Bossert Redibill Homes

"Not Even a Nail to Buy."
No regular-built home can hope to equal in strength, durability and economy any house built of Redibill Units. Every Unit consists of two sturdy walls of the best lumber (one 3/4", the other of 1/2" thickness). The two walls are separated by a 3/4" Air Chamber, which is lined with insulating felt paper. The Units are cut entirely by special machinery, to the last degree perfect in accuracy. Every Unit, the timbers and all studding are mortised and tenoned to fit snugly into one another. When erected, they are joined and then bolted together. No section depends on any nails to hold it in place. The whole construction can be readily compared with ship construction for its staunchness, strength and quality. The cost of duplicating a Redibill Home by hand-labor would be enormous. Write for catalog giving plans and prices of Redibill Homes as well as further details of construction. **LOUIS BOSSERT & SONS,** Builders of Bungalows for 25 years. 1819 Grand Street, Brooklyn, N.
