

The Dutch Method of Washing

How Simple and Easy This Is

Thrifty Dutch housewives wash their clothes in the white-sanded canals running through their farms. They force water through the mesh of the garments by striking the water with huge paddles. After years of this method of washing the clothes remain unharmed.

When one of these Dutch women came to America she was confronted with our many unfamiliar customs, among them our method of washing. She could not accustom herself to our back-breaking washboard, which rubbed her delicate garments into shreds and left her flannels and blankets hard and rough.

While she rubbed and tugged at her work over the washboard her thoughts were always of the old and better way—

FORCING THE WATER THROUGH THE MESH OF THE GARMENTS.

Then one Sunday she read in The New York Tribune about a machine that washed the good old Dutch way.

The advertisement said: "The EASY Vacuum Electric Washer does not rub, drag, jerk or tumble the clothes—it cleanses by a more scientific and efficient method. Two vacuum cups moving up and down force the hot, soapy water through the mesh of the garments, loosening and removing all of the dirt and foreign substance from them. Your daintiest lingerie and laces, your flannels and blankets, and even your heavy bath mats and rag rugs, are not too much for it."

"Just the thing!" thought she; "Yankee ingenuity 'beats the Dutch.'"

ZINC
\$125.

Come and examine this EASY VACUUM ELECTRIC WASHER at the Display Rooms of J. Livingston and Company—and you will see for yourself that this washer is indestructible, inexpensive and simple to operate—a delight to housewives who do their own washing and a blessing to the professional laundress. It will pay for itself in less than a year.

COPPER
\$150.
