People who lease Hotel Belleclaire apartments renew their leases year after year.

Changes are made very infrequently. Even then they are caused by reasons which cannot be associated in any way with a wish to leave the hotel.

So far as we know, no lessee has ever given up an apartment because of any dissatisfaction, and it has never been necessary for us to tell any lessee to vacate, for the reason that the leases are not made with anybody till after a thorough investigation has been made.

People must be favorably known in order to be given a chance to live at the Belleclaire.

There are very few apartments to lease from October 1st on.

Please understand they are not housekeeping apartments—their furniture and furnishings belong to the Hotel.

You are not compelled to dine at the Hotel, although it is natural for us to expect you to do so, owing to the reputation the Belleclaire enjoys for serving food splendidly cooked. It is an infrequent occurrence for any of our lessees or transient guests to dine away from the Hotel, but when they do, they come back quickly enough and get re-acquainted with our good food and our good cooking. They can't find any better in all New York.

If you are thinking of living at the Belleclaire, you had better see our apartments as soon as possible; they will all be taken soon.

IDEAL REFRIGERATOR
All Metal—Inside and Out

The new metal construction has been a success from the start in the field for which it was designed. Investigation has convinced the makers that the same features which have established its success in the moist Southern climates recommend the IDEAL as a superior type of Refrigerator in a climate such as prevails on our Atlantic Coast.

Specially Low Introductory Prices

Model 23 (Illustrated); 36x20 1/2 x 49 1/2; 150 lbs. ice capacity; list price, \$69.00; now... \$45

IDEAL REFRIGERATORS have in most respects the same construction as the famous Bohn Syphon Refrigerators—One-piece, round-cornered, fused Porcelain-Steel Lining; Flaximum insulation; Front Drain, etc. Low temperature ensures ice economy.
