Put a Bottle in Your Refrigerator And See What Happens

A bottle of milk, grape-juice, mineral water—anything will do. Leave it in a few hours, and see if it is wet and grimy to the touch when you take it out. Do you know that that grimy comes from impurities and smudge in the air and ice, and that that dampness catches the smudge and plasters it all over bottles, food, etc., in the butter, on the meat, in the milk and cream, if not tightly covered, 63 West 42d St., and let us show you the famous

BOHN SYPHON REFRIGERATOR

We will show Bohn Refrigerators fully loaded, with everything—food, walls, shelves, etc.—as dry as a chip, very clean and very cold. The Bohn Siphon keeps up a rapid circulation of pure cold, dry air and holds the temperature to 40°. Besides the outer casing and inner lining, the walls have seven heat-resisting layers, including two of "Flaxinum," the exclusive Bohn insulating material. That is why the railroads and car builders, almost without exception, have installed the Bohn Siphon in their refrigerator and dining cars. Call and see our large line, in both wood and white porcelain casings. Some of the best styles, including the one illustrated above, are now marked at attractive prices. We can sell you a Bohn from \$16 up. If you cannot call, write for our handsome catalog. We are the makers, not middlemen.
