

SHELL SHOCK

One of the most interesting phases of training on the Western front is devoted to accustoming the fighter to heavy explosions. This photograph shows members of a machine gun school firing with a steady hand and cool head while a nearby mine explodes.

This is an interesting example of the effectiveness of such training. A shell has just exploded. The two Hun prisoners are ducking in panic. Tommy—well, look at him!
British Official, from Underwood & Underwood.

At first you jump half out of your saddle when the night blazes and booms on all sides. But after a while you don't even wink.
