texas for participation as an interested state under 10 CFR 2.715(c), and from Citizens Association for Sound Energy (CASE), Citizens for Fair Utility Regulation (CFUR) and the Texas Association of Community Organizations for Reform Now/West Texas Legal Services (ACORN).

By its Order Relative to Standing of Petitioners to Intervene, entered June 27, 1979, the Board admitted these petitioners as Intervenors in this proceeding. Subsequently, ACORN’s motion for its voluntary dismissal as a party was granted by Memorandum and Order entered July 24, 1981. CFUR’s motion for withdrawal as a party was granted by an April 2, 1982 Order.

Any person who wishes to make an oral or written statement in this proceeding but who has not filed a petition for leave to intervene, may request permission in writing to make a limited appearance pursuant to the provisions of 10 CFR § 2.715 of the Commission’s Rules of Practice. Limited appearances will be permitted in this proceeding at the discretion of the Board, but at times, within such limits and on such conditions as may be determined by the Board. Persons desiring to make a limited appearance are requested to inform in writing the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, not later than May 24, 1982. A person permitted to make a limited appearance does not become a party, but may state his or her position and raise questions which he or she would like to have answered to the extent that the questions are within the scope of the hearing as specified above. A member of the public does not have the right to participate unless granted the right to intervene as a party or the right of limited appearance.

Written limited appearance statements may be submitted to the Board at any time prior to closing the record in this phase of the proceeding. Oral statements will only be received at times designated by the Board in order not to interfere with the taking of evidence in this adjudicatory proceeding. Oral limited appearance statements may be made on Tuesday, June 8, 1982, at 9:00 a.m., and at such other times as the Board shall specify. Both oral and written statements will be made a part of the official record of this proceeding.

It is so ordered.

Dated at Bethesda, Maryland, this 19th day of April 1982.

For the Atomic Safety and Licensing Board.

Marshall E. Miller,
Chairman, Administrative Judge.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b), the Advisory Committee on Reactor Safeguards will hold a meeting on May 6-8, 1982, in Room 1046, 1717 H Street, NW, Washington, DC. Notice of this meeting was published in the Federal Register on April 13, 1982.

The agenda for the subject meeting will be as follows:

Thursday, May 6, 1982

8:30 A.M.–8:45 A.M.: Opening Session (Open)—The Committee will hear and discuss the report of the ACRS Chairman regarding miscellaneous matters relating to ACRS activities.

8:45 A.M.–12:45 P.M.: Proposed NRC Quantitative Safety Goals (Open)—The Committee members will discuss a proposed ACRS report to the NRC regarding proposed quantitative safety goals to be used in the design, siting, construction, and operation of nuclear power plants.

1:45 P.M.–2:45 P.M.: Robert E. Ginna Nuclear Plant (Open)—The members will hear a briefing from the NRC Staff regarding steam generator tube repairs and restart of the Robert E. Ginna Nuclear Plant.

2:45 P.M.–6:30 P.M.: Wolf Creek Generating Station Unit 1 (Open)—The Committee members will hear and discuss the reports of its Subcommittee and consultants who may be present regarding the request of the Kansas Gas & Electric Company, et al. for a license to operate the Wolf Creek Generating Station Unit No. 1.

8:30 A.M.–9:30 A.M.: Proposed NRC Quantitative Safety Goals (Open)—The members will continue discussion of a proposed ACRS report to the NRC regarding quantitative safety goals.

9:30 A.M.–12:00 Noon: Emergency Response Capability in Nuclear Power Plants (Open)—The Committee will hear the report of its Subcommittee and consultants who may be present regarding proposed requirements for emergency facilities and response capability in nuclear power plants.

1. Please note that the time for commencement of this hearing has now been advanced to 9:00 a.m., although the Revised Schedule entered March 25, 1982, set the time for 1:00 p.m. on June 7.
Procedures for the conduct of and participation in ACRS meetings were published in the Federal Register on September 30, 1981 (46 FR 47903). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a telephone call to the ACRS Executive Director (R. F. Fraley) prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92-463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)) applicable to the matters being discussed, information which will be involved in an adjudicatory proceeding (5 U.S.C. 552b(c)(11)), and preliminary information the release of which would be likely to significantly frustrate performance of the Committee's statutory function (5 U.S.C. 552b(c)(9)(B)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/834-3265), between 8:15 A.M. and 5:00 P.M. EST.

Dated: April 19, 1982.

John C. Hoyle,  
Advisory Committee Management.  
[FR Doc. 82-11225 Filed 4-23-82; 8:45 am]  
BILLING CODE 7590-01-M  

Advisory Committee on Reactor Safeguards, Subcommittee on Qualification Program for Safety Related Equipment; Meeting

The ACRS Subcommittee on Qualification Program for Safety Related Equipment will hold a meeting on May 5, 1982, Room 762, 1717 H Street, NW, Washington, DC. The Subcommittee will discuss the proposed final version of the rule 10 CFR 50.49, "Environmental Qualification of Electrical Equipment for Nuclear Power Plants", and time permitting proposed rulemaking for the accreditation of qualification testing organizations.

In accordance with the procedures outlined in the Federal Register on September 30, 1981 (46 FR 47903), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions which will be closed to protect proprietary information (Sunshine Act Exemption 4). One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows: Wednesday, May 5, 1982—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Dr. Richard Savio or Staff
Engineer, Mr. Anthony Cappucci (telephone 202-634-5287) between 8:15 a.m. and 8:30 p.m., EST.

I have determined, in accordance with subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close portions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: April 19, 1982.
John C. Hoyle, Advisory Committee Management Officer.

Advisory Committee on Reactor Safeguards, Subcommittee on Reactor Radiological Effects; Meeting

The ACRS Subcommittee on the Reactor Radiological Effects will hold a meeting on May 14, 1982 in Room 1046, 1717 H Street, NW., Washington, DC.

The Subcommittee and its consultants will hear and discuss with the NRC Staff and various industrial organizations, the topic of control room habitability. Notice of this meeting was published April 13.

In accordance with the procedures outlined in the Federal Register on September 30, 1981 (46 FR 47903), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows: Friday, May 14, 1982—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Herman Alderman (telephone 202-634-1414) between 8:15 a.m. and 5:00 p.m., EST.

John C. Hoyle, Advisory Committee Management Officer. [FR Doc. 82-11231 Filed 4-22-82; 8:45 am] BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-18664; File No. SR-MSTC-82-6]

Effectiveness of a Proposed Rule Change by the Midwest Securities Trust Co.

April 19, 1982.

Midwest Securities Trust Company ("MSTC") submitted a proposed rule change on April 9, 1982, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934, that enables MSTC to disburse to its participants cash dividends and bond interest payments on payment date rather than on the day after payment date, which was the previous practice.

The foregoing rule change has become effective pursuant to section 19(b)(3) (A) of the Securities Exchange Act of 1934 and Rule 19b-4 thereunder. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Publication of the submission is expected to be made in the Federal Register during the week of April 19, 1982. Interested persons are invited to submit written data, views and arguments concerning the submission on or before May 14, 1982. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSTC-82-6.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons, Secretary.

[FR Doc. 82-11339 Filed 4-22-82; 8:45 am] BILLING CODE 8010-01-M

(Release No. 18663; File No. SR-MSTC-82-4)

Filing and Immediate Effectiveness of Proposed Rule Change by Midwest Securities Trust Co.

April 19, 1982.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 2, 1982, the Midwest Securities Trust Company ("MSTC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would allow MSTC, pursuant to MSTC Rule 6 section 7, to amend its Dividend Reinvestment Program and procedures (collectively, "DRP"). The proposed rule change restricts the number of shares eligible to participate in MSTC's DRP and prorates the number of shares credited to a participant's account as a result of dividend reinvestment only to those shares held in MSTC's nominee name, Kray & Co. This enables MSTC to offer dividend reinvestment services to its participants in the event that dividends of the issue involved are not similarly treated by other depositories.

Absent this rule change, if MSTC's participants elect to reinvest the dividends on more shares of a particular securities issue than are being held by MSTC in its nominee name (i.e., a portion of the participants shares are held in MSTC's interface account at another depository), MSTC, according to its DRP, would be compelled either to purchase shares on the open market (without the advantage of the issuer's discount generally provided upon reinvestment) or to suspend the DRP with respect to all participants so as to obviate the loss MSTC could incur by purchasing the shares on the open market. MSTC believes that the proposed rule change is consistent with
section 17A(b)(3)(A) of the Act in that it provides for the administration and enforcement of the rules of the clearing agency. MSTC further believes that the proposed rule change is consistent with section 17A(b)(3)(F) of the Act in that it fosters the prompt and accurate clearance and settlement of securities transactions, including the transfer of record ownership and the safeguarding of securities and funds relating thereto, as are necessary for the protection of investors and persons facilitating transactions by, and on behalf of, investors.

The foregoing change has become effective, pursuant to section 10(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission on or before May 14, 1982. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSTC-82-4.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 1100 L Street N.W., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons, Secretary.

[FR Doc. 82-11397 Filed 4-22-82; 8:45 am]
BILLING CODE 5010-01-M

Federal Register / Vol. 47, No. 79 / Friday, April 23, 1982 / Notices 17701

New York Stock Exchange, Inc.; Amendments to Rule 314 (Interest in Business), Rule 318 (Other Connections of Members and Allied Members), Rule 346 (Limitations-Employment and Association With Members and Member Organizations), Rule 409 (Statements of Accounts to Customers) and Rule 411 (Erroneous Reports)

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), ("Act"), notice is hereby given that on April 12, 1982, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule changes as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Changes

The proposed rule changes would remove the provisions in Rule 314 related to guarantees of loss of sole Exchange members and limited partners, and minimum salary/participation requirements for members and allied members; rescind the requirements specifically related to insurance sales activities (Rule 318); require written requests by member organization personnel to engage in outside financially related employment/activities (Rule 346); clarify an outdated reference (Rule 409); and amend Rule 411 to permit member organizations to record transactions as of settlement date, require settlement dates to appear on confirmations of transactions sent to customers, and reposition the Supplementary Material into more appropriate Rules (Rules 36 and 409).

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Changes

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received on the proposed rule changes.

The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes. Provisions (314.10 (1) and (2)) prohibiting sole Exchange members from being guaranteed against loss and establishing minimum salaries for members and allied members are proposed for rescission because they no longer serve a valid regulatory purpose. The provision (314.10(3)) permitting a limited partner to share in or be guaranteed against loss is also proposed for rescission on the basis that it is permissive in nature and not actually necessary.

Exchange Rule 318 provides for certain reporting requirements with respect to insurance sales activities and prescribes internal member organization supervision of these activities. Since insurance sales activities are specifically regulated by individual state insurance commissions, and member organizations have the obligation, under Rule 342, to ensure that their insurance and all other activities are conducted in accordance with overall Exchange standards and the requirements of any appropriate regulatory authority, there is no need to specifically address only one of the non-securities activities engaged in by members.

The Exchange proposes that Rule 346(b) be amended to stipulate that a request for member organization approval, by a person associated with it, to engage in any outside related employment or activity be made in writing to the firm. It is felt that requiring that the request be made in writing would enhance a firm's ability to study the specifics of a particular request and facilitate recordkeeping of such requests.

The proposed rule change to Rule 409 would change the word "stockholder" to the phrase "stockholder actively engaged in a member corporation's business" in order to make it clear that an "outside" stockholder of a publicly traded member corporation would not be subject to the restrictions of the rule.

Exchange Rule 411.40 (Recording of transactions in accounts) currently requires all customer transactions to be recorded in a member organization's books and interest to be computed in accounts as of settlement date. The change to Rule 411.40 would allow member organizations latitude in posting transactions within their books at any time prior to settlement date.

The amendment to Rule 411.20 (Confirmations to customers) would require the settlement date of each transaction to appear on confirmations of transactions sent to customers. The
amendment to Rule 411.20 will also allow member organizations to determine the type of legend they want to employ on confirmations of transactions, as long as it sets forth the information required in SEC Regulation 10b-10 which stipulates information required to be set forth on confirmations.

The Exchange also proposes that the Supplementary Material to Rule 411 be repositioned to other rules that are more related to the subject matter (Rules 36 and 409).

The rescission of the prohibition against the sole Exchange member’s guarantee against loss (Rule 314.10(1), the minimum salary requirements for members (Rule 314.10(2)) and the limited partner guarantee provisions (Rule 314.10(3)) is consistent with Section 6(b)(2) of the Act in that it would remove unnecessary impediments to becoming a member or member organization or associated therewith. The rescission of these provisions is further consistent with Section 6(b)(5) in that they no longer serve a valid regulatory purpose and, therefore, seek to regulate matters not related to the purposes of the Act or the administration of the Exchange.

The amendment to Rule 318 is consistent with sections 6(b)(1) and 6(b)(5) of the Act in that it will continue to enable the Exchange to carry out and enforce the Act and the rules of the Exchange and protect investors and the public interest with respect to all of the securities and non-securities related activities engaged in by members and member organizations.

The amendment to Rule 346 to require written request for employees to engage in outside business activities/interests is consistent with sections 6(b)(1) and 6(b)(5) of the Act. The amendment is consistent with section 6(b)(1) in that it will enhance a member or member organization’s review of these types of situations, thereby enhancing the Exchange’s overall ability to enforce compliance by its members with the Act and Exchange rules. The amendment is further consistent with section 6(b)(5) in that it will bolster a firm’s ability to monitor outside activities of its employees, resulting in increased protection of investors and the public interest.

The proposed amendment to Rule 409, is consistent with Regulation 10b-10 in that it will allow quarterly written statements to be delivered to customers in accordance with the provisions of the Act. The classification of the term “stockholder” would make it clear that an “outside” stockholder of a publicly traded member corporation would not be subject to the restrictions of Rule 409.

The proposed amendments to Rule 411 are consistent with the provisions of section 6(b)(5) and Regulation 10b-10 of the Act. The proposed amendments are consistent with the provisions of section 6(b)(5) in that disclosure to customers of pertinent trade-related information serves to promote just and equitable principles of trade and protect investors and the public interest. The amendments conform with the requirements of Regulation 10b-10 which contains the information required to be disclosed in confirmations of transactions.

B. Self-Regulatory Organization’s Statement on Burden on Competition.

The proposed rule changes do not impose any burden on competition.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Changes Received From Members, Participants, or Others.

The Exchange has neither solicited nor received written comments on the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

On or before May 23, 1982 or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule changes, or

B. Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission’s Public Reference Section 1100 “L” Street, N.W., Washington, D.C.

Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before May 14, 1982.

Dated: April 14, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[FR Doc. 82-11180 Filed 4-22-82; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 34-16652; File No. SR-NYSE-82-8]

New York Stock Exchange, Inc.; Changes to Rule 421 (Periodic Reports), Rule 424 (Reports of Options), Rule 433 (Long Sales) and Rule 440K (Prepayments on Sales)

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”), 15 U.S.C. 78t(b)(1), notice is hereby given that on April 12, 1982, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule changes as described in Items I, II and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Changes

The proposed rule changes would eliminate references to previously rescinded requirements in Rule 421 for reporting: net positions from security underwritings (Form MF-3); collateral loans from banks, trust companies and other lenders in the U.S.; and, fails to deliver and receive contracts (Form MF-6). The proposed amendments would also rescind the obsolete requirements in Rule 424 for reporting of interests in any substantial option related to listed securities or any knowledge of such options; rescind the provisions in Rule 433 detailing those conditions under which customer’s “long” sales of securities may be effected; and, rescind Rule 440K, which contains suggested procedures regarding records to be kept concerning prepayments to customers of the proceeds of the sales of listed securities.
II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes, and discussed any comments it received on the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

Rule 421 (Periodic Reports). The Rule is proposed for amendment because specific reports contained in the Rule (Underwritings—Form MF-3, Fail Contracts—Form MF-6 and the report of total collateral loans from banks, trust companies and other lenders in the U.S.) are no longer required and Rule 416 gives the Exchange overall authority to require information in the type of information that should be needed in the future.

Rule 424 (Reports of Options). The Rule requires that information be furnished to the Exchange by members, member organizations and allied members that have an interest in or knowledge of any substantial option related to listed securities. The Exchange proposes that this rule be rescinded on the basis that it has become obsolete due to the addition of other reporting rules intended to prevent manipulative operations (e.g. position and exercise limits) and improved automated auditing and surveillance methods by the Exchange and other SRO’s.

Rule 433 (Long Sales). The proposed amendments would rescind Rule 433 because the fail to deliver problem that precipitated its adoption has been greatly alleviated by the establishment of securities depositories and improved automated clearance and settlement procedures. Also, in 1972, the SEC adopted Rule 15c3-3(m) which requires customers to be “bought in” if securities which are sold are not delivered within 10 days.

Rule 440K.10 (Prepayments on Sales). This Rule contains suggested procedures for recording any prepayment made to a customer of the proceeds of sales of listed securities. The rule is proposed for rescission because the existing rule does not contain an affirmative or negative obligation and the supervisory procedures contained therein are more appropriately addressed and will be issued in another format (e.g. NYSE’s Guide to Supervision or Information Memo).

Statutory Basis for the Proposed Rule Changes

The amendments to Rule 421 and the rescission of Rules 424 and 433 is consistent with section 6(b)(1) in that the elimination of obsolete forms and requirements will relieve the Exchange of its obligation to enforce compliance by its members with outdated requirements, thereby, enabling additional time to be devoted to the enforcement of more pertinent provisions of the Act and Exchange Rules.

The rescission of Rule 440K.10 is consistent with sections 6(b)(1) and 6(b)(6) of the Act. This is so because as stated under Item A above, the provision does not contain an affirmative or negative obligation but rather suggested procedures, therefore its enforceability under section 6(b)(1) and the ability to impose appropriate penalties for a violation as required by section 6(b)(6), are questionable.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The proposed rule changes do not impose any burden on competition.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Changes Received From Members, Participants, or Others.

The Exchange has neither solicited nor received written comments on the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Change and timing for Commission Action

On or before May 28, 1982 or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule changes, or

B. Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission’s Public Reference Section, 1100 “L” Street, N.W., Washington, D.C.

Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self regulatory organization.

All submissions should refer to the file number in the caption above and should be submitted on or before May 14, 1982.

DATED: April 15, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[Release No. 22463; (70-6730)]

The Potomac Edison Co. and Allegheny Power System, Inc.; Proposed Issuance and Sale of Common Stock to Holding Company

April 19, 1982.

Allegheny Power System, Inc. (“APS”), 320 Park Avenue, New York, New York 10022, a registered holding company, and its electric utility subsidiary company, The Potomac Edison Company (“PE”), Downsville Pike, Hagerstown, Maryland 21740, have filed an application-declaration with this Commission pursuant to sections 6(a), 7, 9(a), and 10 of the Public Utility Holding Company Act of 1935 (“Act”).

PE, upon amendment of its charter, proposes to issue and sell to APS, and APS proposes to acquire, not more than 1,000,000 shares of PE common stock for a consideration of $20 per share from time to time prior to December 31, 1982.

The net proceeds will be used by PE to operate its business as a utility, including the payment or prepayment of short-term debt outstanding and the continuation of its construction program. It is expected that PE will have $19.5 million of short-term debt outstanding on June 30, 1982. For the year 1982, PE’s gross construction expenditures are estimated to be approximately $45 million.
The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 14, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the addresses specified above. Proof of service (by affidavit or, in case of any attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority:  
George A. Fitzsimmons,  
Secretary.  
[FR Doc. 82-11196 Filed 4-22-82; 8:45 am] BILLING CODE 8010-01-M

[Release No. 22461; (70-6731)]

West Texas Utilities Co.; Proposed Increase In Authorized Shares of Common Stock and Par Value of Common Shares

April 19, 1982.

West Texas Utilities Company ("West Texas"), P.O. Box 641, Abilene, Texas 79604, an electric utility subsidiary of Central and South West Corporation ("CSW"), a registered holding company, has filed a declaration with this Commission pursuant to sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act"). West Texas proposes to amend its Restated Articles of Incorporation, as amended, ("Articles") to increase the total number of shares of common stock which it is authorized to issue from 2,600,000 shares to 7,800,000 shares and to increase the par value of the shares of its common stock from $22 per share to $25 per share. West Texas currently has outstanding 2,580,000 shares of its common stock and is authorized to issue 2,800,000 shares. The company intends to sell $7,300,000 of its common stock to CSW in May 1982 (File No. 70-6683). Assuming an issuance of shares of common stock at par, and assuming a per value of $25 per share, West Texas would be able to issue only $5,300,000 of its common stock without an increase in the authorized number of shares. It is stated that the 5,000,000 share increase in the number of shares of common stock that is authorized to issue is required to ensure that the company will have a sufficient number of shares available in the future to meet its requirements for new capital. Because the equity investments made by CSW in West Texas are in amounts evenly divisible by $25, West Texas seeks to increase the par value of its shares of stock to $25 per share for administrative convenience.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 17, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of any attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority:  
George A. Fitzsimmons,  
Secretary.

SMALL BUSINESS ADMINISTRATION

[Proposal No. 02-02-0441]

ALPHA Financial Corp.; Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to §107.102 of the SBA Regulations (13 CFR §107.102 (1982)) by ALPHA Financial Corporation, 465 Morris Avenue, Springfield, New Jersey 07081 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. §61 et seq.).

The proposed officers, directors and shareholders are:

Name, Address, Title, Relationship, and Percent of Ownership

Michael Miller, 57 Farbrook Drive, Short Hills, NJ 07078, President, Treasurer, Director, 50.00%
Carol B. Miller, 57 Farbrook Drive, Short Hills, NJ 07078, Secretary
Howard Shapiro, 125 Craig Road, Hillsdale, NJ 07642, Director
Howard Sterling, 945 Wilshire Blvd., Beverly Hills, Calif, 90210, Director
Howard Sterling is Trustee for three irrevocable trusts provided by Randolph Pace for the benefit of his minor children: Kimberly Nicole Pace, 16.67% Meredith Jill Pace, 16.67% Allison Brie Pace, 16.66%

The Applicant will begin operations with a capitalization of $500,000 and will be a source of equity capital and long term loan funds for qualified small business concerns whose needs might not be met by traditional funding sources.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Acting Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Springfield, New Jersey.

[License No. 01/01-0277]

Marcon Capital Corp.; Filing of Application for Transfer of Control of a Licensed Small Business Investment Company (SBIC)

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to §107.701 of the SBA Regulations governing SBIC's for the transfer of control of Marcon Communications Corporation (MCC) the

MCC is a public company with approximately 350 shareholders and the sole stockholder of the Licensee. Only one person owns in excess of 10 percent of MCC traded stock. The proposed transfer of control is subject to, and contingent upon, the approval of SBA.

The applicant, Cedar Resources, Inc., (CRI) a Florida corporation will purchase 20,000 shares of MCC (2.8 percent) and additional 80,000 shares upon approval from SBA with options to purchase 230,000 more shares over a two year period. If exercised, CRI will own 41.3 percent of MCC.

CRI has two shares of common stock outstanding, one of which is owned by Mr. Frederick Anthony Mawe, One Beach Drive, S.E., St. Petersburg, Florida 33701, the other share is owned by DFI, Inc., a Delaware corporation, DFI, Inc. has issued 100 shares of common stock 51, of which are owned by Mr. John Page and 49 shares by Mrs. Elizabeth Page of 137 Woodside Drive, Greenwich, Connecticut 06830.

Mr. Martin A. Cohen, chief executive officer of the licensee will continue under an employment contract to be responsible for the daily operations of the licensee until 1990.

The proposed officers and directors and major stockholders are:

Martin A. Cohen, President, Director, Treasurer
John J. Alogna, Vice President, Director
Anette A. Cohen, Secretary, Director
Marcon Communications, Inc., 100%

Matters involved in SBA’s consideration of the application include the general business reputation and character of the proposed transferees, and the probability of successful operations under their control, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is hereby given that any person may, on or before May 10, 1982, submit to SBA, in writing, comments on the transfer of control. Any such communications should be addressed to the Acting Deputy Associate Administrator for Investment, 1441 L Street, N.W., Washington, D.C. 20418.

A copy of this notice shall be published in a newspaper of general circulation in Westport, Connecticut and St. Petersburg, Florida.

Robert C. Lineberry,
Acting Deputy Associate Administrator for Investment.

DEPARTMENT OF THE TREASURY
Office of the Secretary
Cancellation of Treasury Circular 1082

AGENCY: Office of the Secretary, Treasury.

ACTION: Notice of rescission of Treasury Department Circular 1082.

SUMMARY: Effective October 1, 1982, the Federal Assistance Award Data System (FAADS) will replace Treasury Circular 1082 (TC 1082) as the means of notifying the states of Federal Assistance Awards.

FAADS is an ADP-based system that provides information on assistance awards, including grants, on a quarterly basis. The reports are distributed to the states and meet the objective of section 201 of the Intergovernmental Cooperation Act of 1968. In addition, it is a far more efficient system of notification than the current manual system prescribed by TC 1082.

By the end of FY 1982 more than 30 federal agencies will be distributing information on their assistance activities through the FAADS reporting system. The system reports more than 100,000 transactions per quarter and includes all types of assistance, including grants, cooperative agreements, loans, loan guarantees, insurance programs and entitlement programs. The reports are distributed on a machine readable tape and each state can access the data base to obtain desired information on any specific type of assistance as well as the name and location of recipient.

FURTHER INFORMATION ON EITHER FAADS OR TC 1082 CONTACT:

Mr. David Kellerman (FAADS), Governments Division, Bureau of the Census, Washington, D.C. 20233, Telephone: (202) 606-2825

Mr. Arthur D. Kallen (TC 1082), Director of the Office of Budget and Program Analysis, U.S. Department of Treasury, Washington, D.C. 20220, Telephone: (202) 606-2825

SUPPLEMENTARY INFORMATION: This cancellation is not considered to be a major regulation within the meaning of Executive Order 12291 and will not have an impact on small entities within the meaning of the Regulatory Flexibility Act. This cancellation will eliminate the duplication of reports.

By the direction of the Secretary of the Treasury.

Cora P. Beebe,
Assistant Secretary, Administration.

2 COMMODITY FUTURES TRADING COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 47 FR 73, Thursday, April 15, 1982.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 11 a.m., Friday, April 23, 1982.

CHANGES IN THE MEETING: 1:30 p.m., Friday, April 23, 1982.

[S-609-82 Filed 4-21-82 11:30 am] | BILLING CODE 6351-01-M | |

3 FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

April 15, 1982.

TIME AND DATE: 10 a.m., Wednesday, April 21, 1982.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: In addition to the previously announced items, the Commission will consider and act upon the following:

1. Old Ben Coal Company, Docket No. LAKE 80-309. (Issues include whether judge properly found a violation of 30 CFR 77.1700 dealing with communications procedures when miners are working alone in hazardous areas).

2. Amax Lead Company of Missouri, Docket No. CENT 80-63-M. (In this case, on interlocutory review, the issues include whether the judge properly found a violation of 30 CFR 75.1403 dealing with safe transportation of miners and materials.)

3. Amex Lead Company of Missouri, Docket No. LAKE 80-309. (Issues include whether judge properly found a violation of 30 CFR 77.1700 dealing with communications procedures when miners are working alone in hazardous areas).

It was determined by a unanimous vote of Commissioners that Commission business required that a meeting be held on this term and that no earlier announcement of the addition was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653-5632.

4 FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Citation of Previously Announced Meeting

TIME AND DATE: 2 p.m., Wednesday, April 21, 1982.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Penn Allegh Coal Company, Docket No. PITT 76X241-F, IBMA 76-60. (In this case, arising under the 1969 Coal Act, the issues include whether judge properly found a violation of 30 CFR 75.1403 dealing with safe transportation of miners and materials.)

2. Amax Lead Company of Missouri, Docket No. CENT 80-63-M. (In this case, on interlocutory review, the issues include whether the judge properly rejected the parties' proposed settlement agreement.)

3. Old Ben Coal Company, Docket No. LAKE 80-309. (Issues include whether judge properly found a violation of 30 CFR 77.1700 dealing with communications procedures when miners are working alone in hazardous areas).

It was determined by a unanimous vote of Commissioners that Commission business required that the time of the meeting be changed and that no earlier announcement of the change was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653-5632.

6 FEDERAL TRADE COMMISSION

TIME AND DATE: 2 p.m., Wednesday, April 21, 1982.

STATUS: Open.

MATTERS TO BE CONSIDERED:

Advertising self-regulation discussion with American Association of Advertising Agencies, Association of
Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of April 26, 1982, in Room 825, 500 North Capitol Street, Washington, D.C.

An open meeting will be held on Wednesday, April 28, 1982, at 3:00 p.m. followed by a closed meeting.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4)(6)(9)(A) and (10) and 17 CFR 200.402(a)(4)(6)(8)(9)(i) and (10).

Chairman Shad and Commissioners Loomis, Evans, Thomas and Longstreth voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open meeting scheduled for Wednesday, April 28, 1982, at 3:00 p.m., will be:

1. Consideration of whether to adopt amendments to the Commission's rules of general organization and information and requests, to delegate to the General Counsel the authority to decide Freedom of Information Act appeals. For further information, please contact Ann Stansbury at (202) 272-2427.

2. Consideration of the application of August Development Fund 80 for an exemption from the registration requirements of Section 12(g) of the Securities Exchange Act of 1934 pursuant to Section 12(h) of that Act. For further information, please contact William E. Toomey at (202) 272-2573.

3. Consideration of whether to repropose for comment Rule 15b7-1 under the Securities Exchange Act of 1934, which would establish uniform minimum qualification standards for SECO broker-dealers and their associated persons, and Form U-5. For further information, please contact Kathleen McGann at (202) 272-2855.

4. Consideration of whether to recommend legislation to Congress which would eliminate direct Commission regulation of broker-dealers through the SECO program and require all broker-dealers to become members of the self-regulatory system through membership in a registered national securities association. For further information, please contact Howard Kramer at (202) 272-3118.

The subject matter of the closed meeting scheduled for Wednesday, April 28, 1982, following the 3:00 p.m. open meeting, will be:

- Formal order of investigation.
- Assess to investigative files by Federal, State, or Self-Regulatory authorities.
- Settlement of injunctive actions.
- Subpoena enforcement action.
- Institution and settlement of administrative proceedings of an enforcement nature.
- Institution of administrative proceedings.
- Freedom of Information Act appeals.
- Regulatory matter regarding financial institution.
- Terminating investigation.
- Institution of injunctive actions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Paul Siegelbaum at (202) 272-2468.

April 20, 1982.
Part II

Department of Labor

Employment Standards Administration,
Wage and Hour Division

Minimum Wages for Federal and
Federally Assisted Construction; General
Wage Determination Decisions
General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities described therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (40 Stat. 1949, as amended, 40 U.S.C. 276a) and of the Secretary of Labor pursuant to the provisions of 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions to general wage determination decisions.

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (40 Stat. 1949, as amended, 40 U.S.C. 276a) and of the Secretary of Labor pursuant to the provisions of 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions to general wage determination decisions.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (40 Stat. 1949, as amended, 40 U.S.C. 276a) and of the Secretary of Labor pursuant to the provisions of 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions are effective from their date of publication in the Federal Register without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Washington, D.C. 20210.

The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the Federal Register are listed with each State.

Supersedeas Decisions to General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the Federal Register are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

Signed at Washington, D.C. this 16th day of April 1982.
Dorothy P. Come,
Assistant Administrator, Wage and Hour Division.
### DECISION NO. FL82-1018 - MOD. #1

**Building Construction**

Cape Canaveral Air Force Station, Patrick Air Force Base, Kennedy Space Flight Center, and Mel Bar Radar Site in Brevard and Volusia Counties, Florida.

**CHANGE:**

**PLUMBERS, PIPEFITTERS, & STEAMFITTERS:**

1. Industrial - Bulk Plants, Powerhouses, Chemical Plants, Missile Sites, Oil Refineries, etc., and such other work which is related to and considered a part of the above type projects.

**AREA and ZONE DEFINITIONS**

**ELECTRICIANS:**

**Area 1:** Apache County (north of Highway 86)

**Area 2:** Coconino County; Navajo County (north and west of a boundary line beginning at a point where Clear Creek crosses the Coconino/Navajo County Line and then extending in a northeasterly direction along Clear Creek and northwesterly to Cottonwood Wash, along Cottonwood Wash extending northeasterly to where it intersects the Navajo Indian Reservation, then easterly along the Navajo-Indian Reservation boundary line to a point where it intersects the Navajo/Apache County Line):

- **Zone A:** 5 miles north-south, east and west of the Post Offices of Williams, Sedona, and Winslow
- **Zone B:** Remainder of Area 2 not covered by Zone A

**Area 3:** Apache County (south of Highway 86); Gila County; Navajo County (south and east of a boundary beginning at a point where Clear Creek crosses the Coconino/Navajo County Line, then extending in a northeasterly direction along Clear Creek and northeasterly to Cottonwood Wash, along Cottonwood Wash extending northeasterly to where it intersects the Navajo Indian Reservation, then easterly along the Navajo Indian Reservation boundary line to a point where it intersects the Navajo/Apache County Line); Pinal County (north of the line, "First Standard Parallel South" and east of the line "Second Guide Meridian East"):

- **Zone A:** Area within 16 road miles beginning where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing; Area within 12 miles radius from the school in Lakeside, Arizona
- **Zone B:** Area within 16-28 road miles from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing
- **Zone C:** Area within 28-46 road miles from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing
- **Zone D:** Area 46 road miles and over from point where the Southern Pacific Railroad intersects Highway 60-70 at Kaiser Crossing; Area over 12 miles radius from school in Lakeside, Arizona
### ELECTRICIANS: (Cont'd)

**Area 4:** Maricopa and Mohave Counties; Pinal County (north and west of the boundary line beginning at a point where the Papago Indian Reservation Road #15 crosses the Pima/Pinal County Line, then extending in a northeasterly direction on the Papago Indian Reservation Road #15 to the intersection with the Florence Canal, north and east on the Florence Canal to the intersection with the line, "Second Guide Meridian East", then north to the Pinal/Maricopa County Line); Yavapai County

**Area 5:** Cochise, Graham, Greenlee, and Pima Counties, Pinal County (south and east of the boundary line beginning at a point where the Papago Indian Reservation Road #15 crosses the Pima/Pinal County Line, then extending in a northeasterly direction on the Papago Indian Reservation Road #15 to the intersection with the Florence Canal, north and east on the Florence Canal to the intersection with the line, "Second Guide Meridian East", then north to the line, "First Standard Parallel South", and along that line to the Graham/Pinal County Line); Santa Cruz and Yuma Counties:

#### Zone A:
- Area within 16 miles radius from the City Hall in Tucson or Yuma
- Area within 16 road miles from center of Town in Douglas, Nogales or Sierra Vista
- Area within the boundaries of the incorporated city limits of Parker, plus an area extending from the south city limits of Parker in a northeasterly direction to Milepost No. 150 located on State Highway #95, northeast of Parker from the Colorado River on the west, an area 1 mile wide paralleling the Colorado River

#### Zone B:
- Area lying beyond the limits of Zone A extending to and including 12 road miles excluding area of Town in Douglas, Nogales or Sierra Vista

#### Zone C:
- Area lying beyond the limits of Zone B extending up to and including 18 road miles excluding area near Douglas, Nogales and Sierra Vista

#### Zone D:
- Area lying beyond the limits of Zone C for area near the Cities of Douglas, Nogales, Sierra Vista, the area lying beyond the limits of Zone A

#### Zone 1-A:
- Groundmen: 12.81
- Equipment Operators: 15.13
- Linemen: 17.05
- Crane Operators: 17.56
- Cable Splicers: 18.03

#### Zone 2:
- Groundmen: 14.75
- Equipment Operators: 16.99
- Linemen: 18.97
- Crane Operators: 19.52

#### Zone 2-A:
- MARBLE, TILE, and TERRAZZO FINISHERS: 11.02

AREA and ZONE DEFINITIONS

IRONWORKERS:
Northern Area: Area north from a line 10 miles north of and parallel to Highway #66, North to the Arizona-Utah border and from the Arizona-California border east to the Arizona-New Mexico border
Southern Area: All areas not included in the Northern Area

LATHERS:
Area 1: North of a line crossing the State drawn through Ajo, Randolph and Springerville; except as follows: northeast of a line drawn from Springerville to a point 4 miles northeast of Keams Canyon
Area 2: South of a line crossing the State drawn through Ajo, Randolph and Springerville

LINE CONSTRUCTION:
Zone 1: Phoenix and Tucson 30 mile radius from the center of Town; Area within 10 mile radius from the City Hall of Yuma
Zone 1-A: Flagstaff, Globe, and Kingman; and 10 mile radius from the center of Town
Zone 2: Other Areas not covered by Zone 1 and Zone 1-A

MARBLE WORKERS:

AREA and ZONE DEFINITIONS

MARBLE WORKERS:

Area 1: Apache, Coconino, and Gila Counties; Graham County (west and north of San Francisco River to Gila River); Greenlee County (west and north of San Francisco River to Gila River); Maricopa, Mohave, and Navajo Counties; Pinal County (north of a boundary line drawn west along the Gila River to the western city limits of Florence, a straight line from the extreme southwestern city limits of Florence to the extreme southern city limits of Coolidge, then a straight line to the extreme southern city limits of Casa Grande with the line extending to the Maricopa/Pinal County Line); Yavapai and Yuma Counties

PAINTERS:

Area 1: Apache, Coconino, Navajo, and Yavapai Counties (north of woodruff/Camp Wood Line); Mohave County (north of a line following the Geodetic Hualapai Boundary Line to the Colorado River, a distance of 23 miles east of Yuma Ferry and then intersecting the Arizona/Nevada State Line):

- Zone A: 0-20 road miles from Courthouse in Flagstaff
- Zone B: 20-35 road miles from Courthouse in Flagstaff
- Zone C: 35-60 road miles from Courthouse in Flagstaff
- Zone D: 60-80 road miles and over from Courthouse in Flagstaff

Area 2: Apache, Coconino, Navajo, and Yavapai Counties (south of the Woodruff/Camp Wood Line); Gila, Graham, Greenlee, Maricopa, and Pinal Counties (north of 33rd Parallel); Mohave County (south of a line following the Geodetic Hualapai Boundary Line to the Colorado River, a distance of 23 miles east of Yuma Ferry and then intersecting the Arizona/Nevada State Line):

- Zone A: 0-40 paved road miles from Courthouse in Phoenix; also, Luke and Williams Air Force Base
- Zone B: 41-60 paved road miles from Courthouse in Phoenix
- Zone C: 61 paved road miles and over from Courthouse in Phoenix

Area 3: Cochise County; Graham, Greenlee, Maricopa and Pinal Counties (south of 33rd Parallel); Pima, Santa Cruz, and Yuma Counties:

- Zone A: 0-30 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
- Zone B: 31-40 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
- Zone C: 41-50 paved road miles from Stone and Congress in Tucson or from the County Courthouse in Yuma
- Zone D: 51 paved road miles and over from Stone and Congress in Tucson or from the County Courthouse in Yuma

**AREA and ZONE DEFINITIONS**

**PLASTERERS:**
Area 1: Apache, Coconino, and Gila Counties; Graham, Greenlee, Maricopa, and Pinal Counties (north of Sentinel - Casa Grande - Safford Line); Mohave, Navajo, Yavapai, and Yuma Counties
Zone A: 0-15 miles from Phoenix
Zone B: 15-30 miles from Phoenix
Zone C: 30-50 miles from Phoenix

Area 2: Cochise County; Graham, Greenlee, Maricopa, and Pinal Counties (south of Sentinel - Casa Grande - Safford Line);
Santa Cruz County:
Zone A: 0-15 miles from Tucson
Zone B: 15-30 miles from Tucson
Zone C: 30-50 miles from Tucson

**PLUMBERS:**
Zone 1: Area within 15 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson or the Main Post Office Building in either Douglas, Flagstaff, or Yuma; Also, all areas within the City Limits of Mesa, Phoenix, Holbrook, Kingman, Prescott, and Winslow; Also, that area bordered by the Apache Trail on the north, Sidley Road on the east, Elliott Road on the south and Arizona Avenue on the west
Zone 2: Over 15 and up to 30 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

*See AREA and ZONE Descriptions - Pages 16 and 17*
PLUMBERS: (Cont'd)
Zone 3: Over 30 and up to 40 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

Zone 4: Over 40 road miles from either the intersection of Central Avenue and Jefferson Street in Phoenix or the Old Main Building of the University of Arizona in Tucson

ROOFERS:
Area 1: Apache, Coconino, Gila, Maricopa, Mohave, Navajo, Pinal, Yavapai, and Yuma Counties

Area 2: Cochise, Graham, Greenlee, Pima and Santa Cruz Counties:
Zone A: Area less than 44 road miles from City Hall in Tucson
Zone B: Area from 44 to 100 road miles from City Hall in Tucson

SHEET METAL WORKERS:
Area 1: Apache, Coconino, and Gila Counties: Graham, Greenlee, and Pinal Counties (north of 33rd Parallel): Maricopa, Mohave, Navajo, Yavapai, and Yuma Counties:
Zone 1: 0-25 miles radius, excluding Luke and Williams Air Force Bases, from the following base points: the intersection of 56th Street and Indian School Road in Phoenix, and the City Hall in Flagstaff, Kingman, Prescott and Yuma
Zone 2: 25-50 miles radius from the base points listed in Zone 1; also Luke and Williams Air Force Bases
Zone 3: 50 miles radius and over from the base points listed in Zone 1

Area 2: Cochise, Graham, Greenlee, and Pinal Counties (south of 33rd Parallel); Pima and Santa Cruz Counties:
Zone A: 0-25 miles radius from Tucson City Hall or Douglas City Hall
Zone B: 25-50 miles radius from Tucson City Hall or Douglas City Hall
Zone C: Over 50 miles radius from Tucson City Hall or Douglas City Hall; also San Manuel and vicinity

TERRAZZO WORKERS; TILE SETTERS:
Area 1: Apache, Coconino, and Gila Counties; Graham and Greenlee Counties (west and north of San Francisco River to Gila River); Maricopa, Mohave, and Navajo Counties; Pinal County (north of a boundary line drawn west along the Gila River to the western City limits of Florence, a straight line from the extreme southwestern City limits of Florence to the extreme southern city limits of Coolidge, then a straight line to the extreme southern city limits of Casa Grande, with the line extending to the Maricopa/Pinal County Line); Yavapai and Yuma Counties
LABORERS

Group 1: Laborer, general or construction; Manually-controlled Signal Operator; Fence Builder, Guard Rail Builder - highway; Chat Box Man; Dumpman and/or Spotter; Rip Rap Stone Man; Form Stripper; Landscape Gardener and Nurseryman; Packing Rod Steel and Pans; Window Cleaners; Cesspool Diggers and Installers; Concrete Dump Man - belt; Pipe and/or Hoseman; Astro-turf Layers; Clean-up, Bull Gang and Trackman - railroad; Chipper (clearing and grubbing)

Group 2: Cement Finisher Tender; Concrete Curer (Impervious Membrane); Cutting Torch Operator; Fine Grader (highway, engineering and sewer work only); Kettleman - Tarman; Power-type Concrete Buggy

Group 3: Chuck Tender (except tunnel); Sandblaster (Pot Tender); Powerman Tender; Spikers and Wrenchers; Rip Rap Stone Pavers; Creosote Aleman; Guinea Chaser; Band er

Group 4: Operator and Tenders of pneumatic and electric tools; Concrete Vibrating Machines; Chain Saw Machines (on clearing and grubbing); Floor Sanders - concrete; Hydraulic Jacks and similar mechanical tools not separately herein classified; Cement Dumpers (skip-type Mixer or handling bulk cement); Pipe Caulker and/or Backup Man (pipeline); Rigger/Signalman (pipeline); Pipe Wrapper; Cribber and Shorer (except tunnel); Pneumatic Gopher

Group 5: Grade Setter (pipeline); Driller; Jackhammer and/or Pavement Breakers; Pipe Layer (including but not limited to non-metallic, transite and plastic pipe, water pipe, sewer pipe, drain pipe, underground tile and conduit); Rock Slinger; Asphalt Rakers and Ironers; Air and water Wash-out Nozeleman; Scaler (using Bos'n's Chair or Safety Belt); Tamper (mechanical, all types); Hand-guided Trencher and similar operated equipment; Precast Manhole Erector

Group 6: Driller (Core, Diamond, Wagon or Air Track); Sandblaster (Nozeleman); Concrete Saw (hand-guided); Concrete Cutting Torch; Drill Doctor and/or Air Tool Repairman; Gunman and Mixerman (Gunite)

Group 7: Gunite Nozeleman or Rodman; Scaler (Drillers); Form Setter and/or Builder; Welders and/or Pipe Layers, Installing process piping; Drillers, Joy Mustang, PR 143, 220 Gardener-Denver, Hydasonic; Powder Man

Laborers (cont'd)

(Tunnel and Shaft Workers)

Group 1: Bull Gang, Muckers, Trackman; Dumpmen; Concrete Crew (includes Rodders and Spreaders); Grout Crew; Swaper (Brakeman and Switchmen on tunnel work)

Group 2: Nipper; Chuck Tender, Cable Tender; Vibrator; Jackhammer, Pneumatic Tools (except Driller)

Group 3: Grout Gunman

Group 4: Timberman, Retimberman - wood or steel blaster, Driller, Powerman; Cherry Picker; Powderman - Primer House; Steel Form Raiser and Setter; Kemper and other pneumatic concrete placer Operator; Miner - Finisher; Miners - Tunnel (hand or machine)

Group 5: Diamond Drill

Group 5A: Shaft and Raise Miner Welder
### POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

### AREA DESCRIPTIONS

**NORTHERN AREA:**
Area north of a straight line drawn between a point 35 miles due north of the City Hall in Flagstaff and a point 35 miles due north of the City Hall in Kingman, extending to the Arizona/Nevada State Line on the west; and connecting to a point 35 miles due north of the City Hall in Holbrook, thence due east to the intersection of the Arizona/New Mexico State Line.

**CENTRAL and SOUTHERN AREAS:**
All Areas, not included in the Northern Area.
Group 5A: Heavy-duty Mechanic and/or Welder; Pneumatic-tired Scraper, all sizes and types over 12 cu. yds. up to and including 45 cu. yds. HMC (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment); Tractor Operator (Pusher, Bulldozer, Scraper) up to 400 net horsepower rating; Trenching Machine Operator

Group 6: Auto Grade Machine (CHI and similar equipment); Boring Machine Operator (including Hole, Badger and similar type); Concrete Mixer Operator, paving type, and Mobile Mixer; Concrete Pump Operator with boom attachment (truck mounted); Crane Operator, Crawler type Tractor Operator, with boom attachment or slope bar; Derrick Operator; Forklift Operator for hoisting personnel; Grade-all Operator; Helicopter Hoist; Highline Cableway Operator (less than 20 tons rated capacity); Mass Excavator Operator (150 Bucyrus Erie and similar types); Mechanical Hoist Operator (two or more drums); Motor Grade Operator, any type power blade; Motor Grade Operator with elevating grader attachment; Hucking Machine Operator; Overhead Crane Operator; Piledriver Engineer (portable, stationary or skid rig); Pneumatic-tired Scraper Operator, all sizes and types (Turnapull, Euclid, Cat, D-W, Hancock and similar equipment over 45 cu. yds., HMC); Power driven Ditch Lining or Ditch Trimming Machine Operator; Skip Loader Operator, all types with rated capacity 4 cu. yds., but less than 8 cu. yds.; Slip Pot Paving Machine Operator (including Gunnert, Zimmerman and similar types); Specialized Power Digger Operator, attached to wheel-type Tractor; Tower Crane (or similar type) Operator; Tractor Operator (Pusher, Bulldozer, Scraper) (400 net horsepower and over); Tugger Operator (two or more); Universal Equipment Operator, Shovel, Backhoe, Dragline, Clamshell, etc., up to 8 cu. yds.

Group 7: Crane Operator, Pneumatic or Crawler (100 ton hoisting capacity and over HMC rating); Helicopter Pilot, FAA qualified, when used in construction work; Highline Cableway Operator, over 20 ton rated capacity and using Traveling Head and Tail Tower; Remote-controll Earth Moving Equipment Operator; Skip Loader Operator, all types with rated capacity of 8 cu. yds. or more; Universal Equipment - Shovel, Backhoe, Dragline, Clamshell, etc., 8 cu. yds. and over

### AREA DESCRIPTIONS

**NORTHERN AREA:**
Area north of a straight line drawn between a point 35 miles due north of the City Hall in Flagstaff and an point 35 miles due north of the City Hall in Kingman, extending to the Arizona/Nevada State Line on the west, and connecting to a point 35 miles due north of the City Hall in Holbrook, thence due east to the intersection of the Arizona/New Mexico State Line.

**CENTRAL and SOUTHERN AREAS:**
All Areas not included in the Northern Area.
TRUCK DRIVERS

Group 1: Teamsters; Pick-ups; Station Wagon; Man Haul Driver

Group 2: Dump or Flatrack (2 or 3 axle); Water Truck (under 2500 gallons); Buggymobile (1 cu. yd. or less); Bus Driver; Self-propelled Street Sweeper; Shop Greaser

Group 3: Dump or Flatrack (4 axle); Dumpster or Dumpster (less than 7 cu. yds.); Water Truck (2500 gallons but less than 4000 gallons); Tireman

Group 4: Dumpster or Dumpster (7 cu. yds. but less than 16 cu. yds.); Dump or Flatrack (5 axle); Water Truck (4000 gallons and over); Slurry type equipment Driver or Leverman; Vacuum Pump Truck Drivers; Flaherty Spreader or similar type equipment or Leverman; Transit Mix (8 cu. yds. or less mixer capacity); Ambulance Driver

Group 5: Dump or Flatrack (6 axle); Transit Mix (over 8 cu. yds. but less than 10.5 cu. yds.); Rock Truck (i.e. Dart, Euclid and other similar type end Dumps, single unit) less than 16 cu. yds.

Group 5A: Oil Tanker or Spreader and/or Bootman, Retortman or Leverman

Group 6: Transit Mix (over 10.5 cu. yds. but less than 14 cu. yds. mixer capacity); Ross Carrier, Fork Lift or Lift Truck; Hydro Lift, Swedish Crane, Iowa 300 and similar types; Concrete Pump (when integral part of Transit Mix Truck); Dump or Flatrack (7 axle); Transport Driver (unless axle rating results in higher classification)

Group 7: Dump or Flatrack (8 axle)

Group 8: Off-highway equipment Driver including but not limited to: 2 or 4 wheel power unit, i.e. Cat, DN Series, Euclid, International and similar type equipment, transporting material when top-loaded or by external means including pulling Water Tanks, Fuel Tanks or other applications under Teamster Classifications; Rock Trucks (Dart, Euclid, or other similar end dump types) 16 cu. yds. and over; Eject-all; Dumpster or Dumpster (16 cu. yds. and over); Dump or Flatrack (9 axle)

Group 8A: Heavy-duty Mechanic/Welder; Body and Fender Man

Group 8B: Heavy-duty Mechanic/Welder Tender

Group 8C: Field Equipment Serviceman or Fuel Truck Drivers

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

Department of Health and Human Services

Food and Drug Administration

Marketing Status of Ingredients Recommended for Over-the-Counter Use; Amendment to Enforcement Policy and Diphenhydramine; Marketing Status as a Nighttime Sleep-Aid Drug Product for Over-the-Counter Human Use
DEPARTMENT OF HEALTH AND HUMAN SERVICES
Food and Drug Administration
21 CFR Part 330
[Docket No. 81N-0370]
Marketing Status of Ingredients Recommended For Over-The-Counter Use; Amendment To Enforcement Policy

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the statement of the agency’s enforcement policy for over-the-counter (OTC) marketing of drug products containing certain active ingredients that are under consideration in FDA’s ongoing review of OTC drugs. The amended policy statement clarifies the authority of the Commissioner of Food and Drugs (Commissioner) to permit the interim OTC marketing of drug products containing an active ingredient previously limited to prescription use and classified by an advisory review panel in a category other than Category I (generally recognized as safe and effective and not misbranded) in cases in which the Commissioner subsequently has tentatively determined the active ingredient to be generally recognized as safe and effective.

DATES: Effective April 23, 1982; comments by June 22, 1982.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5000 Fishers Lane, Rockville, MD 20857.

FURTHER INFORMATION CONTACT: William E. Gilbertson, Bureau of Drugs (HFD–510), Food and Drug Administration, 5600 Fishers Lane, Room 429–45, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: FDA is amending § 330.13 (21 CFR 330.13), which sets forth its enforcement policy regarding the marketing of OTC drug products containing certain ingredients under consideration in FDA’s ongoing review of OTC drugs. This section states the agency’s position on the marketing before publication of a final monograph, or OTC drug products containing (1) an active ingredient limited, on or after May 11, 1972, to prescription use for the indication and route of administration under consideration, or (2) an active ingredient at a dosage level higher than that available in an OTC drug product on December 4, 1975. This statement was proposed in the Federal Register of December 4, 1975 (40 FR 56075). Its primary purpose was to clarify the marketing status of certain ingredients and dosage levels of contain ingredients, previously used only in prescription drug products, to be generally recognized as safe and effective for OTC use. In response to tentative determinations by OTC advisory review panels, some manufacturers had initiated OTC marketing or ingredients and dosages previously marketed by prescription only, such as oxymetazoline, diphenhydramine, and chlorpheniramine (adult 4-milligram (mg) dosage), at early stages of the OTC review process. To eliminate confusion about the agency’s enforcement policy and to prevent precipitate marketing of OTC drug products that might not be safe and effective, FDA promulgated this statement of enforcement policy in the Federal Register of August 4, 1976 (41 FR 32580).

Elsewhere in this issue of the Federal Register is a notice announcing FDA’s enforcement policy permitting the OTC marketing of diphenhydramine, as an ingredient in nighttime sleep-aid drug products. Consideration of the OTC marketing status of diphenhydramine for this use revealed and inadvertent omission in the statement of enforcement policy as published in the Federal Register of August 4, 1976. As explained in the notice on diphenhydramine, OTC marketing of this ingredient as a nighttime sleep-aid had been prohibited under the enforcement policy stated in § 330.13(d) because the Advisory Review Panel on OTC Sedative, Tranquilizer, and Sleep-Aid Drug Products had classified diphenhydramine, limited on or after May 11, 1972, to prescription use, in Category III (data insufficient to determine general recognition of safety and effectiveness). (See the Federal Register of December 8, 1975 (40 FR 57292).) The enforcement policy in § 330.13(d)(2) stated that an ingredient classified by the panel in Category III “may be lawfully marketed only after either the ingredient is determined by the Commissioner to be generally recognized as safe and effective, or a new drug application for the product has been approved.” In the proposed rulemaking (tentative final monograph) for nighttime sleep-aids, FDA classified diphenhydramine in Category III and reiterated its position that OTC marketing of this ingredient was prohibited under the policy set forth in § 330.13 (See the Federal Register of June 13, 1976 (41 FR 22544).) After reviewing new data and information subsequently submitted to the agency, the Bureau of Drugs concluded that the data provided a sufficient basis to reclassify diphenhydramine from Category III to Category I. The Bureau informed manufacturers by letters of the tentative determination that the data submitted were adequate to establish Category I status.

Because of the wording of § 330.13, some confusion then existed about the current marketing status of products containing diphenhydramine for use as a nighttime sleep-aid. In order to clarify this marketing status, the agency is specifically describing elsewhere in this issue of the Federal Register the agency’s enforcement policy as it affects diphenhydramine for use as a nighttime sleep-aid. As that notice explains, it would be inappropriate and not in the public interest to continue to bar the interim marketing of such products when there are apparently no unresolved safety or effectiveness issues. As originally promulgated, § 330.13(d)(2) could be interpreted as prohibiting OTC marketing of products previously marketed by prescription only that were classified by the appropriate panel in Category III until after the Commissioner had determined that the ingredient was generally recognized as safe and effective, and the final rule embodying that determination had been published in the Federal Register. That is, the Commissioner would be powerless to allow marketing of such products pending completion of the rulemaking process for that class of OTC drugs.

Such an interpretation would give an advisory committee the power to trigger interim OTC marketing (by recommending Category I classification of an ingredient or dosage previously marketed by prescription only unless the Commissioner vetoed such marketing (§ 330.13(b)(2)), but would not give the Commissioner the power to permit interim marketing based on the Bureau’s or the Commissioner’s tentative conclusion that an ingredient should be classified in Category I. To prevent this anomalous result, which was inadvertent, the agency is now amending the statement of enforcement policy to express the intent more accurately.

This amendment is intended to make it clear that, pending completion of the rulemaking process, the agency will not take enforcement action against (1) an active ingredient limited on or after May 11, 1972, to prescription use for the indication and route of administration under consideration, or (2) an active ingredient at a dosage level higher than that available on December 4, 1975, which ingredient or dosage level has
PART 330—OVER-THE-COUNTER (OTC) HUMAN DRUGS WHICH ARE GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED

§ 330.13 Conditions for marketing ingredients recommended for over-the-counter (OTC) use under the OTC drug review.

(c) * * *

(2) An active ingredient at a dosage level higher than that available in any OTC drug product on December 4, 1975, which ingredient and/or dosage level is classified by the panel in category II (conditions subject to § 330.10(a)(6)(ii)), may be marketed only after:

(i) The Bureau of Drugs or the Commissioner tentatively determines that the ingredient is generally recognized as safe and effective, and the Commissioner states by notice in the Federal Register (separately or as part of another document) that marketing under specified conditions will be permitted;

(ii) The ingredient is determined by the Commissioner to be generally recognized as safe and effective and is included in the appropriate published OTC drug final monograph; or

(iii) A new drug application for the product has been approved.

Interested persons may submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, by June 22, 1982. Such comments will be considered in determining whether further amendments to or revisions of this enforcement policy are warranted.

Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. April 23, 1982.

Mark Novitch,
Acting Commissioner of Food and Drugs.

Richard S. Schweiker,
Secretary of Health and Human Services.

BILLING CODE 4160–01–M
DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 75N-0244]

Diphenhydramine; Marketing Status as a Nighttime Sleep-Aid Drug Product

For Over-the-Counter Human Use; Notice of Enforcement Policy

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an enforcement policy to permit the over-the-counter (OTC) marketing of diphenhydramine as an ingredient in nighttime sleep-aid drug products. The enforcement policy will permit the OTC marketing of such drug product spending establishment under the OTC drug review of a final monograph under which drug products containing diphenhydramine that are intended for use as OTC nighttime sleep-aids will be generally recognized as safe and effective and not misbranded.

EFFECTIVE DATE: The enforcement policy is effective April 23, 1982.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Bureau of Drugs (HFD–510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: FDA is announcing an enforcement policy concerning the OTC marketing of nighttime sleep-aid drug products containing diphenhydramine. Prior policy could appear to bar OTC marketing of nighttime sleep-aid drug products containing diphenhydramine until such time as FDA has determined that the drug was generally recognized as safe and effective and not misbranded for OTC drug marketing and had published an appropriate OTC monograph in the Federal Register. Under the policy announced below and under the amended enforcement policy statement published elsewhere in this issue of the Federal Register, such products may be marketed immediately.

The OTC drug review procedures are set out in Part 330 (21 CFR Part 330). In accordance with those procedures, FDA published in the Federal Register of December 8, 1975 (40 FR 57292) an advance notice of proposed rulemaking to establish a monograph for OTC nighttime sleep-aid drug products, together with the recommendations of the Advisory Review Panel on OTC Sedative, Sleep-Aid, and Tranquilizer Drug Products, which was the advisory review panel responsible for evaluating data on the active ingredients in nighttime sleep-aids.

Among the nighttime sleep-aid ingredients reviewed by the Panel was diphenhydramine. This ingredient has been marketed for many years under an approved new drug application for prescription use for several indications. The Panel stated that clinical experience with the ingredient strongly suggested it would be safe and effective as an OTC nighttime sleep-aid. Because of a scarcity of studies for the sleep effectiveness issues that had been resolved when the advance notice of proposed rulemaking and proposed rulemaking were published in the Federal Register. The Bureau determined, after reviewing all of the submitted data, that 50 milligrams (mg) diphenhydramine hydrochloride and 76 mg diphenhydramine mononitrate were appropriate dosage levels in drug products intended for use as OTC nighttime sleep-aids. The Bureau concluded that the mononitrate salt could be considered identical to the hydrochloride salt because the mononitrate salt is rapidly converted in the stomach to the hydrochloride salt.

However, a dose of 76 mg diphenhydramine mononitrate is necessary to supply a diphenhydramine content equivalent to 50 mg diphenhydramine hydrochloride.

The Bureau also concluded that, based on the information available at that time, the studies would provide a sufficient basis to recategorize diphenhydramine from Category III to Category I when a decision was made on the classification of the drug in the final monograph. By letters dated July 18, 1981, the Bureau notified the two firms of its conclusions. These letters have been placed in the Dockets Management Branch (address above) along with the following information. The letters and information may be seen by interested persons from 9 a.m. to 4 p.m. Monday through Friday.

Subsequently, J. B. Williams Co., Inc., and Bristol-Myers Co. submitted 12 studies (Refs. 2 through 12) to support the use of diphenhydramine as an OTC nighttime sleep-aid ingredient. Diphenhydramine hydrochloride was evaluated in eight of the studies, and diphenhydramine mononitrate was evaluated in the other four.

After reviewing the submitted studies, FDA's Bureau of Drugs concluded that the studies resolved safety and effectiveness issues that had been raised when the advance notice of proposed rulemaking and proposed rulemaking were published in the Federal Register. The Bureau determined, after reviewing all of the submitted data, that 50 milligrams (mg) diphenhydramine hydrochloride and 76 mg diphenhydramine mononitrate were appropriate dosage levels in drug products intended for use as OTC nighttime sleep-aids. The Bureau concluded that the mononitrate salt could be considered identical to the hydrochloride salt because the mononitrate salt is rapidly converted in the stomach to the hydrochloride salt. However, a dose of 76 mg diphenhydramine mononitrate is necessary to supply a diphenhydramine content equivalent to 50 mg diphenhydramine hydrochloride.

The Bureau also concluded that, based on the information available at that time, the studies would provide a sufficient basis to recategorize diphenhydramine from Category III to Category I when a decision was made on the classification of the drug in the final monograph. By letters dated July 18, 1981, the Bureau notified the two firms of its conclusions. These letters have been placed in the Dockets Management Branch (address above) along with the following information. The letters and information may be seen by interested persons from 9 a.m. to 4 p.m. Monday through Friday.

References

The enforcement policy now set out in § 330.13 (21 CFR § 330.13) could appear to bar marketing of nighttime sleep-aid drug products containing diphenhydramine until the final monograph is issued. Such drug products would be barred from marketing even though the studies discussed earlier resolved the safety and effectiveness issues that originally resulted in classification of the ingredient in Category III rather than in Category I. The agency has determined that such a result would not be in the public interest. Because currently there are no unresolved safety or effectiveness issues relating to the use of diphenhydramine as a nighttime sleep-aid, it would be inappropriate to continue to bar the interim marketing of such products. Elsewhere in this issue of the Federal Register, the agency has amended the statement of enforcement policy with respect to such products. As amended, that statement makes it clear that the Commissioner may, in the final monograph, subject to the risk that the Commissioner may, in the final monograph, adopt a different position that could require relabeling, recall, or other regulatory action. Marketing of such a product with labeling not in accord with the tentative final monograph also may result in regulatory action against the product, the marketer, or both.

Interested persons may submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. Such comments will be considered in determining whether further amendments to or revisions of this policy are warranted. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Mark Novitch,
Acting Commissioner of Food and Drugs.

Richard S. Schweiker,
Secretary of Health and Human Services.
Part IV

Department of Commerce

Office of the Secretary

Prohibition of Discrimination Against the Handicapped In Federally Assisted Programs; Final Rule
Prohibition of Discrimination Against the Handicapped in Federally Assisted Programs Operated by the Department of Commerce

AGENCY: Department of Commerce.

ACTION: Final rule.

SUMMARY: This regulation will establish procedures and policies to assure nondiscrimination based on handicap in programs and activities receiving Federal financial assistance from the Department of Commerce. This rule is designed to implement the requirements of Executive Order 12250 and of Section 504 of the Rehabilitation Act of 1973, as amended, which provides, in relevant part, that "no otherwise qualified handicapped individual in the United States shall, solely by reason of his handicap, be excluded from the participation in, or be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." This rule is promulgated in response to Executive Order 12250. Its provisions substantially adhere, with minor deviations, to the HEW Guidelines and to the HEW Section 504 rule. The Department of Justice and the Equal Employment Opportunity Commission are currently reviewing the government-wide Section 504 Guidelines. This regulation will be modified to comply with any revision that the Department of Justice or the Equal Employment Opportunity Commission make to those guidelines.

2. Overview of Regulation

The regulation is divided into subparts. Subpart A (General Provisions) delineates the scope of the regulation and defines significant terms used throughout. These sections set forth in general terms the discriminatory acts that are prohibited. They also establish a viable administrative system which includes assurances of compliance, self-evaluation by recipients, remedial action, grievance procedures and notification to employees and beneficiaries of the recipient's policy of nondiscrimination on the basis of handicap.

Subpart B deals with discriminatory employment practices on the basis of handicap by recipients of Federal financial assistance from the Department. It also requires employers to make reasonable accommodation to qualified handicapped applicants or employees, unless it can be shown that the accommodation would impose undue hardship on the employer.

Subpart C establishes the requirement of program accessibility. It generally prohibits the exclusion of qualified handicapped individuals from federally assisted programs or activities because a recipient's facilities are inaccessible or unusable. With regard to existing facilities a recipient's program or activity, viewed in its entirety, must be readily accessible to and usable by handicapped individuals. New facilities, as well as alterations that could affect access to and use of existing facilities, must be designed and constructed in a manner making the facility accessible to and usable by handicapped individuals.

Subpart D prescribes nondiscrimination on the basis of handicap in the recruitment, admission and treatment of students in postsecondary education programs and activities, including vocational education. These sections apply to programs operated in the Department by the National Bureau of Standards (NBS), and the National Oceanic and Atmospheric Administration (NOAA).

Subpart E entitled "Procedures" makes reference to the enforcement procedures of the Department of Commerce under Title VI of the Civil Rights Act of 1964 and makes modifications necessary to adapt them. These procedures are located in 15 CFR 6.8-6.15.

3. Impact of Recent Court Decisions

This regulation requires that employers make reasonable accommodation to the known handicaps of qualified handicapped applicants or employees. It also requires that programs be made readily accessible to and usable by the qualified handicapped. These requirements must be read in light of Southeastern Community College v. Davis, 442 U.S. 397 (1979), the only Supreme Court decision to date construing Section 504 of the Rehabilitation Act.

The Davis Court found that there was no violation of Section 504 arising out of petitioner Southeastern Community Colleges' determination that the respondent applicant for admission did not meet the necessary and legitimate physical requirements of its registered nurse's training program and hence did not qualify to participate and that Section 504's prohibition against
discrimination did not authorize HEW to require recipients to take affirmative action. The Court acknowledged, however, that "the line between a lawful refusal to extend affirmative action and illegal discrimination against handicapped persons" would not always be clear. 442 U.S. at 412. "Thus, situations may arise where a refusal to modify an existing program might become unreasonable and discriminatory." Id. at 412-13. The Court therefore held that reasonable accommodations that do not impose undue burdens on the employer may be necessary where "an insistence on continuing past requirements and practices might arbitrarily deprive genuinely qualified handicapped persons of the opportunity to participate in a covered program." Id. at 412. Davis held that Section 504 did not require the petitioner college to fundamentally modify its registered nurses' training program, in order to accommodate the severe hearing loss of the respondent, who had applied for admission to the program as a student.

The accommodation and program accessibility requirement of this regulation come within the zone of permissible agency action under the Davis decision. This regulation does not require affirmative action by recipients. It merely prohibits discrimination against the qualified handicapped persons in the Department's federally assisted programs and activities.

This regulation sets standards for employment in all programs receiving Federal financial assistance from the Department. In Trageser v. Libbey Rehabilitation Center, Inc., 590 F.2d 87 (4th Cir. 1978), cert. denied, 442 U.S. 947 (1979), the court held that employment discrimination is prohibited by Section 504 only to the extent that it is prohibited by Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d-2000d-4 (1976). Title VI, which prohibits discrimination on the basis of race, color, or national origin in federally assisted programs, covers employment discrimination only in two situations: (1) "where a primary objective of the Federal financial assistance is to provide employment" (section 604 of Title VI, 42 U.S.C. 2000e-2000d-4 (1976); or (2) when the recipient's employment discrimination results in discrimination against the ultimate beneficiaries of the program receiving Federal financial assistance (see Caulfield v. Board of Education, 583 F.2d 605 (2d Cir. 1978)). Neither of these factors was present in Trageser.

The Court's decision rests on the language of section 120(a) of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978, which created a private right of action for individuals aggrieved under Section 504 through the remedies, procedures and rights in Title VI. Accordingly, "in the absence of legislative history to the contrary," the court held that section 120(a) of the 1978 amendments incorporated the limitations of Title VI coverage in the area of employment discrimination. 590 F.2d at 89.

The Court, in its analysis, did not focus on the remedial purpose of Section 504 to provide broad protections to the handicapped. Nor did the court consider the legislative history of the Rehabilitation Act of 1973 and its subsequent amendments which reflect the continuing congressional concern for the employment problems of the handicapped. See, e.g., S. Rep. No. 318, 93d Cong., 1st Sess. 15-19,70 (1973); S. Rep. No. 319, 93d Cong., 1st Sess. (1973); H.R. Rep. No. 1149, 95th Cong., 2d Sess. 15, 18, 23-29, 34, 38, 42-43 (1978); S. Rep. No. 690, 95th Cong., 2d Sess. 6, 13, 20-21, 27, 36 (1978); H.R. Conf. Rep. No. 1760, 95th Cong., 2d Sess. 80-81, 94-96, 98, 102 (1978). Further, the legislative history of section 120(a), which apparently was not brought to the attention of the court, indicates that the provision was not intended to limit the scope of Section 504, but was merely a legislative ratification of HEW's enforcement procedures under Section 504.

Section 120(a) was originally a provision in S. 2600 [95th Cong., 2d Sess., Section 118(a) (1978)]; the Senate version of the Rehabilitation Act Amendments of 1978 reported by the Senate Committee on Human Resources on May 15, 1978. The Committee, in its report, stated, with respect to section 120(e):

It is the committee's understanding that the regulations promulgated by the Department of Health, Education and Welfare with respect to procedures, remedies, and rights under Section 504 conform with those promulgated under Title VI. Thus, this amendment modifies existing practice as a specific statutory requirement. (S. Rep. No. 890, 95th Cong., 2d Sess. 19 (1978)).

In view of the legislative history of the Rehabilitation Act of 1973 and its amendments, HEW's administrative construction, the remedial nature of Section 504 and the legislative history of section 120(a), the Department believes that the employment practices of recipients of Federal financial assistance are covered by Section 504 regardless of the purpose of the assistance, and the final regulation reflects this view.

At least one other court, when confronted with the rationale of the Trageser decision, has also rejected the limitation of Section 504 to the analogous bounds of section 604 of Title VI. In that decision, Hart v. Alameda County Probation Department, 485 F. Supp. 66 (N.D. Cal., 1979), the court, examining the legislative history of Section 504, rejected the inference that the 1978 amendments restricted the scope of Section 504. Further, the court found that Congressional intent was to expand the remedies of the Act, thus, covering employment in programs receiving Federal financial assistance.

A proposed rule adding Part 15 to title 15 of the Code of Federal Regulations was published for notice and comment in the Federal Register on November 17, 1978 (43 FR 53785). In response to that proposal, the Department received a small number of public comments from organizations representing the handicapped, state agencies, private individuals and agencies, and Federal government officials. No public hearing was held. The comments were carefully reviewed and the issues raised were taken into consideration by the Department. The following is a summary of the significant comments received and the action taken by the Department of Commerce.

A primary concern of the majority of commenters was the marked deviation of the proposed regulation from the HEW Guidelines.

HEW objected to the inclusion of "other parties" in the definition of "recipient" in the proposed regulations. The final regulations do not contain a definition of "other parties." We feel that the definition of "recipient" in § 8b.3(f) of the final regulations is broad enough to cover commercial or industrial organizations located in a federally assisted industrial park as indirect recipients. This is an example of the kind of situation intended to be covered by the term "other parties" in the proposed regulations.

HEW also questioned the incorporation by reference of the requirements of the U.S. Coast Guard for employment on ships, since the latter are not consistent with the statute and coordinating regulations at 45 CFR 65.52-65.55. The revised provision at § 8b.16 reflects the fact that while the Department of Commerce (DOC) has no jurisdiction over the U.S. Coast Guard licensing procedures, DOC, as a second party in interest will not discriminate against licensed employees on a manner
The final regulations are responsive to these two organizations expressing the National Center for Law and the Deaf used with adaptations as appropriate in the Department of Labor (see e.g. § 8b.4(h)(2)) and the Department of the Interior (see e.g. § 8b.4(h)(2)) were used with adaptations as appropriate in the final DOC regulations.

DOC received lengthy comments on its proposed regulations from both the National Center for Law and the Deaf and the Paralyzed Veterans of America. These two organizations expressed the same concerns, mainly dealing with differences between the proposed regulations and the HEW guidelines. The final regulations are responsive to these comments insofar as the regulations follow the guidelines more closely. The comments also suggested the inclusion of the term "subrecipient" in order to reach functional though nontechnical recipients. However, as noted previously, we feel that the definition of recipient will be broad enough to include these entities in many cases as indirect recipients.

**Classification**

1. Executive Order 12291. This regulation was declared "major" under E.O. 12291 by the Office of Management and Budget (OMB). OMB has waived the requirement for a Regulatory Impact Analysis of the regulation. This waiver was necessary in order to comply with an order issued by the Central States District Court, Central District of California ordering the Department of Commerce to publish final regulations implementing Section 504 on an expedited basis.

2. Paperwork Reduction Act. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511), the reporting or recordkeeping provisions that are included in this regulation have been or will be submitted for approval to the Office of Management and Budget (OMB). They are not effective until OMB approval has been obtained and the public notified to that effect through a technical amendment to this regulation.

3. Regulatory Flexibility Act. The General Counsel, U.S. Department of Commerce, has found that this rule will not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 15 CFR Part 8b**

Civil rights, Handicapped.

For the reasons set out in the preamble, Title 15, Subtitle A, of the Code of Federal Regulations is amended by adding Part 8b to read as follows:

**PART 8b—PROHIBITION OF DISCRIMINATION AGAINST THE HANDICAPPED IN FEDERALLY ASSISTED PROGRAMS OPERATED BY THE DEPARTMENT OF COMMERCE**

**Subpart A—General Provisions**

Sec.
8b.1 Purpose.
8b.2 Application.
8b.3 Definitions.
8b.4 Discrimination prohibited.
8b.5 Assurance required.
8b.6 Remedial action, voluntary action, and self-evaluation.
8b.7 Designation of responsible employee and adoption of grievance procedures.
8b.8 Notice.
8b.9 Administrative requirements for small recipients.
8b.10 Effect of state or local law or other requirements and effect of employment opportunities.

**Subpart B—Employment Practices**

8b.11 Discrimination prohibited.
8b.12 Reasonable accommodation.
8b.13 Employment criteria.
8b.14 Preemployment inquiries.
8b.15 Employment on ships.

**Subpart C—Program Accessibility**

8b.16 Discrimination prohibited.
8b.17 Existing facilities.
8b.18 New construction.

**Subpart D—Post Secondary Education**

8b.19 Application of this part.
8b.20 Admissions and recruitment.
8b.21 Treatment of students.
8b.22 Academic adjustments.
8b.23 Housing provided by the recipient.
8b.24 Financial and employment assistance to students.
8b.25 Nonacademic services.

**Subpart E—Procedures**

8b.26 Procedure

**Subpart A—General Provisions**

8b.1 Purpose.

Section 504 of the Rehabilitation Act of 1973, as amended, prohibits discrimination on the basis of handicap in any program or activity receiving or benefiting from Federal financial assistance. The purpose of this part is to implement Section 504 with respect to programs and activities receiving or benefiting from Federal financial assistance from the Department of Commerce.

8b.2 Application.

This part applies to each recipient of Federal financial assistance from the Department of Commerce and to each program receiving or benefiting from such assistance. The requirements of this part do not apply to the ultimate beneficiaries of Federal financial assistance in the program receiving Federal financial assistance.

§ 8b.3 Definitions.

As used in this part, the term:

(b) "Applicant for assistance" means one who submits an application, request, or plan required to be approved by a Department official or by a recipient as a condition to becoming a recipient.

(c) "Department" means the Department of Commerce and any of its constituent units authorized to provide Federal financial assistance.

(d) "Facility" means all or any portion of buildings, ships, structures, equipment, roads, walks, parking lots, industrial parks, or other real or personal property or interest in such property.

(e) "Federal financial assistance" means any grant, loan, contract (other than a procurement contract or a contract of insurance or guarantee), or any other arrangement by which the Department provides or otherwise makes available assistance in the form of:

(1) Funds;

(2) Services of Federal personnel; or

(3) Real and personal property or any interest in or use of such property, including:

(i) Transfers or leases of such property for less than fair market value or for reduced consideration; and

(ii) Proceeds from a subsequent transfer or lease of such property if the Federal share of its fair market value is not returned to the Federal Government.

(f) "Handicap" means any condition or characteristic that renders a person a handicapped person as defined in paragraph (g) of this section.

(g) "Handicapped person." (1) "Handicapped person" means any person who:

(i) Has a physical or mental impairment which substantially limits one or more major life activities;

(ii) Has a record or belief that such person has such an impairment; or
(iii) Is regarded as having such an impairment.

(2) For purposes of employment, the term "handicapped person" does not include any person who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents that individual from performing the duties of the job in question, or whose employment, because of current alcohol or drug abuse, would constitute a direct threat to property or to the safety of others.

(3) As used in paragraph (g)(3)(1) of this section, the phrase:

(i) "Physical or mental impairment" means:

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or

(B) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities;

(C) The term "physical or mental impairment" includes, but is not limited to, such diseases and conditions as orthopedic, visual speech and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, cancer, heart disease, diabetes, mental retardation, emotional illness, drug addiction and alcoholism.

(ii) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, working, and receiving education or vocational training.

(iii) "Has a record of such an impairment" means that the individual has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

(iv) "Is regarded as having an impairment" means that the individual:

(A) Has a physical or mental impairment that does not substantially limit major life activities, but that is treated by a recipient as constituting such a limitation;

(B) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or

(C) Has none of the impairments defined in paragraph (g)(3)(i) of this section, but is treated by a recipient as having such an impairment.

(h) "Qualified handicapped person" means:

(1) With respect to employment, a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question;

(2) With respect to post secondary and vocational education services, a handicapped person who meets the academic and technical standards requisite to admission or participation in the recipient's education program or activity;

(3) With respect to other services, a handicapped person who meets the essential eligibility requirements for the receipt of such services.

(i) "Recipient" means any State or its political subdivisions, any instrumentalities of a State or its political subdivisions, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended directly or indirectly through another recipient, or including any successor, assignee, or transferee of a recipient, but excluding the ultimate beneficiary of the assistance.

(j) "Secretary" means the Secretary of Commerce, U.S. Department of Commerce.

(k) "Section 504" means Section 504 of the Act.

(l) "Small recipient" means a recipient who serves fewer than 15 beneficiaries and who employs fewer than 15 employees at all times during a grant year.

§ 8b.4 Discrimination prohibited.

(a) General. No qualified handicapped individual shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity that receives or benefits from Federal financial assistance.

(b) Discriminatory actions prohibited.

(1) A recipient, in providing any aid, benefit, or service, may not, directly or through contractual, licensing, or other arrangements, on the basis of handicap:

(i) Deny a qualified handicapped individual the opportunity to participate in or benefit from the aid, benefit, or service;

(ii) Afford a qualified handicapped individual an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others;

(iii) Provide a qualified handicapped individual with any aid, benefit, or service that is not as effective as that provided to others;

(iv) Provide different or separate aid, benefits, or services to handicapped individuals or to any class of handicapped individuals, unless such action is necessary to provide qualified handicapped individuals with aid, benefits, or services that are as effective as those provided to others;

(v) Aid or perpetuate discrimination against a qualified handicapped individual by providing significant assistance to an agency, organization, or person that discriminates on the basis of handicap in providing any aid, benefit, or service to beneficiaries of the recipient's program;

(vi) Deny a qualified handicapped individual the opportunity to participate as a member of planning or advisory boards;

(vii) Otherwise limit a qualified handicapped individual in the enjoyment of any right, privilege, advantage, or opportunity enjoyed by others receiving any aid, benefit, or services.

(2) For purposes of this part, aid, benefits, and services must afford handicapped individuals an equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as afforded to others, in the most integrated setting appropriate to the individual's needs. However, aid, benefits and services, to be equally effective, need not produce the identical result or level of achievement for handicapped and nonhandicapped individuals.

(3) A recipient may not deny a qualified handicapped individual the opportunity to participate in its regular programs or activities, despite the existence of separate or different programs or activities which are established in accordance with this part.

(4) A recipient may not, directly or through contractual or other arrangements, use criteria or methods of administration:

(i) That have the effect of subjecting qualified handicapped individuals to discrimination on the basis of handicap;

(ii) That have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the recipient's program with respect to handicapped individuals; or

(iii) That perpetuate the discrimination of another recipient if both recipients are subject to common administrative control or are agencies of the same state.

(5) In determining the geographic site or location of a facility, an applicant for assistance or a recipient may not make selections:
(i) That have the effect of excluding handicapped individuals from, denying them the benefit of, or otherwise subjecting them to discrimination under any program or activity that receives or benefits from Federal financial assistance.

(ii) That have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the program or activity with respect to handicapped individuals.

(6) As used in this section, the aid, benefit, or service provided under a program or activity receiving or benefiting from Federal financial assistance includes any aid, benefit, or service provided in or through a facility that has been constructed, expanded, altered, leased, rented or otherwise acquired, in whole or in part, with Federal financial assistance.

(7)(i) In providing services under programs of Federal financial assistance, recipients to which this subpart applies, except small recipients, shall ensure that no handicapped participant is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination under the program or activity operated by the recipient because of the absence of auxiliary aids for participants with impaired sensory, manual or speaking skills. A recipient shall operate each program or activity to which this subpart applies so that, when viewed in its entirety, auxiliary aids are readily available. The Secretary may require small recipients to provide auxiliary aids in order to ensure that no handicapped participant is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination under the program or activity operated by small recipients, when this would not significantly impair the ability of the small recipient to provide benefits or services.

(ii) Auxiliary aids may include brailled and taped materials, interpreters, telecommunications devices, or other equally effective methods of making orally delivered information available to persons with hearing impairments, readers for persons with visual impairments, equipment adapted for use by persons with manual impairments, and other similar devices and actions. Recipients need not provide attendants, individually prescribed devices, readers for personal use or study, or other devices or services of a personal nature.

(c) Programs limited by Federal Law. The exclusion of non-handicapped persons from the benefits of a program limited by Federal statute or Executive Order to handicapped individuals, or the exclusion of a specific class of handicapped individuals from a program limited by Federal statute or Executive Order to a different class of handicapped individuals is not prohibited by this part.

(d) Integrated Setting. Recipients shall administer programs and activities in the most integrated setting appropriate to the needs of qualified handicapped individuals.

(e) Communications with individuals with impaired vision and hearing. Recipients shall ensure that communications with their applicants, employees and beneficiaries are available to persons with impaired vision or hearing. Appropriate modes of communication may include braille, enlarged type, sign language and telecommunications devices.

§8b.5 Assurances required.

(a) Assurances. An applicant for Federal financial assistance for a program or activity to which this part applies shall submit an assurance, on a form specified by the Secretary, that the program will be operated in compliance with this part. An applicant may incorporate these assurances by reference in subsequent applications to the Department.

(b) Duration of obligation. (1) In the case of Federal financial assistance extended in the form of real property or structures on the property, the assurance shall obligate the recipient or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for the purpose for which Federal financial assistance is extended, or for another purpose involving the provision of similar services or benefits.

(2) In case of Federal financial assistance extended to provide personal property, the assurance shall obligate the recipient for the period during which it retains ownership or possession of the property.

(3) In all other cases, the assurance will obligate the recipient for the period during which Federal financial assistance is extended or the federally-funded program is operated, whichever is longer.

(c) Covenants. (1) Where Federal financial assistance is provided in the form of real property or interest in the property from the Department, the covenant shall also include a condition coupled with a right to revert title to the property in the event of a breach of the covenant. If a transferee of real property proposed to mortgage or otherwise encumber the real property as security to finance construction of new, or improvement of existing, facilities on the property for the purposes for which the property was transferred, the Secretary may agree to forbear the exercise of such right to revert title for, so long as the lien of such mortgage or other encumbrance remains effective.

Such an agreement by the Secretary may be entered into only upon the request of the transferee (recipient) if it is necessary to accomplish such financing and upon such terms and conditions as the Secretary deems appropriate.

(d) Interagency agreements. Where funds are granted by the Department to another Federal agency to carry out a program under a law administered by the Department, and where the grant obligates the recipient agency to comply with the rules and regulations of the Department applicable to that grant the provisions of this part shall apply to programs and activities operated with such funds.

§8b.6 Remedial action, voluntary action, and self-evaluation.

(a) Remedial action. (1) If the Secretary finds that a recipient has discriminated against persons on the basis of handicap in violation of Section 504 or this part, the recipient shall take such remedial action as the Secretary deems necessary to overcome the effects of the discrimination.

(2) Where a recipient is found to have discriminated against persons on the basis of handicap in violation of Section 504 or this part and where another recipient exercises control over the recipient that has discriminated, the Secretary, where appropriate, may require either or both recipients to take remedial action.

(3) The Secretary may, where necessary to overcome the effects of
discrimination in violation of Section 504 or this part, require a recipient to take remedial action:

(i) With respect to handicapped individuals who would have been participants in the program had the discrimination not occurred; and
(ii) With respect to handicapped persons who are no longer participants in the recipient's program, but who were participants in the program when the discrimination occurred; and
(iii) with respect to employees and applicants for employment.

(b) Voluntary action. A recipient may take steps, in addition to any action that is required by this part, to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity by qualified handicapped individuals.

(c) Self-evaluation. (1) A recipient shall, within one year of the effective date of this part:

(i) Evaluate, with the assistance of interested persons, including handicapped individuals or organizations representing handicapped individuals, its current policies and practices and the effects thereof that do not or may not meet the requirements of this part;
(ii) Modify, after consultation with interested persons, including handicapped individuals or organizations representing handicapped individuals, any policies and practices that do not meet the requirements of this part; and
(iii) Take, after consultation with interested persons, including handicapped individuals or organizations representing handicapped individuals, appropriate remedial steps to eliminate the effects of any discrimination that resulted from adherence to these policies and practices.

(2) A recipient, other than a small recipient, shall for at least three years make the initial notification required by this paragraph within 90 days of the effective date of this part. The notification shall state, where appropriate, that the recipient does not discriminate in the admission or access to, or treatment or employment in, its programs and activities. The notification shall also include an identification of the responsible employee designated pursuant to § 8b.7(a). A recipient shall make the initial notification required by this paragraph within 90 days of the effective date of this part. Methods of initial and continuing notification may include the posting of notices, publications in newspapers and magazines, placement of notices in recipient's publications, and distribution of memoranda or other written communication. A recipient shall take appropriate steps to ensure that notice is available to persons with impaired vision or hearing.

(b) If a recipient publishes or uses recruitment materials or publications containing general information made available to participants, beneficiaries, applicants, or employees, it shall include in those materials or publications a statement of the policy described in paragraph (a) of this section. A recipient may meet the requirement of this paragraph either by including appropriate inserts in existing materials and publications, or by revising and reprinting the materials and publications.

§ 8b.9 Administrative requirements for small recipients.

The Secretary may require small recipients to comply with §§ 8b.7 and 8b.8, in whole or in part, when the Secretary finds a violation of this part or finds that such compliance will not significantly impair the ability of the small recipient to provide benefits or services.

§ 8b.10 Effect of state or local law or other requirements and effect of employment opportunities.

(a) The obligation to comply with this part is not obviated or alleviated by the existence of any state or local law or other requirement that, on the basis of handicap, imposes prohibitions or limits upon the eligibility of qualified handicapped individuals to receive services, participate in programs, or practice any occupation or profession.

(b) The obligation to comply with this part is not obviated or alleviated because employment opportunities in any occupation or profession are or may be more limited for handicapped individuals than for nonhandicapped persons.

Subpart B—Employment Practices

§ 8b.11 Discrimination prohibited.

(a) General. (1) No qualified handicapped individual shall, on the basis of handicap, be subjected to discrimination in employment under any program or activity to which these regulations apply in a manner which ensures that discrimination on the basis of handicap does not occur and may not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(2) A recipient shall make all decisions concerning employment under any program or activity to which this part applies in a manner which ensures that discrimination on the basis of handicap does not occur and may not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(3) A recipient may not participate in a contractual or other relationship that has the effect of subjecting qualified handicapped applicants or employees to discrimination prohibited by this subpart. The relationships referred to in this subparagraph include relationships with employment and referral agencies, with labor unions, with organizations providing or administering fringe benefits to employees of the recipient, and with organizations providing training and apprenticeship programs.
§ 8b.12 Reasonable accommodation.
(a) A recipient shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of its program.
(b) Reasonable accommodation may include:
1. Making the facilities used by the employees in the area where the program is conducted, including common areas used by all employees such as hallways, restrooms, cafeterias and lounges, readily accessible to and usable by handicapped persons; and
2. Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters, and other similar actions.
(c) In determining pursuant to paragraph (a) of this section whether an accommodation would impose an undue hardship on the operation of a recipient's program, factors to be considered include:
1. The overall size of the recipient's program with respect to number of employees, number of participants, number and type of facilities, and size of budget;
2. The type of the recipient's operation, including the composition and structure of the recipient's workforce; and
3. The nature and cost of the accommodation needed.
(d) A recipient may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for the denial is the need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.
(e) Nothing in this paragraph shall relieve a recipient of its obligation to make its program accessible as required in subpart C of this part, or to provide auxiliary aids, as required by § 8b.4(b)(7).

§ 8b.13 Employment criteria.
(a) A recipient may not make use of any employment test or other selection criterion that screens out or tends to screen out handicapped individuals or any class of handicapped individuals unless:
1. The test score or other selection criterion, as used by the recipient, is shown to be job-related for the position in question; and
2. The test purports to measure the known physical or mental limitations of the applicant.
(b) A recipient shall select and administer tests concerning employment so as best to ensure that, when administered to an applicant or employee who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately to reflect the applicant's or employee's job skills aptitude, or whatever factor the test purports to measure, rather than reflecting the applicant's or employee's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

§ 8b.14 Preemployment inquiries.
(a) Except as provided in paragraphs (b) and (c) of this section, a recipient may not conduct preemployment inquiry of an applicant for employment as to whether the applicant is a handicapped individual, or as to the nature or severity of a handicap. A recipient may, however, make preemployment inquiry into an applicant's ability to perform job-related functions.
(b) When a recipient is taking remedial action to correct the effects of past discrimination pursuant to § 8b.6(a), when a recipient is taking voluntary action to overcome the effects of conditions that resulted in limited participation in this federally assisted program or activity pursuant to § 8b.6(b), or when a recipient is taking affirmative action pursuant to section 503 of the Act, the recipient may invite applicants for employment to indicate whether and to what extent they are handicapped, provided, that:
1. The recipient states clearly on any written questionnaire used for this purpose or makes clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts; and
2. The recipient states clearly that the information is being requested on a voluntary basis, that it will be kept confidential as provided in paragraph (d) of this section, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this part.
(c) Nothing in this section shall prohibit a recipient from conditioning an offer of employment on the results of a medical examination conducted prior to the employee's entrance on duty, provided, that:
1. All employees are subject to such an examination regardless of handicap, and
2. The results of such an examination are used only in accordance with the requirements of this part.
(d) Information obtained in accordance with this section as to the medical condition or history of the applicant shall be collected and maintained on separate forms that shall be accorded confidentiality as medical records, except:
1. Employing officials may obtain the information after making a conditional decision to make a job offer to the applicant or the applicant was placed conditionally in a job pool or placed conditionally on an eligibility list;
2. Supervisors and managers may be informed regarding restrictions on the work or duties of qualified handicapped individuals and whether necessary accommodations;
3. First aid and safety personnel may be informed, where appropriate, if the condition might require emergency treatment; and
4. Government officials investigating compliance with the Act shall be provided information upon request.

§ 8b.15 Employment on ships.
No qualified handicapped individual possessing an appropriate license or certificate obtained from the United States Coast Guard pursuant to the requirements of 46 CFR 10.01-1 et seq. and 12.0-1 et seq. shall, on the basis of handicap, be subjected to discrimination in employment on ships under any program or activity to which this part applies.

Subpart C—Program Accessibility

§ 8b.16 Discrimination prohibited.
No qualified handicapped individual shall, because a recipient's facilities are inaccessible to or unusable by handicapped individuals, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program or activity to which this part applies.
§ 8b.17 Existing facilities.

(a) Program accessibility. A recipient shall operate each program or activity to which this part applies so that the program or activity, when viewed in its entirety, is readily accessible to qualified handicapped individuals. This paragraph does not require a recipient to make each of its existing facilities or every part of a facility accessible to and usable by qualified handicapped individuals. However, if a particular program is available in only one location, that site must be made accessible or the program must be made available at an alternative accessible site or sites. Program accessibility requires nonpersonal aids to make the program accessible to mobility impaired persons.

(b) Methods. A recipient may comply with the requirements of paragraph (a) of this section through such means as redesign of equipment, reassignment of classes or other services to accessible buildings, assignment of aides to beneficiaries, home visits, delivery of services at alternate accessible sites, alteration of existing facilities and construction of new facilities in conformance with the requirement of § 8b.19, or any other method that results in making its program or activity accessible to handicapped individuals. A recipient is not required to make structural changes in existing facilities where other methods are effective in achieving compliance with paragraph (a) of this section. In choosing among available methods for meeting the requirement of paragraph (a) of this section, a recipient shall give priority to those methods that offer programs and activities to handicapped individuals in the most integrated setting appropriate.

(c) If a small recipient finds, after consultation with a qualified handicapped individual seeking its services, that there is no method of complying with paragraph (a) of this section other than making a significant alteration in its existing facilities or facility, the small recipient may, as an alternative, refer the qualified handicapped individual to other providers of those services that are accessible at no additional cost to the handicapped.

(d) Time period. A recipient shall comply with the requirement of paragraph (a) of this section within 60 days of the effective date of this part. Where structural changes in facilities are necessary, such changes shall be made within three years of the effective date of this part, but in any event as expeditiously as possible.

(e) Transition plan. In the event that structural changes to facilities are necessary to meet the requirement of paragraph (a) of this section, a recipient shall develop, within six months of the effective date of this part, a transition plan setting forth the steps necessary to complete such changes. The plan shall be developed with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons. A copy of the transition plan shall be made available for public inspection. The plan shall, at a minimum:

1. Identify physical obstacles in the recipient’s facilities that limit the accessibility of its program or activity to qualified handicapped individuals;
2. Describe in detail the methods that will be used to make the facilities accessible;
3. Specify the schedule for taking the steps necessary to achieve full program accessibility and, if the time period of the transition plan is longer than one year, identify the steps that will be taken during each year of the transition period; and
4. Indicate the person responsible for implementation of the plan.

(f) Notice. The recipient shall adopt and implement procedures to ensure that interested persons, including persons with impaired vision or hearing, can obtain information as to the existence and location of services, activities and facilities that are accessible to and usable by qualified handicapped individuals.

§ 8b.18 New construction.

(a) Design and construction. Each facility or part of a facility constructed on behalf of, or for the use of a recipient shall be designed and constructed in such manner that the facility or part of the facility is readily accessible to and usable by qualified handicapped individuals, if the construction was commenced after the effective date of this part.

(b) Alteration. Each facility or part of a facility which is altered by, on behalf of, or for the use of a recipient after the effective date of this part of the facility shall, to the maximum extent feasible, be altered in such manner that the altered portion of the facility is readily accessible to and usable by qualified handicapped individuals.

(c) Standards for architectural accessibility. Design, construction, or alteration of facilities under this subpart shall meet the most current standards for physical accessibility prescribed by the General Services Administration under the Architectural Barriers Act, at 41 CFR 101-19.603. Alternative standards may be adopted when it is clearly evident that equivalent or greater access to the facility or part of the facility is thereby provided.

Subpart D—Post Secondary Education

§ 8b.19 Application of this subpart.

Subpart D applies to post secondary education programs and activities, including post secondary vocational education programs and activities, that receive or benefit from Federal financial assistance for the operation of such programs or activities.

§ 8b.20 Admission and recruitment.

(a) General. Qualified handicapped may not, on the basis of handicap, be denied admission or be subjected to discrimination in admission or recruitment by a recipient to which this subpart applies.

(b) Admissions. In administering its admission policies, a recipient to which this subpart applies:

1. May not apply limitations upon the number or proportion of handicapped individuals who may be admitted; and
2. May not make use of any test or criterion for admission that has a discriminatory effect on handicapped individuals or any class of handicapped individuals unless:

i. The test or criterion, as used by the recipient, has been validated as a predictor of success in the education program or activity in question; and
ii. Alternate tests or criteria that have a less disproportionate, adverse effect are not shown by the Secretary to be available.

(c) Shall assure itself that (i) admissions tests are selected and administered so as best to ensure that, when a test is administered to an applicant who has a handicap that impairs sensory, manual, or speaking skills, the test results accurately reflect the applicant’s aptitude or achievement level of whatever other factor the test purports to measure, rather than reflecting the applicant’s impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure); (ii) admissions tests that are designed for persons with impaired sensory, manual, or speaking skills are offered as often and in as timely a manner as are other admissions tests; and (iii) admissions tests are administered in facilities that, on the whole, are accessible to handicapped individuals; and

(d) Except as provided in paragraph (c) of this section, may not make pre-admission inquiry as to whether an
applicant for admission is a handicapped individual but, after admission, may make inquiries on a confidential basis as to handicaps that may result.

(c) **Pre-admission inquiry exception.** When a recipient is taking remedial action to correct the effects of past discrimination pursuant to § 8b.6(a) or when a recipient is taking voluntary action to overcome the effects of conditions that resulted in limited participation in its federally assisted program or activity pursuant to § 8b.6(b), the recipient may invite applicants for admission to indicate whether and to what extent they are handicapped. *Provided*, that:

1. The recipient states clearly on any written questionnaire used for this purpose or makes clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary action efforts; and

2. The recipient states clearly that the information is being requested on a voluntary basis, that it will be kept confidential, that refusal to provide it will not subject the applicant to any adverse treatment, and that it will be used only in accordance with this part.

(d) **Validity studies.** For the purpose of paragraph (b)(2) of this section, a recipient may base prediction equations on first year grades, but shall conduct periodic validity studies against the criterion of overall success in the education program or activity in question in order to monitor the general validity of the test scores.

§ 8b.21 **Treatment of students.**

(a) *General.* No qualified handicapped student shall be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any academic research, occupational training, housing, health insurance, counseling, financial aid, physical education, athletics, recreation, transportation, extracurricular, or any other post secondary education program or activity to which this subpart applies.

(b) A recipient to which this subpart applies that considers participation by students in education programs or activities not operated wholly by the recipient as part of, or equivalent to, education programs or activities operated by the recipient shall assure itself that the other education program or activity, as a whole, provides an equal opportunity for the participation of qualified handicapped persons.

(c) A recipient to which this subpart applies may not, on the basis of handicap exclude any qualified handicapped student from any course or study, or other part of its education program or activity, except as follows:

(d) **Auxiliary aids.** (1) A recipient to which this subpart applies shall ensure that no handicapped student is denied the benefits of any education program participation in, or otherwise subjected to discrimination under the education program or activity operated by the recipient because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

(e) A recipient to which this subpart applies shall make such modifications to its academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Academic requirements that the recipient can demonstrate are essential to the program of instruction being pursued by such student or to any directly related licensing requirement will not be regarded as discriminatory within the meaning of this section. Modifications may include changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, and adaptation of the manner in which specific courses are conducted.

(b) **Other rules.** A recipient to which this subpart applies may not impose upon handicapped students other rules, such as the prohibition of tape recorders in classrooms or of dog guides in campus buildings, that have the effect of limiting the participation of handicapped students in the recipient's education program or activity.

(c) **Course examinations.** In its course examinations or other procedures for evaluating student’s academic achievement in its program, a recipient to which this subpart applies shall provide such methods for evaluating the achievement of students who have a handicap that impairs sensory, manual, or speaking skills as will best ensure that the results of the evaluation represent the student's achievement in the course, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where such skills are the factors that the test purports to measure).

(d) **Auxiliary aids.** (1) A recipient to which this subpart applies shall ensure that no handicapped student is denied the benefits of any education program participation in, or otherwise subjected to discrimination under the education program or activity operated by the recipient because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

(e) A recipient to which this subpart applies shall make such modifications to its academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student.

§ 8b.22 **Academic adjustments.**

(a) **Academic requirements.** A recipient to which this subpart applies shall make such modifications to its academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Academic requirements that the recipient can demonstrate are essential to the program of instruction being pursued by such student or to any directly related licensing requirement will not be regarded as discriminatory within the meaning of this section. Modifications may include changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, and adaptation of the manner in which specific courses are conducted.

(b) **Other rules.** A recipient to which this subpart applies may not impose upon handicapped students other rules, such as the prohibition of tape recorders in classrooms or of dog guides in campus buildings, that have the effect of limiting the participation of handicapped students in the recipient's education program or activity.

(c) **Course examinations.** In its course examinations or other procedures for evaluating student's academic achievement in its program, a recipient to which this subpart applies shall provide such methods for evaluating the achievement of students who have a handicap that impairs sensory, manual, or speaking skills as will best ensure that the results of the evaluation represent the student's achievement in the course, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where such skills are the factors that the test purports to measure).

(d) **Auxiliary aids.** (1) A recipient to which this subpart applies shall ensure that no handicapped student is denied the benefits of any education program participation in, or otherwise subjected to discrimination under the education program or activity operated by the recipient because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

(e) A recipient to which this subpart applies shall make such modifications to its academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Academic requirements that the recipient can demonstrate are essential to the program of instruction being pursued by such student or to any directly related licensing requirement will not be regarded as discriminatory within the meaning of this section. Modifications may include changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, and adaptation of the manner in which specific courses are conducted.

(b) **Other rules.** A recipient to which this subpart applies may not impose upon handicapped students other rules, such as the prohibition of tape recorders in classrooms or of dog guides in campus buildings, that have the effect of limiting the participation of handicapped students in the recipient's education program or activity.

(c) **Course examinations.** In its course examinations or other procedures for evaluating student's academic achievement in its program, a recipient to which this subpart applies shall provide such methods for evaluating the achievement of students who have a handicap that impairs sensory, manual, or speaking skills as will best ensure that the results of the evaluation represent the student's achievement in the course, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where such skills are the factors that the test purports to measure).

(d) **Auxiliary aids.** (1) A recipient to which this subpart applies shall ensure that no handicapped student is denied the benefits of any education program participation in, or otherwise subjected to discrimination under the education program or activity operated by the recipient because of the absence of educational auxiliary aids for students with impaired sensory, manual, or speaking skills.

(e) A recipient to which this subpart applies shall make such modifications to its academic requirements as are necessary to ensure that such requirements do not discriminate or have the effect of discriminating, on the basis of handicap, against a qualified handicapped applicant or student. Academic requirements that the recipient can demonstrate are essential to the program of instruction being pursued by such student or to any directly related licensing requirement will not be regarded as discriminatory within the meaning of this section. Modifications may include changes in the length of time permitted for the completion of degree requirements, substitution of specific courses required for the completion of degree requirements, and adaptation of the manner in which specific courses are conducted.

§ 8b.23 **Housing provided by the recipient.**

(a) A recipient that provides housing to its nonhandicapped students shall provide comparable, convenient, and accessible housing to handicapped students at the same cost as to others. At the end of transition period provided for in Subpart C, such housing shall be available in sufficient quantity and variety so that the scope of handicapped students choice of living accommodations is, as a whole, comparable to that of nonhandicapped students.

(b) **Other Housing.** A recipient that assists any agency, organization, or person in making housing available to any of its students shall take such action as may be necessary to assure itself that such housing is, as a whole, made available in a manner that does not result in discrimination on the basis of handicap.

§ 8b.24 **Financial and employment assistance to students.**

(a) **Provision of financial assistance.** (1) In providing financial assistance to qualified handicapped individuals, a recipient to which this subpart applies may not (i) on the basis of handicap, provide less assistance than is provided to nonhandicapped persons, limit eligibility for assistance, or otherwise discriminate or (ii) assist any entity or person that provides assistance to any of the recipient's students in a manner that discriminates against qualified handicapped individuals on the basis of handicap.

(b) A recipient may administer or assist in the administration of scholarships, fellowships, or other forms of financial assistance established under wills, trust, bequest, or similar legal instruments that require awards to be made on the basis of factors that discriminate or have the effect of discriminating on the basis of handicap only if the overall effect of the award of
scholarships, fellowships, and other forms of financial assistance is not discriminatory on the basis of handicap.

(b) Assistance in making available outside employment. A recipient that assists any agency, organization, or person in providing employment opportunities to any of its students shall assure itself that such employment opportunities, as a whole, are made available in a manner that would not violate Subpart B if they were provided by the recipient.

(c) Employment of student by recipients. A recipient that employs any of its students may not do so in a manner that violates Subpart B.

§ 8b.25 Nonacademic services.

(a) Physical education and athletics. In providing physical education courses and athletics and similar programs and activities to any of its students, a recipient to which this subpart applies may not discriminate on the basis of handicap. A recipient that operates or sponsors intercollegiate, club, or intramural athletics shall provide to qualified handicapped students an equal opportunity for participation in these activities.

(2) A recipient may offer to handicapped students physical education and athletic activities that are separate or different only if separation of differentiation is consistent with the requirements of § 8b.22(d) and only if no qualified handicapped student is denied the opportunity to compete for teams or to participate in courses that are not separate or different.

(b) Counseling and placement services. A recipient to which this subpart applies that provides personal, academic, or vocational counseling guidance, or placement services to its students shall provide these services without discrimination on the basis of handicap. The recipient shall ensure that qualified handicapped students are not counseled toward more restrictive career objectives than are nonhandicapped students with similar interests and abilities. This requirement does not preclude a recipient from providing factual information about licensing and certification requirements that may present obstacles to handicapped persons in their pursuit of particular careers.

(c) Social organizations. A recipient that provides significant assistance to fraternities, sororities, or similar organizations shall assure itself that the membership practices of such organizations do not permit discrimination otherwise prohibited by this subpart.

Subpart E—Procedures

§ 8b.26 Procedures

The enforcement provisions applicable to Title VI of the Civil Rights Act of 1964 found at §§ 8.7–8.15 of this Subtitle shall apply to this part.

Malcolm Baldrige,
Secretary of Commerce.

BILLING CODE 3510-BP-M
Part V

Department of Agriculture

Food and Nutrition Service

Food Stamp Program; 1980 Amendments to the Food Stamp Act of 1977; Policy Interpretations; and Miscellaneous Technical Amendments
DEPARTMENT OF AGRICULTURE
Food and Nutrition Service
7 CFR Parts 271, 272, 273, 274, and 278
[Amdt. No. 189]
Food Stamp Program; 1980 Amendments to the Food Stamp Act of 1977; Policy Interpretations; and Miscellaneous Technical Amendments
AGENCY: Food and Nutrition Service, USDA.
ACTION: Final rulemaking.
SUMMARY: This rulemaking contains final regulations for the Food Stamp Program (FSP) to implement certain segments of the 1980 Amendments to the Food Stamp Act of 1977 aimed at reducing fraud, abuse and program costs. Included in this rulemaking are regulations implementing provisions of the Act related to referring illegal aliens to the Immigration and Naturalization Service (INS); prorating income and counting resources of ineligible aliens; making administrative fraud determination hearings optional; and eliminating depreciation as a cost of doing business for self-employed households.

In addition to these new provisions, a series of policy interpretations and technical amendments are included in this final action to clarify provisions published on October 17, 1978. These interpretations and technical amendments cover numerous aspects of program operations.

DATES: This final action is effective June 1, 1982 and shall be fully implemented no later than July 1, 1982.

Federal Register / Vol. 47, No. 79 / Friday, April 23, 1982 / Rules and Regulations
the eligibility of residents of shelters for battered women and children. The final provisions on this subject were addressed in a separate rulemaking published December 8, 1981 (46 FR 60160).

Reporting Illegal Aliens to the Immigration and Naturalization Service (INS)

Section 118 of Pub. L. 96–249 requires State agencies to report illegal aliens to the INS. The January 16 proposed rules added a new section 7 CFR 273.4 to establish three circumstances under which an illegal alien would be reported to INS. The Department received several comments on the three reporting conditions, mainly from State welfare agencies and public interest groups, who raised various concerns about the conditions.

Because the law clearly provides authority for certification personnel to determine when a person should be reported to INS and because of difficulties with the proposed reporting conditions expressed by commenters, the Department has decided not to include the three conditions in this final rule and 7 CFR 273.4 has been modified accordingly. However, because many aliens who are legally present in the U.S. are not eligible for food stamps, State agencies are cautioned that a determination that a person is an ineligible alien is not equivalent to a determination that a person is an illegal alien.

The proposed rule also stated that failure to report an illegal alien to FNS would not be assessed as a Quality Control (QC) error. The Department did not receive comments objecting to this proposal; however, the proposal has not been adopted in the final rule (§ 273.4(e)(4)). The QC review system is designed to measure the accuracy of a household’s allotment and only those actions or procedures affecting certification are relevant to the QC review. Whether or not an illegal alien is reported to INS has no effect on a household’s eligibility or allotment and there is no need to establish an actual regulatory provision to state that this reporting requirement will not be assessed as a QC error. It should be noted, however, that this reporting requirement will be monitored through the State agencies’ Management Evaluation (ME) system. Should a State agency determine through ME that a project area is not satisfying the requirement for reporting illegal aliens to INS, the State agency is required to take necessary action to bring the project area into compliance with the regulations.

Prorating Income and Counting Resources of Ineligible Aliens

The Department received several comments on this portion of the proposed rule which specified that a pro-rata share of the income of an ineligible alien household member and the total amount of that member’s resources would be considered available to the remaining household members when determining FSP eligibility. Those commenting, mainly State welfare agencies, supported the provision as proposed. This provision is specifically required by the Food Stamp Act amendments of 1980 and 7 CFR 273.4(c) has been revised accordingly.

Optional Fraud Hearings

The Department received several comments that supported the proposed revision to 7 CFR 273.16(d) that would relieve a State agency of the requirement to have an administrative fraud hearing system if the State agency had an agreement with the State’s Attorney General and/or county prosecutors to ensure the prompt prosecution of cases referred. Developing and completing the agreement should increase the coordination between the State agency and its prosecutors and result in a greater awareness of the issue of food stamp fraud among State prosecutors.

One FNS Regional Office opposed this provision and stated that the Department should establish tolerance levels that would enable Regional Office staff to evaluate a State agency’s handling of alleged food stamp fraud. The tolerance levels would test the actual performance of State agencies by looking at the number of cases that are actively pursued by prosecutors. State agencies which are not able to meet the minimum tolerance levels would be required to utilize the administrative fraud hearing system. The Department rejected this suggestion because, as stated in the preamble to the proposed rules, there would be significant difficulties in establishing any initial, basic tolerance levels and because, once established, the levels would not accurately reflect differences among the States. The Department believes that these final provisions respond to the needs of each State agency and provide flexibility that would not be possible if the Department were to establish national tolerance levels and require all State agencies to demonstrate compliance with those levels.

The Virginia Attorney General, citing a State law that requires local welfare directors to pursue prosecution in all cases of fraud, suggested that FNS should not require an agreement, but simply require State agencies to advise FNS about how they will act in cases where food stamp fraud is suspected. The agreement, however, does more than simply require that food stamp workers refer cases of alleged food stamp fraud for possible prosecution: the agreement also outlines how prosecutors will handle the referrals. It is this latter feature of the agreement that is of specific interest to the Department and that would not be present if a State agency intends to justify deletion of its administrative fraud hearing system only on the basis of a State law. The law, however, would be sufficient, if it were combined with information that indicates that prosecutors are actively following through on cases of alleged food stamp fraud that are referred to them. The Department has retained the proposed provisions in the final rule and has included a provision to allow the State agency to delete its administrative fraud hearing system if State law requires the referral of alleged fraud cases for prosecution, but only if the State agency can demonstrate adequate follow-up on the referrals by prosecutors.

Self Employment—Depreciation as a Cost of Doing Business

The Department received very few comments on the proposal to no longer allow an income deduction for depreciation as a cost of doing business for self-employed households. The majority of comments received were from State welfare agencies which generally supported the provision as proposed. Therefore, the provision has been adopted in this final rule (7 CFR 273.11(a)(4)).

Policy Interpretations

Earned Income Received by Nonhousehold Members

The Department received very few comments on the proposal to establish a method for handling earned income received jointly by household members and nonhousehold members. The proposal specified that State agencies attempt to determine the amount earned by each household member and nonmember and count the household’s portion as earned income. If the determination could not be made, State agencies would prorate the income of all those intended to receive it, and count the wages of the household members. The commenters, mostly State welfare agencies, generally supported the provision as proposed. Therefore, the
provision has been adopted, unchanged, in this final action (7 CFR 273.11(d)).

Verification of Citizenship

The proposed rules would have contained two provisions regarding verification of citizenship. The proposed provision that verification of citizenship for an individual in the household is not received by the end of the 2-month grace period for verification provided under the current rules, the individual whose citizenship is in question shall be determined ineligible and that individual's prorated share of income and total resources would be considered available to the remaining household members. Current rules at 7 CFR 273.2(f)(2) specify that in such cases income and resources shall not be considered available to the remaining household member(s).

The proposal also would have required that form FNS-288, Certification of Transfer of Household Benefits, be the mechanism used to keep track of when to terminate the certification of people who are certified for 2 months pending verification of citizenship, when such households move from one project area to another during the 2-month certification period. The proposal further provided that the new project area would be responsible for processing the termination after attempting to contact the old project area to ensure verification had not been provided by the household in the intervening time.

The Department has decided not to finalize these provisions at this time. Another proposed rule regarding verification of citizenship has been published that directly affects these areas. The proposal appeared in the Federal Register of April 2, 1982 at 46 FR 14160.

Technical Amendments

No Aid Reduction

The proposed rule would have expanded the current rules at 7 CFR 272.1(b) containing a provision which prohibits the reduction of assistance to food stamp recipients by any participating State or political subdivision because of the receipt of food stamp benefits and specified the types of governmental action which would be considered reductions in aid. The discussion of the aid reduction prohibition was inadvertently omitted from the preamble to the proposed rule. The Department that if verification of the proposed rule without first bringing the matter to the public's attention through a proposed explanatory preamble and, thereby, giving interested parties the opportunity to submit comments.

Therefore, this provision of the proposed rule does not appear in this final rule. The Department will reassess its position on this issue. If a change is determined to still be necessary, the Department will repropose the provision at a later date.

Drug and Alcoholic Treatment Centers on Indian Reservations

As explained in the preamble to the January 16 proposed rule, current statutory and regulatory definitions of treatment centers require them to be certified by the State agency responsible for their administration. This certification is performed pursuant to Pub. L. 91-616, “Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970” and Pub. L. 92-255, “Drug Abuse Office and Treatment of 1972.” Many Indian reservation-based alcoholism programs are not State certified due to various agreements between the States and the reservations within their jurisdictions. However, the Indian alcoholism programs were originally provided Pub. L. 91-616 program funded by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and pursuant to a Memorandum of Agreement between NIAAA, the Indian Health Service (IHS), are transferred to IHS for administration. There is no reason why these programs should be denied the participation granted to nonreservation-based programs, simply because certification required by current rules cannot be obtained through the State agency. Certification can be obtained through IHS.

The Department did not receive any comments objecting to the proposed amendment to permit Program participation by residents of reservation-based treatment centers sponsored by the National Institute on Alcohol Abuse and Alcoholism and the Indian Health Service. Therefore, 7 CFR 271.2 and 278.1(e) are amended by this final action to adopt the proposal as written.

Availability of Program Regulations and State Plans and Procedures

The Department received several comments on this provision of the proposed rule. Most comments were from State welfare agencies and public interest groups. While several State agencies supported the elimination of the requirement that all project areas maintain copies of Federal Regulations and State Plans of Operation and procedures, other State agencies were opposed to the proposed requirement that these documents must still be maintained in at least one large project area of the State. Some State agencies recommended that maintenance of these documents be limited to State agencies' headquarters offices. The Department accepted this suggestion. 7 CFR 272.1(d)(1) has been modified to require that only the State agency headquarters office maintain Federal Regulations and State plans and procedures for public inspection. State agencies could still require that project areas within a State maintain these documents. Such a requirement would be at the option of the State agency. (Note: The proposed rule for this provision stated that paragraph (e)(2), which was redesignated from paragraph (d)(2), was being proposed for revision. However, since paragraph (d)(1) is not being redesignated as (e)(1), the final rule amends 7 CFR 272.1(d)(1) to accommodate the final version of this provision and paragraph (d)(2) is unchanged.)

Many public interest groups supported the proposed provision but wanted the regulations to specify that copies of these documents would be available on request "free of charge" from the FNS National Office, FNS Regional Offices, and State agencies. The Department did not adopt this recommendation. Current regulations (7 CFR 272.1(d)) state that copies of Federal regulations may be obtained from the FNS National Office or the FNS Regional Offices. To expand this provision to State agency offices would require that the FNS National Office supply State agencies with bulk supplies of regulations to fill individual requests for copies. The cost and administrative burden related to such a change far outweigh the need for State agencies to maintain bulk supplies of regulations to respond to individual requests. The Department will provide the regulations (reprints of the Federal Register) without charge, provided the number of copies requested is within reason (usually up to 10 copies) and the regulations requested are not voluminous. The Department believes that filing such requests through National and Regional FNS offices will adequately meet the needs of individuals requesting regulations.

Treatment of Social Security Payments to Eligible Households

The proposed rules contain a provision to clarify that that portion of social security educational benefits used
for tuition and mandatory fees is to be considered as an income exclusion. This provision was not adopted in the final rule. Social security educational benefits will be phased out due to recent amendments in the Social Security Act and, thus, clarification in regulations is no longer necessary.

**Reporting Changes Between Application and Certification**

The Department received only a few comments on this portion of the proposed rule, mainly from State welfare agencies and FNS Regional Offices. The Department proposed to require an applicant household to report changes in circumstances that occur between the time an application is filed and the time of the interview. It was proposed that such changes be reported at the interview. Additionally, it was proposed that changes occurring after the interview be reported within 10 days of the date the household is certified.

The Department received several comments on the provision of the January 16 proposed rule to provide State agencies the power to disqualify an authorized representative, for up to one year, from acting for the certified household if the State agency can substantiate that the representative misrepresented the household's circumstances without the household's knowledge. The majority of comments were from State welfare agencies who generally supported the provision.

Some commenters requested that an authorized representative be prohibited from appealing the disqualification determination. The Department agrees. Current regulations provide households the right to appeal any action by the State agency that affects their participation in the program (7 CFR 273.16(a)) and hold only the household, not the authorized representative, liable for any overissuance caused by the misrepresentation of their authorized representative (7 CFR 273.11(f)(1)(1)). The Department sees no need for both parties to be able to appeal the disqualification action. Therefore, the final rule does not provide the opportunity for the authorized representative to appeal a disqualification action. Additionally, the final rule clarifies that if a disqualified person acts as an authorized representative for more than one household, each household has the right to appeal the disqualification action.

One FNS Regional Office and one State agency recommended that the provision to allow administrative disqualification of authorized representatives not apply in the case of drug addict and alcoholic treatment centers and certain group homes that act as authorized representatives on behalf of their residents. The Department agrees with this recommendation. Administrative disqualification of the authorized representatives for residents of institutions would cause an undue hardship on those residents as they would not be in a position to name a new representative. The intent of the administrative disqualification provision is to protect the program and the
household alike, by providing State agencies the opportunity to disqualify the representative and/or request the household to name a new representative. Households are held liable for any overissuances that result from misrepresentation by their authorized representatives. In the case of authorized representatives for drug and alcoholic treatment centers and certain group homes, current regulations (7 CFR 273.11(e)) hold the organization or institution strictly liable for overissuances, not the households they represent. The Department feels this liability provision is sufficient program protection. Further, the organization or institution may well replace the protection. Further, the organization or institution strictly liable for overissuances. The Department considered this suggestion, but it was not included in the final rule because repayment with food stamps is strictly a household option and the Department has no information to indicate that coercion is a widespread practice. Should information surface that indicates coercion is occurring, it would be the Department’s intent to take whatever action is necessary to stop such a practice by a State agency.

Nonfraud and Fraud Claims Processing—$100 Level

The Department proposed that the level for requiring processing of nonfraud and fraud claims be increased from $35 to $100, or whatever lower amount is determined cost-effective by the State agency. The Department also proposed to change from $35 to $100 the level at which State agencies shall not pursue fraud cases through their administrative fraud hearing systems. The Department is not finalizing these provisions at this time. Recent legislation, the Omnibus Reconciliation Act of 1981, contains provisions relative to fraud and nonfraud claims and pursuit of fraud cases. The Department will reevaluate this issue in light of the legislation and will address the issues in the final rules to implement the new legislation.

Nonfraud Claims Collection—Demand Letter

The proposal to delete the requirement of 7 CFR 273.18(b)(3)(ii) that a nonfraud demand letter contain the statement that household eligibility or benefits will not be affected if a household falls behind in making payments or is unable to pay the claim was supported by a number of commenters. The proposed deletion was opposed by a number of commenters. The Department decided to delete the statement as proposed, in order to strengthen claims collection efforts.

The absence of the statement from the demand letter will not actually have any negative impact on food stamp households. The preamble to the proposed rule explained, and it is reiterated here, that the provision does not permit benefits to be terminated or reduced if a household is unable to pay a nonfraud claim.

Other Technical Amendments

The January 18, 1981 proposed rule contained an amendment to drop the phrase “authorized by FNS for that purpose” from 7 CFR 274.10(d), as it relates to group living arrangements; however, the reason for dropping the phrase was not explained in the preamble to the proposed rule. The Department has decided to finalize the provision (with modifications as explained below) because it is simply a technical amendment to incorporate clearer regulatory language, and it is not the Department’s intent to change current policy.

The current provision at 7 CFR 274.10(d) specifies that residents of group living arrangements may use coupons issued to them to purchase meals prepared for them at group living arrangement facilities authorized by FNS for that purpose. The phrase “authorized by FNS for that purpose” has created some confusion. The phrase has been incorrectly interpreted by some agencies to mean that a group living facility must be authorized by FNS in order to prepare and serve meals to their eligible food stamp residents before residents of such facilities may use their coupons to purchase the meals. The phrase was intended to explain that although the provision provides authority for residents of group homes to spend their coupons at the facility, the facility must be authorized by FNS to redeem the coupons at a wholesaler, or be authorized by the household to redeem coupons through retail food stores as the authorized representative of the household involved. In other words, the word “authorized” appearing in the current provision refers to authorization for redemption purposes.

This final rule revises 7 CFR 274.10(d) to clarify this intent and eliminate the confusion caused by current language. However, the final version is modified from the proposed version. It became apparent that simply dropping the phrase “authorized by FNS for that purpose” would not achieve the needed clarification. Therefore, the final version of the provision goes into more detail. Additionally, the Department realized that this same clarity problem also exists in 7 CFR 274.10(d) as it relates to providing residents of drug and alcoholic treatment and rehabilitation centers and residents of shelters for battered women and children the authority to spend their coupons at the facilities. The Department is taking this opportunity to incorporate clearer language for these facilities as well. The revisions appear in § 274.10(d) of this final rule.

The proposed rule contained another technical amendment that was not fully explained in the preamble to the proposed rule. Current regulations at 7 CFR 273.1(e) state, in part, that individuals shall be considered residents of an institution if the institution provides the individual with the majority of their meals as part of the institution’s normal services. Individuals
determined to be residents of an institution are ineligible for program participation. There has been some confusion in the past as to what is meant by “institutional care.” The January 18, 1981 rules proposed to define the phrase as meaning “at least 50 percent of three meals daily.” The Department received only one comment on the provision of the rule and that commenter suggested that we change the phrase to say “over 50 percent of three meals daily.” The Department has adopted the commenter’s suggestion in this final rule.

The Department received very few comments on the remaining proposed technical amendments of the January 18, 1981 rules which provided: 1) an amendment to 7 CFR 273.2(e)(1) to state that the household may bring someone to the certification interview; 2) an amendment to 7 CFR 273.9(c) to require income exclusions for certain payments to Yakima and Muscelaro Apache Tribes and for payments to VISTA volunteers; 3) amendments to 7 CFR 273.2(g)(1), (h), (h)(1)(d), (h)(2)(i)(A), (h)(3)(i), and (h)(4)(iii) for clarification of certain certification processing standards; 4) amendments to 7 CFR 273.8(d), (e), (h) and (l) to clarify the treatment and handling of certain resources with regard to ineligible aliens; 5) an amendment to 7 CFR 273.2(f)(1)(i)(B) to clarify what documentation may be presented as proof of alien status; and 6) an amendment to 7 CFR 273.8 to require a resource exclusion for certain payments to the Yakima and Muscelaro Apache Tribes; and (7) an amendment to 7 CFR 274.8(b) to raise the level from $200 to $500 a month for destruction of unusable coupons by State agencies without prior FNS approval. Most comments were from State welfare agencies which generally supported the provisions. The Department has adopted these provisions in the final rule.

One FNS Regional Office did, however, ask that the regulatory language related to the income exclusion for VISTA payments be modified to drop the list of Title I and II programs contained in the provision, in order to avoid continuous updates to the list through the time-consuming regulatory process. The Department did not drop the lists. It was not intended that the lists be inclusive nor that they be continually updated through regulatory procedures. The intent is to simply inform readers of our knowledge [at the time of this rule] of current programs under the Domestic Volunteer Service Act (including VISTA) that would fall under the provision. Thus, 7 CFR 273.9 is modified by this final rule to clarify our intent and specify that the FNS National Office will keep FNS Regional Offices informed of changes in the programs under the Domestic Volunteer Service Act, so that they may alert the State agencies.

The proposed rule contained a technical amendment to 7 CFR 273.2(l)(i)(ii)(e), and 273.4(a) to reflect categories of lawfully present aliens as they have been redefined by the Refugee Act of 1980, (Pub. L. 99–212, 94 Stat 102), which are permitted to apply for FSP participation. The proposed amendments did not raise any concern to commenters and are adopted by this final rule. The Refugee Act of 1980 added two new sections to the Immigration and Nationalization (IN) Act (sections 207 and 208) for categorizing refugees, parolees, and aliens granted asylum. The IN Act also removed the separate and distinct alien category of “conditional entrant” (section 203(a)(7) of this IN law). Aliens formerly categorized in accordance with section 203(a)(7) are now being categorized pursuant to section 207 of the IN Act. While section 203(a)(7) of the IN Act no longer exists, reference to section 203(a)(7) of that act is still necessary for FSP verification purposes as the Immigration and Nationalization Service (INS) has informed us that some INS documents will still contain an annotation to section 203(a)(7) of the IN Act during the transition to the new categorization under section 207. Therefore, INS documents presented as proof of alien status which are annotated with section 203(a)(7) are still valid documents until they expire (two years from date of issuance). The final version of the amendment to 7 CFR 273.4(a) is slightly modified from the proposed language to more clearly define the types of aliens covered under section 207 and 208 of the Immigration and Nationalization Act.

The Department recently became aware of another technical problem with current regulations that was not directly addressed in the proposed rule, but which needs to be clarified. On October 17, 1978, the Department issued final rules (43 FR 47849) which, among other things, specify that a disqualified household member shall not be counted as a household member but that the disqualified member’s resources shall be counted towards the eligibility of the remaining household members (7 CFR 273.11(c)(1)). At the same time, a conforming amendment was added at 7 CFR 273.8(j) on the treatment of resources of nonhousehold members. On January 31, 1980, the Department issued final rules (45 FR 7208), after consideration of comments from the public, which specified that persons failing to comply with the requirement to supply a social security number would be disqualified from the program. Thus, an amendment was made to 7 CFR 273.11(c) to reflect this decision. However, a conforming amendment was not made to the section of regulations (appearing at 7 CFR 273.8[j]) regarding the treatment of resources to reflect this new class of disqualified household members.

Since 7 CFR 273.8[j] is being amended by this final action due to the addition of still another class of nonhousehold members (ineligible aliens), we are taking this opportunity to add an appropriate reference to the treatment of resources for persons considered nonhousehold members due to disqualification for noncompliance with the requirement to supply a social security number.

Additionally, the Department is taking this opportunity to delete 7 CFR 273.8(e)(11)(viii), regarding an exclusion from resources for certain earned income tax credits. This provision is already specified in 7 CFR 273.8(e)(11)(v) of that same section and 7 CFR 273.8(e)(11)(vii) was an unintentional duplication of the provision.

We are also taking this opportunity to incorporate into regulations, Section (9)(c) of Pub. L. 96–420 (the Maine Indian Claims Settlement Act of 1980), enacted October 10, 1980. Section (9)(c) of Pub. L. 96–420 prohibits any payments from the State of Maine to Indian households pursuant to Section 5 of Pub. L. 96–420 from being considered as income or resources for the purpose of denying such households other Federal benefits to which they may be otherwise eligible to receive. Therefore, 7 CFR 273.8[e](11) and 273.9[c](10) are revised in this final rule accordingly.

List of Subjects in 7 CFR

Part 271
Administrative practice and procedure, Food stamps, Grant programs—social programs

Part 272
Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements

Part 273
Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Reporting and
recordkeeping requirements, Social Security, Students

Part 274

Administrative practice and procedure, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements

Part 278

Administrative practice and procedure, Banks, banking, Claims, Food stamps, Groceries—retail, Groceries, General line—wholesaler, Penalties. Accordingly, 7 CFR Parts 271, 272, 273, 274, and 278 are amended by this final rule as follows:

PART 271—GENERAL INFORMATION AND DEFINITIONS

1. In § 271.2, the definition of "drug addiction or alcoholic treatment and rehabilitation program" is revised to read as follows:

§ 271.2 Definitions.

Drug addiction or alcoholic treatment and rehabilitation program means any drug addiction or alcoholic treatment and rehabilitation program conducted by a private nonprofit organization or institution which is certified by the State agency or agencies designated by the Governor as responsible for the administration of the State's programs for alcoholics and drug addicts pursuant to Pub. L. 91-616, Comprehensive Alcohol Abuse and Alcoholism Prevention Treatment and Rehabilitation Act of 1970 and Pub. L. 92-255, Drug Abuse Office and Treatment Act of 1972 providing treatment that can lead to the rehabilitation of drug addicts or alcoholics. If an alcoholic treatment and rehabilitation program is located on an Indian reservation and the State does not certify or license reservation-based centers, approval to participate may be granted if the requirements of paragraphs (e), (f), and (d)(1) of § 278.1 are met and the program either is funded by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) pursuant to Pub. L. 91-616 or was so funded and has subsequently been transferred to Indian Health Service (IHS) funding.

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1, paragraph (d)(1) is revised and a new subparagraph (27) is added to paragraph (g). The changes read as follows:

§ 272.1 General terms and conditions.

(d) Information available to the public. (1) Federal regulations, Federal procedures embodied in FNS notices and policy memos, and State Plans of Operation (including specific planning documents such as Corrective Action Plans) shall be available upon request for examination by members of the public during office hours at the State agency headquarters as well as at FNS Regional and National offices. State agency handbooks shall be available for examination upon request at each local certification office within each project area as well as at the State agency headquarters and FNS Regional and National offices. State agencies, at their option, may require other offices within the State to maintain a copy of Federal Regulations.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

3. In § 273.1, the two introductory sentences to paragraph (e) are revised, the 4th sentence of paragraph (f)(3)(i) is revised, the last sentence of paragraph (f)(4)(ii) is removed, and new sentences are added to the end of (f)(4)(ii). The changes read as follows:

§ 273.1 Household concept.

(e) Residents of institutions. Individuals shall be considered residents of an institution when the institution provides them with the majority of their meals (over 50% of three meals daily) as part of the institution's normal services and the institution has not been authorized to accept coupons. Residents of institutions are not eligible for participation in the program with the following exceptions:

(f) Authorized representatives.

(i) Making application for the program. (The State agency shall inform the household that the household will be held liable for any over issuance which results from erroneous information given by the authorized representative, except as provided in § 273.11(e) and § 273.16(a).

(ii) State agencies which have obtained evidence that an authorized representative has misrepresented a household's circumstances and has knowingly provided false information pertaining to the household, or has made improper use of coupons, may disqualify that authorized representative from participating as an authorized representative in the Food Stamp Program for up to one year. The State agency shall send written notification to the affected household(s) and the authorized representative thirty days prior to the date of disqualification. The notification shall include: the proposed action; the reason for the proposed action; the household's right to request a fair hearing; the telephone number of the office; and, if possible, the name of the person to contact for additional information. This provision is not applicable in the case of drug and alcoholic treatment centers and those group homes which act as authorized representatives for their residents.

PART 274—INFORMATION AND REQUIREMENTS FOR BENEFIT ADMINISTRATION

4. In § 274.3, the text of paragraph (i) is revised.

(i) Interviews. The applicant may bring any person he or she chooses to the interview.

(f) Verification.

(ii) Alien status.

(B) * * * Because delays in delivering the I-551 cards are lengthy, an interim document provided to new immigrants, Form I-161–B, may be presented. This form is given at the time of adjustment of status to lawful permanent resident. It is imprinted with the stamped annotation, "Processed for I-551, Temporary Evidence of Lawful Admission for Permanent Residence.

(C) Aliens in the categories specified in § 273.4(a)(4) through (e)(6) shall present an INS form I-94: Arrival-
Departure Record. The State agency shall accept the INS form I-94 as verification of eligible alien status only if the form is annotated with section 203(a)(7), 207, 208, 212(d)(5), or 243(h) of the Immigration and Nationality Act or if the form is annotated with any one of the following terms: refugee, parolee, paroled, or asylum. An INS form I-94 annotated with any one of the letters (A) through (L) shall be considered verification of ineligible alien status unless the alien can provide other documentation from INS which indicates that the alien is eligible. If the INS form I-94 does not bear any of the above annotations and the alien has no other verification of alien classification in his or her possession, the State agency shall advise the alien to submit form G-641, Application for Verification of Information from Immigration and Naturalization Service Records, to INS. State agencies shall accept this form when presented by the alien and properly annotated at the bottom by an INS representative as evidence of lawful admission for permanent residence or parole for humanitarian reasons. The alien shall also be advised that classification under Section 203(a)(7), 207, 208, 212(d)(5), or 243(h) of the Immigration and Nationality Act shall result in eligible status; that the alien may be eligible if acceptable verification is obtained; and that the alien may contact INS, as stated previously, or otherwise obtain the necessary verification or, if the alien wishes and signs a written consent, that the State agency will contact INS to obtain clarification of the alien’s status. If the alien does not wish to contact INS, the household shall be given the option of withdrawing its application or participating without that member.

(E) If the proper INS documentation is not available, the alien may state the reason and submit other conclusive verification. The State agency shall accept other forms of documentation or corroboration from INS that the alien is classified pursuant to section 101(a)(15), 101(a)(20), 207, 208, 212(d)(5), 243, or 249 of the Immigration and Nationality Act, or other conclusive evidence such as a court order staying that deportation has been withheld pursuant to section 243(h) of the Immigration and Nationality Act. (F) While awaiting acceptable verification, the alien whose status is questionable shall be ineligible. The income and resources of the ineligible alien shall be treated in the same manner as a disqualified individual set forth in § 273.11(c), and shall be considered available in determining the eligibility of any remaining members.

[g] Normal processing standard.—(1) Thirty-day processing. The State agency shall provide eligible households that complete the initial application process an opportunity to participate as soon as possible, but no later than 30 calendar days following the date the application was filed. * * *

(b) Delays in processing. If the State agency does not determine a household’s eligibility and provide an opportunity to participate within 30 days following the date the application was filed, the State agency shall take the following action:

1. Determining cause. * * *

(i) Delays caused by the household.

(A) * * * However, if a notice of denial is sent and the household takes the required action within 60 days following the date the application was filed, the State agency shall reopen the case without requiring a new application. No further action by the State agency is required after the notice of denial or pending status is sent if the household failed to take the required action within 60 days following the date the application was filed, or If the State agency chooses the option of holding the application pending for only 30 days following the date of the initial request for the particular verification that was missing, and the household fails to provide the necessary verification by this 30th day.

(3) Delays caused by the State agency.

(i) * * * The State agency shall not deny the application if it caused the delay, but shall instead notify the household by the 30th day following the date the application was filed that its application is being held pending. * * *

(4) Delays beyond 60 days. * * *

(iii) * * * A notice of denial need not be sent if the notice of pending status informs the household that it would have to file a new application if verification was not received within 30 days following the date of the initial request.

5. Section 273.4 is revised in its entirety to read as follows:

§ 273.4 Citizenship and alien status.

(a) Citizens and eligible aliens. State agencies shall prohibit participation in the program by anyone who is not a resident of the United States and one of the following:

(1) A United States citizen.

(2) An alien lawfully admitted for permanent residence as an immigrant as defined in sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act.

(3) An alien who entered the United States prior to June 30, 1948, or some later date as required by law, and has continuously maintained residency in the United States since then, and is not ineligible for citizenship, but is considered to be lawfully admitted for permanent residence as a result of an exercise of discretion by the Attorney General pursuant to Section 249 of the Immigration and Nationality Act.

(4) An alien who is qualified for entry after March 17, 1980 because of persecution or fear of persecution on account of race, religion, or political opinion pursuant to section 207 (formerly section 203(a)(7)) of the Immigration and Nationalization Act.

(5) An alien who qualifies for conditional entry prior to March 18, 1980 pursuant to former section 203(a)(7) of the Immigration and Nationalization Act.

(6) An alien granted asylum through an exercise of discretion by the Attorney General pursuant to section 208 of the Immigration and Nationalization Act.

(7) An alien lawfully present in the United States as a result of an exercise of discretion by the Attorney General for emergent reasons or reasons deemed strictly in the public interest pursuant to Section 212(d)(5) of the Immigration and Nationality Act, or as a result of a grant of parole by the Attorney General.

(8) An alien living within the United States for whom the Attorney General has withhold deportation pursuant to Section 243 of the Immigration and Nationality Act because of the judgement of the Attorney General that the alien would otherwise be subject to persecution on account of race, religion, or political opinion.

(b) Ineligible aliens. Aliens other than those described above shall not be eligible to participate in the program as a member of any household. Among those excluded are alien visitors.
tourists, diplomats and students who enter the United States temporarily with no intention of abandoning their residence in a foreign country.

(c) Income and resources. The income and resources of an ineligible alien who would be considered a member of a household if he or she did not have ineligible alien status shall be considered in determining eligibility or level of benefits of the household in the same manner as the income and resources of a disqualified individual as set forth in § 273.11(c).

(d) * * * The resource shall be considered totally inaccessible to the household if the resource cannot practically be subdivided and the household's access to the value of the resource is dependent on the agreement of a joint owner who refuses to comply. For the purpose of this provision, ineligible aliens or disqualified individuals residing with the household shall be considered household members.

(e) Reporting illegal aliens. (1) The State agency shall immediately inform the local INS office whenever personnel responsible for the certification or recertification of household members that any member of a household is ineligible to receive food stamps because the member is present in the United States in violation of the Immigration and Nationality Act.

(2) When a household indicates inability or unwillingness to provide documentation of alien status for any household member, that member should be classified as an ineligible alien. When a person indicates inability or unwillingness to provide documentation of alien status, that person shall be classified as an ineligible alien. In such cases the State agency shall not continue efforts to obtain that documentation.

6. In § 273.8:
   a. The last sentence in paragraph (d) is revised;  
   b. Paragraph (e)(10)(ii) is removed, (e)(11)(ix) is redesignated as (e)(11)(viii) and new paragraphs (e)(11)(ix)-(e)(11)(x), and (e)(13) are added;  
   c. Paragraphs (h)(1)(iii), (h)(1)(vi) and (h)(4)(iii) are revised;  
   d. The first sentence of paragraph (i)(1) and paragraph (h)(2)(iii) are revised;  
   e. Paragraph (j) is revised.

The changes read as follows:

§ 273.8 Resource eligibility standards.
   * * * * * 
   (d) * * * The resource shall be considered totally inaccessible to the household if the resource cannot practically be subdivided and the household's access to the value of the resource is dependent on the agreement of a joint owner who refuses to comply. For the purpose of this provision, ineligible aliens or disqualified individuals residing with the household shall be considered household members.
   (e) * * * * * 
   (ix) Payments received by the Confederated Tribes and Bands of the Yakima Indian Nation and the Apache Tribe of the Mescalero Reservation from the Indian Claims Commission as designated under Pub. L. 94–433, Section 2.
   (x) Payments to the Passamaquoddy Tribe and the Penobscot Nation or any of their members received pursuant to the Maine Indian Claims Settlement Act of 1980 (Pub. L. 96–420, Section 5).
   * * * * * 
   (13) Where an exclusion applies because of use of a resource by or for a household member, or is an ineligible alien in accordance with § 273.4 who would be considered a member of a household, the exclusion shall also apply when the resource is being used by or for an ineligible alien or disqualified person whose resources are being counted as part of the household's resources. For example, work related equipment essential to the employment of an ineligible alien or disqualified person shall be excluded (in accordance with paragraph (e)(5) of this section), as shall one burial plot per ineligible alien or disqualified household member (in accordance with paragraph (e)(2) of this section).
   * * * * * 
   (h) Handling of licensed vehicles.
   * * * * * 
   (i) * * * * * 
   (ii) Necessary for long distance travel, other than daily commuting, that is essential to the employment of a household member (or ineligible alien or disqualified person whose resources are being considered available to the household), for example, the vehicle of a traveling sales person or a migrant farmworker following the work stream.
   * * * * * 
   (vi) Necessary to transport a physically disabled person need not have special equipment or be used primarily by the physically disabled person.
   * * * * * 
   * * * * * 

(iii) Any other vehicle used to transport household members (or an ineligible alien or disqualified household member whose resources are being considered available to the household) to and from employment, or to and from training or education which is preparatory to employment in compliance with the job search criteria.
   A vehicle customarily used to commute to and from employment shall be covered by this equity exclusion during temporary periods of unemployment. The equity value of licensed vehicles not covered by this exclusion, and of unlicensed vehicles not excluded by paragraphs (e)(3), (4), or (5) of this section, shall be attributed toward the household's resource level.
   * * * * * 
   (1) Transfer of resources. (1) At the time of application, households shall be asked to provide information regarding any resources which any household member (or ineligible alien or disqualified person whose resources are being considered available to the household) had transferred within the 3-month period immediately preceding the date of application.
   * * * * * 
   (2) * * * * * 
   (iii) Resources which are transferred between members of the same household (including ineligible aliens or disqualified persons whose resources are being considered available to the household).
   * * * * * 
   (j) Resources of nonhousehold members. The resources of nonhousehold members, defined in § 273.1(b), shall not be counted as available to the household unless the member is disqualified from the program for failing in accordance with § 273.16, or for failing to comply with the requirement to provide an SSN in accordance with § 273.6, or is an ineligible alien in accordance with § 273.4 who would be considered a household member if not for his or her ineligible alien status.

7. In § 273.9:
   a. A new paragraph (iv) is added to paragraph (b)(1), and paragraph (b)(3) is revised;  
   b. Paragraph (c)(10)(i) is revised, and new paragraphs (ix) and (x) are added to paragraph (c)(10).

The addition and revisions read as follows:
§ 273.9 Income and deductions.

(b) Definition of income. * * *

(i) * * *

(iv) Payments under Title I (VISTA, University Year for Action, etc.) of the Domestic Volunteer Service Act of 1973 (Pub. L. 93–113 Stat., as amended) shall be considered earned income and subject to the earned income deduction prescribed in § 273.10(e)(1)(B), excluding payments made to those households specified in paragraph (c)(1)(iii) of this section.

* * * * *

(3) The earned or unearned income of an individual disqualified from the household for fraud in accordance with § 273.16, for failing to comply with the requirement to provide an SSN in accordance with § 273.6, or of an individual determined to be an ineligible alien in accordance with § 273.4, shall continue to be counted as income, less a pro rata share for the individual. Procedures for calculating this pro rata share are described in § 273.11(c).

(c) Income exclusions. * * *

* * *

(10) * * *

(iii) Any payment to volunteers under Title II (RSVP, Foster Grandparents and others) of the Domestic Volunteer Services Act of 1973 (Pub. L. 93–113) as amended. Payments under Title I of that Act (including payments from such Title I programs as VISTA, University Year for Action, and Urban Crime Prevention Program) to volunteers shall be excluded for those individuals receiving food stamps or public assistance at the time they joined the Title I program, except that households which were receiving an income exclusion for a VISTA or other Title I Subsistence allowance at the time of conversion to the Food Stamp Act of 1977 shall continue to receive an income exclusion for VISTA for the length of their volunteer contract in effect at the time of conversion. Temporary interruptions in food stamp participation shall not alter the exclusion once an initial determination has been made. New applicants who were not receiving public assistance or food stamps at the time they joined VISTA shall have these volunteer payments included as earned income. The FNS National Office shall keep FNS Regional Offices informed of any new programs created under Title I and II or changes in programs mentioned above so that they may alert State agencies.

* * *

(ix) Payments by the Indian Claims Commission to the Confederated Tribes and Bands of the Yakima Indian Nation or the Apache Tribe of the Mescalero Reservation (Pub. L. 95–443).

(x) Payments to the Passamaquoddy Tribe and the Penobscot Nation or any of their members received pursuant to the Maine Indian Claims Settlement Act of 1980 (Pub. L. 96–420, Section 5).

8. In § 273.10, paragraph (b) is revised as follows:

§ 273.10 Determining household eligibility and benefit levels.

(b) Determining resources. Available resources at the time the household is interviewed shall be used to determine the household's eligibility.

* * * * *

9. In § 273.11:

(a) The last sentence of paragraph (e)[2][ii] is revised, paragraph (a)[4][ii] is removed, and paragraph (a)[4][iii] is redesignated as (a)[4][ii];

(b) Newly designated paragraph (a)[4][ii] is revised;

c. The title and introductory text of paragraph (c) and paragraph (c)[5] are revised;

d. Paragraph (d) is revised;

e. Paragraph (e)[5] is revised; and

f. Paragraphs (f)(5)(i) and (f)(5)(ii) are revised and a new paragraph (iii) is added to paragraph (f)(5).

The changes read as follows:

§ 273.11 Action on households with special circumstances.

(a) Self-employment income. * * *

(2) Determining monthly income from self-employment. * * *

(ii) * * * The cost of producing the self-employment income shall be calculated by anticipating the monthly allowable costs of producing the self-employment income. * * * * *

(4) Allowable costs of producing self-employment income. * * *

(ii) In determining net self-employment income, the following items shall not be allowable as costs of doing business:

(A) Payments on the principal of the purchase price of income-producing real estate and capital assets, equipment, machinery, and other durable goods;

(B) Net losses from previous periods;

(C) Federal, State, and local income taxes, money set aside for retirement purposes, and other work-related personal expenses (such as transportation to and from work), as these expenses are accounted for by the 15 percent earned income deduction specified in § 273.9(d)(2); and

(D) Depreciation.

(c) Treatment of income and resources of disqualified members.

Individual household members may be disqualified for fraud, or for failure to obtain or refusal to provide an SSN, or for being an ineligible alien. During the period of time that such household members are ineligible, the eligibility and benefit level of any remaining household members shall be determined as follows:

* * * * *

(5) Reduction or termination of benefits within the certification period. When an individual is disqualified within the household's certification period, the State agency shall determine the eligibility or ineligibility of the remaining household members based, as much as possible, on information in the case file.

(i) Fraud disqualification. If a household's benefits are reduced or terminated within the certification period because one of its members had been disqualified for fraud, the State agency shall notify the remaining members of their eligibility and benefit level at the same time the disqualified member is notified of his or her disqualification. The household is not entitled to a notice of adverse action but may request a fair hearing to contest the reduction or termination of benefits.

(ii) SSN disqualification. If a household's benefits are reduced or terminated within the certification period because one or more of its members required to provide an SSN is being disqualified for failure to meet the SSN requirement, the State agency shall issue a notice of adverse action in accordance with § 273.13(a)(2), which informs the household that the individual without an SSN is being disqualified, the reason for the disqualification, the eligibility and benefit level of the remaining members, and the actions the household must take to end the disqualification.

(iii) Ineligible aliens. If a household's benefits are reduced or terminated within the certification period because one or more of its members is being disqualified as an ineligible alien, the State agency shall issue a notice of adverse action, in accordance with § 273.13(a)(2), which informs the household that the individual is being disqualified, the reason for the disqualification, the eligibility and benefit level of the remaining members, and the actions the household must take to end the disqualification, if applicable.
(d) Treatment of income and resources of other nonhousehold members.

(1) For those nonhousehold members that have not been disqualified, such as SSI recipients in cash-out States, the income of the nonhousehold member shall not be considered available to the household. Cash payments from the nonhousehold member to the household will be considered income under the normal income standards set in § 273.9(b). Vendor payments, as defined in § 273.9(c)(1), shall be excluded as income. If the household shares deductible expenses with the nonhousehold member, only the amount actually paid or contributed by the household shall be deducted as a household expense. If the payments or contributions cannot be differentiated, the expenses shall be prorated evenly among persons actually paying or contributing to the expense and only the household’s pro rata share deducted.

(2) When the earned income of one or more household members and the earned income of a nonhousehold member are combined into one wage, the income of the household members shall be determined as follows:

(i) If the household’s share can be identified, the State agency shall count that portion due to the household as earned income.

(ii) If the household’s share cannot be identified the State agency shall prorate the earned income among all those whom it was intended to cover and count that prorated portion to the household.

(e) Residents of drug/alcoholic treatment and rehabilitation programs.

(5)(i) When the household leaves the center, the center shall provide the resident household with its ID card and any untransacted ATP cards. The household, not the center, shall be allowed to sign for and receive any remaining authorized benefits reflected on HIR cards. Also, the departing household shall receive its full allotment if issued and if no coupons have been spent on behalf of that individual household. These procedures are applicable at any time during the month. However, if the coupons have already been issued and any portion spent on behalf of the individual, and the household leaves the group living arrangement prior to the 16th day of the month, the center shall provide the household with its ID card and one half of its monthly coupon allotment. If the household leaves on or after the 16th day of the month and the coupons have already been issued and used, the household does not receive any coupons.

(ii) Once the household leaves the treatment center, the center is no longer allowed to act as that household’s authorized representative. The center, if possible, shall provide the household with a change report form to report to the State agency the household’s new address and other circumstances after leaving the center and shall advise the household to return the form to the appropriate office of the State agency within 10 days.

(iii) The treatment center shall return to the State agency any coupons not provided to departing residents at the end of each month. These returned coupons shall include those not provided to departing residents because they left either prior to the 16th and the center was unable to provide the individual with the coupons or they left on or after the 16th of the month.

* * *

(6) Residents of group living arrangements who require benefits under title II or title XVI of the Social Security Act.

(5)(i) When the household leaves the facility, the group living arrangement, either acting as an authorized representative or retaining use of the coupons on behalf of the residents (regardless of the method of application), shall provide residents with their ID cards (if applicable) and any untransacted ATP cards. The household, not the group living arrangement, shall be allowed to sign for and receive any remaining authorized benefits reflected on HIR cards. Also, the departing household shall receive its full allotment if issued and if no coupons have been spent on behalf of that individual household. These procedures are applicable at any time during the month. However, if the coupons have already been issued and any portion spent on behalf of the individual, and the household leaves the group living arrangement prior to the 16th day of the month, the facility shall provide the household with its ID card (if applicable) and one half of its monthly coupon allotment. If the household leaves on or after the 16th day of the month and the coupons have already been issued and used, the household does not receive any coupons. If a group of residents have been certified as one household and have returned the coupons to the facility to use, the departing residents shall be given a pro rata share of one-half of the coupon allotment if leaving prior to the 16th day of the month and shall be instructed to obtain ID cards or written authorizations to use the coupons from the local office.

(ii) Once the resident leaves, the group living arrangement no longer acts as his/her authorized representative. The group living arrangement, if possible, shall provide the household with a change report form to report to the State agency the individual’s new address and other circumstances after leaving the group living arrangement and shall advise the household to return the form to the appropriate office of the State agency within 10 days.

(iii) The group living arrangement shall return to the State agency any coupons not provided to departing residents at the end of each month. These returned coupons shall include those not provided to departing residents because they left on or after the 16th of the month or they left prior to the 16th and the facility was unable to provide them with the coupons.

* * *

10. In § 273.12, paragraph (a)(2) is revised, paragraph (a)(3) is redesignated as paragraph (a)(4), a new paragraph (a)(5) is added, and newly designated paragraph (a)(4) is revised. The additions and revisions read as follows:

§ 273.12 Reporting changes.

(a) Household responsibility to report.

* * *

(2) Certified households shall report changes within 10 days of the date the change becomes known to the household. Optional procedures for reporting changes are contained in § 273.12(f) for households in States with FNS-approved forms for jointly reporting food stamp and public assistance changes and food stamp and general assistance changes.

(3) An applying household shall report all changes related to its food stamp eligibility and benefits at the certification interview. Changes, as provided in paragraph (a)(1) of this section, which occur after the interview but before the date of the notice of eligibility, shall be reported by the household within 10 days of the date of the notice.

(4) State agencies shall not impose any food stamp reporting requirements on households except as provided in paragraph (a) of this section.

* * *

11. In § 273.16, paragraphs (d)(1) through (d)(10) are redesignated as paragraphs (d)(2) through (d)(10) respectively, and introductory paragraph of (d) is designated as (d)(1) and revised to read as follows:
§ 273.16 Fraud disqualification.

(d) Administrative disqualification. 

(1)(i) State agencies shall establish procedures for conducting fraud hearings which must conform with the procedures outlined in this section. State agencies must have a system to pursue alleged fraud cases through prosecution in addition to, or instead of, pursuing them through fraud hearings. An administrative fraud hearing or referral for prosecution action should be initiated by the State agency in cases in which the State agency has sufficient documentary evidence to substantiate that an individual has committed one or more acts of fraud as defined in paragraph (b) of this section. State agencies may conduct administrative hearings in cases in which the State agency believes the facts of the individual case do not warrant civil or criminal prosecution through the appropriate court system and in cases previously referred for prosecution that were declined by the appropriate legal authority. The State agency may initiate an administrative fraud hearing or refer a case for prosecution regardless of the current eligibility of the individual. The disqualification period for nonparticipants at the time of the fraud hearing or court decision shall be deferred until the individual applies for and is determined eligible for program benefits. Administrative fraud hearings shall not be conducted if the amount the State agency contends has been fraudulently obtained is less than $35 or if the value of coupons used to obtain ineligible items is under $35. The administrative fraud hearing may be conducted regardless of whether other legal action is planned against the household member.

(ii) (A) FNS shall allow a State agency to delete its administrative fraud hearing system if the State agency has entered into an agreement with the State Attorney General’s Office, or where necessary with the county prosecutor’s office, that provides that prosecution action should be brought by the State agency in cases where the State agency has determined that the facts of the case support a prosecution action.

(B) FNS shall allow a State agency to delete its administrative fraud hearing system if there is a State law that requires the referral of fraud cases for prosecution but only if the State agency demonstrates to FNS that it is actually referring cases for prosecution and that prosecutors are following up on the State agency’s referrals.

(C) A State agency that deletes its administrative fraud hearing system in accordance with paragraphs (d)(1)(ii)A or (d)(1)(ii)B of this section shall refer cases of alleged fraud for prosecution in accordance with its agreement with prosecutors, if one is in effect, or State law.

(iii) FNS may require a State agency to establish an administrative fraud hearing system if it determines that the State agency is not promptly or actively pursuing suspected fraud claims through the courts.

12. In § 273.18, paragraph (b)(3)(ii) is revised and a new paragraph (iii) is added to paragraph (e)(1).

The revision and addition read as follows:

§ 273.18 Claims against households.

(b) Nonfraud claims.

(iii) State agencies shall initiate collection action by sending the household a written demand letter, designed by FNS, which informs the household of the amount owed, the reason for the claim, how the household may pay the claim, and the household’s right to a fair hearing if the household disagrees with the State agency’s determination. FNS may grant deviations from the designed letter under conditions specified in § 273.2(b).

14. In § 274.10, paragraph (d) is revised to read as follows:

§ 274.10 Use or redemption of coupons by eligible households.

(d) Residents of certain institutions.

(1) Members of eligible households who are narcotics addicts or alcoholics and who regularly participate in a drug or alcoholic treatment and rehabilitation program may use coupons to purchase food prepared for them during the course of such program by a private nonprofit organization or institution which is authorized by FNS to redeem the coupons through wholesalers in accordance with § 278.1, or which redeems coupons at retail food stores as the authorized representative of participating households in accordance with § 278.2(g).

(2) Eligible residents of a group living arrangement may use coupons issued to them to purchase meals prepared especially for them at a group living arrangement which is authorized by FNS to redeem coupons at wholesalers in accordance with § 278.1, or which redeems coupons at retail food stores as the authorized representative of participating households in accordance with § 278.2(g).

(3) Residents of shelters for battered women and children as defined in § 271.2 may use their coupons to purchase meals prepared especially for them at a shelter which is authorized by FNS in accordance with § 278.1 to redeem at wholesalers, or which redeems at retailers as the authorized...
representative of participating households in accordance with § 278.2(g).

PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND BANKS

15. In § 278.1, a new sentence is added after the first sentence in paragraph (e) to read as follows:

§ 278.1 Approval of retail food stores and wholesale food concerns.

* * * * *

(e) * * * If an alcoholic treatment and rehabilitation program is located on an Indian reservation and the State does not certify or license reservation-based centers, approval to participate may be granted if the requirements of paragraphs (a), (b), and (d)(1) of this section are met and the program either is funded by the National Institute on Alcohol Abuse and Alcoholism (NIAAA) pursuant to Pub. L. 91–616, or was so funded and has subsequently been transferred to Indian Health Service (IHS) funding.* * *

Government Contractors: Affirmative Action Requirements
DEPARTMENT OF LABOR
Office of Federal Contract Compliance Programs

41 CFR Parts 60-1, 60-2, 60-4, and 60-30

Government Contractors: Affirmative Action Requirements

ACTION: Proposed rule.

SUMMARY: These proposed rules would revise selected sections of the Department’s regulations implementing Executive Order 11246, as amended, which establishes nondiscrimination and affirmative action requirements for Federal contractors and federally assisted construction contractors. These proposals are the result of OFCCP’s analysis of public comments received in response to an Advance Notice of Proposed Rulemaking (ANPR). The ANPR sought comment from the public regarding five issues affecting the contract compliance program. In brief, the issues concern the methodology to calculate the availability of minorities and women, the appropriateness of seeking back pay as a remedy for discrimination under the Executive Order, two issues concerning construction contractors, and the design criteria for job groups.

DATES: Comments must be received by May 24, 1982.

Note—In the past, OFCCP has often reviewed and considered all comments submitted, even if they were submitted after the close of the comment period. Due to the short time frame projected for completion of a final rule on the issues contained in this proposal, OFCCP may not, in this instance, be able to follow its prior practice of reviewing comments received after the closing date.

ADRESSES: Send comments to James W. Cisco, Director, Division of Program Policy, Office of Federal Contract Compliance Programs, U.S. Department of Labor, Washington, D.C. 20210.

SUPPLEMENTARY INFORMATION: On December 30, 1980, OFCCP published a final rule revising the regulations at 41 CFR Chapter 60 (see 45 FR 86216, corrected January 23, 1981, at 46 FR 7332) which implement Executive Order 11246, as amended, the Vietnam Era Veterans’ Readjustment Assistance Act of 1974 (hereinafter cited as 38 U.S.C. 2012), and section 503 of the Rehabilitation Act of 1973, as amended.¹ The rule was to take effect on January 29, 1981.

During the process of reviewing the deferred December 30, 1980, regulations, OFCCP determined that certain issues should be submitted to the public for comment prior to proposing rule changes on these items. This determination led to the issuance of the ANPR on July 14, 1981 (at 46 FR 36213) and the rule proposed today. On August 21, 1981, the ANPR was amended (at 46 FR 42490) to include one additional issue. The amended ANPR listed five issues: (1) the methods used by nonconstruction contractors to determine the availability of minorities and women; (2) the appropriateness of back pay as a remedy under Executive Order 11246; (3) Executive Order coverage of a Federal construction contractor’s nonfederally funded construction projects; (4) the methods used by nonconstruction contractors to develop job groups for their utilization analyses; and (5) the methods used to set goals for women and minorities in construction. The comment period for the ANPR ended September 14, 1981.

OFCCP has now developed proposed rules on these five issues. That proposal is described below. OFCCP expects to issue a single final rule, addressing the issues raised by the instant proposed rule, as well as the issues raised by the separate proposal published on August 25, 1981 (at 46 FR 42968). OFCCP tentatively projects publication of the final rule during the summer of 1982. The rule proposed today would revoke both the currently effective rules and the final regulations published December 30, 1980, to the extent that such final rules are inconsistent with this proposal.²

In drafting these proposed rules, OFCCP has attempted to clearly set forth all major obligations related to the five issues addressed which would be imposed on the public; OFCCP believes it is generally inappropriate to include such obligations in compliance manuals, as it has done in the past. OFCCP has also sought to establish minimum requirements and allow contractors the flexibility to achieve equal or greater compliance with OFCCP’s objective of increased employment opportunities for minorities and women through different technical means or universities. In accordance with Executive Order 12291, OFCCP has been mindful of cost burdens placed on the public by virtue of these rules and has sought to minimize the costs consistent with our mandate under Executive Order 11246.

The Equal Employment Opportunity Commission (EEOC) has reviewed this notice of proposed rulemaking and agreed to its publication for public comment. OFCCP will continue its close coordination with EEOC.

I. General Discussion of Comments Received

OFCCP received 167 comments in response to the ANPR. Of these, 57 came from contractors and other businesses, 33 from contractor associations, 25 from education and research agencies (including colleges and universities), 15 from individuals, 8 from law firms, 5 from state agencies, 7 from local government agencies, 4 from Federal government agencies, 4 from minority groups, 19 from women’s groups, 7 from other interest groups, 2 from private consulting firms, and 1 from a labor union.

II. Topic Analyses

Job Groups and the Workforce and Utilization Analyses (41 CFR 60-2.11)—The workforce and utilization analyses which nonconstruction contractors are required to develop are described in 41 CFR 60-2.11.

In developing goals and timetables for its affirmative action program (AAP), a nonconstruction contractor must first determine the availability of minorities and women for each job group at the establishment. OFCCP has traditionally required nonconstruction contractors to consider at least the eight factors found

¹ OFCCP has previously used the shorthand designation “section 402” to refer to sections of Vietnam Era Veterans’ Readjustment Assistance Act of 1972, as amended (section 503(a), Pub. L. 92-504, 86 Stat. 1077 [38 U.S.C. 2012], as amended by section 402, Pub. L. 92-502, 86 Stat. 1523 (38 U.S.C. 2010); and Pub. L. 96-659, 94 Stat. 2173). In this proposal, OFCCP has used the designation “38 U.S.C. 2012” to refer to the requirements under the Veterans Act. To refer to final rulemaking OFCCP intends to make conforming changes throughout 41 CFR Chapter 60.

² This proposal constitutes a separate proposal from that published on August 25, 1981. However, in
at 41 CFR 60-2.11(b) when determining availability.

Another significant step in the utilization analysis is the establishment of job groups. In formulating job groups, the contractor divided job titles, irrespective of the organizational components in which they are located, into job groups having similar work content, compensation rate, and promotional opportunity. The job group becomes the basic unit for analysis of availability and for the establishment of goals and timetables.

The regulation published today proposes a number of changes. Section 60-2.11 would be reorganized into three paragraphs to: (a) describe the workforce analysis; (b) prescribe the method for establishing job groups; and (c) describe the utilization analysis. In addition, terms frequently used in conjunction with assessing availability would be defined for the first time, and incorporated into the definitions section of the regulations at § 60-1.3.

Comments to the ANPR and the provisions of OFCCP's proposed rule are discussed separately below for the two issues. Because it is necessary to develop job groups before conducting the availability analysis, the job group issue is discussed first.

Establishing Job Groups—The amended ANPR, published on August 21, 1981, raised questions concerning the methods contractors should use to formulate job groups, including whether OFCCP should retain the current criteria for formulating job groups, whether higher level jobs should be grouped with those which serve as a promotional pool, whether a minimum number of employees should be prescribed for each job group, whether special standards for job groups should be permitted for smaller contractors, and whether individual standards should be established for each industry. One set of questions published with the original ANPR on July 14, 1981, asked whether OFCCP should consider establishment of standardized job groups; these questions are considered herein as part of the job group issue.

Twenty-one commentators believed that the current approach to job groups should be changed, while 11 believed that it should not be changed. Commentators favoring revision of the current approach generally supported using subdivisions of EEO-1 categories as job groups, broadening the elements used to formulate job groups (currently similarity of job content, wage rate, and opportunity), or arranging groups by promotional tracks (vertical job groups).

Nineteen commentators favored standardization of job groups and 40 opposed, those favoring standardized job groups generally favored using EEO-1 categories with some adjustments (usually subdivided for different salary levels). Only a very few commentators favored broadening of the occupational categories employed by the 1980 Census. Commentators opposing standardized job groups expressed the general sentiment that job groups among industries are too dissimilar for standardization, and that contractors must be allowed flexibility. The 24 commentators addressing this issue were evenly divided about whether criteria other than similarity of job content, wage rate, and opportunities should be considered in forming job groups. Those favoring other criteria tended to support subdivisions of EEO-1 categories, vertical job groups, or additional factors chosen by the employer.

Of the 20 commentators responding to the question of whether there should be a minimum size for job groups, 13 opposed such a standard. Some commentators cited statistical problems in establishing job groups which are excessively small, but they often said that such problems could be overcome by aggregating smaller job groups. Minimum job group sizes specified by commentators ranged from 15, through the more-often quoted 50, to 150. Commentators generally opposed separate standards for small contractors, as well as separate standards by industry.

The rule proposed today would reorganize existing § 60-2.11(b) into two subparagraphs. Also, two different alternative rules, Alternative A and Alternative B, are proposed for § 60-2.11(b)(1). On final rulemaking, it is presently contemplated that only one rule will be issued, and this rule may consist of one of the published proposed alternatives, another suggested alternative, or any combination thereof.

Current OFCCP regulations require that the contractor formulate job groups according to three criteria: similarity of content, wages and opportunity. Alternative A would retain these three criteria. Alternative B would provide for a system of vertical job grouping, whereby the contractor would be allowed to combine in the same group "all jobs having related content and wage structure and, for those jobs serving as the customary entry position into the group, similar prerequisites for hiring, promotion or other initial assignment thereto." Under this proposal, job groups would include entry level jobs requiring similar training and experience plus jobs which are usually or frequently filled by transfer or promotion from those entry level jobs.

The ANPR published on August 21, 1981, posed questions relating to OFCCP's current methods for establishing job groups. Since the concept of vertical job groups is newly proposed, commentators are asked to express their preference for one of the two alternative rules, and to discuss the advantages and disadvantages of both. In addition, commentators are asked to address themselves to the following specific questions on vertical job groups:

1. If the seniority provisions of a bargaining agreement allow movement laterally/vertically into all jobs covered by the agreement, should those jobs be considered a single job group? If not, how should this job group be segmented?

2. How would the analysis of availability be conducted for a job group: (a) which includes jobs with several skill levels (e.g., journeyman, professional and technical; or laborer, operator and craft); (b) in instances where there were several points of entry into the group; and (c) where availability varied at different levels of the job group?

3. How could the agency be assured that combining lower and higher level jobs into a vertical job group would not mask underrepresentations and concentrations?

4. How much movement from one lower level job to a job at a higher level would be expected before these two jobs could be combined into the same job group?

5. Given that job groups are based upon internal movement of employees, what additional information should the contractor submit at the desk audit phase of the compliance review to ensure the acceptability of job groups?

6. To what extent would the vertical job group methodology be appropriate for different workforces (e.g., blue collar versus white collar, structured lines of progression versus unstructured lines, matrix organizations)?

7. What would be the cost and other burdens incurred by contractors with a change to vertical job groups?

Section 60-2.11(b)(2) would provide general guidance to contractors in applying the design criteria for job groups, and would encourage contractors to establish job groups of at least 50 employees. While the current regulations provide no guidance about the optimum size for a job group, OFCCP's Federal Contract Compliance Manual directs enforcement personnel to consider job groups of at least 50 employees as optimum. Since goals are
established by job groups, and are based upon some percentage availability of minorities and women, a job group of at least 50 is frequently considered useful to avoid setting goals which are less than one whole person. In large workforces job groups of substantially more than 50 may be appropriate. However, it is not OFCCP's intent to require that contractors have at least 50 employees in all cases, because the configuration of the contractor's workforce may make it inappropriate to do so. Therefore, § 60-2.11(b)(2) simply encourages the use of job groups of at least 50 employees.

In the comments received in response to the job groups questions of the ANPR, a key concern was to ensure that contractors are provided sufficient flexibility. Section 60-2.11(b)(2) would achieve this goal by requiring OFCCP compliance personnel to defer to the contractor's formation of job groups unless there is specific evidence that the groups have been formed in violation of § 60-2.11(b)(1).

Workforce and Utilization Analyses—The 8-factor availability analysis has evoked criticism from contractors and minority and women's organizations alike. Many of these groups state, for example, that a computation involving eight separate factors can be complex, time consuming and costly; that some of the eight factors necessitate the use of statistical data which often inaccurately estimate the availability of minorities and women; that several of the factors duplicate each other; that some of the factors do not in fact measure availability; that the methodology for women varies without justification from the methodology for minorities; and that the regulations fail to provide adequate instructions as to how to carry out the required analysis. The agency frequently becomes involved in unproductive confrontations with contractors because of the complexity and subjectivity of the eight factor methodology. Such confrontations have not produced the desired results of the program.

In the last several years, OFCCP has studied ways of altering the utilization analysis to address the problems that have come to the attention of OFCCP. For example, in 1976 and 1978 OFCCP commissioned separate studies which made several recommendations as to the ways in which the determination of availability could be simplified and improved. As an additional part of this process, OFCCP sought public input in its ANPR.

The ANPR requested comment on several issues concerning the availability analysis, including how the 8-factor analysis should be altered, whether OFCCP should require contractors to weight factors in determining availability, how 1980 Census data should be used, whether job groups should be standardized, and whether contractors should consider "potential" availability.

The 8-factor availability analysis elicited the largest number of comments of any issue in the ANPR. Most of the commentators expressed a belief that some of the factors should be retained as part of some new way of assessing availability. Contractors and their associations generally favored some combination of "external" availability determined from requisite skill data among the population in general and "internal" availability determined from promoteable and/or transferable minorities and women already employed by the contractor. Constituency groups tended to favor a wider approach, keeping some of the factors designed to consider "potential" availability, as well as the requisite skill and promotable/transferable factors. Contractors were split on the question of whether "potential" availability of minorities and women should be considered.

In response to the question of whether OFCCP should require "weighting" of factors, 38 comments opposed specified weighting requirements and 22 favored them. Many commentators expressed the belief that, while the weighting of factors was necessary to reach a quantitative determination of availability, the relative measures applied to each factor should not be rigidly and uniformly established by OFCCP. In their view, the contractor should instead be premitted to establish its own system for evaluating the factors used to assess availability, and to demonstrate the validity of its method; OFCCP's role, they suggested, should simply be to provide technical assistance.

Several changes are proposed to § 60-2.11(a) regarding the workforce analysis. Currently, the workforce analysis is a listing of job titles in pay order for each department or similar organizational unit, indicating the pay rate for each job title. For each job title in the workforce analysis, the contractor indicates the number of employees by sex and by four minority designations. OFCCP would amend this section by stating that it is the contractor's option to list jobs either from low to high pay or high to low pay within departments or similar organizational units. The proposed rule would also change the minority designations found in this section to conform OFCCP's regulations to the designations of minorities currently used by OFCCP and other government agencies.

Currently, § 60-2.11(a) requires that the contractor include rates of pay for each job title. OFCCP's policy has been to permit coding of pay rates provided that the key to the code is made available to OFCCP's compliance officers offsite. To address contractor concerns about the confidentiality of pay rates, the rule proposed today would continue to permit the contractor to code pay rates, but would clarify what types of information the contractor must make available to OFCCP for offsite analysis. The proposed rule would provide that the contractor need not release confidential data relating to specific salaries of individual executives for OFCCP's offsite analysis, but that OFCCP may remove information offsite pertaining to the ranges of such salaries and may transcribe information pertaining to specific individual salaries and remove such transcriptions. In addition, the rule would provide that the limitations applicable to OFCCP would not limit discovery permitted under Part 60-30.

Most of proposed § 60-2.11(c) is derived from the current version of § 60-2.11(b). The focal point of the existing section is an 8-factor analysis for determining availability. Upon consideration of the ANPR comments, OFCCP proposes to maintain a factored methodology but to modify the specific factors in several respects. In addition, the proposal would codify existing OFCCP policy that the utilization analysis is to be conducted separately for women, total minorities, and for individual minority groups exceeding 2 percent of the population of the immediate labor area.

The current regulations require "[a]n analysis of all major job groups * * * (emphasis supplied); the proposal would delete the term "major" as a reflection of current OFCCP policy that all job groups at the establishment are to be analyzed for underutilization.

The introductory paragraph to § 60-2.11(c)(1) would state existing policy that analyses are to be conducted using the most current and discrete statistical information, and would provide examples of such data. Subparagraph (1) would then establish two possible methods for determining availability.

The first method of determining availability would be a four-factor analysis, replacing the eight factors currently listed in the regulations. The factors would be as follows:
a. The percentage of minorities and women in the civilian labor force in the immediate labor area;
b. The percentage of minorities and women with requisite skills in the immediate labor area;
c. The percentage of minorities and women with requisite skills in the relevant recruitment area;
d. The percentage of minorities and women among those promotable or transferable within the contractor's organization.

Most of the commentators responding to the ANPR expressed the opinion that it is proper for contractors to assess availability, and that some of the existing factors should be retained. The four factors above received support from a wide range of commentators, and OFCCP believes they represent the most meaningful indicia of internal and external availability. Further, OFCCP compliance officers would be able to perform the analyses more quickly and with greater attention to meaningful data.

As previously noted, commentators generally were opposed to a regulatory requirement prescribing specific weights for each factor. OFCCP believes there is merit to this position. Therefore, OFCCP is proposing that contractors will consider each factor, and will calculate availability by weighting all factors. Contractors could assign a zero weight to any factor inapplicable to the availability calculation.

The second method of determining availability would be an alternative available to contractors for their establishments located within Standard Metropolitan Statistical Areas (SMSAs). Rather than conduct the four-factor analysis, the contractor could, at its option, use a single availability estimate for all job groups at the establishment. The estimate would be the civilian labor force figure for minorities and women in the SMSA.

Some commentators, in addition to commenting on the current methodology for computing availability, suggested methods of their own. One oft-cited alternative was to collapse all external factors into one. OFCCP believes this option would be confusing to contractors because they would receive no guidance on what candidate pools OFCCP deems relevant to external availability. OFCCP accordingly is not proposing to adopt this approach.

Section 60-2.11(c)(2) would prohibit contractors from drawing their immediate labor area or relevant recruitment area, or assigning weights, in a way that would artificially exclude minorities and/or women.

A number of definitions critical to conducting the utilization analysis would be codified into the regulations, and included in the definitions section at §60-1.3. Those terms for which definitions are proposed are: "availability," "civilian labor force," "immediate labor area," "relevant recruitment area," "minorities and women with requisite skills," and "promotable or transferable."
agreed to establish a closer coordination of operations.

With respect to [2] above, OFCCP notes that unnecessary confrontations are already being greatly reduced, if not eliminated, by existing OFCCP operational procedures and policies. The fact that these proposed regulatory changes would establish uniform nationwide standards should further eliminate the bases for such confrontations by enabling for compliance officers to more easily make appropriate back pay determinations. In addition, the proposed rules would offer contractors the option of seeking an impartial arbitrator to determine the distribution of back pay awards.

With respect to [3] above, OFCCP has initiated vigorous training to increase its investigators’ skills, especially with respect to discrimination and back pay issues.

With respect to [4] above, OFCCP is of the view that while debarment is an important contractual sanction, it is not a substitute for remedies to individual victims because it does nothing to make whole the persons injured by the discrimination.

Finally, with respect to [5] above, OFCCP is not persuaded that the due process protections provided under the OFCCP hearing regulations in Part 41 CFR 60–30 are inadequate. Apart from the fact that these regulations are in many respects similar to the Federal Rules of Civil Procedure, a contractor which is dissatisfied with the recommended decision of the Administrative Law Judge has several opportunities to have that decision reviewed. Specifically, it may be reviewed by the Secretary of Labor, and the contractor may also seek judicial review of the final agency decision.

For these reasons, OFCCP remains unconvinced that back pay should be eliminated as an Executive Order remedy for discrimination.

OFCCP is, however, proposing today to amend several sections of its regulations which are concerned with back pay. First, a new § 60–1.71(a) would establish the new standards under which OFCCP will seek back pay for victims of discrimination. Paragraph [a](1) of this section would set out OFCCP’s general intent to seek back pay for identifiable victims of discrimination. Paragraph [a](2) would provide that the contractor’s back pay liability would be limited to a two year period which would commence either from the date OFCCP notified a contractor that a complaint had been filed against it or the date on which OFCCP notified the contractor of an alleged violation. With regard to notification of contractors of the filing of a complaint, OFCCP shall implement appropriate management instructions to ensure that notification is made promptly after receipt of the complaint. (This two year limitation is also contained in the August 25, 1981, proposal.)

The standards under which OFCCP would seek back pay and under which the contractor would be required to provide back pay are set out in paragraph [a](3), and would provide that only identifiable victims of discrimination who have suffered economic loss due to the contractor’s discriminatory actions will be entitled to back pay. The contractor’s monetary liability would be limited by the number of jobs, job opportunities, wage opportunities and/or career opportunities, as applicable, which would have been available but for the discriminatory policies and/or actions of the contractor. In addition, interim earnings or amounts earnable with reasonable diligence by the person persons discriminated against would operate to reduce the back pay allowable. This latter standard is the same as that currently found in Section 706 of Title VII. OFCCP requests that commentors direct their attention, in addition to matters set forth above, to the question of whether unemployment compensation received by discriminatees should be treated as interim earnings and therefore subject to set-off against a back pay award.

OFCCP expects that, in most cases, the contractor and OFCCP will be able to mutually agree on the extent of monetary relief and the identity of the persons who would be entitled to monetary relief under the regulations. In particular, OFCCP assumes that this will be so in cases of individual discrimination. However, OFCCP is aware that in a number of instances, particularly those involving a class of alleged discriminatees, problems have developed between contractor representatives and agency personnel, especially with regard to the identification of actual victims. This is not, however, a problem unique to the Executive Order program. A review of Title VII cases reveals that such determinations are extremely complex and often absorb a considerable amount of resources. Thus, OFCCP has been exploring a variety of ways to achieve a less costly, less confrontational, and more expeditious resolution of these matters.

One of these, the use of mutually agreed upon arbitration with a disinterested third party as arbitrator, appears to be a reasonable approach for certain situations. Therefore, this proposal would also permit in § 60–1.71(b) the voluntary arbitration of the issues of the extent of the monetary relief and the number and identity of persons entitled to back pay relief. For arbitration to take place, it would be necessary for the Director and contractor to agree in writing to arbitrate specified issues. If the Director and contractor are unable to agree to arbitration, the matter could proceed to an administrative law judge in accordance with existing procedures. OFCCP believes that this process would eliminate or significantly reduce confrontations between contractors and compliance officers and, at the same time, address contractor assertions that monetary settlement awards are made in a less than accurate fashion.

OFCCP contemplates that the arbitration process could be used at any time during the enforcement process. Thus, arbitration could be agreed to in a conciliation or settlement agreement (either before or after an administrative hearing). And, as discussed below, it could be agreed to in a consent decree in conjunction with the conditional reinstatement of a debarred contractor.

Section § 60.1.71(b)(2) provides the procedure for selecting an arbitrator. If the contractor and OFCCP cannot agree on an individual to conduct the arbitration, they would be required to select an arbitrator from a panel of arbitrators submitted to them by the Federal Mediation and Conciliation Service. The arbitrator so selected would be empowered to review and receive documentary evidence and to receive oral testimony on: (i) the specific identity of the discriminatees, (ii) the economic losses suffered by such discriminatees, and (iii) the extent of mitigation with respect to each victim.

The parties to the arbitration would be the Director and the contractor. In instances where arbitration followed an enforcement proceeding under Part 60–30, any person or organization previously granted party status by the Administrative Law Judge pursuant to § 60–30.24 could also participate in arbitration as a party.

In evaluating the evidence, the arbitrator would be governed by the standards in proposed § 60–1.71(a). After evaluating the evidence, the arbitrator would issue findings and determinations on the appropriateness of each specific entitlement claim. The findings and determinations would be forwarded to the Director, OFCCP, who would then issue a final administrative order. The Director would be required to adopt the arbitrator’s findings and determinations.
unless they were found to be arbitrary, capricious, or beyond the authority granted to the arbitrator.

Section 60–1.70 as proposed on August 25, 1981, set out detailed standards for reinstatement of debarred contractors. Paragraph (b)(1) of today's proposal would provide that reinstatement of debarred contractors may be conditioned upon the contractor entering into a consent decree pursuant to which it satisfies the Secretary, OFCCP, that it will establish and implement policies and actions sufficient to be in compliance with the provisions of the applicable program under which the contractor was debarred.

The proposal would also add a new section (b)(2) to incorporate the arbitration procedures contained in today's proposed § 60–1.71(b). Specifically, paragraph (b)(2) would permit a contractor to be conditionally reinstated as an eligible bidder upon entering into a consent decree if there are unresolved matters which have been remanded to an Administrative Law Judge for hearing or, where appropriate, referred to an arbitrator upon agreement by the contractor and OFCCP. When the matter involves back pay both the Administrative Law Judge and the arbitrator would be bound by the standards contained in proposed § 60–1.71(a).

As specified in paragraph (b)(3), where the contractor has entered into a consent decree as a condition of reinstatement, a breach of the consent decree could result in the original debarment being reinstated after a hearing before an Administrative Law Judge. Another change proposed for this section is the revision of paragraph (d) to provide that the decision on reinstatement would be made by the Director, rather than by the Director or the Secretary. This change is proposed to provide consistency within the reinstatement process.

In the interest of maximizing the effectiveness of the arbitration proposal, OFCCP requested comments on alternative approaches to resolution of this problem generally as well as on the following specific questions:

1. Would contractors be willing to participate voluntarily in arbitration of back pay disputes? If not, why not? If only under certain circumstances, under what circumstances and why?

2. Should arbitration be available at any time in the compliance/enforcement process or should it be only available prior to the initiation of an enforcement action, i.e. the filing of an administrative complaint?

3. Who should pay the arbitration costs? Should the costs be borne by the contractor above and beyond the amount set aside for the back pay awards? Should the back pay awards be reduced by an amount sufficient to pay the arbitration costs? Should the costs be shared by the contractor and the individual claimants on a formula basis?

4. Should there be review of the arbitrator's findings and determinations, or should they be final? If review is appropriate, should it be conducted by the Director, the Secretary, or an administrative law judge?

5. Should review of the arbitrator's findings and determinations be limited to the arbitrary and capricious standard set forth in the proposed rule? If not, what standard would be more appropriate and why?

6. Should the regulation set forth procedures for filing objections to the arbitrator's findings and determinations prior to a final administrative order?

7. Should the regulation require that the arbitrator issue his/her findings and determinations within an established period of time after the close of the arbitration hearing? If so, how much time would be appropriate?

8. Is the arbitration procedure as proposed workable in resolving problems of back pay? Will it result in cost and/or time savings for the contractor? If not, why not? Is there any way the proposed procedure can be improved?

9. Should these arbitration procedures apply to matters under 38 U.S.C. 2012 and section 503 as well as under Executive Order 11246?

10. Should these or similar arbitration procedures apply to matters other than back pay, e.g. resolution of disputes concerning reasonable commuting distance? If so, what types of disputes would be appropriate for resolution through arbitration?

Section 60–30.27 would be amended to provide that the Administrative Law Judge's recommended decision for debarment may be based solely upon a finding that the contractor violated the Executive Order, with or without a finding on whether back pay is required. However, if the Administrative Law Judge's findings do include individual back pay awards, such awards must be in accordance with the standards set out in § 60–1.71(a). Section 60–30.30 would be amended to provide that, where the identity of and/or the amounts of back pay due discriminatees have not been determined, the Secretary's final order must provide for further proceedings if the former contractor seeks reinstatement and complies with the provisions of § 60–1.70.

Coverage of Nonfederal Construction Contracts—The existing rule, which took effect on May 8, 1978 (43 FR 14888, April 7, 1978), and was amended effective November 3, 1980 (45 FR 65976, October 3, 1980), requires a nonexempt construction contractor to comply with 41 CFR Part 60–4 with regard to its total construction workforce even though some of the contractor's employees perform work on nonfederally involved construction contracts or subcontracts, and even though such nonfederally involved work may occur in geographic areas where the contractor does not currently have work on federally involved construction projects.

The ANPR posed several questions concerning this requirement. Of the 69 comments regarding whether the Executive Order should apply to nonfederal work, 15 came from contractors, all of whom were opposed to such application. Thirteen of 15 contractor associations also opposed application of the Executive Order. In contrast, 3 minority and 10 women's organizations supported coverage of nonfederal work, while none were opposed. Opponents of full coverage cited paperwork and compliance costs; expressed the belief that the contractual basis of Executive Order 11246 limits coverage to Federal contract work; and stated that no protection other than Title VII is necessary on nonfederally involved contracts. Commentators favoring coverage stated that the program should be consistently applied (as between supply and service contractors and construction contractors); that all of a company which contracts with the government receives the benefit of public money, and that public money should not be used to condone discrimination; and that full workforce coverage was necessary to prevent the employment of women and minorities solely on federally involved construction projects.

Thirty-seven commentators expressed opinions on whether OFCCP should make a distinction between Federal and nonfederal work in the same geographic area, with 4 commentators favoring distinctions and 33 opposing. Commentators favoring distinctions generally expressed the belief that nonfederal projects should not be covered, whether within the same geographic area as the Federal work or in different areas.

OFCCP, after reviewing the comments on this issue, has determined that coverage of a contractor's nonfederal work in geographic areas where the contractor does not currently have work on federally involved projects would place an unnecessary burden on contractors by increasing paperwork.
requirements and the costs attendant thereto. Coverage under the Executive Order of nonfederal contracts in areas absent a federally involved construction contract would require additional reporting requirements, and possibly certifications, to adequately track and monitor work performed under such contracts. Therefore, OFCCP is now proposing that the Executive Order apply only to a construction contractor's total workforce (federally involved and nonfederally involved) in the geographic area where the contractor is performing federally involved work. The proposal would exempt, by adding a new subsection to §60-1.5, a construction contractor's nonfederally involved construction contracts in geographic areas where the contractor does not currently have work on federally involved projects. Nonfederally involved work in the covered geographic area, whether that work was begun before or after the beginning of the federally involved construction contract, would be covered by the Executive Order during the period of time in which the contractor has a federally involved construction contract or subcontract for construction work in the same geographic area.

Accordingly, OFCCP proposes to amend 41 CFR 60-4.1, 60-4.2(d)(2), 60-4.3(e) and 60-4.6 to reflect that only nonfederal construction work located in a geographic area in which the contractor is performing federally involved construction work is subject to Executive Order regulatory requirements. In addition, OFCCP has proposed two new definitions for 41 CFR 60-1:3; "covered geographic area" (which refers to the area in which construction work would be subject to Executive Order requirements) and "federally involved construction contract" (which would be a shorthand form of reference for Federal and federally assisted construction contracts and subcontracts). Commentators are reminded that this proposal follows the section numbering scheme and wording found in the August 25, 1981 proposal. As a result, the threshold for affirmative action requirements and certain reporting requirements for construction contractors appear as they did in the August 25, 1981 proposal rather than as in the existing regulations.

Goals for Minorities and Women in Construction—In the ANPR, OFCCP requested comment on a number of questions concerning the establishment of goals for minorities and women in construction work. This proved to be the area in which commentators were least responsive. On the question of sources of a database for determining the availability of women and minorities for construction work, most commentators (33 of 39) stated that there is a better data source than the Census. Most of the suggestions, however, pointed toward refinements of Census data rather than replacement of this data base. Suggesions included adjusting the Census for an undercount of minorities, using EEO-4 data in conjuction with information about the number of graduates from training programs and unemployment data, and using unspecified sources of information relating to applicant skills and interests in construction work.

In response to the question of whether OFCCP should calculate goals for women based on information other than their participation rates in particular labor pools, 28 commentators responded, 21 favoring other information and 8 opposed. Those favoring other sources recommended using the civilian labor force participation rate, apprenticeship and training data, and more specific information pertaining to the availability of women for work in specific trades.

One question concerned the evidence that applicants and employees are not willing to travel to project sites (particularly from city residences to rural areas). Of the 22 commentators addressing this question, few presented anything more specific than existing commuting patterns, absentee rates, or their own experiences. A number of commentators felt that no general evidence exists supporting the proposition, or that economic circumstances (such as the area's level of unemployment) are factors in people's willingness to travel to worksites.

Questions concerning whether a single goal for particular areas is too high received a variety of responses, some relating to goals for a given locality and some relating to single goals for different trades. Some contractors believed that goals in their area bore little resemblance to demographic characteristics of the area. Others, addressing the question of single goals for all trades, stated that there is a significant difference among trades, and that a single goal for minorities or women is inappropriate. Constituency groups tended to express the opinion that the goals now established are baseline statistics which can be and have been exceeded when affirmative action has been mandated.

Another question asked was whether the minority experienced civilian labor force is an adequate data base for determining the availability of minorities for construction work. Of the 21 commentators on this issue, 15 stated that this measure is insufficient. The two women's groups and the single minority group commenting on this issue opposed the labor force measure, asserting that wider or more refined bases, such as total population statistics, education level adjustments to labor force statistics, and employment levels in laborer and helper positions should be used. Contractors suggested that refinements such as the number of minorities currently in construction work should be used.

A related question was whether Census data should be refined to take into account educational and/or experience levels of construction workers and the impact of these refinements on minority availability. The 17 commentators on this issue were divided almost evenly. Those agreeing with such refinements stated that information for determining availability should be as accurate as possible, and that information pertaining to educational levels and training would focus availability determinations on qualified applicants. Those opposed tended to believe that such measures would reflect historical discrimination, and would allow discrimination to persist, and would result in the use of quickly outdated data.

Upon considering the varying opinions expressed in the comments, OFCCP has elected to defer any change in minority goals until publication of 1990 Census data. At that time, any double counting will be eliminated, and other changes may also be proposed.

With respect to the goal for women, OFCCP today proposes that the goal remain at the 6.9% level, but that a revision to 41 CFR 60-4.2(d)(2) be made regarding the application of the goal. Under the existing rule, the goal applies separately to each trade. Under today's proposal, the goal would apply to all onsite construction work in the aggregate rather than on a trade-by-trade basis. In addition, the proposed rule contains a proviso that a contractor would be presumed to have made a good faith effort to achieve the goal if at least 6.9% of the total hours worked in "entry level" onsite positions (e.g., helpers, trainees and apprentices) were worked by women. This approach would recognize the continuing absence of significant numbers of women from the skilled construction trades and would therefore encourage contractor efforts to provide an entry for women into the construction field.

In addition to the amendment being proposed today, OFCCP considered a
number of alternative formulations for goals for women. For example, the 6.5% goal for women could be applied, as in the proposed rule, to all onsite construction work in the aggregate, but without the proposal's presumption of good faith effort based upon the participation of women in entry level positions. Alternatively, the 6.5% goal could, as in the current regulation, be applied on a trade-by-trade basis, but the contractor's achievement of at least 80% of the goal for each particular trade could raise a presumption of good faith effort.

OFCCP specifically invites public comment on the two options discussed above as well as on the proposed rule. In addition, any other proposed formulations for the application of goals for women in construction are welcomed.

**Construction Issues Not Contained in the ANPR—OFCCP proposes to amend § 60-4.3(a) (at paragraph 14 of the Standard Federal Equal Employment Opportunity Contract Specifications (Executive Order 11246)) to mention specifically the requirement that federally involved construction contractors submit the Form CC-257 (Quarterly Employment Utilization Report). OFCCP has required submission of the form on a monthly basis for some time. The rule proposed today would merely codify existing requirements that the form be submitted, but would amend the reporting period from monthly to quarterly.

OFCCP applauds contractors' voluntary participation in Hometown Plans as a means for increasing the utilization of minorities and women in the construction industry. To encourage further contractor participation in voluntary Hometown Plans, today's proposal would amend § 60-4.3 (at paragraph 3 of the Specifications) and § 60-4.5 to provide that each contractor or subcontractor participating in an approved Hometown Plan would be individually required to make a good faith effort to meet its fair share of the goals for utilization of minorities and women under the Plan. The current standard requires each participating contractor to make a good faith effort to achieve each goal under the Plan.

Finally, the proposal contains a clarification of certain requirements contained in § 60-4.8 to emphasize that makeup goals and timetables, and back pay and seniority relief for identifiable victims, must be included in conciliation agreements only where appropriate to remedy discrimination.

**III. Preliminary Regulatory Impact Analysis**

*Initial Regulatory Flexibility Act Analysis—*The regulations proposed today do not appear to require a regulatory impact analysis under Executive Order 12291 because they would, if adopted, result in substantial cost savings for contractors without significantly affecting employee protections under Executive Order 11246, 38 U.S.C. 2012 and section 503. The proposed revisions would, in fact, substantially improve the overall administration of the Federal contract compliance programs. Nevertheless, because of the interest of the public and of the government procuring agencies in the OFCCP programs, the Department has concluded that the regulation should be treated as a "major" rule under Executive Order 12291.

Accordingly, the Department has prepared a Preliminary Regulatory Impact Analysis (PRIA) to identify and quantify, where possible, the cost impact of the proposed changes and various alternatives that were explored, and to inform the public of the economic considerations supporting these proposed revisions in accordance with Executive Order 12291. The Department has combined its Preliminary Regulatory Impact Analysis with the required Initial Regulatory Flexibility Act Analysis (see 5 U.S.C. 603). Following is a summary of the Regulatory Impact/Regulatory Flexibility Analysis.

1. **Back pay—**After careful review of the ANPR comments, the Department, as an initial matter, reaffirmed its position that the Executive Order does indeed authorize the Secretary to seek back pay as a remedy for unlawful discrimination.

The Department next considered a number of options for determining the proper scope of back pay relief, including placing heavy reliance on the determination process in lieu of back pay as an incentive to end discrimination, seeking civil penalties or fines in place of back pay for violations of the Executive Order, and refraining entirely from investigating affected class problems and referring all discrimination matters to EEOC.

Another series of options revolved around specific criteria for applying back pay as a remedy, including whether to use back pay selectively in affected class claims and to focus on other remedies or sanctions authorized by the Executive Order.

Having determined that back pay was an appropriate remedy in all discrimination cases, the Department then examined the question of what standards should govern the use of that remedy. The two primary options considered were to continue the present OFCCP back pay policy, and to establish back pay standards consistent with those under Title VII.

Under today's proposal, OFCCP back pay standards would parallel those established under Title VII. The Department would limit the situations in which it would seek back pay to those that would constitute discrimination under accepted Title VII standards. The analysis, which is based upon a sampling of OFCCP back pay settlements, estimates the impact of the proposed changes in award eligibility criteria, mitigation requirements, and the limitation period for awards.

Adoption of the proposed Title VII back pay criteria would result in overall savings in back pay costs of 23 percent, or over $1.18 million in FY 1981. Average costs per affected contractor would fall by over $3,500. The average number of back pay beneficiaries affected by the proposal would be about 1,300 individuals in 1981. At the same time, however, average benefit levels would rise in systemic discrimination cases. In particular, where the group of potential discriminees is larger than available job opportunities, average benefits would increase over 22 percent from $1,142 to $1,355 per beneficiary.

2. **Coverage of Non-federally Involved Construction Contracts—**The primary options considered were elimination of all coverage of non-federally involved work, coverage of all non-federally involved work (the existing rule), and coverage of non-federally involved work only in a geographic area where the contractor is performing federally involved construction work.

The Department has proposed that while some coverage of non-federal work is necessary to maintain compliance in the construction industry, coverage should be limited to a Federal contractor's work force in a given geographic area. Of the 85,715 contractors performing both federally involved and non-federally involved construction work, an estimated 11,743 (approximately 15 percent of the total) perform work in more than one geographic area and would be affected by the rule. These contractors would experience substantial cost savings at their non-federally invoiced construction sites. The number of smaller contractors which would be affected by the proposed change is unknown, but the Department believes that today's proposal would carry substantial benefits in terms of reduced paperwork for smaller contractors.
Moreover, the proposed rule would simplify the proposed changes would significantly reduce the complexity, time requirements and cost of preparing the availability analysis, while lowering the confrontation that frequently ensues between OFCCP and contractors over the resulting availability levels. Resultant cost savings are estimated to range from $8.5 million to more than $9.6 million.

5. Job Groups—Among the alternatives considered were establishing a standardized definition of job groups based on the nine EEO-1 job categories (either alone or subdivided by salary bands), and establishing a minimum size for job groups.

Two alternative rules are proposed. Alternative A would maintain the present job group definition (i.e., similar content, wage rates and promotion opportunities). Alternative B would provide for "vertical" job groups. Whichever alternative is ultimately adopted, the regulation would be modified to clarify that job group design criteria are to be applied flexibly and to encourage contractors to establish job groups of at least 50 employees.

Alternative A, when combined with the 50 employee recommended size, would give contractors more flexibility without increasing costs or diminishing affirmative action efforts. For the "vertical" job group alternative, short-term costs could increase to the extent that contractors revise their job group analysis. However, long-run costs could drop where this approach (when combined with the other provisions) has the effect of decreasing the number of job groups.

Copies of the complete analysis may be obtained from the Director, Office of Federal Contract Compliance Programs, U.S. Department of Labor, Washington, D.C. 20210. The Department requests comments and additional information on all economic assumptions used in the analysis as well as any alternative suggestions designed to achieve the objectives of Executive Order 11246 at lower costs.

IV. Preparation of this Document
This document was prepared under the direction and control of Robert B. Collyer, Deputy Under Secretary of Labor for Employment Standards, and Ellen M. Shong, Director, Office of Federal Contract Compliance Programs.

V. List of Subjects
federally assisted construction contract or subcontract or any construction contract or subcontract that is necessary in whole or in part to the performance of a nonexempt Federal nonconstruction contract or subcontract.

* * * * *

"Immediate labor area" means that geographic area from which employees and applicants may reasonably commute to the contractor's establishment. The immediate labor area may include one or more contiguous cities, counties, or Standard Metropolitan Statistical Areas (SMSAs) or parts thereof, in which the establishment is located.

"Minorities and women with requisite skills" means minorities and women who have demonstrated they possess the skills for the job in question (e.g., through performance on another job), those who have completed training or educational programs designed to provide skills for the job in question, and those who could reasonably be expected to acquire those skills within a relatively short time after placement.

* * * * *

"Promotable or transferable" means, within the context of developing data for availability, those employees who are currently employed in a job group or groups which the contractor recruits, and may reasonably recruit its employees from, within the geographic area from which the contractor recruits, and may reasonably recruit its employees from, within the geographic area from which it currently employs minorities and women with requisite skills for the job in question.

* * * * *

"Relevant recruitment area" means the geographic area from which the contractor may reasonably recruit its employees. It is at least the area from which the contractor recruits and may include geographic areas not contiguous with the immediate labor area.

* * * * *

2. 41 CFR 60-1.5 is amended by adding a new § 60-1.5(a)(7) to read as follows:

§ 60-1.5 Exemptions.

(a) * * *

(7) Construction Contracts Outside of Covered Geographic Areas. The requirements of the Executive Order shall not be applicable to a construction contractor's nonfederally involved construction work performed in a Standard Metropolitan Statistical Area or Economic Area in which such contractor is not performing on a federally involved construction contract.

* * * * *

3. 41 CFR Part 60-1 is amended by adding a new 41 CFR 60-1.70 (b) and (d) to read as follows:

§ 60-1.70 Petition for reinstatement of debarred contractors.

* * * * *

(b)(1) Rescission of the debarment order and reinstatement of the contractor's eligibility for further contracts that may be conditioned on the contractor entering into a consent decree pursuant to which it satisfies the Director that it has established and will implement personnel and employment policies in compliance with the provisions of the Order, 38 U.S.C. 2012, or section 503. In carrying out his/her responsibilities under this section, the Director may require that compliance reviews be conducted of the contractor's establishments, and that the contractor supply copies of any information relevant to determining its compliance with the Order, 38 U.S.C. 2012, or section 503.

Reinstatement also may be conditioned on a program of compliance which may include meeting requirements not specifically mentioned in the debarment order where meeting these requirements is necessary to achieve compliance with the Order, 38 U.S.C. 2012, or section 503.

(2) A debarred contractor may be conditionally reinstated as an eligible bidder if it satisfies the Director that it has brought itself into full compliance with all matters except for those which will be subject to a subsequent hearing or arbitration under this section. Where the contractor petitions for reinstatement, and the debarment was based on a determination that the debarred contractor has discriminated in violation of the Executive Order, and the extent of the monetary relief or the number or identity of persons entitled to relief has not been determined, the matter shall be remanded to the Administrative Law judge or, if the Director and contractor so agree, referred to an arbitrator in accordance with § 60-1.71(b) of this part. When there are other issues determined by the Director to be appropriate for hearing, the Director may refer the matter to an Administrative Law judge. On remand, the Administrative Law judge shall proceed in accordance with the procedures in §§ 60–30.25 through 60–30.30 of this chapter, except that reasonable discovery shall be allowed with respect to those issues which will be determined on remand. Recovery of back pay in any proceedings shall be governed by § 60–1.71(e) of this part. Prior to the conditional reinstatement by the Director, the debarred contractor must enter into a consent decree which provides for all relief other than that which is the subject of any hearing on remand or referral.

(3) A breach of the consent decree may result in reinstatement of the original debarment after a hearing before an Administrative Law judge.

* * * * *

(d) The Director's decision on the petition for reinstatement shall constitute a final administrative order.

* * * * *

4. 41 CFR Part 60-1 is amended by adding a new 41 CFR 60-1.71 to read as follows:

§ 60–1.71 Back pay.

(a)(1) OFCCP will seek back pay for identifiable victims of discrimination.

(2) OFCCP will not seek back pay for more than two years prior to the date on which OFCCP (or its predecessor compliance agency) notified the contractor of receipt of a complaint filed pursuant to § 60–1.61 (or its predecessor § 60–1.21), § 60–250.23 (or its predecessor § 60–250.2), or § 60–741.23 (or its predecessor § 60–741.26), or the date on which OFCCP notified the contractor that it was in violation of the Executive Order, 38 U.S.C. 2012, or section 503.

(3) The contractor will not be required to provide back pay and OFCCP will not seek back pay except under the following conditions: (i) Only identifiable victims who have suffered economic loss due to the contractor's discriminatory actions will be entitled to back pay; (ii) Monetary liability will be limited to the number of jobs, job opportunities, wage opportunities and/or career opportunities which would have been available to victims, but for the discrimination; (iii) Interim earnings or amounts earnable with reasonable diligence by the person or persons discriminated against shall operate to reduce the back pay allowable.

(b)(1) If a dispute arises between OFCCP and the contractor as to the extent of the monetary relief or the number or identity of persons entitled to relief, the Director and the contractor may agree in writing at any time to select an impartial arbitrator whose duties shall be to receive testimony and factual evidence on (i) the specific identity of the discriminatees, (ii) the economic losses suffered by such discriminatees, and (iii) the extent of mitigation with respect to each victim. The arbitrator shall then issue findings and determinations on the matter of individual back pay awards.

(2) If the Director and the contractor are unable to agree upon the identity of a specific individual to serve as an arbitrator, they shall request that the Federal Mediation and Conciliation Service submit, pursuant to 29 CFR 1404.12 a panel of arbitrators qualified in employment discrimination matters. The Director and the contractor shall
alternately strike a name from the
submitted panel until one remains.
Where the Director and the contractor
find the panel unacceptable, or where
the arbitrator selected is unable to
serve, a new panel may be requested.
(3) The parties to the arbitration shall
be the Director and the contractor. In
instances where arbitration follows an
enforcement proceeding under Part 60-
30, any person or organization granted
party status by the Administrative Law
Judge pursuant to 41 CFR 60-30.24 may
also participate in arbitration as a party.
Parties may be represented by counsel.
(4) A transcription of the arbitration
proceedings shall be prepared.
(5) The arbitrator's findings and
determinations on individual back pay
awards shall be served on the parties
and, together with the transcript and
any exhibits, shall be certified to the
Director. The Director shall adopt the
arbitrator's findings and determinations
as a final administrative order unless
he/she finds that they are arbitrary,
capricious, or beyond the authority
granted to the arbitrator: Provided, That
if the Director takes no action within 30
days of receipt of the findings and
determinations, they shall automatically
become final. The final administrative
order shall be served on all parties.

PART 60-2—AFFIRMATIVE ACTION
PROGRAMS
Authority: Sec. 201, EO 11246 (30 FR 12359),
as amended by EO 11375 (32 FR 14303) and
EO 12086 (43 FR 46501).
5. 41 CFR 60-2.11 is retitled and
revised to read as follows:
§ 60-2.11 Required workforce and
utilization analyses.
Based upon the government's
experience with compliance reviews
under the Executive Order program and
the contractor reporting system,
minority groups are most likely to be
underutilized in departments and jobs
within departments that fall within the
following Employer's Information Report
(EEO-1) designations: officials and
managers, professionals, technicians,
sales workers, office and clerical and
craftsmen (skilled). As categorized by
the EEO-1 designations, women are
likely to be underutilized in departments
and jobs within departments as follows:
officials and managers, professionals,
technicians, sales workers (except over-
the-counter sales in certain retail
establishments), craftsmen (skilled and
semi-skilled). Therefore, the contractor
shall direct special attention to such
jobs in its analysis and goal setting for
minorities and women. Affirmative
action programs must contain an
analysis of the establishment's
workforce and an analysis of
the establishment's utilization of minorities
and women.
(a) Workforce analysis. The
contractor shall list each job title as it
appears in applicable collective
bargaining agreements or payroll
records, ranked according to pay within
each department or other similar
organizational unit. Ranking may be
according to ascending or descending
order of pay, but must include
department or unit supervision. All job
titles, including all managerial job titles,
must be listed. If there are separate
work units or lines of progression within
a department, a separate list must be
provided for each such work unit or line,
including unit supervisors. For lines of
progression, there must be indicated the
order of jobs in the line through which
an employee could move to the top of
the line. Where there are no formal
progression lines or usual promotional
sequences, job titles shall be listed by
department, job families, or disciplines,
in order of wage rates or salary ranges
(in either ascending or descending
order). For each job title, the total
number of incumbents, the total number
of male and female incumbents, and the
total number of male and female
incumbents in each of the following
groups must be listed: Blacks not of
Hispanic origin; Hispanics; Asians or
Pacific Islanders: American Indians or
Alaskan Natives. The wage rate or
salary range for each job title must be
given or a salary code indicated. The
contractor may maintain onsite
confidential (i.e., not in the public
domain) information pertaining to
specific salaries for individual
executives. OFCCP shall not remove
such data regarding individual
executives for offsite analysis unless the
contractor agrees: Provided, That the
(1) OFCCP may require the contractor to
certify that (1) the information is
confidential; (2) the contractor will not
use the information for any purposes
other than those required for the
compliance program. (2) The
contractor may maintain confidential
information pertaining to ranges of such
executive salaries or keys to codes relating
to such ranges. (2) OFCCP may transcribe data
pertaining to specific salaries and take
the transcriptions offsite, and (3) the
limitations described herein shall not
serve to limit discovery permitted under

Note.—Two provisions, "Alternative A"
and "Alternative B" are being proposed for
§ 60-2.11(b)(1). This subsection would set
forth the requirements for developing job
groups. OFCCP has not taken a position as to
which alternative will be adopted on final
rulemaking. However, on final rulemaking
only one rule will be promulgated. This rule
may consist of one of the published proposed
alternatives, any other suggested alternative,
or any combination thereof. Accordingly,
comments are invited on both proposals and,
in addition, any other proposals are invited.

Alternative A
(b) Establishing job groups. (1) The
contractor shall divide the workforce of
the establishment into job groups, taking
into consideration the following criteria:
(i) the similarity of work content among
jobs; (ii) the similarity of compensation
rates among jobs; and (iii) the similarity of
promotional opportunities among
jobs.
Alternative B
(b) Establishing job groups. (1) A job
group shall consist of all jobs having
related content and wage structure and,
for those jobs serving as the customary
entry position into the group, similar
prerequisites for hiring promotion or
other initial assignment thereinto. That is,
job groups should include entry level jobs
requiring similar training and
experience plus jobs which are usually
or frequently filled by transfer or
promotion from those entry level jobs.
(2) Consideration of the criteria above
should be based upon the specific
circumstances present at each
establishment. Contractors are
encouraged to establish, to the extent
feasible, job groups of at least 50
employees. The contractor shall be
provided flexibility to ensure that job
groups are appropriate. OFCCP
compliance personnel shall defer to the
contractor's formation of job group
unless there is specific evidence that the
groups have been formed in violation of
§ 60-2.11(b)(1).
(c) Utilization analysis. The
contractor shall conduct an analysis of
all job groups at the establishment to
determine whether minorities or women
are currently underutilized in any of
the job groups. The contractor shall conduct
such analysis separately for women,
total minorities, and for individual
minority groups exceeding 2 percent of
the population of the immediate
area. For each job group the contractor
shall state whether or not there is
underutilization. Where underutilization
is identified, the contractor shall
proceed in accordance with this Part.
(1) Determining availability. To
develop those job groups which are
underutilized, the contractor must first
determine the availability of minorities
and women for each job group.
Normally, analyses are conducted using
the most current and discrete statistical
information, such as census data, data
from local job service offices, or data
from colleges or other training
institutions.
For each establishment, the contractor
shall choose one of the following
methods for determining availability:
(f) Four-factor method. In determining availability under this method, the contractor shall consider each of the following factors:
(A) The percentage of minorities and women in the civil labor force in the immediate labor area;
(B) The percentage of minorities and women with requisite skills in the immediate labor area;
(C) The percentage of minorities and women with requisite skills in the relevant recruitment area;
(D) The percentage of minorities and women among those promotable or transferable within the contractor’s organization.

The contractor shall conduct the analysis by assigning a weight to each factor, the total of all weights being 100 percent, or one. Factors which are inapplicable due to the availability calculation may receive a zero weight. As part of its affirmative action program, the contractor shall provide a written rationale for the weight it assigns each factor.

(ii) Civilian labor force method. As an alternative to the four-factor analysis, for establishments located within a Standard Metropolitan Statistical Area (SMSA), the contractor may elect to use the civilian labor force data for the SMSA as availability for all job groups.

(2) The contractor may not draw its immediate labor area and its relevant recruitment area or assign weights to the four factors is such a way as to artificially exclude minorities or women.

PART 60-4—CONSTRUCTION CONTRACTORS—AFFIRMATIVE ACTION REQUIREMENTS

Authority: Sec. 201, EO 11246 (30 FR 12319), as amended by EO 11375 (32 FR 14303) and EO 12080 (43 FR 46501).

6. 41 CFR 60-4.1 is revised to read as follows:

§ 60-4.1 Scope and application.

This Part applies to all contractors and subcontractors which hold any Federal or federally assisted construction contract in excess of $10,000. The regulations in this Part are applicable to all of a construction contractor’s or subcontractor’s construction employees who are engaged in onsite construction, including those construction employees who work on a nonfederally involved construction site in the covered geographic area. This Part also establishes procedures which all Federal contracting officers and all applicants, as applicable, shall follow in soliciting for and awarding Federal or federally assisted construction contracts. Procedures also are established which administering agencies shall follow in making any grant, contract, loan, insurance, or guarantee involving federally assisted construction which is not exempt from the requirements of Executive Order 11246, as amended. In addition, this Part applies to construction work performed by construction contractors and subcontractors for Federal nonconstruction contractors and subcontractors if the construction work is necessary in whole or in part to the performance of a nonconstruction contract or subcontract.

7. 41 CFR 60-4.2(d)(2) is amended by revising paragraphs 2 and 3 of the “Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity (Executive Order 11246) (Part II)” to read as follows:

§ 60-4.2 Solicitations.

(i) Multiplies by

(2) Multiplies by

Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity (Executive Order 11246) (Part II)

(a) Goals. The contractor shall provide for the availability of women, expressed as a percentage of the total number of hours worked (including paid classroom time) by the contractors’ aggregate workforce in each trade on all construction work in the covered geographic area, as are as follows:

Goal

Timetable (if applicable)

Covered geographic area

* The contractor shall consider each of the following factors:

(ii) Goals for Women. The goals, and if applicable, timetables for participation of women, expressed as a percentage of the total number of hours worked (including paid classroom time) by the contractors’ aggregate workforce in each trade on all construction work in the covered geographic area, are as follows:

Goal

Timetable (if applicable)

Covered geographic area

* Provided. That the contractor shall be presumed to have made a good faith effort to achieve the goal if at least one-half of the total hours worked in entry level onsite positions (e.g., helpers, trainees and apprentices) are worked by women.

b. These goals are applicable to all of the contractor’s construction work, whether or not it is federally involved, performed in the covered geographic area if the contractor holds a federally involved construction contract or subcontract of $50,000 or more, and if during any six consecutive months of the 12 calendar months preceding the award of the contract or subcontract, the contractor’s or subcontractor’s employment of trade workers (both on and off site, and including laborers) totalled 20,000 or more hours. Nonfederally involved construction work in the covered geographic area is covered during the period of time in which the contractor has a federally involved construction contract or subcontract in the same covered geographic area. Nonfederally involved work is covered whether it was begun before or after the beginning of such federally involved construction contract.

c. The Contractor’s compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a), and its efforts to meet the goals.

d. The hours of minority employment and training must be substantially uniform throughout the length of the contract, and in each trade, and the contractor shall make a good faith effort to employ minorities evenly on each of its projects. The transfer of minority and female employees as applicable, shall follow in making any contract or subcontract of $10,000, and if during any six consecutive months of the 12 calendar months preceding the award of the contract or subcontract, the contractor’s or subcontractor’s employment

e. 41 CFR 60-4.3(a) is amended by revising the introductory text, and by revising an introductory paragraph and paragraphs 6, 7, 8, and 9 of “Contractor’s Compliance with the Federal Equal Employment Opportunity Construction Contract Specifications (Executive Order 11246)” to read as follows:

§ 60-4.3 Equal opportunity clauses.

(a) The equal opportunity clause published at 41 CFR 60-1.4(a) of this part is required to be included in and is part of, all Federal contracts and subcontracts, including construction contracts and subcontracts in excess of $10,000. The equal opportunity clause published at 41 CFR 60-1.4(b) is required to be included in, and is a part of, all nonexempt federally assisted construction contracts and subcontracts in excess of $10,000. In addition to the clauses described above, all Federal contracting officers, all applicants and all nonconstruction contractors, as applicable, shall include the specifications set forth in this section in all federally involved construction contracts.
contracts of $50,000 or more to be performed in geographic areas designated by the Director pursuant to §60-4.6 of this part.

Standard Federal Equal Employment Opportunity Construction Contract Specifications (Executive Order 11246)

These specifications are applicable to all construction contractors and subcontractors (i) having a federally involved construction contract or subcontract of $50,000 or more; and (ii) employing trade workers (both on and off site, and including laborers) for a total of 20,000 hours of work, in any six (6) consecutive month period during the 12 calendar months preceding the award of the contract or subcontract.

3. If the contractor is participating (pursuant to 41 CFR §60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered geographic area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each contractor or subcontractor participating in an approved Plan is individually required to comply with its obligations under the EEO clause, and to make a good faith effort to meet its fair share of the goals for utilization of minorities and women under the Plan. The overall good faith performance by other contractors or subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve its fair share of the Plan's goals and timetables.

4. The contractor shall implement the specific affirmative action standards provided in paragraphs 7 through 1 of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of work (including paid classroom time) of minorities and women the contractor shall reasonably be able to achieve on both federally involved and nonfederally involved projects in the covered geographic area. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any Office of Federal Contract Compliance Programs' office or from Federal procurement contracting officers. The contractor is expected to make substantially uniform progress in meeting its goals.

14. The contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports, including the Form CC-257 (Quarterly Employment Utilization Report) or such form as may hereafter be promulgated in its place, relating to the provisions hereof as may be required by the government and to keep records. Records shall at least include for each employee the name, address, telephone numbers, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice, trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in any easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

9. The introductory text of 41 CFR §60-4.5(a) is revised to read as follows:

§60-4.5 Hometown plans.

(a) A contractor participating, either individually or through an association, in an approved Hometown Plan (including heavy highway affirmative action plan) shall comply with its affirmative action obligations under Executive Order 11246 by complying with its obligations under the Plan: Provided, That each contractor or subcontractor participating in an approved Plan is individually required to comply with the equal opportunity clause set forth in 41 CFR 60-1.4; to make a good faith effort to meet its fair share of the goals for utilization of minorities and women under the Plan; and that the overall good performance by other contractors and subcontractors toward a goal in an approved Plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve its fair share of the Plan's goals and timetables.

If a contractor is not participating in an approved Hometown Plan, it shall comply with the specifications set forth in §60-4.3 of this Part and with the goals and timetables for the appropriate area as listed in the notice required by 41 CFR §60-4.2 with regard to that trade. For the purposes of this Part §60-4, a contractor is not participating in a Hometown Plan for a particular trade if:

10. 41 CFR §60-4.6 is revised to read as follows:

§60-4.6 Goals and timetables.

The Director, from time to time, shall issue goals and timetables for minorities and women which shall be based on appropriate workforce, demographic or other relevant data and which shall cover construction contracts performed in specific geographic areas. The goals, which shall be applicable to a covered contractor's or subcontractor's entire workforce (federally and nonfederally involved) which is working in the area covered by the goals and timetables, shall be published as notices in the Federal Register, and shall be inserted by the contracting officers and applicants, as applicable, in the Notice required by 41 CFR §60-4.2. Nonfederally involved construction work in the covered geographic area is covered during the period of time in which the contractor has a federally involved construction contract or subcontract for construction in the same covered geographic area. Nonfederally involved construction work is covered whether it was begun before or after the beginning of federally involved construction contract.

11. 41 CFR §60-4.8 is revised to read as follows:

§60-4.8 Show cause notice.

If an investigation or compliance review reveals that a construction contractor or subcontractor has violated the Executive Order, any contract clause, specifications or the regulations in this chapter and if administrative enforcement is contemplated, the Director shall issue to the contractor or subcontractor a notice to show cause which shall contain the items specified in paragraph (i)-(iv) of 41 CFR §60-1.64(c)(1). If the contractor does not show good cause within 30 days, or in the alternative, fails to enter into an acceptable conciliation agreement which includes where appropriate to remedy discrimination, make up goals and timetables, and backpay and seniority relief for identifiable victims or any of the above, OFCCP shall follow the procedure in 41 CFR §60-1.68: Provided, That where a conciliation agreement has been violated, no show cause notice is required prior to the initiation of enforcement proceedings.

PART 60-30—RULES OF PRACTICE FOR ADMINISTRATIVE PROCEEDINGS TO ENFORCE EQUAL OPPORTUNITY UNDER EXECUTIVE ORDER 11246, 38 U.S.C. 793, AND SECTION 503

Authority: Sec. 201; EO 11246 (30 FR 12319), as amended by EO 11275 (32 FR 14303) and EO 12086 (43 FR 46501); 38 U.S.C. 2012, and Section 503

12. 41 CFR §60-30.27 is revised to read as follows:

§60-30.27 Recommended decision.

Within a reasonable time after the filing of briefs, the Administrative Law Judge shall recommend findings, conclusions, and a decision. These recommendations shall be certified, together with the record to the Secretary of Labor for a final Administrative Order. The recommended findings, conclusions, and decisions shall be served on all parties and amici to the
proceeding. In appropriate circumstances, including the existence of a class of discriminatees, the decision may include a finding of violation, with or without a finding on whether back pay is required, and a recommendation of debarment: Provided, That if findings on individual entitlements to back pay and the amounts owing to individual class members are made, they shall be made in accordance with § 60-1.71(a) of this chapter.

13. 41 CFR 60-30.30 is revised to read as follows:

§ 60-30.30 Final administrative order.

(a) After expiration of the time for filing exceptions, and responses thereto, the Secretary or the Under Secretary, in the absence of the Secretary or if the Secretary disqualifies himself or herself for any reason, shall make a final Administrative Order which shall be served on all parties. If the Secretary concludes that the defendant has violated the Order, 38 U.S.C. 2012 or section 503, an Administrative Order shall be issued which shall enjoin the violations, and require the contractor to provide whatever remedies are appropriate, including back pay and affirmative action relief, and which shall impose whatever sanctions are appropriate, or any of the above. In any event, failure to comply with the Administrative Order shall result in the immediate termination and suspension of the defendant's contracts and/or debarment of the defendant from further contracts: Provided, That the portion of any order under Executive Order 11246 terminating, cancelling, or suspending contracts shall not become effective until the consultation requirements of section 209(a)(5) of the Order, as amended by Executive Order 12086, have been satisfied.

(b) where a debarment is based upon a contractor's employment discrimination against individuals or a class of discriminatees, and where the identity of such individuals and/or the amounts owing to them have not been determined, the Secretary's Order shall provide that, in the event the former contractor seeks reinstatement as an eligible bidder pursuant to § 60-1.70 of this chapter, such determination of individuals or amounts owing will be made pursuant to § 60-1.71 of this chapter. [FR Doc. 82-11267 Filed 4-22-82 8:46 am]
Part VII

Department of Education

Training Program for Special Programs Staff and Leadership Personnel
DEPARTMENT OF EDUCATION

34 CFR Part 642

Training Program for Special Programs Staff and Leadership Personnel

AGENCY: Education Department.

ACTION: Final regulations.

SUMMARY: The Secretary of Education is issuing final regulations for the Training Program for Special Programs Staff and Leadership Personnel. These final regulations reflect statutory changes contained in the Education Amendments of 1980. The regulations will govern the funding of grants to meet the training needs of Special Programs staff and leadership personnel employed in or preparing for employment in projects under the Special Programs for Students from Disadvantaged Backgrounds.

EFFECTIVE DATE: Unless Congress takes certain adjournments, these regulations will take effect 45 days after publication in the Federal Register. If you want to know the effective date of these regulations, call or write the Department of Education contact person. At a future date the Secretary will publish a notice in the Federal Register stating the effective date of these regulations.

SUPPLEMENTARY INFORMATION: The Education Amendments of 1980 changed the Training Program from a contract program to a discretionary grant program. These regulations reflect this change, as well as other statutory changes made by the Amendments.

These regulations incorporate by reference Parts 75 and Part 77 of the Education Department General Administrative Regulations (EDGAR); therefore, the regulations do not repeat certain types of information and requirements found in EDGAR.

However, the general selection criteria in EDGAR (§ 75.202 through 75.206) have been repeated in these regulations for the convenience of the applicant (§ 642.31 (a) through (e)).

In order to meet the training needs of local areas, the Secretary has allowed for flexibility in these regulations. As explained in § 642.34, the Secretary may announce in the application notice published in the Federal Register funding priorities for that year. The Secretary establishes these priorities after consultation with representatives of regional and State associations of professionals having special knowledge of the training needs of the staff and leadership personnel of projects under the Special Programs.

To avoid any implication of overregulation, the Secretary has deleted from these final regulations the list of topics that appeared in § 642.11 of the notice of proposed rulemaking. As an aid to potential applicants, the following is a list of examples of Training Program topics the Secretary considers for funding unless the Secretary specifies in the annual application notice topics for funding priority:

(a) Project evaluation.
(b) Assessments of the needs of a project, its staff, and its participants.
(c) Curriculum design.
(d) Techniques of instruction.
(e) Academic counseling.
(f) Career counseling.
(g) Tutorial programs.
(h) Project management.
(i) Tests and measurements.
(j) Orientation to other programs and projects that can supplement or complement a project under the Special Programs.

Summary of Comments, Responses, and Changes

In the notice of proposed rulemaking published in the Federal Register on December 31, 1980 (45 FR 88922-88926), the Secretary invited comments on the proposed regulations for the Training Program.

The following includes a summary of the substantive public comments received and the Secretary's response to those comments, including any changes. The comments and responses are organized in the same order as the referenced sections are organized in these final regulations. Section numbers and section headings in parentheses are the numbers and headings that appeared in the notice of proposed rulemaking but that have been renumbered, retitled, or deleted in these final regulations.

The Secretary has made a number of other changes in these regulations in an effort to deregulate and to reduce burdens on applicants and grantees. Each of these changes is also described together with an explanation for the change. In addition, some technical and editorial revisions have been made in the language of the regulations.

Section 642.1 Training Program for Special Programs Staff and Leadership Personnel

Comment. One commenter expressed concern that § 642.1 did not adequately reflect the language of the legislation.

Response. A change has been made. This section has been revised to more accurately reflect the authorizing legislation.

Section 642.2 Eligible applicants.

Eligible grantees.

Comment. One commenter noted that "combinations of institutions of higher education" are listed as eligible applicants in § 642.2(a)(2) of the proposed regulations, but that the Education Amendments of 1980 did not list combinations as eligible for grants.

Response. A change has been made. Combinations of institutions of higher education and references to combinations have been deleted from these regulations.

Comment. One commenter expressed concern over the requirement of § 642.2(b) of the proposed regulations stating that unless an applicant was applying for a grant that was national or inter-regional, the applicant could apply for a grant only for a project to serve the region or State in which it was located. The commenter stated that this requirement had no basis in the authorizing legislation and was, therefore, overregulating.

Response. A change has been made. The former paragraph (b) of § 642.2 has been deleted from these final regulations.

Section 642.3 Eligible project participants.

Comment. Four commenters noted that § 642.3(b) of the proposed regulations precluded attendance at a training session in another region even if the session were relevant to the needs of the project. In addition, the commenters said this limitation has no basis in law.

Response. A change has been made. The former paragraph (b) of § 642.3 has been deleted from these final regulations. However, it should be noted that a Training Program project may pay the travel costs of the participants who attend the training session. Therefore, limitation of funds will affect the distance from which participants will be coming. The Training Program project can provide training to more participants by choosing to serve those who are closer to the training site.

Other changes. The Secretary has deleted paragraphs (a), (2), (a)(4), and (c) from these final regulations and has renumbered the remaining paragraphs. Internal review of the proposed regulations showed that the categories of individuals who were eligible to be trained were too broad and accordingly those individuals who had been listed as eligible in paragraphs (a)(2) and (a)(4) have been removed from the class of participants to be trained.
Paragraph (c)—which deals with funding priorities—has been removed from these regulations.

Section 642.5 Definitions that apply to the Training Program.

Changes. The Secretary has deleted two definitions from these final regulations, has revised one, and has added one to § 642.5(b).

The definition of "combination of institutions of higher education" is deleted because a combination is not an eligible applicant, and the term is no longer applicable to these regulations. The Secretary has revised the definition of "regional and State professional associations" to include professional associations to include regional and State professional associations. The Secretary has deleted the definition of "leadership in organizations" (section 417F of the Act) because it was deleted because the requirement concerning scope of training has been moved to § 642.5 regarding the applicability of EDGAR.

The definition of "region" is deleted so that there is more flexibility to provide training. Defining "region" to mean any one of the ten federally-recognized regions of the United States is too limiting. The definition of "leadership in organizations" (section 417F of the Act) is clearly stated and requires no elaboration. The reference to consultation now appears in § 642.34 of these regulations.

Section 642.13 (Training activities and services.)

Change. This section has been deleted from these final regulations.

Section 642.20 (How to apply for funds.)

Change. This section has been deleted from these final regulations because it duplicates § 642.5 regarding the applicability of EDGAR.

Section 642.21 (How the Secretary evaluates an application for a new award.)

Comment. Several commenters questioned the limitation of experience to the three previous years (§ 642.21(b)). Response. The Secretary has revised the definition so that there is more flexibility to provide training. Defining "region" to mean any one of the ten federally-recognized regions of the United States is too limiting. The definition of "leadership in organizations" (section 417F of the Act) is clearly stated and requires no elaboration. The reference to consultation now appears in § 642.34 of these regulations.

Section 642.34 Priorities for funding.

Change. This section has been added to the final regulations to inform applicants of funding priorities.

Section 642.42 Performance standards.

Change. This section has been deleted from the final regulations.

Section 642.50 Recordkeeping.

Change. To decrease the burden on grantees and to avoid the appearance of prescribing specific recordkeeping items through regulations, the Secretary has deleted this section. Grantees need only to conform to the EDGAR requirements (see 34 CFR 75.730-75.734).

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that
is already being gathered by or is available from any other agency or authority of the United States.

Based on the absence of any comments on this matter and the Department's own review, it has been determined that the regulations in this document do not require information that is already being gathered by or is available from any other agency or authority of the United States.

Invitation to Comment
To assist the Department in complying with the specific requirements of Executive Order 12291 and its overall requirements of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these regulations.

List of Subjects in 34 CFR Part 642
Education, Education of disadvantaged, Grant programs—education, Teachers.

Citation of Legal Authority
A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

(Catalog of Federal Domestic Assistance No. 84.103, Training Program for Special Programs Staff and Leadership Personnel)

T. H. Bell,
Secretary of Education.

The Secretary adds a new Part 642 to Title 34 of the Code of Federal Regulations to read as follows:

PART 642—TRAINING PROGRAM FOR SPECIAL PROGRAMS STAFF AND LEADERSHIP PERSONNEL

Subpart A—General

Sec. 642.1 Training Program for Special Programs Staff and Leadership Personnel.

642.2 Eligible applicants.

642.3 Eligible project participants.

642.4 Regulations that apply to the Training Program.

642.5 Definitions that apply to the Training Program.

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

642.10 Activities the Secretary assists Under the Training Program.

Subpart C [Reserved]

Subpart D—How Does the Secretary Make a Grant?

642.30 How the Secretary evaluates an application for a new award.

642.31 Selection criteria the Secretary uses.

642.32 Past performance.

642.33 Geographic distribution.

642.34 Priorities for funding.

Subpart E—What Conditions Must Be Met by a Grantee?

642.40 Allowable costs.

642.41 Nonallowable costs.

Subpart A—General

§ 642.1 Training Program for Special Programs Staff and Leadership Personnel.

The following definitions apply to this part:

"Act" means the Higher Education Act of 1965, as amended.

(20 U.S.C. 1001 et seq.)

"Institution of higher education" means an educational institution as defined in Sections 1201(a) and 481 of the Higher Education Act of 1965, as amended.

(20 U.S.C. 1141(a); 1086)

"Leadership personnel" means project directors, coordinators, and other individuals involved with the supervision and direction of projects under the Special Programs.

(20 U.S.C. 1070d; 1070d–1d)

"Special Programs" means the Upward Bound, Talent Search, Special Services for Disadvantaged Students, and Educational Opportunity Centers Programs.

(20 U.S.C. 1070d et seq.)

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

§ 642.10 Activities the Secretary assists under the Training Program.

(a) The Secretary awards assistance to train the staff and leadership personnel of a Special Programs project to enable them to more effectively operate Special Programs projects.

(b) The grants may provide support for conferences, seminars, internships, and workshops.

(20 U.S.C. 1070d, 1070d–1d)

Subpart C [Reserved]

Subpart D—How Does the Secretary Make a Grant?

§ 642.30 How the Secretary evaluates an application for a new award.

(a) The Secretary evaluates an application on the basis of the criteria in § 642.31.
§ 642.31 Selection criteria the Secretary uses.

The Secretary uses the criteria in paragraphs (a) through (f) of this section to evaluate applications:

(a) Plan of operation. (20 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(b) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(c) Evaluation plan. (10 points)

(1) The Secretary reviews each application for information that shows a clear description of how the evaluation plan for the project.

(2) The Secretary looks for information that shows—

(i) The extent to which the applicant, by evidence of past experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides,

(ii) Costs are reasonable in relation to the project activities; and

(iii) Costs are reasonable in relation to the objectives of the project.

(d) Budget and cost effectiveness. (10 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(e) Adequacy of resources. (15 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(f) Need. (25 points)

(1) The Secretary reviews each application for information that shows a need for a Training Program project.

(2) The Secretary looks for information that shows—

(i) The extent to which the proposed training addresses a specific need not addressed by other training projects available to Special Programs personnel;

(ii) The extent to which the proposed training addresses a significant training need in the region(s) to be served; and

(iii) The extent to which the proposed training addresses needs that are consistent with the priorities established by the Secretary as authorized under § 642.34.

§ 642.32 Priorities for funding.

(a) The Secretary, after consultation with regional and State professional associations of persons having special knowledge with respect to the training needs of Special Programs personnel, will establish annual funding priorities.

(b) The Secretary announces these priorities in the application notice published in the Federal Register.

(c) The Secretary considers an application for a Training Program project that does not address one of the priorities established for the year if the applicant addresses another significant training need in the local area being served by the Special Programs.

§ 642.33 Geographic distribution.

(a) The Secretary, after consultation with regional and State professional associations of persons having special knowledge with respect to the training needs of Special Programs personnel, will establish annual funding priorities.

(b) The Secretary announces these priorities in the application notice published in the Federal Register.

(c) The Secretary considers an application for a Training Program project that does not address one of the priorities established for the year if the applicant addresses another significant training need in the local area being served by the Special Programs.

§ 642.34 Allowable costs.

(a) Rental of space, if space is not available at a sponsoring institution and if the space is not owned by a sponsoring institution.

(b) Printing.

(c) Postage.

(d) Purchase or rental of equipment if approved in writing by the Secretary.

(e) Consumable supplies.

(f) Transportation costs for participants and training staff.

(g) Lodging and subsistence costs for participants and training staff.

(h) Transportation costs, lodging and subsistence costs, and fees for consultants, if any.

(i) Honorariums for speakers who are not members of the staff or consultants to the project.

(j) Other costs that are specifically approved in advance and in writing by the Secretary.

§ 642.41 Nonallowable costs.

Costs that may not be charged against a grant under this program include the following:
(a) Research not directly related to the evaluation or improvement of the project.

(b) Construction, renovation, or remodeling of any facilities.

(c) Stipends, tuition fees, and other direct financial assistance to trainees other than those participating in internships.

(20 U.S.C. 1070d, 1070d-1d)
