

"EASY" Vacuum Electric WASHER

Manufactured by the Syracuse Washer Corporation,
Syracuse, N. Y.

AMERICA Electric Vacuum CLEANER

Manufactured by the Wise-McClung Co.,
New Philadelphia, Ohio.

Washing clothes and cleaning house—once the work and duty of the housewife—are now simply "work under supervision."

Electricity and its appliances have made it possible for the lady of the house to turn the button and "direct" the work to be done.

Women, now as never before, have cleaner, more livable homes, and all without the old-time slavery.

The "EASY" Vacuum Electric Washer cleanses clothes by means of air pressure and suction—no rubbing, dragging or friction to stretch, wear or tear the clothes.

The two suction cups rotate and at the same time move up and down sixty times per minute—on the down stroke they force air and soapy water through the mesh of the fabric. On the up stroke the suction draws the soapy water back through the fabric, thus carrying with it all dirt and foreign substance.

It will wash the daintiest materials or heavy blankets. It leaves blankets, woolens and flannels soft, downy and pleasant to the touch.

It will double the life of your clothes, linens and other washable materials.

It provides you with clean, fresh, wholesome laundry because it operates under your own direction in your own home.

It is sanitary and easily kept clean because it is made from solid copper and other metals.

It has proved itself by every test the ideal Washer, best adapted to the all-around need of the American home.

The America Electric Vacuum Cleaner is for cleaning the things that can't be put in soap and water.

It is highly efficient, substantial, and built to last a lifetime.

No dirt escapes it.

Lint, threads, deeply imbedded dust and dirt all yield to the most powerful suction mechanism of any portable cleaner.

Its divided, spiral brush does not clog up with strings and other dirt.

A convenient trip lever starts and stops the motor by foot.

All electric connections are contained in the motor housing free from dirt and accident.

Every feature of this machine will please you—and the results delight you.

Special nozzles for cleaning heavy plush upholstery, portieres and tapestries.

Don't fail to see these two blessings for the modern housekeeper at our display rooms—just a block from Grand Central Station.

Let us demonstrate how easily and conveniently they can be put to work in your own home and to pay for themselves in less than one year.

Convenient Monthly Payments if Desired
