**What is Economy in a Refrigerator?**

Compared with the ice expense, the first cost shrinks into insignificance. The Refrigerator which is thoroughly efficient with the least consumption of ice is unquestionably the least expensive in the end.

**BOHN SYPHON REFRIGERATOR**

is enabled by the Siphon System of rapidly circulating pure, dry air, to keep its temperature down to 40°. Naturally ice melts very slowly at only 8° above freezing. Moreover, the insulation of the Bohn Refrigerator is the most effective ever devised for heat resistance. Besides the wood cases and lining, the walls have 7 heat-resisting layers, including two of Pyralinum, the exclusive Bohn insulating material. It is significant that practically all Refrigerators and Dining Cars in use today are equipped with the Bohn System. The Car Builders Know!

**CAUTION:** Do not confuse so-called "slab" enamel, French enamel, "baked porcelain," and similar linings, which usually are nothing but enamel paint over tin or wood, with the genuine porcelain lining in Bohn Refrigerators. Model No. 45 Style A (Illustrated above), size 39x21 1/2 x 48 1/2 inches, ice capacity 125 pounds, price \$30.00 is an exceptional value. Our very large line of refrigerators meets every requirement of both size and price. Call or write for illustrated catalog.
