

Number Five of the
Tribune Series of the Greatest Scenic Wonders of America

Niagara Falls

NIAGARA FALLS, the greatest in America, is visited yearly by between 800,000 and 1,200,000 travellers. Unequalled in beauty, its waters drop from a height of 160 feet, thundering forth a gigantic power symbolic of the energy

that has steadily marked the progress of our Western civilization. This power is gradually being harnessed for practical purposes, and it is estimated that Niagara is now contributing the equivalent of 300,000 horsepower to our business interests.
