

Wherever milk is needed - use

KRYSTALAK

Better for cooking than fluid milk

FOR Krystalak is milk in dry form—clean, pure white crystals of the most satisfying and easily digested form of separated milk. Doctors and food experts tell us that separated milk contains chiefly proteins, essential for body building. The fats which have been removed can well be more satisfactorily obtained from other foods.

Use Krystalak just as you would fluid milk—4 level tablespoons to a cup of water or a cup of Krystalak to a quart. Stir it for a second—it dissolves instantly—and there you have uniform guaranteed-clean skimmed milk for any cooking purpose.

A safe kitchen demands Krystalak—it is absolutely clean. A saving housewife rejoices in Krystalak—it is so economical—it makes cooking uniform—gives that last perfecting touch a milk dish needs to be delicious.

The unexpected guest, the milkmen's strike—Krystalak is always on hand—always ready to meet and surmount each household difficulty.

Krystalak is not a condensed milk—it does not come in a can. It is especially recommended for bread, rolls, cake, custards, creamed soups and sauces, cocoa and chocolate. In its blue striped package it keeps fresh and sweet on the pantry shelf until all is used.

The 50c package makes 5 quarts—10c a quart. Know the convenience—the safety—the economy—only Krystalak cooking gives.

Insist on the blue striped package

In the home this winter this new, handsome vacuum bottle will not break, even if it should fall from a table.

A Christmas Gift that will be useful the year round

The new vacuum bottle that will never break

"WHAT shall I give the Smiths?"
"What shall I give John for Christmas?"

Did you know that there is a new vacuum bottle that keeps hot liquids hot and cold liquids cold, **but will not break?**

In the home this winter, on motoring trips next spring, summer and fall—a vacuum bottle is a thing of constant, all-year-round usefulness.

The Stanley Ferrostat Vacuum Bottle is the only vacuum bottle that will not,

On motoring trips next spring the Stanley will prove a great convenience. If it drops no harm can be done. Made of steel, it cannot break.

cannot, break.

No worry about dropping it on the floor. No danger from cracking with boiling liquids. No glass to break. No refills to buy.

The Stanley is made of **steel**. It is lined with blue Amalite, a flexible material with a surface like porcelain.

There are no cracks, seams, or crevices in the Stanley Bottle into which liquids may penetrate.

How one man solved his Christmas problem

A well-known American sportsman, after using a Stanley for several months, was so pleased with it that last Christmas he gave away fifty Stanley bottles to his friends.

Seventy thousand Stanleys are already in use. Naturally the initial cost of the Stanley is higher than other vacuum bottles. But there is no cost of upkeep or refills for the Stanley—the first cost is the last cost.

Give your friends a gift they will appreciate all year round.

The Stanley Bottle is sold by all the best department, drug, sporting goods, hardware, jewelry and automobile accessory stores. Get one at your dealer's to-day. STANLEY INSULATING CO., 43 Exchange Place, New York.

On the picnic next fall, if the Stanley falls on a rock it will not fall you. Being a single unit of steel, it cannot break.

"It will not break"

To take on the camping trip next summer, the Stanley is the vacuum bottle that can be treated rough. This new bottle can always be depended upon, for it is made of steel.
