

Waterman's Ideal is the Soldier's Pen

THIS fountain pen can be conveniently carried, afield or afloat, ready for instant writing use, any moment. The ink is self-contained. Even a small size Waterman's Ideal will write thousands of words with one filling. Starts to write the minute point touches paper; will not miss fire or blot. The ink is scientifically and safely controlled by the

Waterman Spoon Feed. Quickly refilled when empty. Waterman's Ideal is strong and durable—it will withstand the hard usage of Army life and serve for years in after-the-war times. Waterman's Ideal service extends throughout the world, assuring pen and point being suited to the hand and writing of its owner, permanent satisfaction and local attention.

Waterman's Ideal Fountain Pen

In purchasing a Waterman's Ideal for your own use, your local dealer will take special interest in showing you the various types in which it is made and will fit your hand in the type preferred.

When buying as gifts for boys in the service, a good smooth medium point is usually preferred. If, however, a broad stub, an exceedingly fine, a very flexible or other point is known to be preferred, it can be had in Waterman's Ideal, or the action of any favorite steel pen can be exactly matched. There is a Safety Type, in which the cap hermetically seals the ink supply, providing a fountain pen which can be carried in any position in the kit, trousers pocket or anywhere, with perfect safety. There is a Self-Filling type which can be refilled instantly from any ink supply by a mere pressure of the finger and which has a security screw-lock cap.

There are other types for various requirements, and in all these Waterman's Ideals one can be had from short vest pocket length up to the large sizes with great ink capacity and large gold points. The Clip-Cap is the safeguard against loss.

All Waterman's Ideals can be had in just the plain or chased hard rubber or elaborately mounted with gold and silver trimmings. Every pen is fitted, tested and inspected for perfection and is fully guaranteed.

The prices increase with the size of the gold pen and holder or the amount of gold or silver decorations.

There should be a Waterman's Ideal in the kit of every Soldier and Sailor—then they can write American History as well as make it.
