

BICYCLE FOR FIFTEEN.

Its a Quindecuplet and Some Enterprising Brooklynites Will Mount-It.

This is a picture of the giant cycle that is being constructed by a New York manufacturer. Every one has to work his way. The quindecuplet, when completed, will be the most remarkable thing ever turned out of a bicycle shop. The sextuplet, which some people think can be propelled faster than the Empire State express, has become an old story, and an English firm has already turned out a machine with twelve saddles. This fifteen-man wheel is a far greater undertaking than the duodecuplet, for the strain and the consequent necessity for strength and nicety of construction multiply in increased proportion as the number of riders is increased. It is for a lot of Brooklyn riders that the new wheel is being built. C. H. Jones, the captain of the prospective crew of fifteen, visited the manufacturers to learn if such a machine could be made so as to be prac-

Mrs. Hoife is a granddaughter of Joseph Jefferson, the actor. George B. Harris, Chicago, is at the Oceanic, with his family, for the season.

COLD SWIMS THE RAGE AT LAKE GEORGE.

Lake George, July 11.—With the passing of the Fourth the display of bunting along shore seems to grow. Nearly every cottage and hotel has a pier on the lake, and either on or near the pier a flag staff. When the hotels are open and the cottages occupied the American flag is cast to the breeze. This is the season for camping parties. In the neighborhood of the Hundred Islands scores of white tents begin to dot the shore and in the late afternoon scores of rowboats, filled with mandolin and guitar playing Summer girls and beaux thread the channels winding about among the islands. Another feature of life at Lake George that has been steadily growing in favor for two or three years is bathing. Five years ago I remember asking a lovely young woman at Fort William Henry if she had ever indulged in the luxury of a swim in Lake George. Looking at me with surprise depicted in every lineament of her expressive countenance, she exclaimed: "Heavens! people do not bathe at Lake George." Then, seeing my look of amusement, suddenly changed the remark into, "Do not go in swimming here, I mean."

Richfield Chivalry. Tipple—Daisy is all wrapped up in Joe. Sissy—So I noticed yesterday evening. But it was quite chilly in the Summer house.

The ladies competed in clay pigeon shooting, Miss eBrhardt winning the first place in the open contest, and Mrs. Rabler first in the contest open to members only. Thursday evening was the most enjoyable occasion, when with fireworks, music and appropriate ceremonies the king of the contest was crowned and the other prizes awarded. Excursions were made to Mount Washington, the Notch and the Willey House, and they returned to New York tonight. The Jefferson, having been newly remodelled and put in fine order, opened as an annex to the Waumbek, Thursday. Among the early guests to this new hotel on Jefferson Hill were Mr. and Mrs. W. T. THE BIGGEST BICYCLE THAT WAS EVER DESIGNED.

able. One or two makers told him it could be only a curiosity, and even if it stood, would become a white elephant. And besides, it would cost much more than it would be worth. The next wheel-maker told a different story. He would make it, and make it to wear, and so it would travel like the wind if the requisite amount of leg action were put into it, and would consider himself paid if he had all right," said Wheelman Jones. "Make your plans and specifications, and go to work with the building." Then he laid down a deposit, and the work was begun. The big wheel is not a bicycle. It travels upon three wheels, and about the front saddle occupied by the steersman, it is practically two seven-men bicycles, joined up side by side. The forward, or steersman's wheel, will be twenty-six inches in diameter, the two rear wheels thirty inches. The tubing of the bracket forward into which the frames are inserted, will, owing to the enormous weight and strain, have to be of double the ordinary thickness, which is one-sixteenth of an inch. The frame tubing will be almost solid, one and a quarter inches in thickness. It will be doubly reinforced all around. The best of steel tubing will be used. The gear will be 168, more than twice of the ordinary tandems, and each division, with a force of these fifteen lbs of legs back of it, will drive this hilped of cycles about 168 feet. The chains will not be different from the in general use. The three will be 1 inches in diameter, with rubber one-fourth of an inch thick and double reinforcement where they come in contact with the ground. The tangent spokes will be one-eighth of an inch thick, which is double the thickness of those used in everyday "bikes." There will be one bottom bracket to each saddle, and all will be made doubly strong. When this establishment whirls down a country road, old Jabez will lean on his hoe and watch, with his eyes bulging out like horsechestnuts.

Frank A. Edwards, of the First United States Cavalry Regiment. The drills, guard mounts, etc., are performed daily by these youthful soldiers with all the coolness and precision of old veterans. Miss Jeannette Everham, Brooklyn, is a recent arrival. Will H. Low, New York, with his wife and party of friends is stopping at the Ocean House. LIFE AT ISLES OF SHOALS.

No One is Trying to Be Fashionable, but, Instead, the Visitors Are Enjoying Themselves Hugely. Isles of Shoals, July 10.—A feature of life here this season is the general tendency to throw all thoughts of Summer resort fashion aside and enjoy life in the simplest, unostentatious way possible. Perhaps by the middle of the month, when the ultra-fashionable visitor generally puts in an appearance, this state of affairs may change, but just now it is so pronounced as to be delightful. Dr. J. W. Warren, Philadelphia, was the first guest to arrive this season. Lucius S. Moore and family, Detroit, are

IN THE WHITE MOUNTAINS.

Society is Planning a Gay Programme for a Lively Season. Twin Mountain, N. H., July 10.—Cooling breezes and the kindest of skies have made the trip of the Independent New York Schutzen, Captain Weber, a complete success. The party numbered about one hundred and fifty, including many ladies, and Boswald's Band, which accompanied them, furnished music to while away the moments when there was danger of any lull in the round of amusements. The most notable feature was the shooting contest for the King's prize, which took place on Tuesday, and the score or more of other trophies. In the turkey shoot, which claimed the attention of the men, Mr. Haiman made the lucky shot which knocked down the king piece. A triumphal procession was then formed, and the victor was escorted to the
